Senator Douglas at Home.—The author of the Kansas-Nebraska Bill has received a rebuke from his constituents, which he will not soon forget, and which ought to be a lesson to all pro-slavery politicians. For some time past he had been delivering addresses on Nebraska, in different parts of the country. Last week arrangements were made for a grand meeting in Chicago, at which he was expected to vindicate himself from the various charges brought against him. A large concourse of people assembled on the occasion, but as soon as Mr. Douglas ascended the stand, an uproar commenced, which entirely drowned his voice; and after numerous ineffectual attempts on the part of his friends to restore quiet, he was compelled to leave the stand without a hearing.

Religious Liberty in New Jersey.—The *Elizabethtown Journal* says that it has been informed, that in consequence of the Romanists threatening injury to a Protestant Church in Woodbridge, on Sunday last, a large party of Americans went from Rahway for the purpose of protecting it and the congregation worshiping in it. The occasion of the disturbance was the renunciation of Popery by a young man whose father and friends stationed themselves at the church door, with the avowed intention of taking his life if he entered the church. They afterward waylaid him and would probably have murdered him but for the protection given him by the Americans.

Keeping open Business Establishments on Sunday.—On the complaint of the Governors of the Alms-House against Balch and others, keepers of Daguerreotype establishments in Chatham-st., N. Y., for violation of the law, as is alleged, in keeping open on Sunday and doing business, Justice Stuart, before whom the matter came, has rendered a decision. He stated that keeping open such saloons on Sunday for the reception of visitors was a violation of the law; that the consequence of such a conviction was, to subject the parties to a fine of one dollar a piece, and work a forfeiture of all property exposed publicly for sale; that in these particular cases he had concluded merely to impose the fine, inasmuch as he believed that such a decision would be sufficient to induce the defendants to observe the law hereafter; that he could not expect that any considerable or respectable class of men would willingly violate the law or array themselves against it. If, however, a continuous violation of the law occurred, and these defendants kept on in the same manner complained of, he would not hesitate to apply the additional remedy, by forfeiting all their goods which may be actually exposed, provided the evidence is sufficient to authorize him in issuing the warrant.

Finances of the American Board.—The *Journal of Missions* gives the following statement of the finances of the American Board of Commissioners for Foreign Missions:—

At the close of the financial year, July 31, 1853, there was a balance in the treasury of $4320.64. During the year which closed July 31, 1854, $297,190.86 were received in donations, and legacies, and $8596.40 from other sources; making the available funds for the year, $310,107.90. The expenditures for the same period have been $322,150.39, making a balance against the Board of $12,042.49.

A comparison of the receipts of the Board for 1852–3 and 1853–4 may be of interest. The total income of the Board, for the year ending with July, 1853, was $314,922.88. Of this, $269,899.42 were from donations, and $35,156.16 from legacies. The donations for the year ending July, 1854, were $264,951,97, and the legacies, $32,238.89. The former year, $12,842.18 in donations, and $63 in legacies, were received from foreign lands; the latter year, the amount from foreign lands, in donations, was $9863.75, and $134 in legacies. The contributions to the Children's Education Fund, in the former year, were $7020.22, in the latter, $6560.76.

A Colored Doctor.—Dr. DeGrasse, a colored physician of Boston, was recently admitted a member of the Massachusetts Medical Society—probably the first instance of such an honor being conferred on a colored man in this country. The *Independent* gives the following sketch of the man:—

"The Dr. is a native of New York City, where he was born June, 1825, and where he spent his time in private and public schools till 1840. He then entered the Oneida Institute, Beriah Green, President, and spent one year; but as Latin was not taught there, he left and entered the Clinton Seminary, where he remained two years, intending to enter college in the fall of 1843. He was turned from this purpose, however, by the persuasions of a friend in France; and after spending two years in a college in that country, he returned to New York in Nov., 1845, and commenced the study of medicine with Dr. Samuel R. Childs, of that city. There he spent two years in patient and diligent study, and then two more in attending the medical lectures of Bowdoin College, Me. Leaving that institution with honor in May, 1849, he went again to Europe in the autumn of that year, and spent considerable time in the hospitals of Paris, traveling at intervals through parts of France, England, Italy, and Switzerland."

RELIGIOUS INTELLIGENCE.

The Turkish Missions Aid Society, recently formed in England to assist missions to the Greek and other nominally Christian subjects of the Porte, have already claims upon their funds. An appeal has been addressed to their Secretary, by one of the American missionaries at Constantinople, on behalf of a Protestant church and community at Broosa, in Western Asia, whose chapel and school-house were, some weeks since, destroyed by a fire which, spreading with great rapidity, caused the destruction of above 40 houses in its course.

Henry F. La[illegible] late of the Newton Theological Institution, was ordained pastor of the Baptist Society in New London, N. H., on the 27th ult. It is said that this society, which was constituted in 1788, has never before ordained a pastor, that for a long period it was the only religious society in the town, and at present is the only one that maintains public worship, and also that baptism was never administered in the town except according to the Baptist mode.

The results reached in the twenty-two years' existence of the American Baptist Home Mission Society are as follows: 1996 missionaries have been employed among the destitute; 22,000 have been baptized; 900 churches organized; 500 young men brought into the ministry; 20,000 children gathered into the Sabbath-schools; and the Gospel preached in fourteen different languages.

During the Oberlin College commencement week (from the 14th to the 20th of August) 600 students were examined. The literary performances of the young ladies are very highly spoken of. Two students were buried on the 20th, and a very sweet young lady a few days before. The graduates were twelve young men, and one young lady, who received the degree of Mistress of Arts.

The *Independent* announces the death of two eminent female missionaries; the first Mrs. Williams, of Rome, Oneida Co., in this State, who expired on her litter on the great Assyrian Plain, about 40 miles east of Mosul; and Mrs. Sarah Hodges Nutting, who departed this life on the 8th of July, at Aintab, in Syria.

The Second Baptist church in Wilmington, Delaware, says the *Christian Chronicle*, is in a prosperous condition. The pastor, Rev. Mr. Charlton, has administered the ordinance of baptism to eighty persons during the past few months, making the present number of members more than four hundred.

The Richmond (Va.) *Religious Herald* says of Anthony Burns, "He is not an ordained minister of the Baptist Church. We have no colored ordained ministers, in Eastern Virginia at least. They are permitted to exhort, but our State laws forbid their being recognized as ministers."

The Secretary of the Hawaiian Missionary Society gives information that the sum of $1,000 has been appropriated by that Society toward missionary operations in Japan.

Of the 248 Unitarian ministers in this country, fifty, or more than a fifth were born in Boston. Indeed, it is highly probable that one-fourth have sprung from that city.

Street preaching has been revived in Great Britain to a considerable extent. No less a person than Dr. Hanna, the son-in-law and biographer of Dr. Chalmers, is engaged in street preaching.

EMIGRATION TO KANSAS.

In answer to numerous letters relative to the soil and climate of Kansas, the means of reaching it, and the aid afforded by the Emigration Societies, the *N. Y. Tribune* says:—

1. There is no question as to the fertility of much of the soil and mildness of the temperature of Kansas. Its climate is in the average about the same as that of Baltimore, Pittsburgh, Washington City, Wheeling and Cincinnati. Much of the soil is a deep, rich, black prairie loam, hardly excelled. Timber is scarce in many parts of the Territory; but every one who goes thither for the next year or two can locate in the midst or along the edge of a forest if he sees fit. But timber *will* be scarce in Kansas unless planted very soon; and probably no better investment could be now made than in taking up prairie lands away from any timber, plowing forty acres here and there, and planting with Locust, Hickory, Peach, &c., in the fall and with Corn the following spring. Plow around and around the outside of this plantation the next fall, so as to keep out the fires; plant the Corn early in the spring, harvest in September, plow and sow with Wheat; which harvest and plow again in August, so as to keep off the prairie fires from the young trees. In four or five years the Peach will bear fruit, which will always be wanted by the newer settlers; in ten years from the start, the Peach trees should be cut out for fuel and light fencing, leaving the roots to send up fresh and vigorous shoots; and by this time the Locust will begin to be worth cutting, when it should be treated in like manner, leaving the slower Hickory to be cut last. Of course, an experienced woodsman may suggest species of trees preferable to some or all of these; but the thrifty, provident man who would leave a property to his children can hardly invest his money and labor better or safer than in tree-planting on any of the great Western prairies.

2. As to the means of transportation, we know none other equal to those proffered by the Kansas Emigration Society, having its headquarters at Worcester, Mass. Its Secretary is Edward E. Hale, who will answer all reasonable inquiries by circular or letter. We believe he is also compiling a small book, giving information respecting Kansas and practical directions as to the best means of reaching that Territory. The cost of passage per head is $25 from Boston or New York to the Kansas line, which does not include provisions. Emigrants can make arrangements beforehand to join at almost any point on the route.

3. We have been asked to state whether any Emigrant Society pays part or all of the passage of those wishing to emigrate to Kansas, but unable to pay their way. We know no such, and trust there is none. There are few persons unable to pay their passage to Kansas who would be able to fight their own battle after reaching that Territory, and the settlers should not, *must* not, be loaded down in the infancy of their enterprise with paupers. No one should go to Kansas these five years who has not proved his ability to make a fair living and something over in the States.

4. There is a "Union Emigrating Society" organized for Kansas by the Anti-Nebraska Members of Congress at Washington City, whereof the Hon. J. Z. Goodrich of Berkshire Co., Mass., is President. The formation of Auxiliary Societies in towns or counties throughout the Union is recommended. Members pay $1 each per year, to promote the general objects of the Society.

THAT VANDALISM.—Several weeks ago we copied from the London *Athæneum* a paragraph in relation to the destruction of sacred places in Palestine. Soon afterward we were requested to print a denial of the statements of that paragraph, which we thought best to delay until the facts were known. In the *Independent* of last week we find the following article on the subject, credited to the New York *Observer*:—

"In our paper two weeks ago, we volunteered a denial of a statement made by the British Consul at Jerusalem, to the effect that a man named *Jones*, an American, had been guilty of shocking Vandalism in robbing monuments and venerable ruins in Palestine. We are mortified to be under the necessity of withdrawing our denial, and of leaving our countryman to meet the charges made against him. We have received such evidence on the subject as convinces us against our will, and we now fear that this Jones, an agent of the Society for Meliorating the Condition of the Jews, is no better than the rest of the persons employed in the so-called 'Agricultural Mission in Palestine,' an enterprise which we do not believe to be entitled to the support of the Christian people of this or any other country We had hoped to be spared the necessity of going into this subject, but we are abundantly prepared to give our reasons for entertaining this opinion."

ORIGIN OF A REVIVAL.—At the late meeting of the alumni, one of the speakers stated that the first fact in the great revival enjoyed in Hamilton, a year ago last winter, was like this: A young man, not pious, entered the University. On taking his room, he observed in a niche in that room the name of his own father, inscribed by the hand of that father himself, who, twenty years before, had occupied the same room as a student. This fact drew after it such a train of solemn reflections as to lead him at once to penitence and prayer. An officer of the University was passing by his room, and hearing his sobs and supplications, entered, and ascertained the real facts of the case. It was the beginning of an extensive revival. Rev. S. S. Day, of the Teloogoo mission, was the father of the young man, and responded with a father's emotion to the relation of this incident.

FIRST MUSSULMAN CONVERTS.—A deeply interesting circumstance occurred at Salonica last year, in the conversion to Christianity of a respectable Moslem merchant, with his wife, four children, and sister-in-law. He had for some years been reading a Bible given him by an Armenian convert to Protestantism, and holding Christian worship in his family. Feeling, at last, conscientiously bound to avow, at all risks, his change of faith, he removed with his whole family to Constantinople, and applied to the American missionaries for baptism. The high fanatical excitement caused by the knowledge of his intention among the Moslem population of the city, endangering their lives, he removed to Malta, where he and his family were baptized, and two of his sons have been received as *free* pupils into the Malta Protestant College. The father, who is a man of good ability, is attending, also, several branches of the course of studies. This family may be considered the first fruits reaped by Christianity from the ranks of Islamism.

European News.

One week later dates from Europe have been received since our last.

We have particulars of the destruction of Bomarsund. It was one of those mysterious episodes in which the present war abounds. Eight thousand French soldiers disembark on the Aland Island on the 8th; the Russians offer but a slight resistance and retire into the fortress without any serious loss; the bombardment of the two outworks is commenced on the 13th; no trenches are dug, no breach is battered, but one of the outworks is taken on the 15th, and the garrison, above 2,000 men, surrender on the following day at discretion, and give up the fortress of Bomarsund, with all the stores of provisions and ammunition, sufficient for one year, and the heavy armament!

There is reason to believe that the Turkish army in Asia has met with a decisive defeat. A Vienna dispatch states, but without date, that Gen. Bebutoff had attacked and signally routed the main body of the Turks under the walls of Kars. The Russians say they killed 3,000 Turks, took 2,000 prisoners, including 84 staff and other officers, and captured 15 guns, with an immense amount of military stores. The shattered remains of the Turkish force had dispersed.

From Odessa, August 15, it is stated that a band of Caucasianmountaineers, commanded by a son of Shamyl, made a razzia into the province of Tiflis. They sacked several places, put some persons to death, and carried off a Russian General's wife and her sister the Princess Orbelian. The news had caused a panic at Tiflis.

On the 10th Aug., at 7 o'clock in the evening, a great fire broke out at Varna. One hundred and eighty houses were totally destroyed, with a great quantity of provisions belonging to the French army.

From all parts of Europe come reports of a most abundant harvest.

California and China News.

The steamer Star of the West, with two weeks later news from the Pacific coast, and ten days later from China, arrived at New York on the 8th inst. She brought 450 passengers, and over one million dollars in gold dust on freight.

From the Gold Region, the news is not important. Miners were doing pretty well.

From every section of the State we have the most cheering accounts of abundant crops of grains and grasses. The exportation of wheat to the Atlantic States is seriously contemplated. Fruits of many kinds, as melons, pears, figs and apricots, are abundant and cheap. The grape crop promises to be very large.

On the 2d Aug., a fire broke out in the town of Bidwell, on the Yuba River, and in one hour the town was totally destroyed, excepting about six or seven houses, which were distant from the main street. Estimated loss —$100,000.

Immigrants are arriving in all parts of the State, by way of the Plains. They are generally in good condition, as well as their stock; and they report an abundance of grass on all the different routes traveled.

The subject of Chinese immigration has become one of so much importance as to attract the attention of nearly all classes of community. A number of the newspapers of the State are clamorous for legislative interference.

Capt. Maloney, of the bark Libertad, has been fined $200 in the Recorder's Court, for a breach of the U. S. Passenger Laws, in overcrowding his vessel. His passengers were Chinese, of whom 100 died on the passage from China to San Francisco, and about 50 after the vessel arrived there.

A lake of salt has been discovered in Los Angeles County, and a company have commenced its manufacture. There is said to be no limit to the quantity in which this article may be procured.

From Oregon and Washington Territory there is nothing of consequence. The great stories about the Coquille gold mines were all moonshine. The Hon. John W. Davis has resigned the Governorship of Oregon, and came to New York in the Star of the West.

Apples are selling in Portland at $4½ a dozen.

John Davenport, Esq., had just returned from a visit to the States, and has brought with him a hive of honey bees, an enterprise hitherto supposed impracticable. The bees are apparently in good health, and not less in numbers than when hived for the journey.

The Portland *Times* says the demand for labor in that Territory exceeds the supply. Carpenters receive from $4 to $5 per day, blacksmiths the same, day laborers from $2 to $3, and our farmers are paying as high as $3 per day for hands to harvest.

There are now eight steamers running on the lower Willamette River. The Willamette is about half the width of the Ohio River. It is navigable eight months in the year, 80 miles above Oregon City, for steamboats of large size.

Steam communication with the Sandwich Islands has been established. A joint French and English fleet had visited Honolulu, and again put to sea. Annexation to the United States was the prominent topic of discussion.

The most important news by this arrival is from China. An insurrection had broken out around Canton, and there were rumors that the insurgents had captured the city.

The *Friend of China*, July 1st, says that the disturbed districts are between the Bogue Forts, at the mouth of the Canton River, and the city. The large town of Toon-koon is in possession of the rebels, and there were rumors that Canton would be invested, although the foreign residents expressed a good deal of confidence in their position.

The Governor-General had decapitated 300 persons within the previous fortnight, with a view to terrify the insurgents.

The barks Hygeia and Topaz were wrecked on the Prata Shoals, and four hundred passengers still remained there.

Destruction of San Salvador.

A correspondent of the N. Y. *Tribune* says that the first accounts of the recent destruction of San Salvador by an earthquake were exaggerated as regards the loss of human life. Not more than 150 are known to be lost, though of course there may be many more of whom nothing is or will be known until Time yields up his records to Eternity; but, as in the time of the deluge, God gave them timely warning, and all those who heeded it escaped with life. Nearly all those who perished in the ruins were of the poorer classes, who remained in the hope of gaining reward for rescuing the property of the wealthy. Alas! they are not the first who have lost their lives by the temptation of gold. Poor creatures! need enough they had of it; for though the poorer classes of this country work like slaves, they seldom gain more than a daily subsistence, and have nothing for their future prospect but an oldage of beggary and the cold hand of charity to smooth their dying couches. But the reports as to the entire destruction of the city are sadly confirmed; and up to the last accounts the motion still continued, and even the remnants of the walls that escaped the great shock are now leveled to the ground.

INDIAN MASSACRE.—A dispatch dated St. Louis, Friday, Sept. 8, 1854, says the following highly important dispatch has just been received in this city, by special express from Fort Leavenworth:—

Lieutenant Fleming states that on the 18th of August, a Sioux killed an ox belonging to an emigrant train, close to Fort Laramie. The head chief reported the fact to him, (Lieut. Fleming,) and offered to give up the offender, whereupon brevet 2d Lieut. Grattan, with the interpreter, Sergeant Favor, Corporal McNulty, and twenty privates, were sent to receive him. Lieut. Fleming subsequently learned that the whole detachment were massacred, without exception. How the deed was done, and the immediate cause of the attack, was not clearly known at the time the express left. It however had been ascertained that the Indian chief was among the killed, but the total number killed had not transpired. The Indians are reported to be extremely hostile, and the fort was considered in great danger. Reinforcements have been ordered to Fort Laramie.

SUMMARY.

Gathering coal in the bed of the Ohio river on the bars opposite Cincinnati, is just now a profitable business for a large number of men and boys, who have quite a fleet of wood boats and skiffs employed. The *Gazette* says the bars that are now yielding so well have for years been covered with sand until this season. The floods of last winter bared the treasure. Men are said to be making $10 per day taking out boulders—quite as much as is made on the California placers. They have to work in water from two to three feet deep, and look from a distance like flocks of water-fowl.

☞A fugitive slave, or rather two of them, a father with his child 2½ years old, passed through Owego, N. Y., recently, for Canada. The immediate cause of their flight from Maryland was the dread of being separated from his child, for which his master was offered $125. He himself appeared, it is said, to have suffered severely from the influence of this patriarchal institution, a brutal overseer having knocked out an eye, and otherwise mutilated him, in a fit of drunken passion. These evils he patiently endured, but the dread of being separated from his little son winged his flight from the land of bondage to the home of the oppressed.

Charles Preuss, long and favorably known as a man of high scientific attainments, who was connected with Colonel Fremont in his expeditions in the capacity of surveyor, and shared with him his dangers in making explorations of the new and unbroken country through the Rocky Mountains to the Pacific shore, suddenly left his friends in Washington, while laboring under a fit of insanity. A reward was offered for his restoration, when he was found dead near Bladensburgh, having hung himself. The deceased was a native of Hanover, Germany, aged 48, and leaves a wife and five children residing in Washington.

A dispatch dated Rochester, N. Y., Thursday, Sept. 7, 1854, says: This afternoon the engine-house of the New York Central Railroad was destroyed by fire. The building is located in the eastern part of the city. It was 160 feet in diameter, and 480 in circumference; was built of brick, and had an immense dome and roof fixed upon an iron frame-work. Seven locomotives were destroyed, and four or five hundred cords of wood burned. The fire took from the engine of the sawing-machine at the wood-pile. The loss is estimated at about $80,000.

The Committee of the American Tract Society have commissioned Mr. Charles Schaffer, for many years a Colporteur among the Germans in Indiana, and now connected with the German Mission in this City, as a Colporteur for Bremen and Bremerhaven, Germany. Some 60,000 emigrants embark annually at that port for the United States. They lodge temporarily in a large emigration house, under circumstances favorable for exerting a good influence upon them.

The Secretary of the Interior is about to restore to "market" all the land withheld from sale on account of the contemplated railroads running through or near them, except, of course, in cases where Congress has actually made the grants for railroad purposes asked. A large body of very desirable land will thus again become subject to private entry at $1 25 per acre, or to location with land-scrip. This is important to be speedily and widely known by way of preventing special action in them.

A dispatch dated Savannah, Wednesday, Sept. 6, 1854, says: In this city, the interments yesterday were twenty-three—thirteen were from yellow fever. The interments for the week were one hundred and twenty-three —seventy-four from the fever. Ninety-six stores are closed up, having suspended business.

Mrs. Fish, whose death was recently recorded, was the mother of Hamilton Fish, U. S. Senator, and widow of the late Col. Nicholas Fish, a gallant officer in the U. S. Army, and one of the old Knickerbockers. Mrs. Fish was a lineal descendant of old Governor Stuyvesant, and has lived herself to the good old age of four score years.

A letter in the Newark *Advertiser* says that the cholera continues to prevail at Genoa, Leghorn, Naples, and some smaller places in Italy, without diminution. The cases at Genoa have averaged over 120 daily, and 90 deaths during the week past, though the population is greatly diminished by death and desertion. In Naples, though one half the population has sought refuge elsewhere, there have been over 300 deaths daily for a week past. Some 35 cases are daily reported at Leghorn, but the mortality is not very great.

A dispatch dated Syracuse, Friday, Sept. 8, 1854, says: The corner-stone of the new Idiot Asylum was laid at 12 o'clock to-day, on the grounds at Geddes, formerly owned by Secretary Levenworth, who did the honors. After prayer by the Rev. Mr. Ashley, Rector of St. Paul's Church, and music by Miller's band, the stone was laid by Allen Monroe, in the absence of Governor Seymour. P. R. Wilbur, Superintendent of the Institution, was the first speaker, and was followed by the Hon. Washington Hunt, who gave a history of the movement.

A merchant in New York discovered, not long since, in his cellar, a well-filled bag, which excited his suspicions, and on examining its contents, he found it contained pieces of bread, from a half-loaf down. The porter said it belonged to the carman. The carman was called in. He had purchased the article from a lot of boys, who had obtained it by begging in Brooklyn. He intended to feed his horse upon it, which was cheaper than to buy grain at present high rates!

The passengers to and from India are now conveyed between Alexandria and the Nile, a distance of 66 miles, by rail. The first departure from Alexandia occurred on the 4th of July, with the passengers who arrived on that day by the Ripon and the canal. The most tedious part of the journey through Egypt is now avoided altogether. The whole of this line between Cairo and Alexandria, 140 miles, will be completed, probably, in about twelve months.

In the Court of Common Pleas, at Greenfield, Mass., Judge Bishop presiding, John H. Moorhouse was convicted of being a common seller of spirituous and intoxicating liquors, and was sentenced to pay a fine of $200, and give bonds in the sum of $2,000 not to violate the law for one year, and in case of failure to perform said sentence, to be imprisoned sixty days in the county jail.

Accounts from Maine state that in the vicinity of some of the burning forests quite a number of persons, chiefly females, have become insane, in consequence of excitement, the result of a belief that the general conflagrations in the woods there is a sign of the speedy ending of the world in accordance with the prediction of the Millerites. Some of them have been taken to the State Asylum.

A dispatch dated Cincinnati, Tuesday, Sept. 5, 1854, says: A young man named Short, clerk in a dry goods store in this city, and a young lawyer named Peacock, from Chicago, fought a duel in Kentucky yesterday. On the second round Short was fatally wounded in the left breast. They fought about a young girl to whom Short was engaged.

Shells weighing 100 lbs. were fired from Lancaster's long-range gun the other day on board a vessel near the Isle of Wight with a surprising result. One was sent 4,000 yards distance, and reached the top of a cliff 500 feet high. It was calculated that in a tranquil sea, so that good aim could be taken, a mark 7,000 yards distant might be hit by this gun.

That branch of the Democratic party in New York called soft-shells, met at Syracuse last week and nominated the following State ticket to be supported at the forth-coming election, viz:—

For Governor—HORATIO SEYMOUR, of Oneida.
For Lieut. Gov.—WM. H. LUDLOW, of Suffolk.
For Canal Com'r.—JASON CLARK, of Jefferson.
For St. Pr. Insp.—W. R. ANDREWS, of Livingston.

The Abington (Va.) *Democrat* says: "Recent rains have taken the curls out of the corn, and relieved a good many farmers of the wrinkles on their faces. The corn crop is not altogether so hopeless as was expected. Wherever the land was *ploughed deep*, the prospects for a tolerable crop are good, notwithstanding the severe drought,"

The New York *Tribune* has reduced the size of its sheet, "owing to the present calamitous depression in all kinds of business, and the consequent diminution of the space occupied by advertisements in its columns." The reduction has been made by narrowing and shortening the columns, and not by decreasing their number.

Lenox, in Massachusetts, says an exchange, is probably the most literary country town in America. It is at present the residence of Henry Ward Beecher, Oliver W. Holmes, Herman Melville, G. W. Curtiss, Nathaniel Hawthorne, Miss Sedgwick and Fanny Kemble Butler. It was also, till recently, the residence of G. P. R. James.

The political parties of Maine consist of Fusion Whigs, Anti-Fusion Whigs, Fusion Democrats, Morril Temperance Democrats, Nebraska Wild Cat Democrats, Anti-Nebraska Old Line Democrats, Anti-Nebraska Anti-Morril Democrats, Free Soilers, Fusion Free Soilers, Hook and Ladder Democrats, and many others.

We learn by the last mail from England, that the Government has chartered ships to convey arms and stores for defense to Halifax, St. Johns, N. B., Quebec, Montreal, Bermuda, Jamaica, Autigua, Barbadoes, St. Lucia, and Demerara. This is a measure of precaution against the United States.

On Saturday last, (says a Mississippi paper of Aug. 24th) the negro Tom, belonging to Mr. A. Carlin of this parish, was tried by a jury of slave owners, in pursuance of the act of '46, for burning a stable belonging to his master. The case was a clear one, and he was sentenced to be hung on the 15th of September next.

From Baltimore, we learn that the brokers will no receive the notes of the Farmers' and Mechanics' Bank of Kent County, Md., as they were not redeemed there by the agent of the bank.

Two hundred and seventy-three persons have emigrated from New Bedford to California. Many of this number have their families with them.

In various parts of Massachusetts, a material for the construction of dwelling-houses, stores, barns, &c., is coming into use. This new material is called concrete, and is made of gravel and lime.

At a Jubilee of the "Turners," a German company, held in Philadelphia last week, there was a general row. The Police fired their revolvers, wounded several Germans, and many more were badly beaten with billies. One of the officers was stabbed, and another severely injured by the blows which he received.

On the 6th inst., the barn, wagon house, and crib of Dea. Marke Moore, of Marlboro, N. J., was burnt, together with some thirty stacks of hay, wheat in the sheaf, and corn in the crib. Loss between one and two thousand dollars. Supposed to have been the work of an incendiary.

The Chemical Bank desires the holders of its five hundred dollar notes to present them for redemption, in order to facilitate the detection of the perpetrators of the late fraud upon the Bank, who, it appears, received $14,000 in that denomination of notes.

A dispatch dated Cincinnati, Friday, Sept. 1, 1854, says: The United States Express Company was robbed of between $30,000 and $40,000 at the Hamilton Railroad Depot last night.

In Newark, N. J., on the 5th inst., there was a deplorable riot, in which Irish Catholics and Irish Protestants were the chief combatants. One person was killed and several were wounded.

MARRIED,

In Bridgewater, N. Y., Aug. 13th, by Eld. W. B. Maxson, Mr. OSCAR SOULE to Miss CAROLINE M. ROSE, all of Bridgewater.

In Clarence, N. Y., on the 5th inst., by Rev. Rowse Babcock, Mr. HARVEY W. MAY, of Lancaster, to Miss LOUISA CLARKE, of Darien.

On the 7th inst., at Bridgeton, by the Rev. Mr. Cornwell, Mr. H. J. MULFORD to Miss MARIAH JEFERRS, all of Bridgeton, N. J.

By Eld. Leman Andrus, in Genesee, on the 5th inst., WM. H. STILLMAN, of Richburg, to SUSAN J. TANNER, of Genesee.

On the 7th inst., by the same, GEORGE G. HAMILTON, of Porttville, to SARAH SMITH, of Wirt.

DIED,

In Pomfret, Ct., Aug. 29, 1854, very suddenly, of an affection of the heart, GEORGE HAZZARD PERRY, M. D., of Hopkinton, R. I., aged 65 years, 2 months, and 15 days. Doctor Perry, the oldest son of George H. and Abigail Perry, was born in Whitestown, N. Y., on the 14th day of June, 1789. At the tender age of 14 years, he made a profession of faith in Christ, and united with that portion of the First Seventh-day Baptist Church of Hopkinton which is now 3d Hopkinton. Subsequently he removed his membership to the 2d Hopkinton Church, in which he held the office of deacon for a number of years. As a companion, he was affectionate and faithful. As a parent, kind and indulgent. As a man, he was possessed of quick mental perceptions, and of an eminently social nature, which rendered his society highly instructive and interesting to all. As a physician, the forty years of his constant and successful practice in the same communities bears the most conclusive and commendatory testimony to his skill and eminence. Few indeed of the profession have shared more largely in the confidence of their patrons, for such a period. As a Christian, he professed a catholic spirit towards others, yet was ever distrustful of his own heart, and constantly striving for the controlling power of the grace of God. A. B. B.

In Berlin, Rensselaer Co., N. Y., after a long and painful illness, SYLVIA SAUNDERS, wife of Lodowick Saunders, in the fifty-ninth year of her age. Sister Saunders was a member of the Seventh-day Baptist Church in Berlin, where for nearly thirty years she passed a life of unceasing devotion to the cause of Christ. Many and deep were the consecrated channels through which flowed the pure streams of benevolence from the exhaustless fountain of her heart. She bore with becoming patience a lingering sickness, and in the close of life the shadows of the sepulchre were dispelled by the dawnings of a brighter day. She fell "asleep in Jesus" on Thursday, the 24th of Aug.

"Asleep in Jesus—blessed sleep!
From which none ever wake to weep."

At her residence in Hopkinton, R. I., August 19th, of consumption, Mrs. MARY HOXIE, relict of Edmund Hoxie, Esq., of Charleston, aged eighty-seven years. For forty-years she has been a consistent and exemplary member of the church of Christ; twenty years of which time she has been a widow. She bore with Christian fortitude and resignation the gradual though sure and fatal progress of the disease which finally terminated her pilgrimage. During her last sickness she manifested a firm reliance in the merits of her Redeemer, saying, "All the days of my appointed time will I wait, till my change cometh." I. C. B.

On Sunday, the 3d inst, at Little Genesee, N. Y., JAMES B. MAXSON, in the 26th year of his age. The deceased was walking about, in his usual health, only two or three hours before his death. The suddenness of his death has cast a gloom over the circle in which he moved.

At his residence in Watson, on the 14th of August, of dropsy, BENJAMIN DAVIS, in the 82d year of his age. The subject of this notice, was born in Farmington, R. I., where he resided until his eighth year, when he removed with his parents to Petersburg, N. Y., from whence he moved to Brookfield, afterward to Verona, and lastly to Watson, Lewis Co, where he died, leaving to his friends and acquaintance an evidence of his hope of a blessed immortality. He left a widow (his third wife) to mourn his loss, together with 19 children, 36 grandchildren, and 19 great-grandchildren.

LETTERS.

John Whitford, D Clawson W P Langworthy, D Edwards, L C Rogers, E R Davis, W M Fahnestock, L Andrus, B F Rogers, P C Burdick, Rowse Babcock, W B Maxson, C M Lewis, Joshua Clarke, N V Hull, J E Potter, A G B[illegible], J B Maxson.

RECEIPTS.

WILLIAM M. ROGERS, Treasurer.

North-Western Association.

THE Eighth Anniversary of the Seventh-day Baptist North-Western Association will be held with the Milton Church, commencing on the fourth day of the week before the fourth Sabbath in September, 1854, at 10 o'clock A. M. Introductory discourse by Eld. O. P. Hull. V. HULL, Cor. Sec.

Mountain Glen Water Cure and Su[illegible],

For the Reception of Patients and B[illegible]

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquitoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

New Market Seminary.

THE Academic Year of this Institution, for 1854 and '55, is divided into three terms, each fourteen weeks long.

The Fall Term commences Sept. 5 and closes Dec. 8.
Winter " " Dec. B, " " Mar. 20.
Spring " " Mar. 23, " " July 4.

The Department of Instruction is in the care of Mrs. R. H. WHITFORD, Preceptress, who will be assisted by competent teachers, as occasion may require.

INSTRUCTION.—The Common English Branches, Reading, Writing, Geography, Arithmetic, and Grammar, will be taught each term. The higher English Branches taught as follows:—In the Fall Term, Chemistry, Geometry, and Book-Keeping; in the Winter, Natural Philosophy, Physiology, and Astronomy; in the Spring, Botany, Geology, and Moral Science. Algebra, Etymology, and Rhetoric taught all terms in the year. Classes in French and the Extras will be taught whenever desired.

EXPENSES.—*Tuition, per term*—for Common English Branches, $3 50; for Etymology and Book-Keeping, $4 50; for Higher English Branches and French, $5 00; for Incidentals $ 25.

Extras, per term—Penciling, $1 00; Crayoning, $2 00; Embroidery, $3 00; Oil Painting $7 00; Piano Music, $10 00.

REGULATIONS.—No student is admitted for less than half a term. No deduction in price of tuition made for absence, except in cases of sickness. Nothing sectarian is taught or countenanced in the school.

A new and commodious building will be ready for the shcool at the opening of the Fall Term.

DAVID DUNN, Pres. of Board of Trus.
ISAAC H. DUNN, Sec'y.
NEW MARKET, N. J., July 20, 1854.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice commencing Monday, April 10, 1854:—

Leave New York at 8 A M, 12 M, and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

Hudson River Railroad.

NEW ARRANGEMENT.—On and after Monday, August 14th, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

6 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains. Through in 4 hours from 31st street.

7.00 A M—Poughkeepsie Way Passenger Train.

8.00 A M—Mail Train for Albany and Troy, stopping at Peekskill, Garrisons, Cold Spring, Fishkill, New Hamburgh, Poughkeepsie, and all Mail Stations North of Poughkeepsie.

9.00 A M—Peekskill Way Passenger Train.

12.00 M—Way Train for Albany and Troy, stopping at Yonkers, Tarrytown, Sing Sing, Crugers, Peekskill, Garrisons, Cold Spring, Fishkill, New Hamburgh, Poughkeepsie, Hyde Park, Rhinebeck, Tivoli, Oakhill, Hudson, Stuyvesant, and Castleton, and connecting with the Express Train leaving Albany at 6.30 P M for Buffalo, and at Troy with Northern Trains for Saratoga and Montreal.

1.00 P M—Po'keepsie Freight and Passenger Train.

3.30 P M—Peekskill Way Passenger Train.

4.30 P M—Express Train to Albany and Troy, stopping at Tarrytown, Sing Sing, Peekskill, Garrisons, Fishkill, Poughkeepsie, and all Time Table Stations North, and connecting at Albany with Western Express Train at 10.30 P M for Buffalo.

5 00 P M—Poughkeepsie Passenger Train.

5.30 P M—To Peekskill, stopping at all Way Stations.

6.30 P M—Emigrant and Freight Train for Albany and Troy, stopping at all Time Table Stasions.

8.30 P M—To Tarrytown, stopping at all Stations.

Sunday Mail Train at 9 A. M. from Canal-st. for Albany, stopping at all Way Stations

OLIVER H. LEE, Superintendent.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Election Notice.

STATE OF NEW YORK—SECRETARY'S OFFICE, ALBANY, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District. composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Assembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

SHERIFF'S OFFICE. New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

Miscellaneous.

A Word to Young Men.

There are multitudes of young men who are "hired out" at $12 to $16 a month, to work upon farms. They are active, intelligent, and enterprising, and are earnestly desiring to get ahead in the world, but they do not quite know how to set about improving their condition. Let us say to such, that we have known many just in their condition, who are now flourishing, well-to-do farmers.

Indeed, we can point to more than one of our present subscribers, who, twelve years since, were working for $12 a month, and now they own farms of 100 to 200 acres, valued at $30 to $60 per acre. But how did they accomplish this? We will relate briefly the history of one, which will indicate the course pursued by the others.

George C——, or George, as we familiarly called him, was the son of poor parents, in the western part of this State. In 1840, he was [illegible] years old, and hired out for a year for $12[illegible]. At the end of the year, he engaged with the same man for two years longer at $300. During these three years, he pursued a course of strict economy with regard to clothing and other expenses, and managed to make $1[illegible]5 over his entire outlay. In 1843 he went to Michigan, and with $200 paid for 160 acres of government land, and commenced work. During the first year, he cleared and planted about five acres, besides working out two months at the season of highest wages. At the end of the year he had put up a convenient log dwelling, and returning to New York State, he took to himself a help mate—a poor, but healthy, enterprising girl, who had, with a little aid from home, saved enough to purchase a cow, seven sheep, and a supply of plain furniture.

We will not stop to detail all the particulars of their future course—how they spent their honeymoon, winter and first year with few conveniencies; how their food at first was chiefly furnished by the cornfield, cow, and rifle, and how they worked along for nearly ten years; but this much we learned from a friend who visited them last month, viz., that Mr. C—— has now a convenient dwelling and barns; has 104 acres of cleared land, well fenced and bearing good crops, and has refused $45 an acre for his farm. We also learned that he has a healthy family of children growing up around him; and that being an industrious and moral man withal, and one of the first settlers, he holds a station of no little influence in society. On being asked "if $[illegible]0 cash, would buy him out of house and home," his answer was that "his land, stock, crops, &c., would bring him little short of [illegible] in the market, and that he did not suppose he could better himself with $10,000 in hand; at least he had no disposition to leave the scenes of his first hardships, and birth place of his children."

Our friend and informant, who has been for twenty years tossed upon the busy sea of speculations and has accumulated $40,000, or more, remarked to us with a good deal of emphasis, "How gladly would I exchange situations with George C——." "Yes," said he. "I would throw in the odd $30,000, to exchange children with him; that is, to see mine as healthy and vigorous as his are."

Now we shall be told that George C—— was "fortunate," "had good luck," &c., but we think his success has not been greater than that of perhaps the majority of the steady, temperate, economical young men who entered upon a farmer's life fifteen to twenty years since. Let it be kept in mind, that the savings of the first years are the foundations of success. If George C——, like a majority of young men, had spent half or more of his earnings in carousals, parties, fine clothes, &c., he might still have been only a farm hand instead of an employer.

[American Agriculturist.

Illusion of an Aeronaut.

The Petersburg (Va.) *Intelligencer* of August 28th, gives the following account of an optical illusion seen by George Elliott, in a recent balloon ascension from that city:—

After he ascended about 3,000 feet, he discharged some five pounds of his ballast, when he shot onward and upward with amazing rapidity, till he began to approximate the clouds. He then discharged about five pounds more of sand, the remainder of the bag, when he again darted upward among the clouds, which were so dense as to wholly exclude all terrestrial objects from his view, and of course he was lost to all observers below. These discharges of ballast were distinctly seen by his visitors, and on the first occasion some one exclaimed that the balloon had bursted.

While among the clouds, he says it seemed to him as if he was in the midst of a large ground glass globe, some two or three hundred feet in diameter, against the side of which opposite to the sun, the shadow of the balloon rested, some five or six times larger than the corporeal one. About half way between him and the shadow, which seemed as if resting on the glass wall, another balloon was seen of a size between the shadow and the real one, resting as if in a vacuum, which displayed every color faithfully of the original. He then saw another Elliott, clad and with features like himself, and seemingly self-like. He then extended his own fingers, when he was mimicked by this image; and whether he extended one finger or more, or whatever he did, this figure duplicated exactly. When he would cause his balloon to oscillate, this balloon would move exactly like his. When he threw out more ballast to elevate himself, this figure *sank down* instead of rising with him; and when he arose above the clouds into the rays of the unclouded sun, he left the mimic aëronaut below him.

In the rays of the sun above the clouds he found it so warm as to cause him to perspire freely, a state of heat never before experienced at this hight, nearly twenty-four thousand feet, where the air is very rarified and generally very chilly. He then opened the valve for the purpose of descending, and as soon as he sank one or two thousand feet, which he ascertained by barometrical indications, he felt as if he had entered an ice-house, and a cold chill seized his whole person.

Here he again met his mimic aerial voyager, whom he kept in company for some time, from philosophical motives. Whenever he moved sideways this *mum* gentleman would move in the same direction. But when he moved up or down, the duplicate would move in a directly opposite way; and when he concluded to descend, the image moved upward until the tri colored flask was out of sight, when he could see the car and the aeronaut still standing in it as if in a basket attached to nothing. He still kept looking until his head was Robespierred, and finally, piece by piece, his body, and at last, his feet and basket ascended out of sight.

Prof. Elliott says that he has been up a hundred and one times, but never saw anything in the form of an illusion like this before; and he asks the opinions of the scientific and learned as to the probable cause of this remarkable phenomenon, for the information of the public.

Minnesota.

A correspondent of the *Western Christian Advocate*, communicates to that journal the following interesting facts in respect to Minnesota Territory:—

THE FACE OF THE COUNTRY.

The territory comprises an area of 160,000 square miles, or 106,000,000 acres. It extends from latitude 50 deg. to latitude 42 deg. 30 min., thus running through seven and a half degrees, a distance due north of 500 miles—four or five times as much territory as is contained in the State of Ohio. Almost the whole of this is about equally divided between oak openings and fine rolling prairies, the whole well watered with numerous rivers navigable for steamboats, and beautiful lakes of fresh water, all abounding in the finest fish.

THE CLIMATE.

As regards the climate I cannot speak experimentally farther than this, that last Saturday, the 8th of July, was about as hot a day as I ever experienced—the mercury rose to ninety-six degrees in the shade in this city—St. Paul. From information received from some of the most reliable citizens, I believe that I am justifiable in saying that the whole world cannot produce a climate more salubrious than that of Minnesota. In the coldest weather, when the mercury ranges from 18 to 25 degrees below zero, men perform as much labor out of doors as at any other time in the year. Rev. David Brooks, presiding elder of the Minnesota district, now residing in this city, informed me that he has frequently rode all day with the mercury standing 25 degrees below zero without experiencing any inconvenience from the cold, and that he had known men to freeze dead upon their horses, in Illinois and Wisconsin, with the mercury ranging from 12 to 15 degrees below zero. When the weather is at its coldest in Minnesota, the air is still as death, the smoke from the chimneys falls to the ground, and every human body creates around itself an atmosphere of warmth. The stillness and dryness of the atmosphere, and the vigorous health that people here enjoy, accounts for the comfortable enjoyment of a degree of cold that would be intolerable in a more southern climate. Frost does not appear in Minnesota as early by two weeks as it does in Illinois and Ohio. It continues pleasant till winter commences, which is about the first of December, and closes about the last of March. They have good sleighing through all the winter months, snow falling to the depth of eighteen inches. In short, such is the healthiness of the climate that physicians have but little to do. Not a case of ague has ever been known in the territory, and colds, the bane of Ohio winters, are strangers in Minnesota; no consumption, unless contracted before coming to the territory, and in many such cases the sufferer in this climate has recovered. Muddy roads would be a strange sight in this country.

PRODUCTS.

I have frequently heard the inquiry made in Ohio, whether any thing could grow in Minnesota. From actual observation I am now prepared to answer the inquiry, that things can grow in Minnesota. I have seen better crops during the last two weeks in this territory, than I ever saw in the finest portions of the Miama Valley. I give the average number of bushels per acre of the staple products, as I have received from the most reliable farmers in this country, and judging from the appearance of the crops as they now stand upon the ground, I know they cannot be far wrong. Corn, 50 to 60 bushels per acre; wheat from 35 to 40 bushels. I cannot give the average of barley, but judging from the present crop, I know they can beat Ohio; oats, 75 bushels per acre; flaxseed, 12 to 15 bushels; potatoes, 500 bushels. All kinds of garden vegetables can be produced in abundance. I saw several specimens of fine grape vines growing. There is no country better adapted for grazing purposes or stock raising than this.

Block Island.

A correspondent of the Hartford *Daily Times* gives the following description of Block Island, at the eastern extremity of Long Island, midway between Point Judith and Montauk Point. The correspondent says:—

Block Island is notorious in Hartford as being a place where the British procured supplies during the last war. It is now famous for its Codfish, or "Cape Cod Turkey," which are considered No. 1. The Island is 9 miles long, from 3 to 4 wide, and contains about 27 square miles. The distance from Stonington is about 31 miles, from Newport about 30, and from Montauk Point about the same distance. It has no harbor where vessels can lie in security, but there is a small Bay on the East side where the landing is made, and most of their craft lie. These are built something in the shape of a whale-boat, only longer, and have two masts and two sails, which they brace out, one on each side, when going before the wind, and sail very fast. When there is an easterly storm they have to take cattle and haul their boats up on the land, out of the reach of the surf. For this reason they build no vessels, and if they could have a secure harbor it would be the greatest benefit that could be conferred on the Island. It has a Salt Pond near the center, which is deep enough for large vessels, and would accommodate 300 vessels if an entrance could be made from the ocean. The inhabitants have been trying to get an appropriation from Congress for a number of years, to do it.

The people are very primitive, or old-fashioned, and seldom leave the Island unless to fish or to carry their fish to market, and many of them have never been to the mainland. Of course they are a good ways behind the age, and many of them speak in such a way that it is difficult to understand them. For instance, when they say noon they pronounce it *nu-un.* There is not a tree on the Island, but there are a number of good farms. They raise good crops of corn, potatoes, and vegetables of all kinds. They have but one store, and that is kept by the minister, who has his hands full of business. They have two Light Houses, built close together; to distinguish them from others, they are called by sailors the "Sisters." Their light is welcomed by mariners coming on the coast. They have two good public houses, one kept by Capt. Card, and one by Capt. Rose. They are well patronized, and have some boarders from New York and other places, to pass the season. Their means of communication are very limited, as they only have a packet from Stonington twice a week, and a mail boat from Newport once a week. When that arrives, which it usually does on Friday afternoon, a great many come from different parts of the Island to see if they have any friends, to get letters if they have any, and to hear the news. It is the most important gathering they have, and, to see it, reminds one of Columbus discovering America. The Island is said to contain 1,400 inhabitants, and is called "New Shoreham Township," and is always the last election district heard from in Rhode Island.

From the Albany Cultivator.

Shaping Trees and Shrubs.

Who has not observed the great difference in beauty between a handsomely shaped tree, and one of uncouth or distorted form, of the same species? How often do purchasers of ornamental shrubs and trees, anxiously search for symmetrical specimens—forgetting, or not knowing, that the most irregular may be easily pruned into any desired shape. If the Dutch gardeners display so much skill in training vegetable growth in peacocks and hedgehogs, American gardeners may find an appropriate exercise of their skill in imitating the graceful and beautiful in nature.

At the present season, or during the commencement of vigorous growth, this desirable object may be most easily accomplished. By occasionally removing needless shoots, but more frequently shortening back such as are overgrown or pinching in those that threaten to become so, and by lopping certain portions to induce dormant buds to push where branches and foliage may be deficient, a degree of skill may be exercised, not unworthy of comparison with that of the artist who developes a beautiful statue from a shapeless block of marble.

Even small plants, which otherwise would grow tall and meagre, may be made to assume a bushy and thick appearance, by pinching off the ends of the leading shoots while they are young. The English gardeners have acquired a skill in managing in this way their pot plants intended for public exhibition, that is really astonishing to those who first witness the rich and symmetrical masses of flowers and foliage which they are thus enabled to present to view.

A great error is often committed when flowering plants are placed in the open ground, by crowding them too closely together, giving them too much the appearance of weeds. They are much the best when every plant is allowed full room to expand. When crowded, the flowers are fewer and more imperfect, and the plants and foliage slender, and greatly inferior in beauty to the dense and rich mass of well developed leaves and bloom of a freely growing, uncrowded plant.

Countess of Exeter.

"I am no teller of stories," says Hazlitt, "yet there is one belonging to Burleigh House, of which I happen to know some of the particulars. The late Earl of Exeter was divorced from his wife, a woman of fashion and of somewhat more gaiety of manners than 'lords who love their ladies' like. He determined to seek out a second, in an humble sphere of life, and that it should be one who, having no knowledge of his rank, should love him for himself alone. For this purpose he went and settled incognito, under the name of Mr. Jones, at Honet, an obscure village in Shropshire. He made overtures to one or two damsels in the neighborhood, but they were too knowing to be taken in by him. His manners were not boorish; his mode of life was retired; it was odd how he got his livelihood; and at last he began to be thought to be a highwayman. In this dilemma he turned to Miss Hoggins, the eldest daughter of a small farmer at whose house he lodged. Miss Hoggins, it would seem, had not been used to romp with the village clowns; there was something in the manner of their quiet but eccentric guest which she liked. Having inspired her with that kind of regard which he wished for, he made honorable proposals to her, and at the end of some months they were married, without his letting her know who he was. They set off in a post chaise from her father's house and traveled across the country. In this manner they arrived at Stanford, and passed through the town without stopping, till they came to the entrance of Burleigh Park, which is on the outside of it. The gates flew open, and the chaise entered and drove down the long avenue of trees that lead up to the front of this fine old mansion. As they drew near to it, and she seemed a little surprised at where they were going, her husband said: 'Well, my dear, this is Burleigh House; it is the house I promised to bring you to; and you are the Countess of Exeter! It is said that the shock of this discovery was too much for the young creature, and that she never recovered from it. It was a sensation worth dying for. The world was worth making, had it only been for this. I never wished to have been lord, but when I think of this story."

Dr. Nott's History.

In the early part of the last century, a small body of Scotch-Irish Presbyterians had founded a colony on the head waters of the Susquehanna, which they had called Cherry Valley. There they had organized a Church and established a Classical School. For nearly forty years before the Revolution, it was an outpost of Christianity and civilization in the wilderness. Cut off in the war of the Revolution, at the commencement of peace, the exiled inhabitants, who survived the war, returned to their former homes, and over their fathers' graves pledged themselves to renew their covenants, and rebuild their houses of worship. Again they reëstablished a Classical School, and erected a spacious edifice for its accommodation. It was in the year 1794, that a young clergyman, from the State of Connecticut, passing unnoticed and unknown through Albany, made his way on horseback along the Great Western Turnpike, then just opening, to the settlement at Cherry Valley. He was received there with open arms, and was soon installed in the double capacity of minister and instructor to the Academy. Need it be added that this young man was Eliphalet Nott?

After a few years' residence in Cherry Valley, he was called as pastor of the first Presbyterian Church in the city of Albany; and there immediately took his place as one of the most eloquent and promising men of the day. He was soon after transferred from the Church to the Presidency of Union College.

The Miseries of New York.

The *Journal of Commerce*, speaking of the miseries and destitution of New York, remarks thus:—

"A number of hotels and restaurants make a practice of distributing the fragments of food, collected from the tables, to the poor, at regular hours, every afternoon. By observing how this is done, any curious person can readily obtain some insight into the miseries of the city. By the same process, a partial cue may be had to the so-called "mysteries" of New York, which have always afforded a prolific theme for scribblers. The place where these bounties are to be dispensed, is indicated some time in advance by the throng of wretched-looking people who eagerly crowd around, with baskets, aprons, etc., in which to bear away the expected gifts. The bloated inebriate, tottering creatures enfeebled by disease, as well as many young girls, acting as agents for others who remain in their own garrets and cellars—all are represented. On the first appearance of the provisions, which form a complete chowder of bread, meats, pastry, lobster, fish, and vegetables, a general rush is made, which has often to be forcibly repelled. With a large scoop, broken plate, or something of the kind, a quantity of the mixture is thrown into each vessel or other receptacle extended to receive it, with all possible rapidity, the crowd, meanwhile, pressing closer and closer, until again forced into the background. Every device is resorted to, in order to secure a double portion. A common trick is, to have a basket placed on one side, in which each fresh installment is deposited, until no more can be procured. Another will have a capacious apron, or bag, suspended from the waist, secure from observation, while the contents of the extended basket or dish are slyly thrust into it unnoticed. Some, in this manner, obtain the lion's share, while the weak, sick and decrepit, are turned off empty. The scene would bear to be transferred to canvas with an artist's pencil.

American Settlements.

The American settlements on the northwest coast of America have acquired such a degree of extent and stability, as to render important closer communication with the Atlantic cities. The long sea voyage will be obviated by smoother and secure routes across the continent, through their own territory. The Hudson's Bay Company, as we have already shown, is adverse to the existence of a free population in its territories. It seems that the transportation of the mails, and army and navy supplies, to California, costs the American Government annually about one million sterling. The amount of gold transmitted to the Atlantic States, from California, since its acquisition, is $300,000,000 (£60,000,000,) and the last year's supply was $80,000,000—a sum equal to the whole specie basis of the Union in 1836. The resources of California are proved by the fact that she exports more of her own natural products than the entire Union did twenty years ago. It has been shown that by the present slow and devious way of carrying on the trade between the Atlantic and Pacific States of America, in comparison with the facilities offered by a railroad across the continent, $70,000,000 are lost; while by a Pacific railroad there would be a saving of over $48,000,000 per annum—equal to the annual expenditure of the Government. Colonel Fremont, one of the most experienced travelers over this district, and whose topographical surveys on behalf of the American Government are so well known, has just published the result of a winter's journey through the continent. He reached California in the close of April last, having gone through by the central route, near the head-waters of the Merced, and followed the same parallel of latitude nearly the whole way. He has clearly established that the winter condition of the country constitutes no impediment, and that the route is entirely practicable for the railroad. [Lon. Mer. Gaz.

Feeding Mowing Lands.

I am not disposed to regard the feeding of grass lands in the fall, by farm stock, as so decidedly injurious as many seem to suppose. Perhaps there are cases where the future crop has, to a certain extent, been diminished by the excessive feeding of the stubble in the fall; but that in nine cases in ten, perhaps in nineteen out of twenty, the growth of the grass is increased by the consumption of the after-math of the previous year, I have no manner of doubt. When the land is low, and saturated as low lands almost always are late in the fall, there is no question that the trampling of heavy cattle is a very decided injury, not only to the soil, which it renders rough and uneven, but to the roots of the grass, which are broken and destroyed. I have thought that so far as the value of fall feed is concerned—unless where a scarcity of winter or cured feed is threatened, our estimate is generally too high. When animals are allowed a free range in mowing meadows or fields, after the hay crop has been removed, and the after-math allowed to get a good start, they are never much inclined to partake of drier and more retentive feed; it has a tendency to satiate the appetite, and to create a disrelish for hay, and sometimes even for meal and grain, without being a competent substitute for either.

I have known animals which were allowed to feed late in autumn, in well set, luxurious pastures of after-math, actually lose in weight, while the opposite result was clearly manifest in others which were kept up, and supplied only with hay. If we are so situated as to be sure of a competent supply of cured food during the winter, without incurring extravagant and ruinous outlays of cash, it is perhaps better, on the whole, to restrict our stock—with the exception of sheep and cows in milk, as much as possible, to cured fodder.

But sheep and cows should be allowed to partake of green feed as long as it is to be obtained. They do better on it than on hay, even if they are supplied with grain. Sheep, however, are of all animals, perhaps, the most decidedly injurious to mowing lands, when allowed to feed late in the fall. The formation of their mouths and particularly of their teeth, enable them to cut closer than other animals—often below the surface of the soil, thereby fatally injuring the roots by laying them bare and exposed to frost. But the cow can effect little damage in this way. She is not so rigid an economist, or perhaps I should say, is far less greedy and voracious, and takes only what the plants can spare as well as not. [Germantown Telegraph.

A BETROTHED YOUNG WOMAN SHOT BY HER LOVER.—We are called upon (says a Cincinnati paper) to record another deplorable accident, resulting from a criminally careless use of fire arms. On Sunday night, Daniel McArthur was sitting in the same room, in No. 314 Seventh-st., with Catharine Desmond, a young lady to whom he was engaged. Catharine was sitting at a small stand, reading a book, and her lover was teasing her and trying to transfer her attention from the book to himself, by extinguishing the candle. Finally, all of his fond efforts having failed, he took a double barreled shot gun, which stood in the corner, put on a cap, and pulled the trigger, intending to blow out the candle with the air forced out of the gun by its explosion of the cap. Unfortunately, the gun was loaded, and the horror-stricken man heard a loud report, and saw his betrothed sink to the floor, bleeding and dying. A full charge of shot entered her right breast, and in spite of the efforts of the physicians who were called, she died. The unhappy young man is of course almost distracted. He surrendered himself, and was examined in the Police Court. The testimony showing no criminal intention, he was discharged. The dead and the living were to have been married in about two months.

A MICROSCOPIC WORLD.—The City of Berlin is situated in the midst of a broad, flat plain, and is built upon both sides of the sluggish river Spree. Beneath the city there is a deep bog of blackpeat, through which borings for water have frequently been carried. Professor Ehrenberg, a gentleman whose explorations into the mysteries of microscopic life have attained for him position among the scientific men of the age, says that this peat at the depth of 50 feet swarms with infusorial life; that countless myriads of microscopic animals live there and die. The perpetual motion of these little animals causes the whole mass of peaty matter to be in a state of constant, though generally imperceptible movement. In Berlin the houses, however, are wont to yawn and crack sometimes in an exceedingly curious manner, even though built on apparently stable foundations; and Prof. Ehrenberg believes this to be owing to the changes and motions of this invisible world—to the combined efforts of infinite millions of tiny forms, which, conspiring in the same direction, produce sensible and oftentimes disastrous movements of the surface, resulting in the injury or ruin of the buildings above.

A FAMILY KILLED.—A correspondent of the Detroit *Free Press*, writing from Pecatonica, Winnebago Co., Ill., on the 14th ult., says:

I witnessed, yesterday, one of the most melancholy scenes I ever beheld. In the town of Lysander, one mile south of Pecatonica dépôt, there lay enshrined in five coffins a Mr. Merchant, two sons and two daughters, all of whom were struck with lightning during a thunder shower, about 2 o'clock A. M. leaving in the family only the wife and one son about eight years old; they both being much injured by the shock, the woman remaining mentally deranged, continually bemoaning the loss of her family. The circumstances of their deaths ought to be a caution to the public to manage differently from what they did. The night being very warm, they took off their beds and placed them on the floor in a cool room, where stood a stove, and the lightning, coming down the stove-pipe, divided on the stove hearth, and struck the whole family of seven, of whom only two survived.

SUIT AGAINST A TELEGRAPH COMPANY.—A firm in Indiana has recovered recently, at the Court in Madison, the sum of $345 55, against the Pittsburgh, Cincinnati and Louisville Telegraph Company, for damages sustained in consequence of the non-delivery of a dispatch sent over the line of the Company. Plaintiffs had shipped flour to New Orleans, with instructions to the consignees to sell when flour was five dollars per barrel. Flour went up to $4 60, and plaintiffs telegraphed to consignees to sell. In consequence of the non-arrival of the dispatch, they held on to the flour until they received a letter from the plaintiffs to sell immediately, when they sold, flour in the meantime having declined from fifty to sixty cents. The action was brought for the loss sustained by the decline, and the verdict from a special jury was as above stated.

THE SLEEP OF ARCTIC PLANTS.—M. Seemann, the naturalist of Kellett's Arctic Expedition, states a curious fact respecting the condition of the vegetable world during the long day of the arctic summer. Although the sun never sets while it lasts, plants make no mistake about the time when, if it be not night, it ought to be, but regularly as the evening hours approach, and when a midnight sun is several degrees above the horizon, droop their leaves and sleep, even as they do in sunset in more favored climes. "If man," observes M. Seeman, "should ever reach the pole, and be undecided which way to turn when his compass has become sluggish, his time-piece out of order, the plants which he may happen to meet will show him the way; their sleeping leaves tell him that midnight is at hand, and that at that time the sun is standing in the north.

Ebenezer Landon, one of the very few of that gallant band to whose devotion, gallantry and sufferings we are indebted for the blessings of freedom, died at Sharon Springs on the 23d ult. Mr. Landon was born at Litchfield, Conn., in the year 1760, and was therefore, at the time of his decease, in the 94th year of his age. When 17 years old he joined the army, and marched to the City of New York, where he was stationed until the Americans were compelled to evacuate; when his company crossed to New Jersey, and thence to West Point. He had seen and conversed with Gen. Washington, and witnessed the execution of Maj. Andre. And finally, at the conclusion of the war, he was one of seventeen, from a full company, who survived. He left the City of New York in 1777, and has not been there since.

Last Lent the Roman Catholic Bishop of Perigeux issued a decree against bad books, and at the head of the list stands the Bible!!

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial,* bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor,* bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder,* vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

Norwich Line to Boston,

WORCESTER, Lowell, Fitchburg, Nashua, Concord, Bellows Falls, &c. Via Norwich and Worcester, Worcester and Nashua, Boston and Worcester New London and Willimantic, and Palmer Railroads.

Passengers by this Line leave pier No. 18 North River, foot of Cortlandt-st., every day, at 5 o'clock, P.M., (Sundays excepted.)

Steamer CONNECTICUT, Capt. J. W. Williams will leave New York every Tuesday, Thursday, and Saturday.

Steamer WORCESTER, Capt. Wm. Wilcox, will leave New York every Monday, Wednesday, and Friday.

Passengers by this Line arrive in time to take the early trains out of Boston.

Passengers taken at the lowest for New London, Norwich, Willimantic, Stafford, Munson, Palmer, Worcester, Boston, Fitchburg, Lowell, Lawrence, Nashua, Concord, Bellows Falls, and other places in Northern New Hampshire and Vermont.

For further information inquire of E. S. Martin, at the office, pier No. 18 N. R., foot of Cortlandt-st.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone.* The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order CHIMES of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings,* comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N.Y.

Ayer's Cherry Pectoral,

For the rapid Cure of Coughs, Colds, Hoarseness, Bronchitis, Whooping-Cough, Croup, Asthma, and Consumption.

AMONG the numerous discoveries Science has made in this generation to facilitate the business of life—increase its enjoyment, and even prolong the term of human existence, none can be named of more real value to mankind than this contribution of Chemistry to the Healing Art. A vast trial of its virtues throughout this broad country, has proved, beyond a doubt, that no medicine or combinations of medicines yet known, can so surely control and cure the numerous varieties of pulmonary disease which have hitherto swept from our midst thousands and thousands every year. Indeed, there is now abundant reason to believe a remedy has at length been found which can be relied on, to cure the most dangerous affections of the lungs. Our space here will not permit us to publish any proportion of the cures effected by its use, but we would present the following, and refer further inquiry to my American Almanac, which the agent below named will always be pleased to furnish free, wherein are full particulars, and indisputable proof of these statements.

Office of Transportation, Laurens R R., S. C.,
Aug. 4, 1853.

J. C. Ayer, Dear Sir,—My little son, four years old, has just recovered from a severe attack of malignant Scarlet Fever. His throat was rotten, and every person that visited him pronounced him a dead child. Having used your Cherry Pectoral in California, in the winter of 1850, for a severe attack of Bronchitis, with entire success, I was induced to try it on my little boy. I gave him a tea-spoon full every three hours, commencing in the morning, and by ten o'clock at night I found a decided change for the better, and after three days use he was able to eat or drink without pain.

Its use in the above-named disease will save many a child from a premature grave, and relieve the anxiety of many a fond parent. For all affections of the Throat and Lungs, I believe it the best medicine extant. A feeling of the deepest gratitude prompts me in addressing you these lines—but for your important discovery, my little boy would now have been in another world. I am yours, with great respect,

J. D. POWELL, Supt. Trans., L. R. R.

Rock Hill, (Somerset Co.,) N. J., July 21, 1852.

Dr. J. C. Ayer,—Since your medicine has become known here, it has a greater demand than any other cough remedy we have ever sold. It is spoken of in terms of unmeasured praise by those who have used it, and I know of some cases where the best they can say of it is not too much for the good it has done. I take pleasure in selling it, because I know that I am giving my customers the worth of their money, and I feel gratified in seeing the benefit it confers.

Please send me a further supply, and believe me;
Yours, with respect, JOHN C. WHITLOCK

Windsor, C. W., June 26, 1852.

J. C. Ayer, Sir,—This may certify that I have used your Cherry Pectoral for upwards of one year; and it is my sincere belief that I should have been in my grave ere this time if I had not. It has cured me of a dangerous affection of the lungs, and I do not overstate my convictions when I tell you it is a priceless remedy. Yours very respectfully,

D. A. McCULLIN, Attorney at Law.

Wilkesbarre, Pa., Sept. 28, 1850.

Dr. J. C. Ayer, My dear Sir,—Your medicine is much approved by those who have used it here, and its composition is such as to insure and maintain its reputation. I invariably recommend it for pulmonary affections, as do many of our principal physicians.

I am your friend, CHAS. STREATER, M.D.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. SANDS; retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere. 37-3

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

RABBONI.

'Tis so—I see that sacred brow
Once on the cross despised and gory;
Rabboni! My ~~own~~ Lord! 'Tis Thou,
And yet in such surpassing glory,
Alas!—in this Thy victory
Canst Thou look down on such as me?

O, bliss beyond all earthly bliss!
My own poor name by Him is spoken,
The King of glory calls me His,
And on His hands I see the token
Of that same love which on the tree
Bore all the weight of sin for me.

And now from hence I go again,
In peace this world's coarse tumult breasting;
What care I for its surging main,
When calmly on my Lord I'm resting;
And what to me is praise or blame,
When Christ my Lord has named my name.

Helpless indeed I am, but He
Is ever help divine supplying,
And poor and wretched though I be,
I know that on his strength relying,
Like Him the bonds of death I'll break,
With Him of rest supreme partake.

Then glory to my Lord most dear,
Who thus the gates of hell has riven,
Who thus on earth my sins did bear,
And opened thus the way to heaven;
Rabboni—Master—King Divine,
His glory as His cross be mine.

[Episcopal Recorder.

DREAM CULTURE.

Rev. H. W. Beecher, while spending the summer on a farm in Massachusetts, given to him by some of his parishioners, wrote in the following strain to the *Independent*, of which he is one of the editors:—

There is something in *the owning a piece of ground*, which affects me as did the old ruins of England. I am free to confess that the value of a farm is not chiefly in its crops of cereal grain, its orchards of fruit, and in its herds; but in those larger and more easily rept harvests of associations, fancies, and dreamy broodings which it begets. From boyhood I have associated classical civic virtues and old heroic integrity with the soil. No one who has peopled his young brain with the fancies of Grecian mythology, but comes to feel a certain magical sanctity for the earth. The very smell of fresh-turned earth brings up as many dreams and visions of the country as sandal-wood does of oriental scenes. At any rate, I feel, in walking under these trees and about these slopes, something of that enchantment of vague and mysterious glimpses of the past, which I once felt about the ruins of Kenilworth Castle. For thousands of years this piece of ground hath wroth its tasks. Old slumberous forests used to darken it; innumerable deer have tramped across it; foxes have blinked through its bushes, and wolves have howled and growled as they pattered along its rustling leaves with empty maws. How many birds; how many flocks of pigeons, thousands of years [illegible] dashing wildly among them; how many insects, nocturnal and diurnal; how many mailed bugs, and limber serpents, gliding among mossy stones, have had possession here, before my day! It will not be long before I too shall be as wasted and recordless as they.

Doubtless the Indians made this a favorite resort. Their sense of beauty in natural scenery is proverbial. Where else, in all this region, could they find a more glorious amphitheater? But thick-studded forests may have hidden from them this scenic glory, and left it to solace another race. I walk over the ground wondering what lore of wild history I should read if all that ever lived upon this round and sloping hill had left an invisible record, unreadable, except by such eyes as mine, that seeing, see not, and not seeing, do plainly see.

Then, while I stand upon the crowning point of the hill, from which I can see every foot of the hundred acres, and think what is going on, what gigantic powers are silently working, I feel as if all the workmanship that was stored in the Crystal Palace was not to be compared with the subtle machinery all over this round. What chemist could find solvents to liquefy these rocks? But soft rains and roots like threads dissolve them and recompose them into stems and leaves. What an uproar, as if a hundred stone quarries were being wrought, if one should attempt to crush with hammers all the flint and quartz, which the stroke of the dew powders noiselessly! All this turf is but camp of soldier roots, that fight their battle with the elements with endless victory. There is a greater marvel in this thistle, which defies the farmers' wits taxed for its extermination, than in all the repositories of New York or London. And these mighty trees, how easily do they pump up and sustain supplies of moisture that it would require scores of rattling engines to lift! It is a vast laboratory, full of expert chemists. It is a vast shop, full of noiseless machinists. And all this is mine! These rocks, that lie in bulk under the pasture-trees, and all this moss that loves to nestle in its crevices, and clasp the invisible projections in its little clinging hands, and all these ferns and sumach, these springs and trickling issues, are mine! Let me not be puffed up with sudden wealth. Let me rule discreetly among my tenants. Let me see what tribes are mine. There are the black and glossy crickets, the gray crickets, the grasshoppers of every shape and hue, the silent, prudent toad, type of conservative wisdom, wise-looking, but slow-hopping; the butter-flies by day and the moths and millers by night; all birds—wrens, sparrows, king-birds, blue-birds, robins, and those unnamed warblers that make the forests sad with their melancholy whistle. Beside these, who can register the sappers and miners that are always at work in the soil: angle-worms, white grubs, and bugs that carry pick and shovel in the head? or muster all the mice that nest in the barn or nibble in the stubble-field, and all the beetles that sing bass in the wood's edge to the shrill treble of gnats and myriad musquitoes? These all are mine!

Are they mine? Is it my eye and my hand that mark their paths and circuits? Do they hold their life from me, or do I give them their food in due season? Vastly as my bulk is greater than theirs, am I so much superior that I can despise, or even not admire? Where is the strength of muscle by which I can spring fifty times the length of my body? That grasshopper's thigh lords it over mine. Spring up now in the evening air, and fly toward the lights that wink from yonder hill-side. Ten million wings of despised flies and useless insects are mightier than hand or foot of mine. Each mortal thing carries some quality of distinguishing excellence by which it may glory, and say, "In this, I am first in all the world!"

Since the same hand made me that made them, and the same care feeds them that spreads my board, let there be fellowship between us. There is. I have signed articles of peace even with the abdominal spiders, who carry their fleece in their belly, and not on their back. It is agreed that they shall not cross the Danube of my doors, and I, on the other hand, will let them camp down, without wanton disturbance, in my whole domain beside! I, too, am but an insect on a larger scale. Are there not those who tread with unsounding feet through the invisible air, of being so vast, that I seem to them but a mite, a flitting insect? And of capacities so noble and eminent, that all the stores which I could bring of thought and feeling to them would be but as the commune of a grasshopper with me, or the chirp of a sparrow?

No. It is not in the nature of true greatness to be exclusive and arrogant. If such noble shadows fill the realm, it is their nature to condescend and to spread their power abroad for the loving protection of those whose childhood is little, but whose immortal manhood shall yet, through their kind teaching, stand unabashed, and not ashamed, in the very royalty of heaven. Only vulgar natures employ their superiority to task and burden weaker natures. He whose genius and wisdom are but instruments of oppression, however covered and softened with lying names, is the beginning of a monster. The line that divides between the animal and the divine is the line of suffering. The animal, for its own pleasure, inflicts suffering. The divine endures suffering for another's pleasure. Not then when he went up to the proportions of original glory was Christ the greatest; but when he descended, and wore our form, and bore our sins and sorrows, that by his stripes we might be healed!

I have no vicarious mission for these populous insects. But I will at least not despise their littleness nor trample upon their lives. Yet, how may I spare them? At every step I must needs crush scores, and leave the wounded in my path! Already I've lost my patience with that intolerable fly, and slapped him out of being, and breathed out fiery vengeance against those mean conspirators that, night and day, seek my blood, hypocritically singing a grace before their meal!

The chief use of a farm, if it be well selected, and of a proper soil, is, to lie down upon, thus cultivate it every day. Large crops are the consequence, of great delight and fancies more than the brain can hold. My industry is exemplary. Though but a week here, I have lain down more hours and in more places than that hard-working brother of mine in the whole year that he has dwelt here. Strange that industrious lying down should come so naturally to me, and standing up and lazing about after the plow or behind his scythe, so naturally to him! My eyes against his feet! It takes me but a second to run down that eastern slope, across the meadow, over the road, up to that long hill-side, (which the benevolent Mr. Dorr is so beautifully planting with shrubbery for my sake—blessings on him!) but his feet could not perform the task in less than ten minutes. I can spring from Grey Lock in the north, through the hazy air, over the wide sixty miles to the dome of the Taconic mountains in the south, by a simple roll of the eye-ball, a mere contraction of a few muscles. Now let any one try it with their feet, and two days would scant suffice! With my head I can sow the ground with glorious harvests; I can build barns, fill them with silky cows and nimble horses; I can pasture a thousand sheep, run innumerable furrows, sow every sort of seed, rear up forests just wherever the eye longs for them, build my house, like Solomon's Temple, without the sound of a hammer. Ah! mighty worker is the head! These farmers that use the foot and the hand, are much to be pitied. I can change my structures every day, without expense. I can enlarge that gem of a lake that lies yonder, twinkling and rippling in the sunlight. I can pile up rocks where they ought to have been found, for landscape effect, and clothe them with the very vines that ought to grow over them. I can transplant every tree that I meet in my rides, and put it near my house without the drooping of a leaf.

But of what use is all this fanciful using of the head? It is a mere waste of precious time!

But if it gives great delight, if it keeps the soul awake, sweet thoughts alive and sordid thoughts dead, if it brings only a tittle out of conceit with hard economics, and penurious reality, and stingy self-conceit; if it be like a bath to the soul, in which it washes away the grime of human contacts, and the sweat and dust of life among selfish, sordid men; if it makes the thoughts more supple to climb along the ways where spiritual fruits do grow, and especially if it introduces the soul to a fuller conviction of the Great Unseen, and teaches it to esteem the visible as less real than things which no eye can see, or hands handle, it will have answered a purpose which is in vain sought among stupid conventionalities.

At any rate, such a discourse of the thoughts with things that are beautiful, and such an opening of the soul to things which are sweet-breathed, will make one joyful at the time and tranquil thereafter. And if one fully believes that the earth is the Lord's, and that God yet walks among leaves, and trees, in the cool of the day, he will not easily be persuaded to cast away the belief that all these vagaries and wild communings are those of a child in his father's house, and that the secret springs of joy which they open are touched of God!

THE CHANGES OF FIFTY YEARS.

At the Jubilee Celebration in Schenectady, on the completion of fifty years of Dr. Nott's presidency, the Doctor delivered an address, from which the following is an extract:—

Fifty years ago, having been invested with the supervision of Union College, I stood for the first time on yonder rising ground where the college edifices are now seen. These grounds, now so symmetrical and ornate, were then mere pasture-ground, scarred with deep ravines difficult of access, by swamp and sand-hill, and divided into different compartments, indicative of different ownerships. There was no tree, shrub, nor garden, nor building. Some thirty students, scattered over the then village of Schenectady, met at a cabinet-maker's, on the corner of Union and Ferry streets—and these then constituted the whole of Union College. A stinted provision had previously been made for academic instruction—for the education of the masses here. Nor, fifty years ago, was the provision for trade and travel more abundant. Chemistry was then little known; the motive power of steam less. The application of electricity and the sunbeams to any practical purpose was entirely unknown. By the power of muscle and of wind the internal commerce of the country was conducted. A visit to Albany, and the return, through the intervening desert, over the winding pathway, required the time of three days—to New York often three weeks, to Buffalo six; a voyage to Whitesboro, was executed by the oar or the setting-pole, and took more time and involved greater danger than a voyage across the Atlantic does at this day. Rome was then the great commercial capital of the West. Beyond it commerce, except with savages, was unknown. The plowshare of the husbandman had scarcely disturbed the soil, or the axe of the woodman assailed the forest; the wild West was a desert for wild men. Even in the older States the wild beast and savage lingered; in all of them the husbandman by the use of the plough, the scythe, and the sickle, worked to replenish his garner, and the spinning-wheel converted flax into raiment.

Now how changed! The hand-wheel and the hand-loom have been exchanged for the power-loom and the spinning-jenny. The setting-pole and the oar are laid aside, and the steam engine has been substituted. Nor this alone; human labor is constantly disappearing, and, in a thousand ways, processes are now carried on by steam, which, fifty years ago, were performed by the human hand, and this only. Meantime, artificial channels had been excavated round the Falls of the Mohawk, the Hudson, the Niagara, and the St. Mary, connecting the waters of the Lakes with the ocean. Villages have sprung up, a numerous population has appeared, and from them the hum of industry is heard. Nor does the speed of steam satisfy the demands of an eager population; the [illegible] from friend to friend at any intervening distance. Light, too, has been put in harness, and has learned to do the bidding of man; the artist, indeed, still bends over his easel and slowly lays on the colors which complete his work, but art has deserted his studio, and now, in an instant, by the impress of the sunbeam, her end is attained! This substitution is more than a substitution of elemental for muscular power—it is an increase of power itself; and a perfection and rapidity have been attained which never could have been reached by the power of man or brute, however applied or extended. Hence the great increase of comforts and capital which we witness. The mere day-laborer now is better clad and lodged than were the aristocracy of England three hundred years ago. Meantime, emigration in its western flow has been carrying with it arts and sciences, English common law and the Christian religion, from the Atlantic to the shores of the Pacific Ocean.

* * * * *

After the vicissitudes of a life so long, it is a happiness to meet you here; to inquire after our mutual welfare, and to exchange salutations; and, having done so, it is hard that we must part so soon, and parting, to know that never, on this earth, shall we meet again. But how much sadder would it be if these were to be the last students that should ever seek wisdom at this fountain—if the race were to become extinct and the world depopulated! How cheering the thought that there will be a sun to shine, stars to glitter, and an ocean to cross—a God to be adored, and worshipers to adore Him, when we shall have gone into our rest! Standing among these Alumni of an institution over which God's mysterious Providence permitted me so long to preside—holding an office which I am soon to resign—I turn to you to speak a word of what is due to the God whom we adore, the country we serve, and the Alma Mater who claims our respect and our love. Turning to you, we charge you with each of those interests. Defend your Alma Mater; perpetuate her system of kindly, wakeful, paternal government. Love and defend your country; not by the sword, but by means which are mightier than the sword. Send forth good influences, which will extend to the extremities of the State, and spread from generation to generation, till the last that has a part to act upon God's footstool shall have stood on it. In the next semi-centennial anniversary, you, or some of you, may be present, with tremulous voices, tottering steps—as the speaker that now addresses you—regarded with interest, with melancholy interest, as ruins always are. With some it may be so, but the rest of you, where will you be? Where the dead are, and so forgotten! Who now thinks of Smith, of Edwards, and of Maxcy? Tombs have been passed by to-day in yonder cemetery, which lines the path that leads into this house—tombs of such as these—and who paused to look at them? But, though the dead be forgotten by the living, the living will not be forgotten by the dead. The dead may be present, seeing though unseen, sent back to earth on some errand of mercy; or, perhaps, the guardian angels of living ones left behind! If it be otherwise, tidings may reach us even in that spirit-world; deeds and words of goodness on earth are reported in heaven, angels concern themselves in the affairs of men, and "there is joy over one sinner that repenteth." It is not all life to live, nor all death to die! We shall meet again. Though some natural tears we shed at parting, let them be tears of joy! and let us go back to resume life's cares, and to perform its duties. Let us strike, every day, the balance of this world's account, that when the destroyer comes, he may find us willing to depart. Beloved pupils and Christian friends, we shall, thanks to redeeming love, meet again, and lay the willing praise of our redemption at our Redeemer's feet. Till then, a long and last, but not a sad farewell! And to God, the Only Wise, be rendered glory and praise, now and henceforth, forever. Amen!

I'LL TRY.

BY J. P. DURBIN, D. D.

As the sun rose, on one of those sweet mornings in October, which render the early autumn so delightful on the southern shore of the beautiful Ohio, I took my leave of the home of my youth, and departed for the village of ——, in the State of ——. I had been appointed by the —— Annual Conference of the M. E. Church, to preach the gospel to the inhabitants of that little town. On the evening of the third day I arrived at the place, and found a home in a very plain, but truly pious family. After the lapse of a few weeks, an unpretending, but agreeable man called on me, and said: "I have been raised a Friend; and you know Friends do not pay for the ministry. But my wife and only child are members of your church, and I go with them to the public meetings, as I have not much preference and no bigotry. Your society is weak, and as I do not give money for the gospel, perhaps it might be some relief to the church for me to afford you a home in my house, if it please you to accept it." I replied, I would answer in a few days.

Upon inquiry, I found he was the principal merchant in the village, much respected by the people, and that his wife was one of the excellent of the earth. His daughter was about twelve years of age, a sweet, meek child, and much given to her books and her devotions. I concluded to accept his invitation, and sent him word accordingly. On Monday following, I removed to my new abode, which I found to be quiet and neat, and the family very agreeable. The mother, daughter, and myself, worshiped together morning and evening; but the father made a good apology by being always at the store. Yet, on all suitable occasions, he manifested his respect for religion; and his public conduct, as it appeared to me, was irreproachable.

Toward the middle of [illegible], which was in [illegible] engaged in filling his [illegible] rear of his dwelling. He [illegible] the sunken chamber, directing the storing away of the ice, which a man slid down on a long, broad plank. A piece of the ice struck him on the foot, and he swore violently and profanely at the man above. As he uttered these imprecations, I looked in and heard him, without his seeing me. If I had witnessed a flash of lightning from a clear sky, I could not have been more astounded. I had never dreamed that he ever uttered an improper word. I felt confounded and grieved; but passed on, without saying a word. It was Saturday afternoon. After tea, as was his custom, he came up to my room to spend an hour in converration. The first proper occasion offered, I said, "Mr. ——, did I not hear you swear to-day?" "Perhaps you did," he replied, "for I often swear, and do not know it: it is a bad habit I have fallen into, and I should be glad to quit it." "Suppose you try," said I. After pausing a moment in reflection, he said, "Well, I will." "But," I replied, "you will not succeed unless you pray for strength; the habit is too strong for you to break without divine aid." "Why," said he, smiling somewhat quizically, "I never prayed in my life but once; if that can be called prayer when I kneeled down on one knee, when parson W. visited my family, and requested permission to pray with us. I am sure I cannot pray." "Well," said I, "then I am sure you cannot quit swearing." At this he seemed surprised, and a little grieved; but after a moment's hurried reflection, he said, "If you will not tell anybody, *I will try and pray*, and quit swearing, too; and I will come up and tell you next Saturday evening." "Very well," said I.

Next Saturday evening, after tea, he came to my room, and seated himself in silence, apparently waiting for me to speak to him. But I determined that *he* should open the subject, which he did by raising his eyes to mine, and, with a slight, disturbed smile, saying, "Well, I told you I could not pray; I knelt down twice, and I could not utter a word; my tongue was stiff, and my mind fainted and wavered. I had no strength or heart to pray. Besides," said he, "I have sworn twice since last Saturday; once when a man forced a barrel on my hand, and almost broke my finger, as you see," (holding up the wounded limb.) "Well," said I, "Mr. ——, what must be the fearful condition of the man who cannot pray to his heavenly Father?" At this he seemed sensibly moved, and, after some reflection, he replied, "*I'll try once more to pray*, if you will not tell any one." I smiled encouragingly, consented, and he left my room.

On the following Saturday evening he came to me, sat down, and seemed somewhat embarrassed. At length he said, "I told you I could not pray—I cannot." But the utterance of these words gave him evident distress, and afforded me an occasion to press upon him his utter spiritual destitution, and to explain to him the great need of divine aid, which I insisted he could obtain only by prayer. "Then," said he, with deep emotion, "*I'll try again*," and left the room.

On the following Saturday evening he sat down by me and said, "I have ceased to swear." "Then," I replied, "then you have learned to pray." "A little," said he; and the tears came into his eyes; "but, O! how little! how feeble are my prayers! but one thing comes of them; I begin to *feel* I am a sinner, and I must be pardoned." "Then," said I, "you must pray always and not faint." Putting his hands firmly together and fixing his eyes intently on the fire, he said, "*I'll try again*," and departed.

The following Saturday evening I heard him approach with a lighter and quicker step, and entering, he said with eagerness, and yet with a tinge of sorrow, "I have been *praying*; yes, I *tried*, and tears came to my relief, and words followed tears, and *I can pray*. But I have no answer to prayer; no peace." "Well," said I, "you should not expect an answer until you have asked faithfully and penitently. Have you prayed in faith, nothing doubting?" "O," said he, "all I endeavored to do was to pray. Is not this enough?" "No," I replied, "you must *believe* as well as pray." Upon hearing this, I found he fell into the same desponding tone of feeling as when I first spoke to him of prayer; but I rallied him by saying, "Try *to believe*; prayer will give you confidence, and confidence will lead to faith." A new light seemed to break in upon him, and he exclaimed, "I'll try." I let him depart to make the experiment another week.

At the close of the next week he came to me, and said, "I do believe; but only for a minute at a time, and then doubts obtrude; but *I'll try to overcome these, God being my helper*." I now perceived that he was not far from the kingdom of heaven, and exhorted him to lay hold of the hope set before him. "O!" said he, "*I'll try*," and rose to depart. "No, no," said I, "do not go: *I'll help* you now; and we kneeled down to pray. I need not tell the reader the conclusion. In less than three months from the time I heard him swear in the ice-house he was a living member of the church of God. Oftentimes afterwards I heard him say, "Behold how great a matter a little fire kindleth." And when any one would complain that he could not pray, could not become religious, he would exclaim, "O, try? From the depth of the ice-house, I began by trying, in the feeblest manner possible, and lo! I have proved that the 'bruised reed He will not break—the smoking flax he will not quench, until he send forth judgment unto victory.'" Reader, say to thyself—if but in the lisping accents of helpless infancy—I'll try, and God will help you.

MRS. E. JUDSON.

A recent number of the *Madison County Journal*, published at Hamilton, N. Y., where the late Mrs. Judson passed the closing portion of her life, thus speaks of her:—

"Mrs. Judson was preëminently unselfish. She lived and cared, from her earliest years, for others, seldom thinking of herself, except so far as others [illegible] she spoke, for the first time, of a feeling of indifference towards all around her, and, said she, 'you know I must be pretty far gone when it comes to that.' As a mother, her love went out without stint and without distinction to all the children of Dr. Judson alike, and her last days were spent in arranging for their future welfare and education. As a friend and acquaintance, when able to converse at all, she was fascinating to a degree seldom equalled; and to all alike; so that the admiration felt for the author on reading her books, became attachment for the friend in the private intercourse of home. Her conversational powers were remarkable, and without being pretentious, had the peculiar faculty of impressing her with the stamp of genius, even more forcibly than her written works. No one could come in contact with her without feeling irresistibly drawn towards her by a strong personal interest. Mrs. Judson was an unaffected lover of Nature—no wonder! she was one of Nature's own children. Years ago she had written, in her beautiful way, her preference that her grave might be made in the open green fields, under the pure air of heaven, and amid the luxuriance of flowers. That wish remained with her to the last. She often spoke, too, of the rich, glorious month of June as her month to die, and seemed to look forward to it with a pleasing presentiment of her end. ''T were pleasant,' said she, repeating that beautiful poem of Bryant's entitled 'June,'

''Twere pleasant that in flowery June,
When brooks send up a cheerful tune,
And groves a joyous sound,
The sexton's hand, my grave to make,
The rich, green mountain turf should break.'

"Her wish was fulfilled. Her body lies in the village churchyard; the flowers of June and the rich summer verdure are bursting around it, amid the carolling birds—she sleeps very peacefully in her chosen resting-place, awaiting the resurrection, while her spirit, already glorified, reposes in the bosom of God."

PAINFUL REGRETS.

Bulwer, a man of genius, and greatly admired by some, said in a letter to a gentleman in Boston, in 1843, "I have closed my career as a writer of fiction. I am gloomy and unhappy. I have exhausted the powers of life chasing pleasure where there is none to be found."

How much better if Bulwer had discovered his mistake at an earlier period! Had he employed his gifted mind in strengthening the cords of virtue, in repressing unholy passions, instead of fanning them, how different would have been his review of life.

"I am gloomy and unhappy!" Richard Baxter said no such thing at the close of his useful life. He had written much, but he had not "chased pleasure where it is not to be found." John Bunyan made no such record at the close of his life; nor did Owen, or Edwards, or Brainerd, or Fuller, or Scott, or Payson. Men will reap as they sow, in spite of all their hopes and efforts to the contrary. We have often thought of the Italian actor in Paris. He was gloomy and unhappy, like Bulwer. He consulted a physician, who advised him to mingle in scenes of gayety. "Especially," said he, "go to the Italian theatre, and if Carlina does not dispel your gloom, your case must be desperate indeed." "Alas, sir," replied the patient, "I myself am Carlina; and while I make all Paris full of laughter and merriment, I am dying with melancholy and chagrin." What a commentary on those pleasures in which so many indulge to keep up the spirits, and drive away melancholy!

THE MOUNT OF BEATITUDES.

Pursuing the road to Tiberias, not far beyond Lubieh, we came to a well, surrounded by a high curb-stone, where a company of Jews were halting to obtain water for themselves and their animals. At this point, the hill known as Kurun Hattin, the Horns of Hattin, was at a short distance off to the left. This is pointed out as the mount on which the Saviour delivered the discourse, recorded at such length by Matthew. Though the noontide heat was beating down upon us with scorching power, I could not resist the temptation to turn aside and examine a place for which such a claim has been set up, though I cannot say that I have any great confidence in it. If it was not in this mount, however, it was in some mount in the vicinity, that our Lord uttered the discourse in question; for the sacred narrative implies that he was on the west side of the lake of Tiberias at that time. The hill referred to is rocky and rises steeply to a moderate height above the plain. It has two summits with a slight depression between them, and it is these projecting points or horns which give name to the eminence. From the top, the observer has a full view of the sea of Tiberias. The most pleasing feature of the landscape is, that of the diversified appearance of the fields. These exhibit different colors according to the state of cultivation; some of them are red where the land has been newly plowed up, the natural appearance of the soil; others yellow or white where the harvest is beginning to ripen or is already ripe, and others green, being covered with grass or springing grain. As they are contiguous to each other or intermixed, these party-colored plots of ground present at some distance an appearance of gay, checkered work, which is really beautiful.

In rhetorical descriptions of the delivery of the sermon on the Mount, we often hear the people represented as looking up to the speaker from the sides of the hill, or listening to him from the plain. This would not be possible with reference to the present locality; for it is too precipitous and too elevated to allow of such a position. The Saviour could have sat there, however, in the midst of his hearers; for it affords a platform amply large enough for the accommodation of the hundreds who may have been present on that occasion.

We crossed the plain of Hattin so as to [illegible] Tiberias, about two miles west of the commencing descent to the lake. It seemed from the brow of the hill there, as if one could almost throw a stone into the water; but the distance proved very deceptive. It must have proved at least a mile and a half to the town of Tiberias, to which we now descended. The road was steep and winding, and in our impatience after so fatiguing a jaunt, seemed to lengthen it out as if it would never end. Writers differ as to the depression of this sea below the level of the Mediterranean. The estimate of the English engineer, Lieut. Symonds, makes it 328 feet.

[Prof. Hackett.

DO WE KNOW HOW TO PRAY?

Rev. Dr. Hamilton, of Leeds, while solemnly enforcing on the Church its duty in reference to the conversion of the world, asks the following significant questions: "And has not the Church almost to learn the power of prayer? What conception have we of believing prayer, which opens heaven? What of preserving prayer, which causes us to stand continually upon the watch-tower in the day time, and which sets us in our ward whole nights? What of importunate prayer, which storms heaven with its violence and force? What of united prayer, gathering us together to ask help of the Lord? What of consistent prayer, which regards no iniquity in our hearts? What of practical prayer, which fulfills itself? Let but such prayers be understood, let our spirit but break with such longing, and the expectations of our bosoms shall not be delayed.

"And it shall come to pass, that before they call, I will answer; and while they are yet speaking I will hear."

PROFESSING RELIGION.

☞ *Objection.*—I know it is my duty, but I have many fears that my hope is not well founded; and what shall I do?

Answer.—It is your duty so to live, that you will not doubt. Your difficulty is a common one. We know how to feel for you, but we must be plain. Your difficulties is occasioned by your sin.

Objection.—I am afraid that I shall do wrong—that I shall eat and drink unworthily.

Answer.—It may be so. But is it not strange that any one should have conscientious scruples against obeying a plain command of Christ? Are you afraid to obey the Saviour? If you are really conscientious, you might well say, I am afraid I shall do wrong, if I neglect to confess Christ before men. This you ought to say, and to feel. You cannot neglect a known duty and be innocent. Is it not astonishing to see persons who are seriously disposed, making a righteousness of their disobedience to the command of God? They hope that they are Christians, and yet refuse to obey a plain command, lest they should sin.

Objection.—My relatives oppose my making a profession, and threaten to turn me out of doors; and what shall I do?

Answer.—You have a good opportunity to try your heart, and to ascertain whether you are willing to give up all for Christ.

[Nettleton.

Will is the root, knowledge the stem and leaves, and feeling the flower.

OUR ANNIVERSARIES

Have just closed. They were held with the First Church of Genesee, and an abstract of the doings of the several Societies will be found below. It is truly gratifying, that these Societies are objects of such general interest with the people of our denomination. We do not come together, now, under the discouraging, and almost heart-breaking circumstances that we did a few years ago. Then, the approach of our Anniversaries excited no particular interest. From a very few churches brethren went up to the place of convocation, and some dozen or so of the people cared enough about them to lay aside their work and attend. In one instance, the meeting-house was not opened when we got there, and the inhabitants seemed scarcely aware of our coming. Now, they are viewed as the vital organs of the denomination; and those who then struggled, hoping sometimes almost against hope, to nurture them into strength, are at last "blessed in their deed." They see that God has not suffered them to labor in vain. Alas! shall "the boar out of the wood" be permitted to waste, and "the wild beast of the field" to devour, this vine? God forbid!

But while we rejoice in the growing interest of our Anniversary seasons, we could most heartily wish, that active participation in them were enjoyed by other of our brethren besides those living within the bounds of the three great Associations. We do not doubt, that our brethren of the West desire the prosperity of our several societies, but we do not remember ever to have seen any of them in attendance. When, for the sake of accommodation, the Anniversaries are taken to the western borders of the State of New York, it would seem to be a not very unreasonable supposition, that our brethren of the West would show their interest by meeting them. And we are not sure, that the manifestation of such interest would not result in holding an occasional Anniversary, even as far west as Wisconsin, if it were desired. We would not be understood, by this remark, as censuring our western brethren, but only as taking this method of telling them how glad we would be to see them.

Our convocation, this year, was not as numerously attended as on some former occasions. The unfavorable state of the weather, probably, hindered those who, traveling by their own conveyances, [illegible] from the neighboring churches. Still, there was a goodly gathering. The Eastern churches were pretty well represented—quite well, indeed, considering their distance from Genesee. We regret that the representation was so small from the Central Association—only five brethren, all told, two of them ministers.

The hospitalities of the occasion were done up by the good people of Genesee in creditable style. Perhaps we do wrong, however, in using the word *style* in reference to a thing of this kind, as if there were a certain approved mode of showing the kindly feelings of the heart, the want of which vitiated the whole matter. But what we mean to say is, that a good, hearty, Christian welcome was extended to all, and we believe that no one had the least ground to complain for want of due attention, or of needed comforts.

But we will not detain our readers by further remarks of our own. The present state of our benevolent Societies will be seen from what follows.

The Missionary Society.

The Seventh-day Baptist Missionary Society held its twelfth annual meeting with the 1st Church in Genesee, Allegany Co., N. Y., commencing at 10 o'clock on Fifth-day, Sept. 14, 1854.

Agreeable to appointment, Lucius Crandall preached the introductory discourse, taking for his text Luke 18: 8—"*When the Son of Man cometh, shall he find faith on the earth?*"

After the discourse, the Society was called to order by the President; a hymn was sung; prayer was offered by Wm. B. Maxson; and the Constitution was read.

On motion of T. B. Brown, John A. Langworthy, James Hubbard, and W. B. Gillett, were appointed a Committee to nominate officers.

The Chair, in compliance with a vote of the Society, appointed the following Committees:—

On Resolutions:	*On Petitions:*
James Bailey,	P. L. Berry,
T. B. Stillman,	J. D. Titsworth,
Jason B. Wells.	Clarke Wells.

The arrangement of religious exercises was referred to the officers of the 1st Genesee Church.

Adjourned for one hour. Benediction by D. E. Maxson.

In the afternoon, the Society assembled agreeable to adjournment, and prayer was offered by Thomas E. Babcock.

The Treasurer presented his Report for the year, showing that at the time of making his last annual report there was a balance in the Treasury of $1205 17; since which time he has received for the Palestine Mission $2119 13, for Home Missions $8 25, for the China Mission $85 16, and for general purposes $1739 29, making the total available funds of the Society for the year $5157. He had paid out during the year, for the Palestine Mission $2427 72, for the China Mission $1625 15, for Home Missions $130 00, for printing, &c., $56 28, making the total of payments $4239 15, and leaving a balance in the Treasury of $917 85. The Treasurer stated verbally, that since his report was closed, he had received for Palestine $117 04, for China $54, and for general purposes $503 22, total $688 31. He also stated, that a letter of credit for $500 had been sent to our misionaries in Palestine, for which the Treasury is responsible.

The Report of the Treasurer was accompanied with a certificate from the Auditors, that they had examined it, and found it correct; it was therefore adopted.

The Annual Report of the Executive Board was then read by the Corresponding Secretary, and adopted by the Society, after remarks by A. B. Burdick, Leman Andrus, and James R. Irish. As most of the facts and correspondence embodied in this Report are familiar to our readers, and the document will soon be printed entire, we shall not attempt to make a synopsis of it, and will make only one extract from it, as follows:—

To meet a very general wish of the contributors to the Palestine Mission, and to make its history complete, we give in this connection a summary of the expenses of its establishment, as follows:—

Salary of Bro. Jones as agent eight months, mainly devoted to collecting funds for this mission, at the rate of $500 per year	$333 32
Traveling expenses on agency	112 30
Wardrobe of Bro. Jones and family	191 47
Wardrobe of Bro. Saunders and family	178 08
Two side-saddles, bridles, &c	30 37
Provisions	92 02
Tools	85 40
Household Goods	73 27
Traveling expenses	61 19

Making an aggregate of	$3042 09

The Committee on Resolutions presented a Report, which was read, accepted, and its consideration made the special order for the evening, at 7½ o'clock.

Geo. B. Utter read a letter from Mrs. Ann M. Rogers, in relation to the estate of the late Benedict W. Rogers, and the interest of this Society therein.

James Bailey presented the following preamble and resolutions, which were adopted, after remarks by several individuals:—

Whereas, the late Benedict W. Rogers, of Williamsburg, did in his last will and testament leave his entire estate to his wife Ann M. Rogers, subject to a condition, that in case of certain changes which might take place, one third of said estate should be paid over to the Seventh-day Baptist Missionary Society, to be used under its direction; and *whereas*, the said Ann M. Rogers has by letter to this Society proposed to waive her claim to the farther use of said one third of the estate of Benedict W. Rogers, on condition of its being invested in a building in the city of New York, which shall furnish forever a home for the Benevolent Societies of the Seventh-day Baptist Denomination; therefore—

Resolved, That this Society thankfully accepts the proposition of Mrs. Rogers, [illegible] five to inquire into all legal questions connected with the proposition of Mrs. Rogers; and if they find that there is no legal obstacle to the carrying out of said proposition, to take charge of all business growing out of it; and that this Society hereby clothes said Committee with full power to receive from Mrs Rogers, or the executors of the estate, the property alluded to, to sign on behalf of the Society all such papers as may be necessary to discharge her from future obligation in the premises, and to invest the proceeds in a building in the city of New York for the free use forever of the Benevolent Societies of the Seventh-day Baptist Denomination, taking the deed so as to hold the same in trust for that object.

The following persons were then appointed the Committee referred to in the foregoing resolution, viz: Wm. M. Rogers of Brooklyn, N. Y., Geo. B. Utter, Williamsburg, N. Y., Thomas B. Brown of Genesee, N. Y., Thos. S. Greenman of Greenmanville, Ct., and James Bailey, of Plainfield, N. J.

The Nominating Committee presented their report, which was adopted, as follows:—

President—DAVID DUNN, New Market, N. J.

Vice-Presidents:
Wm. B. Maxson,
Eli S. Bailey,
Nathan V. Hull,
Thomas B. Brown,
James R. Irish,
Isaac S. Dunham,
Halsey H. Baker,
Thomas B. Stillman,
Sherman S. Griswold,
Wm. Dunn,
A. B. Burdick,
E. R. Maxson.

Cor. Sec.—James Bailey, Plainfield, N. J.
Rec. Sec.—George B. Utter, New York.
Treasurer—A. D. Titsworth, Plainfield, N. J.

Directors:
John D. Titsworth,
Randolph Dunham,
Clarke Rogers,
Isaac D. Titsworth,
Erastus P. Clarke.

Auditors—Isaac S. Dunn, C. S. Titsworth.

On motion of W. B. Gillett, the Executive Board were instructed to take immediate measures to get this Society incorporated according to law.

Adjourned till 7½ o'clock.

Agreeable to adjournment, the Society assembled at 7½ o'clock, and prayer was offered by S. S. Griswold.

The Resolutions presented by the Committee were called up and read, as follows:—

1. *Resolved*, That we acknowledge the good hand of God in the preservation of the lives of our missionaries in China during a year of continued warfare, and that we receive this as a new token of His favor to the mission.

2. *Resolved*, That we regard the Quang-se revolution, under the leadership of Tae-ping-wang, as an evidence that God is manifesting his great power to overthrow paganism, and to establish the religion of His Holy Word.

3. *Resolved*, That, the observance of the Sabbath of the Bible by the Chinese insurgents, we regard as a proof that God is about to restore the observance of his holy day, so long neglected and trampled in the dust by the Christian Church, and it becomes us who have been almost its sole defenders to be more careful in its observance, and more faithful in its propagation.

4. *Resolved*, That the many tokens of God's favor to our missionary operations should lead us to much prayerfulness for His continued blessing, and greater faithfulness in furnishing the necessary means for their support and increase.

5. *Resolved*, That while we rejoice in the establishment of a Mission in Palestine, among God's once chosen people and in the land once consecrated to his worship, we feel that it becomes us to walk carefully on this holy ground, and constantly to seek the wisdom and the blessing of God upon the offering we have made.

6. *Resolved*, That the advantage proposed by an agricultural department of our enterprise in Palestine is of sufficient importance, in the estimation of this society, to warrant the purchase of a tract of land for the use of our missionaries, and that we recommend to the Board the propriety of taking active measures to raise the necessary funds for that purpose.

7. *Resolved*, That while we have pledged ourselves to two foreign missions, and intend, under the blessing of God, to sustain and enlarge them, we feel an unabated interest in the western field, and will labor there also to enlarge and build up Zion, and teach transgressors the right ways of the Lord.

8. *Resolved*, That this Society receives with feelings of deep interest the appeal of our missionaries in China in behalf of Japan, and that we recommend to the consideration of the Board the propriety of obtaining all practicable information in regard to that land as a field of missionary labor.

The first resolution was adopted, after remarks by W. B. Gillett.

The second resolution was made the subject of remark by A. B. Burdick, S. S. Griswold, N. V. Hull, W. B. Maxson, and H. H. Baker, and adopted.

Thomas E. Babcock spoke on the third resolution, after which it was adopted.

The fourth resolution was adopted, after remarks by W. B. Maxson.

The fifth resolution was spoken to by J. R. Irish and D. E. Maxson, and adopted.

Alfred B. Burdick spoke on the sixth resolution, and it was adopted.

The seventh and eighth resolutions were adopted without remark.

Thos. E. Babcock was appointed to preach the opening discourse at the next meeting of the Society.

Adjourned to meet with the first Church in Brookfield, N. Y., at such time as the Board shall appoint and notify.

The Tract Society.

The American Sabbath Tract Society held its 11th annual meeting on Sixth-day morning, commencing at 9 o'clock.

After prayer by James R. Irish, the President, Nathan V. Hull, delivered a brief address, setting forth what he considered to be the position of Sabbath-keepers in relation to other professing Christians, and the particular field which the Sabbath Tract Society was designed to occupy.

Committees were then appointed to nominate officers and audit the Treasurer's accounts; after which the Treasurer presented his annual report, showing that the available funds of the Society during the year had been $554 66, of which there is a balance of $287 71 now in the treasury.

The Annual Report of the Board of Directors was read by the Corresponding Secretary. This report showed that during the past year a large number of the Society's publications had been distributed through volunteer agents or colporteurs, in accordance with a resolution passed at the last meeting of the Society, recommending the Board "to furnish tracts gratuitously for distribution by Sabbath-keeping laymen and preachers in their journeyings." But the Board had not relied wholly on the aid of volunteer agents for the distribution of the Society's publications. They had employed Eld. Lucius Crandall and Bro. Henry Babcock a portion of the year in the exclusive work of distributing publications, lecturing, &c. Extracts from [illegible] of these agents were embodied in the annual report, but as they have in part appeared in the Recorder, there is no occasion to say more of them here. The report also stated that new editions of all of the Society's publications had been printed during the past year, with which the depository is now amply supplied. The friends of the cause were urged, in conclusion, to allow no opportunity for circulating Sabbath publications to pass unimproved for the want of such publications.

The motion to adopt the Report of the Board was made the subject of remark by several individuals, among whom were S. S. Griswold, and Leman Andrus.

Several resolutions were then introduced, which were adopted, after remarks by Wm. B. Maxson, J. R. Irish, Lucius Crandall, A. B. Burdick, T. B. Stillman, J. M. Allen, T. E. Babcock, and others:—

1. *Resolved*, That the Sabbatic institution is fundamental, and that to abandon it is to reflect upon the wisdom and goodness of God.

2. *Resolved*, That the principles of Scripture interpretation employed to prove that the first day of the week is the Sabbath, would subvert all the teachings of the Bible, if admitted in the examination and settlement of these questions.

3. *Resolved*, That as advocates of Sabbath Reform, we ought to demonstrate the sincerity of our devotion to the cause, by entering the work with our hands washed from the inconsistency of departing ourselves from the requisitions of the fourth commandment, for purposes of gain, or convenience, or selfish pleasure.

4. *Resolved*, That as the objects of this organization are not second in importance to those of any other in which we are engaged, therefore we renew to it the pledge of our affection and hearty support.

5. *Resolved*, That the churches of the Seventh-day Baptist Denomination be requested to take active measures to supply this Society with funds to carry on its operations more efficiently and more widely.

6. *Resolved*, That the Constitution of this Society be amended by striking out of the 7th article the word *monthly*, and inserting the word *quarterly* in its place.

7. *Resolved*, That the Directors of this Society be instructed to change the title page of Tract No. 6, so as to present the seventh day as the *original* and not the *substituted* Sabbath.

8. *Resolved*, That the Society instruct the Board to take measures to publish a tract presenting the contradictory views and arguments offered by those observing the first day of the week in favor of a first-day Sabbath.

9. *Resolved*, That this Society, through its Board, procure and publish a Tract on the importance of obeying the dictates of truth and conscience in all matters of religion.

10. *Resolved*, That our Board publish a Tract, presenting a condensed historical and statistical account of those who have kept the Sabbath since Christ.

11. *Resolved*, That the Board of this Society be instructed to take the necessary action for the incorporation of this Society, according to the laws of this State.

12. *Resolved*, That we take measures to ascertain how *mia toon Sabbatoon* has been translated in the early translations of the New Testament.

The report of the Nominating Committee was presented and adopted.

The Auditing Committee reported that they had examined the Treasure's account, and found it correct; it was adopted.

The Society adjourned to meet at Brookfield, in September 1855, on such day as the Board shall appoint and notify.

The Publishing Society.

The Seventh-day Baptist Publishing Society held its fifth anniversary in the afternoon of Sixth-day and the morning of First-day. Our notes of the meeting are so incomplete, that we must defer an account of it until we can get access to the official records, which we hope to do in the course of a week or two.

SELECT YOUR READING.

It is very common for us to denounce novel-reading; but to make a wise selection from the multiplicity of books and papers amongst us, requires great care. For very much of the reading matter of the present day sustains about the same relation to the rank novel, that beer and wine sustain to strong drink. The excitement produced by these lighter stimulants is the same in kind as that produced by brandy; besides, these lighter stimulants load down and stupefy the individual who uses them, creating a necessity for something stronger. We should nip the first buddings of evil. Beer, cider, and wine, are not allowed as a beverage, because they strengthen an appetite which, if indulged, will cripple forever both body and soul. The reasons assigned for rejecting these lighter stimulants, may be urged against reading many of our weekly papers. For it is true, that the unhealthy excitement which they contain is perverting the taste of the young—it is paving the way for something more spicy, and strengthening an appetite which, if indulged, will lead to groveling thoughts, and finally to the debasing excitement of the rank novel. After reading these papers for a season, the person wants a more thrilling story—one with narrower escapes, and with more love and murder. Is it not a Christian's duty to select his reading with great care? How many there are who do not select, but subscribe for a paper at the earnest solicitation of some agent, because it is cheap. Every paper which has not a moral character should be rejected. And though the paper may contain the news of the day, and much that is unexceptionable, yet if it will stoop to low fun, and open its columns to "thrilling stories," to gratify a vitiated taste, it should be rejected. Should we embrace a man as a member of our family, and companion of our children, though he may say some useful, and even smart things, when we know he is corrupt, and that his influence upon them will be blighting? Should not a Christian feel, that it is a criminal waste of time, to follow up those exciting stories through half an hundred chapters, when every instructive thought they contain could be presented in as many lines? It is no excuse for us to say, that the paper is not what we expected, but we have signed for it, and must take it. Would you sow foul seed upon your land, because you had purchased it? No; you would not have it sown at any price. Upon the same principle, it is your duty to stop your irreligious paper, and lose it. You had better lose an hundred such debts, than to have such seed sown in your family. Shall we not furnish our families with reading, such as we can ask the Lord to bless to their moral and spiritual improvement?

ARA.

THE DROUTH.

The drouth, for several weeks past, has, in various parts of the country, so far injured the corn and potato crop, that it has become a matter of doubt whether there will be sufficient to satisfy the actual necessities of man and beast. And though none of us calculate to starve, we may reasonably be led to reflect, and ask ourselves, how much we have individually contributed to bring about this dispensation of Providence? Let us see.

God has given us corn, rye, and wheat, for bread. He has given us barley, oats, and potatoes, doubtless in part for ourselves, and also to sustain our cattle—enough for all; and common decency demands of us, that we use and appropriate them according to the will of the Giver, and for the best good of ourselves and all concerned. For an individual to take his corn, rye, barley and wheat, after it is fully ripe, and consign it to the flames, would prove, beyond a doubt, that he was either a fool or a madman; or else the righteous indignation of every man, woman and child, in the community, would be raised against him. Every individual that would connive at such a waste, and not denounce it, would deserve to be regarded in no better light. And a law which should sanction such a procedure would be a disgrace to the most degraded nation or people on earth, and an indignity against the majesty of Heaven. And, should the burning of grain become general, and those opposed not use their best endeavors, by argument, by legal enactments, and by every means in their power, to arrest the wicked waste, who in this world could wonder if God should withhold, by drouth, or otherwise, a portion of this bounty, and thus, in wisdom, teach every individual their obligation, to themselves, to their fellows, and to God?

Fellow Christians, the cause now existing for God to cut off our crops, by drouth or otherwise, is stronger by far than the one supposed above; and shall we wonder? Let us see.

Man has taken corn, rye, barley and wheat, and by subjecting it to a certain process, has made from it a poison, which, when used to a certain extent, destroys the physical, intellectual, and moral condition of man; and individuals becoming degraded by it, have demanded a law by which they may degrade their fellow men. Such a law now exists in the State of New York, and in too many other States. If the law only sanctioned the destruction of grain by fire, it would be comparatively endurable; for then, only starvation would be the consequence. But in the wasting of our grain, (which God has given us for food,) in the manufacture of alcohol, we not only lose the grain, but receive in return a poison, which is the cause of a great share of the indolence, pauperism, and crime, which prevail to so alarming an extent in our country, and which very sensibly retard the progress of our race in civilization, morality, and religion. Now, as God dispenses all our blessings, and is ever mindful of the manner in which we use them, is it strange, that He should withhold the rain, for a time, and thus allow our corn to wither by the rays of that sun, which otherwise would have perfected its growth; and thus in wisdom teach us all a lesson, by which we may remember from whom our blessings come, and by which we may learn to appropriate them all to their proper use. And we may be assured, that none of us are innocent of this great sin, so long as we connive at the wicked laws which sanction it; or neglect to use our best endeavors to secure the passage of a law which shall effectually break up this accursed traffic. Let us all remember the vast responsibility that rests on us, as citizens, as Christians, and use our influence, morally and politically, to secure speedily the passage of such a law, that God may smile on all our labors, and we approximate more nearly to that people whose "God is the Lord."

E. R. M.

ADAMS CENTER, N. Y., Sept. 1854.

"STULTIFYING THE SCRIPTURES REVIEWED."

Having anticipated all that is advanced in the "review" (?) of my article on *Stultifying the Scriptures*, and having said, that I can bear, unmoved, all the gratuitous imputations and assaults of pseudo-Christian geologists, I have but little to say on the present occasion, as not a single position of it has been discomfited by the harmless missiles of "Gurdon Evans;" and should not now take up my pen, but to acknowledge the compliment in the last paragraph of his labored effort to bolster a false position, in which he expresses a desire to have the writer "spend a few weeks with him in traversing the geological formations of central and nothern New York," lest my silence be construed into want of a proper appreciation of his "good will."

Mr. Evans is entirely too kind. Thank you, good sir; but I have seen such sights, before, and have a *few* books about such [illegible] and *some* more—have even read "Good's Book of Nature"—yea, upwards of thirty years since. I could not go without carrying the Bible with me; and with that in my hand, it would be "love's labor lost." We have crocodiles' teeth and many other things of that sort, in our extensive marl beds, here, in the Jerseys, but they never have and never can invalidate the simple Mosaic account of the creation, neither would "the geological formations of central and northern New York" do it, for the *rocky beds* and the vast *coal basins* of Pennsylvania have not done it; and yet I do not regard myself a "pertinacious" disbeliever in geological *investigations.*

To be distinctly understood, I will add, though I did not design, when I took up my pen, to extend my remarks beyond the foregoing allusion, that I do not "discard" *natural* facts, *under ground* or *above it*, while I question *geological vagaries;* neither do I depreciate the study of *legitimate* geology. We may study the structure of the globe, and derive all the practical advantages from such investigations, without entering upon *vain speculations*, and becoming *presumptuous.* Geological facts speak sufficiently for themselves, and bear their *modest* testimony to the handiwork of the Divine Architect, without requiring the *imagination* to run riot, and connect them with wild, delusive theories, at war with Revelation; so do *vain-glorious follies*, arising from pandering, unwittingly, to glaring presumptions, insidiously designed to compromit Revealed Truth, speak for themselves, *when placed in a proper light*, which was my sole purpose in inditing my article on *Stultifying the Scriptures*, without prolix "*arguments.*" What is said of Vice, by the poet, may be applied equally well to vague speculations of vain science:

> "Vice is a monster of such hideous mien,
> That to be hated, needs only to be seen."

Assumptions are no proof to my mind, however ingenious and specious they may be, or however gilded and burnished by the wise in their own conceit, and even by the good of earth. I cannot conceive of more absurd assumptions, with all the flood of adulation bestowed upon them, than the schemes of Dr. Chalmers and Dr. John Pye Smith, in their position and with their professions—the tendency of which, most indubitably, is, to stultify the Scriptures, even if they did not see it themselves, nor their obsequious followers; acting, probably, on the blind policy of the Quail, who thinks himself sufficiently concealed, and perfectly secure, when his head is hid under a leaf of clover, while his whole body is exposed to the shot of the fowler—certainly they stultify the Scriptures to a greater extent, (for every Infidel in the land boasts of it,) than any other speculative folly, save, perhaps, the one recently brought forward, prominently, by Nott and Gliddon, in their *great* work on "*The Types of Mankind;*" in which they contend, from the *fables in the bones*, that the Lord created not only one pair—our common parents, Adam and Eve—but that he *must* have created, originally, at least, *eight* pair; who are the respective progenitors of the *eight* several varieties of man—a work which I may review hereafter, when at ease from physical suffering, and more at leisure from distracting cares. Meanwhile I may state, that I shall never attempt "to meet the arguments that infidels put forth," by yielding one iota to their *pretensions*, and thereby subsidize the Scriptures, by compounding with error; nor ever "*assume*" a tainted cloak to screen myself from disloyalty to my Master's precious Word. The Scriptures can stand on their own intrinsic merits, without the adventitious aid of *vain science*, and I am willing to stand or fall on the integrity of that imperishable monument of Infinite Wisdom; all the twattle about "Galileo, Astronomy, and Navigation," (obtruded so frequently, by the most puerile apologists for geological speculations, as to have become nauseating to men of sense, if not a phrase of contempt,) to the contrary notwithstanding.

W. M. F.

THE BAPTIST BIBLE HOUSE.—The Baptists having completed their new Bible House, in Nassau st., New York, opened it with appropriate ceremonies on the 11th inst. Many of the leading Baptists of the country were present, and addresses were delivered by several of them. The Real Estate Committee presented a report, embodying many interesting facts. It seems that the ground on which this building stands was purchased in January 1853, and possession of it taken in May of the same year. The price was $55,000. This has been increased by interest, taxes and other expenses incident to the purchase to about $60,000. This sum has been paid. The subscription undertaken to meet it had *reached* the sum of $55,000 at the anniversary of the society in May last, and about $33,000 has been received. The residue is considered reliable. The building was erected at an expense of about 75,000.

The Committee appointed by the Society at Hope Chapel in May, 1852, at an early period laid down several provisions in relation to this property, among which one was that this Society should furnish to other Societies of the denomination suitable rooms and accommodations for their business purposes, free of rent, and it was directed to tender the same within one month to the American Baptist Home Mission Society, the American Baptist Missionary Union, the American Baptist Publication Society, and the New York Baptist State Convention. The State Convention and the Publication Society accepted the offer in due time.

CHILDREN DEDICATED WITHOUT BAPTISM.—A letter from a Welsh Baptist to one of our exchanges, alludes to a custom prevalent among the Baptists there, which has never obtained in this country. We give the extract containing the allusion, for the benefit of our readers:—

"Your friend is right in [illegible] the strength of the Welsh Baptists partly to their frequent preaching on the subject, that is, nearly as often as they have occasion to baptize; but he forgot to name another most obvious source of success, namely, the general custom of holding special services for naming children, as they call it, or for dedicating them, as others would say. This ancient and venerable usage, which I love to follow as a Welsh Baptist, has the obvious advantage of partly disarming the prejudices of our opponents, and of frequently presenting the reasons we urge against our brethren's practice, showing them how we indeed delight to pray for infants, while we dare not presume to baptize them. I feel quite certain of the happy tendency of the practice, which has so much sanction in Wales that even the denominational hymn book, prepared by the great and good Joseph Harris, includes special hymns for the occasion or ceremony."

PROPOSED HOLIDAY.—Dr. Cumming of London proposes that New-Year's day, Easter Monday, the anniversary of Waterloo, Whit Monday, the Queen's birthday, St. Andrew's day, and St. Patrick's day, be full holidays, and that, during the summer months, June, July, August, shops and warehouses and all houses of business either close entirely at four o'clock in the afternoon, or allow half the hands employed to go free at that hour. "This (he says) would be taking a few days from Mammon, instead of taking the sacred day from its great Proprietor, and from its vital destination. On the continent there are endless saints' days, which are practically and sensibly enough turned into days of pleasure and rest. We have justly banished these days from our religious calendar, and we could not do better than transfer them to that of the British Museum, the Crystal Palace, and the Zoological Gardens," etc.

THE RELIGIOUS DENOMINATIONS in the United States: their History, Doctrines, Government, and Statistics; with a preliminary sketch of Judaism, Paganism, and Mahommedanism. By JOSEPH BELCHER, D. D. Embellished with nearly two hundred engravings. Philadelphia: published by J. E. Potter. Pp. 1024.

We are indebted to the publisher for a copy of this work, which we esteem very highly, and take great pleasure in commending. It seems to have been written with care and impartiality, and will prove invaluable to those who wish a concise and yet complete sketch of the different religious denominations. How much time and temper would be saved, if persons given to controversy would make themselves familiar, through some such work, with the doctrines and principles of those whom they oppose.

The annual "Autumnal Convention" of the Unitarians of America will be held in the city of Montreal, on Tuesday, October 10th. A large delegation of the clergy and laity of the denomination will be present from the United States.

IMPERFECT IN ORIGINAL

A Picture of Romanism.—Professor Schaff, of Mercersburg, has been visiting different seats of learning in Europe since the commencement of this year, and in a letter, dated Paris, 13th February, 1854, speaking of the numerical strength of the Roman Catholics in England, he says :—

"The result of the last census is more unfavorable to the Roman church than had been expected. According to the census, the Roman church scarce numbers one-half the number in England usually accorded her, whilst she furnishes the largest number of *Gafaengniss kandidatan*, (candidates for prison!) According to a Report of Parliament, published in the Catholic Tablet, Dublin, Feb. 25, 1852, out of a population of 21,000,000, in England and Scotland, whereof the Roman church claims 1,000,000, she supplies the prisons with 2,955 candidates. Three Romans to one of all the other churches."

The Popish Poor in Great Britain.—A considerable stir is now going on in Romish circles in Great Britain in reference to the education of the poor. The Hon. Charles Langdale, Lord Edward Howard, and other leading Romanists, are making efforts to organize a fund of $500,000, to provide for this object. By their own confession, the education of the Romanist poor is neglected to a fearful degree: "In London there are 22,000 children, of whom only about 4000 are receiving Romish education. The greater part of the remaining number are left to pass their tender years in the novitiate of a London street. There is no proportion between the wants of our poor and our provision for them, between our wealth and the education we can give. We are put to shame by every other body; and yet we are the salt of the earth."

Christian Self-denial.—Rev. R. Bickersteth, placed in the laborious and important post of St. Giles-in-the-Fields, and having his income reduced *one third* by the prohibition of town interments, was offered a valuable living in Kent. Mr. Short, with the burden of nine thousand people in St. George's, Queen square, had the tender of the deanery of St. Asaph. Both of these clergymen replied, that they must not "seek their own;" that ease and comfort were good things, but not to be purchased by flying from posts of self-denying duty. Both the offers were declined; and both these faithful men remain in their present toilsome positions."

A Commercial Transaction.—The *Buffalo Democrat* has the following:—

"A well-known, successful, and liberal wheat operator on the dock, proposed a short time since, to another gentleman similarly engaged, that they should together invest a sum of money in wheat, the profits, if any, to be donated to the service of Christianity. The other, however, declined, which made the author of the proposition the more earnest, and he at once purchased wheat to the value of $3000 on the account of the Church. When the returns came in, he found the operation to have yielded a profit of 50 per cent., which amount of $1500 he turned over at once to the cause, by placing it in the hands of Rev. Dr. Lord!"

Liquor Law in New Jersey.—A letter dated Newark, N. J., Sept. 9th, says that the friends of a Prohibitory Liquor Law in New Jersey are becoming thoroughly organized. The New Jersey Prohibitory Liquor Law Association have adopted the following resolutions:—

Resolved, That we will vote, irrespective of party, for such and only such candidates for the Legislature of New Jersey as are known to be in favor of enacting a stringent Prohibitory Liquor Law.

Resolved, That we recommend to the friends of Temperance throughout the State to vote for reliable friends of Liquor Prohibition, without regard to party, and should the candidates of both the prominent political parties be adverse to such enactment, that a reliable independent candidate be nominated.

New Feature in our Agricultural Fairs.—The Cayuga County Fair was brought to a close on Thursday last by a riding match, participated in exclusively by ladies, which is thus described by a correspondent:

"The following fair ones entered the list for the premiums, which ranged from silver goblets down to plated candlesticks: Mrs. Schenck, Mrs. Conrad, Miss Elderton, Miss Bartlett, Miss McCabe, Miss Stevens, and Mrs. Henry. The awards for the required degrees of proficiency in horsewomanship ran thus: No. 1, Miss Stevens; 2, Mrs. Conrad; 3, Miss Bartlett; 4, Mrs. Schenck. To Mrs. Henry a 'special premium' was voted. The reason assigned for this by the committee was, that she not only came in too late for full competition, but presented a test they were not exactly prepared for. She was mounted without any saddle—a blanket alone protecting her riding habit. Although she had a young and very 'heady' horse—a mere colt of her own breaking, it is said—so easily did she sit, and such was her self-possession as well as skill, that the committee never suspected the absence of a saddle until she was about leaving the ring."

Melancholy Bereavement of Three Children.—The Ohio *Northwest*, Sept. 6, says:—A sad and fatal accident occurred in Harrison township, this county, on last Sunday, the 3d instant. Mr. Asa Crockett was in the woods, near his house, engaged in felling timber. The butt of a tree which he had chopped down clung to the stump, and in passing under the trunk for the purpose of getting to the other side, it fell, striking him with tremendous force on the temple, crushing his skull in a shocking manner. His three children were with him at the time, the eldest of whom is nine or ten years old. Instead of alarming the neighbors, they stayed with their father till after dark, when death put an end to his sufferings. The accident happened about 10 o'clock in the forenoon. The little children slept in their cabin that night by themselves, and when inquired of the next morning by a person who came to their cabin, where their father was, replied that they had "no father now—he was out in the woods dead." The body was pointed out by the children, and an inquest held, and a verdict rendered in accordance with the above facts.

Loss of the Ship Shenandoah in the late Gale.

On the 12th inst., in lat. 40° 45', lon. 70° 05' W., Capt. Miller, of the bark Brilliant, described a ship with main-topmast and fore and mizen topgallant-masts carried away; she appeared to be steering W. by N. On the evening of the same day, the Brilliant fell in with the crew of the ship Shenanhoah, Capt. Miller, from Liverpool, in two open boats. The shipwrecked mariners were rescued by the Brilliant, and brought into the port of New York, Sept. 14. The following account of the shipwreck was furnished by Captain Miller, of the ship Shenandoah.

We left Liverpool in the ship Shenandoah on the 29th day of July, laden with coal, for New York. All went on well until Sunday the 10th day of September, when a strong breeze sprung up from the eastward, which by night increased to a gale, with a very high sea running. We took in the top-gallant sails, mizen top-sail, and main-sail. At 8 o'clock P. M., we took two reefs in the main-topsail and fore-topsail. By 11 P. M., the wind had increased to a hurricane, accompanied with heavy rain and lightning, and a fierce broken sea, running very high. Hauled up the foresail, but in doing so it blew away. At the same time our main-topsail split to pieces, and the furled top-gallant sails and jib also blew away. At 11.30 P. M., a terrific squall swept over the deep, causing the ship to broach-to; the fore-topsail and fore-topmast staysail blew away; and to crown our disasters the cargo shifted to port, and laid the vessel on her beam ends. The fore-mast and mizen-mast were carried away close to the deck, and the main-mast snapped off eight feet below the eyes of the lower rigging. At the same instant a mountainous sea swept over us, carrying the chief officer overboard with it, and the unfortunate man was never seen afterward. The gig boat, from the top of the forward-house on deck, together with spare spars, were washed away. The bulwarks, fore-and-aft on the port side, and stanchions from the poop to the gangway suffered the same fate. The covering-boards and water-ways were split, the after hatches carried away, the poop skylight crushed in, and the cabin half filled with water, which set every thing movable afloat, washing fore and aft the cabin with the rolling of the ship.

We sounded the pumps and found four feet of water in the well. Two men were immediately set to work pumping, and the carpenter to secure the hatches. The remainder of the crew worked manfully at the wreck, cutting away the broken spars and clearing off the rubbish. By 3 1-2 o'clock we got the ship clear of the wreck alongside, when all hands were set to work the pumps, the ship still lying-to, with the port covering boards under water and the sea making a most fearful breach over us. The gale continued to rage until Monday noon, when its fury somewhat abated, but the sea still broke over the lee-deck, and despite the most strenuous efforts on the part of our men the water gained on the pumps.

We get out a main staysail and set it upon the stump of the mainmast, and by its aid kept our ship's head to the sea. At noon, on Tuesday, we had light winds and a high sea, the ship lying on her broadside and the water rushing into her hold very fast. Held a consultation with the crew as to our best course under such perilous circumstances, when it was determined by them to leave the ship, as there was not the slightest chance of saving her. for we had no spars, and the vessel was lying on her broadside with seven feet of water in her hold. Accordingly we got out the long-boat and pinnace, and having provisioned them, left the Shenandoah at 6 o'clock P. M., to try our fortunes on the treachery ocean. The same night, at 9 o'clock, we fell in with the bark Brilliant, Capt. P. Miller, who with noble promptitude backed his yards, took us on board, and treated us as only seamen know how to succor sailors under such distressing circumstances.

Cotton and Slave Statistics.—The Southwestern News makes up from the Census Report some very important statistics, peculiarly interesting to the cotton growing and slave States, South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana, Texas and Arkansas. The whole area is 663,185 square miles, of which 21,675,682 acres are improved land. The number of slaves is 1,798,768, whose average rate of increase for the last ten years is 54.46 per cent. The number of bales of cotton made is 2,204,521, averaging 1,197 bales per thousand slaves. Average number of acres of improved land per bale is 10.12. Of Georgia the area is 58,000 square miles; improved land, 6,378,479 acres; slaves, 381,682; rate of increase for the last ten years, 35.85 per cent.; bales of cotton, 499,091; bales per thousand slaves, 1,309; acres of improved land per bale, 12.77. These statistical views are not limited to the present. The calculations are carried forward 40 years to 1890, with the following result:—Actual number of slaves according to ratio of increase in the United States, (28.97) 5,004,219. Actual number according to ratio of increase in planting States, (54.46) 10,295,962. Slave population demanded by the crop, 13,218,715. Acres of improved land requied, 160,102,539. Bales of cotton demanded by planting States, 15,820,409. By this it is supposed the world will be well supplied with cotton.

[Savannah Evening Journal.

The new locomotive Cleveland, drawing the morning passenger train from Albany for Boston, was, with a baggage car, thrown from the track near Chatham, on Saturday, Sept. 17. All the passenger cars remained on the track. The engineer, Thompson & Co.'s Express messenger, and one passenger, were considerably hurt. The locomotive was badly damaged.

The steamer *Humming Bird* burst her boiler on Grand River, Michigan, seven miles below the city of Grand Rapids, on Saturday last. Only one person was killed, and he a boy, who, just before the accident, was observed to move the weights to the extreme end of the lever which holds down the safety-valve. The captain and pilot and one passenger were thrown into the water, but escaped with inconsiderable injuries.

One week later news from Europe has been received since our last, but there is nothing important, except that the cholera is making extensive ravages among the French and English soldiers.

SUMMARY.

The N. Y. *Tribune* says: We gave some time since a report of the trial and conviction of John Kavanagh, one of the members of the Brooklyn Board of Excise, for granting rum licenses to improper persons. Sentence was suspended in the hope that repentance would ensue; but so far from it, 137 "taverns" have been licensed since Kavanagh's conviction, by the Board of which he is a member. Judge Rockwell, after a reprimand, sentenced him to pay a fine of $250, and to spend the next thirty days of his life in the County Jail.

The fourth annual Fair of the Vermont State Agricultural Society, held last week at Brattleborro', appears to have been all that the friends of improvement in that State could desire. The show of cattle of all kinds was the best of any of the previous Fairs. It was estimated that 15,000 people were on the ground at one time during the second day. On the third day the crowd were dispersed by a very unusual occurrence this season—it rained.

The track of the Milwaukie and Mississippi Railroad, near Madison, in Wisconsin, has sunk about eight feet below its proper level, and now lies, for the distance of half a mile, six feet under water. The road at this spot was built over marsh land, and the accident was caused by the heavy weight of the superstructure. The detention of passengers, and the cost of extricating the rails and filling up, will involve much inconvenience and expense.

A Bennington, Vt., paper says: "The potato crop, which a few days ago betokened a total failure, now promises to be quite good. The late planted potatoes never were doing better, and we are informed that some pieces—should the present state of the weather exist for a few days longer—will yield nearly an average crop. From present appearance potatoes cannot be a month or two hence above 37 1-2 cents per bushel, and they may be below that price."

The brig Agusta, Capt. Stone, from Savannah, arrived Saturday morning, lost on the first instant, W. Seymour, seaman, of New York, and on the 7th, John O'Connel, the mate, also of New York, both by yellow fever. Owing to the sickness among the crew, Capt. Stone and three of the seamen had been on duty for ten days when they got into port.

In the interior of Illinois, corn is selling at 35c. and 40c. a bushel, deliverable next winter. A full half crop is estimated for the average yield, though that is too high for some counties. The stock of old corn, take it through the West, is estimated to be greater than at this time last year, with a greater disposition to economize.

The Oldest Church now existing in the United States is one near Smithfield, Isle of Wight County, Va. It was built in the reign of Charles I., between the years 1630 and 1635. The brick, lime, and timber were imported from England. The timber is English oak, and was framed in England. The structure is of brick, erected in the most substantial manner. The mortar has become so hardened that it will strike fire in collision with steel.

The Hartford *Courant* says that in the month of July there were twenty commitments to the work-house in that city; in the month of August, eight; and on Saturday, Sept. 9, *there was not a single male person in the work-house*, and the building, but for two females, would be tenantless! The *Courant* attributes this happy state of things to the operation of the new Connecticut Liquor Law.

Mr. Charles Joy was instantly killed upon the Portland, Saco, and Portsmouth Railroad last week, while walking on the track. He was told but a few minutes before the accident that the train was coming, but as is usually the case when danger is at hand, he lost his presence of mind. He was sixty years of age, and when the accident occurred was on his return from seeing a sick daughter.

It is estimated that the Canadas will raise the present season a surplus of 12,000,000 bushels of wheat, which of course will look abroad for a market. By the new reciprocity treaty, provincial grain and flour come into our market free of duty, and upon an equal footing with the productions of our own farmers.

The executors of the will of the late Sam. Appleton, of New York city, have made a donation of *twenty thousand* dollars to the Academy at New Ipswich, N. H. The Institution, since 1850, has been known as the "New Ipswich Appleton Academy." Mr. Appleton made a donation of *five thousand* dollars to the Seminary four years ago.

Dr. George Buchanan, of Hillsdale, Ohio, killed himself the other day by an overdose of morphine, while suffering from an attack of cholera morbus. It would seem that he was a little inclined to give large doses of that medicine, as he had a short time before been arrested for mal-practice in causing the death of a child by it.

The growing rice in seaboard South Carolina and Georgia has suffered terribly from recent storms. Some journals estimate the loss at two-thirds of the entire crop; but that will doubtless prove an exaggeration. It will, however, be very heavy, and follows very inopportunely on the heels of the failure of the corn crop.

The British and Foreign Bible Society have, at a great expense, translated and printed the Bible in the language of the Mongol Tartars; but the Emperor of Russia, who is the master of the Mongols, has forbidden its circulation, and the whole edition remains useless on the Society's shelves in London.

At an inquest on the body of an Irish woman in New York, lately, it was proved that the deceased had not drawn a sober breath for the last ten months, and that on the day before her death she drank sixteen quarts of beer, besides any quantity of stronger liquors.

Depredations to the amount of $13,000 have been committed in the Augusta Post Office by a negro, who has confessed his crime and restored the most of the money.

A special meeting of the American Anti-Slavery Society will be held in Syracuse on Wednesday, the 29th inst. Distinguished speakers will be present.

Silver, copper, lead and plaster of Paris have been found in abundance in Western Virginia and Eastern Tennessee during recent railroad excavations.

The Charleston papers of Saturday, Sept. 10, give detailed accounts of the first of the terrific autumnal storms which will undoubtedly ravage the Atlantic coast from Florida to Nova Scotia. The gale was one of unexampled fury, continuing for thirty-six hours, and destroying an immense amount of property. No such tornado has prevailed at Charleston since 1804.

A lens light, of the fourth order, has been substituted for the reflecting illuminating apparatus at the Old Point Comfort light-house, Virginia. The elevation of the focal plane is 45 feet above sea-level, and, under ordinary states of the atmosphere, the light will be visible at an elevation of 10 feet above the water, 11 3-4 nautical or 13 English miles distant.

All the stores and shops in the village of Suncook, N. H., ten miles from Concord, (twelve in number,) were burned down a few days since. Not a business establishment, except the factory, was left. The woods adjoining were burning furiously at the same time.

The New York Novelty Works have just completed an immense copper vacuum pan, weighing five tons, for the Boston Sugar Refining Company. It is seven feet and 6 inches deep, and is welded together in the most substantial manner. Its entire cost will be about $8000.

Basswood Paper has been made by Mr. G. W. Beardslee, of Albany. He planes the basswood into thin shavings, which he converts into pulp. An Albany paper is to be printed one day upon what was a basswood tree the day before.

Nearly one hundred and fifty deaf mutes from the northern and eastern sections of New England met at the Springfield railway station recently, on their way to participate in the raising of the monument to the memory of Rev. Thomas H. Gallaudet.

A western paper says that a few days since a train, composed of nine wagons, and fifty persons, Mormons, crossed the Missouri eastwardly in search of a new home. They had left Salt Lake City on account of the oppression and immorality of their church.

A beautiful ship of 900 tuns, called the "Gulfstream," was launched from the yard of the Messrs. Titcomb, in Kennebunk, on the evening of the 4th inst. It occurred at an unusual hour, and was a somewhat rare spectacle.

A valuable negro man, belonging to Mr. J. M'Coy Brown, of Spring Creek, in Greenbrier County, Va., hung himself Wednesday, 23d ultimo. It is supposed that he committed the deed under the apprehension that he was to be sold "down South."

In St. Stephens, N. B., early Tuesday morning, Sept. 12, a fire broke out in the barn of Wm. Campbell, which rapidly spread to other buildings, destroying ten dwellings and stores in the vicinity. The loss is $35,000.

The Portland *Advertiser* states that Messrs. Wier & Cochran, of Liverpool, are about to establish a line of packets between that city and Portland. Four or five clippers will be placed on the line immediately.

A Five Cents Savings Bank went into operation in Worcester, Mass., July 1, and up to August 26, there had been 423 deposits from 325 depositors, amounting in all to $5,665 69.

The American Baptist Home Mission Society has come into possession of $6,000, bequeathed by the late Garret N. Bleeker, as the commencement of a permanent fund for the support of the Secretaries of the Society.

J. C. Ivison, a well-known book-seller at Auburn, was killed near that city, by an accidental discharge of his gun when out shooting. He was aged 34, and was the largest bookseller in Auburn.

The Syracuse and Binghamton Railroad will probably be opened about the 1st of October, wind and weather permitting. On the first of this month there were twenty-four miles of track to lay.

The well at Belcher's refinery, St. Louis, has been bored to the depth of 2,200 feet. At 700 feet they struck salt water; at about 1,500 a sulphur spring, which has poured forth the best sulphur water ever since. They are boring on to get the pure element.

The entire line of railroad from Quebec to Richmond will be opened for traffic and travel on the 2d of October; on and after which day regular trains will traverse the road between Montreal, Richmond, Quebec and Portland.

Rev. William Chittenden, a clergyman of the Presbyterian denomination, committed suicide, by hanging himself in the barn of Mr. Henry Isham, near Watertown, N. Y., recently.

A mulatto slave, who worked in the office of the Louisville *Journal*, made his escape to Canada, a few days ago, and sent his mistress a letter therefrom, informing her of his safe arrival.

A man named Neal was murdered in Mississippi by another named Browning, who supposed Neal had willed him four thousand dollars. On opening the will the murderer's name was not found!

It is understood that the Drovers' Bank and the Bank of Carthage of this State, recently suspended, will be resuscitated within a few days. Parties holding the notes of these institutions should not sacrifice them.

The engineer of the train which run into the river at Norwalk, Ct., causing the great loss of life last year, died at New Haven, recently. He has not been well since the accident.

All the family of the late General Taylor, who occupied the White House, are dead—the General himself, his wife, his daughter, Mrs. Bliss, and Col. Bliss. Mrs. Fillmore is also dead, and also her daughter.

Rev. H. N. Hudson is about to withdraw from the editorship of the New York *Churchman*, differences of opinion between himself and the proprietor, as to editorial control, being the cause.

The statistics published in the Montreal *Herald* show that the total number of deaths by cholera in that city, in eight weeks, has been 1,186.

John B. Gough stated in a late lecture, that out of 500,000 persons who had signed the temperance pledge, in the United States, 450,000 had broken it! Fifty thousand SAVED.

There is talk of removing the Charlestown (Mass.) Navy Yard to Newport, R. I., its site being required for business purposes. The Government will give its consent, provided the United States can be saved from pecuniary loss.

The last census shows that in the free States there were 177 daily papers and 1632 weekly, etc., printed; while in the slave States there were only 79 daily and 645 weekly papers.

During the month of August, 81 persons died in Oswego, 27 of whom died of cholera. In the same month last year the mortality was 52.

We are told that some of the people of Lorain County, Ohio, during the late drouth, have had to go eight miles for water for ordinary household use.

A brakeman named Lattiff, employed upon the Canandaigua and Niagara Falls Railroad, fell under the cars on Wednesday, and his head was severed from his body.

"Old Father Sawyer," aged 99, and the oldest clergyman in the country, delivered an address before the graduating class of the Bangor Theological Seminary last week.

The Norfolk *Herald* (Virginia) has entered upon the sixty-first year of its existence, its publication having commenced on the 13th of August, 1794.

A destructive fire occurred, Sept. 10, at Brunswick, Missouri, consuming nearly the whole of the town. Nineteen houses in the business part of the place were destroyed.

The colored citizens of Connecticut will hold a convention at Middletown on the 27th inst., to consider the means of their general improvement.

The transportation business in breadstuffs on the Erie Canal this season, with the single exception of Indian corn, is much below that of 1853.

During the six months ending September 1, the municipal expenses for the city of Cincinnati amounted to $254,275 84.

The clipper-ship Witchcraft, of Boston, Capt. Freeman, has just made the run from New York to San Francisco in 98 days.

John P. Hale delivers the annual address before the New York State Agricultural Society in New York, early in October.

There is a great apple crop in Western Ohio, where good ones are in abundance at 30 cents a bushel.

The Hon. Samuel Stephens, ex-Attorney-General of New York, died at Rochester, Sept. 12.

The Cincinnati *Price Current* gives the hog census of 64 counties in Indiana at 2,168,833.

Thirteen emigrant vessels arrived in this port on Saturday last, with an aggregate of 4,562 emigrants on board.

The U. S. Government now owns 1,700,000,000—seventeen hundred millions of acres of unoccupied land.

G. W. Burbank, a miller, of Rochester, is said to have given $5,000 towards the endowment of the University of Rochester.

The loss by the recent fire at Brunswick, Mo., was about $75,000, and the insurance amounted to from $40,000 to $50,000.

We have painful accounts of the ravages of cholera at Columbia, Pa. The virulence of the disease is almost beyond precedent.

During the month of August last 539 deaths occurred in the city of Buffalo, of which cholera absorbed 219.

In Hancock Co., Va., there are only three slaves.

MARRIED.

In Brookfield, N. Y., Sept. 10th, by Eld. Joshua Clarke, Mr. Henry Smith, of East Hamilton, to Miss Elizabeth L. Stanley, of Cassville, N. Y.

In Independence, N. Y., Sept. 12th, 1854, by Eld. T. E. Babcock, Mr. Hiram Taylor, of Osceola, Pa., to Miss Louisa Bosard, of Independence.

DIED.

In Andover, N. Y., Sept. 7th, 1854, of dysentery, Harriet E., daughter of Elias and Evaline Wells, in the 7th year of her age.

RECEIPTS.

WILLIAM M. ROGERS, Treasurer.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health. A. UTTER, M. D.,
Physician and Proprietor.

New Market Seminary.

THE Academic Year of this Institution, for 1854 and '55, is divided into three terms, each fourteen weeks long.

The Fall Term commences Sept. 5, and closes Dec. 8.
Winter " " Dec. 13, " " Mar. 20.
Spring " " Mar. 28, " " July 4.

The Department of Instruction is in the care of Mrs. R. H. WHITFORD, Preceptress, who will be assisted by competent teachers, as occasion may require.

INSTRUCTION.—The Common English Branches, Reading, Writing, Geography, Arithmetic, and Grammar, will be taught each term. The Higher English Branches taught as follows:—In the Fall Term, Chemistry, Geometry, and Book-Keeping; in the Winter, Natural Philosophy, Physiology, and Astronomy; in the Spring, Botany, Geology, and Moral Science. Algebra, Etymology, and Rhetoric taught all terms in the year. Classes in French and the Extras will be taught whenever desired.

EXPENSES.—*Tuition, per term*—for Common English Branches, $3 50; for Etymology and Book-Keeping, $4 50; for Higher English Branches and French, $5 00; for Incidentals. $ 25.

Extras, per term—Penciling, $1 00; Crayoning, $2 00; Embroidery, $3 00; Oil Painting $7 00; Piano Music, $10 00.

REGULATIONS.—No student is admitted for less than half a term. No deduction in price of tuition made for absence, except in cases of sickness. Nothing sectarian is taught or countenanced in the school.

A new and commodious building will be ready for the shcool at the opening of the Fall Term.

DAVID DUNN, Pres. of Board of Trus.
ISAAC H. DUNN, Sec'y.
NEW MARKET, N. J., July 20, 1854.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice commmencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

Hudson River Railroad.

NEW ARRANGEMENT.—On and after Monday, August 14th, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

6 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains. Through in 4 hours from 31st street.

7.00 A M—Poughkeepsie Way Passenger Train.

8.00 A M—Mail Train for Albany and Troy, stopping at Peekskill, Garrisons, Cold Spring, Fishkill, New Hamburgh, Poughkeepsie, and all Mail Stations North of Poughkeepsie.

9.00 A M—Peekskill Way Passenger Train.

12.00 M—Way Train for Albany and Troy, stopping at Yonkers, Tarrytown, Sing Sing, Crugers, Peekskill, Garrisons, Cold Spring, Fishkill, New Hamburgh, Poughkeepsie, Hyde Park, Rhinebeck, Tivoli, Oakhill, Hudson, Stuyvesant, and Castleton, and connecting with the Express Train leaving Albany at 6.30 P M for Buffalo, and at Troy with Northern Trains for Saratoga and Montreal.

1.00 P M—Po'keepsie Freight and Passenger Train.

3.30 P M—Peekskill Way Passenger Train.

4.30 P M—Express Train to Albany and Troy, stopping at Tarrytown, Sing Sing, Peekskill, Garrisons, Fishkill, Poughkeepsie, and all Time Table Stations North, and connecting at Albany with Western Express Train at 10.30 P M for Buffalo.

5 00 P M—Poughkeepsie Passenger Train.

5.30 P M—To Peekskill, stopping at all Way Stations.

6.30 P M—Emigrant and Freight Train for Albany and Troy, stopping at all Time Table Stasions.

8.30 P M—To Tarrytown, stopping at all Stations.

Sunday Mail Train at 9 A. M. from Canal-st. for Albany, stopping at all Way Stations

OLIVER H. LEE, Superintendent.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Election Notice.

STATE OF NEW YORK—Secretary's Office, Albany, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

Sheriff's Office, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

Miscellaneous.

From the N. Y. Tribune.

Idiots and their Instruction.

The number of idiotic and foolish or feeble-minded persons in the United States is much greater than is generally supposed. In taking the census of 1850, a separate schedule was provided (and this for the first time) for the enumeration of idiotic persons, and the number reported was 15,787. The returns on this and kindred subjects are known to be very imperfect, arising chiefly from the extreme unwillingness of parents and friends to make known or admit the existence of idiocy in their families. In Massachusetts, in the year 1846, a special Board of Commissioners was appointed to ascertain the number and condition of idiots in that State, and it was found that *there were at least two and a-half times as many as were reported by the census of* 1850. If this result for Massachusetts can be taken as a fair basis for the United States, it appears that the census should have reported 40,000 idiots in this country.

The condition of this unfortunate class is generally most lamentable. Even in those rare cases where they belong to wealthy families, they are necessarily a source of great discomfort to their relatives. Among the poorer classes their care and maintenance is the greatest burden of the household. If consigned to the alms-house they are left to almost utter neglect. In nearly all cases they are considered beyond improvement, and hence nothing is done for their permanent relief. The subject of their education is of recent history, and is not known to the public in general, since its discussion has been limited to medical periodicals; and the facts relative to the few schools which have been established have been published in but very few newspapers. The first school for idiots was organized in 1828, at the Bicétre Hospital for the Insane, in Paris, and is still continued. Its success led to the foundation of another in that city, and of several others in Europe, all of which are yet in successful operation. The principal English Asylum, founded Oct. 27, 1847, is at Earlswood, and contains about 300 inmates. It is under the patronage of her Majesty, and the corner-stone of the new institution was laid in June, 1853, by Prince Albert. Its edifice is a splendid structure of white stone, costing about $140,000, on an estate of 130 acres. Near Dundee, in Scotland, is an asylum founded last year, for the same purpose.

The first effort for the education of any idiot in the United States was made in 1839 at the Perkins Institution for the Blind, by Dr. S. G. Howe, who then treated and greatly improved a blind idiotic child, and afterward two others. In 1845 the friends of this cause in Massachusetts and New York determined to ask their Legislatures for assistance in founding institutions for idiots. Dr. Brigham, of the Lunatic Asylum at Utica, in his annual report, Nov. 30, 1845, gave a synoptical statement of the number of insane and idiotic persons in the State of New York, reported the success of European institutions for idiots, and expressed the hope that New York would, sooner or later, provide an asylum for their special improvement. In Jan., 1846, committees were appointed in the Legislatures of Massachusetts and New York to report on idiocy, and by a curious coincidence both reports were presented on March 25, 1846. The New York Committee (of which Dr. Backus, of Rochester, who was the originator and most zealous friend of the movement in this State, was chairman,) introduced a bill for the immediate establishment of an asylum, which passed the Senate, but was finally rejected in the House.

The Massachusetts Legislature ordered the appointment of Commissioners to examine into and report on the number and condition of idiots in that State, which duty was faithfully executed during the two years ensuing, and its results were presented in two annual reports. The establishment of an Experimental School was recommended, and was approved by the Legislature, which by act of May 8, 1848, appropriated $2,500 annually for that purpose for three years. The school was accordingly commenced on Oct. 1, 1848, at the Asylum for the Blind in South Boston. It was considered so successful that, at the end of two years, the Legislature made provision by act of April 4, 1850, for converting the Experimental School into a permanent State Institution; and by the act of April 30, 1851, appropriated $5,000 annually for its support. In this way, after the expiration of the three years for which the Experimental School was organized, its pupils, fifteen in number, were received as pupils of the new institution, and they continued to receive instruction as before. The school was removed in November following from the Blind Asylum to a large and commodious house in South Boston, which it still occupies. On January 1, 1852, the number of pupils was twenty five, and on January 1, 1853, thirty-seven. During 1853, fifty-three pupils enjoyed its advantages, all of whom made marked improvement and were elevated in various degrees from the very low condition in which they were found. All the funds given by the State and received for pay-pupils have been exclusively devoted to the maintenance of the school. Dr. S. G. Howe, its eminent Superintendent and founder, has from the beginning generously given his services without salary. Pupils from Rhode Island are received here at the expense of that State, which has placed the idiot upon the same footing with the blind, deaf and dumb, in regard to instruction at the State's expense. We should add that there is an excellent private school at Barre, Mass., which was commenced in 1848 by Dr. H. B. Wilbur, who is now Superintendent of the New York State Asylum for Idiots, near Albany.

As previously mentioned, the project for the New York Asylum was acted upon by the Legislature in 1846. In 1847 the bill was again passed by the Senate, but failed in the Assembly, though mainly for the want of time. In 1849 and 1850 the measure was warmly recommended by Gov. Fish in both of his annual messages. In 1851, Gov. Hunt specially and emphatically called upon the Legislature to make some provision on the subject, and this appeal, with other efforts, led to the passage of the act of July 10, 1851, which appropriated $6,000 annually for two years to establish an Asylum. The Board of Trustees was authorized to select twenty State pupils, and to receive others on payment. The Board organized immediately, visited Dr. Wilbur's school at Barre, elected him Superintendent, and fixed the Asylum at Albany. It opened in October 1851, with sixteen State pupils and seven pay pupils, "who were unquestionably below the mass of idiots in the State in point of intelligence." The operations of the Asylum were reported to the Legislature of 1853, with recommendations that the number of State pupils should be increased to thirty, that $1,500 as additional appropriation should be granted, and the that measures should be taken to ascertain number of idiots in the State—all of which was agreed to by the Legislature. The statistical returns received were very imperfect, but afforded grounds for believing that there was in the State one idiot to every 1,070 inhabitants, or about 2,800 in all; and that of these, one-fourth (700) were under fourteen years of age, capable of training, and instruction. During 1852 the whole number of State pupils were present, with sixteen pay pupils, who were trained by the Superintendent, three female teachers, and an assistant. The number of rejected applications for admission was equal to that of those admitted. In 1853 the Legislature granted $10,000 for support of the Asylum, and $20,000 for a new site and buildings, and the Trustees purchased four and a-half acres of land on the Troy Road for $6,750; but owing to the insufficiency of the appropriation for a suitable building, they deferred action on that matter. During 1853, the Asylum contained forty State pupils and ten pay pupils, and very many applicants were necessarily rejected for want of room.

The Legislature of 1854 passed an act by which the trustees have provided for the permanent establishment of this Asylum at Syracuse, and the new buildings are being constructed. The site selected is in the west part of the city, near the terminus of Seymour-st., and was purchased of the Hon. E. W. Leavenworth, Secretary of State, for $8,500, which was at a very low rate. It comprises 17½ acres of a very fine land, is eligibly situated in all respects, and contains five or six acres of woods, with several hundred fruit trees. The location is sightly and airy, commanding a fine view of the city and many miles of the adjacent country. The main building is to be 155 feet front, 70 feet deep and four stories high, with accommodations for 150 pupils; and although it is handsome, well-planned, and provided with approved modes of heating and ventilation, it will not cost the State, when finished and furnished, more than $60,000, probably less. The citizens of Syracuse contributed $7,500 to the purchase of the land. The advantages of Syracuse in its central location, and the fact that it contained no State institution, with its subscription, contributed to the removal. Meanwhile, the Asylum near Albany continues in successful operation, owing mainly to the remarkable qualifications and unremitting services of Dr. Wilbur. As soon as there is a demand for another Asylum, it is intended to establish it in a different part of the State, since it is believed that not more than 150 persons can be well attended to in one school.

In Pennsylvania, during the session of the Legislature in 1853, several friends of the cause repaired to Harrisburg to obtain an act of incorporation, under which a Board could be organized for the purpose of establishing an Institution upon a basis so broad as ultimately to result in a provision for the education of all children of imbecile minds of whatever degree or condition in life. A second object was to ask from the Legislature a special and permanent appropriation for this purpose. A bill was finally passed on April 7, 1853, which provided that $10,000 should be paid by the State when $10,000 should be raised by private subscriptions; and a second amount of $10,000, when $10,000 of additional private subscriptions had been raised. Some $3,000 were obtained by private liberality, and it was determined to commence a school. Mr. James B. Richards, formerly of the Massachusetts school, was selected as Principal, and entered on his duties on July 1, 1853. The shcool was soon opened in Germantown, and fourteen pupils were received during the year. "Out of these fourteen, at the time they entered the school, two could not walk, two could not feed themselves, ten were filthy in their habits, nine could do but little toward dressing themselves, four were either absolutely or in effect dumb, two had the power to articulate a few words, eleven had no knowledge of letters, and one was entirely blind." Even during this short time (less than six months) the results from training these children were most gratifying; "all having gained sufficiently to warrant their continuance in the school." The principal was assisted by one female teacher. The school was commended to the Legislature of 1854 by Gov. Bigler, and during the session an appropriation of $20,000 was made for its assistance. The number of pupils has been increased to nearly twenty, and as many more are waiting for admission.

In Illinois, idiots are received into the Hospital for the Insane, until otherwise provided for. In Ohio and Tennessee, the subject of Idiot Asylums has been presented to the Legislature for two or three years, but without eliciting any decided action. In Virginia, Dr. Galt, of the Lunatic Asylum at Williamsburg, has, in several of annual reports, proposed the foundation of an asylum for the idiots of that State. In Kentucky, according to the State Auditor's report for 1852, there were then 513 idiots in the various counties supported by appropriations from the Treasury, at an expense of $21,913 28; and the Trustees of the State Institution for the deaf and dumb in their last report urge the Legislature to establish an asylum. At that institution, since its opening, there have been admitted seven mutes who proved to be more or less idiotic, four of whom have been trained and greatly improved. One of these, supported by the State of Louisiana, has lately been removed to the State Asylum at Baton Rouge.

We are not aware that steps have been taken in any other States for the relief of this class of persons, but have good hopes that in due time they will be properly provided for in each of the States by special institutions for their training and education.

Buffaloes by the Acre.—A member of Gov. Stephens's Northern Route Exploring party, in a long communication to *The St. Louis Republican*, written from the head of Yellow Stone River, speaks of the incidents of the party thus far: On Sunday, after a march of 10 miles, the buffaloes were reached. They were estimated by some as high as 500,000—200,000 is considered as a very low estimate. Drawing up the train at our usual halt at noon, a large herd were about half a mile ahead. The hunters, six in number, were immediately dispatched, well mounted on spare horses, reserved for that especial purpose, and the whole train had an opportunity to witness a buffalo hunt. The hunters dashed in among the herd, picked out the fattest of the crowd, and then separating the selected ones from the herd, soon dispatched them. In an hour the wagons were sent but a small distance from the route to receive the choicest pieces of buffalo. In the next two days' march the hunters were kept some distance ahead to keep off the buffaloes; it was the only way the safe passage of the train could be insured through the sea of flesh. The pack-mules and spare animals following on the train being too numerous to be separately led, were hard to control; and despite every precaution and care one horse and four mules were lost—they getting mingled with the herd.

Adventure in a Tunnel.

A frightful accident, which occurred a few weeks since to some of the workmen employed in the Halshaw Moor Tunnel, on the Lancashire and Yorkshire Railway, reminds us of an adventure in a tunnel, as related to us not long ago by a person in the employment of the Telegraph Company. He had been engaged in the inspection and repair of the telegraph wires, and their fixings, which are subject to many accidents, and require constant looking after to ensure their integrity and efficiency. Even when carried through tunnels, in gutta percha casings, embedded in leaden tubes, they are liable to accidents—from passing wagons, or in winter, from lumps of ice falling down the sides of the shafts, and damaging the tubes. It appears that one day the door of a coal wagon had got loose in the long tunnel of the —— railway, and dashing back against the sides of the tunnel, had torn the tubes, and even cut across the wires in many places. The telegraph was, therefore, broken; it could not be worked, and several workmen were sent into the tunnel to execute the necessary repairs. The person who related the following adventure, acted in the capacity of inspector, and it was necessary for him to visit the workmen, ascertain the nature of the damage that had been done, and give directions on the spot, as to the repairs, the necessity for completing which was of the greatest urgency.

"I knew very well," said he, "that the tunnel was of great length—rather more than two miles long—and that the workmen, who had set out in the morning from the station to the tunnel, had entered it by its south end; so I determined to follow them, and overtake them, which I would doubtless be able to do somewhere in the tunnel, where they would be at work. I was accompanied by a little dog, which trotted behind at my feet. After walking about a mile I reached the tunnel entrance, over which frowned the effigy of a grim lion's head, cut in stone.

"There were, as usual, two lines of rails—the up line and the down line, and I determined to walk along the former, that I might see before the approaching lights on any advancing train, which I would take care to avoid by stepping on to the opposite line of rails, at the same time that I should thus avoid being run over by any train coming up behind from the opposite direction, and which I might not see in time to avoid. I had, however, taken the precaution to ascertain that no train was expected to pass along the *up* line over which I was proceeding for about two hours; but I was aware that that could not be depended upon, and therefore I resolved to keep a good look out ahead. Along the opposite *down* line, I knew that a passenger-train was shortly to pass; indeed, it was even now due—but by keeping the opposite line of rails, I felt I was safe so far as that was concerned.

"I had never been in a tunnel of such a length as this before, and confess I felt somewhat dismayed when the light which accompanied me so far into the tunnel entrance, began to grow fainter and fainter. After walking a short distance, I proceeded on in almost total darkness. Behind me there was the distant light streaming in at the tunnel mouth; before me almost impenetrable darkness. But, by walking on in a straight line, I knew that I could not miss my way, and the rails between which I walked, and which I occasionally touched with my feet, served to keep me in the road. In a short time I was able to discern a seeming spot of light, which gradually swelled into a broader gleam, though still at a great distance before me, and I knew it to be the opening of the nearest shaft—it was a mere glimmer amid the thick and almost palpable darkness which enveloped me. As I walked on, I heard my little dog panting at my heels, and the sound of my tread re-echoed from the vaulted roof of the tunnel. Save these sounds, perfect silence reigned. When I stood still to listen, I heard distinctly the loud beating of my heart.

"A startling thought suddenly occurred to me! What if a goods train should suddenly shoot through the tunnel, along the line on which I was proceeding, while the passenger train, now due, came on in the opposite direction? I had not thought of this before. And yet I was aware that the number of casual trains on a well frequented railway, is very considerable at particular seasons. Should I turn back? reach the mouth of the tunnel again, and wait until the passenger train had passed, when I could then follow along the *down* line of rails—knowing that no other train was likely to follow it for at least a full quarter of an hour?

"But the shaft, down which the light now faintly streamed, was nearer to me than the mouth of the tunnel, and I resolved therefore, to make for that point, where there was, I knew, ample room outside of both lines of rail, to enable me to stand in safety until the down train had passed. So I strode on. But a low, hollow murmur, as if of remote thunder, and then a distant scream, which seemed to reverberate along the tunnel, fell upon my ears—doubtless the passenger train which I had been expecting, entering the tunnel mouth. But looking ahead at the same time, I discerned through the gleam of daylight, at the bottom of the shaft toward which I was approaching, which seemed a spark of fire. It moved—could it be one of the laborers of whom I was in search?—it increased! For an instant I lost it. Again! This time it looked brighter. A moaning, tinkling noise crept along the floor of the vault. I stood still with fear, for the noise of the train behind me was rapidly increasing; and turning for an instant in that direction, I observed that it was full in sight. I could no longer disguise from myself that I stood full in the way of another train, advancing from the opposite direction. The light before me was the engine lamp; it was now brilliant as a glowing star—and the roar of the wheels of the train was now fully heard amidst the gloom. It came on with a velocity which seemed to me terrific.

"A thousand thoughts coursed through my brain on the instant. I was in the way of the monster, and the next moment might be crushed into bleeding fragments. I saw the gleaming face of the driver, and the glow of the furnace flashing its lurid light far along the lower edge of the dense volumes of steam blown from the engine-chimney. In an instant I prostrated myself on my face, and lay there without the power of breathing, as I felt the engine and train thundering over me. The low-hung ash box swept across my back; I felt the heat of the furnace as it flashed over me, and a glowing cinder was dropped near my hand. But I durst not move. I felt as if the train was crashing over me. The earth vibrated and shook, and the roar of the wagon-wheels smote into my ears with a thunder that made me fear their drums would crack. I clutched the earth, and would have cowered and shrunk into it if I could. There was not a fibre of my body that did not feel the horrors of the moment, and the dreadfulness of the situation!

"But it passed. With a swoop and a roar the break-van, the last in the train, flew over me. The noise of the train was still in my ears, and the awful terror of the situation lay still heavy on me. When I raised my head and looked behind, the red light at the tail of the train was already far in the distance. As for the meeting passenger train, it had also passed, but I had not heeded it, though it had doubtless added to the terrific noise which for some time stunned me.

"I rose up, and walked on, calling upon my dog. But no answer—not so much as a whine. I remembered its sudden howl. It must have been crushed under the wheels of some part of the train. It was no use searching for my companion, so I proceeded—anxious to escape from the perils of my situation. I shortly reached the shaft, which I had before observed. There was ample room at either side of the rails, to enable me to rest there in safety. But the place was cold and damp, and streams of water trickled down the sides of the shaft. I resolved, therefore, to go on, upon the *down* line, but the tunnel being now almost filled with the smoke and steam of the two engines which had just passed, I deemed it prudent to wait for a short time, until the road had become more cleared, in case of any other train encountering me in my further progress. The smoke slowly eddied up the shaft, and the steam gradually condensed, until I considered the road sufficiently clear to enable me to proceed in comparative safety. I once more, therefore, plunged into the darkness.

"I walked on for nearly half an hour, groping my way; my head had become confused, and my limbs trembled under me. I passed two other shafts, but the light which they admitted was so slight, that they scarcely seemed to do more than make the 'darkness visible.' I now supposed that I must have walked nearly the whole length of the tunnel; and yet it appeared afterwards that I was only about half-way through it. It looked like a long day since I had entered. But by and by a faint glimmer of lights danced before my eyes; and as I advanced I saw it was the torches of the workmen, and soon I heard their voices. Never were sight and sound more welcome. In a few minutes more I had joined the party. But I felt quite unmanned for the moment; and I believe that, sitting down on one of the workmen's tool-boxes, I put my hands over my eyes, and—I really could not help it—burst into tears.

"I never ventured into a tunnel again without an involuntary thrill of terror coming over me."

The accident which occurred to the workman in the Halshaw Moor Tunnel, was of a similar nature to that above recited. The men employed were platelayers, engaged in the repair of the permanent way. In long tunnels there are men belonging to some gangs, who are almost constantly employed there, and who see little of daylight except from what passes down the shafts. Sometimes, when busy at their work, and their ears are deafened by the noise made by the hammers, picks and spades of the gang engaged in driving in a spike, or tightening a key, or packing the ballast under a sleeper, a train suddenly comes upon them; and if close at hand, the men sometimes are only able to escape by throwing themselves flat upon their face, and letting the train pass over them. The two men in the Halshaw tunnel were engaged at their work when two trains entered at the same time, one from each direction. One of the men threw himself down by the side of the tunnel, and called upon his fellow workman to do the same. But it had been too late. The trains had come upon the unfortunate workman with such velocity that he had not even time to prostrate himself, or perhaps his self-possession was for the moment suspended by the sight of the two trains shooting towards him from opposite directions; and when search was made, after the trains had passed through the tunnel, it was found that one of the trains had run over the poor workman, and cut him into pieces. [Eliza Cook's Journal.

Vicissitudes of a Woman's Life.

From the *Anzeiger des Westens*, *The Tribune* translates the following touching, narrative, the facts of which are doubtless not alone in their painful sadness, among the experiences and sufferings of European emigrants to this country:—

"A few days since, at St. Louis, at an early hour in the morning, the common dead-wagon, which at the cost of the city conveys friendless paupers to their last home, stopped before a house in the southern part of the town. The driver got down, went into the house, and soon afterward appeared at the door, along with another indifferent looking man, carrying a coffin of rough boards. The coffin was put into the wagon, and the wheels rattled away over the empty streets to the place of interment. No one followed it with looks of sorrow; no one stood with heavy heart beside the grave, as the clods fell upon the coffin. And yet that coffin hid the form of a woman once the object of countless attentions, who was once honored, admired, envied in society, who controlled vast riches, and who but a few years since, before she trod the shores of America, could look forward to a happy and contented old age.

"The deceased was Rosa Neschemi, the daughter of an immensely rich Polish nobleman. In her early youth she was attached to the Court of the Austrian Emperor, where, at the age of 18, she married a French nobleman, who was also very rich. She lived afterward, for long and happy years, partly on the estates of her husband, partly in journeys through Germany, Spain, Italy, and England, and bore her husband three sons, who received the best education, and on whom their parents looked with the greatest pride.

"This happiness was interrupted by the July Revolution at Paris. Rosa's husband was actively engaged in it, and fell on July 28, shot through by three bullets. His name may still be read on the column in the Place de la Bastille. Of the sons, the oldest, a young man of remarkable talents, had greatly succeeded in Spain, and was at that time Private Secretary to King Ferdinand. After the death of the King, he withdrew to a country-house near Valencia, where, as is supposed, he was assassinated. The second son, who had become a priest, was a special favorite of Pope Gregory; but he, too, died shortly after this event. The third, who was then quite young, remained with the mother, who had found an asylum in Switzerland, whither she brought the relics of her fortune. When he was 16 he left his mother and went to America. In New Orleans he found employment and earned money, but bad company and a natural disposition to excess soon led him astray, and about five years ago he resorted to the last desperate means of reviving his credit, by inducing his gray-haired mother to come to this country. She could not resist the entreaties of her only son, and came. She was able to get together $6,000 in cash, which her son very soon dissipated. Some two years ago he ended his career in New Orleans, where he was a deputy sheriff at the time, by stabbing a creole. He fled to California, and the aged mother, to whom New Orleans had naturally become hateful, went up the river to St. Louis.

"One morning of week before last, at early dawn, the miserable city dead-cart of St. Louis bore the mortal remains of Rosa Neschemi to the place of their last unwept repose. Such is life."

Coal Against Sinews.—Professor Henry, President of the Mechanics' Institute at Washington says: "It has been proved that, on an average, four ounces of coal are sufficient to draw on a railroad one ton a mile. It has also been found, on experiment, that a man working on a tread-mill continually for eight hours, will elevate one and one half millions of pounds one foot high. Now, Cornish engines will perform the same work by the expenditure of a pound and a half of coal. It follows from these data that about five tons of coal would evolve as much power during its combustion as would be equal to the continued labor of an able-bodied man for twenty years, at the rate of eight hours per day, or, in other words, to the average power of a man during the active period of life."

Gold in Oregon.—The Portland *Times* has letters from Port Orford, one of which, written June 29, says: Yesterday an exploring party returned, confirming all the rumors that had previously reached us. The mines are indeed rich and extensive. The gold that I have seen is quite coarse, in lumps of from twenty-five cents to twelve dollars. Six miles have already been prospected, and there seems but little difference in the richness of the diggings. I am assured by experienced California, miners that the ground already prospected will give profitable employment to at least 2,000 men. There are only about fifty there at this time. Those now at work are making from $75 to $300 per day to the man.

Camphor Producing Insanity.—The *Toronto Colonist* says:—"We are informed that no less than eight persons have been admitted into the Lunatic Asylum in a state of insanity, occasioned by consuming quantities of camphor to prevent cholera. Some of them carried it about in their pockets, and kept from time to time eating small quantities of it. Others took it dissolved in brandy. In all cases where it was taken in any quantity it produced insanity. It is a fact well known that a comparatively small quantity of camphor will set a dog mad, and that he will soon afterward die."

VARIETY.

It has been suggested, that the plan used to arrest conflagrations in the pine forests near Bayonna, France, might be advantageously applied in this country at present. It is simply to build another fire at a sufficient distance from the first; the consequence is that a current of air rises between the two flames and the wind is made to blow from both sides toward the center;—thus the two fires rush toward each other, and cease to spread outward. By this means, only the woods between are destroyed.

Women never appeared upon the stage among the ancients. Their parts were represented by men until as late as 1662, when Charles II. first encouraged the appearance of women before the public.

Armorial bearings became hereditary in families at the close of the 12th century; they took their rise from the knights painting there banners with different figures, and were introduced by the Crusaders.

Stones were first used for bullets; iron ones are first mentioned in 1550. Leaden ones were made before the close of the 16th century. Stone cannon balls are still used in the East.

The most stupendous canal in the world is one in China, which passes over two thousand miles, and to 41 cities; it was commenced in the 10th century. A monster work of man.

The first banks were established in Italy in the year 808, by the Lombard Jews, of whom some settled in Lombard street, London, where many bankers have ever since resided.

Sir Isaac Newton discovered the principles of the reflecting telescope, the laws of gravitation, and the planetary system *at the age of twenty-five.*

Chocolate, the flour of the cocoa nut, was first introduced into England from Mexico, in the year of 1520, and soon became a favorite beverage in London coffee-houses.

Some colors are dyed with arsenic. Thus the beautiful light sea green on cotton, is dyed with arsenic, sulphate of copper, and caustic alkali. The yarn of this color is poisonous.

The first piece of artillery was invented by a German, soon after the invention of gunpowder, and artillery was first used by the Moors at Algesiras, in Spain, in the siege of 1341.

Billiards were invented by Henrique Devigne, a French artist, in the reign of Charles IX., about the year 1571.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

Norwich Line to Boston,

WORCESTER, Lowell, Fitchburg, Nashua, Concord, Bellows Falls, &c. Via Norwich and Worcester, Worcester and Nashua, Boston and Worcester New London and Willimantic, and Palmer Railroads.

Passengers by this Line leave pier No. 18 North River, foot of Cortlandt-st., every day, at 5 o'clock, P.M., (Sundays excepted.)

Steamer CONNECTICUT, Capt. J. W. Williams will leave New York every Tuesday, Thursday, and Saturday.

Steamer WORCESTER, Capt. Wm. Wilcox, will leave New York every Monday, Wednesday, and Friday.

Passengers by this Line arrive in time to take the early trains out of Boston.

Passengers taken at the lowest for New London, Norwich, Willimantic, Stafford, Munson, Palmer, Worcester, Boston, Fitchburg, Lowell, Lawrence, Nashua, Concord, Bellows Falls, and other places in Northern New Hampshire and Vermont.

For further information inquire of E. S. Martin, at the office, pier No. 18 N. R., foot of Cortlandt-st.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N.Y.

Ayer's Cherry Pectoral,

For the rapid Cure of Coughs, Colds, Hoarseness, Bronchitis, Whooping-Cough, Croup, Asthma, and Consumption.

AMONG the numerous discoveries Science has made in this generation to facilitate the business of life—increase its enjoyment, and even prolong the term of human existence, none can be named of more real value to mankind than this contribution of Chemistry to the Healing Art. A vast trial of its virtues throughout this broad country, has proved, beyond a doubt, that no medicine or combinations of medicines yet known, can so surely control and cure the numerous varieties of pulmonary disease which have hitherto swept from our midst thousands and thousands every year. Indeed, there is now abundant reason to believe a remedy has at length been found which can be relied on, to cure the most dangerous affections of the lungs. Our space here will not permit us to publish any proportion of the cures effected by its use, but we would present the following, and refer further inquiry to my American Almanac, which the agent below named will always be pleased to furnish free, wherein are full particulars, and indisputable proof of these statements.

Office of Transportation, Laurens R. R., S. C.,
Aug. 4, 1853.

J. C. Ayer, Dear Sir,—My little son, four years old, has just recovered from a severe attack of malignant Scarlet Fever. His throat was rotten, and every person that visited him pronounced him a dead child. Having used your Cherry Pectoral in California, in the winter of 1850, for a severe attack of Bronchitis, with entire success, I was induced to try it on my little boy I gave him a tea-spoon full every three hours, commencing in the morning, and by ten o'clock at night I found a decided change for the better, and after three days use he was able to eat or drink without pain.

Its use in the above-named disease will save many a child from a premature grave, and relieve the anxiety of many a fond parent. For all affections of the Throat and Lungs, I believe it the best medicine extant. A feeling of the deepest gratitude prompts me in addressing you these lines—but for your important discovery, my little boy would now have been in another world. I am yours, with great respect,
J. D. POWELL, Supt. Trans., L. R. R.

Rock Hill, (Somerset Co.,) N. J., July 21, 1852.

Dr. J. C. Ayer,—Since your medicine has become known here, it has a greater demand than any other cough remedy we have ever sold. It is spoken of in terms of unmeasured praise by those who have used it, and I know of some cases where the best they can say of it is not too much for the good it has done. I take pleasure in selling it, because I know that I am giving my customers the worth of their money, and I feel gratified in seeing the benefit it confers.

Please send me a further supply, and believe me
Yours, with respect, JOHN C. WHITLOCK
Windsor, C. W., June 26, 1852.

J. C. Ayer, Sir,—This may certify that I have used your Cherry Pectoral for upwards of one year; and it is my sincere belief that I should have been in my grave ere this time if I had not. It has cured me of a dangerous affection of the lungs, and I do not overstate my convictions when I tell you it is a priceless remedy. Yours very respectfully,
D. A. McCULLIN, Attorney at Law.
Wilkesbarre, Pa., Sept. 28, 1850.

Dr. J. C. Ayer, My dear Sir,—Your medicine is much approved by those who have used it here, and its composition is such as to insure and maintain its reputation. I invariably recommend it for pulmonary affections, as do many of our principal physicians.
I am your friend, CHAS. STREATER, M. D.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere. 37-3

The Sabbath Recorder.

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society,

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

GEOLOGY AND THE BIBLE.

The connection between *science* and *religion* has ever been a subject of deep interest to enlightened and reflecting minds. Too often, however, have the votaries of each, by narrowing their observations down to the details of their own favorite theme, engendered jealousies and antagonisms, alike injurious to both science and religion. The theologian, on the one hand, seizing on some half-digested theory in science, has fancied that he discovered something in it at variance with the teachings of religion, and forthwith has instituted a crusade against science. On the other hand, the superficial philosopher, ignorant alike of the true teachings of both *religion* and *science*, has accepted the issue, and henceforth science and religion must be reckoned opposing citadels, frowning defiance upon each other. Both these opinions are erroneous, and, like all error, have been most disastrous to the progress of truth

Nothing is clearer, than that the *word* and *works* of God do not contradict each other, since they are alike revelations from Him, designed to display his true character and attributes to the same intelligent being. *Scientific* truth is *religious* truth, and will so appear, when the teachings of both science and the Bible are rightly understood, and correctly interpreted. The one enunciates the laws which govern the physical world, and the other those which relate to the moral world, and both appeal to the common intelligence of man, and both point him to Him who created both matter and mind, and whose sovereign right it is to reign in the realms of both. Until God can be at war with himself, these two revelations cannot war with each other. Ignorant pretenders to scientific and biblical erudition may fight valiantly, and the spectators may become so interested in the scene, that they will identify the theories at variance with the combatants; and hence, if the biblical champion fall, pierced with many wounds, lo! the Bible is a fable; or, if the scientific hero shall bite the earth, then behold the "vague surmises"—the "*humbugs*" of science!

Science has its appropriate sphere of action, and so has religion; and although these spheres may not be identical, so far as their immediate development is concerned, yet so far from being at variance with one another, they are mutual helps, and each becomes an important medium of interpretation for the other. It may not be the specific function of revelation to teach the abstract principles of science, but we offer no offense to its dignity, when we pour the treasures of science into its lap, and humbly ask it to accept the offering. It may not be the specific function of science to teach Christ and him crucified, but we offer no violence when we ask the heavens to declare the glory of God, and the firmament to show his handy work.

It has been *falsely* asserted, that scientific research tends to skepticism and infidelity, perchance because some philosophers have been skeptics; but they were skeptics in spite of science, and not by virtue of it. It has been truly said, that "an undevout astronomer is mad," and it may with equal truth be said, that an undevout geologist, or chemist, or physiologist, is mad, and for the same reason, viz., that in the study of these sciences the handy-work of an intelligent and benevolent God is constantly developed. On the other hand, we have no lack of evidence that the unscientific theologian is mad. His vague theories, and stupid interpretations of Holy Writ, are the witnesses of his insanity. That man who essays to be a philosopher, and yet rejects the declarations of revelation, that God is the maker of all things, and that he enacted the laws of nature, will no more surely wreck his craft on the rocks of infidelity, than he who shall essay to be a theologian, and yet shall fabricate all his interpretations of the Bible in total disregard of the light which nature may throw upon it.

That there will arise occasional *apparent discrepancies* between science and revelation, may be affirmed, a priori; but they will always be only *apparent*, and will arise from a misinterpretation of either *science* or *revelation*. To the learner of nature, she does not always yield up her hidden treasures of truth at the first bidding. She appears to his partially unsealed eyes "as trees walking." Thus all sciences are progressive—not because the laws of nature are progressive, or changeable, but because man's knowledge is finite. Now, suppose a student of nature should enunciate his theories or interpretations of nature, in entire ignorance of the teachings of revelation, and then should stupidly adhere to them, in spite of the light which revelation affords, when fairly presented, and should declare the Bible opposed to nature; who would trust such a man's sanity? He doggedly puts his *interpretation* of nature for nature herself, and then boldly pronounces the Bible a fable. When it is remembered, that the *interpretation* which he has put in loco naturæ was made in the absence of the most essential data, viz., *revelation*, the proof of his madness amounts to demonstration.

Not less of insanity does the theological student manifest, who shall shut the book of nature, and in the absence of all the light it might afford, shall put forth his interpretations of the Bible, and stupidly claim for them infallibility, and when nature shall yield up her treasure of light, and show his interpretation to be false, he shall charge the naturalist with infidelity, and henceforth denounce the votaries of science as innovators upon the truths of revelation, whereas they only innovate his *false* and *senseless interpretation*. Who is the "infidel"—who the "Judas"—now?

The class of theologians just referred to has had its representatives in all ages since science has appeared as the handmaid of religion. If skeptical philosophers have done *much* to bring the word of God into disrepute, prejudiced theologians have done *more*.

Until the time of Copernicus, it was deemed an established fact, that the earth was fixed immovably in the centre of the universe, and that the heavenly bodies made daily revolutions around it. To sustain this, the most decided scripture language could be quoted. What bold impiety then it seemed, for one to rise up and claim that this scripture testimony must be set aside—that science had found out a better way. Why, the very senses confirmed it—for man *felt* the earth to stand firm and immovable under him—and he *saw* the sun, moon, and stars, move on their course. What though the astronomer stood ready with his diagrams to demonstrate the motion of the earth; who could calmly investigate the claims of a science which repudiated the plain declarations of the Bible, and the evidence of the senses, and contradicted the opinions of the wise and good through all past centuries? Then came forth the champions of the Bible, and poured out their vials of wrath on the heads of the poor innovators of time-sanctioned errors. Francis Turretin, a distinguished professor of theology, undertook to refute the "*heresy*" with the following argument, which he supposed would stand unrefuted as long as the Bible should exist. He affirms, that the sun and moon move around the earth, because, "first, the sun is said in scripture to move in the heavens, and to rise and set, (Ps. 19: 5, and 104: 19, Eccl. 1: 5;) secondly, the sun by a miracle stood still in the time of Joshua; thirdly, the earth is said to be fixed immovably (Ps. 93: 1;) fourthly, neither could birds which fly off through an hour's circuit, return to their nests again." When it was replied to this argument, that the scriptures describe natural phenomena in language adapted to *common observation*, and not in accordance with strict scientific truth, the learned theologian replied, that "the spirit of God best understood natural things, and meant these things should be used, not abused, and that he is not the author of error, nor to be corrected by our blind reason." It is not strange, that such a powerful argument should have compelled the venerable Galileo to recant his astronomical heresy on his knees. Theologians refused the light of science access to their long-standing interpretations of the Bible, and denounced as heretics those who claimed to interpret the Bible by the light of science. They have had their reward. Nobody (except Deacon Homespun) now believes their interpretations, while Copernicus and Galileo are hailed as the apostles of a better dispensation.

Some men seem not to profit much by *experience* or *history*. This same farce is being reënacted in the present day, in connection with the developments of geology.

Within the past few years, geology has been the subject of much severe animadversion. Men of respectable ability have become impressed with the belief that geologists are advancing views hostile to the Bible, and have set themselves to examine their writings, not so much with a view to become masters of the science, as to find untenable positions and contradictions; and of these, it is confessed, enough can be found—chargeable, however, not to the science, nor to geologists in general, as these scribblers seem to suppose. There will be quack geologists as well as quack doctors, for which the science is not responsible. These writings generally abound in striking misapprehensions of facts and opinions, too clearly indicating ignorance of the true state of the question, and of the facts and inductions of the science. They also abound in dogmatic assertions, and severe insinuations, and in the substitution of wild and extravagant hypotheses for geological theories. English literature is prolific of such writings; among which may be reckoned an article in the *Sabbath Recorder*, of August 31st, entitled "*Stultifying the Scriptures.*" We have seldom seen an article of so many words, which contained so few arguments. If the writer had dealt more in facts and arguments, and less in exclamations and interrogations and misrepresentations, he would have contributed more largely to enlighten the public mind, and give practical effect to his good intentions. It cannot be that the learned writer has *intentionally* misrepresented the state of this question; but that he has most grossly misconceived the facts in the case, every intelligent reader knows. The "mirable dictu!" mode of reasoning, which he has been pleased to adopt, may suit the purpose of superficial thinkers, and it is only this class of thinkers who will be likely to be deceived by it.

The writer seems to have met with some three different propositions, for all of which he makes geology and geologists responsible, and in doing so, commits a blunder not very creditable to a man of science. These three propositions are—

1st. The Mosaic account of creation does not fix the antiquity of the globe.

2d. The six days spoken of in the Mosaic account were not days of twenty-fours each, but periods of vast duration.

3d. That the creation described in the Mosaic account related to only a limited extent of the earth's surface.

The first of these propositions is adopted by all *intelligent* geologists, but the second and third have never been adopted by geologists in general, and some of the most distinguished, who at first adopted them, have abandoned them, and almost any popular work on geology will furnish a more satisfactory refutation of them than the writer's "mirable dictu" ejaculations afford.

The writer, with similar unfairness, seems to hold geology responsible for a sentiment expressed by Hugh Miller, to the effect that, in the perfect development of man, the Creator and created will meet in a glorious unity. Now, for whatever of "pantheism" this sentiment may contain, Hugh Miller alone is responsible, and because *he* has promulgated it, geology is not therefore responsible for it. With equal fairness might one ignorant of the practical tendencies of medical science, and of the established principles of the profession, cry out, "Pantheism in its worst form; Lord deliver us from such blind guides, such blind guides," because a certain M. D. of some notoriety has promulgated the following sentiment: "I believe that God is the soul of the universe, as a whole, and in all its parts. I believe that there is no portion of the universe, however minute, that has not some portion of the Divine Spirit." O mirable dictu! what presumption and infidelity the science of medicine engenders! Lord, save us from such blind guides!

But the depth of medical iniquity is not yet fathomed. Hear an M. D. condemn the most glorious manifestation of Bible benevolence, as a morbid, abnormal state of mind: "Benevolence is liable to disease, manifested in misplaced, ill timed, and inappropriate philanthropies. It is morbid in its acts and manifestations. Distributing tracts at the Five Points, where people are in want of the common decencies and necessaries of life, and sending missionaries to be eaten by South Sea cannibals, are among the curious symptoms of this affection—justice and common sense are antidotes." Alas, how the *medical profession* "stultifies the scriptures."

The first proposition, that the Mosaic account does not fix the date of creation, is adopted by every geologist who can lay claim to common intelligence and honesty. This proposition can be demonstrated by proof as conclusive as that which shows the earth's revolution on its axis and its orbits. The cry of "heresy," "stultifying the scriptures," &c., by modern Turretins, will not be likely to frighten our Galileos into confessions of heresy, for promulgating a truth so obvious, that the proofs of it meet us at every step. The human mind is too far disenthralled from the meshes of antiquated folly, not to perceive, that this proposition does not so much stultify the scriptures, as its denial stultifies the common sense and intelligence of mankind.

After reading the terrible anathemas which our writer pours forth upon the head of Dr. Chalmers, and others, for declaring that the Mosaic account does not fix the antiquity of the globe, the reader has right to expect that the "heresy" of the learned divine should be clearly shown at the tribunal of candid and impartial reason; for the time of burning heretics on *mock trials*, is supposed to be passed. But hear the learned *argument*. After quoting Hugh Miller's statement of Dr. Chalmers' view, the writer cries out, "Clear as mud, certainly! What child's play, for a man professing faith on the word of God! It is absolutely, to all intents and purposes, denying the Written Word; and is only equalled by the defection of Peter, if not that of Judas! When man leaves the fountain of truth, and dabbles in the filth at the bottom of broken bedaubs his first love; and no one more emphatically than the professed friend of revelation, tampering with geological assumptions, and attempting to reconcile the puny, clumsy deformities of man's vague speculations with the imperishable monuments of creative power. **** How unremittingly poor worms of the dust strive to dethrone the Almighty, to inflate themselves, and assume some short-lived importance; and how sad the end of their vain philosophy—their unfortunate attempt to be wise above the Written Word!" Such a discharge of words and baseless assumptions, may for a time submerge the clearest declarations of science, but it will scarcely stand in loca rationis, with men who can distinguish between words and *arguments*.

To the writer of the article under consideration, Dr. Chalmers' view, as set forth by Hugh Miller, does not seem to be "as clear as mud" even, for in his clumsy attempt to paraphrase it, he has built a man of straw, and discharged his ejaculations at it most valiantly. Hear his paraphrase: "God, in the first act of the first day, create the matter of the heavens and earth, yet periods of vast duration may have intervened!" Now for the annihilating discharge: "Was ever such a ridiculous piece of clap-trap imposed on the credulity of man, by any vagabond juggler, to hoodwink his audience to one of his tricks of legerdemain?" Now, for all the "clap-trap" the above paraphrase may contain, the writer alone is responsible, since neither Dr. Chalmers nor Hugh Miller has said *anything of the kind*. Hugh Miller makes Dr. Chalmers say, *and truly*, "that between the first *act of creation*, which evoked out of previous nothing the matter of the heavens and earth, and the *first act of the first day's work recorded in Genesis*, periods of vast duration may have intervened." There is no clap-trap in this, no jugglery; but in the writer's paraphrase of this clear and explicit statement, there is an attempt at legerdemain, which would better become a juggler than a man who has studied science two score years. The writer has not attempted to meet this statement by a single argument, or by a single reference to passages of God's word which it contravenes; and yet cries out, "How unremittingly poor worms of the dust strive to dethrone the Almighty!" Now, reader, turn to the Mosaic account of creation, recorded in the first chapter of Genesis, and point out the passage of the Written Word which this statement contradicts. The first and second verses affirm, that "in the beginning God created the heavens and the earth. And the earth was without form and void; and darkness was upon the face of the deep; and the Spirit of God moved upon the face of the waters." In the third verse it is affirmed, that "God said, Let there be light, and there was light." Now the simple question is, whether between "the first act of creation, which evoked out of previous nothing the matter of the heavens and earth," recorded in the first verse, and the act of creating light, recorded in the third verse, there intervened a vast period of time. In the second verse it is said, that "the earth was without form and void, and darkness was upon the face of the deep, and the Spirit of God moved upon the face of the waters." It seems, then, that between the *first* act of creation, which produced the formless and void matter of the earth, and the second act, which produced light, there was a *space of time*, during which the Spirit of God moved upon the face of that powerless mass—for certainly that act could not have been done *out of time*. Time, then, did intervene; and there is no more absurdity in judging, a priori, that that time was a million of years, than that it was one year or one minute. Nor is the account of Moses at all infringed upon by such a judgment, since it is silent on this point. He as much "stultifies the Scriptures" who affirms that that period of time was *short*, as he who affirms that it was *long*; and he who affirms that *no time* intervened, stultifies both the Scriptures and common sense. It was not the purpose of the Bible to solve this question of time, any more than it was to solve the question of the earth's revolution. It left these interesting questions for science, neither affirming nor denying concerning them. Both these questions science has solved. But it has not more clearly demonstrated, that the earth revolves on its axis, than that "the Mosaic account does not fix the antiquity of the earth, and that the act of primeval creation of the matter of the earth dates countless ages anterior to the creation of man, the *great event* of the Mosaic account." To the proof of this another article may be devoted.

D. E. Maxson.

HUGH MILLER ON THE DEATH OF HIS FIRST CHILD.

In the spring of 1839 a sad bereavement darkened my household, and for a time left me little heart to pursue my wonted amusements, literary or scientific. We had been visited, ten months after our marriage, by a little girl, whose presence had added not a little to our happiness. Home became more emphatically such from the presence of the child, that in a few months had learned so well to know its mother, and in a few more to take its stand in the nurse's arms, at an upper window that commanded the street, and to recognize and make signs to its father, as he approached the house. Its few little words, too, had a fascinating interest to our ears—our own names, lisped in a language of its own, every time we approached; and the single Scotch vocable "awa, awa," which it knew how to employ in such plaintive tones as we retired, and that used to come back to us in recollection, like an echo from the grave, when, its brief visit over, it had left us forever, and its fair face and silken hair lay in darkness, amid the clods of the church-yard. In how short a time had it laid hold of our affections! Two brief years before, and we knew it not; and now it seemed as if the void which it left in our hearts the whole world could not fill. We buried it beside the old chapel of St. Regulus, with the deep rich woods all around, save where an opening in front commands the distant land and the blue sea; and where, 'sad-like, the mossy mounds,' and where birds, whose songs its ear had become skillful enough to distinguish, pour their notes over its little grave. The following simple but truthful stanzas, which I found among its mother's papers, seem to have been written in this place—sweetest of burying places—a few weeks after its burial, when a chill and backward spring, that had scowled upon its lingering illness, broke out at once into genial summer:—

Thou'rt "awa, awa," from thy mother's side,
  And "awa, awa," from thy father's knee;
Thou'rt "awa" from our blessing, our care, our caressing,
  But "awa" from our hearts thou'lt never be.

All things, dear child, that were wont to please thee,
  Are around thee here in beauty bright;
There's beauty rare in the cloudless air,
  And the earth is teeming with living delight.

Thour't "awa, awa," from the bursting spring-time,
  Tho' o'er thy head its green boughs wave;
The lambs are leaving their little footprints
  Upon the turf of thy new-made grave.

And art thou "awa," and "awa" forever—
  That little face—that tender frame—
That voice which first in sweetest accents
  Call'd me the mother's thrilling name—

That head of Nature's finest moulding—
  Those eyes, the deep night ether's blue,
Where sensibility its shadows
  Of ever changing meaning threw!

Thy sweetness, patience under suffering,
  All promised us an opening day
Most fair, and told that to subdue thee
  Would need but love's most gentle sway.

Ah me! 'twas here I thought to lead thee,
  And tell thee what are life and death,
And raise thy serious thought's first waking
  To Him who holds our every breath.

And does my selfish heart then grudge thee,
  That angels are thy teachers now—
That glory from thy Saviour's presence
  Kindles the crown upon thy brow?

O, no! to me earth must be lonelier,
  Wanting thy voice, thy hand, thy love;
Yet dost thou dawn a star of promise,
  Mild beacon to the world above.

SILENCE.

We do not think the virtue of silence is sufficiently understood and appreciated. A week rarely passes by, in which we are not called upon to commend the exercise of silence to some party who feels grieved at a false report, a newspaper paragraph, or some scandalous and malicious lie. There are many persons so constituted that they can hardly appreciate the great power of silence. In many cases of detraction and scandalous report, silence is the best policy one can adopt, and however painful and trying its practice may be, the result will be far better than could be realized from any other course. We presume silence is implied in the counsel of the inspired writer, when he advises that "contention be left off before it be meddled with." It has been truly said, that silence is a thing which it is often difficult to keep, in the exact proportion as it is dangerous not to keep it.

Charles Lamb, in his inimitable essay upon "A Quaker Meeting," says:—

"Wouldst thou know what true peace and quiet mean; wouldst thou find a refuge from the noises and clamors of the multitude; wouldst thou enjoy at once solitude and society; wouldst thou possess the depth of thine own spirit in stillness, without being shut out from the consolatory faces of thy species; wouldst thou be alone, and yet accompanied; solitary, and yet not desolate; singular, yet not without some to keep thee in countenance; a unit in aggregate; a simple in composite, come with me into a Quaker meeting. For a man to refrain even from good words, and to hold his peace, it is commendable; but for a multitude, it is great mastery."

Politicians understand the virtue of silence, and many an aspiring man has destroyed his hopes of success by too eager a desire to "define his position." John Adams said that Washington had the most remarkable mouth he had ever seen, for he possessed the remarkable gift of controlling his lips. It has passed into a proverb, that "no man was ever written down, except by *himself*," and it may be affirmed, that few people understand the force or appreciate the value and importance of the mysterious quality of silence. One of David Hume's rules of conduct, which he declares that he inflexibly maintained, and which might be imitated with advantage by some writers of the present day, was *never to reply to anybody*. He adds: "And not being very irascible in my temper, I have easily kept myself clear of all literary squabbles." The sceptical philosopher had not that common but foolish wish to have *the last word*. A modern writer has defined the "last word" to be the most dangerous of infernal machines.

There is a true philosophy in the story told by Horace Smith, of a man that was once overturned in a carriage with his niece, who, finding, after all her screams, that she had received no hurt, asked her uncle how, in such imminent danger, he could have preserved so perfect a silence? "Because," he replied, "I was tolerably sure that death would not be frightened away by making a noise." Equally pertinent was the reply of Socrates, who said, when a great talker applied to him to be taught rhetoric, that he must pay double the usual price, because it would first be necessary to teach him to hold his tongue.

FIRST AMERICAN BAPTIST CHURCHES.

That the Providence was the first Baptist church in this country, is a disputed point. Recent investigations have pretty clearly demonstrated that the First Newport is entitled to that distinction, and we think the evidence is decidedly in favor of its claim. Roger Williams was baptized by Ezekiel Holliman, and then baptized the other constituents. He retained the pastorship not longer than four years, and for probably a shorter period. He was succeeded by Elder Chad Brown, an English Baptist from Massachusetts. His successors, for more than half a century, were English Baptist ministers. Until the succeeding century, no church was constituted from it, nor is there any record of any member baptized by Roger Williams becoming a minister. The first church in Massachusetts was constituted by English Baptists. The first from Rhode Island, not connected with the Providence church. The first Baptist church in Maine was constituted by an English Baptist, who subsequently removed to Charleston, S. C., and became the founder of the first Baptist church in that State. No churches were formed in New Hampshire and Vermont, until one hundred years after the constitution of Providence church. The first church in New York, was founded by a Baptist minister from Connecticut, the pastor of the first Baptist church in that State. In New Jersey and Pennsylvania, the first Baptist churches were formed by ministers and members from Wales, who were some of the earliest settlers of these States. They also constituted the first churches in Delaware, and ministers connected with these Welsh Baptist churches carried the gospel into Maryland and Virginia. In North Carolina, the first churches were founded by English Baptists; in Georgia and Kentucky, by Virginia Baptist ministers; and in Tennessee by North Carolina Baptist ministers. [Richmond Religious Herald.

PROSPERITY AND LIBERALITY.

A London correspondent of the *Western Christian Advocate*, describing an effort to raise a large fund for the extinction of debts on chapels owned by the Wesleyan connection in Great Britain, gives the following remarkable history. The lessons of liberality in it are lessons for all prosperous men:—

"A gentleman named Wilkes has promised a subscription of one thousand guineas to this fund, whose history is so remarkable as to be worth relating across the Atlantic. Seven years ago he was a journeyman mechanic. Having invented and patented some kind of a crank or spindle used in the cotton manufacture, and needing capital to start himself in the business of making them, he made it a matter of earnest prayer, that he might be directed to some one able and willing to assist him. In a singular and unexpected manner he fell in with an elderly Quaker, a perfect stranger, who accosted him with the strange inquiry: 'Friend, I should like to know if a little money would be of any service to thee.' Having satisfied himself as to Wilkes' genius and honesty, the Quaker at once advanced him the required amount. The praying mechanic started in business on his own account, and everything he has touched of late appears to prosper.

"Hearing of a field in Ireland offered for sale, in which was a deserted mine, he went over to see it; bought the field for a small sum, recommenced the mine, and it now turns out to yield abundance of excellent copper. For the year 1852, he promised to give the missionary society a guinea a day; but such abundance has poured in upon him during the year, that he felt that to be below his duty, and has, therefore, enlarged his subscription for the present year seven-fold. He is actually giving to that noble cause seven guineas daily, or upwards of $10,500 a year, during this year, 1853; in addition to which, he has just given one thousand guineas to the fund above referred to.

"Probably neither Australia nor California can furnish an instance of a man rising into vast wealth more rapidly; and certainly we have not heard from either of these countries of anything approaching to this example of Christian liberality. It is pleasant to be able to add, that this remarkable man retains the utmost simplicity, and bids fair, if his life be spared, to occupy an eminent position, not only among the millionaires of this country, but among the ornaments of the Church of Christ."

THE BLESSINGS OF OLD AGE.

The venerable Josiah Quincy, Senior, ex-President of Harvard University, having been toasted at the alumni dinner, made an excellent speech, from which the following is an extract:—

"On every occasion, whether in public or private, an old man was sure to be reminded of his years. Why was this? Old age did not simply consist in length of days; for, as the President had quoted—

Wisdom is gray hairs in man,
And an unspotted life is old age.

If it arose from sympathy, there was no ground for it; the sympathy was absolutely thrown away. So far as his experience reached, old age was the happiest period of life. And why not? Had we not then got rid of the nonsense of love, the folly of ambition, the grumbling of envy, the delusions of hope? He repeated, that old age was the happiest portion of life, provided that in youth and manhood the individual is obedient to the laws of nature regulating health and strength, and leads a life of respectability and usefulness. In order to be happy and long-lived, it was important that there should be a harmony between the beginning, the middle, and the end of life, and especially between the beginning and the end. The young man should cultivate and foster the qualities which he sees to be respectable and esteemed in the old; and the old man, on the other hand, should retain and seek to perpetuate, the feelings and vivacity of youth."

The ex-President closed with this sentiment:—

"The hoary hairs with which wisdom crowns the young, and the unspotted life which is the crown of man at every period of his existence."

MUSIC AT HOME.

Music serves to make home pleasant, by engaging many of its inmates in a delightful recreation, and thus dispelling the sourness and gloom which frequently arise from petty disputes, from mortified vanity, from discontent and envy. It prevents for the time, at least, evil thoughts and evil speaking, and tends to relieve the minds of both performers and hearers from the depressing effects of care and melancholy. Young people need and will have amusements. If an innocent and improving kind be not provided at home, they will seek elsewhere. If they find [illegible] will be deserted; and thus the gentle and holy influences which ought to encircle the family fireside, will be in a great measure lost.

"For surely, melody from heaven was sent,
  To cheer the heart, when tired with human strife;
To soothe the wayward heart, by sorrow rent,
  And soften down the rugged road of life."

Let parents, therefore, take pains to encourage and gratify a taste for music in their children, and it will amply repay them for so doing.

OLD AGE.

There is a quiet repose and steadiness about the happiness of age, if the life has been well spent. Its feebleness is not painful. The nervous system has lost its acuteness. Even in maturer years, we feel that a burn, a scald, a cut, is more tolerable than it was in the sensitive period of youth. The fear of approaching death, which in youth we think must cause inquietude to the aged, is very seldom the source of much uneasiness. We never like to hear the old regretting the loss of their youth. It is a sign that they are not living their life aright. There are duties and pleasures for every age, and the wise will follow them. They will neither regret the loss of youth, nor affect to be younger than they are. When men, they will not dress like boys nor compete with them. When matrons, or matron-like maids, they will not dress like girls. When young women, they will not be childish, and play piping tones, by way of enchantment. To be happy, we must be true to nature, and carry our age along with us.

RECORDING OFFENSES.

A few weeks ago, writes a missionary to the *Journal of Missions*, a very intelligent and interesting young Persian, a graduate of the king's college at Teheran, was sent by the government to Oroomiah, to visit our seminaries—as we suppose, to obtain hints for making improvements in the royal university. After hearing the classes in the female seminary recite their lessons, with great apparent interest and gratification, and admiring particularly the order of the schools, he inquired, "What is your system of penalty for misdemeanors?" To which Miss Fisk answered: "We carefully observe every misdemeanor, and record it in a book, and at stated periods call the offenders to account." "That is right," promptly replied the young Persian, "that recording our offenses, to call us to account for them by and by, is just the method which God pursues."

Do all nominal Christians cherish as vivid a recognition of the fact, that their offenses are all recorded in God's book of remembrance, as was thus evinced by this intelligent, thoughtful young Persian Mohammedan?

Rowland Hill.—The late Rev. Rowland Hill was remarkable for his eccentric rebukes from the pulpit. He once said, on observing some persons enter his chapel to avoid the rain that was falling, "Many persons are to be blamed for making their religion a cloak; but I do not think those are much better, who make it an umbrella!" Again, after receiving some anonymous letter from some of his congregation, "If you wish me to read your anonymous letters, you must enclose a five-pound in them for some good charity." On another occasion, "I do not want the walls of separation between different orders of Christians to be destroyed, but only lowered, that we may shake hands a little easier over them."

RESOLUTIONS VERSUS PRACTICE.

It has been quaintly remarked, that one of the most instructive books of the New Testament is named, not the *Resolutions*, but the *Acts*, of the Apostles. We are often reminded of this remark, especially when we attend Anniversaries. What excellent resolutions are conceived on such occasions! How much feeling they elicit! What soul-stirring speeches they call forth! And how courageously the speakers bear themselves, as if they were ready for the onslaught upon Satan's strong holds, any where, and at all times! One would think that, before the lapse of another year, the whole world would be taken by storm, and brought to obey the truth.

But anniversaries are soon over, and the brethren who talk so boldly, and declare their readiness to lay themselves out for such great things, return to their homes. The realities of every-day life come up, as usual. The temptations, which the anniversary helped to keep out of sight for a few days, are brought to bear upon them with their wonted strength. They are called to fight the enemy of souls alone and single-handed, just as they were before they went abroad to meet their brethren from other places. It is the same self-denying, disagreeable, unpopular, and much-despised work which before devolved upon them, that they are called to undertake again. And so another year passes away without the resolutions, to which they spoke with such boldness, being carried into effect.

Well, we suppose it will continue to be so. "*The thing that hath been, it is that which shall be; and that which is done is that which shall be done.*" Eccles. 1: 9. But we could wish that brethren were brought to feel, that their responsibility does not end with the adoption of good resolutions. Here is one, adopted at the late Anniversary of our Tract Society, which deserves more than a passing notice.

"*Resolved*, That as advocates of Sabbath Reform, we ought to demonstrate the sincerity of our devotion to the cause, by entering the work with our hands washed from the inconsistency of departing ourselves from the requisitions of the Fourth Commandment, for purposes of gain, or convenience, or selfish pleasure."

Yes, there can be no question, with any right-minded person, of the soundness of the [illegible] in this resolution; and token of forthcoming good. We will not say, that its adoption will be productive of no good at all; for, as it takes many blows to break the rock, so it takes many reproofs to break the sinner's heart. "Precept must be upon precept, line upon line." But we confess, that our organ of hope (to speak phrenologically) has suffered a great depression. The inconsistency complained of has been on the increase among us for years, and is, at this moment, greater, or wider spread, than it ever was, notwithstanding all the efforts that have been made to check it. Its growth is becoming monstrous, and we have but little hope of its being arrested, till God, "by terrible things in righteousness," shall teach us that the way of transgressors is hard. In our poor way, we have labored for reform; but who hath believed our report? Our brethren *do* "depart from the requisitions of the Fourth Commandment, for purposes of gain, and convenience, and selfish pleasure." They do it, not merely occasionally, but in too many instances, habitually and systematically. And some of the very ones who do so, will attend our public meetings, advocate and vote for just such resolutions as the foregoing, show as much zeal for the Sabbatic Institution as though they were not at all guilty, and go home and repeat the inconsistency again and again.

In the controversy with our First-day brethren, how many of us are ready to charge them with being governed by worldly motives, because they do not yield to the truth as it is presented to them! And perhaps, in many cases, the charge lies against them justly. But alas! we have only to look at home, to see the evil in its worst forms. How shall we see to cast out the mote that is in our brother's eye, when, behold, a beam is in our own eye?

But the resolution referred to is a good one—well conceived, and well expressed. And though the horizon does sometimes look dark, we will hope on. We will even express the hope, that the recurrence of another anniversary season may furnish proof, that our brethren are disposed to *act* as well as *resolve*. The minutes of our benevolent societies and Associations, record a great many resolutions which have never been acted out. T. B. B.

RELIGIOUS LIBERTY IN IRELAND.—The idea of religious liberty which obtains among the Roman Catholics in Ireland, may be inferred from the following description of a scene witnessed by a visitor to the town of Enniscothy:

"A large body of police, with fixed bayonets, their officer at their head, and accompanied by a magistrate, who lived some distance from the town, marched past, protecting a careworn Scripture reader, who, regardless of the scoffs and thirsty menaces of the rabble by whom he was assailed, was proceeding to hold his weekly lecture in a house selected for that purpose; and were it not for the protection afforded, he would, doubtless, have been cruelly murdered. During the time the lecture lasted, this armed force were drawn up outside the house; and, after its termination, escorted him home amidst the same scene of violence and ruffianism. On more than one occasion, before he was afforded police protection, I have been informed that he was cruelly beaten and struck with stones, and all the windows of the house in which he lectured were broken. Some of the parties were convicted, but were pardoned at the solicitation of this persecuted missionary."

BRITISH CORRESPONDENCE.

Signs of the Times—The Chinese Revolution.

GLASGOW, September 8th, 1854.

The hand of the Lord is still stretched out over our land, in righteous judgment. Though we have reason to sing of mercy in His gift of an abundant harvest, with the prospect of it being well secured, we are suffering under two of His "four sore judgments." We are engaged in a *war* which it is to be feared may ramify extensively, and be of long continuance. Hitherto, indeed, it has been kept from our coasts, but besides, seriously affecting our commerce, we are heavily taxed for supplies. Even the troops sent to fight our enemies on other shores, have fallen by thousands, under *pestilence*. That mysterious disease termed "cholera," spread as it is more universally over the known parts of the earth than it has ever been before, receiving commission from the Lord, has been showing to the allied powers, that if *Russia* be weak in their presence, the Almighty still is strong. His angel has, both in the Baltic and on the Black Sea, been crying to our armed hosts, "Fear God and give Him glory." At home, this sad disease prevails over all the land; and Glasgow has lost by its ravages, during last month alone, above a thousand victims. Many specifics have been announced, but whatever effect any or all of these may have had, still its ravages extend. Not only is it largely spread through our towns and cities, but it often runs its fatal course with a rapidity altogether unprecedented in former visitations. A number of clergymen, and a larger number of physicians, have been cut down. Of the latter, one who made much pretension to successful cures, (though probably it was only pretension,) was afforded brief space for repentance or reflection, having been seized on his way from Glasgow by train to one of the nearest watering places on the coast. Without dwelling on its progress in other lands, or its more frightful ravages in some of them—as of the sixteen thousand cut off in the island of Barbadoes—the means of its arrestment by the Pope claim some notice. Instead of trusting in his own righteousness, or in that of the Redeemer, we are informed that his miscalled "Holiness" has provided himself at the Vatican with a fumigatory, through which all things and all persons must pass before being admitted to his presence. The wonder-working relics, in which they are taught to trust are distrusted virtue. The Pope, two years ago, sent to the Emperor of Austria "a tooth of St. Peter." The precious antique was indeed in a rather unnatural setting of diamonds and rubies, with rays of glory, and a palm of victory, and angels holding keys and a tiara. Surely, if very efficacious, it ought to have been kept at Rome, "the centre of unity." The realities of God's government test even the estimated value of Papal rags and bones, when, in the hour of his need, he who claims not only to work miracles, but to give to others miracle-working powers, has himself recourse to the chemistry of chloride. It was estimated by a Romish journal, that when Cardinal Wiseman's mother died at Faro in Italy, she did so "*fortified* by the rites of the church." In such a time the church would require to possess some means of *fortifying* her apostate Head in *time*, as well as her members in eternity. He teacheth not a faith in Christ to others, and he exerciseth not faith himself in that in which he teacheth them to trust. But the times are passing away in which God has been allowing the church, as well as the world, to show what she is, and what she would do. The time approaches for the trying of every man's work, of what sort it is. Among the forms of suffering to which we look forward, as foretold for the latter days, in extent and combination with other evils beyond what the world has hitherto seen, is the last-named of God's "four sore judgments, evil beasts." No dread or thought of such a thing seems to be entertained; yet if we read aright the lessons of providence in the light of the divine word, the instrumentalities may already be in a measure discerned.

The recent accounts from China, if they furnish little information of the progress, civil or religious, of the patriots or their leaders, add one encouraging note, even as presented by "*The Overland China Mail*," published at Hong Kong, and quite hostile to the new rulers. Mr. McLane, United States Minister, left Shanghae in the war steamer Susquehanna, and reached Nankin on the 27th May last. Here, as also in other places lower down the river, the effects of the conflict with the Tartar rulers were awfully manifest, but ascending to Wuhu, from 60 to 80 miles above Nankin, they found the traces of the war almost obliterated, and trade and commerce in successful operation. They had no interview with Tae-ping-wang, but they found that *the Old Testament is now printed as far as Joshua*. We can only regard it as providential, that in a movement of such magnitude, and with its chief anxious for the circulation of the Scriptures, and desirous of yielding obedience to the revealed will of God, opportunity has been so long denied to Mr. Roberts and others of seeking by precept and practice to influence them unfavorably in regard to the appointed Sabbath. Exactly two years ago Dr. Medhurst wrote, "We expect soon to be in direct communication with the insurgent chief at Nankin," and repeated attempts have been made, unsuccessfully, to realize this expectation. Meanwhile, the man who from his seclusion directs the effort of a great wrong, has also gone on printing and circulating over the length and breadth, as it may be presumed, of conquered provinces, those books of Moses in which God has especially intimated that *the seventh* is the day which He has sanctified and blessed. Nothing is said of their progress in the printing of the New Testament; but, as Captain Fishbourne, of the Hermes steamer, on the occasion of his visit to Nankin, ~~stated that~~ the insurgents possessed the whole Scriptures, it is probable that a corresponding advance will have been made in the printing of the latter portions of the word of God. If *they* are fairly interpreted, nothing will be found in them either to diminish in the faith of the Chinese Christians that "Judaism" which has been charged against them falsely.

J. A. BEGG.

HINDRANCES TO ZION'S PROSPERITY.

Number Two.

The question is, then, what is in the way? Some may say, perhaps, prosperity comes from the Lord, and if he please in his sovereign mercy to revive his work, and build up Zion, we shall have it. Are we then to suppose, that the corrupt and low state, the declension and slow progress, of the church, are to be attributed to the sovereignty of God? If so, who can help it, and where is the criminality? Some have said, that it is good for us to experience adversity in the church, as well as in the world. It is true, that adversity is salutary in its effects, sometimes, in both cases; but on whose minds has the adverse condition of Zion a beneficial tendency? On the declining, corrupt, and half-dead masses? Nay, verily; but on those in whose minds there is spiritual health and vigor. And is it not through the instrumentality of the latter, that a reaction is produced, if ever? These, wearied out with the sad and sickening state of things, ply afresh the lever to the mass of death and corruption, and by perseverance make some impression. But for these, the former would have remained in everlasting winter, or have slept on until they had slept the sleep of death. We cannot innocently, then, refer the matter either to the sovereignty or the wisdom and goodness of God.

In proceeding to the subject in hand, let us first begin with the ministry. A vast amount of responsibility rests here, as these are the leaders of the host of Israel—the prime officers in the army of the Lord. The ministers of the gospel must be well instructed in the great truths of revelation. They must have minds well disciplined by the Divine and the word of God. They must be humble, spiritual-minded, prayerful, compassionate, self-denying, holy men. Their natural qualities ought to be, a good intellect, energy of mind, an aptness at communicating their thoughts and ideas, simple and easily to be understood. As to voice and manner, the one may be improved if needful, and always managed to good purpose with careful attention, and the other should, and perhaps always will, if let alone, appear natural with the speaker. Imitations, and theatrical or studied actions, always disgust a sensible audience. A great deal has been said of late, both by the press and from the pulpit, on the subject of ministerial destitution; and it may be suggested, that this sad and deplorable deficiency arises partly from a neglect on the part of Christian communities. They have not laid hold of and brought into use the natural talents of the membership, nor have they encouraged a disposition to public labors among the young men, but frequently put a veto upon them. Ministerial education, too, has been more urgently pressed upon the attention of Christian churches, and with as much zeal as if the whole fabric of the church, and even Christianity itself, rested upon it. The deficiency of ministers, as to numbers and preaching qualifications, has been laid to the want of it, and its strong advocates have tried to make it appear, and the people believe, that a man has no qualification for preaching at all, except he has been through all the course of college instruction. Far be it from us to depreciate education among ministers, or persons having ministerial duties in prospect; for certainly a man cannot know too much, or have his mind too well disciplined, who is to be a teacher of others. But it must be remembered, that education will not give preaching abilities, however much it may improve them, (provided it be of a right kind,) and in some cases it will not do this, for it is not all of the right kind. The studies pursued in many institutions of learning where our young men designed for the ministry get their education, are decidedly opposed to spirituality, or a sound knowledge of divine revelation. Moreover, the length of time spent in preparatory studies swallows up some years of the best part of a man's life, while excess of confinement and mental application often sap the foundations of health and strength, so that a mere wreck of a man comes out into the world with a diploma of A. B. or A. M., or something else, to labor in the great enterprise of preaching the gospel to a dying world. Very often it may be that a person is less qualified for ministerial duties than before. He may know more of Latin and Greek—of Philosophy, History, Mathematics, Chemistry, &c., &c; but he knows no more of theology, or anything pertaining to the moral qualifications, than before he commenced his studies. Many young men have been sent out to get educated, with a view to the ministry, who have gone through their eight years, perhaps, of study at our colleges, and when all has been done, they could not preach at all, or their preaching qualifications have been promoted no further than a little refinement and grammatical accuracy goes. The kind of education received by our young men often tends to vanity and pride, and unfits many for any situation in the churches except a genteel one, where a sermon can be read off from a manuscript to the edification of fastidious hearers in a fashionable edifice from a fashionable desk. The education needful to give a young man a fair introduction into the ministry, may certainly be obtained in three or four years, at farthest, and one of older years in much less time. The time now generally taken up is an exorbitant waste of both life and opportunities for usefulness. And after all, the education a man can receive in public institutions, is only an introduction into the vast field of knowledge, which might have been done as effectually in less than half the time. Beside, experimental knowledge is all to be had outside of colleges and seats of learning—to be acquired by the study of divine truth and providence and human nature, in inseparable connection with prayer and divine teaching. It is impossible to look on the rising ministry without perceiving a sad deficiency in the great qualifications for the work, though the churches to a large extent are endorsing the present worldly measures for bringing men into that high and holy calling. The present method of raising ministers is one great reason for the scarcity. Many, who have good natural talents for public speaking, and who ought to be looked out by the membership, are discouraged by a consideration of the long ordeal to be passed through, or by having no road opened for them. Thus they pass off into the ranks of business men, and are buried up for ever, except by chance they find in some new settlement in the great West an imperative call to do something, in time snatched from their farming or mechanical or mercantile operations, for an ignorant and godless community. The method too of not raising ministers, will make a scarcity, and for which the churches will be criminal. There are young men frowned out of the idea of becoming preachers, for no other reason than that they were natives of that very place, and known from their childhood, and hence are treated as upstarts, who are proud enough to think that they know better than their fathers; whereas, the case itself is a loud call upon them to help and encourage, and put the individual in his proper place. (Read and inwardly digest the editorial, March 2d, in the *Sabbath Recorder*.) Among the hindrances in the way of the prosperity of Zion, the one under consideration is by no means the least, but a very formi- [illegible] all kinds of knowledge, save divine, or of the great fundamental doctrines of revelation, and a neglect on the part of the churches to encourage native talent, and to give opportunity for the cultivation of it, so as to qualify men to be teachers in the especial department needed, poverty and decline and corruption are produced. It may be expected, that the complaints so prevalent in the Christian world will continue and increase, until we come back to scriptural arrangements.

GEO. R. WHEELER.

SALEM, N. J.

METHODIST ANTI-SLAVERY.

The Genesee Conference, composed of the Methodist ministers of Erie, Niagara, Orleans, Monroe, Genesee, Wyoming, and Allegany Counties, held an annual session at Warsaw on the 14th inst. A strong and able report against slavery was unanimously adopted. Connected with it were several resolutions, of which we copy the following:—

1. *Resolved*, That obedience to the fugitive Slave Law *is not obligatory*; but that, on the contrary, we are bound to spurn it, as a shameless and wicked attempt to impose on us a bondage even more degrading than that to which it requires our aid in reducing the hunted fugitive; that by the grace of God we will never contract the guilt of complicity with the stealers of men, infinitely preferring to abide the penalty of non-compliance to the enduring infamy of either passive or active acquiescence in the most insulting exaction ever thrown into the teeth of men possessing the least respect for themselves, the laws of the Creator and the equal rights of their fellow-men; and we hereby exhort our people, as they have opportunity, to follow our example.

2. That the late action of the United States Congress, by which the section of the Missouri Compromise prohibiting Slavery in the territory known as Kansas and Nebraska is repealed, is a flagrant and shameless perfidy to a sacred compact, which, while it abates the obligation of all kindred compromises, we will never cease to oppose by all constitutional means, till its execrable object is defeated.

3. That while we are unalterably opposed to the acquisition or admission of Territories as States into this Confederacy on other grounds than those of the utter and everlasting exclusion of Slavery, we are equally opposed to the organization of Churches or Conferences on other than the same grounds.

4. That in the judgment of this Conference it is competent for the General Conference so to construe the general rule on Slavery as that it shall prohibit the holding of human beings in involuntary servitude by the members of our Church; and that the General Conference be requested at its next session to declare such construction, and to provide regulations for its application and execution, with the least possible injury to the parties to be affected by it, and in the most effectual manner.

5. That inasmuch as political evils require appropriate political remedies, we will vote for no man, for any State or National office, who is not firmly and explicitly pledged against the further aggression of the slave power, and in favor of reclaiming those rights and powers which have been usurped by it, and whose personal character is not a guaranty that he will act accordingly; and that we earnestly advise our people to follow our example.

CONSECRATING A SYNAGOGUE.

In the afternoon of Sixth-day, Sept. 15th, a Jewish Synagogue in Columbia-st., New York, occupied by the congregation Ahawath Chesed (Lovers of Kindness,) was consecrated with all the formula of the Church of Israel. The Synogogue is the upper part of an old church, which has been adapted to its present occupants. The congregation, consisting mainly of young people, numbers 110 persons, and dates its origin from 1847.

The attendance was numerous, comprising some of the most prominent Israelites in New York. The ceremonies commenced by the Bearers of the Law calling at the doors and singing or chanting in Hebrew, "Lift up your heads, O ye gates, and be ye lifted up, ye everlasting doors." On the doors being opened, the ministers bearing the law entered the synagogue, singing, "How beautiful are thy tents, O Jacob! thy tabernacles, O Israel!" Then the minister pronounced the benediction, "Blessed art thou, O Lord! who hath preserved us alive." The choir and congregation then recited, "Hear, O Israel! the Lord our God—one is our God." The Priests next moved in procession around the building, singing, "Give unto the Lord, O ye mighty! glory and strength." Then followed the thirtieth Psalm, in consecration of the house. The Scrolls of the Law were deposited in the Ark; and the Perpetual Lamp lighted before the holy of holies. A consecration prayer was then offered, after which, the Rev. S. M. Isaacs preached the consecration sermon. In his discourse, the Rev. gentleman took occasion to show that the service of the Synagogue was rather for the benefit and improvement of man than the glorification of God, inasmuch as the Divinity does not need men's prayers. He also alluded to the fact that in America alone, of all countries in the world, the Jew enjoys true civil and religious liberty. He hoped that no Israelite would show himself unworthy of the boon. Following the sermon was an ode sung by the choir, "Israel, hear." Mr. Isaacs then delivered a prayer and benediction, and after the chorus, "Hallelujah, praise the Lord," the ceremonies concluded and the audience retired.

GENERAL BAPTISTS OF ENGLAND.

We are indebted to a friend in London for a copy of the *Dover Chronicle*, from which we learn that the General Baptist body held their annual assembly at Worship Street Chapel, London, on Tuesday, June 6. The existing records show that this ancient body have met in assembly about two centuries; and the present meeting evinced that the zeal of their pious forefathers still animated its members. The usual routine of business having been gone through, (viz., the reading of the report of the committee, the accounts of the assembly's and education funds, the reports of two of the messengers, and the church letters,) public service commenced, when a highly in- [illegible] by the Rev. W. H. Black, of Mill Yard, London, (in the absence of the Rev. T. B. W. Briggs, of Dover, who had been appointed to preach, but was prevented by indisposition,) from Psalm 118: 25—"Save now, I beseech thee, O Lord. O Lord, I beseech thee, send now prosperity." The preacher described the Psalm as one of those composed in parts, or dramatic Psalms, of which a considerable portion was recited or sung by David himself, on a festal occasion, after his victories over his own and Israel's enemies; and the remainder was sung at intervals by the Priests or Levites. Certain passages had been applied, in the Christian scriptures, to the triumph of Jesus Christ, especially in his riding into Jerusalem, when the original Hebrew words of this verse gave occasion to the familiar cry, "Hó-san-náh," equivalent to *Save now*. The whole verse ought to be read plurally, thus:—

"We beseech, O Lord, save now;
"We beseech, O Lord, prosper now."

On both occasions, therefore, a day of triumph and gladness was mingled with solemn wishes and prayers, the objects of which were, 1st, salvation, or deliverance from evils; 2d, prosperity, or the possession and enjoyment of good. The preacher then applied these words to point out the principal evils from which, as a Christian denomination, we might justly desire deliverance; enumerating, among those of an internal and spiritual kind, self-security, indifference to distinguishing principles, neglect or abuse of religious ordinances, and of personal and family religion. He also urged on his hearers to look for and aim at real prosperity, not in numbers and wealth, but rather in civil and religious freedom, with opportunity of serving God according to our consciences, the active maintenance of religious ordinances, the possession of happy spiritual homes, with scribes well instructed to the kingdom of heaven, bringing forth from their treasures things new and old, men of prayer, women of piety and good works, and young persons well trained and zealous to tread in the steps of their pious ancestors.

After the service, the assembly adjourned, and, on resuming its sitting, several important resolutions were adopted; among which was one of satisfaction at the passing by Parliament of "An Act for the better Administration of Charitable Bequests;" another in relation to Church Rates; and a third in relation to the proposed changes in the Universities of Oxford and Cambridge, so as better to adapt them to the wants of the people.

A public tea meeting was held in the evening, after which addresses were delivered by the Revs. H. Solly, Dr. Harrison, and others. The Rev. J. O. Squier presided on the occasion.

STATE CHURCH IN ENGLAND.—The dissenting ministers and other inhabitants of Ringwood, Hants, have forwarded a memorial to Lord Palmerston, in which they set forth the following among other striking facts:—

"On Monday, the 24th April, Isaac Early and Henry Larkham, married men—one having a family of two, the other of three children—laborers, earning less than nine shillings and sixpence each a week, and parishioners of Ringwood, having pleaded poverty and utter inability to pay the church-rates assessed upon them, amounting to 1s. 9d. and 1s. 10½d. respectively, were apprehended on a warrant—were handcuffed together, though offering no resistance—were retained in hold until the next day, and were then conveyed to Winchester Gaol, where, on their arrival, they were stripped, washed, their own clothes exchanged for the prison garb, and were, in all respects, treated as common felons. They were allowed no communication with their friends even by letter; were kept in continual confinement (with the exception of about an hour daily for exercise,) within a cell measuring about nine feet by five; and were compelled, when thus permitted statedly to revisit the open air, to wear a sort of mask, to prevent them seeing around them; and all these indignities heaped upon them, their only crime being poverty, and consequent inability to meet the demands of the 'National Church!' Public feeling was soon aroused, and a subscription set on foot; and by this measure these poor men were released—one of them after an incarceration of eight days, the other of three weeks."

RELIGIOUS INTELLIGENCE.

A correspondent of the *Central Christian Herald* states that Oberlin Institution is but twenty-seven miles from Cleveland, Ohio. The Commencement occurred near the close of August, when twelve young ladies and fifteen young men graduated. Thirteen hundred and five names are on the catalogue; some eight or nine hundred students are now in attendance. The writer to the *Herald* says: "This is the only place I was ever in where there existed a constant revival of religion. More or less conversions occur every week. An inquiry meeting is held every Sabbath evening. Some one hundred and fifty to two hundred conversions occur annually. These are mostly students."

The Rt. Rev. Jonathan Mahew Wainwright, Provisional Bishop of the Diocese of New York, died at his residence in New York, Sept. 21, after an illness of about three weeks. His disease, which was brought on by exposure and fatigue in the discharge of his Episcopal functions, was in the first instance a billious intermittent fever, but afterward assumed a typhoid character, attended by symptoms that at once caused deep anxiety throughout the wide circle of his official and personal acquaintance.

The *Journal of Missions* says: The Hawaiian Missionary Society has appropriated one thousand dollars, and placed it at the disposal of the Board, for the purpose of sending a missionary to Japan. The immediate cause of this action was the arrival at Honolulu of the United States ship of war Saratoga, with the news that Commodore Perry had concluded a treaty of amity and friendship with Japan, thus affording the hope that the way is preparing for the spread of the Gospel in those islands.

Four of the class recently graduated at the Connecticut Theological Institute, are to go abroad as Missionaries. Two have already been ordained, and their places of destination assigned, viz:—M. B. Parsons to Turkey; and M. M. Carlton to Siam, under the patronage of the Presbyterian Board of Missions. Mr. H. M. Adams expects to go to the Gaboon Missions; and J. W. Marchusson, who is a Jew, and who came to this country only to receive an education, to labor for his brethren in Asia or Europe.

The heirs of Augustine and George Law, of Loudoun county, Va., have offered to set free 50 slaves, valued at $30,000 provided, the American Colonization Society will send them to Liberia, and make the usual provision for them after their arrival out. Some of them have husbands and wives belonging to other masters, and efforts are about being made to secure their freedom also, so that there shall be no separation of families.

The ensuing anniversary of the American Bible Union will be held in the church No. 350 Broome-st., New York, commencing on Thursday, the 5th of October. A meeting for business, including the election of officers and managers, will be held at 9 o'clock A. M., and the public exercises will commence at 10 o'clock. It is expected that the meetings will be continued, morning, afternoon and evening, through two days, and perhaps longer.

The Executive Committee of the American Tract Society held its monthly meeting on Monday the 18th inst. The receipts of the month were $18,171, and the issues from the Depository for the same period amounted to $26,873. The grants to individuals and associations were 1,323,200 pages.

The prospects of the United States and Liberia Steamship Company are brightening. A gentleman in a remote district of the South sent an unsolicited subscription of $1,000, and more recently he writes that his wife's father, at his daughter's request, agrees to give his name for $1,000. Nothing like the efficacy of such examples.

Rev. Thornton A. Mills, of Indianapolis, having declined the degree of D. D. recently conferred on him by Hanover College, the editor of the Indiana *American* proposes the adoption of a new degree, namely, D. D. D.—Doctor of Divinity Declined—which is a genial idea, and leisurely expressed.

The Committee of the Edinburg Bible Society, on the application of parties on the spot, have ordered a large supply of Scriptures, French and English, to be forwarded to Boulogne, for the use of soldiers in the camp in course of formation there, and for distribution among the humbler classes of English, Scotch, and Irish residents.

The board of trustees and faculty of Genesee College will hereafter confer the degree of A. B., Bachelor of Arts, and A. M., Master of Arts, on all young ladies, as well as young gentlemen, who may complete the prescribed course of college studies.

Of Cruden's Concordance, Dr. Wayland says, "That for one hundred and twenty-five years no one has attempted to improve it." Dr. Spring says: "If I possessed but two books in the world, they should be God's Bible and Cruden's Concordance."

The Evangelical Lutheran Synod of Ohio and the adjacent States has passed a resolution not to admit to church membership any person belonging to secret societies.

The number of persons in membership with the Orthodox Congregational Churches in Boston, eighteen years ago, was 2,673; now the number is nearly doubled, being 4,634.

General Intelligence.

European News.

European dates to Sept. 8, have been received. The news is not important.

About the war, the news is briefly this:—Russia refuses the proposition made by Austria, retires behind the Pruth, and there awaits the course of events, whether hostile or peaceable. The Austrian Cabinet has decided that this refusal is not a *casus belli* against Russia, consequently Austria will maintain her present position, awaiting the result of the allied attack on Sevastopol. Fresh negotiations are hatching between Austria, Prussia and the German States, with a view to peace.

The Russians are making preparations to burn the cities of Odessa, Reni, Brailow, Galatz and Ismail, should they be forced to abandon them. They have prepared combustibles, and have cut off the supply of water and burned the fire engines. Orders are issued that wherever the enemy appears in superior strength, towns and villages are to be reduced to ashes. Unceasing preparations are being made in Sevastopol for defense. All criminal prisoners are liberated and enrolled in companies to work the port batteries. A gang of 200 of the worst convicts are still in irons, to be employed in carrying ammunition.

The cholera has abated in both armies. No new movement had taken place, except that the French were embarking fascines and artillery.

The English papers are unbounded in their gratulations on the visit of His Royal Highness, Field-Marshal Prince Albert, to the camp of the Emperor Napoleon, at Boulogne. The event, they say, is "of a deep military and political significancy." His Royal Highness is accompanied by a brilliant staff, including the Duke of Newcastle, Minister-at-War, and is escorted by a squadron of the Queen's Life-Guards, as becomes his distinguished military position and abilities. (We may remark *en passant*, that the Albert hats have been supersede.) Four ships-of war and an innumerable fleet of passenger-ships accompany the Prince-Marshal on his visit to France.

In France, the event which excites most interest is the grand military display at Boulogne. The camp is completely organized, and consists of 100,000 men of all arms. In military parlance, this force is called "the Army of the North." It will remain encamped until spring, and then be drafted, as required, for active service against the enemy. Napoleon, in person, cammands the maneuvers.

Christina of Spain, accompanied by her husband and children, left Madrid on the morning of August 28 for Portugal. They were all inside a traveling chariot, and were accompanied a short distance out of the city by Gen. Garrigo. A squadron was provided as an escort, and the garrisons ahead were notified to see them safely conducted from one station to another.

Accounts received from the Cape of Good Hope mention the discovery of large hills of copper in Namaqualand. Price & Co. had advertised to have 1,000 tuns removed, on August 15, from Concordia to Honde-clip Bay for shipment.

Archdeacon Wilberforce, a man of some standing in the English Church, has resigned in consequence of his scruples to recognize the Queen as the head of the Church spir'tual,

The weather in England was brilliant, and the harvest was drawing to a close. It continued abundant throughout England.

A return just issued of the population of Ireland shows that the number of inhabitants has fallen off *two millions* in the past five years. In the year 1805 the population was over five millions; in 1814, six millions; in 1824, seven millions; in 1837, eight millions; in 1846, eight million three hundred and eighty-six thousand nine hundred and forty; and in 1851, only six million five hundred and fifty-one thousand nine hundred and seventy.

A nearly White Slave.

The New Orleans *Picayune* of September 6th gives the following account of a rather singular case which came before the Fourth District Court on the previous day:—

Some days since a woman named Pelasgie was arrested as a fugitive slave, who had lived for more than twelve years in this city as a free woman. She was so nearly white that few could detect any traces of her African descent. She was arrested at the instance of a man named Raby, who claimed her as belonging to an estate of which he is heir-at-law. She was conveyed to the First District guard house for safe keeping, and while there she stated to Acting Recorder Filleul that she was free, had never belonged to Raby, and had been in the full and unquestioned enjoyment of her freedom in this city for the above mentioned period. She also stated that she had a house well furnished, which she was in the habit of letting out in rooms. About this time a lawyer appeared before the Recorder and stated that the woman was born in slavery, and now belonged to a man in Mississippi. He produced a bill of sale which corroborated his assertion, and which stated that in a certain number of years she was to be set free. This being a sort of triangular fight, the woman Raby and the lawyer forming the corners, the Recorder found himself somewhat at a loss what to do, and as Raby pressed his claim, the Recorder advised him to apply to one of the District Courts. Accordingly he applied to the Fourth District Court, and took a rule on Acting Recorder Filleul to show cause why a mandamus should not be issued compelling him to deliver up the woman. Mr. Filleul appeared before the Court and stated the circumstances mentioned. Judge Reynolds decided, however, that Raby was the owner of the woman, and ordered the rule to be made absolute, and a writ of mandamus to be issued upon Acting Recorder Filleul for the surrender of the slave. The issuing of the writ, however, was rendered unnecessary by the declaration of Mr. Filleul that the order of the Court was sufficient, and that he would at once order the woman's release. Time, however, has been given to her to prove her freedom, and also to the lawyer to prove the validity of the bill of sale.

Connecticut has 28 clock-factories, employing 1,279 hands in the manufacture, has $1,000,000 capital invested, and makes annually 790,000 clocks. One fourth of these timekeepers find a market in England.

The Yellow Fever.

The yellow fever has been more extensive and fatal at the South during the present fall, than for many years past—perhaps than ever before. We copy a few paragraphs upon the subject:—

The yellow fever is increasing at New Orleans. During the week ending on the 10th inst. the total number of deaths was 484, of which 284 were from the fever.

Among the recent victims of the disease at Savannah were Dr. Harris, and Capt. Olmstead, Cashier of the Marine Bank.

Friday, Sept. 22d, was appointed a day of humiliation and prayer at Charleston.

There was a great panic at Augusta in consequence of the fever breaking out there. Three deaths took place from it on Saturday, Sept. 16th.

The Savannah *News* of the 14th contains two columns of names of the persons who died during the week ending the 12th. The great body were foreigners.

Funds for the relief of the sufferers at Savannah are contributed freely in the Northern cities. At a meeting in New York to consider the subject, Mr. Solomon stated that he had collected, on the 9th, 10th, and 11th of September, $2,010 from the merchants of the City.

The subjoined private letter from a gentleman in Savannah to his brother in Philadelphia, will show the terrible condition of things:

"I have but a moment to write to let you know that —— and myself are alive, every man in the store having deserted us in consequence of the epidemic. We are determined to stay and take our chances, to see the city out of it. I inclose our report of interments yesterday, 51 out of a population of not over 3,500 white people. Interments for the week 210. Everything is in an awful state, and death and destruction stare us in the face everywhere. The gale was enough to have ruined us at most times, and now all that is required to fill our cup is a fire. We work night and day, and spend our money as if it was public property, for the benefit of the sick and destitute, and you cannot begin to imagine what distress prevails here. We cannot procure coffins enough to bury the dead, and today all the house-carpenters in town have quit everything else, and gone to making them. Our own citizens have to take the spade and dig graves. It is really awful. Be satisfied that we are all doing our duty, and hope God will help us to do good."

INTERESTING BAPTISMAL SCENE.—The New York correspondent of the *Watchman and Reflector* gives the following account of an interesting baptismal scene which he recently witnessed in the Cannon-st. Baptist Church:

"Rev. Mr. Guyer, a French and German missionary, administered the ordinance to several converts. He first announced a hymn in the German language, then gave an address and offered prayer in the same language. He then performed the same services in French. After which he took a German candidate and baptized him, with the use of the German formula, next a French candidate, and immersed him, pronouncing the formula in French. In this alternate manner he administered the ordinance to some six or seven candidates. The occasion was one of unusual interest, both to those who could, and to those who could not, understand the languages which were spoken. The baptistery in the Cannon-st. Church is the largest in the city, or that I have ever known elsewhere. A half dozen or more ministers might baptize at the same time without interference. When it is used, the ordinance is always administered where there is '*much water*.'"

MRS. SWISSHELM ON HYDROPATHY, &c.—The racy editress of the Pittsburg *Family Visitor*, furnishes the following "first rate" notice of a medicine, which many consider as good as the notice:—

"In '1776,' a patriotic fever broke out in this country which became epidemic. Our father-in-law, then a youth, had a prolonged and severe attack of the disease; and once he was, with a large number of the afflicted, on the banks of the Delaware, under the charge of Doctor George Washington. One night, he knew by the symptoms that all his patients would have a gunpowder paroxysm in the morning, unless some measures were taken to prevent it; and he ordered them all a plunge in the Delaware, a rigorous rubbing with ice cakes, to swim to the other shore, and then had them 'packed away' in wet blankets until next morning. Some died from the effects of the treatment, but to the patient in whom we were most particularly interested it resulted in a confirmed asthma, which descended to his children. So our bigger half gets up a coughing and wheezing spell almost every evening, until lately, when it begins, he takes a few drops of 'Ayer's Cherry Pectoral,' which gives him immediate relief. Thus we have a present experience in our family, which says, that although water is all the medicine we require, other people may need something else."

THE SYDENHAM CRYSTAL PALACE.—The Crystal Palace recently opened at Sydenham, England, is likely to prove a grand speculation, the income from rents, season tickets, and single admissions, considerably exceeding the original estimates. An English paper gives the following as the dimensions of the gigantic edifice:—

"With its wings included, it is 3,476 feet in length, or about three quarters of a mile from end to end; being thus 1,628 feet longer than the Palace of the World's Exhibition in Hyde Park. The central or grand transept is 208 feet high, 6 feet higher than the Monument, the upper gallery being 105 feet from the floor. The cubic capacity of the interior is one-half larger than the structure of 1851. The superficial area of the ground floors and galleries is 843,656 feet. The glass roof would cover 25 acres of ground, and the panes which give the building its crystal title would, if placed end to end, extend 242 miles; while the light columns which sustain the fabric, if treated in the way suggested, would measure more than 16 miles. The pipes through which warmth is circulated through the building, are 50 miles in length."

Eighty-five new students entered Union College at Schnectady, New York, under the presidency of Rev. Dr. Nott, on the 11th of September.

SUMMARY.

A colored girl in Delaware the other day viciously seized with a fancy for wearing to a "meeting" some finery, put on clothes which did not belong to her, but before she returned was nabbed by the constable. We record the case as we find it: She was not convicted of stealing the clothes, but taking them to wear for the occasion. We do not make the distinction, but it is made. The costs of the trial were $37 14, and in addition to paying these, she was to receive a number of lashes. Unable to pay the fine, she would have been sold as a slave for seven years, but for the timely interposition of Thomas Garratt, who advanced $15, and the remainder of the fine was then remitted.

In the Court of Appeals at Lewisburg, Virginia, the judgment in the case of Farish & Co. vs Reigle, coming up from Shenandoah, has been affirmed. Reigle was injured by the upsetting of one of Farish & Co.'s stages, and brought suit for damages, which were fixed by a jury at between $9,000 and $10,000. Farish took an appeal from a decision of the Court below, and brought it to the Court of Appeals, which sustained the Circuit Court, thus imposing upon Farish & Co. not only the payment of the original damages, but the cost of the suit, making in all but little short of $11,000.

Samuel Williams, a colored man, has one of the finest farms in Washington county, Md. The Haggerstown *Herald* states that, at the age of 38 years, he was a slave in Stafford county, Va., but subsequently purchased his freedom from his own earnings. He then bound himself to years of servitude until he could purchase his wife and children, which he accomplished when he was fifty years of age. Now he owns a farm worth $10,000, and personal property amounting to several thousand more, all earned by his own labor. He is now 73 years of age.

The Hartford *Courant* says, that in the month of July there were twenty commitments to the work-house in that city; in the month of August, eight; and on Saturday, Sept. 9, *there was not a single male person in the work-house*, and the building, but for two females, would be tenantless! The *Courant* attributes this happy state of things to the operation of the new Connecticut Liquor Law.

The whole number of buildings destroyed in Greytown was 157. The computed value of these with their contents was $1,500,000. Only eight small buildings were saved from the general ruin. The owners of the property, besides residents of the city, comprise Americans, English, Germans, and Italians, residing in Granada and Italy; Nicaraguans, citizens of the interior towns of Nicaragua; and several Frenchmen, who had valuable property in charge.

The Lords of the Treasury, upon the recommendation of Right Hon. Viscount Canning, her Majesty's Postmaster-General, have awarded Mr. John Dicker, inspector of mails, the sum of £500, as a compensation for his invention of an apparatus for transferring mail-bags to and from railway carriages at full speed without stopping.

A Polytechnic College, for the State of Pennsylvania, has been organized, and has been in existence in Philadelphia for more than a year past. It is founded on the plan of the Industrial Colleges of Continental Europe, and is designed to afford a thorough professional education to students intended for engineering, mining, agriculture, and the chemical arts. The present session, which is just commencing, opens under flattering auspices.

The difficulties which have existed for several years between the people of Erie, Pa., and the Erie and N. E. Railroad Company, and which created so much excitement throughout the country in December, January, February and March last, have been before the Supreme Court for adjudication. From it a decree has gone forth, ordering the Company to remove that portion of their road which is built on the streets of Erie and Harbor Creek.

Letters from St. Petersburgh say that two batatlions of skaters have been organized at Cronstadt. Their mode of action is known from former wars. Their vocation is to slide over the ice, to operate against any island that may be occupied by the enemy. Battalions of skaters are also being established in other garrisons.

Two compensations have been suggested as likely to balance the evil of the long-continued dry weather. One is, that the insects which have been so destructive to crops, &c., in past years, may be killed—the progress of the cholera has been somewhat abridged, from what would have been its ravages in a wet summer.

The Detroit *Tribune* says: Accounts from all parts of the State that reach us through private channels and our exchanges, unite in saying that the present harvest is one of the best ever known in the State. Wheat, in some localities, may not quite come up to the mark, but in others it will, while corn and oats never looked better."

A letter from San Francisco, dated Aug. 1, says, "The ship S. S. Bishop, which cleared yesterday for New York, has some 12,000 bushels wheat and barley on board, and another vessel loading takes about the same quantity to England. This promises to be an immense trade ere long. All kinds of grain are extremely low with us now."

In the town of Carver, Plymouth county, there is a braid factory, which turns out about two thousand gross of shoe-strings per month. The building is 33 by 112 feet, three stories high; the waterfall is fourteen feet, equal to forty horse power. The machinery takes the material in the raw state, and completes a handsome braid. This is the only establishment of the kind in New England.

The savans of Paris are going to introduce the Dioscorea Japonica as a substitute for the potato. It is a tubercler vegetable, with a more delicate flavor than a potato. It will be funny, till we get used to it, to tell Betty to "peel the dioscorea japonica for dinner," won't it?

A mulatto slave, who worked in the office of the Louisville *Journal*, made his escape to Canada a few days ago, and sent his mistress a letter therefrom, informing her of his safe arrival.

The Pewterers' Company in London hold an estate upon condition that they shall, out of its rents, provide faggots for the burning of heretics.

On the 12th of September there was much excitement in Chicago, in consequence of the the attempted arrest of a fugitive slave by three men from St. Louis. The slave was found in one of the principal streets, and seized by the men without the assistance of the officers of the law. The cries of the fugitive speedily drew together a large crowd, and in the confusion he was torn from his captors. They instantly made an attack on the crowd, recaptured the fugitive, and one of them fired a pistol, wounding a citizen. The three were then arrested, and lodged in jail.

A dispatch dated Cincinnati, Wednesday, Sept. 20, 1854, says: As the 11 o'clock train from Dayton, on the Cincinnati, Hamilton and Dayton Railroad, was running round a heavy curve near the dépôt in this city, the two hindermost cars ran off the track and fell down an embankment, a distance of ten feet, into the canal, resting bottom-upward. No one, so far as ascertained, was killed, but upward of thirty persons were badly injured.

The proprietors of the *Enquirer, Times, Commercial, and Columbian*—four daily journals of Cincinnati—have combined to raise the price of their papers from ten to twelve cents a week. They alledge as reasons for the change the fact that newspaper publishing is less profitable than any other business requiring a similar outlay of capital, talent and labor, the increase in the cost of making newspapers owing to competition, the rise in paper, wages, rents, fuel and provisions.

A dispatch dated Boston, Thursday, Sept. 21, 1854, says: The last number of the *Commonwealth*, Free-Soil paper of this city, appeared to-day. The publishers announce that it don't pay, and that they have sold out to a firm who are soon to issue a new evening paper to advocate Anti-Slavery, Temperance and Protestantism, but not in a partisan manner.

The great Chemist Charles Enderlin is dead. He came to this country in October, 1850, and established himself in the City of New York. He was born on the 16th of April, 1813, studied pharmacy in Heidelberg under Geiger, medicine in Heidelberg and Würtzburg, and chemistry in Giessen under Liebig, who pronounced him the most eminent chemist in Germany.

It is a rather noticeable accident, that the New York Whig State Ticket comprises two Editors and never a Lawyer. Mr. Clark, the candidate for Governor, is a thrifty hardware merchant at Canandaigua; Mr. Fitzhugh a miller and forwarder at Oswego; Messrs. Raymond and Bowne make newspapers for a living.

Dates from Mexico to the 3d inst., apprize us that the leaders of the revolution were not captured, though their losses were considerable. In Taumaulipas the people quietly returned to obedience. In Guerrero and Michoacan the friends of Alvarez have had some severe blows, a noted leader named Narcisso Valle being killed, and the famous Maldonado and Alarcon taken prisoners and shot. The Durango Indians are perpetrating great outrages.

During the twenty-four hours ending at noon, Sept. 19th, five ships arrived in the port of New York, bringing an aggregate of 2,057 passengers. One of these vessels, the Isaac Bell, with 607 passengers from Havre, lost nineteen passengers on the voyage from Cholera. The Yorktown, another ship from London, with 630 passengers, buried 21 of them at sea from the same cause.

A dispatch dated New Orleans, Saturday, Sept. 16, 1854, says: In consequence of the continued ill feeling evinced between the Irish and the Know-Nothings, the Mayor has deemed it prudent to issue his proclamation requesting all well-disposed citizens to enrol themselves as Special Police, for the purpose of maintaining the laws and protecting property.

A building fell in Lowell, on Saturday afternoon, Sept. 16th, burying three persons, one of whom, Dennis Shea, seventeen years of age, was instantly killed. The others escaped with slight bruises. The building had been partially burned before the accident.

A dispatch dated Boston, Monday, Sept. 18, 1854, says: In regard to the sale of Mr. Webster's right in the Franklin estate, it is said that it will probably be bought by Mr. Paige, one of the trustees, and that no outside competition is expected or desired.

The ship Indiana, on her way from New York to New Orleans, put into Key West on the 24th of August, on account of trouble among her crew. One of the sailors afterward turned "State's evidence," and divulged a plot, from which it seems they were to murder the captain and destroy the ship on the very day she put into port.

The Troy *Whig* of Sept. 20th, says that on the 16th inst., Marshal Mott arrested Arthur C. Nelson, Postmaster at Keesville, Essex Co., and editor and publisher of the Keesville *Gazette* of that village, on a charge of abstracting money from letters directed to his office, and of embezzling letters containing drafts, &c.

On returning home a day or two since, says the Bordentown *Register*, we found lying on our table, a peach presented by Dr. W. M. Fahnestock, of this city, which measured 11 inches around it, and weighed three-fourths of a pound, and of a very superior flavor. The Dr. had a basket of these mammoth peaches presented him by a friend in Harrisburg, Pa., and this was about the average size.

The Whig New York State Convention agreed on the following nominations:

For Governor—MYRON H. CLARK, of Ontario.
For Lieut. Gov.—H. J. RAYMOND, of New York.
For Can. Com.—HENRY FITZHUGH, of Oswego.
For Prison Insp.—NORWOOD BOWNE.

The Hon. John M. Botts recently had his wallet, containing $811, stolen from his pocket, while purchasing a ticket at the New York Theater. Officer Allison had been watching the thief, and caught him in the act, recovering the money.

A correspondent writes from Auburn: "We have the news here of the destruction of more or less of the buildings of Dr. J. C. Jackson's extensive and widely-known Water Cure, at Glen Haven. The original and central building is said to have been totally consumed."

Corn Husks we see suggested as a material for Paper. This seems to us an excellent idea. Those husks are most abundant throughout the country, and must contain a very large per centage of fibrous substance capable of being reduced to a pulp.

A Southern editor advertises, that he wishes to unite himself to an "Owe-Nothing Society," and hopes all his subscribers will do likewise. The *Christian Secretary* adds to the above: "We should be glad to join such a society ourself, but can not do so without the coöperation of all our subscribers."

A Western exchange says, "It strikes us that we should look a long time at $5 before we would exchange it even for Grisi's excellent notes. Five dollars will buy nearly half a barrel of flour. While flour and music are both up to famine prices, we recommend people who are not rich to stand by the flour-barrel."

Dr. Wildman, who recently introduced muriated tincture of iron in the treatment of yellow-fever at Savannah, died of the prevailing epidemic at that city on Sunday last. It is said that he had cured upward of one hundred and fifty patients with his peculiar remedy, since the 21st of August.

The Protection Insurance Co., of Hartford, Conn., have failed. The drouth, the fires, and the monied interests of the country, are inseparably connected. The Directors of the company have made an assignment.

The cholera has raged sadly at Pittsburg, Pa. There were 39 deaths from it on the 14th of September, 51 on the 15th, 25 on the 16th, 40 on the 17th, and 53 on the 18th.

Letters from residents in the western part of the State of Ohio, mention that the crop of apples in that vicinity is very large, and the fruit is sold at low rates. Good apples are plenty at from 30 to 40 cents a bushel.

The New York *Journal of Commerce* remarks upon the many disasters which have fallen upon the country during the month of August. It estimates the loss by fires at $2,577,000.

The largest cargo of corn ever received at Buffalo in a sail vessel was carried into that port on Friday, in the bark Great West, Capt. Dickson. She had 28,000 bushels.

The Texas *Ledger* has the following bit on the patriarchal institution, which speaks for itself: "All the negroes belonging to Mrs. W. S. Wallace ran away last night. Five hundred dollars is offered for their recovery."

New York Markets—September 25, 1854.

Ashes—Pearls $6 25; Pots 7 00

Flour and Meal—Flour has declined, and is selling at $8 25 a 8 62 for mixed to good brands Upper Lake and Michigan, 8 50 a 8 62 for common to good State.

Grain—Wheat, 1 82 for white Canadian, 2 00 for white Genesee. Rye 1 22. Barley 1 14 for good two-rowed. Oats, 51 a 56c for State and Western. Corn 78 a 79c for Western mixed.

Provisions—Pork 12 00 for prime, 14 25 for mess. Beef 10 00 a 11 25 for country mess. Lard 10¾ a 12c. Butter 13 a 17c for Ohio, 19 a 22c for State. Cheese 9 a 10½c.

Hay—1 00 a 1 06 per 100 lbs.

Lumber—16 00 a 17 00 for Eastern Spruce and Pine.

Potatoes—3 00 a 3 75 per bbl for Pink-eyes, 3 50 a 4 25 for Sweets.

Seeds—Clover 12c. Timothy 2 75 a 3 12 per bushel for mowed, 3 25 a 3 75 for reaped. Flax-seed 1 65.

Tallow—13c for Butchers' Association.

Wool—28 a 30c for native, 42 a 45c for Am. Sax. Fleece.

MARRIED,

In Brooklyn, on the 19th inst, by Rev. J. W. Sarles, Mr. DANIEL W. HARRINGTON, formerly of Cambridgeport, Mass., to Miss SARAH KNOWLES, daughter of J. P. Knowles, formerly of Charlestown, R I.

Sept. 14th, by Eld. Samuel Davison, Mr. CHARLES B. MILLER, of Southampton, Ill., to Miss ELIZABETH CULVER, of Knox County, Ill.

In Genesee, N. Y., September 18th, by Elder P. S. Crandall, Mr. GEORGE K. CHAPIN to Miss EMMA D. TRUMAN, both of Genesee, N. Y.

In Williamsburgh, Sept. 14, by Rev. Beriah Green, of Whitesboro, Mr. JONATHAN S. GREEN, of Brooklyn, to Miss EMILY B., daughter of Gilbert W. Hunt, of Williamsburgh.

On the 16th of September, (evening after the Sabbath,) by Eld. Elias Burdick, DANIEL CLARKE, of Plainfield, Otsego Co., N. Y., to SUSAN M. STILLMAN, of DeRuyter, Madison Co., N. Y.

DIED,

In Plainfield, N. J., Sept. 18th, of dropsy on the chest, after an illness of near two months, REBEKAH DUNHAM, wife of Dea. Randolph Dunham, aged 67 years. Mrs. Dunham had been a member of the Seventh-day Baptist Church in Plainfield ever since its organization, and was esteemed a "mother in Israel." Her frankness and hospitality had endeared her to a large circle, by whom, in common with her family, she will be deeply mourned, even though they feel assured that for her it was better to depart and be with Christ.

At her residence in Hopkinton, R. I., August 19th of consumption, Mrs. MARY HOXIE, relict of Edward Hoxie, Esq., of Charleston, aged 87 years. For forty years she had been a consistent and exemplary member of the church of Christ—twenty years of which time she had been a widow. She bore with Christian fortitude and resignation the gradual, though sure and fatal progress of the disease which finally terminated her pilgrimage. During her last sickness, she manifested a firm reliance in the merits of her Redeemer, saying, 'All the days of my appointed time will I wait, till my change cometh. J. C. B.

In Hopkinton, R. I., August 28th, Mrs. MARTHA SAUNDERS wife of Clarke Saunders, aged 43 years. Sister Saunders was a member of the 3d Hopkinton church in R. I., and we trust she has gone to join the church triumphant.

In Stonington, Conn., Aug. 29th, Mrs. NANCY CRANDALL, widow of the late Daniel C. Crandall.

In Savannah, Ga., Aug. 12th, of yellow fever, Mr. BENJAMIN CRANDALL, in the 38th year of his age.

In Petersburgh, Rensselaer Co., N. Y., August 30, LOLA ELIZA VARS, aged 2 years, 6 months, and 18 days.

Lo! in her clay cold bed she lies,
Beneath the verdant sod.
While her departed spirit flies
To meet her Saviour, God.

Near Marlboro, N. J., Sept. 17th, after a brief illness, of cholora morbus, ZEBEDIAH DAVIS, aged 75 years. He was a member of the Seventh-day Baptist Church at Shiloh, and expressed entire resignation to the Divine will. D. C.

Near Marlboro, N. J., Sept 17th, from hemorrage of the lungs, CHARLES L. NOBLE, in the 22d year of his age. He was a member of the Marlboro Seventh-day Baptist Church, of very amiable disposition, and much beloved. D. C.

LETTERS.

Wm. F. Randolph, Elias Burdick, I. F. Burdick, D. L. Browning, R. S. Burdick, G. S. Crandall, Samuel Davison, Charles Potter, E. R. Clarke, John Webster, Azor Estee, C. Stevens.

RECEIPTS.

WILLIAM M. ROGERS, Treasurer.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health. A. UTTER, M. D.,
Physician and Proprietor.

New Market Seminary.

THE Academic Year of this Institution, for 1854 and '55, is divided into three terms, each fourteen weeks long.

The Fall Term commences Sept. 5, and closes Dec. 8.
Winter " " Dec. 13, " " Mar. 20.
Spring " " Mar. 28, " " July 4.

The Department of Instruction is in the care of Mrs. R. H. WHITFORD, Preceptress, who will be assisted by competent teachers, as occasion may require.

INSTRUCTION.—The Common English Branches, Reading, Writing, Geography, Arithmetic, and Grammar, will be taught each term. The Higher English Branches taught as follows:—In the Fall Term, Chemistry, Geometry, and Book-Keeping; in the Winter, Natural Philosophy, Physiology, and Astronomy; in the Spring, Botany, Geology, and Moral Science. Algebra, Etymology, and Rhetoric taught all terms in the year. Classes in French and the Extras will be taught whenever desired.

EXPENSES.—*Tuition, per term*—for Common English Branches, $3 50; for Etymology and Book-Keeping, $4 50; for Higher English Branches and French, $5 00; for Incidentals $ 25.

Extras, per term—Penciling, $1 00; Crayoning, $2 00; Embroidery, $3 00; Oil Painting $7 00; Piano Music, $10 00.

REGULATIONS.—No student is admitted for less than half a term. No deduction in price of tuition made for absence, except in cases of sickness. Nothing sectarian is taught or countenanced in the school.

A new and commodious building will be ready for the school at the opening of the Fall Term.

DAVID DUNN, Pres. of Board of Trus.
ISAAC H. DUNN, Sec'y.
NEW MARKET, N. J., July 20, 1854.

Norwich Line to Boston,

WORCESTER, Lowell, Fitchburg, Nashua, Concord, Bellows Falls, &c. Via Norwich and Worcester, Worcester and Nashua, Boston and Worcester New London and Willimantic, and Palmer Railroads.

Passengers by this Line leave pier No. 18 North River, foot of Cortlandt-st., every day, at 5 o'clock, P.M., (Sundays excepted.)

Steamer CONNECTICUT, Capt. J. W. Williams will leave New York every Tuesday, Thursday, and Saturday.

Steamer WORCESTER, Capt. Wm. Wilcox, will leave New York every Monday, Wednesday, and Friday.

Passengers by this Line arrive in time to take the early trains out of Boston.

Passengers taken at the lowest for New London, Norwich, Willimantic, Stafford, Munson, Palmer, Worcester, Boston, Fitchburg, Lowell, Lawrence, Nashua, Concord, Bellows Falls, and other places in Northern New Hampshire and Vermont.

Regular Mail Line via Stonington for Boston,

PROVIDENCE, NEW BEDFORD, and TAUNTON. Inland Route, without change of cars or detention, carrying the Eastern Mail.

The steamers C. VANDERBILT, Capt. Joel Stone, and COMMODORE, Capt. John G. Bowne, in connection with the Stonington and Providence, and Boston and Providence Railroads, leaving New York daily (Sundays excepted) from Pier No. 2 N. R., first wharf above Battery Place, at 5 o'clock P. M., and Stonington at 8 o'clock P. M., or on the arrival of the mail train which leaves Boston at 5 30 P. M.

These steamers are unsurpassed for strength, safety, speed, comfort, and elegance. The officers are experienced and attentive.

The natural advantages of this route are superior to any other. Being shorter and more direct, the trip is more pleasantly and expeditiously performed, while passengers can always rely on reaching their destination in advance of those by either of the other routes.

The COMMODORE, from New York—Monday, Wednesday, and Friday. From Stonington—Tuesday, Thursday, and Saturday.

The C. VANDERBILT, from New York—Tuesday, Thursday, and Saturday. From Stonington—Monday, Wednesday, and Friday.

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

NEVER could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

VERMILLIONVILLE, La., April, 1853.

Mons. le DR. J. C. AYER:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

DR. J. C. AYER—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

DR. J. C. AYER:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.
Harvey, McKenney, & Co., State Gazette, Burlington, Iowa.
J. Knabb, & Co., Journal, Reading, Pa.
Raymond, Harper & Co., New York Times.
S Cobb, Christian Freeman, Boston.
Wm. B. Jacobs, Christian Chronicle, Philadelphia.
Hon. J. Wentworth, M. C., Democrat, Chicago, Ill.
Rev. E. G. Reese, Methodist Protestant, Baltimore.
W. M. Wightman, Christian Advocate, Charleston, S. C.
J. M. Magennis, True Delta, New Orleans.
T. M. Donnell, Daily News, Savannah, Ga.
Geo. D. Prentiss, Louisville Journal, Ky.
Hon. Schuyler Colfax, M. C., South Bend Register, Indiana.
A. Commings, Christian Mirror, Portland, Me.
M. H. Bartlett & Co., Republican, Hartford, Conn.
Chaddick & Berry, Banner of Peace, Lebanon, Tenn.
Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. SANDS; retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

Miscellaneous.

The First Man I Killed.

A young English sailor, on the verge of the Black Sea, gives an account of a skirmish in which he was engaged with a party of Russians, one of whom he shot. It shows how dreadful is war, how opposed it is to the sensibilities of our nature. In writing home to his friends, the generous young sailor said:

"We dispersed a few hundred yards distant from the beach, to keep the coast clear while the boats' crew made prizes of the guns. The enemy had the advantage of the wood, and also knowing the country well, and a troop of them showed in advance. We were ordered to fire. I took steady aim and fired on my man at about sixty yards. He fell like a stone. At the same time, a broadside from the —— went in among the trees, and the enemy disappeared, we could scarce tell how. I felt as though I must go up to *him*, to see whether he was dead or alive. He lay quite still, and I was more afraid of him lying so, than when he stood facing me a few minutes before. It's a strange feeling to come over you all at once that you have killed a man. He had unbuttoned his jacket, and was pressing his hand over the front of his chest, where the wound was. He breathed hard, and the blood poured from the wound and also from his mouth every breath he took. His face was as white as death, and his eyes looked so big and bright as he turned them and stared at me: I shall never forget it. He was a fine young fellow, not more than five-and-twenty. I went down on my knees beside him, and my breast felt so full, as though my own heart would burst. He had a real English face, and did not look like an enemy. What I felt I never can tell; but if my life would have saved his, I believe I should have given it. I laid his head on my knee, and he grasped hold of my hand, and tried to speak, but his voice was gone. I could not tell a word he said, and every time he tried to speak, the blood poured out so I knew it would soon be over. I am not ashamed to say that I was worse than he; for he never shed a tear, and I couldn't help it. His eyes were closing when a gun was fired from the —— to order us aboard, and that roused him. He pointed to the beach, where the boat was just pushing off with the guns which we had taken, and where our mariners were waiting to man the second boat, and then he pointed to the wood, where the enemy was concealed. Poor fellow! he little thought how I had shot him down. I was wondering how I could leave him to die, and no one near him, when he had something like a convulsion for a moment, and then his face rolled over, and with a sigh he was gone. I trust the Almighty has received his soul. I laid his head gently down on the grass and left him. It seemed so strange when I looked at him for the last time. I somehow thought of every thing I had heard about the Turks and Russians, and the rest of them; but *all that* seemed so *far off*, and the dead man *so near!*"

Cheese-Making.

A variety of circumstances, such as a distance from calving, breed, climate, food, &c., affect the quality as well as the quantity of milk; so that it is impossible to state what is its average composition. Henry and Chevallier found in the first milk or beistings, 15 per cent. of casein or curd, and only 2 1-2 per cent. of butter. The same chemists give, as the composition of ordinary cows' milk, casein or curd 4.48 per cent. butter 3.13, milk sugar 4.77, saline matter 0.60, water 87.02. The average of five determinations made by Boussingault with milk from a French cow, fed each week on different food for five weeks, was: Casein 3.24 per cent., butter 4.06, sugar 5.38, salts 0.19 water 87.13. The average of four determinations of milk from a Swiss cow, fed each week on different food for four weeks, was: Casein 3.75 per cent., butter 3.75, sugar 4.75, salts 0.28, water 97.47. The average of nine analyses of the milk of a Short-horn cow, made by Dr. Playfair, for the purpose of ascertaining how far the quality of milk was affected by different foods, was: Casein 4.17 per cent., butter 5.00, sugar 4.12, salts 0.54, water 86.17. We do not give the results obtained from the different foods, because from the short period the cows were kept on any one food we do not deem them trustworthy indications of the milk, butter and cheese capacities of the several articles of food used. But we may take the results as indicating, to some extent, the average composition of milk.

In studying the principles of cheese making, it is especially desirable to possess a clear conception of the nature of the sugar of milk and its transformation into lactic acid, &c. Every cheese-maker should make some of this sugar of milk, and study its characteristics. It may readily be obtained by taking a quart or two of sweet whey and heating it slightly, adding at the same time some white of egg. This will precipitate the curd and butter, which must be removed by filtering through a fine cloth. The whey will then be clear and free from all impurities. If it is now poured into an earthern vessel and placed in a cool place, in a few days small crystals will settle on the sides and bottom of the vessel. These are sugar of milk. The Swiss shepherds obtain large quantities of this sugar from milk, and it forms in their country quite an article of commerce. If pure, either dry or in solution, it undergoes no change; but if a small quantity of curd or rennet be added, a chemical action ensues, and the sugar is converted into lactic acid. The same acid is produced by the fermentation of brewers' grains, cabbage (sauer kraut,) and a number of other familiar instances. If the fermentation be allowed to proceed, carbonic acid is given off, and alcohol is formed precisely as in the production of wine, whisky, beer, and all intoxicating liquors.

Casein, or curd, is insoluble in water, but readily soluble in water containing an alkali. When milk is drawn from the cow, it has a slightly alkaline reaction. This is owing to the presence of free soda, which holds the curd in solution. If a little muriatic or acetic acid (vinegar) be added to milk, it instantaneously coagulates. The cause of this is readily perceived. The curd is held in solution by free soda, and on the addition of an acid, the soda is neutralized, and the curd, being insoluble in water, destitute of free alkali, is instantly precipitated or coagulated. When fresh milk is kept at a warm temperature, it gradually loses its alkaline character, and in time coagulates and becomes sour. The change which takes place is simply this: The sugar of milk, by the action of the curd, is transformed into lactic acid. This acid unites with the soda, forming a neutral salt—lactate of soda. The milk or whey being thus deprived of its soda, no longer possesses the power of holding the curd in solution, and so it coagulates, or, in other words, the curd is precipitated.

Two drops of lactic acid will instantaneously coagulate a quarter of a pint of boiling milk, though a much larger quantity added to cold milk produces no change. Thus, when milk is kept for several days at a low temperature, it frequently has a sour taste, but does not coagulate. If, however, the temperature be raised, the curd is immediately precipitated. So, too, milk often appears sweet and clear till poured into hot tea or coffee, when it immediately curdles. It is impossible to have milk too hot for coagulation, when the acid is to be added extraneously, or is already formed in the milk; but no sugar is converted into lactic acid, if the milk is kept at from 150 deg. to the boiling point, and it proceeds very slowly at 60 deg., and, it is believed, not at all from 40 deg. to the freezing point. Freezing or boiling the milk, checks for a time the transforming power of the casein, but it does not destroy it, as is the case with brewer's yeast and many other ferments, for when afterwards brought to the proper temperature, and kept for some time, the milk coagulates.

A Love of a Shawl.

We were in the Crystal Palace last week; and as we passed one of the glass cases in the south-west corner of the lower floor, we were attracted by the earnest exclamation of a lady—apparently an English one—saying to her companion:

"What a love of a shawl."

To her it was so, no doubt; yet we might have looked at it, or rather toward it, a dozen times, without noticing its beauty.

The lady's companion was a fine-looking, dark-skinned gentleman, with a very black mustache and black hair covered with a red cap.

He was a Turkish merchant from Constantinople. Our curiosity was awake now. We had heard of the shawls of Thibet, made by years of patient hand-labor, in the families of princes or the nobility, and that their value was often counted, like gold or diamonds, by weight and fineness, to the amount of thousands of dollars, but we had never seen one of the articles.

"How much," said the lady, "is it worth?"

The Turk gave an uneasy shrug of the shoulders, and a very dissatisfied curl of the lip, before he answered.

"I am told, Madam, that a thing in this country has no regular commercial value—that it is worth what it will fetch. I cannot tell what this is worth. I know its cost."

"How much?"

"Two thousand seven hundred dollars."

It certainly was a love of a shawl. We put on our spectacles, but the view through the glass case was unsatisfactory. Fortunately just then our friend Brevoort, Custom-House Officer at the Palace, came up where we were standing wrapt in—not the shawl—astonishment at what we saw and heard. The lady and the Turk walked away to look at four other shawls of the same character, but not quite so costly. We addressed the officer.

"Mr. Brevoort, is this shawl in bond?" "It is." "What is it invoiced at for duty?"

"Let me see—this is the fine one—$2,700. Would you like to look at it closer? It is a perfect gem."

He unlocked the case, and we actually handled a shawl more valuable than some good farms; more costly than some pretty good country stores well filled with "dry goods and groceries."

This shawl is of the finest fabric and needle-work, known as "India Cashmere," and was made in Thibet by the patient industry of one of the most celebrated artists of India, Hadji Mehemed Hassan, for a prince of the royal blood. Shawls of this class are never made in manufactories, but in private families, generally in the houses of the nobility, for their own use, and are only procurable by special favor, as some favorite piece of needle-work, made under similar circumstances, would be in this country.

Mr. Brevoort assured us that nothing has ever been seen in this country before that was even an approach to this in texture and general excellence of perfect workmanship. A part of the work in the corners tells its history in Turkish characters—that is, the name of the prince for whom it was designed, and when and where made. Its size is over one and a half by three yards within the border. Its value, as the owner said, is what it will fetch. We hope, instead of sending it back to Constantinople, as he intends, after the close of the exhibition, that he will prove that value by offering it to the ladies of New York at auction. We think we can assure him a thousand dollars "on speculation" for the first bid. Certainly, in a city where opera tickets sell for two hundred and fifty dollars apiece, such a shawl as this will find a purchaser at half price.

The other shawls are very beautiful, though valued at only about half as much as the "the jewel of Persia." They have been but but a short time in the exhibition, and perhaps have never been seen by a dozen ladies of the city, who are able to wear such costly articles.

These shawls are owned by V. Chiragy, the Turkish Commissioner to the World's Fair. They were found in a state of progress, during his travels in Thtbet, and engaged to be forwarded to him here for the purpose of exhibition as soon as completed, and have only lately arrived. [Tribune.

The Imperial Canal of China.—One of the most extraordinary works of art in the world is the Imperial Canal of China. This wonderful structure, which was built by the Mogul Emperor, Kublai Khan, extends from the vicinity of Pekin, at which city the Emperor fixed the seat of Government, to the Yang-tse Kiang river, a distance of more than six hundred miles to the southward. The canal is in some places tunneled through heights, and at others it is carried through lakes, and over marshes and low grounds, by means of stupendous embankments. Rivers feed it, and goodly ships sail on its waters. It is used not only as a great commercial highway, but as an irrigater and drain to the country through which it flows, and renders available much land which would otherwise be useless. The canal exhibits sound practical skill, and even genius, on the part of its constructors, and as a work of labor it is gigantic. It is one of the greatest of those great works which are to be met with in China on a larger scale than in any other country in the world.

From the Independent Democrat.

My Grandmother's Loom.

BY AUGUSTA M. CLAPP.

In my father's cot, on the verdant hill,
  In a quiet and lonely room,
Where the sun looks in at the window small,
  And at night the cold, sad moon,
There stands upright, and in dust arrayed,
  My Grandmother's ancient loom.

I have silent stood by its side alone,
  And watered the lathe with tears;
It carries me back, and I'm small again,
  And know not sorrowing fears;
I hurry over the wooded way,
  I run in my childish years.

That road led up to a yellow cot,
  With an apple tree before;
A musical bee-house 'neath its shade,
  With a pure and abundant store,
And Grandfather gazed with dim blue eyes,
  From the close and narrow door.

When I came with a song through the alder trees,
  That trembled in summer air,
My Grandmother came, with her cap blown back
  From her forehead and silvery hair,
To warmly welcome her grandchild then,
  To kiss me and meet me there.

In my childish fear, and with folded hands,
  I've trembling and silently stood,
By the bending form, and silvery head
  Bowed over his simple food,
And heard my Grandfather blessings ask
  Of the Maker and Father of Good.

But when by the ancient, worn hand-loom,
  No longer I stood aloof;
The happiest moments of childhood's morn
  Were under that humble roof,
In viewing my Grandmother, sad and calm,
  At work on the warp and woof.

Full many a day she diligent sat,
  And quietly wove alone;
And the treddles under her weary feet,
  Grew thinly fragile and worn,
And under the slide of her withered hand
  The lathe like a mirror shone.

I know you smile at my memories sad,
  And my words of love sincere;
You laugh with scorn, when over my cheek
  There trembles a bright sad tear;
But I say unto you, more than costly gem
  Is her ancient hand-loom dear.

She never could boast of high descent,
  Or of gentle, or noble blood;
But it matters not, her soul was high,
  As any earthly sod;
For she sought no other happiness here,
  Save in the commands of God.

Stick to some one Pursuit.

There cannot be a greater error than to be frequently changing one's business. If any man will look around and notice who have got rich and who have not, out of those he started in life with, he will find that the successful have generally stuck to some one pursuit.

Two lawyers, for instance, begin to practice at the same time. One devotes his whole mind to his profession, lays in slowly a stock of legal learning, and waits patiently, it may be for years, till he gains an opportunity to show his superiority. The other, tiring of such slow work, dashes into politics. Generally, at the end of twenty years, the latter will not be worth a penny, while the former will have a handsome practice, and count his tens of thousands in bank stock or mortgages.

Two clerks attain the majority simultaneously. One remains with his former employers, or at least in the same line of trade, at first on a small salary, then on a larger, until finally, if he is meritorious, he is taken into partnership. The other thinks it beneath him to fill a subordinate position, now that he has become a man, and accordingly starts in some other business on his own account, or undertakes a new firm in the old line of trade. Where does he end? Often in insolvency, rarely in riches. To this every merchant can testify.

A young man is bred a mechanic. He acquires a distate for his trade, however, thinks it a tedious way to get ahead, and sets out for the West and California. But, in most cases, the same restless, discontended, and speculative spirit, which carried him away at first, renders continuous application at any one place irksome to him; and so he goes wandering about the world, a sort of semi-civilized Arab, really a vagrant in character, and sure to die insolvent. Meantime his fellow apprentice, who has staid at home, practicing economy, and working steadily at his trade, has grown comfortable in his circumstances, and is even perhaps a citizen of mark.

There are men of ability, in every walk of life, who are notorious for never getting along. Usually it is because they never stick to any one business. Just when they have mastered one pursuit, and are on the point of making money, they change it for another, which they do not understand; and in a little while, what little they were worth is lost forever. We know scores of such persons. Go where you will, you will generally find that the men who have failed in life are those who have never stuck to one thing long.

[Philadelphia Ledger.

To Choose a Good Milk Cow.

Select from a good breed. We prefer the Devons—bright bay red. The Durhams are roan, red, white and mixtures of these colors. Ayrshire cows are generally red and white spotted. Herefords, red or darker colored, with white faces. Alderneys, pale red and mixed with white. These are the principal colors of the several breeds, of which the Durhams are the largest and Alderneys the smallest. Different inviduals will contend for each breed being the best and only one that should be selected for their milking qualities. But animals of each breed, and of crosses of them, often prove remarkable milkers, and so do some of the native stock of the country. Two families of cows, one owned by Col. Jaques of Ten Hills Farm, near Charlestown, Mass., and one owned by Maj. John Jones of Wheatland Farm, near Middletown, Delaware, were called native breed.

If we were about selecting a milk cow, we would endeavor to get one out of such a herd of good milkers; one with a soft, velvety feeling skin, slim neck, fine legs, broad stern, with what is called a large escutcheon, that is, the hair of the stern pointing inward; a large udder, slim teats, and large veins, commonly called milk veins, on the belly. Above all things, select your cow of a gentle, pleasant countenance, because a first rate milker may be so vicious as to be worthless. Do not look for flesh, as the best cows are seldom fat; their hip bones are often very prominent, and they have the appearance of being low in flesh. A beefy cow is seldom a good milker.

The next thing is, what is a good milker? That is, how much milk must she yield per day? A cow that will average five quarts of milk a day through the year, making 1,825 quarts, is an extraordinary good cow. One that will yield five quarts a day for ten months is a good cow, and one that will average four quarts during that time is more than average quality. That would make 1,200 quarts a year, which, at three cents a quart, is $36. We believe the Orange County milk dairies average $40 per cow, and the quality of the cows is considerably above the average of the country.

It is as important to keep a cow good as it is to get her good. This can never be done by a careless, lazy milker. Always milk your cow quick and perfectly clean, and never try to counteract nature by taking away her calf. Let it suck, and don't be afraid "it will butt her to death." It will distend the udder, and make room for the secretion of milk. Be gentle with your cow, and you will have a gentle cow. Select well, feed well, house well, milk well, and your cow will yield well. [Tribune.

Agricultural Statistics.

How very humiliating it is to every American farmer, to know that the British government, at the request of the farmers of England, have appropriated, in addition to the usual appropriation for census statistics, &c., the sum of £13,000 for the obtaining of Agricultural Statistics, more than $60,000 of our currency, and at the same time to know, that our government, to whom agriculture is much more important than to England, as our products are many times as great, have made no separate appropriation for this branch of statistics.

How much longer will our farmers rest quiet under this insulting neglect on the part of our Congress? Here we are, almost the only great nation in the world which is not engaged in war, with the power to produce any amount of supplies of the non-perishable grains for the European market, and without the means of knowing the number of acres appropriated to such use, in our own country; while the cotton planter, the merchant, the sugar grower, are all informed accurately as to the product, probable supply and demand, on which to found the basis of their year's business, the farmer alone is compelled to *guess* at probable requirements for his crops.

This state of things cannot long exist. It is either true or false, that the agriculture of the United States is its most important interest; and if true, the spirit of enterprise that actuates all other classes of the community, must find its way among the farmers, and they will demand such government action as will meet requirements.

Our best interests are tossed about as if they were soap bubbles, by our legislators, while points of policy of comparatively little value are trumpeted forth as the exciting topics of the day.

Let every township have its Farmers' Club, and let every farmer feel it a moral duty to attend it; let every State Society receive the reports of these clubs, and publish them for the benefit of the whole; and at an early day the farmers, through town, county, and State societies, will have an organization that can make itself felt even in the marble halls of Washington.

An Indian Ceremony.

Among the many curious ceremonies characteristic of the California Indians, one of the most interesting and imposing is said to be the "Feast of Gypsum,"—which celebrates the introduction of boys to manhood. On the occasion of this ceremony, due notice of the feast having been given, and invitations extended to neighboring friendly villages, all the youths who have attained the requisite age are confined within the dwelling of some chief, and obliged to swallow a decoction of gypsum or stramoum, sufficiently strong to destroy all power of muscular action and sensibility for an entire night. The female choir of the village then assemble around the tent, decorated in their gayest dress, and surrounded by a body guard of old men, one of whom acts as director of the proceedings. The young men and invited guests enter the ring, divested of the greater part of their clothing, profusely ornamented with feathers, and covered with alternate stripes of black and white paint. The director then makes a short speech and commences dancing. The entire choir burst out into a song by no means unmusical, and all the men within the ring proceed to follow the example of their director in a series of steps which set at defiance all conventional rules for the poetry of motion. At the close of the song the old men puff from their mouths a volume of wind towards heaven, and with a loud howl the dancers retire to recover breath.

Three nights are spent in this manner, with the exception that after the first night the youths, who have recovered from their stupor, are allowed to participate in the dancing. On the day after their recovery from the effects of the medicine—which effects are said to resemble somewhat the delightful sensations produced by the haschish of the Arabs—they are presented with water and paint, and after having performed their ablutions and painted themselves, are led into the field and taught the mysteries of planting and harvesting—also how to construct the various kinds of lodges, and how to ensnare the different species of game used by them for food. They are also daily lectured upon the "arts" of war and deception. This instruction continues for three days, at which time they are inducted into a new and higher style of dance. On the third day they are lectured upon religion, the creation of the earth, and the history of the human race, and are then dismissed to the liberties of manhood.

How to make Crayons.

Every school-room has, or should have, blackboards. On these, chalk is almost universally employed. There are many objections to the use of chalk, not the least of which is, that after a problem is performed, the finger and clothing present a "dirty white" appearance. Crayons are far preferable. Could they be generally employed, it would be a favor done to some delicate hands, to say nothing of a large amount of wearing apparel.

White crayons may be made of Paris white, or Spanish white, which is nearly the same, and wheaten flour and water. The correct proportions are five pounds of Paris white, one pound of flour, and sufficient water to make a dough of these materials, hard enough not to crumble, and soft enough to roll. Little balls of this are then rolled out into cylinders about the size of a pipe-stem, and laid away in a warm place, or in the sun, to dry; the drying will generally require from twelve to twenty-four hours.

The process of rolling may be performed upon a table, or any flat board. This process will be expedited somewhat, and the crayons be of a more equal size, if a rolling board be employed; which is simply a strip of board, say a foot in length, and eight or ten inches in width, with a handle on the top, and with the edges upraised about a third of an inch in thickness on the side of the lower surface, on which it may slide back and forth, as the crayons are rolled. With an apparatus simple as this, crayons may be made with great rapidity and cheapness. Every school contains some lad possessing skill enough to manufacture them with ease. The expense is trifling, scarcely greater than that of chalk, while it is far superior.

[Massachusetts Teacher.

Thirst in the Arctic Regions.

The use of snow when persons are thirsty does not by any means allay the insatiable desire for water; on the contrary, it appears to be increased in proportion to the quantity used, and the frequency with which it is put into the mouth. For example, a person walking along feels intensely thirsty, and he looks to his feet with coveting eyes; but his good sense and firm resolution are not to be overcome so easily, and he withdraws the open hand that was to grasp the delicious morsel and convey it into his parching mouth. He has several miles of a journey to accomplish, and his thirst is every moment increasing; he is perspiring profusely, and feels quite hot and oppressed. At length his good resolutions stagger, and he partakes of the smallest particle, which produces a most exhilarating effect; in less than ten minutes he tastes again and again, always increasing the quantity; and in half an hour he has a gum stick of condensed snow, which he masticates with avidity, and replaces with assiduity the moment that it is melted away. But his thirst is not allayed in the slightest degree; he is as hot as ever, and still perspires; his mouth is in flames, and he is driven to the necessity of quenching them with snow, which adds fuel to the fire. The melting snow ceases to please the palate, and it feels like red-hot coals, which, like a fire-eater, he sifts about with his tongue, and swallows without the addition to saliva. He is in despair; but habit has taken the place of his reasoning faculties, and he moves on with languid steps, lamenting the severe fate which forces him to persist in a practice which in an unguarded moment he allowed to begin. I believe the true cause of such intense thirst is the extreme dryness of the air when the temperature is low. [Sutherland's Jour.

The Philosophy of Rain.

To understand the philosophy of this beautiful and often sublime phenomenon, so often witnessed since the creation of the world, and so essential to the very existence of plants and animals, a few facts, derived from observation, and a long train of experiments, must be remembered:

1. Were the atmosphere everywhere at all times of a uniform temperature, we should never have rain, or hail, or snow. The water absorbed by it in evaporation from the sea and the earth's surface would descend in an imperceptible vapor, or cease to be absorbed by the air when it was once fully saturated.

2. The absorbing power of the atmosphere, and consequently its capacity to retain humidity, is proportionally greater in warm than cold air.

3. The air near the surface of the earth is warmer than it is in the region of the clouds. The higher we ascend from the earth, the colder do we find the atmospheve. Hence the perpetual snow on very high mountains in the hottest climate.

Now, when, from continued evaporation, the air is highly saturated with vapor, though it be invisible, and the sky cloudless, if its temperature is suddenly reduced, by cold currents descending from above, or by the motion of a saturated air to a colder latitude, its capacity to retain moisture is diminished, clouds are formed, and the result is rain. Air condenses as it cools, and, like a sponge filled with water and compressed, pours out the water which its diminished capacity cannot hold. How singular, yet how simple, the philosophy of rain? What but Omniscience could have devised such an admirable arrangement for watering the earth?

Productive Farming.

In a treatise on "Productive Farming," just issued from the press, the following observations occur:—

It is in vegetable as in animal life; a mother crams her child exclusively with arrow-root—it becomes fat, it is true, but, alas, it is rickety, and gets its teeth very slowly, and with difficulty. Mamma is ignorant, or never thinks, that her offspring cannot make bone—or what is the same thing, phosphate of lime, the principal bulk of bone—out of starch. It does its best; and were it not for a little milk and bread, perhaps now and then a little meal and soup, it would have no bones and teeth at all. Farmers keep poultry; and what is true of fowls is true of a cabbage, a turnip, or an ear of wheat. If you mix with the food of fowls a sufficient quantity of egg shells or chalk, which they eat greedily, they will lay many more eggs than before. A well-fed fowl is disposed to lay a vast number of eggs, but cannot do so without materials for the shell, however nourishing in other respects her food may be. A fowl, with the best will in the world, not finding any lime in the soil, nor mortar from walls, nor calcareous matter in her food, is incapacitated from laying any eggs at all. Let farmers lay such facts as these, which are matters of common observation, to heart, and transfer the analogy, as they may do, to the habits of plants, which are as truly alive, and answer as closely to every injudicious treatment, as their own horse."

Argument for the Bow and Arrow.—Bows and arrows, Franklin said, were good weapons, and not wisely laid aside—first, because a man may shoot as truly with a bow as with a common musket; secondly, because he can discharge four arrows in the time of charging and discharging one bullet; thirdly, because his object is not obscured from his view by the smoke of his own comrades; fourthly, because a flight of arrows seen coming upon them terrifies and disturbs the enemy's attention to his business; fifthly, because an arrow sticking in any part of a man disables him until it is extracted; and sixthly, because bows and arrows are more easily provided every where than muskets and ammunition. 30,000 Frenchmen fell at Cresy, mostly pierced by the arrows and bolts of the English and of their Genoese auxiliaries. [Dickens' Household Words.

It is said that the receipts of the New Haven and New London Railroad this season are 45 per cent. in advance of last.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commmencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. *Old Bells* taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N.Y.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Election Notice.

STATE OF NEW YORK—Secretary's Office, Albany, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

Sheriff's Office, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

The Sabbath Recorder.
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society,
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

Rates of Advertising.

For a square of 16 lines or less—one insertion, $0 75
" " " each subsequent insertion, 50
" " " six months, 6 00
" " " one year, 10 00

For each additional square, two-thirds the above rate.

GEOLOGY AND THE BIBLE.

Does the Mosaic Account fix the Antiquity of the Earth?

Since science and revelation treat of the same subjects only *incidentally*, we ought only to expect that the facts of science, *rightly understood*, should not contradict the statements of revelation, *correctly interpreted*. If it be urged, that scientific men often put forth contradictory hypotheses, and therefore are to be regarded with distrust, it may be urged with equal truth, that theologians often put forth contradictory *interpretations* of the revealed Word, and hence, by parity of reasoning, their interpretations are to be regarded with distrust. The danger is not all on one side, and I am sure that revelation has been subject to as many false interpretations as nature has.

When science affirms that the sun is stationary with respect to the earth, it affirms what the Bible does not deny, although it represents the sun as rising and setting, and the earth as immovable. In this the inspired writer accommodates his language to the common notion respecting the celestial phenomena to which he incidentally alludes. If he had used the strict language of science, he would have defeated his own object, since he could not have been understood. Science had not yet announced the fact that the motion of the sun is only *apparent*, while the *real* motion is that of the earth.

When science affirms, that the earth is more than six thousand years old, it affirms what the Bible does not deny. When it incidentally refers to the facts of geology, it uses language adapted to the common understanding of those to whom it was addressed, as in the case of astronomy. Such a use of language is not to stand in the way of human progress, because it *appears* to contradict the well-established truths of science. It does not *in truth* contradict them. The *great event* of the Adamic creation was the introduction of man upon the earth; hence the narrative all clusters around this event, and centers in it. By a series of stupendous miracles, the earth was fitted for its new tenant, while the heavenly orbs were appointed rulers of day and night. This fitting up of the earth, and peopling it with its present races of animals, with man at their head, and the subsequent instituting of the Sabbath, is the theme of the first chapter of the Mosaic account. Introductory to so sublime a narrative, it was fitting to announce, that "in the beginning God created the heavens and the earth." My full conviction is, that the verse just quoted was placed by the hand of Inspiration at the opening of the Bible, as a distinct and independent sentence—that it was the Divine intention to affirm by it, that the material universe was primarily originated by God out of nothing—and that this originating act was quite distinct from the acts included in the six natural days of the Adamic creation; and further, that a long period intervened between this originating act and the act of the first of the six days work subsequently described. Now, since the inspired record neither affirms the brevity nor denies the length of this interval, we are at full liberty to predicate our conclusions on such data as we may find elsewhere. But I am not quite sure but that this view may be sustained by considerations connected with the sacred record itself, independent of the teachings of science. I am at least sure, that many leaders of the church, eminent for learning and piety, have adopted this view, long before geology was developed as a science, or claimed to affirm anything on the subject. Among the most ancient of these, I may mention Gregory Nazianzen, Justin Martyr, Basil, Caesarius, Origen, Augustine, Theodoret, Episcopius, and others. In more modern times, but prior to the discoveries of geology, this same view has been maintained by such judicious and learned men as Calvin, Bishop Patrick, and Dr. David Jennings. Now this view of the subject was arrived at by these learned divines, independently of all geological considerations, and in the entire absence of evidence from this quarter. This interpretation was made on biblical grounds alone. This view, then, is not chargeable to geology alone, but, happily, geology illustrates and confirms it.

Now, let us see if this view is entirely groundless, when referred to scripture testimony alone. Certainly, the above-named commentators must have found some evidence of their belief in the sacred record. No one, certainly, will claim that the phrase, "*in the beginning*," fixes the *date* of the creating fiat, for nothing could be more indefinite as to time when. Nor will any one versed in biblical lore attribute any importance to the fact that the conjunction *and* connects the first three verses of the account. They do not therefore identify the event of the first with that of the second and third verses. This word rendered *and* in our text, (Hebrew, *vau*) has great latitude of meaning, and is often translated *but*, as in the next chapter, verse 17. It is the opinion of the most able philologists, that it should be thus rendered at the beginning of the second verse of the first chapter of Genesis. Hence the elder Rosenmuller translates it thus, in connection with the first verse: "In the beginning God created the heavens and the earth; afterwards the earth was desolate," &c. So, also, Dathe, a cautious and judicious critic: "In the beginning God created the heavens and the earth; but afterwards the earth was waste and desolate." If such translations be true—and no good linguist denies their truthfulness—the second verse not only allows, but affirms, that a period intervened between the first act of creation and the first of the six days' work. It is also found, that in some old editions of the English Bible, in which the chapters are not divided into verses, a break occurs at the end of what is now the second verse, and a figure (1) at the beginning of the third verse, denoting that what precedes the third verse is independent of it. It is also to be observed, that with the creating process of the third day, a new formula of expression is adopted, showing its non-identity with the originating act. From such considerations, connected solely with the text itself, such learned fathers of the church as I have referred to, have concluded that the Mosaic account does not fix the antiquity of the earth, and that a period of time elapsed between the first creating fiat, and the first day.

Now, when the light of science is let in upon this interpretation, its truthfulness assumes a certainty, too clear for reasonable doubt.

It will be sufficient to present some of the leading points of evidence which geology affords of the great antiquity of the earth, although, to the student of geology, these evidences present themselves at every stroke of the hammer. To those unacquainted with geological science, these evidences may not appear, and on being presented may not be appreciated, and of course such persons will be cautious of their affirmations.

The first important conclusion at which every careful observer will arrive, is, that the rocks of all sorts which compose the crust of the earth, called stratified rocks, are the result of second causes; in other words, they are not now in the condition in which they were originally created. Some have been melted, and reconsolidated and crowded in between others, or spread over them. Others have been worn into mud, sand, and gravel, by atmospheric and aqueous agencies, and again consolidated, enveloping myriads of animals and plants, which now lie embedded in all states, from the animal or plant scarcely changed at all, to the perfect petrifaction, lying at all depths, from the surface to the bottom of the fossiliferous rocks, a distance of not less than seven miles. Thus it appears, that chemical and mechanical agencies have been at work to bring rocks into their present state, and that an immense period has been required to produce the effects we behold. The stratified rocks extend some three miles below the point at which fossils disappear, thus making a depth of about ten miles of rocks which appear to have been formed by particles worn from the unstratified, by the action of air and water, and conveyed into oceans and lakes, and there deposited, as the same process is now going on. The animals and plants which died in the waters sunk and were embedded in the mud; next, this deposit was hardened into stone, and finally raised out of the water, so as to become dry land. This process of forming rocks is very slow, so that the accumulations at the present time do not exceed a few inches in a century. That this process has been thus slow through all past time, (as the general rule,) is shown by the perfect state of preservation in which the remains of plants and animals are found in most of the formations, and the even and regular manner in which the beds are laid down. Now, when we consider that rocks ten miles in thickness have been thus deposited, who will say that six thousand years is adequate for the work? During the six thousand years which have elapsed since man came upon the earth, not more than one or two hundred feet of earth has thus accumulated, as is clearly shown by the fact that neither the works nor the remains of man are found at a greater depth than that. Below the upper part of the superficial deposit, called alluvium, not one vestige of man's existence has been found. But if man had lived while the deposits below this were being formed, no possible reason can be given why his bones, and the fruit of his labor, should not be found, along with those of other animals, which are so abundant in the rocks below, to the depth of seven miles.

In the second place, during the deposition of these stratified rocks, hundreds of changes occurred in the materials of which they were composed, all of which implied great changes in the water by which they were deposited—such changes, indeed, as must have required different oceans over the same spot. Such events could not occur except by alternate elevations and subsidences of large portions of the earth's crust, nor could these have happened without vast periods of intervening time. That like changes are now taking place, is known to every one at all acquainted with the facts of physical geography. Continents are being laid bare by the retreating ocean, while others are being submerged by the slow approaching element. Most of our vast continents give indubitable evidence of having once been for a long time under the waters of the ocean.

In the third place, numerous races of plants and animals must have occupied the globe, and successively passed away, previous to the present race. Not less than thirty thousand different species of fossil animals and plants have been dug from the earth, of which none, except a few hundred species, mostly of sea shells, in the uppermost rock, correspond with the species now living on the earth. So differently are these different groups of animals constituted, that they could not have been contemporaneous inhabitants of the earth. They must, therefore, have existed and passed away before the creation of the present races. But each of these groups, of which there is not less than ten or twelve, lived on the earth long enough for immense deposits of their remains to accumulate, which sometimes constitute entire mountains. Now, can any reasonable man, acquainted with these well-established facts of science, believe that all these changes have taken place during the six thousand years of man's existence on the earth? If he can believe it, then he is bound to show why the remains of these different groups of animals and plants do not occur in the alluvium, along with those of man and the present races of plants and animals, and that the causes which produced such changes must have operated ten thousand fold more actively at some time since the Adamic creation than similar causes now operate. The difficulty of such a task is insurmountable. But, admit a long period between the "beginning," when God created matter, and the first day, when he began to fit up the earth for man's habitation, and the difficulty all vanishes.

Passing over the other and not less striking evidences of the earth's antiquity, to be found in the stratified rock, I remark, finally, that the unstratified rocks out of which the stratified were formed, give evidence of having passed through numerous changes, effected by the agency of heat, prior to the erosions of their surface by the air and water changes, too, which vast ages alone would be adequate to produce.

Now, with such facts as these before us, can it appear strange, that every man who has candidly and understandingly examined the rocks of the earth's surface, should believe in the antiquity of the earth's origin? It were folly in him to believe otherwise, especially since revelation, rightly interpreted, opposes no obstacles to the belief. To disbelieve it, were to repudiate all the laws of evidence by which men ever arrive at conclusions in science or religion. When one meets a man with bent and wrinkled form, silver locks, trembling hand, faltering voice, and dimmed vision, he feels no hesitancy in affirming that he has met an old man—for the *effects of age* are upon *him*—and there is no *counter evidence*. When the naturalist meets the earth all covered with evidences of age, it is not infidelity to call it old.

A celebrated American divine truly observes, concerning this view of the question, that "this interpretation of Genesis is entirely sufficient to remove all apparent collision between geology and revelation. It gives the geologist full scope for his largest speculations concerning the age of the world. It permits him to maintain, that its first condition was as unlike the present as possible, and allows him time enough for all the changes of mineral constitution and organic life, which its strata reveal. It supposes that all these are passed over in silence, by the sacred writers, because irrelevant to the object of revelation, but full of interest and instruction to men of science, who should afterwards take pleasure in exploring the works of God." It supposes the six days work of creation to have related only to the fitting up of the earth for its present inhabitants. Since such an opinion is proven by the unmistakable foot-prints of antiquity on the earth itself, and does not in the least infringe on the literalities of the Bible, it is not at all strange, that geologists universally, and eminent divines generally, should have adopted it. It will stand the test of the severest criticism; and although the Pope of Rome should thunder an annual bull of excommunication from the Vatican against *geologists*, as he now does against *astronomers*, the eternal truths of science will laugh at the puerile missile, and the Bible be redeemed from false interpretations, as well by the light of geology as by that of astronomy and chemistry.

I hazard nothing in predicting, that Dr. Chalmers, and Dr. John Pye Smith, and Hugh Miller, although they may have enunciated *some incorrect theories*, will hardly be classed with *infidels* and *traitors* and *atheists*, by men who know what infidelity and treason and atheism mean, and who know what these eminent men have done for the Bible and its religion. They are, and always have been, the *giant champions* of revelation and religion. Hugh Miller alone will inherit immortal fame, as the champion of science and religion, when his detractors shall pass from human memory. Infidelity and skepticism have already learned to tremble beneath his well-directed blows. "Honor to whom honor."

For the Sabbath Recorder.

LET THE HEART BE BEAUTIFUL.

The mind loves to linger upon scenes of beauty, and the heart forgets its sorrow in contemplating them. Nature has scattered with lavish hand everything that should please the eye, elevate the mind, or rejoice the heart. Art, too, has exerted her skill in imitations of nature, for the same purpose—the enjoyment of man, the noblest work of God—a being possessing faculties for appreciating and enjoying these beauties, capable of deep feeling and generous sympathy—aye, and more beautiful than either the animate or inanimate objects around him—beautiful in form, symmetry, gracefulness, and beautiful in heart, when possessing pure motives, noble principles, and a holy zeal for the right. We are attracted by the brilliant color and faultless form of a flower; and if it is fragrant, too, we value it highly. So we admire the beauty of the human form; but we are shocked by want of sense, or feeling—disgusted by selfishness; and when we find these combined with the most beautiful forms, are indeed saddened. On the other hand, a mind filled with glowing thoughts, a soul warm with sympathy, at once commands our love and respect. What though the individual may be homely in feature, or uncouth in appearance? If he but possess a noble heart, it is enough; he is beautiful. The beauty of form may fade, the eye lose its lustre, the cheek its bloom, but the beauty of the heart can never die. It matters not whether thy neighbor be rich or poor, whether his complexion be black or white, if he only cultivate the nobler part of his nature, and love virtue and truth. For beauty consists in goodness, and a beautiful form without it, is the most disagreeable thing in nature. Yes, let the *heart* be beautiful. Let us lose no opportunity of speaking gentle words, of doing generous deeds; for who can tell the effects they may produce? And let us strive to make ourselves better, to prepare for a heavenly home, where all hearts are beautiful.

M. J. L.

For the Sabbath Recorder.

"I HAVE NO TIME TO PRAY."

"No time to pray?"—no time to thank
The Giver of each good,
For every thing which you receive,
For life, and health, and food?

"No time to pray"—to Him who gave
His precious life for thee;
To purchase thy redemption,
And from sin to set thee free.

"No time to pray"—or ask His aid
To guide thy erring feet,
While in this world beset with cares,
To Jesus' mercy seat?

"No time to pray"—when blessed each day
With all that Heaven can give?
Remember, 'tis God's kindness
That enables thee to live.

"No time to pray?"—will this be heard
When in thy dying day
Thou shalt approach His sight who bids
All mortal beings "pray?"

No! then thy answer will not be,
"I had no time to pray;"
Thou'lt say, "Oh! spare me now, and I
To Thee henceforth will pray."

LIVES OF HOLY WOMEN.

ROSA GOVONA.

The following interesting life of Rosa Govona we take, with a few slight alterations, from Julia Kavanagh's "Women of Christianity:"—

On the Northern side of the Ligurian Apenines, in the basin formed by the Upper Panaro, extends the district of Mondovi, a province of the Sardinian States. Surrounded by a fertile tract of land, rich in corn, vines, mulberry trees, and cattle, rises the chief town, Mondovi. It is built partly on the bank of the Ellero, partly on a hill which rises above the river.

In this quiet place there lived, in the course of the last century, a young orphan girl of the name of Rosa Govona. She excelled in needle-work, her only means of support; she never cared for pleasure, and thought not of marriage; grave, mild, and silent, she lived alone, in the dignity of labor and the honor of womanhood.

Toward the year 1746, Rosa, being then in her thirtieth year, happened to meet a young girl, an orphan like herself, who was destitute, and without the means of earning a livelihood. The sight grieved her compassionate heart, and shocked her feminine delicacy. She took home the young stranger, and addressing her in language of Scriptural simplicity, "Here," said she, pointing to her humble dwelling, "here shalt thou abide with me; thou shalt sleep in my bed; thou shalt drink from my cup, and thou shalt live by the labor of thine own hands." This last clause, comprising independence and self-respect, was one of the most cherished points in the creed of Rosa. Pleased with the docility and industry of her young guest, she conceived the project of a female association, based on the principles of labor and mutual aid. Ere long, the young girl of Mondovi was surrounded by a society of young and unprotected single women, who dwelt beneath the same roof, and labored diligently for their livelihood.

So novel an establishment in Mondovi was at first warmly attacked, but the prudent silence of Rosa and her companions, and above all their blameless life, at length prevailed over calumny, and they were able to live and labor in peace. Nay more, the authorities of Mondovi at length offered Rosa, whose abode had now grown too narrow, a house in the plains of Carcassona. This she readily accepted, and was soon surrounded by seventy young girls. She obtained another and larger house in the plain of Brao; but extending her views with her means, Rosa no longer confined the labors of her friends to the common tasks of needle-work; the house of Brao became a real factory for the manufacture of woolen stuffs. Five years had now passed away since Rosa first took home the orphan girl. She might well have rested satisfied with what she had done; but consulting only her zeal and anxious wish of spreading the good effects of her system, she set off for Turin in the year 1755.

Rosa Govona entered the capital of Piedmont with no other protection than her own strong faith, and no higher accommodation than the two or three young girls who accompanied her. She simply explained her project, and asked for an asylum. The fathers of the oratory of St. Philip gave her a few rooms for the "love of God," and the military posts sent her litters and straw mattresses. Rosa and her companions were quite satisfied, and establishing themselves in their new abode, they cheerfully set to work.

The fact became known, and attracted attention. On the suggestion of his financial minister, Count of Gregory, Charles Emanuel III. assigned to Rosa and her companions huge buildings belonging to a religious brotherhood, recently suppressed. The house was soon filled with forsaken orphan girls. The king read and approved the judicious rules laid down by Rosa, and ordered the factories of the establishment to be organized and registered by the magistrates appointed to superintend commercial matters. From that time the Rosinas, as they were called in honor of their foundress, enjoyed the special protection of the Sardinian government.

Rosa Govona felt deeply grateful for the favor her plans had received from the king. Knowing that the most effectual mode of showing her gratitude would be to continue as she had begun, and to contribute to the commercial and moral prosperity of his dominions, she established in Turin two factories; one of cloth for the army, and another of the best silks and ribbons. Thanks to her three hundred women, without dowry, without any resource, save their own labor, they earned an honest and comfortable livelihood, and provided in youth for the wants of old age. Houses depending on that of Turin were established at Norazza, Fossano, Savigliano, Salusso, Chiéri, and St. Damian of Acti. Over the entrance of every house which she founded, Rosa caused to be engraved the words she had addressed to her first guest: "*Tu mangerai col lavora delle tue mani.*" "Thou shalt live by the labor of thine own hands."

Rosa devoted twenty-one years t[illegible]ask of going over the provinces of Pie[illegible]and founding asylums for the unprotected, and industrious poor of her sex; until, exhausted by her labors, she died at Turin. Her remains were deposited in the [illegible] which covers them may still be read the following epitaph: "Here lies Rosa Govona of Mondovi. From her youth she consecrated herself to God. For his glory she founded in her native place, and in other towns, retreats opened to forsaken young girls, so that they might serve God; she gave them excellent regulations, which attached them to piety and labor. During an administration of thirty years, she gave constant proofs of admirable charity, and of unshaken firmness. She entered on eternal life on the 28th day of February, of the year 1776, the sixtieth of her age. Grateful daughters have raised this monument to their mother and benefactress."

But little is told of Rosa Govona, personally; we know more what she did than what she was. She appears to us through her good works, thoughtful, and ever doing; a serious and beneficent apparition. A plain cap, a white kerchief, a cross in her bosom, and a brown robe, constituted the attire of the foundress of the Rosinas. One of her biographers calls her sister Rosa; but it does not appear that she took any vows, or sought to impose any on her community. The Rosinas are bound by no tie; they can leave their abode, and marry if they wish; but they rarely do so. There will always be a certain number of women whom circumstances or private inclination will cause to remain unmarried. Rosa Govona was one of these; and for them she labored. She wished to shut them from vice, idleness, and poverty; to present to them unsullied the noblest inheritance of human beings—dignity and self-respect.

According to an interesting account published in Paris a few years ago, the Rosinas are still in a prosperous and happy state; they are admitted from thirteen to twenty; they must be wholly destitute, healthy, active, and both able and willing to work. They are patronized by government, but labor is their only income; all work assiduously, save the old, who are supported by the younger companions.

The labors of the Rosinas are varied and complete; whatever they manufacture, they do with their own hands from beginning to end; they buy the cocoons in spring, and perform every one of the delicate operations which silk undergoes, before it is finally woven into gros-de-naples, levantines, and ribbons. Their silks are of the best quality, but plain, in order to avoid the expense and inconvenience of changing their looms with every caprice of fashion. They also fabricate linen; but only a limited number of Rosinas can undergo the fatigue of weaving; their profits are moderate but sufficient. The house in Turin alone spends eighty thousand francs a year; and it holds three hundred women, of whom fifty, who are either old or infirm, and consequently unable to work, are supported by the rest.

One woman, poor, obscure, and unlearned, but strong in her own faith, and, above all, in her love for her orphan sisters, accomplished this.

ACHIEVEMENTS OF MEMORY.

"Paschal knew the whole Bible by heart, and could at any moment cite chapter and verse of any part of it." [Harper's Mag.

An extraordinary attainment in any age! but it is at least more rare, in these days of many books and superficial reading. I remember one instance of it, in the case of a man, who, in the ordinary affairs of life, was regarded as approaching to "a natural," but who yet displayed not only the deepest feeling of religion, but an unusual acquaintance with the truths of revelation. He earned a scanty living for himself and an aged mother by weaving; a living which latterly was eked out to a frugal comfort, by the bounty of the late George Buchan, Esq., of Kelloe.

Jemmy was a punctual attendant on all great religious gatherings, and especially on sacramental occasions, throughout a circle of parishes in the Centre of Berwickshire, Scotland. Those preachers were especial favorites with him, whose discourses were abundantly enriched with scripture quotations; and these, as fast as the preacher uttered them, though without giving any reference, Jemmy would at once turn up with unfailing accuracy, in his well-thumbed Bible. He often tested his memory in conversation, and found that, without any apparent effort, he opened at the passage.

I have known one other instance of a similar attainment, by a person in very different circumstances, and of very different character. The late Ex-Consul Buchanan, during his residence at Niagara Falls, desired to express his high esteem for my friend, the Rev. W. W., then pastor of the Baptist Church at Drummondville, by presenting him with a Bible. He embraced the opportunity of the visit of Alexander Campbell, of Bethany College, Virginia, to invite Mr. W. to meet a few friends, and receive the intended token of friendship. Mr. Campbell presented it in the name of the Ex-Consul, and, in a brief address on the preciousness of the book, and the importance of an accurate study of it, stated that he had been led, in early life, to commit it to memory so perfectly, that he could repeat the whole of the New Testament verbatim; and, if I am not mistaken, could even repeat it backward, from the Revelation to Matthew. He stated, moreover, that he could repeat any verse of any chapter, in any order and at any time. Two military gentlemen, who were of the party, asked leave to test his power; and procuring each a copy of the Scriptures, gave, in rapid succession, references throughout the books of the New Testament, which Mr. C. cited without hesitation and with literal correctness. They varied the test occasionally, by reading a verse or part of a verse, and asking where it was to be found, which Mr. C. always answered with equal readiness. This attainment is the more remarkable, if we consider the life of active labor, and frequent controversy, the multiplied cares of pastoral and editorial charges, of a professorship, a farm, a publishing establishment, and a large family, amid

TOO BIG TO PRAY.

I tarried for the night with an old friend, who had always seemed indifferent on the subject of religion. His wife was pious, and endeavored to impress the minds of her children with proper views of God and eternity. Her little boy, of two or three years, when about to retire to rest, knelt down by his mother, and reverently repeatad a child's prayer. When he rose from his knees he turned to his father, with a seeming consciousness that he had performed a duty, and addressed him: "Father, I have said my prayers, have you said yours? or are you too big to pray?" I thought it was a question that would reach the father's heart, and it might yet be said of him, "Behold, he prayeth."

I have since noticed many, very many, who were too big to pray. I knew a young man, a college student, of brilliant talents and fascinating manners. Yet he would sometimes sneer at piety and pious men. He was considered a model by a certain class around him. In a revival meeting, the Spirit of God reached his heart. He saw his danger and resolved to reform. Then he thought of his companions who had witnessed his past life. They would say he was weak minded and fickle. He would lose their respect. He could not come down from his high position. He could not take up the cross through good and evil report, and his serious impressions passed away, perhaps forever. *He was too big to pray.*

I knew a man who had passed the middle age of life. His children had grown up around him, while he had been careless and unconcerned about their eternal welfare. A change came over him, and he felt that duty called on him to pray in his family. But how could he assume such a task before his household, which would be astonished at such a strange event. He shrank from the effort, and finally relaxed into his former position and indifference. *He was too big to pray.*

I knew a physician who held a high rank in his profession. The urbanity of his deportment, joined with an intelligent mind, made him a pleasant companion. But he was skeptical in the doctrines of the Bible. He witnessed the happy death of one who triumphed in the last trying hour, and his infidel opinions were shaken. "Almost, he was persuaded to become a Christian." But the pride of his heart was not subdued. He could not humble himself at the foot of the cross. *He was too big to pray.*

I knew a man of great learning and great worldly wisdom. He became a disciple of Christ, but he mistook the nature of prayer. Instead of praying in the "simplest form of speech," he often used "great swelling words," and lofty rounded periods. His prayers were not edifying. *He was too big to pray.*

How many thousands there are around us, who have been elevated to high places in our land, who would not dare to be seen upon their knees, supplicating the Majesty of Heaven. *They are too big to pray.*

[N. Y. Observer.

DON'T BE ANXIOUS ABOUT THE FUTURE.

1. Because all the future is in God's hands. An infinitely wise and good being is sovereign over all its events. Not one of them can escape his notice, or elude his control.

2. Because you have no right to put into one day what belongs to another. The future will have its own cares and anxieties—plenty of them, likely—and they will be along in due time. But they have no business among the cares and anxieties of the present time. You must not put them there.

3. Because it is ill-treatment of the best advice. Just read the following advice, and think who was the Adviser: "Wherefore, take no thought for the morrow, for the morrow shall take thought for the things of itself. Sufficient unto the day is the evil thereof."

4. Because it implies want of confidence in God. Has he not hitherto dealt with you? Could you have taken as good care of yourself as he has taken of you? If you can reflect on goodness, can you not anticipate goodness? Has not God laid a noble basis for confidence in all his faithfulness?

5. Because it will needlessly augment present trouble. Are you so well out of trouble now that you need some by way of variety? Or would you like more than you now have? Do you wish a new stroke of the lash on a place already sore? Go into fidgets, then, about the future, and you can get accommodated. But all this is a superfluous addition to present troubles. It makes all present burdens heavier, while Christ and reason bid you do no such thing.

6. Anxiety about the future can do you no possible good. It cannot better fit you to meet it; but contrariwise. It will not change anything that is appointed to overtake you.

Therefore, all these voices in your ears proclaim to you, that it is very poor business to tease and trouble your soul about what the future shall disclose. Do your duty, and trust in God—then, come what may, all will be well.

[Puritan Recorder.

THE LARGEST DIAMOND.—One of the largest diamonds now known in the world, has, within a few months, been deposited in the Bank of England for safe-keeping. Its value is estimated at one million three hundred thousand dollars. It was found in the mines of Brazil, South America, by a negro slave, who received his freedom as a reward. How many who read this will think of that pearl of infinitely greater value, yes, above *all* price, the finding of which releases us from the bondage and burdens of sin, and makes us heirs to a heavenly estate. This pearl is the forgiveness and favor of God through his dear Son Jesus Christ, who died to redeem us.

A NEW TRACT PROPOSED.

It was resolved by the Tract Society, at its late Anniversary, that the Board issue a Tract on the importance of obeying the dictates ligion." We like this resolution; but would like still better, if there were no necessity for such a publication. The resolution was adopted in view of the well-known fact, that multitudes who profess to be Christians are more ready to follow established custom, than to inquire what is the will of God. Not that they mean to disobey God, deliberately, but it is so pleasant to imagine that to be God's will, which the community have decided to be so, and which has received the sanction of thousands of good men in former times, that they give themselves no trouble to ask whether it has actually the sanction of the Bible, or not. "O, it *must* be sanctioned by the Bible, if *good* men have lived and died in the practice of it," say they; "so many good men cannot have been wrong. Would God have suffered them to continue so long in darkness? Can it be that they have all erred in their interpretation of the Scriptures?" In this, or in a similar manner, are all attempts to expound to them the way of God more perfectly met.

We hope that a good Tract will be prepared on this subject, for certainly it is needed. If the one who writes it would gird himself for the work by a season of fasting and prayer, and would pray earnestly over every page, and over every paragraph, so that it might be seen that the whole thing had been steeped in prayer, it would be all the better. A Tract thus prepared might be expected to produce much good fruit.

O, it is amazing, since life is so short—since the judgment is so near—since nothing but truth can stand in the great day of trial—since the soul was created for the truth, and can be blessed by nothing else—that men will concern themselves so little to know what it is, or when they know it, to give obedience to it. Certainly, there can be no error small enough to do one any good. Were it otherwise, then would that error cease to be an error, and would become a truth. Yet, from the time that the first lie entered into the world, men have been infatuated with the idea, that something worth the sacrifice would be gained by giving up more or less of the truth of God. Would that such infatuation affected only the irreligious portion of the world! But alas! the Church of Christ, that body which claims to be "the pillar and ground of the truth," groans under the evil.

This is the evil which keeps Christians asunder; which fences them off into different persuasions, and renders it impossible for them to coalesce. For there is no cementing power in error; none in anything else but the truth. And facts have abundantly proved, that whenever the experiment has been made of giving up a little truth—no matter how little—for the sake of effecting a closer alliance between different Christian sects, increased disunion has been the result. The first lie uttered to man was the seed of strife and alienation of hearts. Enmity was established between the serpent and the woman—between his seed and her seed—not so much because God arbitrarily ordered it so, as because that great lie necessarily made it so. Cain quarreled with Abel. At a later day, those who were of their father the devil quarreled with Christ. In both instances it was a conflict of error with truth. And at this day, whatever be the profession of men, it is certain that, in striving to uphold their errors, they quarrel with their Saviour, and perpetuate disunion among his followers. Christians will never be united—sectarianism will never cease—the church will never appear as one body, animated by one spirit, confessing "one Lord, one faith, one baptism," till its members learn to obey the dictates of truth and conscience in all matters of religion.

But it is not only in the sectarian aspect of this question that we feel interested. The proposed tract would be defective, if it did not read our own people, as well as those who differ from us, a solemn lesson. Why do not those Seventh-day Baptists who travel about from one place to another, obey truth and their well-enlightened conscience, by refusing to journey on Sabbath days? Why do not Seventh-day Baptist farmers obey truth and conscience, by refraining from cheese-making, and every other business, which violates the sacred rest? Why do not Seventh-day Baptist lumbermen obey truth and conscience, by withholding their hands from the labor of preparing for their shipments and sales on the Sabbath? Why do not Seventh-day Baptist merchants, and manufacturers, stand aloof from those partnerships, which involve themselves and others in the guilt of Sabbath-breaking? Why do not men of business among us, arrange to shut their shops, and reach home by the time that Sabbath commences on Sixth-day evening, instead of clipping an hour or two from this sacred season, every week? Have truth and conscience no voice in regard to such things? There is but one answer to all these questions. Self-interest, or pleasure, is at the bottom of these transgressions. Our own people—people who know God's will, and approve the things that are more excellent, being instructed out of the law—people who know what the Fourth Commandment means, when it says, "the seventh day is the Sabbath, in it thou shalt not do any work," are themselves breakers of the law, choosing to consult self-interest, and get rich, rather than to practice the obedience to truth and conscience, which they are so ready to inculcate to their First-day brethren. Let the Tract be written; we go for it, heart and soul. But it will do no good, till we learn to obey it ourselves. T. B. B.

BRITISH CORRESPONDENCE.

The telegraph intimates to-day the arrival of the Overland Mail. As regards China, the note is brief, but significant: "Great agitation prevails around Canton. The insurgents have taken some places in the neighborhood, and have killed the authorities." As the struggle manifestly approaches to a close, it becomes the more a matter both of interest and importance, how the conquerors shall guide the movement. In the knowledge that they sanctify God's Sabbath, while those to whom their leaders have been indebted for religious instruction on other points do not, we seem to see divine preservation from error, encouraging us to hope that they seek and find the guidance of a gracious Saviour. With thankfulness, therefore, do we learn from Brother Carpenter's communication in the *Sabbath Recorder* last received, that notwithstanding of Ta-ping-wang's invitation to Mr. Roberts, and the desire of the latter to accept it, he did not find his way to Nanking by the Susquehanna. From a letter dated Shanghae, June 25th, and therefore nearly a month later than that of Bro. C., we learn that "they received the American missionaries very scornfully, and bade them 'recognize the new revelation, and bring tribute to the Celestial King.'" We suppose Dr. Bridgman and Mr. Culbertson, who were on board the Susquehanna, to be the missionaries referred to; and with the knowledge of the fact that most of those who take interest in missions, have shown such aversion to the Chinese observing the real Sabbath rather than that which in Christendom has been allowed to usurp its place, we shall not be surprised to learn, that those missionaries had been endeavoring to induce the Chinese to forsake the old and only authentic revelation of God upon the subject, His own inspired word, and that the *scorn* spoken of was the expression of surprise that a *new* and unwritten tradition had been permitted to make that word void! It is stated, that the British steamers Rattler and Styx had also, and, as we suppose, more recently, visited Nanking, with Mr. L. Bowring, on a mission connected with Chinese revenue matters. Mr. Medhurst went, acting as Secretary, so that we may expect some further account of the present views and feelings of the chiefs on spiritual subjects, as well as on those which relate to revenue, to be given shortly. It may not be easy for the missionaries who observe the Sabbath of the Lord to obtain a personal interview with Ta-ping-wang; but we may be assured that by tracts means will be sought to encourage the heart and strengthen the hands of those who have inculcated upon their people a reverence for God's holy day. And if received as more faithful on this point, our brethren may yet be enabled to be serviceable in correcting other errors which Yang, the Eastern King, is more especially supposed to entertain. In none of the more recent accounts is anything said of Pekin, but 40,000 men had lately been sent north from Nanking to aid the army of the north, so that the fall of the capital may shortly be reported.

The family of the celebrated William Wilberforce have disappointed the Protestant expectation of his country. One of them has been for some time a member of the Church of Rome; the wife of another is so also; another, an archdeacon in the Church of England, has just sent in the resignation of his preferments to the Archbishop of York, by whom it was expected he was about to be taken to task for the unscriptural and Romish doctrine contained in a work published above a year ago on the Eucharist. The archdeacon indeed professes to resign on account of difficulties which he feels on the subject of the Queen's supremacy in spiritual things; but however just such a ground would have been for renouncing connection with the establishment, and known as it is, that a number of years ago he took prominent place among the Tractarians who were unwilling to be controlled in their movements Romeward, yet it is generally believed, that the resignation now has been tendered to escape the condemnation he was expected to receive. The fourth son of Wilberforce is the Bishop of Oxford, whose Tractarianism, or leaning towards Rome, is well-known. Consistency demands that he should follow his brother in the resignation of his preferments. How careful ought we to be in the training of our children closely to adhere in all things to the Word of God! J. A. BEGG.

Grand Ligne Mission.—During the first five years of its existence, this mission numbered only one minister and two teachers. Within the second five years, three other ministers engaged in the work, two of whom were fruits of the mission. There are now in service six ordained ministers, two licentiates, ten teachers, and three colporteurs. There are four churches, into which 370 converted Canadians have been received; and notwithstanding the losses occasioned by death, exclusions, and emigrations to the United States, the number embraced in them is now 200. Many others have been brought to a saving knowledge of Christ, and as many as 1,000 have abandoned the errors of popery, and come under the influence of the gospel.

MISSIONARY CORRESPONDENCE.

Since my return from the Anniversary, I have received intelligence from Palestine and China. The letter from Bro. Wardner, though lengthy, is unusually interesting, and will be read with great satisfaction. We give it entire to the readers of the *Recorder* and the friends of the mission.

The letter of Bro. Jones gives but little additional information to what has already been communicated in the *Recorder*. He asks for one thousand dollars to buy a small garden and build a house for himself and family, and also asks for a variety of articles for his own use and to distribute to the poor. The matter of raising money to buy land will be before the Board at its next meeting, and arrangements will be made for securing the necessary funds and all other articles needed for the successful prosecution of the mission. Bro. Jones proposes to inquire still further before making a permanent location. He is spending a portion of his time in learning the Arabic language. He preaches twice on the Sabbath, and on First-day when he can secure a congregation. He writes that Bro. Saunders has been quite ill of a fever, but is now better. J. Bailey, Cor. Sec.

Letter of Mr. Wardner.

Shanghae, June 21st 1854.

To the Am. S. D. B. M. Society:

Dear Brethren: On the 27th of April, I had a short interview with an officer of the Susquehanna, who gave a very flattering account of Japan and its inhabitants. He regards them as much more intelligent and refined than the Chinese, and much more so than he expected to find them. He said they seemed to be theoretically acquainted with all the arts and sciences possessed by civilized nations, which knowledge they obtained chiefly through the Dutch. Education seems to be generally diffused among the common people, and they show no indisposition to learn from others. On seeing the electric telegraph operate, they immediately sent off to Jeddo to have wires made for extending it. The country is rich, productive, and beautiful. The tea shrub is used for hedge fences; and the quality of the tea they drank there was superior to any he had ever tasted in China. But how much the article is cultivated by them, he could not say.

On the 2d and 3d of May, we moved into Dr. Taylor's house, outside the north gate, by invitation from his colleague, Mr. Cunningham, who soon followed suit. The house had been uninhabitable previous to the conflict with foreigners, on account of its proximity to the imperial camps. It now shows 174 ball holes as evidences of Chinese workmanship. Some have struck it since we moved in, and many others have struck near by. There does not seem to be much danger in living here, except when an attack is made upon the city, and we can at such times keep out of their reach. I expect to pay something for the use of the rooms we occupied at Hong-kur.

On the 4th, we (Mr. Cabbings and myself) finished distributing alms publicly outside the city, having used up our portion of the money appropriated for that purpose.

On the 16th, I distributed eleven dollars among some poor families in the city, which had been put into my hands for the purpose. In one house which I visited was a poor soldier, who had been so shockingly burned by the explosion of a bag of powder, that his appearance was really frightful. There have been several serious accidents of the kind, owing to carelessness, to which the Chinese are not a little prone.

The impression which seems to be gaining ground, that the corruptions and oppressions practiced by this government are very much owing to errors in its religious system, will doubtless tend much to hasten its downfall. The common people, who compose the bone and sinew of the nation, have great reason to detest it. The power, and abuse of power, exercised by the police, is sufficient of itself to produce such results, and may serve as a very fair specimen of Chinese politics under the Tartar rule. Whoever has a case to bring before the magistrates, must present it in writing to the police, who guard the first door leading to his office, by whom it is examined, and a demand made for money before it can be allowed to pass to the next. The same takes place at each door, costing the applicant, generally, at least ten dollars. Should the magistrate take notice of his complaint, (which may depend on the value of the bribe offered,) and give orders to seize the person complained of, the police then go and inform the defendant, and propose to sell him off for a specified sum. If he pays it, they then inform plaintiff, and make a new demand. If he refuses to comply, his case is disposed of, and they report to the magistrate that defendant is not to be found. But if he complies, they then repeat the same process again, and continue to repeat it as long as a dollar can be extorted from either of them; and he who pays the last bribe gains the day. In case the accused is brought before the magistrate, the result may still depend upon which pays the largest bribe. Not unfrequently, when prisoners are acquitted or set at liberty by the magistrate, a ransom is demanded by the police, and he is retained in prison till it is paid. When their business is not as brisk as they would like, they hang about tea shops and wine shops, or saunter about in the streets, and if they see any quarreling, or anything that might be construed into disorderly conduct, they seize and put the actors into custody, and then demand a ransom, or perhaps take them before the magistrate, as they think would best suit their interest.

As the magistrate is always from another province, and ignorant of the dialect and people over whom he rules, and as his police are his interpreters, and the only medium between him and the governed, they possess almost absolute power over the people, so far as it can be exercised without producing riots, which is to a surprising extent, owing to the apathy and forbearing temper of the people.

There are two ways in which a person may sometimes get a case before the magistrate independent of them. If a man has courage enough, he may, by watching his opportunity, when the police are off their guard, rush by them, and get to the door of their office first, where, by beating a drum, he may obtain an interview with the officer himself. Or, he may hand in his complaint when his excellency may be riding through the streets in his sedan. But whoever has the presumption to adopt either of these methods, is quite sure to pay dear for it.

Forced confessions, also, are sanctioned by the law. A person suspected or accused of crime, though he may be ever so innocent, may be tortured until he confesses himself guilty. I heard a missionary remark, not long since, that he had seen men at Canton carried to the block to be beheaded, whose legs had been crushed between sticks of timber to make them confess the charges brought against them, which few Chinese would not prefer to do, and die at once, rather than thus to be tortured to death.

These things not only show the corrupt state of their morals, nationally, but also the servile spirit of the people, both of which tend to sink them lower and lower in the scale of humanity. But as the common people are the chief suffers, these developments tend to lessen surprise that the revolutionary movement has been so successful. And as the religion of the country has so intimate a connection with the government, the anxiety to be rid of the one naturally tends to weaken their attachment to the other.

Shanghae is fast ridding herself of her idols, both in and out of the city; and Amoy, as I learned recently from a missionary of that place, is in advance of her. He mentioned, among others, the case of an old lady, who split up her household god to cook her dinner with, and remarked afterward, that her rice tasted unusually sweet and good. There seems but little chance for doubt, that with the fall of the Tartar dynasty, idol worship in China will come to an end. Though the conquering party may be infected with bigotry and many glaring errors, still, their religion is such an approximation towards true Christianity, that every lover of it can but pray for their success, and for Divine interference to thwart the designs of all who would check their progress, or seduce them from any of the truths they have already embraced.

You will see by the *North China Herald*, that the United States steamer Susquehanna has lately visited Nanking and Voo-hoo, about 65 miles beyond. It is said that the insurgents have got possession of nearly 400 miles beyond the latter place.

By the concurrent testimony of all who have visited the insurgents since the fall of Nanking, the fact is established beyond the possibility of a doubt, that they sabbatize on the veritable seventh day of the fourth commandment. The Susquehanna reached Nanking after noon on Sabbath day, when a dispatch was sent off to the officials. But the messenger was sent back with the answer, that it was the Sabbath day, and such business could not be attended to till the next day.

Capt. Dearbon informed me, that he saw stagings built up in different locations about the country, for preaching the gospel, where thousands could listen to one speaker. All who have been connected with them any length of time, can repeat the Ten Commandments and the Lord's Prayer, even down to small children; and when they meet a foreigner who could do the same, (intelligibly to them,) they would take him by the hand, and salute him with the title of brother. The only ground of complaint found against them was their haughty spirit, consequent, most likely, upon their extraordinary success. But what body of men, professing human weaknessess, could, from such beginnings, in so short a time, accomplish what they have, and not be to some extent affected by it? It is, however, much to be lamented, as it will render them less willing to receive instruction from those better acquainted with the Scriptures than themselves. But, on the other hand, it will tend to make them more tenacious for such truths as they have imbibed, and be liable to be influenced by the sophistry of Romanists, or the vague plea of "popular practice." It is much to be feared, that the new Emperor will, if he succeeds, enforce his religion by law, and that persecution will be the result. Still, even this may be for the best, in consequence of the exceeding great apathy which prevails almost universally among the people in regard to every thing like religion, Christian or pagan. It may be the only thing that can arouse them. But Christ is preached, and will be preached, and though it may be done through strife or vain glory, we may well rejoice in that He is preached; knowing that even the stubbornness, pride, and wrath of man will all be turned to the praise of God's glory, and the remainder of it restrained. It is a cheering fact, that they are printing and disseminating the Scriptures, without note or comment.

One of the most mysterious providences concerning their religion, is, that they should have chosen the correct day for their Sabbath, as all their religious instruction, so far as we know, came to them through first-day missionaries, personally, and by the Scriptures, perverted as they seem to have been in many if not all cases to favor Sunday, and some of them accompanied with notes in which great pains has been taken to guard that point, besides the thousands upon thousands, if not millions, of Sunday tracts and calendars, which have been for several tens of years scattered broadcast over the country, which must have found their way as far at least as any portion of the Scriptures has ever traveled. It hardly seems possible, that they should have made such a choice ignorantly. On the contrary, these publications may have had some influence in leading them to adopt the course they have; for there can hardly be a stronger evidence of the erroneousness of a sentiment, than to see its advocates contradicting themselves and each other in their efforts to maintain it. But I am more inclined to think they got it from their ancestors, as reported by the officers of the French steamer, who visited Nanking last winter, which agrees with what Dr. Gutzlaff told me at Hongkong about the evidences of its once having been observed by the ancient Chinese. God, no doubt, has a hand in this matter, and He has encouraged us to hope that the times and laws which should be given into the hand of the beast for a season, shall again be restored. And it is a singular fact, that He is using the same instrumentality, (except in person,) to accomplish the restoration, which the beast did to effect the change.

To say nothing of the correctness or reasonableness of Ta-ping-wang's pretensions to inspiration, the fact that he makes such pretensions, and that his followers believe him to be thus inspired, and that their success is the result; and the fact that he has established his religion and the observance of the Sabbath over the greater portion of the empire, renders it not very probable that he can easily be induced now to change the practices which he has thus established, and by so doing acknowledge to his subjects and the world, that his pretension to supernatural guidance is all a deception. And even if he made no such pretension, it hardly seems probable that he would now set about overthrowing a custom which he himself has made national, so far as he has gained power, simply because some one might tell him, that "it is non-essential which day is observed as the Sabbath, provided it be the popular one;" or that "the fourth commandment only enjoins the observance of a seventh portion of time indefinitely and indifferently," or "the seventh day of *an* hebdomadal cycle;" or that it is *probable* that the Apostles held religious meetings on the first day, notwithstanding it is *certain* that they met habitually on the seventh day for worship, and always called it the Sabbath; or "that it is not best to be squabbling for a day;" or that the earth is round, and that by coming to China from the United States via Cape Horn, a man would lose a day; or that the Sandwich Islanders keep one day, and the Society Islanders another; or that "Sunday is more apt to be pleasant weather than other days;" or any such like doctor of divinity arguments.

But though *these* arguments may fail, *others* of a more *compulsory* kind may succeed. Whether their use is thought of, you may form some idea from the leading article in the last *North China Herald*, (June 17th.) If any man could influence him by the first class of arguments, circumstances seem to have placed Mr. Roberts in the most favorable position of any missionary in China. He was not only his spiritual teacher, but has now under his guardianship an own and an adopted son of the Southern King. This was not known to any except the first-day Baptist mission till recently. The adopted son fought in Tä-ping-wang's army during the first year of the rebellion, during which time he embraced Christianity. After the army had left Quang-see, he was sent back to look after some domestic affairs, which having done, he found his way hedged up so as to prevent his returning again to the army. He then with his brother (by adoption) went to Canton, and learning that Mr. R. was coming up the coast, applied to him, and both came nominally as his servants. Nothing in particular was known of his religious sentiments till some time after his arrival, though he was observed to be very sedate and attentive to his Bible. Happening to be present at one of their communion seasons, he requested the privilege of partaking with them; and being questioned, he was found to be orthodox on most doctrinal points, and had acquired quite an extensive knowledge of the Scriptures. He said he had been baptized and belonged to the Tä-ping wang church. But being told that his baptism was not valid, because not performed by a proper administrator, he requested to be rebaptized, which was granted, and he became a member of their church. He is said to be zealous and bold, and of an uncontrollable will. "*He will have his own way.*" He explains away many of the peculiarities and apparent absurdities found in their books, as merely figurative. The fact of Mr. R.'s befriending these young men, may give him access to the leaders of the new dynasty, and perhaps much influence over them, in addition to what he may have in consideration of his former relation to the leader. The amount of his influence at court, I apprehend, will depend somewhat upon the time that he is permitted to get among them. He has now been detained here nearly a year, waiting and watching for an opportunity to go to Nanking, but without success. No arguments or entreaties could prevail with the officers of the Susquehanna to take him, though they took two other "missionaries," and one of them (Dr. B.) out of the very house in which he lives. God orders all things according to the riches of his own counsel, and says to us, "*Be still, and know that I am God.*" What he has wrought in China is so astonishing, that worldly men will not believe that it is anything but a satanic delusion. No doubt Satan is doing what he can to corrupt them, yet God may be speaking, as declared of old: "Behold, ye despisers, and wonder, and perish; for I accomplish a work in your days, a work which ye will by no means believe, though one declare it to you."

Lovers of truth have no time to be idle. King Jesus seems now to be beating louder for volunteers than ever before, and such as fear neither labor, suffering, nor death; for the world appears to be just reeling into the pit of her final overthrow, while Satan seems making his last and desperate struggle to thwart the purposes of God and ruin souls.

On the morning of the 10th, I went to my house and found (or it was so reported) that a party of imperialists had just been there and broke through a window door and took out a musquito net, and had also stove in the window of my wood room, and wrung off the pad-lock that was on the door. Three of them were sitting just outside my gate when I went in, and I soon saw others lurking around and calling to their comrades. I sent out for coolies to bring away a part of what I had left there, but none could be got. This was so unusual, that I supposed their hesitancy was caused by their fear of the imperialists. So I loaded myself with as much as I could conveniently carry, and returned; and with a guard and eight coolies, went back, thinking that with such protection there would be no difficulty in getting any number desired. But on sending my teacher out, my neighbors returned word, that if I would move back again, they would do my coolying gratis. But, if I was determined to leave them, I must move without their help. They seemed to think that if I lived among them, I could protect them from much of the annoyance to which they were subjected by the imperialist soldiers. We then concluded to load what coolies we had, and send them on to the west gate, and leaving their loads under the protection of a soldier, return for more. Soon after they left, a supply of coolies came in and offered their services. But before we could get started, the imperialists came out by thousands from the various camps and made an attack upon the city. The rebels came out and met them at the west gate, when they approached within a few yards of each other. The soldiers and coolies were completely surrounded by them, and were obliged to shield themselves from their bullets as best they could. No harm, however, happened to them. Large numbers of the imperialists collected around my house, but showed no hostile disposition towards us. There was not much execution done at the west gate, but outside the north gate, quite a number were killed and wounded on both sides.

On the 12th, I went again and got away most of what was left. A neighboring family that live in my out buildings informed me that on the preceding day, the imperialists came and took four bundles of wood and three baskets of charcoal out of my store room. The coal I could not find. But by turning over some rubbish, after they had handed out "*all of the wood*" for the coolies, I found the four bundles, which they had evidently taken some pains to conceal, which very naturally led me to suspect that the imperialists had more credit than they deserved. Since the city has been taken, there has been so little travel on the street where our chapel is located, that we have not made much effort to collect congregations there; and since our charity funds have failed, and we can no longer assemble the poor to preach to, I have felt that my life was becoming too much like a blank, thus to pass along without having some systematic operations in progress. I have therefore opened a school of boys in the chapel, which commenced yesterday, though with a small beginning. If this succeeds, I can have at least a small congregation to talk to and catechize, and having this nucleus, shall be more likely to get adult hearers. Providence has furnished me with the means to begin, and if God is pleased with the effort, I trust He will provide for its continuance.

WHO ARE THE VANDALS?

Not long since, an article went the rounds of all the papers, charging the crime of vandalism upon an American by the name of Jones, who, it was asserted, had defaced the tombs of the Kings in Palestine, and had sold the relics to gratify his pecuniary appetite, &c. Some have been led to suppose the Mr. Jones alluded to was our missionary of that name. It was not, however, Wm. M. Jones, but S. W. Jones, Esq., a correspondent of the American Society for Ameliorating the Condition of the Jews. The article, however, in question, is pretty well known to have proceeded from the pen of the British Consul at Jerusalem, who has not been backward in his efforts to defeat the American agricultural operations in Palestine. The N. Y. *Daily Times* of the 29th of Sept. turns the tables upon Mr. Finn, and shows who are the "*vandals*" in Palestine, not to say any thing of the Elgin robbery of Grecian temples at a former period. T. B. S.

Constantinople, Friday, August 25, 1854.

Permit me to open my communication of this date by referring to an article which appeared in the New York *Observer* of July 20, headed "A Yankee Vandal."

I heartily concur in the remarks made by that paper with regard to the conduct of the British Consul at Jerusalem, in thus maliciously uttering a sweeping and unjust charge of desecrative vandalism against the American nation. The *said individual* is well known for his jealousy of and petty bickerings with those Americans resident within the confines of Syria; and under cover of an attack on the supposed acts of one man, he vents his carefully-gathered spleen in the face of our whole nation.

He has opened an insignificant battery of two or three guns, and has been casting chance shots from time to time; but as this is unpleasant to the passer-by, we think it opportune to bring forward a few heavy guns and demolish his position.

In the first place, the visitor to Jerusalem can say, with honest indignation, that no one has done more to annoy the American traveler, and to render his stay in that city as short and unpleasant as possible, than this incumbent of the British Consulate. His impositions and ill-treatment are so well known to the residents in the East, that complaints have been often presented from various quarters against his conduct. He pretends to decry the mercenary disposition of a Mr. Jones, when it is his daily and hourly desire to feel the pockets of his own countrymen, as well as speculate on the feelings and sympathies of travelers of other lands.

At one time the imposition practiced by this man on Americans journeying to Jerusalem, became so glaring that Mr. Smith, our worthy Consul at Beirüt, (whose unexpected and unjust recall has surprised his countrymen here, and will call for further remarks hereafter,) remonstrated with him strongly, and sent notice of the fact to our Legation at Constantinople, or rather its representatives, making a formal complaint of the unworthy conduct of H. B. Finn, British Consul at Jerusalem. The matter was brought before the British Embassy, and the promise obtained, that the *gentleman's* future behavior would be somewhat humbled.

With these few remark may wes, be allowed to hold up to the scorn and reprobation of the American world, the ignoble and pettifogging representative of Her Britannic Majesty at Jerusalem.

Concerning the supposed vandalism of our countrymen visiting the East, I have never yet seen any approaches to it; and mingling, as I have done, among travelers of all nations, I would just say, that the nation least addicted to the desecration of the remains of antiquity, is that of the United States. If our tourists carried off the quantities of poached curiosities which I have seen in the hands of some others, the whole world would be flinging stones at us. It is necessary that I should make these remarks in behalf of my countrymen, lest, as "silence gives consent," it were thought easy to bring any charges against us.

Am I my Brother's Keeper?—The Rev. Dr. Adams of Boston replies with some vigor to the letter on slavery of Mr. Henry Wise. That gentleman had said that Mr. Adams had no more business to care for another man's slave, than for his ox or his ass; and on this sentiment Dr. A. comments as follows:—

"It seems more like the spirit and feelings of some other order of beings than man. You, Sir, and we, and that race, are hastening to the bar of God, where your question will be answered in behalf of the race of your slaves, by their Redeemer and yours; and if you shall, in any way, have shut up the kingdom of heaven against them, what will you do when God riseth up? and when he visiteth, what shall you answer Him? I beg that you will reflect upon your question, and consent that all your fellow men, who will, should aid the efforts which you and the South are so well able to make, and in very many directions are making, to benefit the race of your slaves. We must not interfere with your private relations to those slaves, but you have acquired no such 'property' in that 'race' as to diminish our obligations and accountableness with regard to the race, as fellow heirs of future, endless retributions."

Proportion of Church-goers.—The editor of the *Congregational Journal*, who has been for many years Secretary of the New Hampshire Home Missionary Society, in referring recently to the religious statistics of the census, gives the following striking facts respecting the small proportion of population, even in church-going New England, who attend habitually upon divine worship. We apprehend that the same sad result would be elicited by the examination of any part of the country. The facts are very suggestive :—

"We have been in every town in the State except a few in Coos county, and in nearly all of them where there are churches of our faith, and in some where there are no such churches, we have preached more or less. From the observations and inquiries we have been able to make the past *seventeen* years, we are fully persuaded that not more than *one-third* of the people of New Hampshire are regular attendants upon public worship on the Sabbath. Could an investigation be made, it would probably appear, that at least one-half of the population are embraced in the regular and occasional attendants upon public worship. But the *habitual* attendants we believe do not amount to more than one-third of the population, after abstracting children under five years of age, and the aged and infirm. There are multitudes in our towns who attend public worship only occasionally. If a man is not seen in the sanctuary oftener than once a month, or not more than a dozen times a year, he cannot with any propriety be considered a regular attendant upon public worship. True, were we to take the *prima facie* evidence of the statistics furnished by the U. S. Census for 1850 as correct, we should believe that nearly three-fourths of the population attended public worship; but nothing can be a more deceptive basis of reasoning than such statistics."

The American Board.—The 45th annual meeting of the American Board of Commissioners for Foreign Missions was held recently at Hartford, Ct. From the report of the Treasurer, presented on the occasion, it appeared that during the past year the entire expenditures of the Board were $322,141 92; and their receipts, $310,099 43; debt $12,042 49; permanent fund, $58,650 32; do. for officers, $39,840. The annual report of the Prudential Committee stated that forty-one missionaries have been sent out during the year. A deputation has been sent out to the mission in India. A society auxiliary to the A. B. C. F. M., especially in respect to missions in Turkey, has been established in England, intended merely to supply funds for the purpose of furthering those missions. The action of the Board on the matter of slavery in the Choctaw churches, was very decisive. The Choctaw Council having passed a law prohibiting the instruction of slaves and their children, the Board resolved to withdraw its teachers and patronage from the Choctaw schools, but to continue its preachers at their posts so long as they give utterance to a pure gospel. Resolutions affirming this action passed by a strong majority, only nineteen voting in the negative.

Baptist Home Mission Society.—The question whether the Baptist Home Mission Society shall accept rooms in the new Bible House is likely to be an important one. A meeting to consider the subject was held in New York on the 14th September, at which numerous petitions and protests against the measure were presented. The President, Dr. Cone, stated that he could never go with the Society to the Bible House. The correspondent of the *Watchman and Reflector* says :—

"One fact, I think, cannot be overlooked, namely, that this wide-spread opposition to removal, if it be wide-spread, is an opinion that has been most industriously manufactured by a few party leaders; and that without these officious and most undesirable efforts, no dissatisfaction would ever have been expressed or felt by the mass of those who now complain, and the Board would have been left to do its own work, without interference, and nearly all would have been satisfied. If a few of those manufacturers of opinion, together with their like in every connection, could be persuaded to go on a mission to Central Africa, they would deserve the thanks of the denomination, and might possibly benefit the world."

Baptist Ministers.—The *Watchman and Reflector* says that Maine has one hundred more churches than ministers; New Hampshire, sixteen; Vermont, thirty-six; while in Massachusetts, Connecticut, and Rhode Island, there are few more ministers than churches. The disparity in New York is small. In the great States of Ohio and Pennsylvania, it is considerably larger, reaching in the former over one hundred and thirty, and in the latter one hundred. In the South-west and the South, the number of the churches, as compared with the ministers, is much greater. Kentucky, North and South Carolina, Georgia, Virginia, even, have but about an average of two churches to one minister.

Another "Band of Freemen" off for Kansas.—One hundred and thirty stalwart sons of the North, from Massachusetts and New York, proceeded westward from Albany, Sept. 27, on their way to Kansas. They will be joined at various points on the route by others, and will enter the Territory two hundred strong. The party which passed through Albany was composed mostly of young men—vigorous, enterprising and determined. They will scatter the seeds of Freedom broadcast over the vast Territory into which they are about to enter. They bear with them the prayers and good wishes of millions of true men. Prosperity attend them! [Albany Evening Journal, Sept. 27.

A farewell missionary meeting of more than ordinary interest was held in the First Presbyterian church, New York, on the 3d September, in connection with the departure of a large company of missionaries about to sail for Northern India, under the direction of the Presbyterian Board of Foreign Missions. Mr. and Mrs. Barnes are from Kentucky, Mr. B. being the son of Rev. Dr. Barnes, minister of the Presbyterian church of that State. Mr. Leavitt is from Ohio, and is the son of Hon. Judge Leavitt, of the District Court of the United States.

RELIGIOUS INTELLIGENCE.

A correspondent of the *Christian Chronicle*, who writes from Enon, Pa., alludes to a revival in that place in connection with the protracted services beginning August 6th and continuing twenty-four days. "Never in my life have I been permitted to witness a clearer manifestation of the Divine presence among any people. The little church, numbering at first only 28 members, was greatly revived, numbers came forward from time to time for religious instruction and the prayers of God's people, conversions followed each other in rapid succession, till no less than 55 souls were made joyful and happy converts in the love of God."

During the year ending May, 1854, the number of ordinations in the Presbyterian Church, in this country, was 83; installations, 160; pastoral relations dissolved, 108; churches organized, 92; ministers received from other denominations, 23; ministers dismissed to other denominations, 11; ministers deceased, 41; churches received from other denominations, 9; churches dissolved, 11; members added, 13,433; whole amount contributed for all purposes, $2,036,723.

Many persons in Tuscany, of both sexes and all ages, have been thrown into dungeons for reading the Bible, or even for being suspected of it, or connected with those who are suspected. Many have been confined among felons, on so slight grounds that the government have been unable to sustain any charge against them. The persecutions are the work of the priests, and are not popular among the mass of the people.

New Mexico, with an area of 210,774 square miles, and a mixed population of barbarous Catholics of 61,547, where Popery has utterly failed, is now open to the labors of Protestant missionaries. Here is a field where many may enter and labor, and there is scarcely any place where there is more need for reformation in respect to morals and intellectual culture.

The *American Congregational Union* is making an effort which, if successful, will do much good, directly and indirectly, for a long time to come. They propose to raise a permanent fund of at least $12,000, the income of which is to be expended in assisting Congregational churches to establish libraries for their pastor.

A thorough-going Freesoil and Maine Law paper will be commenced at St. Anthony's, the 1st of October, called the *Minnesota Republican*. It will start under good auspices, and will undoubtedly make its mark in the Territory. It will be edited by Rev. C. G. Ames, of the Free Baptist Church.

The Bishop of Victoria, describing his late tour in Southern India, says that there is now a Brahmin in the Judge's Court, and educated in the Madras University, who gained the prize for the best essay on the evidences in favor of the Christian religion, and who yet remains a heathen!

A most interesting missionary band, numbering seven in all, sailed from Boston on Tuesday, the 5th Sept., to join the Lodiana station of the Presbyterian Board in Northern India. They were Rev. Messrs. Newton and Barnes, with their wives; Rev. Mr. Leavitt, Miss Newton, and Miss Jamieson.

Dr. Dick, the world-renowned astronomer and philosopher, now nearly four score years, is seriously indisposed. His pecuniary resources are represented to be inadequate to his wants, and an appeal has been put forth that provision be made for him in this respect.

Mr. Donald Maclaren, banker, who died at Callander, on the 6th ult., aged 69 years, was a worthy and generous-hearted man. The Free Church, of which he was a member, has received from him contributions to its various schemes amounting together to upward of $25,000.

It is computed that the Mormons in Great Britain number about 60,000, in Utah 54,000, and that not less than 40,000 are scattered over Iowa, Missouri, Illinois, Wisconsin, and other Western States, making in all 150,000 belonging to this singular sect.

The largest amounts contributed by the different States to the American Mission Board, during the month of July, were, Massachusetts $7,657 85; New York $6,432 57; New Jersey, $1,172 40; Maine, $1,070 93.

Another World's Fair.—Preparations are making for an Industrial Exhibition at Paris, which bids fair to rival the British Exhibition of 1851. The Palais d' Industrie, which is now in course of completion for the Exhibition, covers a space of ten acres. In addition to this, the French Government are erecting a supplementary building, which will occupy a space of about seven acres, and present a frontage on the Seine of about three-quarters of a mile in length. The Government is also at present engaged in completing the Louvre, and the new portion of the building is to be occupied by the works of living artists, consisting of paintings, statuary, drawings, photographs, &c. With respect to the principal building itself, it is not like that erected in London, that at Sydenham, or the one in New York. It is of the Corinthian order, built entirely of stone, and is to be covered in with a glass roof of three circular compartments. A peculiarity in the construction of the building is that all the staircases are formed outside, so that the inside presents the appearance of a great unobstructed square. The building is erected by a joint stock company, who are to have its use for thirty years, when it reverts to the Government. The whole affair is under Government patronage.

Stranger than Fiction.—Forty-two years ago a young man belonging to Salem, Mass., enlisted in the army and marched to the frontiers, leaving a wife, and a child about a year old. No tidings being heard from him, he was given up as dead, and twenty-four years after his disappearance his supposed widow married again. The soldier recently returned from the wars alive and well, having, it is said, been residing in Canada West for many years. His daughter, whom he left an infant, is now married and the mother of a family. His wife and her second husband and his sisters are all living; and how he can explain his absence, or how the respective rights of the parties in this "strange, eventful history," will be adjusted, remains to be determined.

The valuation of Boston, as just given, is **$225,000,000—half as much as that of New York, it is said.**

European News.

London dates to Sept. 16th have been received.

From the seat of war, the most important news is of the departure of the expedition against the Crimea. It sailed from Varna on the 4th Sept., and was composed of 74,000 troops and about 700 ships, which would be before Sevastopol on the 10th.

Prince Menchikoff personally conducts the defense of Sevastopol. He attaches great importance to the fortifications of Oczakoff and Kherson, and some thousand men are occupied in strengthening those places. Continual reënforcements arrive at Odessa and pass on. 60,000 men are said to be in camp, besides a full garrison in the city. A number of ships are being converted into fire-ships.

The total destruction of the forts at Bomarsund and the departure of the French troops for France is confirmed.

Gen. Krusenstern has ordered the inhabitants of Odessa to reduce the city to ashes if the allies should attempt to take it, and then retire to Tiraspol. The proclamation concludes, "Woe to those who remain behind, or attempt to extinguish the fire."

The cholera continued its ravages in London, the deaths from that disease during the three weeks ending on the 8th Sept. reaching four thousand.

At last accounts, there was great confusion at Canton. The Insurgents have taken several places near by, and threaten Canton. Foreigners are placed under the protection of the Factories' ships.

Commerce with Japan.

Under date of Harbor of Hakodadi, Island of Jesso, Japan, May 30, 1854, Commodore Perry writes to the Secretary of the Navy at Washington, as follows :—

I have examined the ports or Simoda and Hakodadi, which are to be opened to the vessels of the United States, and am happy to inform the Department that, with respect to geographical position, convenience of ingress and egress, and commodiousness for all the purposes required, they cannot be surpassed. This is one of the safest and most convenient harbors I have ever seen for vessels of all classes, and it is sufficiently capacious to hold half the navies of the world.

The authorities and people of the towns and their vicinities have manifested much kindness and attention. The ships have been promptly supplied, at reasonable prices, with wood, water, and such other articles as the country could furnish. The singular abstemiousness of the Japanese from animal food has never made it necessary for them to rear and fatten animals for the market, and hence the scarcity of that aliment so necessary to people of the western nations. It is quite probable, however, that they will hereafter be better prepared to meet the demands of the vessels visiting the two parts. Poultry and fish, and, at the proper seasons, fruit and vegetables, may be obtained in reasonable quantities, and one or two ships could always be provided with a sufficiency for their wants.

At both places the officers and those of the crews who have been permitted to leave the ships go freely about in town and country, and on fishing and shooting excursions, visiting the shops, the temples, and other places of interest, without the slightest hindrance or molestation, and are everywhere treated with kindness and respect, and especially by the country people.

SUMMARY.

The Albany *Evening Journal* publishes a careful, and no doubt correct statement, of the terms on which the annexation of the Sandwich Islands has been arranged between Mr. Gregg, the agent of the United States at Honolulu, and the Government of his majesty Kamehameha II. The islands are to come in as a State, with all the public buildings and claims on foreign powers, worth in all some two millions; and in consideration we are to pay some three or four hundred thousand dollars a year in annuities to various chiefs and nobles, including the King and his sons. It is estimated that these annuities will last some forty years.

Books not weighing over four pounds may be sent in the mail, prepaid, at one cent an ounce any distance in the United States under three thousand miles; and at two cents an ounce over three thousand miles, provided they are put up without a cover or wrapper, or in a cover or wrapper open at the ends or sides, so that their character may be determined without removing the wrapper. If not prepaid, the postage under three thousand miles is one cent and a half, and over three thousand miles in the United States, three cents an ounce.

A correspondent writing from St. Paul's Bay, describes a sad accident that occurred at Isle-aux-Coudres, Canada. It seems that two children of Mr. Bernard Tremblay—the eldest only 8 years of age—were amusing themselves setting off fire-crackers. Near the children were two barrels of powder, which ignited from the sparks and exploded in a fearful manner, killing the children, maiming their mother, and entirely demolishing the building, which was afterward consumed.

The N. Y. *Tribune* of Sept. 27th says: The markets for Breadstuffs are breaking down fast. The arrivals are large, and buyers are only taking lots for immediate consumption. There being no demand for foreign shipment, holders are anxious to realize. Flour has declined $1 per bbl. in two days, State being quoted at $7 50 a $8. Wheat is 10 a 15c. per bush. and Corn 3 to 5c. per bush. lower.

The Washington *Star* of Sept. 26th says: To-day there was issued at the State Department a passport for Young Wing, Esq., who has just graduated at Yale with the highest honors. Mr. Wing is a young Chinese gentleman of fine talents and great learning for his age, and has been eight years among us. He is about returning to China to see his friends for the first time.

The account of the New York Post-Office for the fiscal year ending 30th June, 1854, has been rendered to the Post-Office Department. It embraced receipts and collections for the Post-Office Department, disbursements and payments into the Treasury, which amounted to $1,265,445 18.

From exchanges, and reports of Fairs in various sections, we get favorable accounts of the product of apples. Those offered for sale are superior to the general run of apples last year.

Mr. T P. Shaffner, the agent of the Atlantic and Newfoundland Telegraph Company, has obtained a patent for the construction of a line of telegraph from the coast of North America, via Greenland, Iceland, and the Faroes, to Norway and Denmark. This route, we understand, does not involve the necessity of laying any submarine wire for more than 500 miles in any one section, and on that account will probably supersede the line projected to the coast of Iceland from St. Johns.

The Joliet (Ill.) *Signal* says: During a thunder storm on Friday of last week, near Rockford, a man named Merchant, residing a mile south of Winnebago Station, and four of his children, were instantly killed by a stroke of lightning. The father, mother and five children (comprising the whole family) were lying upon the floor in a bed together, and the mother and one child only remained alive.

A dispatch dated Pittsburgh, Tuesday, Sept. 26, 1854, says: The steam-boiler in Hall & Spear's plow factory at Manchester exploded this morning. The boiler was thrown two hundred yards into an adjoining lot, destroying a stack and passing between two houses, which were slightly injured. The boiler-head was thrown in the opposite direction, unroofing and nearly destroying an engine-house. Four men were hurt, but not seriously.

In Newington, Conn., on Saturday, the 23d ult., Elijah Whiton was brought before Justice Roger Welles, Jr., charged with drunkenness and profanity. He was found guilty on both charges, and refusing to disclose where he obtained the means of intoxication, he was fined $20 and the costs, amounting to $31 74—which he paid.

The over issue of stock by Schuyler, the President of the N. Y. and New Haven Railroad Company, is likely to lead to a thorough investigation of the condition of Railroad Companies, and the introduction of new checks upon fraud. Some of the lawyers think the New Haven Company is not responsible for Schuyler's frauds, and advise repudiation of the fraudulent stock.

J. C. Ivison, Esq., of Auburn, was killed recently by the accidental discharge of his gun, while hunting ducks at Musquito Point, on the Seneca River. His lifeless body was found just outside of his boat, (which was moored,) and partially in the water. The charge entered under the chin, and passed upward, doing the work of destruction so effectually that a friend who was to meet him at that point did not recognize him at first.

The physicians of the New York Hospital give some facts, showing that seven eighths of all persons attacked with the cholera are those who have already been long suffering from organic disease, as of the liver, lungs, etc., and who could not live long under any circumstances. This is shown by post mortem examinations made in almost every instance.

The steamship "Franklin" has been given up as lost. The last storm did the work. A large portion of her machinery will be lost with her; as soon as she breaks up, it will bury in the sand. $30,000 were offered for raising her, and two wrecking companies did their best, but at the last gale, all effort was abandoned.

The screw steamship City of Philadelphia, which sailed from Liverpool on the last day of August, went ashore on the 7th Sept. on Cape Race, New Foundland. Her passengers and crew got safely ashore, and 540 of them reached Halifax. It is thought that the vessel and a good portion of her cargo will be lost.

Madame Ida Pfeiffer, the distinguished traveler, arrived in New York recently, and took lodgings at the house of a friend. This is her first visit to New York, though she is now on her second voyage around the world. She came here from Canada, and after spending a few weeks in this vicinity, will sail for England.

We learn from the Scioto (O.) *Gazette*, that Mr. Seymour of Bainbridge, Ross Co., Ohio, sold a few days ago a quantity of corn in the field at $25 per acre. It was bought by some gentleman from Kentucky. This is doubtless the highest price ever paid for standing corn in Southern Ohio.

The Albany *Atlas* states that the affairs of the Bank of Carthage are in process of arrangement, and the redemption of its notes will probably be resumed next week. The Erie and Kalamazoo Railroad Bank continues to redeem at its counter. The Farmers' and Mechanics' Bank of [illegible]town, Md., will not resume for the present, but the notes are considered to be eventually good.

Forty children, boys and girls, were started from this city, last week, to find homes in the West. They are sent out by the "Children's Aid Society." Most of them are orphans gathered from the street, who can tell strange stories of their old ways of life.

The young State of Wisconsin is represented to be in a highly prosperous condition. With the liberal aid of Congress, the school fund is estimated at five millions of dollars, and the revenue from it alone this year is $150,000. The State debt is limited by the Constitution to $100,000.

The Irish journals state that the poor-law commissioners have received the authority of the treasury to appropriate £10,000 sterling, to assist in the emigration to Canada of young females who are now chargeable to their parishes. 1500 will be dispatched this year.

A day or two since, Messrs. Evans & Arrowsmith, of Bristol, received at their establishment a sheet of paper weighing 3 cwt., and measuring 2784 feet in length, or more than half a mile.

Coal of good quality has recently been discovered at Corunna, Michigan, one hundred miles from Detroit. Ten thousand bushels have already been taken out, and it is now being mined at the rate of five hundred bushels per day, and sold at the rate of ten cents per bushel. This is better than a gold mine for Michigan.

The present wheat crop of Great Britain is being well harvested. It is said to be not only the greatest in extent, but the most productive per acre, that has ever been produced in the United Kingdom.

The steamship Locust Point, Capt. Layfield, at Baltimore, Sept. 20, from Boston, reports having picked up, in lat. 39° 16', lon. 72° 85', a life-preserver, with Glasgow No. 2 on it; probably belonging to the missing steamer.

Mr. Thompson, who has charge of the church at Kaw-Mendi, Africa, reports a deeply interesting work of grace in progress there at the time he wrote. Their meetings for preaching and for prayer were numerously attended. The members of the church appeared much more than usually earnest in their desire to know and do all the will of God, and to secure for others an interest in the great salvation. Many of the impenitent manifested conviction for sin, and quite a number professed conversion, and applied for admission to the mission-church.

The Janesville (Mich.) *Telegraph* says that five slaves passed through that village on Wednesday night last, to Canada. The citizens passed round the hat and got up a good contribution and sent them on their winding way rejoicing on the underground railroad. The slaves were from Kentucky.

Two negroes belonging to Mr. Foit of Pickens, Ala., one evening recently went out to settle a dispute that had long existed between them, and next morning both were found dead, they having killed each other in a fight.

The Grand Jury in New York last week presented true bills against Mayor Westervelt and two other members of the Excise Board for illegal rum-licensing, and against more than eleven hundred persons for selling liquor without license.

A dispatch dated Baltimore, Sept. 23d, says: The up passenger train on the Georgia Railroad ran into the down freight train last night, killing the engineer and fireman of the passenger train, and one of the passengers; three others had their legs broken. The accident occurred near Crawfordville.

A dispatch dated Boston, Saturday, Sept. 23, 1854, says: On Friday morning, the Free-Will Baptist Seminary in North Parsonfield, Maine, was entirely destroyed by fire. No insurance.

During four days of last week, about 8,000 acres of land were sold at the Chillicothe Land-Office, at 12½ cents per acre, under the provisions of the new law of Congress.

The Anti-Nebraska State Convention, adjourned from Saratoga Springs last month, reässembled last week at Auburn. The Whig State Ticket was adopted, not with entire unanimity, but with very general concurrence.

The official statement of the United States Treasury Department shows that there were $25,628,000 in the various Sub-Treasuries subject to draft on the 28th ult.

On Sunday, Sept. 24th, a row boat containing seven persons was capsized in the Hudson River, near New York, and three of the persons were drowned.

Apples are plenty at the West in several States, and if they rule high in this market the hardy varieties will be sent forward.

The capital invested in the hotels of New York is estimated at over $12,000,000.

New York Markets—October 2, 1854.

Ashes—Pearls $6 25; Pots 7 00

Flour and Meal—Flour, $8 00 for Canadian, 7 00 a 7 25 for common to good State, Ohio, and Michigan, 8 00 a 9 25 for extra Genesee. Rye Flour, 5 00 a 5 50 for fine, 5 62 a 6 12 for superfine. Corn Meal 4 37 a 4 50 for Jersey. Buckwheat 4 00 per 100 lbs.

Grain—Wheat, 1 40 for good new white Canadian, 1 68 a 1 70 for good white Southern. Rye 1 18. Barley 1 15 a 1 20. Oats, 46 a 53c for State, 47 a 49 for Jersey. Corn 76c for Western mixed.

Hay—80 a 90c per 100 lbs.

Lumber—16 00 a 17 00 for Eastern Spruce and Pine.

Potatoes—Pink-eyes and Mercers, 2 75 a 3 50 per bbl. Sweets 3 37 a 3 62

Seeds—Clover 11½ a 12c. Flax-seed 1 65 a 167.

MARRIED,

In Petersburg, N. Y., Sept. 25th, by Elder Azor Estee, A. A. Lewis, M. D., of Alfred, N. Y., to Miss Mary C. Saunders, of the former place.

In DeRuyter, Sept. 24, by Charles H. Maxson, Esq., Mr. Joseph Bailey to Miss Mary D. Tripp, all of the above place.

In Adams, N. Y., August 31st, by Elder Alexander Campbell, Mr. Alpheus S. Wakefield, of Smithville, to Miss Ann Elizabeth Bliss, of Adams Center.

In Groton, Ct., Sept. 25, by Elder D. Coon, Mr. Cyrus H. Maxson of Stonington, Ct., to Miss Charlotte G. Coon, of Brookfield, N. Y.

In Alfred, Sept. 26, by Elder J. Kenyon, Mr. Paul C. Witter, of Alfred, Allegany Co., to Miss Susan Adelia Davis, of Wheatville, Genesee Co., N. Y.

DIED,

Whitford, aged 87 years, 11 months, and 29 days.

In Plainfield, N. Y., Sept. 18th, Victor L., son of Clarke and Harriet Whitford, aged 7 months and 1 day.

In Willing, Allegany Co., N. Y., August 13, 1854, of dysentery, Alzina Arminda, daughter of Ira S. and Susan Witter, aged 8 years, 10 months, and 20 days. Also, Sept. 2d, 1854, by scalding, Clara Sardinna, daughter of Ira S. and Susan Witter, aged 2 years, 11 months, and 21 days.

In Verona, N. Y., on the 31st of August, Mrs. Sarah Satterlee, consort of Clark Satterlee, aged 76 years and 9 months. She was a worthy and exemplary member of the 2d Seventh-day Baptist Church of Verona, and has left to her aged companion, her children, and the church, a pattern worthy of imitation, and the cheering hope that she has gone to reap the reward of her virtues, in the land of the blessed. D. P. C.

In Alfred, Allegany Co., N. Y., Sept. 27, 1854, in the 68th year of his age, Paul Witter. Bro. Witter had been afflicted for many years with the lung complaint, of which he died. He was formerly of Brookfield, and there professed religion, and united with the 1st Seventh-day Baptist Church, thence he removed to Alfred, and there united with the 2d Seventh-day Baptist Church, with which he continued until called to exchange his standing from this to the Church in Heaven. He died in the triumph of faith, having waited long for his exit, and rejoiced when it came. J. K.

In Hartsville, Steuben Co., N. Y., Sept. 9, 1854, Sarah Angelia, daughter of Ephraim and Roxanna Emerson, aged 1 year, 4 months, and 4 days. J. K.

LETTERS.

John Parmalee, Daniel Coon, W. B. Maxson, Chas. Rowley, H. W. Clarke, E. D. Spicer, D. E. Maxson, J. Kenyon, D. P. Curtis, L. Allen, H. W. Stillman, P. F. Davis, W. A. Rogers, C. D. McGill, J. Whitford, C. H. Maxson, Alex. Campbell.

RECEIPTS.

FOR THE SABBATH RECORDER:

Betsey Saunders, Berlin,	$2 00	to vol	11	No 52
Catharine Sisson, Leonardsville,	2 00		11	52
Wells Crumb,	" 3 25		11	13

FOR THE SABBATH-SCHOOL VISITOR:

Isaac F. Randolph, Millington, N. J.,	25

WILLIAM M. ROGERS, Treasurer.

Board Meetings.

The quarterly meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held in the meeting-house at Plainfield, N. J., on First-day, Oct. 15, commencing at 9 o'clock, A. M.

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

New Market Seminary.

THE Academic Year of this Institution, for 1854 and '55, is divided into three terms, each fourteen weeks long.

The Fall Term commences Sept. 5, and closes Dec. 8.
Winter " " Dec. 13, " " Mar. 20.
Spring " " Mar. 28, " " July 4.

The Department of Instruction is in the care of Mrs. R. H. WHITFORD, Preceptress, who will be assisted by competent teachers, as occasion may require.

Instruction.—The Common English Branches, Reading, Writing, Geography, Arithmetic, and Grammar, will be taught each term. The Higher English Branches taught as follows:—In the Fall Term, Chemistry, Geometry, and Book-Keeping; in the Winter, Natural Philosophy, Physiology, and Astronomy; in the Spring, Botany, Geology, and Moral Science. Algebra, Etymology, and Rhetoric taught all terms in the year. Classes in French and the Extras will be taught whenever desired.

Expenses.—*Tuition, per term*—for Common English Branches, $3 50; for Etymology and Book-Keeping, $4 50; for Higher English Branches and French, $5 00; for Incidentals, $ 25.

Extras, per term—Penciling, $1 00; Crayoning, $2 00; Embroidery, $3 00; Oil Painting $7 00; Piano Music, $10 00.

Regulations.—No student is admitted for less than half a term. No deduction in price of tuition made for absence, except in cases of sickness. Nothing sectarian is taught or countenanced in the school.

A new and commodious building will be ready for the school at the opening of the Fall Term.

David Dunn, Pres. of Board of Trus.
Isaac H. Dunn, Sec'y.
New Market, N. J., July 20, 1854.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

Norwich Line to Boston,

WORCESTER, Lowell, Fitchburg, Nashua, Concord, Bellows Falls, &c. Via Norwich and Worcester, Worcester and Nashua, Boston and Worcester New London and Willimantic, and Palmer Railroads.

Passengers by this Line leave pier No. 18 North River, foot of Cortlandt-st., every day, at 5 o'clock, P.M., (Sundays excepted.)

Steamer CONNECTICUT, Capt. J. W. Williams will leave New York every Tuesday, Thursday, and Saturday.

Steamer WORCESTER, Capt. Wm. Wilcox, will leave New York every Monday, Wednesday, and Friday.

Passengers by this Line arrive in time to take the early trains out of Boston.

Passengers taken at the lowest for New London, Norwich, Willimantic, Stafford, Munson, Palmer, Worcester, Boston, Fitchburg, Lowell, Lawrence, Nashua, Concord, Bellows Falls, and other places in Northern New Hampshire and Vermont.

Regular Mail Line via Stonington for Boston,

PROVIDENCE, NEW BEDFORD, and TAUNTON. Inland Route, without change of cars or detention, carrying the Eastern Mail.

The steamers C. VANDERBILT, Capt. Joel Stone, and COMMODORE, Capt. John G. Bowne, in connection with the Stonington and Providence, and Boston and Providence Railroads, leaving New York daily (Sundays excepted) from Pier No. 2 N. R., first wharf above Battery Place, at 5 o'clock P. M., and Stonington at 8 o'clock P. M., or on the arrival of the mail train which leaves Boston at 5 30 P. M.

These steamers are unsurpassed for strength, safety, speed, comfort, and elegance. The officers are experienced and attentive.

The natural advantages of this route are superior to any other. Being shorter and more direct, the trip is more pleasantly and expeditiously performed, while passengers can always rely on reaching their destination in advance of those by either of the other routes.

The COMMODORE, from New York—Monday, Wednesday, and Friday. From Stonington—Tuesday, Thursday, and Saturday.

The C. VANDERBILT, from New York—Tuesday, Thursday, and Saturday. From Stonington—Monday, Wednesday, and Friday.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y.

Miscellaneous.

Lowly Pleasures.

BY BARRY CORNWALL.

Methinks I love all common things;
The common air, the common flower;
The dear kind common thought that springs
From hearts that have no other dower,
No other wealth, no other power,
Save love; and will not that repay
For all else fortune tears away?

Methinks I love the horny hand,
That labors until dusk from dawn;
Methinks I love the russet band,
Beyond the band of silk or lawn;
And oh! the lovely laughter drawn
From peasant lips, when sunny May
Leads in some flowery holiday!

What good are fancies fair, that rack
With painful thought the poet's brain?
Alas! they cannot bear us back
Unto our happy years again!
But the white rose without a stain
Bringeth times and thoughts of flowers,
When youth was beauteous as the hours.

E'en now, were I but rich, my hand
Should open like a vernal cloud,
When it casts its beauty on a land
In music sweet but never loud;
But I am of the humble crowd;
And thus am I content to be,
If thou, sweet muse, wilt cherish me.

The Deaf and Dumb.

A Convention was recently held at Hartford, Ct., to celebrate the erection of a monument to the memory of Thomas H. Gallaudet, the distinguished founder of the system of public instruction for the Deaf and Dumb in this country. A writer for the *Tribune* takes the occasion to furnish the following information relative to the institutions of the kind among us:—

We have no account of any attempts in behalf of this class of sufferers prior to the middle of the sixteenth century. The ancients generally thought it impossible to instruct them; and Pliny has mentioned as a remarkable fact of his time, that one of the Cæsar family, who was mute from his birth, became an eminent painter in Rome. Pedro Ponce de Leon, a Spanish monk of noble family, born in 1562 at Valladolid, was the first to successfully instruct deaf mutes; and he was succeeded by Juan P. Bonet, who in 1620 published at Madrid the earliest treatise on the art. But it was reserved for the Abbe de L'Epee to found at Paris, less than a century ago, the first Institution for them; and by devoting to it his life and fortune, to acquire the title of "Father of the Deaf and Dumb." He was succeeded by the Abbe Sicard, who systematized the instruction, and became its most distinguished teacher. The great renown of the Paris Institution led to the foundation of ten or twelve others in Europe during the last century; and their number has since rapidly increased, now amounting, including America, to about 200, having nearly 500 teachers and over 7,000 pupils.

The introduction of Deaf-Mute Education in the United States was brought about in 1817 by Thomas H. Gallaudet, and by Dr. M. F. Cogswell, also of Hartford. The latter had a daughter who at the age of two years, or in 1807, became deaf from spotted fever; and, in 1809, also lost her power of articulation. Mr. Gallaudet had in early life become interested in the Deaf and Dumb, and he endeavored to impart some knowledge to the child, and with such partial success that Dr. Cogswell and several others commissioned him to visit Europe for the purpose of qualifying himself to become a teacher of the Deaf and Dumb in this country. He departed May 25, 1815, studied under Abbe Sicard, and returned Aug. 10, 1816, accompanied by Mr. Laurent Clerc, a deaf mute, Professor and graduate at the Paris Institution. During his absence the friends of the project had been preparing for the establishment of the Asylum, and had obtained its incorporation in May 1816, with a grant of $5,000 for its support in a few months afterward. It was opened for pupils, April 15, 1817, and seven were received during the first week. In December following it had 30 pupils and three instructors; and at the close of its first year 50 pupils, requiring two additional teachers. At its commencement, Mr. Gallaudet became its Principal, and held the office until April, 1830, when he resigned in order to act as Chaplain of the Retreat of the Insane. Mr. Clerc has continued as first assistant teacher to the present time, flourishing in a vigorous old age, having four children all in full possession of their senses, although his wife is also a deaf mute. By act of March 3, 1819, Congress granted to the Asylum a township of land, from the sale of which $278,100 has been realized, and its permanent fund now amounts to $307,000. This endowment induced a change in the corporate name of the Asylum, from Connecticut to American, and for many years it received pupils from all parts of the Union; but it is now patronized only by the New England States. It has lately made additional provisions for the instruction of an advanced class of pupils, and now has a building in preparation for children under ten years of age. Many of its graduates and teachers have gone to act as instructors in other institutions. Its present number of pupils is 193; whole number since opening over 1,100. The present Principal, Mr. W. W. Turner, has been connected with the Asylum as an instructor for thirty-three years.

The New York Institution, now the largest in the Union, was founded in April, 1817, through the exertions of Controller Flagg and others, and was opened in May, 1818, with four pupils in a hired room. The next year the State gave it $10,000; and in 1822 it provided for the support of thirty-two pupils each for three years. On Oct. 19, 1827, the corner-stone of its edifice in Fiftieth-st. was laid, which was opened in 1829. Dr. Peet, previously of the Asylum at Hartford, became its President in the year 1831, and still fills that office. In 1852 the City Corporation opened a street through the grounds, which caused the Trustees to sell them, &c. A new site of 37½ acres having been purchased on Washington Hights, on the banks of the Hudson, nine miles from the City Hall, the corner-stone of the new edifice was laid with due ceremonies on 22d Nov., 1853. The proceeds of the sale will net $324,000, and the new site having cost $115,000, a fund of $169,000 was left for the buildings, which will cost, when finished, $225,000. The main edifice is of ornamental and imposing design, 150 feet front by 55 feet deep; it will accommodate 450 pupils, and is to be opened next summer. The number of pupils on Jan. 1, 1854, was 278; and the whole number from the opening 1,165.

As our space will not admit of an extended notice of each American institution, we will give a list of them, with the dates of their opening:

1. Hartford, Conn.	April 15, 1817.
2. New York, N. Y.	May 1818.
3. Philadelphia, Pa.	November 1820.
4. Danville, Ky.	April 27, 1823.
5. Columbus, Ohio	November 1829.
6. Staunton, Va.	Jan. 1, 1840.
7. Knoxville, Tenn.	— - 1845.
8. Indianapolis, Ind.	November 1848.
9. Jacksonville, Ill.	—— 1849.
10. Raleigh, N. C.	—— 1849.
11. Cedar Spring, S. C.	Jan. 22, 1849.
12. Cave Spring, Ga.	————
13. Fulton, Mo.	Nov. 1, 1851.
14. Delevan, Wis.	July 1852.
15. Robinson's Sp'gs, Ala.	—— 1852.
16. Baton Rouge, La.	Dec. 1, 1852.

We may also reckon in our account the Michigan Asylum established at Kalamazoo, by act of the Legislature, in 1848, but which has not commenced operations. Most of the States which do not have an institution of their own, have made provision for the education of their mutes in that of some neighboring State. By the plan usually adopted, each State supports those mutes who are indigent for a term of years, defraying the average annual charge of $130 for board and tuition. In Indiana and Illinois, however, all mutes of those States are admitted free of any charge. The total number of pupils in the sixteen institutions, is about 1,200, being about one-third of those who are of suitable age for instruction. The majority of the institutions receive pupils between the ages of ten and twenty years, while the average age of twelve years is regarded by experienced instructors as the most favorable for commencing instruction. But it is very desirable that children should be trained from infancy, to awaken their minds and prepare them for instruction, &c. All pupils are taught to labor at trades which will support them in after life.

The number of instructors is about 120, some of whom are mutes. The majority of them have engaged in this profession for life, and several have been teaching for thirty years. They have held several Conventions, though they have not yet formally organized an association. The first was to have been held in New York in 1849, but was postponed to 1850, on account of the epidemic then prevailing; and the third, appointed at Columbus in 1852, was also postponed a year for the same reason. The Conventions actually held have been as follows: The first, at New York, August 28–30, 1850; the second, at Hartford, August 27–29, 1851; and the third, at Columbus, August 10–12, 1853. The fourth is appointed at Staunton, Va., on the last Wednesday in July, 1855. Their proceedings have been published in pamphlets, and in the "American Annals of the Deaf and Dumb," issued at Hartford, and edited by Prof. Luzerne Rae. The edition is of 750 copies, costing about $550, and is distributed among the several Institutions, according to the number of their pupils, &c.

The census statistics of the deaf and dumb, (as well as of kindred subjects,) have been much complained of for their inaccuracy, which is acknowledged by the Census Bureau. This defect arose simply from the carelessness and incompetence of many of the Assistant Marshals, who would frequently return the deaf persons, and combine their aggregate number with that of the deaf and dumb. The Census Bureau, however, has revised the returns, and made the best of them, and they are as follows:—

Census.	Whites.	Colored.	Total.	Population of U. S.
1830	5,363	743	6,106	12,866,020
1840	6,684	981	7,665	17,069,453
1850	9,136	667	9,803	28,191,876.

And for 1850 there are also reported 3,050 as deaf, of which number doubtless a considerable portion are dumb.

Of late years much has been written on the possibility of curing deaf muteness; but the opinion is generally entertained, that this is utterly out of the question, as every experimenter has failed.

"Every Man makes his Mark."

"Every man who comes into the world makes some mark upon it." Yes, every man makes his mark! and a "sorry" mark it is, that many make! Look at that young man whose early youth and helpless years were guarded with the tenderest care, by the angel hand of an affectionate mother, and the kind care of an indulgent father! See him wind his way onward—regardless of virtue's call, and ambitious of vice's applause. See him rush like a heedless, mindless enthusiast, into dissipation, prodigality, and crime. He is making his mark. Ah! what a mark! Trace its dark outlines in the haggard brow and furrowed cheek of his parents. He has written care upon their features, premature old age upon their locks, and sorrow upon their hearts. He has marked out their path of life among thorns, and their grave among the "early dead." And upon himself—what a mark—perhaps of the drunkards age; it may be of Cain. He has made upon himself a mark which can never be erased, which will distinguish him as long as his abused and ruined body will bear him over the earth, and will mark him out when the great day of retribution comes.

Look at that young lady, sporting and flitting like the butterfly, in the bright sunlight of gaiety and fashion. The rose is on her cheek, the diamond in her eyes, music in her voice, and gladness in her heart. She sparkles in the merry crowd, blazes in the hall of revelry, chases with airy fleetness the rainbow-bubble pleasure, casts piercing glances indiscriminately around her upon scores of luckless admirers, and flatters herself that she is making her mark. And she is. She is marking a line of livid palor upon that glowing cheek; she is marking a path for burning tears from those now sparkling eyes. She is marking out an abode for that cankering, fell destroyer, consumption, within that throbbing breast. And soon a marble block will mark the spot where all that she cherished or admired of herself is lain—and the inscription upon it perhaps will be—

"'Tis ever thus! 'tis ever thus, with all that's best below;
The dearest, fairest, loveliest, are always first to go;
The bird that sings the sweetest, the pine that crowns the rock,
The glory of the garden, the flower of the flock."

Again, see that ambitious man marking his course in blood. See that visionary marking his hopes in the sand which are destroyed by the first passing breeze. See the self-important man, who would fain make his mark upon every object in nature, and who has the mortification to see the character he is endeavoring to make mar in the hand, like the clay of the potter, becoming, instead of an honor, an object of dishonor.

But there are fairer marks. The philanthropist makes in society a shining mark. It may be traced in glowing lines through the various windings of society. The good man marks his way with smiles. Light and joy attend it in its various course. The statesman makes his mark upon the records of his country, and it glows in letters of living light, to be read with pleasure and profit by after generations. The student or philosopher makes his mark in the heavens above, in the earth beneath, and on the indestructable tablet of human intellect. And last, though not least, the Christian makes *his* mark upon the "Lamb's Book of Life," there to withstand the "wreck of matter and the crash of worlds," and to shine unceasingly, while the ages of eternity roll their ceaseless round.

[Bordentown Register.

Rubber Shoes.

The New York *Journal of Commerce*, in an interesting article on the manufactures of Connecticut, gives the following account of the manner in which India rubber shoes are made:—

"Contrary to the general impression, India rubber, in the process of manufacturing, is not melted, but is passed through heated iron rollers, the heaviest of which weighs twenty tons, and thus worked or kneaded, as dough is at a bakery. The rubber is nearly all procured from the mouth of the Amazon, in Brazil, to which point it is sent from the interior. Its form, upon arrival, is generally that of a jug or pouch, as the natives use clay moulds of that shape, which they repeatedly dip into the liquid caoutchac, till a coating of the desired thickness accumulates, when the clay is broken and emptied out.

The rubber, after being washed, chopped fine, and rolled to a putty-like consistency, is mixed with a compound of metallic substances, principally white lead and sulphur, to give it body and firmness. Those sheets designed for soles of shoes, are passed under rollers having a diamond figured surface. From these the soles are cut by hand, and the several pieces required to perfect the shoe are put together by females, on a last. The natural adhesion of the rubber joins the seams. The shoes are next varnished and baked in an oven capable of holding about 2,000 pairs, and heated to about 300 degrees, where they remain seven or eight hours. This is called the "vulcanizing" process, by which the rubber is hardened.

"A large quantity of cotton cloth and cotton flannel is used to line shoes, and is applied to the surface of the rubber while it is yet in sheets. Not a particle of any of these materials is lost. The scraps of rubber are remelted, and the bits of cloth are chopped up with a small quantity of rubber, and rolled out into a substance resembling pasteboard, to form the inner sole. The profits of this business have been somewhat curtailed of late, by the high price of rubber, which has varied within a year from twenty to sixty cents per pound. The demand, however, is very large. A species of rubber shoes lined with flannel, is extensively used in some parts of the country as a substitute for the leathern shoe."

Railway Life.

The time was (says an English paper) when the London city merchant lived within the city, and even locked himself up within the walls; and long after the city gates were thrown open, the city mansion of the rich banker and trader was not only a house of business, but a home. Those were the times when city men were perhaps in reality what the caricaturists now describe them; but those days are over, and now perhaps there is no class of men in the world who see more country than the chief citizens of London. They live in the country; they keep their dogs and their horses in the country; they have their fields, their gardens, their sheep, and their oxen, and they know as much about rural affairs as the rustics themselves. The cockney caricatures are no longer a reality. Even the clerks and the shop-keepers' assistant have got beyond the elements of rustic education. The sea-coast town of Brighton is upwards of 50 miles south of London; but that is not at all alarming to a city man; he transacts business within the walls daily, and sleeps at Brighton nightly. There are about 250 season tickets out for London and Brighton alone, at 50 guineas per annum; and express trains run daily, Sundays excepted, for the accommodation of these men of metal. £12,000 per annum for Brighton. And all around about the metropolis there are similar places of resort of various degrees of rusticity in which the families of metropolitan men of business are reared, whilst they themselves daily undertake a journey of from ten to a hundred miles, with as little thought of distance as if they were provided with wings, or with seven-leagued boots.

What can be done in a Garden.

A correspondent of the *New England Farmer* says:—

Thirty years ago I purchased an establishment consisting of a dwelling-house, barn, carriage and wood-house, calculating to make it a permanent residence. There was attached a little land for a garden, on which were just five apple trees, and in front of the house were three trees of the balm of Gilead; the trees were all about six inches in diameter at that time, but two of the apple trees were hollow, and I cut one of them down, after trying to make it do something and finding I could not.

Well, all the apple trees bore something for fruit, but so crabbed and sour they would make a pig squeal. At this time I was engaged as a trader, and had a country store to look after, which occupied about all my time, but as time went on, and stage-coaches and railroad cars succeeded one another, I had more time; for I can now travel as far in four hours as I could then in two entire days with my team. Well, for amusement I grafted all the four apple trees gradually, or year by year, cutting off the old branches and grafting the limbs with Roxbury russets, New York russets, Baldwins, &c., &c., all the best kinds I could find. Now for results: I have had about ten barrels of good apples, annually, to put up for winter for three or four years past, beside all we used in the family of five, and we have used them freely, all we wanted, till time to gather the winter apples.

I have a yard in front of my house about forty feet square, in front of which are two of the balm of Gilead trees before mentioned, which are now large trees, and I have left them outside of the front fence; but inside of the fence I set out, about ten years ago, three pear trees of the common summer pear, which now give us all the pears we want, for they have borne well for about four years. From the pear trees to the house, I filled the space with flower-beds, and have had many varieties, say twenty kinds, of roses, and nearly one hundred kinds of flowers; I have planted on the south side of my buildings, next to the passage to the barn, plums, peaches, and grapes. The peaches have not succeeded well, nor the plums, so I cut the plum trees off, and grafted them with the green and purple gage, only three or four years ago, and now I have plenty of the finest plums I ever saw, so that I have had to prop the small branches. My grapes began to bear last year; I had about a bushel, and I should think I might get double the quantity this year. I have set out some quince trees, but they do not bear yet.

Beside the tree and grape vines, I have annually raised about ten or fifteen bushels of potatoes, six or seven bushels of beets and carrots, some English turnips and ruta-bagas, and a few cabbages and onions, as many as our folks wanted to use. We have also had beans, peas, and corn, what we wanted to use green, and I have annually had about three or four bushels of dry corn, say two bushels common yellow corn, one bushel of pop-corn, and sweet corn enough to plant myself and supply all my neighbors. Also, I have annually raised cucumbers, water and muskmellons, summer and winter squashes, one or two hundred pounds of each; eight hundred or one thousand pounds of pumpkins. All this has been raised on less than half an acre of ground, including buildings and drive-way, and I have had more vegetables for years in my family, than some men that cultivate one hundred acres, and all on poor, gravelly New Hampshire land, without any help but my girls in the flower department. And as Goldsmith says, "We make every rood of ground support its man."

Longevity.

There is now living in the town of Southeast, Putnam Co., N. Y., a family of five generations, as follows: Jerusha Paddock, aged 99; her daughter, Jerusha Smith, aged 79; her grand-daughter, Rebecca Crosby, aged 52; her great-grand-daughter, Eliza Denton, aged 32; and her great-great-grand-daughter, little Miss Denton, aged 6. The lady of 99 appears as though she might considerably overtop 100 in her earthly account of years, and her daughter of 79 looks fully competent to take her tea regularly and enjoy the evening of life a round score of years yet; while the grand-child of 52 has a countenance expressive of true enjoyment of existence. If the latter live as long as her grand-mother, and we see no reason why she should not, she has forty-seven long years left her in which to taste the sweets of earth. She is now, in her pilgrimage, just about where many sink down and give up the hope of traveling further; yet, judging from the hale appearance of her ancestor, she may yet go on as far ahead as she has already come. But skipping over the young mother of thirty-two, what a long, long "road to travel," is before the great-great-grand-daughter of six, should she live to the age of her double-chinned ancestor. Let us see—ninety-three years added to the number that now sit lightly upon that curly head, would carry her into the middle of another century—1946! Verily, a good long life is not such a fleeting thing, after all.

Interesting Discoveries at Naples.

The extraordinary amount of antiquarian treasures constantly brought to light in the classical sites of the modern kingdom of the Two Sicilies, would keep the British archæological world in a state of excitement almost dangerous. The antiquary of the north is a much more excitable animal than his brother of the "sunny south." "Here," writes a correspondent of the *Morning Post*, "you will observe a group of the curious 'assist' at an excavation in Pompeii with as much stoic placidity as if the workmen were digging for potatoes, instead of art-objects 2,000 years old. The finding of a bronze, a terra cotta, or a marble statue, produces no flutter among the lookers-on. They are familiar with such things, and a sort of unexpressed contempt illustrates the old proverb." Within the last few weeks another public bath house has been discovered at Pompeii. Nothing beyond the *frigidarium* is at present cleared; but there is reason to suppose that the building in question is more extensive than that containing the circular bath discovered in 1824, with its six entrances, vestibule, atrium, &c. Signor Abbate, who painted the Roman interior of the Crystal Palace, is employed in making drawings of the portions of this building already laid open. In connection with Pompeii, a glass has been discovered about the size of a crown piece, with a convexity, which leads one to suppose it to be a magnifying lens.

Now, it has been said that the ancients were not aware of this power, and the invention is given to Galileo by some, to a Dutchman in 1621 by others, while the compound microscope is attributed to one Fontana, in the seventeenth century. But, without a magnifying glass, how did the Greeks and Romans work those fine gems which the human eye is unable to read without the assistance of a glass? There is one in the Naples Royal Collection, for example, the legend of which it is impossible to make out, unless by applying a magnifying power. The remarkable fact is, that the glass in question was found with a stone ready cut and polished for engraving thereon, which stone is now also to be seen in the Museum of Naples. It would appear, therefore, that a worker of gems used this instrument.

Making Bread.

The Rhode Island Society for the promotion of Industry gave the first premium on domestic bread to Mrs. Hiram Hill, of Providence. The following is Mrs. Hill's receipt for making the bread exhibited by her:

For two loaves of the ordinary size, take two potatoes, pare them, slice very thin, and boil quick until quite soft, then mash to a fine pulp, and add, little by little, two quarts of boiling water, stirring until a starch is formed; let it cool, and then add one-third of a cup of yeast. This forms a 'sponge,' which should remain in a moderately warm place for ten or twelve hours, or 'over night,' until it becomes very light and frothy, even if a little sour, it is of no consequence. When the 'sponge' is ready, add flour, and work it until you have formed a stiff, firm mass. The longer and more firmly this is kneaded, the better the bread.

Let the kneaded mass remain say from a half to three-quarters of an hour to rise, then divide into pans, where it should remain say fifteen minutes, care being taken that it does not rise too much and crack; then put the loaves into a quick oven and bake, say three-quarters of an hour. If the oven is not hot enough, the bread will rise and crack; if too hot, the surface will harden too rapidly and confine the loaf.

A Fine Orchard.—Moore's New Yorker gives an account of the orchards of Austin Penney, Clarkson, Monroe Co., N. Y., who has for several years past devoted himself to the collection and planting of fine fruit, and more particularly of peaches, for the best varieties of which he has ransacked the whole United States. The editor of the *New Yorker* states that he has 28 acres occupied with fruit trees, of which there are 3000 peach trees, and 2700 dwarf pears. Most of them have been set out about three years. They are stated to be exceedingly thrifty and healthy, many of this year's shoots being four to five feet long. The land was subsoiled before planting, and heavily manured with a compost of yard manure and muck. The soil is kept mellow by cultivation, but no annual crop is admitted, except an occasional crop of beans in the peach orchard. No wonder these orchards should be so widely celebrated for their thriftiness, with such treatment as this.

Onions for Fowls.—Scarcely too much can be said in praise of onions for fowls. They seem to be a preventive and remedy for various diseases to which domestic poultry is liable. Having frequently tested their excellencies, we can speak unhesitatingly. For gapes, and inflammation of the throat, eyes, and head, onions are almost a specific. We would recommend feeding fowls, and especially the young chicks, with as many as they will eat, as often as twice or three times a week. They should be finely chopped. A small addition of corn-meal is an improvement.

[Farming Mirror.

Duration of Life.—If 100,000 children, born at the same time, are followed and numbered at equal intervals on the journey through life, it is found that, according to the present mortality in England, 66,061 pass the age of 20, 53,824 pass 40, 37,998 pass 60, only 9,382 pass 80. Consequently, 33,939 never reach the second age (20–40;) 46,176 never enter the third age (40–60;) 62,002 never attain the fourth age (60–80;) and 99,998 never see the last year of the possible natural life-time of Englishmen.

Opposition.—"A certain amount of opposition," says John Neal, "is a great help to a man. Kites rise *against* and not *with* the wind. Even a head wind is better than none. No man ever worked his passage any where in a dead calm. Let no man wax pale, therefore, because of opposition. Opposition is what he wants, and must have, to be good for any thing. Hardship is the native soil of manhood and self-reliance. He that cannot abide the storm without flinching or quailing, strips himself in the sunshine, and lies down by the wayside to be overlooked and forgotten. He who but braces himself to the wind, to struggle when the winds blow, gives up when they have done, and falls asleep in the stillness that follows."

VARIETY.

In recent Parliament papers we have a full exhibit of the workings of the cheap postage system in Great Britain. The penny postage system went into operation in 1840, and it is found that the letters mailed have increased 500 per cent. between 1839 and 1853, viz.: being 82,000,000 in 1839, and 410,000,000 in 1853, and the increase is still going on. The figures for 1853 are as follows: Estimated number of letters, 410,817,489; net revenue after deducting cost of management, £1,173,727; cost of management, £1,400,679. There was a profit in the Money Order Office Department of £14,149.

Remember, you who are tillers of the soil, that your cares and troubles and anxieties are few and far between, compared with those suffered by commercial men. If your chances to become rich are not so inviting and profitable as those of the tradesman, bear in mind that the dangers of being very poor and destitute are far less. Famine and abject poverty seldom overtake the farmer, or haunt him in their ghostly visits.

A live toad, in a torpid state, was recently dug out of "hard pan" at Rutland, Vt., some 15 feet below the surface, where he must have reposed for centuries. On being laid upon the grass, he soon revived, and hopped off to give the worms and bugs of the nineteenth century a specimen of antediluvian skill in "snapping them up."

A correspondent of the Boston *Journal*, writing from Northborough, Mass., says, that a Mr. Vernis Streeter, of that place, has in his garden a cucumber four feet one inch in length, fifteen inches in circumference; also, two others, three feet eleven inches and three-quarters; and another, three feet eleven and a-half inches in length.

Never be ashamed of confessing your ignorance; for the wisest man upon earth is ignorant of many things, inasmuch as that which he knows is a mere nothing in comparison with what he does not know. There cannot be a greater folly in the world, than to suppose we know everything.

The question has been asked, why it is considered impolite for gentlemen to go into the presence of ladies in their shirt-sleeves, while it is considered in every way correct for the ladies themselves to appear before gentlemen without any sleeves at all.

Death, though certain, and the most tremendous event that can ever occur to man, is, notwithstanding, far less thought of by him than are dollars and cents, or fluctuations of the stock market.

The London Diogenes, alluding to the Russian evacuation of the Principalities, uses the following caption:—"The Russians have taken *Themselves off!* The slaughter was very great."

On Tuesday night, Sept. 5, the house of Mr. Baldwin, at Moriah, Essex County, N. Y., was burned down, and himself, wife, and four children, were burned to death.

Ayer's Cherry Pectoral.

"Wisdom shall bow down to it, and the great of the earth, shall kneel before it."

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La., April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.

Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere.

Election Notice.

STATE OF NEW YORK—Secretary's Office, Albany, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal-Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

Sheriff's Office, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

BE TRUE TO YOURSELVES.

An Address delivered before the Ladies' Literary Society of Alfred Academy, July 3, 1854, by Miss E. E. KENYON.

Another year has flown over as a swift-winged bird, and nestled away amid its companions already past. Though swiftly passed and faintly remembered, it has left an impress upon our souls that time can never efface. Our young spirits have come up here to worship together at the shrine of Knowledge; a few of us have joined hands in that worship, and offered our devotions together. Our intellectual offerings have been laid upon one common altar, and the God of Knowledge has bestowed one common blessing upon us all. Our interests have been one—our aims have been one—our hopes and aspirations one. Why wonder, then, that a tone of sadness is mingled with our rejoicings? We are about to separate. As the autumn wind, sporting in the forest, sweeps together the careless leaves at one time, and at another scatters them forever in its ruthless gaiety, so have we been borne together—so shall *we* be scattered. But though the capricious wind of circumstance shall bear us forever apart, it cannot controll the affections. Our hearts will still beat in unison—the interest of one shall still be the interest of all. Often will we wander back in spirit to this pleasant Association, and suffer our hearts to linger around this hallowed temple. All my hopes and anticipations for your future well-doing center in these few words which I have chosen for my theme this evening—BE TRUE TO YOURSELVES.

You are about to assume new responsibilities—duties will devolve upon you which cannot be faithfully discharged except by the utmost diligence and watch-care. See, therefore, that ye be sufficient unto your task. Do not thoughtlessly assume new responsibilities, but when a duty is required at your hands, come up bravely and discharge that duty. There have been talents given to each of you for improvement—to some two, to others five. Be sure that you have a just estimate of these talents. Wrong not yourselves, nor show ingratitude to the Giver, by undervaluing the gift. Neither injure yourselves nor impose upon others by an over-estimation of your powers. Weigh in the balance, and be content with the weight. Repine not, though others may be entrusted with more. Do you justice even to that which you have? Why then ask for more? Many a fine intellect has remained undeveloped through lack of appreciation on the part of its owner—many an other through supposed lack of inducement to development. Be ye not thus foolish, sisters. You have ability—you have inducement to improve that ability. What though you may never be called upon to become an orator, a statesman, a judge, or to occupy the presidential chair—are these the only motives that should prompt to effort? True, these are great inducements to most minds, and often supply untiring industry and unwearying patience to votaries of worldly fame. But to you, who have not these inducements, the true motive still remains—the motive that should actuate every human being—infinitely higher and purer than worldly honors can offer—it is the full development of our being. "Be ye perfect, even as I am perfect," saith the Holy One—an express command to each of you to develop your intellect, your heart, your whole being; for you cannot be perfect with only an intellect—neither with only a heart. Then falter not from supposed lack of motive. Waste not your youthful hours in idle day-dreams—in sinful repinings; nor seek to satisfy those aspirations of your soul for something it has not by offering to it the hollow attainments of fashion and folly. When it asks for substance, will you give it the shadow? When it pines for sunlight, will you shroud it in darkness?

Were humanity only inspired by the right motive, what a difference would there be in the result of human actions! No longer would we be governed by rulers, ambitious only for power; no longer would orators speak to us for applause, or legislators sell their souls for money; nor would the strongest intellect be coupled with unholy ambition. The good would feel obligated to cultivate the intellect; and as the motive was purer, would not the energy inspired by that motive be more untiring, and the action more effective; and, consequently, would not the improvement be greater, and the intellect brighter? Never be satisfied with anything less than the highest degree of development you may obtain. The gifts of God are never unmeaning, and think you He would have given you an intellect when He intended the heart alone should be cultivated? Would He have given you high and noble aspirations, merely to taunt your ineffectual efforts toward their realization? Never. His justice forbids us to harbor such a thought. Do not be frightened by friends telling you that development is unnecessary, inasmuch as it cannot be made to subserve practical purposes; never fear; there are innumerable situations in which true women are needed—besides, there are doors yet unopened, that but wait for some skillful hands to apply the key; and then, laborers will be needed to explore these unknown places. But suppose you should not make practical application of all your attainments here; remember, there is another life to live, where all these will be requisite, and the greatest thing we can do in this life is to prepare for another. This should be the object to live for. I am aware this is not the prevailing opinion, as a little incident will illustrate. A young lady of one of our Eastern States having received all the advantages of a liberal education, founded upon just principles, and having improved these advantages, and developed under their influence, bade fair for a long life of usefulness and distinction, when suddenly the angel of death snatched her away. What an outburst of grief, that her usefulness was gone! What a deal of lamenting, that so much money had been expended for nought—the result of so much pains-taking lost—as if it was a matter of little consequence to prepare for a higher school—as if, when God had provided them with means for her education, she should have been returned to Him as undeveloped as when entrusted to their care. I tell you, that young lady came nearer fulfilling the design of God, than many, very many, who live their three score years and ten.

If you would develop your intellect, *think for yourselves*. Have not your minds the same capability of thought as others? Then why not make use of this capability, instead of depending upon others to think for you? It is a duty you owe to yourselves, because you are the one responsible for your condition—a duty you owe to others, because no one else has just such a mind as yours, and you also receive the benefit of their thoughts—a duty you owe to God, because He commands you to "prove all things." If you would be original thinkers, when you commence to examine a subject, fix your mind upon that subject, and no other. Take it, and retire into the hidden chamber of your soul, and there sit down, and reason concerning it, candidly, and without prejudice, carefully, and with perseverance. You will be surprised at the power of the mental capacities you have so often insulted by calling them powerless. The reason why we know so little of life's great truths, is because we *think* so little. We are too apt to give credence to other people's beliefs, without knowing the why. This should not be. Because others have thought before us, and have given us the result of those thoughts, is no reason why we should become thoughtless. If they tend to make us think less, they are a detriment rather than an advantage. Their proper office is to improve our judgment, and enable us to think more comprehensively.

Act independently. You were never made to be carried through the world upon the backs of other people. This indeed might do for children and idiots, but you who have grown to the stature of women are (or should be) able to sustain yourselves anywhere. Remember, you are accountable to God for your actions, and not to any member of the human family; and to act a certain way because another does, is no valid reason for such action. Act because it is right—without reference to others' views, even if your convictions compel you to act alone—even if they draw down upon you the contumely of your nearest friends. Can you not endure the sneers and taunts of mortals, when you feel an assurance within, that you have the approval of God? Remember, the present is the time for action. Days are too few, hours too fleeting, to be wasted in useless delays and idle amusements. Think deliberately, act promptly, and every effort will count among the useful. Let right motives rightly acted upon be your guides, and you will not only become noble yourselves, but your influence, your example, will tell for the good of others. In being true to yourselves, you will be true to others; in being true to others, you will be true to God. That you may be thus true to yourselves, to others, to God, is my earnest wish; and should we never again behold each other's faces, or list to familiar voices, may we so have lived in this world of preparation, that we shall be prepared to meet in the world of fruition.

CHRISTIAN COURAGE.

There is something noble and heroic in that disposition which can dare to be singular in the cause of religion and morality, which, with a mind conscious of doing right, can fight single-handed the battle of the Lord against the host of scorners by which it may be surrounded. It is not a part of virtue to be indifferent to the opinion of others, except that opinion be opposed to the principles of truth and holiness; then it is the very height of virtue to act above it, and against it.

Ridicule is not the test of truth, but it is one of the most fiery ordeals of that courage by which the truth is professed and supported. Many have been vanquished by scorn, who were invulnerable to rage; for men in general would much rather have their hearts reproached than their heads, deeming it less disgraceful to be weak in virtue than deficient in intellect. Strange perversion! the effect of that pride which, being injected into our nature by the venom of the serpent in paradise, still continues to infect and destroy us. Let us oppose this working of evil within us, and crucify this affection and lust of the flesh. Let no ridicule deter us from doing what is right, or avoiding what is wrong. Let us emulate the sublime example of the apostle, "We are fools for Christ's sake." This is the noblest effort of human courage, the loftiest achievement of virtue—to be "faithful found among the faithless," and willing to bear any contumely rather than act in opposition to the convictions of our judgment, and the dictates of our conscience. Infinitely to be preferred is it, to be scorned for doing what is right, than applauded for doing what is wrong. From the laughter of the wicked, you may find a refuge in the approbation of your conscience, and the smile of your God; but in what a miserable situation is that poor, cowardly wretch, whose dread of singularity has led him to sacrifice the convictions of his conscience, and who has nothing to comfort him under the frowns of Deity, but the applause of fools!

Neither in little things, nor in great ones, suffer your dread of singularity to turn your feet from the path of integrity. Arm yourselves with this mind, to do what is right, though you can find neither companion nor follower. [Rev. J. A. James.

SYSTEMATIC BENEVOLENCE.

A Report on Charitable Contributions was adopted by the General Association of Massachusetts, at its last meeting; from which the following is an extract:—

There is manifestly in connection with our benevolent institutions a great evil to be corrected.

Some churches contribute almost nothing; others willing to give are overlooked by the collectors of funds, on account of pecuniary feebleness, and in the churches generally, too large a per centage of the collections is required to meet the expense of taking them. There is also too much confusion and inefficiency in the whole matter, resulting from want of system.

A remedy must be provided, or we expose our whole benevolent system to go by the board.

We look for the remedy in the pastors themselves. It can come from no other quarter. Agents and managers of societies may maintain the closest practicable economy, and yet the costs of collection will make disheartening inroads upon the amounts contributed. It is moreover the proper business of pastors to see that the churches under their care are provided with knowledge and with opportunities for wise action on these subjects. Nor is a church ordered aright until its benevolence is brought into system. Reform must be immediately attempted. Are we willing that our benevolent enterprises should be abandoned or crippled? Are we willing that a large per centage of our people's contributions should be expended in collecting? Must we not take a personal responsibility in this matter, and act as agents in our own congregations?

It is the opinion of your committee, that *every church* ought to do something *annually*, or as often as once in two years, for our prominent objects of Christian Benevolence. We do not expect those churches which are assisted by the Home Missionary Society; nor any church which has in it so much as a single poor widow who wishes a partnership in the world's conversion by giving those "two mites which make a farthing."

Among the reasons why every church should contribute something are the following:

1. Every church has a share in the gifts, commands and promises of the gospel.

2. Bringing these subjects before a people for contribution increases their knowledge of the religious state of the world, and deepens their interest in its conversion.

3. It strengthens their faith and gives fervor to their prayers.

4. It cultivates the spirit of benevolence, which is the spirit of Christ.

5. It increases self-respect, making the Christian conscious that he shares with his brethren in the work of the Lord, and thus elevates the feebler churches.

6. It makes it easier to support the gospel at home. If a pastor wishes to starve himself out, let him allow no contributions to be taken among the people for general objects.

RELIGION AND BUSINESS.

It has been a mighty mischief that religion, has so often been divorced from the other modes and ways of men. Men have looked at it as something distinct and peculiar, having its own sphere and its own powers, and not as the fountain and father of all goodness and truth. The man of God has been separated from the man of science, the man of politics, the man of business. The world has helped the separation, and so has the church. An ignorant piety, a strong and shrewd impiety, have done the same work. The general exercises of the intellect, the common charities of the heart, the familiar proceedings of the life, have been too frequently regarded as provinces into which religion has no right to penetrate, or should only come when invited, and be thankful to be treated as a guest, and not expect to be honored as a sovereign. Hence literature, art, social life, wordly engagements, have been treated as things apart from godliness, and not as things which godliness is to possess, and through which it is to act and be seen. To borrow an expressive illustration, the partnership has been dissolved between religion and other business, and thus it has come to a disastrous bankruptcy. That it is so is apparent from the fact, that there is a general disposition to regard immoralities connected with money matters in a different light from other immoralities. The same standard is not applied, the same measure is not meted out. There is more gentle treatment of the pecuniary sinner than of any other sinner. "It is only the way of business," covers a multitude of sins. A man, in many circles, had better defraud his creditors than deny a single article of the popular creed, or violate a single conventionalism of respectable society.

[A. J. Morris' "Religion and Business."

The following beautiful lines from the Dublin University Magazine will remind the reader of the last scene in Bunyan's "Pilgrim's Progress:"

BEYOND THE RIVER.

Time is a river deep and wide;
  And while along its banks we stray,
We see our loved ones o'er its tide
  Sail from our sight away, away.
Where are they sped—they who return
  No more to glad our longing eyes?
They've passed from life's contracted bourne
  To land unseen, unknown, that lies
            Beyond the river.

'Tis hid from view; but we may guess
  How beautiful that realm must be;
For gleamings of its loveliness,
  In visions granted, oft we see.
The very clouds that o'er it throw
  Their veil, unraised for mortal sight,
With gold and purple tintings glow,
  Reflected from the glorious light
            Beyond the river.

And gentle airs, so sweet, so calm,
  Steal sometimes from that viewless sphere;
The mourner feels their breath of balm,
  And soothed sorrow dries the tear.
And sometimes list'ning ear may gain
  Entrancing sound that hither floats;
The echo of a distant strain,
  Of harps and voices blended notes,
            Beyond the river.

There are our loved ones in their rest;
  They've crossed Time's River—now no more
They heed the bubbles on its breast,
  Nor feel the storms that sweep its shore.
But *there* pure love can live, can last—
  They look for us their home to share;
When we in turn away have passed,
  What joyful greetings wait us *there*,
            Beyond the river.

BAPTISTS OF ENGLAND.

The following account of the Baptists of England is taken from that part of the late census of England which relates to religious worship. It is a part of the report presented to Sir George Graham, the Registrar General, by Mr. Horace Mann, who is highly praised for the pains-taking and impartiality with which he has performed his task.

The distinguishing tenets of the Baptists relate to two points, upon which they differ from nearly every other Christian denomination, viz., (1) the proper subjects, and (2) the proper mode, of Baptism. Holding that the rite itself was instituted for perpetual celebration, Baptists consider (1) that it was meant to be imparted only on profession of belief by the recipient, and that this profession cannot properly be made by proxy, as the custom is by sponsors in the Established Church, but must be the genuine and rational avowal of the baptized person himself. To illustrate and fortify this main position, they refer to many passages of Scripture which describe the ceremony as performed on persons of undoubtedly mature intelligence and age, and assert the absence from the Sacred Writings of all statement or inevitable implication that by any other persons was the ceremony ever shared. Adults being, therefore, held to be the only proper subjects of the ordinance, it is also held that (2) the only proper mode is, not, as generally practiced, by a sprinkling or affusion of the water on the person, but by a total immersion of the party in water. The arguments by which this proposition is supposed to be successfully maintained, are gathered from a critical examination of the meaning of the word *baptism*, from the circumstances said to have accompanied the rite whenever its administration is described in Scripture, and from general accordance of the advocated mode with the practice of the ancient church.

These views are entertained in common by all Baptists. Upon other points, however, differences prevail, and separate Baptist bodies have, in consequence, been formed. In England, the following comprise the whole of the various sections which unitedly compose the Baptist denomination:—

1. General (Unitarian) Baptists.
2. General (New Connection) Baptists.
3. Particular Baptists.
4. Seventh-day Baptists.
5. Scotch Baptists.

(1, 2, 3.) The difference between the "General" and the "Particular" Baptists refers to the doctrine of election, as described before. The General (or Arminian) Baptists hold that salvation is designed for men in general, without any preördination of a special number; the Particular (or Calvinistic) Baptists hold that a particular portion of mankind has been from all eternity predestined to be saved. A sort of Synod of the Calvinistic—much the larger—section of the Baptists was convened in London in 1689, at which a Confession of thirty-two articles was adopted, agreeing in all respects (except upon the single point of baptism) with the Confession of the Westminster Assembly, and with the Savoy Declaration. Previous Confessions to the same effect had been put forth by seven London congregations of Particular Baptists in 1643, and by an assembly of ministers and elders, both from London and the country, in 1677. The General Baptists, towards the termination of the seventeenth century, seem to have become impregnated with anti trinitarian sentiments, and these opinions gained considerable influence in that portion of the Baptist body subsequently to the agitation on the subject which commenced throughout the west of England in 1719; so much so, indeed, as to induce the secession of those churches which adhered to the orthodox doctrine of the Trinity. All General Baptist churches, therefore, which are Trinitarian, are now included in the "General Baptist New Connection," which was formed in 1770 for the purpose of maintaining the original tenets of the General Baptists, as received by their earliest English churches in the opening of the seventeenth century. These may now be said to be, respecting doctrine, "Evangelical Arminian." The principal founder of the Connection, in 1770, was the Rev. Dan Taylor. The assembly at which it was originated issued, to explain the grounds of their secession, six articles of Religion, which declare, (1,) the fall and depravity of man; (2,) the perpetual obligation of the moral law; (3,) the divinity of Christ and the universal design of his atonement; (4,) the provision of salvation for all who exercise faith; (5,) the necessity of regeneration by the Holy Spirit; (6,) the propriety of baptism by immersion, on repentance. Upon other doctrines, not embraced by these six articles, the General Baptist New Connection is substantially agreed with other evangelical denominations.

(4.) The "Seventh-day Baptists" differ from the other General Baptist churches simply on the ground that the seventh, not the first day of the week, should be the one still celebrated as the Sabbath. They established congregations very soon after the first introduction of Baptists into England, but at present they have only two places of worship in England and Wales.

(5.) The "Scotch" Baptists derive their origin from the Rev. Mr. M'Lean, who, in 1765, established the first Baptist church in Scotland. Their doctrinal sentiments are Calvinistic, and they differ from the English Particular Baptists chiefly by a more rigid imitation of what they suppose to be the apostolic usages, such as love-feasts, weekly communion, plurality of pastors or elders, washing each other's feet, &c. In England and Wales there are but fifteen congregations of this body.

With respect to church polity and order, there is scarcely any difference between the Baptists and the Independents or Congregationalists. The churches of the former are as independent of each other as the churches of the latter body; and, in their discipline and order, Baptists are to the full as congregational as Congregationalists. Ministers and deacons are appointed by election of the churches, whose exclusive province it is also to decide upon the fitness of the candidates for baptism and communion—submission to the rite invariably preceding, in the major portion of the churches, [illegible] sacrament. The same repudiation, also, is displayed of formal creeds or articles as adequate or proper tests of orthodoxy, and the same rejection of all interference with Christ's spiritual kingdom on the part of any secular power. Like Independents, too, they have their county and other associations, and their aggregate "unions." The union of the Particular Baptist churches was formed in 1812, and consisted, in 1851, of 1080 churches. Each of these churches sends, or may send, representatives, both clerical and lay, to an annual conference upon the general interests of the body; though extreme solicitude to keep intact the fundamental principle of Independency, and apprehension lest a delegated body might, by imperceptible degrees, assume the functions of a synod, have prevailed to hinder many Calvinistic Baptist churches from appointing representatives. The yearly assembly of the New Connection of General Baptists is called an "Association," and is constituted in the same way as the "Union;" it consisted in 1851 of 99 representatives, deputed by 53 churches.

The Baptists, as an organized community in England, date their origin from 1608, when the first Baptist church was formed in London; but their tenets have been held, to greater or to less extent, from very early times. The Baptists claim Tertullian, (A. D. 150—220,) and Gregory of Nazianzen, (A. D. 328—389,) as supporters of their views, and contend, on their authority, that the immersion of adults was the practice of the Apostolic age. Their sentiments have ever since, it is affirmed, been more or less received by nearly all the various bodies of seceders which from time to time have parted from the Church of Rome—as the Albigenses and Waldenses, and the other innovating Continental sects which existed prior to the Reformation. From the agitation which accompanied that great event, the opinions of the Baptists gained considerable notice, and the holders of them underwent considerable persecution. In 1533, a fanatical sect, which denied the Trinity, the Incarnation, the authority of magistrates, the lawfulness of oaths, and incidentally the practice of infant baptism, raised a tumult in the city of Munster, and committed great excesses. From their views on Baptism—not the most conspicuous of their doctrines—they were generally spoken of as Anabaptists, or Rebaptizers; and the obloquy which followed their misdeeds at Munster came to be attached to the name itself of Anabaptist, and has scarcely even yet, perhaps, entirely disappeared. The name is, therefore, reasonably objected to, as implying principles which Baptists, equally with other Protestant Churches, hold in detestation.

In England, Baptist doctrines were maintained by the early British churches; and Augustine failed in his endeavors to induce them to conform to the practice of the Church of Rome. It is probable that these opinions never wholly vanished from the country, but were held, in conjunction with their more conspicuous tenets, by many of the religious reformers who from time to time appeared. The Lollards, it is said, were much impregnated; and Wycliffe himself is claimed by the Baptists as an advocate of their ideas. In 1535, fourteen Dutch Anabaptists were put to death; and, in 1575, a congregation of the same people and persuasion were discovered in Aldgate, the whole of whom were either brought to execution, or imprisoned, or exiled. John Smith, the founder, as already mentioned, of the earliest Baptist church in England, (1608,) had been a minister of the Established Church. He embraced Armenian doctrines, and his church, in consequence, consisted of what are now denominated General Baptists. The first Calvanistic (or Particular) Baptist church was formed in London, in 1633, by an offshoot from an independent congregation. The Puritan historian, Neal, conjectures that, in 1644, the number of Baptist congregations in England was 54. The Baptists suffered rigorous persecution in the reigns of the Stuarts; but they were at length relieved from most of their oppressions by the Toleration Act of 1688, and have since considerably increased. In 1716, Neal reports the number of their churches in England alone (excluding Wales) to have been 247. A computation made by one of their ministers in 1772, gives 404 congregations in England, (Wales again excluded.) A calculation for the year 1790 shows the number for the same extent of territory to have been 332; but as this estimate did not apparently include the Arminian Baptists, probably the number should be raised by about 100, or to 432. In 1832, the Calvinistic Baptist churches are reported at 926, which number, by the addition (say of 200) for the General Baptists and the New Connection, would be raised to 1126. In 1839, the Calvinistic Baptist congregations were computed at 1276; and, allowing 250 for the other Baptist churches, the total number would be 1526. These several estimates relate exclusively to England. Wales, for the periods for which accounts are extant, shows that in 1772 there were 59 congregations, (of all kinds of Baptists;) that in 1808 there were 165 congregations (also of all kinds;) while in 1839 there were 244 congregations of Calvinistic Baptists. At the recent census the numbers were:

BAPTIST CONGREGATIONS.

	England.	Wales.	Total.
General Baptists, (Unitarian,)	90	3	93
General Baptists, (N. Connection,)	179	3	182
Particular Baptists, (Calvinistic,)	1574	373	1947
Seventh-Day Baptists,	2		2
Scotch Baptists,	12	3	15
Baptists undefined,	492	58	550

THE PURE HEART.

In a discourse on the words, "Blessed are the pure in heart," Mr. Caughey once remarked, that it was impossible to sully a sunbeam. "And while that sunbeam," said he, "may dart down into the darkest hole of filth and illuminate it, it will soil nothing, and yet not be soiled itself. So the ray of heavenly life and love existing in the perfect believer's heart, goes into and comes out into contact with the dark dwelling-places of iniquity and filth, and cheers, and enlivens, and encourages by its presence, but is always kept unspotted from [illegible] It is God that gives to the pure heart this great gift and distinction. It is He who can keep the heart in perfect peace. Suppose a white-robed female were walking along some turnpike road where the mud was flying, and where the horses and wagons, as they hurried and splashed along, at every turn and step increased the confusion, hemmed up the foot-path, and threw the water and dirt. Suppose that white robed female should find at her journey's end her white dress as spotless as when she was first robed—Would not this be a miracle? Most surely it would. But a miracle it is that the Christian, in waging his course through this world, in fighting through trials and temptations, and in struggling with the fierce adversary, does not have some stain or mark of conflict on his garments. He cries out, 'Glory to God! free and unspotted too.' It is a miracle of grace—of the grace of our Lord and Saviour Jesus Christ. Praises be unto his precious name!"

FAMILY RELIGION.

If I may divert attention for a moment from the city to the country, it will be to notice a fact touching the question of religion or no religion in the family in the long run. Being on the farm of a good deacon, a few days since, some ten miles out, I asked him, as we were surveying his ample acres and rich harvests, whether his prayerless neighbors did not get as good crops as he, and prosper on the whole about as well. He answered, that they might for a season or two, but not on a long pull, and modestly stated the following facts: His own ancestors, six generations back, settled on that very spot, and bore a decidedly religious character, the male head being deacon of an evangelical church. The father of each succeeding generation had been a deacon of a similar church, and he, the sixth from the first, was a deacon of the orthodox church in that place, and at the head of a fine young family. They had all been families of prayer, firm supporters of public worship, the Sabbath, etc., and had all lived on the same farm, now one of the richest in the State, and consisting of four hundred acres. Now for the other side: In that very neighborhood three other families settled at the same time with his original ancestors, and with an equally good homestead, but without religion, and each succeeding generation had been without religion, and without the voice of prayer in their dwelling. Two of these families had run nearly out, there being but one or two representatives living, and they dispossessed of their inheritance; and of the third some had been in the State Prison, and all were badly off. I was left to make my own inference from these facts, and so are your readers, who, I doubt not, will conclude, that family religion, in one neighborhood at least, had something to do with good farms, good crops, good children, and all the other good things of this life. [Independent.

PRAYER IN THE FAMILY CIRCLE.

Endearments bind together the members of the same household—sharers of the same flesh and blood, which are found of the same kind and degree nowhere else on earth. The dwellers in this common home, too, have a common share in the blessings and trials which befall their habitation. They are fed at the same board, repose under the same roof, and the joys and sorrows of *one* are very much the joys and sorrows of the whole group. What a place these parents hold, too, in this little empire. How their words have power, and their will is law, and their very footsteps are walked into; and how those whom God has given them are prized beyond all earthly things, as the jewels of their casket. Where, where in all this footstool of the dispenser of our mercies, should God be acknowledged, if not here? Shall not the voice of gratitude and praise ascend from that board spread with plenty, and around an altar reared for the morning and the evening's sacrifice of humble and grateful hearts? You may not only burnish your own armor, and find refreshment for your own spirit here, soldier of Christ, but here is a favored spot on which to train recruits to join the sacramental hosts. You should pray in your family. [Leyburn.

The *Baptist Register* learns that Rev. Cephas Bennett, of Burmah, is on his return home to recruit his health. Mrs. Bennett remains at Maulmain.

THOUGHTS ON MUSIC.

The God of Nature has not bestowed a more charming gift upon man than the faculty of combining and arranging sounds, so as to make what we call Music. Designed for the solace of our sorrows, and the improvement of our joys, its cultivation for these ends is indicated as a duty. And as our earthly pilgrimage alternates with sorrow and joy, those who set their faces against the cultivation of music are justly chargeable with infringing upon the laws of human existence. The world cannot live without it. It is so natural to express the joyous emotions in strains of music, that to forego and restrain the gratification seems like an unwillingness that such emotions should have place in the breast. And who is he that would set himself up as an enemy to the indulgence of such emotions? Is he not to be looked upon with suspicion? It is not to be wondered at, therefore, that the Bard of Avon has said,

> "The man that hath not music in himself,
> And is not moved with concord of sweet sounds,
> Is fit for treasons, stratagems, and spoils;
> The motions of his spirit are dull as night,
> And his affections dark as Erebus:
> Let no such man be trusted."

So much is music in accordance with our nature, that it is cultivated by all classes of men. There is not a nation, or tribe, to be found on the earth, that has no idea of this accomplishment, or that does not cultivate it in greater or less perfection. The savage as well as the civilized portions of the earth resound with its charms. It is heard in the [illegible] huts of the far North, as well as in the tents of the South. The North American Indian, the wandering Tartar of Asia, the African negro, and the untutored Australian, all confess its soothing power; nor can there be found a class of beings having ears, and souls, and human passions, who will not prove themselves to be more or less susceptible of its impressions. God made man musical, and only as he is *un*-made, perverted and depraved, is he rendered unmusical.

If God made man musical, it is not mere poetic fancy, that represents our first parents as singing a hymn of praise to the Creator, in the garden of Eden. No doubt they sang; and though Inspiration has favored us with no particular account of the matter, we may safely aver, that the melody of that song, as well as its harmony and rhythm, has never been equaled by any of their degenerate children. It was the song of those that were holy. The human voice had not then been marred; it was just as it came from the Creator's hand, an organ formed and tuned by God himself. The shepherds of Bethlehem may have heard its equal, when the second man, the Lord from heaven, came down to redeem us. Or the Seer of Patmos, who, rapt in ecstatic vision, heard the song of the redeemed in heaven, may have heard strains that vied with, and even excelled, those of the first holy pair. But surely, among mortals, whose voices are made tremulous by the palsying stroke of age, have never been heard sounds of so sweet a tone. When the redeemed of the Lord shall have gotten the victory over sin and the grave, the rich swelling harmony of paradise may be heard again; but till then, the sweetest cadences of mortal music will be but a faint approximation to the strains that poured from the lips of Adam and Eve.

Theirs was a song that disturbed the Adversary. The holy angels heard it, and were glad. But the fallen angel, *because* he was fallen, resolved that such songs of gladness should cease. His purpose was effected. The bowers of Eden were no longer resonant with the praises of the Creator. Sorrow was appointed to Adam, and greatly multiplied sorrow to Eve; and they sang no more, till the riches of free grace promised the bruising of the serpent's head. Their children were not born musical, as they themselves had been created musical. Cain and Abel could not sing together. And though among Cain's descendants was found one, that was styled "the father of all such as handle the harp and organ," (Gen. 4: 21,) and must, therefore, have possessed some capacity for the heaven-gifted art, yet even in him we recognize only a rude attempt at reviving what had been lost. We believe that Adam and Eve did sing again after the glad news of salvation through a Redeemer was announced to them; but they sang with impaired vocal powers. The instrument was untuned; the harp was unstrung; sin had struck it, and spoiled its melody.

But, thanks be to our Creator, the melody of song is not utterly banished from the earth. Through the timely interposition of a Mediator, the great Restorer, the rigors of the curse pronounced upon our first parents were mitigated. In its original severity, it doomed the very ground to barrenness; but through the mediation of Christ, this barrenness is partly removed, and the rain comes down from heaven, to render the earth so far fruitful as to give seed to the sower, and bread to the eater. (Isa. 55: 10.) So in regard to music, the voice that gave utterance to the songs of paradise, and made the first Sabbath a day of praise and joy, was hushed for a season. The curse which doomed man's body to disease and death, took effect in his blood, and in his bones, and in all his members and vital organs. The instrument which God had fashioned so exquisitely, and tuned so perfectly, and placed in the throat, just where the lungs, like the bellows of an organ, could fill it with richest melody, partook of the general disorder. It was a cracked and broken instrument, and was well nigh being laid aside as forever useless. But through the grace of the Messiah, there is already a partial redemption from this ruin, even as there is of the earth from its sterility. Man's voice yields to cultivation, as the earth does to tillage. And though no cultivation suffices to restore its primitive sonorousness, just as no skill of agriculture restores the earth to its paradisiacal fruitfulness, the extraordinary attainments of some, in this department, may be regarded as suggestive, in some degree, of what the voices of our first parents were originally, and as faintly foreshadowing what the human voice will again become, when the ransomed shall sing the song of Moses and the Lamb. The carols of the Sweedish Philomel, so rich, so ravishing, that thousands "stood entranced, and had no room for thought," have shown what one of Eve's daughters can do. But richer, and more ravishing, must have been the strains that waked Eden's bowers to praise, when the Mother of Mankind lifted up her voice in song. T. B. B.

BRITISH CORRESPONDENCE.

GLASGOW, September 22d, 1854.

Cholera, spread more universally, more speedy in its issue, and in a much larger proportion of cases fatal, than on any former occasion, proclaims still, that the Lord is displeased with the nations. War, also, with all its dread accompaniments and melancholy consequences, is testifying the same solemn truth. But into the aims and prospects of those immediately engaged, we enter not here. We do not doubt, however, that the incidents attending the conflict are having an influence on the great question of the Sabbath of the Lord. The development of this may yet be made matter of record; meanwhile we note the more obvious evidences of progress in the restoration of Sunday to its rightful place.

Yesterday week, a deputation of the citizens of Dublin, headed, by the Rev. Dr. Gregg and the Rev. Mr. Minchin, waited on the Police Commissioners in the Castle, on the subject of Sunday observance in that city. After hearing the statements of the deputation, Colonel Brown said, "The object of this deputation, which is composed of very respectable persons, appears to be to impress upon us the necessity of *putting in force an old Act of Parliament*; but we will require some time to consider before we give an answer, in order to see if matters can be made better without *the great difficulties* which must ensue from putting so ancient an act in force." Yes, our Sunday friends may rest assured, that the difficulties standing in the way of putting old Acts of Parliament in force are increasing year by year, and the sooner they return to the duty of giving obedience to God's law the better.

The telegraph announces the result of the Half-Yearly Meeting of the Shareholders of the Caledonian Railway Company, held yesterday in London. There was much difference of opinion as to the general policy of the Directors; but when Mr. Colquhoun of Luss moved the resolution, "that the servants of the Company be rested on Sunday, and that no systematic, predetermined work be required from them on that day, (seconded by Mr. Clark,) only eight hands were held up for it, and the motion was negatived." The same motion had been moved by the same gentleman at the meeting in March last, with similar result. A Linlithgow correspondent of the *Scotsman*, dating the 9th instant, says that on the Edinburgh and Glasgow Railway—the Directors of which refuse to carry Sunday passengers—on the preceding Sunday, as occasionally on the Sunday for the last two or three years, a train of from 15 to 20 empty carriages was seen on the line, passing Linlithgow as people were going to church, about half past 11 o'clock. On nearly all the other Railway lines, there are regular Sunday trains, which have ceased to excite much attention. On some of the English lines, Sunday is one of the great excursion days; and in July, it was stated, there were on the Windsor Railway alone 93 trains on a Sunday—51 running in the one direction, and 42 in the other. Surely, in such circumstances, the argument from universal observance of a day of human adoption, to the exclusion of that sanctified by God's word, loses much of the force given, even illogically, unto it. It would not be easy, perhaps, to ascertain correctly the amount of our Railway Sunday observance, but the extent of this and similar desecrations of the church's day ought to narrow much the controversy, by making the question more exclusively to be, "What saith the Scriptures?" Kew Gardens were visited, on the Sundays of the Summer of 1853, by 120,469 persons. Other places of pleasure had their proportions, and such observance of Sunday, if it be not soon universal, is at least likely to be soon more general. The Select Committee of the House of Commons, arguing for the Sunday opening of the Crystal Palace, in the Report which we formerly noticed, consider it "less excusable," that the National Gallery, the British Museum, the Geological Museum, the Exhibition at Marlsborough and Gore-House, are shut throughout the Sunday, than even the Crystal Palace. As was to have been expected, that Report has excited much apprehension on the part of those who would maintain the present Sabbath apostacy. The *British Banner* (edited by a Congregationalist minister,) thinks the proposals of the Select Committee much worse than the Book of Sports ordered by James and Charles to be allowed on Sundays after evening service. The Tractarian newspaper, the *London Guardian*, on the other hand, has been advocating Sunday evening sports; and sees no harm in the clergyman, as well as the Squire of a parish, countenancing by their presence the Sunday recreations of the people, as the game of cricket, after having been at church. And the *Times* not only sees no harm in Sunday sights, but it continues directly and indirectly to advocate the opening of the Crystal Palace on that day. As one of the principal grounds on which that advocacy rests, is, the few other opportunities which the working men have for such sights, the Rev. Dr. Cumming of London proposes that, in order to prevent Sunday being interfered with, thirteen other days be set apart as holidays, and that during summer large provision be made for afternoon recreation during the week.

The Overland Mail brings intelligence from China that leaves little room to doubt that Canton will soon be in the hands of those who still continue to be called "the insurgents." Some of the chief towns on the Canton river, including Fat-shau (Fah-shau,) the key to the trade, a wealthy and populous city, by water about 20 miles from Canton, and by land half that distance, was taken on the 8th July. The imperialists have done little towards regaining the city; maintaining a feeble and apparently an ineffectually blockade. The country all around is rising, and the authorities and inhabitants are in great alarm. At the back of the White Cloud Hills, and at other places north of the city, assemblages of disaffected collect, who have communications open in the direction of the head quarters of the rebellion, which occasion much anxiety. On the 18th July, the insurgents surprised a detachment of 1000 men, and killed some hundreds of them, near the very gates of Canton, carrying off tents, matchlocks, and ammunition. On the 20th July, some skirmishing again took place, when two or three mandarins were killed, and many of their troops, the latter retreating into the city of Canton only time enough to escape their pursuers. At the latest of these advices, fighting was again expected. "The plans for capturing Canton," says the *Overland Mail*, "appear to have been laid with much foresight and skill."

But there seems some ground for apprehension, and great reason for prayer, in behalf of the leaders of this mighty movement—apprehension increased by the fact that, beyond question, it is the Seventh Day they observe as the Sabbath. We formerly mentioned that the British vessels, the Rattler and Styx, with Sir John Bowring, had gone up the river for Nankin after the Susquehanna had returned. The visit was most unsatisfactory, the British having been treated with more contempt than the Americans had been. They were denied admission to Nankin, where they remained ten days, and refused coal, although there were large supplies on shore. It is not this, however, at which we are either grieved greatly or surprised. Remembering that even when the Hermes was most kindly entertained, they were expressly told that, until affairs were in a settled state, such visits would be inconvenient; and with the knowledge of the fact that the patriots were not ignorant that both Americans and British were in communication with the imperialists; we need be under no surprise that an indifferent reception should be given. But those vessels have brought down some additional books, one of which has been translated by Mr. Medhurst, and three columns of the *Times* are filled with extracts. From these, there is reason to fear that the Eastern King has less respect for the pure word of God, and that he is arrogating titles, or receiving them, which truly belong only in their proper sense to the Holy Spirit. May that Spirit's guidance be vouchsafed. J. A. BEGG.

THE SECOND COMING OF CHRIST—NO. 1.

BY B. CLARKE.

"Unto them that look for him shall he appear the second time, without sin unto salvation."

That the doctrine of the *second personal coming of Christ*, so frequently taught by the Apostles, is now too much neglected by the watchmen of the church, I have not the least doubt; especially, as the day is fast approaching. In briefly presenting this subject, I would respectfully call attention to the *certainty* of his second personal coming; to the *manner* of his coming; and to some things which he *will do* at his coming.

It is said that when "he was taken up, and a cloud received him out of their sight; and while they looked steadfastly towards heaven as he went up, behold two men stood by them in white apparel; which also said, ye men of Galilee, why stand ye gazing up into heaven? this same Jesus which is taken up from you into heaven, shall so come in like manner as ye have seen him go into heaven." Acts 1: 9, 11. It is also said, that, "in the mouth of two or three witnesses, every word shall be established." This then is an established truth, that the same Jesus which was crucified for our sins, and was raised again for our justification—all that constituted the person of Jesus that was then taken up into heaven—shall come again, in like manner as he was seen then to go into heaven. This evidence we should think would be sufficient to convince any reasonable Christian, that Jesus will personally come again to this earth. But if any want further proof, we will look at a few more scriptures.

Mat. 25: 30—"And they shall *see the Son of man* coming in the clouds of heaven, with power and great glory." Rev. 1: 7—"Behold, he cometh with clouds, and *every eye shall see him*." Here we are taught that all shall see him come again.

Cor. 11: 26—"For as often as ye eat this bread, and drink this cup, ye do shew the Lord's death, till he come." This testimony clearly proves that the *same person who died* will come again.

Acts 3: 20, 21—"And he shall *send Jesus Christ*, which before was preached unto you; whom the heavens must receive *until* the times of restitution of all things spoken by the mouth of all his holy prophets, since the world began." Here we learn that the heaven must receive him *until* a given time or times, and then that God will send him again.

1 Thes. 4: 15, 18—"For this we say unto you by the word of the Lord, that we which are alive and remain unto the *coming of the Lord* shall not prevent them which are asleep. For the *Lord himself shall descend from heaven*, with a shout, with the voice of the archangel, and with the trump of God; and the dead in Christ shall rise first; then we which are alive and remain shall be caught up together with them in the *clouds, to meet the Lord* in the air; and so shall we ever be with the Lord. Wherefore, comfort [*exhort*, in the margin] one another with these words." Surely, these are words of great comfort to the believing Christian—this "*lively hope*" of immortality, at the second coming of our glorious Redeemer. Well did the apostle call it a *blessed hope*. Tit. 2: 15, 16—"Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ; who gave himself for us, that he might redeem us from all iniquity, and *purify unto himself a peculiar people, zealous of good works*."

It is our faith, that these, and other like scriptures, are sufficient to establish the *certainty* of the second personal coming of our Lord Jesus Christ.

And now, dear brethren and sisters, permit me to add one word more: "And the Lord make you to increase and abound in love one toward another, and toward all men, even as we do toward you; to the end he may establish your hearts unblamable in holiness before God, even our Father, *at the coming of our Lord Jesus Christ with all his saints*." 1 Thes. 3: 12.

THE PUBLISHING SOCIETY.

The Seventh-day Baptist Publishing Society held its fifth Anniversary at Genesee, N. Y., on the afternoon of Sixth-day and the morning of First-day, Sept. 15th and 17th.

After the usual introductory exercises, reading the Constitution, appointing Committees, &c., the Treasurer's Annual Report was presented. It showed that the receipts of the Society during the year ending June 8, 1854, were $4,501 16; of which $3215 31 was for *Sabbath Recorder*, $189 28 for *Sabbath-School Visitor*, $402 87 for *Seventh-day Baptist Memorial*, $63 05 for advertising, $305 65 for job printing, $20 for office room, $5 for membership, and $300 bequest of B. W. Rogers. The expenses (including a balance against the treasury at last report of $335 10) were $4,500 26, leaving a balance of 90 cents in the treasury at the close of the financial year.

The Annual Report of the Board was then read. It gave a succinct account of the doings of the Board and the condition of the Society's publications. The patronage of the *Sabbath Recorder* had steadily increased during the year, and was at its close larger than at any other time since the paper was established. The *Sabbath-School Visitor* had a patronage barely adequate to meet the expenses of its publication. The *Seventh day Baptist Memorial* had 440 subscribers, a number not sufficient to meet the expenses of issuing the work; but it is hoped that the deficiency will be made up by the sale of bound volumes, of which a goodly number are on hand. The report stated that a volume of Hymns and Music for Sabbath-Schools was being stereotyped, which would soon be issued; and that other works were in contemplation, which would be issued as fast as the Board see occasion and are furnished with facilities. In the matter of securing a building in the city of New York for the accommodation of the Society's business, but little progress had been made, the Board having rather waived it for a time on account of the extra effert required to establish the Palestine Mission; but the object is not lost sight of, and the present is regarded as a favorable time to accomplish it. In conclusion, the Report stated that the financial condition of the Society at the close of the fifth year of its operations, on the 8th of June, was very encouraging, as at that time it "owed no man any thing," while it had accounts and property necessary for the transaction of its business estimated to be worth between two and three thousand dollars.

The following officers were elected for the ensuing year:—

President—Lucius Crandall.
Vice Presidents:
N. V. Hull,
Wm. B. Maxson,
John A. Langworthy,
Charles Potter,
James Bailey,
David Dunn,
Isaac D. Titsworth,
A. B. Burdick,
Stillman Coon,
William Dunn.
Recording Secretary—T. B. Stillman.
Corresponding Secretary—Geo. B. Utter.
Treasurer—Wm. M. Rogers.
Auditors—T. S. Alberti, H. H. Baker, and I. H. Dunn.
Managers—John D. Titsworth, Randolph Dunham, Jonathan Maxson, Wm. M. Fahnestock.

In looking over the official records we find only two other items of business transacted,

1. On Sixth-day afternoon, Bro. David Dunn proposed the appointment of an appraising committee, to report to the Society the condition and value of its property. Bro. Geo. B. Utter proposed as an amendment, that the duties and powers of the Committee be enlarged, so that they shall, "before the first day of April, 1855, meet in the city of New York, and examine thoroughly the financial operations of the Society since its organization, and appraise all its property, with full power to receive the same from the General Agent, and grant him a discharge from all farther obligation in the premises." Bro. A. B. Burdick proposed to amend by striking out all after the word "property," and inserting, "and report the result to the Board of the Society." The proposition thus amended was lost on a final vote. On First-day, after the election of officers, the subject was brought up again, and on motion of Bro. Jas. R. Irish, a committee was appointed, in compliance with the request of the General Agent, "to meet in the city of New York, and examine thoroughly the financial operations of the Society since its organization, and the General Agent's position in relation thereto, and give to the General Agent and the Board certificates of the result of their investigations, and make a full report of the same to the Society at its next anniversary." George Greenman, David Dunn, and Perry B. Maxson, were appointed said Committee.

2. The Auditing Committee were by vote instructed to take an inventory at cash value of all of the assets of the Society annually, and let the same form a part of their annual report.

THE MISSIONARY SOCIETY.

In our notice, three weeks ago, of the meeting of the Seventh-day Baptist Missionary Society, we printed the resolutions adopted in relation to the estate of the late Benedict W. Rogers. It has since been suggested to us, that those resolutions will be better understood if read in connection with the letter to which they refer. Accordingly we this week print the letter, and reprint the resolutions.

Letter to the Society.

To the Seventh-day Baptist Missionary Society:

BRETHREN,—When my late husband, Benedict W. Rogers, in prospect of an early death, made a disposition of his property by will, he wished, in addition to what he bequeathed directly to benevolent objects, that in case of certain changes which might take place in his family, one-third of his estate should go to promote the benevolent operations of the Seventh-day Baptist denomination; and as he considered the Missionary Society quite as likely as any other body to use the property wisely, he made that Society the conditional legatee.

Subsequently, the proposition to have a building in New York for the accommodation of all of the Societies of the Seventh-day Baptist Denomination, was brought to his attention, and was the subject of consultation. It appeared to him a very desirable object—one to which a bequest of considerable amount might well be appropriated, inasmuch as it would furnish forever facilities to conduct benevolent operations, and would allow the small and regular contributions of the people to go directly to the sustaining of current expenses—a result alike favorable to the piety of the contributors and the prosperity of the cause. In view of these considerations, he had some thought of changing his last will and testament so as to make *that* object the conditional legatee. But the uncertainty when, if ever, the contemplated changes might take place, and the possibility that before that time a building might be secured, led him to leave the matter as at first written.

Since my husband's death, it has seemed to me desirable that the portion of his estate to which I have alluded should at once, without reference to those conditions, be made available for benevolence; and the object of this communication is to express to the Society my willingness—indeed, my *wish*—to waive my personal claim to the use of it, in order at once to secure the object which my husband so highly approved.

If the Missionary Society views these suggestions with favor, and should see fit to appoint a Committee, or Board of Trustees, with power to receive one third of the estate of Benedict W. Rogers, grant the necessary discharges to his executors and legatees, and invest the proceeds in a building in the city of New York which should furnish forever a home to the benevolent operations of the Denomination, I would cheerfully second the measure. Yours, &c., ANN M. ROGERS.

Resolutions of the Society.

Whereas, the late Benedict W. Rogers, of Williamsburg, did in his last will and testament leave his entire estate to his wife Ann M. Rogers, subject to a condition, that in case of certain changes which might take place, one third of said estate should be paid over to the Seventh-day Baptist Missionary Society, to be used under its direction; and *whereas*, the said Ann M. Rogers has by letter to this Society proposed to waive her claim to the farther use of said one third of the estate of Benedict W. Rogers, on condition of its being invested in a building in the city of New York, which shall furnish forever a home for the Benevolent Societies of the Seventh-day Baptist Denomination; therefore—

Resolved, That this Society thankfully accepts the generous offer of Mrs. Rogers.

Resolved, That this Society appoint a Committee of five to inquire into all legal questions connected with the proposition of Mrs. Rogers; and if they find that there is no legal obstacle to the carrying out of said proposition, to take charge of all business growing out of it; and that this Society hereby clothes said Committee with full power to receive from Mrs Rogers, or the executors of the estate, the property alluded to, to sign on behalf of the Society all such papers as may be necessary to discharge her from future obligation in the premises, and to invest the proceeds in a building in the city of New York for the free use forever of the Benevolent Societies of the Seventh-day Baptist Denomination, taking the deed so as to hold the same in trust for that object.

The Committee appointed in accordance with the above resolution consists of Thomas B. Brown, James Bailey, Thomas S. Greenman, Wm. M. Rogers, and Geo. B. Utter.

BOARD MEETINGS.—By reference to the advertisement in another column, it will be seen that the time of holding the next quarterly meetings of the Executive Boards of our Missionary, Tract, and Publishing Societies, has been changed to Fourth-day, 18th inst., at 10 o'clock.

PEOPLE OF COLOR.

At the meeting last year of the Cincinnati Conference of the Methodist Episcopal Church, a Committee was appointed "to inquire and report what can best be done to promote the welfare of the Colored People among us." That Committee reported at a recent meeting of the Conference, and their report "gives no countenance to anything which goes to deprive the black man of his full share in our common humanity, but hails him as a man and a brother, in accordance with that grand affirmation of the Bible, which must forever settle the unity of the human race, that God 'hath made of one blood all nations of men for to dwell on all the face of the earth.'" With their report, (which was unanimously adopted,) the Committee submitted to the Conference the following resolutions:—

Resolved, That it is of the greatest importance, both to the colored and white races in the free States, that all the colored people should receive at least a good common shool education, and that for this purpose well qualified teachers are indispensable.

2. That the religious instruction of the colored people is necessary to their elevation as well as to their salvation.

3. That we recommend the establishment of a Literary Institution of a high order for the education of the colored people generally, and for the purpose of preparing teachers of all grades to labor in the work of educating the colored people in our country and elsewhere.

4. That we recommend that an attempt be made on the part of the Methodist Episcopal Church to coöperate with the African M. E. Church in promoting the intellectual and religious improvement of the colored people.

5. That we commend as soon as practicable the appointment of a general agent to carry out the objects proposed in the preceding resolutions, and to labor otherwise for the improvement of the people of color.

ADAMS CENTRE, Oct. 5th, 1854.

To the Editors of the Sabbath Recorder:—

The following is a copy of a communication to the Corresponding Secretary of the Seventh-day Baptist Central Association, which we expected to have seen published in the *Recorder* some weeks past, agreeable to the proposition of said Association. But since the above-named communication has not appeared, the church has requested me to forward a copy of the same to you for publication if you think proper.

Copy.

ADAMS CENTER, Aug. 27, 1854.

The Independent Seventh-day Baptist Church at Adams Center to James C. Rogers, Corresponding Secretary of the Seventh-day Baptist Central Association:

DEAR BROTHER—This is to inform you, that this Church has taken into consideration the action and recommendation of the Association in reference to the existing difficulties among us in this county, and at a special church meeting held August 20, 1854,

Resolved, unanimously, That we will acquiesce in and will coöperate with the recommendation of the Association in reference to the proposed efforts for the settlement of our unhappy difficulties; and further, that we will bear our proportion of the expense.

Resolved, That A. Campbell, Wm. Greene, and J. Saunders, be a committee to communicate the above to the Corresponding Secretary of the Association.

A. CAMPBELL,
WM. GREENE, } Committee.
J. SAUNDERS,

THE BIBLE UNION.—The fifth anniversary of the American Bible Union was held at the First Baptist Church in New York, on the 5th and 6th insts. From the report of the Treasurer, presented on the occasion, it appears that the receipts of the Union during the financial year just closed were $40,538 19, all of which has been expended except a balance now in the Treasury of $5,159 39. The Annual Report of the Board represented the Union as being in a highly prosperous condition. In the course of the anniversary exercises, addresses were delivered by the President, Spencer H. Cone, Rev. H. J. Eddy, Rev. Dr. Baker, Rev. Mr. Pendleton of Kentucky, Rev. J. A. Smith of London, and Rev. Messrs. Huntley, Bates, and Burnett. Before adjourning, it was agreed to hold a semi-annual meeting at Chicago, Illinois, in the month of May next, under the direction of the Board of Managers, at which all the exercises of an anniversary shall be provided for, excepting those proceedings especially confined by the Constitution to the annual meeting.

HONORARY DEGREES.—We learn from the Schenectady *Cabinet*, that at the annual meeting of the Board of Trustees of Union College, on the 26th July last, the following sensible preamble and resolutions were adopted and ordered to be published:—

Whereas, The present method of conferring honorary Degrees is not calculated to promote high scholarship and eminent professional merit in so great a degree as is desirable; and *whereas*, it may be hoped that by corresponding with the authorities of other colleges, some general principles can be agreed upon, which shall hereafter govern action in such cases; therefore,

Resolved, That this Board will confer no honorary degrees higher than that of Master of Arts during the next three years.

Resolved, That the Rev. Alonzo Potter, the Rev. J. Trumbull Backus, and the Rev. Ebenezer Halley, be a committee to open a correspondence with the faculty and trustees of other institutions, with a view of securing the general adoption of principles applicable to these cases.

EPISCOPAL BISHOPS.—On Fourth-day of week before last, Rev. Dr. Thomas M. Clarke was elected Bishop of the Protestant Episcopal Church for the diocese of Rhode Island. On Sixth day, Rev. Horatio Potter, D. D., was elected Provisional Bishop of the diocese of New York, in place of the late Rev. Dr. Wainwright.

General Intelligence.

European News.

The steamer Canada, with European dates to Sept. 23d, arrived at New York on the 6th inst.

The Russian War has at last assumed a phase of profound interest. An allied army, 58,000 strong, has landed in the Crimea, unobstructed, and is marching on Sevastopol; while 14,000 men are on the way from Varna to swell the invading force to above 70,000.

There is a report from Constantinople, that conditions of peace have been agreed upon, but it is a hoax.

Not a Russian remained in Wallachia on the 8th Sept. The Russians destroyed all the bridges after they crossed the Sereth.

On the 12th ult., a powder magazine exploded at Perekop, killing a great many Russians, and damaging two of the allies' ships. A Turkish magazine containing 36 loads of powder was willfully fired by a dervish at Erzeroum.

The Turkish Government has promulgated a hatti-scheriff reprobating the corrupt practices of certain officials, and ordering a purer administration of the laws. The execution of the "tawzimat" is placed under the surveillance of a special council, composed of five Moslems, four Greeks or Armenians, three Roman Catholics, and one Jew.

The Minister of Marine had received accounts from the rear-admiral commanding the French naval division in the Chinese seas. The dispatch is dated July 18. It mentions an attack by a united French, Portuguese and American force on 16 piratical junks, two of which were taken and the rest dispersed.

The steamer Petrel, Capt. Tims, with 111 passengers from Glasgow for New York, had put back to the Clyde, where she arrived on the 18th, having met with severe weather; her masts carried away, decks swept, bulwarks driven in, and leaky. Five passengers had died.

A disgraceful outrage, having its origin in the wretched Irish Catholic against Protestant feuds, has caused much indignation and horror. An excursion train, with 900 passengers, including most of the Protestant gentry of the county, had been on a visit from Enniskellin to Londonderry, and on returning at night the train was thrown off the track by huge blocks of stone placed so as to throw the cars over a precipitous embankment. Owing to the caution of Lord Enniskellin, who placed himself on the engine with the driver, the train was proceeding at a very slow pace, otherwise the consequences must have been fearful. As it was, several persons were killed and wounded.

We have no reliable intelligence about the rebel movements in China. The *North China Herald* of July 15 publishes extracts from the *Pekin Gazette* up to June 11, from which we gather that the insurgents had certainly made no advance northward, nor had they gained any advantages in the few skirmishes that had taken place. Reports had reached Nganhwny of the capture by them of Kemum, and the murder in cold blood of the district magistrate and the chief military officer, but the placewas retaken within a few weeks.

State Fair.

The New York State Agricultural Fair, held in New York City last week, wasa very good show, and tolerably well attended. From one of the daily papers, we clip the following paragraphs in relation to it:—

The horned cattle upon the ground are numerous and very superior. The different breeds may be known by the following description: They are Durhams, or Short-Horns, Devons, Herefords, Ayrshires, Alderneys, and their grades; native stock are also represented. The first are generally roan colored, white or red. The Devons always red. The Herefords dark brown or black, with white faces. The Ayrshires are red and white; these are all large-sized animals. The Alderneys are smaller cattle, colored generally pale red white. An excellent breed of cattle, common in Westchester County, are "Dutch and Durham." The standard color of the Dutch cattle is black and white. The crosses with the Durhams are variously colored. The favorite color of our native cattle is a dark red or blood bay.

Swine are very numerous, and just as handsome as hogs can be. The black ones are called Essex or Berkshire, and most of the white ones, particularly those without hair, Suffolks. We have never seen a display of better hogs at any show. The improvement in this race of domestic animals has nearly reached perfection.

The number of Sheep is very large, and the quality excellent. There are French Merino, the largest of fine wool breed; Spanish Merino, medium size; and Saxony and Silesian Merino, some of which are very small. The fine wool Sheep all have a dirty black appearance, owing to the gum on the wool. The South Down Sheep all have smooth black faces and black legs. These are medium wool Sheep, very smooth and handsomely formed, and afford the best mutton in the world. The long wool Sheep are very large; some of them weigh 300 lbs each, and have been fatted to 260 lbs of mutton. They are known as Bakewell, Leicester, Lincolnshire, Oxfordshire, and New Oxfordshire.

The world is coming to its senses, and the paroxysms of the hen fever are not as prevalent this fall as usual. There is room in the building appropriated to fowls for more, but for all practical purposes, there is enough. All the varieties, from Bantam to Shanghai, may be seen, and a patent hen's nest for them to lay in, so contrived that it takes the eggs away and puts them in the closet, or perhaps frying-pan, as fast as they are dropped.

Of Farm Implements and Agricultural Products, there is not a good show. Of the former, the Wind Mill for farm purposes attracts ten times as much attention as all the rest. It is conceded to be just the machine most wanted upon a farm in such a drouth as that of the present season.

There is among the great show of mowing machines, a new one invented by A. M. Russel, of Massachusetts, which we believe is the seventieth one patented, and have not the least doubt is superior to all its predecessors. The cutting bar is attached to the frame of a pair of small cart wheels, and the motion given to the cutters by a cam driven by cogs on the driving wheel, working into a small pinion, so that the machinery has the smallest possible amount of friction. The cutting is different from any other without crank motion, the bar that holds the knives only sliding $2\frac{1}{4}$ inches, and yet the knives each have a drawing cut of $1\frac{1}{4}$ inch, and are so fixed that when one end is dull, they can be changed end for end in five minutes. They never clog, never require to be backed out of heavy grass to start. In going a-field, or from farm to farm, the cutting by can be taken off and carried upon the machine. It has no dragging side-draft. It is a decided improvement, for efficiency, ease of draft, cheapness, and durability.

The National Baby Show.

A dispatch dated Cincinnati, Thursday, Oct. 5, 1854, says that the National Baby Show took place at Springfield, (Ohio,) to-day, and one hundred and twenty entries of babies were made. The first premium for the finest baby of two years old or under was a tea sett with a salver, valued at three hundred dollars. The second premium for the next best baby, was a tea sett valued at two hundred dollars. The third premium was two hundred dollars for the finest child under one year of age. The fourth premium was a Parian marble group. The first premium was awarded to Mrs. Romner of Vienna, Ohio; the second to Mrs. McDowell of Cincinnati; the third to Mrs. Arthur of Philadelphia; the fourth to Mrs. Henry Howe of Cincinnati. A letter was received from "Fanny Fern" and read to the edification of all concerned. Letters were also received from Mrs. Swisshelm, Mrs. Crittenden, Mrs. Mott and Horace Greeley, Esq. Mr. Greeley thought that much attention should be given to the development of the human constitution in a country where able-bodied men sold for \$500 to \$1,500 a-piece. Mrs. Mott thought that black babies should have been admitted to this exhibition and had an equal chance with the whites. Among the exhibitors was an old woman who came with her seventeenth child. She claimed a premium on that ground.

Money in Dead Letters.

A correspondent of the Baltimore *Sun*, writes from Washington, under date of Oct. 3, that—

"The operations of the Finance Bureau of the General Post Office Department for the current year disclose the fact of a rapid increase in the business and importance of the dead letter office. In the first quarter of 1852, the number of dead letters found by the openers, which contained money, was 1,701—amount \$10,238; second quarter, 1,736 letters, and \$11,176; third quarter, 1,781 letters, and \$10,869; fourth quarter, 1,842 letters, and \$11,713.

"In the quarter ending 31st March, 1854—two years afterward—the number of valuable dead letters reached 2,323, containing \$14,401. The second quarter yielded 2,487 letters, and \$14,325 in money. We have from the third quarter—ended 30th September last—2,354 letters, in which were found \$14,088 in cash. When it is recollected that these do not embrace the dead letters from foreign countries—which are all returned unopened—the progress of this branch of Governmental service is more apparent."

The same correspondent states that seven-eighths of the lost money is safely returned to its legal owners.

American Justice.—The N. Y. *Tribune* says that there is now confined in a Southern prison, in one of the more moderate and less fanatical slave States, a free native citizen of a Northern State, under the following circumstances:—

"A poor, forlorn, sick colored woman, fleeing from outrageous cruelty and despotism, applied to him for shelter, food and medicine. Her afflicted and desolate condition so wrought upon his smypathies that he granted her request, admitting her as an inmate of his family. He cured her of a violent and dangerous fever. About this time, her legal owner learned where she was, came after her, and took her home, neither paying nor thanking the good Samaritan who had saved her life. Her cruel treatment was renewed, and became so intolerable that she fled again, and was again treated with humanity by her former preserver. The master pursued her, now knowing exactly where to look for her, and, as soon as he came within reach of her, leveled his pistol and shot her dead where she stood. From this deed the murderer went about his business as coolly as if he had only shot a thieving dog, nobody seeming to think any judicial inquiry necessary or proper; but the good Samaritan was thereupon arrested and imprisoned in a dungeon, to take his trial on a charge of "harboring a fugitive slave." He will probably be convicted and set to hard labor in a State Prison for ten or fifteen years, as Torrey and other such *criminals* have been before him.

Has a School-Teacher the Right to Flog a Pupil?—A case involving this question was tried at our September Circuit. Hiram Wood, during, the last winter, taught a District School in the town of Stanford, in this county. Frances Germond, a girl of 17, was among his scholars. For some alledged disobedience, the teacher, with a whip about four feet long, and nearly a half inch in diameter, flogged her so severely that black and blue marks were left on her person for weeks after the occurrence. The defense was, that the teacher had a right to resort to this kind of punishment to preserve order. Judge Dean charged the Jury that the teacher stood in the place of a parent, *and had a right to correct a pupil, but in doing it he must exhibit a parent's feelings*—that he had no right to use this privilege to gratify his own feelings of resentment—and if he exceeded what was necessary to preserve order, he was liable for assault and battery. He further charged, that the means used to preserve order should be adapted to the sex, age, and habits of the pupil—that what might be necessary and proper in case of a large boy, would be very improper and excessive in the case of a female—and left it to the Jury to say whether any possible circumstances would warrant a man, whether a teacher or not, in laying his hands in violence or anger on a grown-up girl. The Jury found a verdict against the teacher for the sum of \$365, which we think meets with approval in the whole community.

[Poughkeepsie Tel.

A disastrous explosion occurred at the Mountour Iron Rolling Mill, at Dansville, Pa., Oct. 6th, killing several persons and injuring many others.

Postmasters' Compensation.—Postmasters should remember, in making up their quarterly returns for the quarter to end on the 30th inst., (says the *Washington Star*,) that their percentage or compensation is to be different for that quarter from what they received for the last quarter. Thus they are to have hereafter as follows, viz.:—

On any sum not exceeding one hundred dollars, sixty per cent.; but any Postmaster at whose office the mail is to arrive regularly, between the hours of nine o'clock at night and five o'clock in the morning, may be allowed seventy per cent. on the first hundred dollars.

On any sum over and above one hundred dollars, and not exceeding four hundred dollars, fifty per cent.

On any sum over and above four hundred dollars, but not exceeding twenty-four hundred dollars, forty per cent.

And on all sums over twenty-four hundred dollars, fifteen per cent.

Beer in St. Louis.—The St. Louis *Republican* says there are 24 Breweries in that city, every one of which stored nearly twice the quantity of "Ale" for the past summer that has been made in any preceding one. The manufacture reached sixty thousand barrels—40,000 of "Lager," and 20,000 of ordinary Beer. On an average count, one barrel of thirty gallons gives about three hundred glasses; thus we have about twelve millions of glasses of Lager Beer, and about six millions of common Beer, in all, eighteen million glasses of Beer drank in St. Louis, from the 1st of March last up to the 17th of September, the time the Lager Beer gave out. Common Beer is sold at five dollars per barrel, and Lager Beer at seven dollars; that is, at wholesale; this will make the amount received by the Brewers for Lager Beer \$290,000, and for common \$100,000—together, say, \$390,000. The retailers, at five cents a glass, took in \$600,000 for Lager Beer, and \$300,000 for the common article. Just think of it. Nearly a million of dollars (\$900,000) spent in St. Louis, during one summer, for Beer! And that chiefly among the Germans themselves.

Emigration into Kansas.—The *Washington Star* says: We learn from a gentleman who has just returned from Kansas, where he has been ever since the passage of the Territorial Government bill, that, so far, no slaves have been carried into the Territory, though many Arkansas and Missouri slaveholders and other southern State citizens have taken up "claims" there. Up to a very recent period, the southern settlers greatly outnumbered those from northern States who were going in there. Now, however, the tide seems to have changed. According to the views of this intelligent and usually well informed gentleman, ere the next Presidential election comes off, Kansas will have formed her State Constitution, and will be knocking at the door of Congress for admission into the Union as a State.

Sad Fatalities.—We hear of two fatalities occurring lately in Canada, of an unusually melancholy character. In the vicinity of Sherbrooke, two ladies were riding in a chaise, when the approach of a railway train frightened the horse, which backed off a precipice. One of the ladies, whose name we did not learn, fell underneath the horse, and was crushed to death. The other, when taken up, was alive, and was conveyed to her home. Her mother, upon seeing the condition of her daughter, from fright and excitement, was seized with a fit and died. The other case occurred some distance above Sherbrooke. A boy engaged in fishing fell from a building into the rapids of the river. A Frenchman near by saw the accident and forthwith plunged in after him. The current was very swift, but he reached the boy, whom he placed under one arm, and with the other struck out for the shore. He had accomplished in this way over half a mile, when his arm struck a rock, which palsied his efforts, and both man and boy sank to the bottom and were drowned. [Boston Traveler, 4th.

Sunday-keeping in Boston.—One of the Boston papers gives a doleful account of the way in which Sunday is kept in that city. The following paragraph will serve as an illustration:—

"It is a fact—perhaps not generally known—that the new theater is being finished under auspices that reflect severely upon the character of those who are supposed to be the moral and conscientious portion of an order-loving, virtuous community. During a few Sabbaths past, workmen have been busily employed in fitting up the interior of the theater building, without regard to the sanctity of the day, or the laws of God and man, enacted to enforce obedience to the requirements imposed by it, upon all. Last Sunday there were fifty men at work, some of whom were engaged in the quiet labors of putting down carpets. At night the work continued until the midnight hour announced the dawn of Monday morning, that should free the workmen within the Tower of Babel from the imputation of sin. Every effort has been made that could be, to have the theater finished early; skill, talent, money, energy, and strength, have been lavished upon what is to be the idol of the *liberal* citizens of Boston; and more than this, holy time—that of the Sabbath day."

Corruption in High Places.—In February, 1853, the Grand Jury found a presentment indicating that members of the Common Council of New York had been receiving large bribes for procuring railroad grants, ferry leases, &c. Since that, Recorder Tillou has taken testimony on the subject from some two hundred witnesses. The substance of this testimony has been made public, and shows an extent of corruption which is calculated to astonish the most orthodox believers in human depravity. As most of the persons implicated have been turned out of office, it is doubtful whether the matter will go any further.

Jewish Hospital in Jerusalem.—We learn from the *Occident*, that after mature deliberation, it has been decided that the bequest of the late Judah Touro for the benefit of the Palestine Jews shall be devoted to the foundation of a Hospital and Synagogue in Jerusalem.

SUMMARY.

Pope Pius IX. has summoned a grand conclave of the chief dignitaries of the Roman Catholic Church, to meet at Rome during the month of October, to settle the question whether the Virgin Mary was herself conceived without sin, and thus free by birth from every taint of human impurity and imperfection, and thus a divinity who may properly be made an object of human adoration. Hitherto this dogma has not formed an authoritative part of the Roman creed, and has been stoutly disputed within the bosom of the Church itself; but it is expected by the more zealous adherents of the doctrine, that it will now be finally adopted and made obligatory on all the faithful.

The Mormons continue to make great progress in Europe. All over England they are making converts, and the London *Times* thinks their religious services ought not to be protected by the laws. The British army in Turkey contains several branches of the Church. At Hamburg the authorities have prohibited their meetings. The Mormon emigration of next year to the United States will be large.

Some of the southern papers argue that Slavery is better than Freedom, because they say there are more paupers and insane in the Free States than in the Slave. On this ground a native village in Africa or among the Apaches, must be the most perfect thing in the world, for there neither paupers nor crazy folks exist. According to the reasoning of these journals, a tribe of South Sea cannibals offers a better state of society than can be found in South Carolina or Mississippi.

One of the steam-frigates ordered by Congress, and to be built at the Brooklyn Navy Yard, is called the Niagara, and will be the largest vessel ever built in this country. Her extreme length will be 345 feet; depth of hold, 31 feet; breadth of beam, 55 feet; draft when loaded, 22 feet 9 inches; displacement 5,500 tuns. Mr. Steers, the Superintendent, has contracted to give her a speed of 17 nautical miles per hour under sail alone, and a velocity of 16 nautical miles per hour under steam alone.

The "Emigrant Aid Association" of New England, about which so much has been said in the papers, have purchased the principal hotel in the town of Kansas, Jackson County, Mo., at a cost of \$10,000, and they have also bought other property in Kansas needed in their colonizing operations. The "Association" are opening an important road from Kansas out west, bridging the streams at the cost of hundreds of dollars, and doing much valuable work toward improving the Territory of Kansas.

A meeting of Superintendents of Indiana Railroads, centering at Indianapolis, was held in that city on the 27th ultimo, at which the fares were fixed on through and Eastern tickets at about $2\frac{3}{4}$ cents per mile, and short and local fares at 3 cents per mile, all competing routes agreeing to the same fares over all the lines. The tariff of freights was advanced about 20 per cent. This arrangement took effect last Monday. All runners are dispensed with, and after the 1st of December, all free tickets and half tickets are to cease entirely, even to railroad officers.

There was a large Railroad Convention at Columbus, O., on the 21st and 22d of September, at which resolutions were adopted in regard to charges for mail service, express freight, &c., doing away the system of free passes and half fares, excepting to the officers and employés of the various roads over their own roads; to discharge all runners after the 1st of November, placing through fares at not less than $2\frac{1}{2}$ cents per mile, and local fares at 3 cents per mile; freight charges at not less than 2 cents per tun per mile.

The Emperor of Russia has presented to Chas. H. Haswell, Esq., the well-known Engineer, a magnificent diamond ring, worth some \$1,500, in consideration of his professional labors in the furnishing of drawings of steam machinery, including the engines of the steamer Powhatan, which Mr. Haswell had designed for the U. S. Navy. The drawings were made at the instance of the late Mr. Bodisco, former Russian Minister to the United States.

The steamship City of Manchester sailed from Philadelphia recently with 30 cabin and 150 steerage passengers; and the packet-ship Tonawanda, for Liverpool, sailed the same day with 204 steerage passengers. We have noticed of late frequent departures of large companies of emigrants from this port, on their return to the Old World. These occurrences seem to indicate that a reäction to the excessive emigration of past years has commenced.

The drouth is still prevailing in Pennsylvania. The *Miner's Journal* of Sept. 29, says: "We have had no rains since early in August, and none to wet the ground since May. The springs and streams are all dried up, and large patches of timber on the mountain sides are killed and present a yellow and seared appearance. The equinoctial season has come and gone, and still no rain, nor any appearance of it."

A gentleman of the City of Philadelphia, who anonymously contributed the sum of \$900 for the missionary service of the American Sunday-School Union, received a letter of acknowledgment from Mr. A. W. Carey, their agent at St. Louis, from which it appears that the Society have organized five hundred Sunday-Schools since last February, and four thousand in the last nine years, in his District, including Missouri, and parts of Illinois and Iowa.

We learn from the Philadelphia *Ledger*, that Mr. X. Bazin, perfumer of that city, has libeled the steamship City of Manchester for a claim of \$10,000, the value of certain goods on board the wrecked steamship City of Philadelphia. The goods were intended for the City of Manchester, and insured as upon that vessel, but being placed on board the City of Philadelphia instead, the underwriters refuse to pay the amount of the policy.

The Catawissa, Williamsport and Erie Railroad Company had an excursion on the 6th inst., from Philadelphia to Milton. The route is from Philadelphia by the Reading Road to Port Clinton, 78 miles, thence over Little Schuylkill Road to the junction, 28 1-4 miles, thence over Catawissa Road to Milton, 63 1-4 miles. Total 169 1-2 miles.

Thompson's Bank Note Reporter announces that the notes of the Ellsworth Bank, Maine, are thrown out at the Suffolk Bank, and that the Erie and Kalamazoo Bank at Adrian, Michigan, was enjoined on the 4th inst.

The coast of Texas was visited by a most disastrous gale, commencing on Sunday, Sept. 18th, and lasting until Thursday night, the 21st. It would be almost a matter of impossibility to imagine even a greater destruction of life and property by such an occurrence.

We have before us the first number of the *Herald of Freedom*—a large, well-executed sheet issued at Wakarusa, in the Territory of Kansas. It is conducted by G. W. Brown, late of the Conneautville (Pa.) *Courier*, and filled with interesting matter, mostly original, relative to the new Territory.

An English geologist named G. J. Phillips, now on a tour of mineralogical research in Berks County, Pa., is said to have discovered gold in a vein of quartz near Reading. The *Gazette* of the latter place, which has seen several of the specimens, speaks of the gold as remarkably pure.

The receipts of the Milwaukee and Mississippi Railroad in September were \$60,233, and for the past nine months \$304,527. The Janevilles branch, eight miles, has added \$35,139 to its revenue since June.

The ladies of Rochester, including the wives of fourteen clergymen, twenty physicians, and some 150 citizens, have addressed a scorching letter to Gov. Seymour on the subject of his veto of the Maine Law.

Movements are on foot to establish a "stake" for Mormon settlers in the Territory of Kansas, about 100 miles interior from the town of Kansas.

The schooner Ontario, of Rockland, went ashore recently on the "Devil's Rock," about three miles from Long Island, and four lives were lost.

Considerable anxiety is felt in regard to the steamer Arctic, which sailed from Liverpool Sept. 20th, and had not been heard from up to Oct. 9th. She had on board about 200 passengers.

The Eighth Avenue Bank in New York failed last week, and its bills are selling at 10 per cent. discount.

A Baptist Historical Society was organized in New York on the 2d inst. The meeting was held in the Bible House.

New York Markets—October 9, 1854.

Ashes—Pearls \$6 12. Pots 7 00.

Flour and Meal—Flour 6 87 a 7 37 for State; 7 25 a 7 50 for Ohio, Michigan, and Upper Lake; 8 12 a 9 25 for extra Genesee. Rye Flour 5 25 a 6 00 for fine and superfine. Corn Meal 4 25 a 4 31. Buckwheat 4 00 a 4 25 per 100 lbs.

Grain—Wheat 1 40 a 1 50 for Western Red, 1 50 a 1 62 for Ohio, 1 78 for white Genesee. Rye 1 17. Barley 1 14 a 1 18. Oats 45 a 53c for State and Western. Corn 77c for Western mixed. White Beans 1 25 for new Northern.

Provisions—Pork 11 62 for prime, 12 87 for mess. Beef 11 00 for country mess. Dressed Hogs 6 a $6\frac{1}{2}$c. Lard $11\frac{3}{4}$ a 12c for new. Butter, 13 a 17c for Ohio, 18 a 21c for State, 22 a 25c for Orange County.

Hay—80 a 85c per 100 lbs.

Potatoes—2 25 a 3 00 per bbl for Mercers and Pinkeyes.

Seeds—Clover $10\frac{1}{2}$ a $11\frac{1}{4}$c. Timothy 3 62 a 3 75 per bush. for reaped. Flax-seed 1 65 a 1 70 for 56 lbs.

MARRIED,

In Milwaukie, Wis., Sept. 4th, by Rev. J. J. Miter, Ormanzo Allen, of Plainfield, N. J., to Eliza A. Alexander, of Howard, N. Y.

At the Irving House, New York, Oct. 4th, by the Rev. Mr. Smith, of New York, Mr. John Ellis, of Schenectady, to Mrs. Arminda Cochran, of Plainfield, N. J.

At Marlboro, N. J., on the 5th inst., by Eld. D. Clawson, Mr. Albert Davis, of Shiloh, to Miss Hannah B. Keen, of Columbia.

DIED,

At Adams Center, N. Y., Sept. 10th, 1854, Mrs. Charlotte Crosby, widow of Dea. Daniel Crosby, in the 68th year of her age. Sister Crosby died very suddenly, of disease of the heart. A few brief hours of sickness, and she experienced the agonies of dissolving nature. For a great many years she had been a member of the Methodist Episcopal Church, but had worshiped principally with the Seventh-day Baptist Church of Adams. Her life was eminently that of a Christian. A step-mother, she was known only as a mother indeed, enjoying the confidence of all. On Sabbath, the 8th of Sept., we heard her voice in prayer in the public congregation; on the following Second-day we followed her remains to the grave. Truly, "there is but a step between me and death." J. S.

In Franklin township, Shelby Co., O., Sept. 27th, of a long-standing disease, Moses H. Ailes. He was born in New Jersey, and in early life removed to the State of Virginia. He there embraced the Sabbath, and united with the Lost Creek Church, and for the last twelve years he has lived in Ohio. He has gone to rest, and leaves many friends to mourn their loss. E. F.

At Berlin, N. Y., Sept. 13th, Horace H., son of Jared B. Green, of Cincinnati, Ohio, aged 2 years and 3 months. His remains were taken by his father to Dayton, O., for interment.

Sept. 28th, at his residence in North Brookfield, N. Y., of erysipelas in the head, Mr. Alanson Marsh, aged 28 years. Brother Marsh was a worthy and much esteemed member of the Baptist Church in that place. He proved the genuineness of his attachment to Christ and his word by his faithful research after all his truth, and his cheerful obedience to it, regardless of consequences. He embraced, four weeks before his death, the Sabbath of the fourth commandment. He died as he lived, in hope of immortality, leaving a wife, one child, and a large circle of friends, to mourn their loss. J. C.

In Hopkinton, R. I., September 25, Adelia Holdridge, widow of the late George W. Holdridge, Esq., aged 45 years.

LETTERS.

Joshua Clarke, David Dunn, V C Chapman, Benjamin Vincent, P C Burdick, David Clawson, O D Green, J M Allen, C A Burdick, Eli Forsythe, G W Maxson, O Stillman, W B Maxson, P S Cottrell (sent regularly,) Ira Hall, John Whitford.

RECEIPTS.

FOR THE SABBATH RECORDER:

D B Rogers, Plainfield, N J	\$2 00	to vol. 11	No. 52
Peter Wooden "	2 00	11	52
Edgar Ayars "	2 00	11	52
V F Randolph "	2 00	11	52
Dudley Hughes, Montra, O	2 00	11	20

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Daniel B Rogers, Plainfield, N J	\$1 00
O D Green. Adams Center	1 00

WILLIAM M. ROGERS, Treasurer.

Board Meetings.

The quarterly meetings of the Executive Boards of the Seventh-day Baptist Missionary, Tract, and Publishing Societies, will be held in the meeting-house at Plainfield, N. J., on Fourth-day, Oct. 18, commencing at 10 o'clock, A. M.

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth \$2 50; half roan \$2 75; half calf \$2 87; half morocco \$3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together, in cloth; price \$1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at \$2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from \$25 to \$100, such inducements will be offered as will enable them to make from \$3 to \$5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherever they are offered.

For further particulars, address, (postage paid,)

ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies $37\frac{1}{2}$ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice; commmencing Monday, April 10, 1854:—

Leave New York at 8 A. M., 12 M.; and 4 and $5\frac{1}{2}$ P. M.

Leave Plainfield for New York at 6.55 and 8.30 A. M., 12.20 and 5.10 P. M., passenger, and 7.30 P. M., freight.

Leave Plainfield for Easton at 9.35 A. M., 1.40 and 3.35 P. M., passenger, and 6.30 A. M. freight; and for Somerville at 7.30 P. M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

Regular Mail Line via Stonington for Boston,

PROVIDENCE, NEW BEDFORD, and TAUNTON. Inland Route, without change of cars or detention, carrying the Eastern Mail.

The steamers C. VANDERBILT, Capt. Joel Stone, and COMMODORE, Capt. John G. Bowne, in connection with the Stonington and Providence, and Boston and Providence Railroads, leaving New York daily (Sundays excepted) from Pier No. 2 N. R., first wharf above Battery Place, at 5 o'clock P. M., and Stonington at 8 o'clock P. M., or on the arrival of the mail train which leaves Boston at 5 30 P. M.

These steamers are unsurpassed for strength, safety, speed, comfort, and elegance. The officers are experienced and attentive.

The natural advantages of this route are superior to any other. Being shorter and more direct, the trip is more pleasantly and expeditiously performed, while passengers can always rely on reaching their destination in advance of those by either of the other routes.

The COMMODORE, from New York—Monday, Wednesday, and Friday. From Stonington—Tuesday, Thursday, and Saturday.

The C. VANDERBILT, from New York—Tuesday, Thursday, and Saturday. From Stonington—Monday, Wednesday, and Friday.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at $8\frac{1}{4}$ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at $5\frac{1}{2}$ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Supreme Court.

IN the matter of the taking of lands for a new RESERVOIR, between 86th and 96th-sts. and the 5th and 7th-avs., in the City of New York. To all owners, mortgagees, lessees, occupants, and other persons, in any manner, by judgment, decree, or otherwise, entitled unto, or interested in the lands and premises above mentioned, or any part thereof: Notice is hereby given, that you are required to appear before the Commissioners of Appraisal in the above entitled proceeding, at their office, No. 293 Broadway, third story, front room, at 10 o'clock A. M., on any day, (Sundays excepted,) on or prior to the 21st day of October next; and to produce the evidences of your title or interest therein. In default whereof, and in case the persons entitled or interested as aforesaid shall not be ascertained by or be known to the said Commissioners, or be fully known, the same will be reported to the Supreme Court as belonging to unknown owners. It being the desire to consummate this great improvement, and to present the report at the earliest day consistent with a proper examination and due regard to the rights and interests affected, it is earnestly requested that all parties note and comply with the preceding notice, as no other or further notice will be issued. Dated New York, Sept. 1, 1854.

EDWARD C. WEST,
ABRAHAM TURNURE, } Commissioners.
DANIEL DODGE,

Robert J. Dillon, Counsel to the Corporation.

N. B.—All papers published in the City of New York are requested to publish the preceding notice until the 21st day of October next, once in each week, and to send their bills, with affidavits of publication, to the office of the Counsel to the Corporation, to be paid on the final taxation of the proceedings. 2t

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns and process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y.

Miscellaneous.

The Canada Beaver.

The following sketch of the habits and instincts of this remarkable animal, is from an interesting episode in Thomas C. Keefer's recent lecture on "the Ottawa:"—

One cannot fail to be struck with admiration and astonishment on visiting the haunts of the beaver, nor can we wonder that the red men should place him at the head of the animal creation, or make a Manitou of him, when Egypt—the mother of the Arts—worshiped such stupid and disgusting deities. Whether you call it instinct, or whether it is to be called reason, one thing is certain, that if half of humanity were as intelligent, as provident, as laborious, and as harmless as the beaver, ours would be a very different world from what it is.

The beaver is the original lumberman, and the first of hydraulic-engineers. Simple and unostentatious, his food is the bark of trees, and his dwelling a mud-cabin, the door of which is always open, but under water—conditions which secure retirement, and are favorable to cool contemplation. The single object of his existence being to secure bark enough for himself and family, one would suppose there would not be much difficulty in that; but as neither beaver nor any other animals, except man, are addicted to works of supererogation, we may be sure that the former, in all his laborious arrangements—and those, too, which alter the face of nature to such an important degree—does no more than is absolutely necessary for him to do. Cast in an inhospitable climate, nearly the whole of his labor is for the purpose of laying in his necessary winter supplies, and water is the only medium by which he can procure and preserve these. Too highly civilized for a nomadic life, he builds permanently, and does not quit his habitation till driven from it, like other respectable emigrants, by stern necessity.

We cannot better illustrate the habits of this interesting animal, than by accompanying a beaver family on some fine evening in May, in search of a new home. The papa beaver, with his sons and sons-in-law, wife, daughters, and daughters-in-law, and, it may be, grandchildren, sallies forth, "prospecting" the country for a good location; that is, a stream of easy navigation, and having an abundant supply of their favorite food, the silver birch and poplar, growing as near the river as possible. Having selected these "limits," the next step is to place their dwelling so as to command the greatest amount of food. For this purpose they go as far below the supplies as the character of the stream will permit. A pond of deep, still water being an indispensable adjunct to their dwelling, this is obtained by the construction of a dam, and few engineers could select a site to produce the required result so efficiently and economically. The dam and dwelling are forthwith commenced, the materials employed in both being sticks, roots, mud, and stones, the two former being dragged by the teeth, the latter carried between the fore paws and the chin.

If the dam is extensive, whole trees are gnawed down, the largest of which are of the diameter of an ordinary stove-pipe, the stump being left standing about eighteen inches above the ground, and pointed like a crayon. Those trees which stand upon the bank of the stream they contrive to fell into the water as cleverly as the most experienced woodman; those which are more distant are cut up by their teeth into pieces which can be dragged to the water. These trees and branches are floated down to the site of the dam, where they are dragged ashore and placed so that the tops shall be borne down by the current, and thus arrest the descending *detritus*, and form a strong and tight dam. Critical parts are built up "by hand," the sticks and mud, when placed, receiving a smart blow from the beaver's tail, just as a bricklayer settles his work with the handle of his trowel. The habitation or hut of the beaver is almost bomb proof; rising like a dome from the ground on the margin of the pond, and sometimes six or eight feet in thickness in the crown. The only entrance is from a level of three or four feet under the water of the pond. These precautions are necessary, because, like all enterprising animals, the beaver is not without enemies.

The wolverine, who is as fond of beaver tail as an old Nor'wester, would walk into his hut if he could only get there; but having the same distaste for water as the cat, he must forego the luxury. It is not, however, for safety that the beaver adopts the submarine communication with his dwelling, although it is for that he restricts himself to it. The same necessity which compels him to build a dam, and thus create a pond of water, obliges him to maintain communication with that pond when the ice is three feet thick upon its surface. Living upon the bark of trees, he is obliged to provide a comparatively great bulk for his winter's consumption; and he must secure it at the season when the new bark is formed, and before it commences to dry; he must also store it up where it will not become frozen or dried up. He could not reasonably be expected to build a frost-proof house large enough to contain his family supply; but if he did, it would wither, and lose its nutriment; therefore, he preserves it in water.

But the most remarkable evidence of his instinct, sagacity, or reason, is one which I have not seen mentioned by naturalists. His pond we have seen must be deep, so that it will not freeze to the bottom, and so that he can communicate with his food and his dam, in case of any accidents to the latter requiring repairs. But how does he keep his food, which has been floated down to his pond, from floating when in it, and thus becoming frozen in with the ice? I said that in gnawing down a tree the top of the stump was left pointed like a crayon. The fallen tree has the same form; for the beaver cuts like a woodman—wide at the surface, and meeting in an angle in the center—with this distinction, the four-legged animal does his work more uniformly, cutting equally all around the log, while the two-legged one cuts only from two opposite sides. Thus every stick of provender cut by the animal is pointed at both ends, and when brought opposite his dwelling, he thrust the pointed ends into the mud bottom of his pond sufficiently firm to prevent their being floated out, at the same time placing them in a position in which the water has the least lift upon them, while he carefully apportions his different lengths of timber to the different depths of water in his pond, so that the upper point of none of them shall approach near enough to the surface to be caught by the winter ice.

When the family are in comfortable circumstances, the winter supply nicely cut and stored away, the dam tight, and no indications of a wolverine in the neighborhood, the patriarch of the hut takes out the youthful greenhorns to give them lessons in topographical engineering; and, in order to try the strength of their tails, encourages them to indulge in amateur damming. The beaver works always by night, and to "work like a beaver" is a significant term for a man who not only works earnestly and understandingly, but one who works late and early.

From what has been said, it will be readily seen, that the maintenance of the dam is a matter of vital importance to the beaver. Some say that the pilot beaver sleeps with his tail in the water, in order to be warned of the first mishap to the dam; but as there is no foundation for such a cool assertion, it may be set down as a very improbable tale. The Indians avail themselves of this well-known solicitude to catch them; having broken the dam, the risk is immediately perceived by the lowering of the water in the hut, and the beaver, sallying forth to repair the breach, are slaughtered in the trenches.

As the supply of food in the vicinity of the dam becomes diminished, the beaver is obliged to go higher up the stream, and more distant from its banks, to procure his winter stores; and this necessity gives rise to fresh displays of his lumbering and engineering resources. In consequence of the distance, and the limited duration of the high water period favorable to transport, the wood is collected into a sort of raft, which, a lumberman asserts, is manned by the beaver, and steered by their tails, in the same manner as Norway rats are known to cross streams of water. When the raft grounds, forthwith a temporary dam is thrown across the stream below the 'jam,' by which the waters are raised, and the raft floated off, and brought down to the dam, which is then torn suddenly away, and the small raft thereby floated over the adjoining shallows.

Slavery as it is.

Our readers will remember that some time since, Mrs. Douglass was arrested and imprisoned at Norfolk, Va., for the great crime of teaching colored children to read and write. The circumstances connected with her arrest, will doubtless be interesting to all. Here they are:—

All was going on as peaceably as usual, and I had taken my seat to commence my daily toil, when a loud knock was made at my front door. I answered it myself, when the face of an officer presented itself, who inquired who lived up stairs. I replied that I alone occupied the house. He then asked if Mrs. Douglass lived here. I told him that I was Mrs. Douglass. He said, 'You keep a school.' 'Yes sir,' was the reply. "A school for colored children?" I answered 'Yes.' "I must see those children," said he. I then demanded what business he had with them, or any thing in my house. He replied that he had been sent by the Mayor. "Very good, sir," said I, "walk in, and you shall see them;" and, without giving my daughter or the children any notice, I invited him up stairs into the school-room. Never will I forget the frightened state of those children, and the countenance of their young teacher. My daughter sat paralyzed, covering her face with her hands; and it was some time before I could restore order in the room. Some were crying, some exclaiming, "Oh my! oh my!" and some clinging around me in their terror; but during the excitement, I never lost my presence of mind.

As soon as I had restored quiet in the room, I inquired of Mr. Cherry, the City Constable, what he wanted with those children. He replied that he must take them before the Mayor. "Very well sir," said I "my daughter and myself will accompany them." To my astonishment, he went to the head of the stairs and gave a loud rap with his club, when another officer made his appearance, entering from my back door. For the moment I thought that my house was surrounded with officers, who perhaps fancied that they had found a nest of thieves. They then noted down the names of the children, as well as those of their parents. When they had finished, I politely informed Mr. Cherry that they were all free children, and all, or nearly all, members of the Christ's Church Sunday School. "It makes no difference, madam," he replied, "it is a violation of the law to teach any colored person to read or write, slave or free, and an act punishable by imprisonment in the penitentiary." "Very well," I replied, "if they send me to the penitentiary it will be in a good cause, and not in a disgraceful one." Even this information, which was the most profound news to me, did not unnerve me at all; for I remembered that our Saviour was persecuted for doing good, and why should not I be? This thought strengthened me to bear my own persecutions for ten long months afterwards."

The Manufacture of Paper.

The New York *Times* contains an interesting article of some length on the manufacture of paper in the United States. That paper says:—

We have prepared from authentic sources, and from a careful comparison of data, the following statistics relative to the manufacture of paper in the United States.

We find that there are in the United States 750 paper mills in actual operation. Allowing 4 engines to each mill, and calculating that each engine will make 400 pounds of paper a day, the quantity of paper made in a year will be as follows:

Number of mills, 750.

Number of engines, 3,000.

Number of pounds of paper per day, 900,000.

Number of pounds of paper in the year, allowing 300 days to the year, 270,000,000.

Value of this paper at ten cents a pound, $27,000,000.

It is estimated that one and a half pounds of rags are required to make one pound of paper. Adopting these data, we find that 402,000,000 pounds of rags are consumed in one year; their value at 4 cents a pound being $16,200,000.

The cost of labor is one and a quarter cents upon each pound of paper manufactured, and is therefore $3,375,000 a year; and the cost of labor and rags united is $19,575,000 a year.

The cost of manufacturing, aside from rags and labor, estimated from adding together the cost of felts, wire cloth, bleaching powders, fuel, machinery, interest and fixed capital, insurance expenses, &c., we find to be $4,050,000. Adding this to the cost of rags and labor, we find that $23,625,000 is the total cost of manufacturing paper worth $27,000,000, a measure of profit by no means unreasonable; and which might be considered small, were not the manufacture comparatively free from those sudden changes that affect the manufacture of cloth and metals.

Wood Gas.

In 1851, Professors Pettenkofer and Ruland of Bavaria invented and patented a process for the manufacture of illuminative gas from wood. Since that time the new gas has been introduced and brought into general use in the cities of Basle, Ulm, Darmstadt, Cobourg, Baireuth, Altenburg, and Heilbronn. Mr. Emil Breisach, Chemist, of Bavaria, has recently introduced the process into the United States, and has demonstrated its utility and practicability by extensive and successful experiments at the Gas Works in Philadelphia, and also at the Manhattan Gas Works in New York. The process is exceedingly simple, differing from the method employed in the manufacture of coal gas only in the means used for the disintegration of the gas from the other properties of the vapor evolved from the wood; the former being achieved within the retort at a slight increase of temperature; the latter passing from the retort into a long shallow chamber above, where it becomes more heated, and passing thence into a similar but shallower and wider chamber beneath the retort, where its heat becomes still more intense. From this chamber it is conducted through a large tube into a hydraulic main, where, being cooled, it leaves much of its tar and pyroligenous acid behind, and passes through another tube into a vessel through which fresh water is constantly flowing, where it is cleansed still further, and thence through a long tube into the purifier. There, by being brought into contact with lime, the gas is freed from its remaining tar, acid, vapor and other non-luminous properties, and is forced into the gasometer, ready for use.

By this process a single retort produces from 8,000 to 9,000 cubic feet of gas per 24 hours, at an expenditure of no more fuel than is required for the same time in the production of coal gas, while the product of the latter is only 3,200 cubic feet. This new gas burns freely, with a clear, sharp, steady flame, brighter than coal gas, and produces but little if any soot. Its smell resembles ether, or old and mellow cider, is by no means unpleasant, and possesses not a particle of affinity to that of coal gas. With gas from coal it readily assimilates, and is said to improve the light of the latter.

That it will ever come into general use in cities of any magnitude is unlikely, owing to the greater bulk of wood compared with coal, and the difficulty attending the getting of such quantities as would be required to supply a city like New York with light, though as an accessory it would be valuable; but for country towns, where wood may be had almost for the asking, this invention must prove valuable.

The heating process chars but does not consume the wood, leaving an excellent article of charcoal, while the tar is worth more than double that which is obtained from coal, and the pyroligneous acid is for many purposes in itself of great value.

The Steamer City of Glasgow.

The *Jersey Blue* has the following affecting story connected with the probable loss of this noble ship:—

During the latter part of our career in the Philadelphia post office, we became acquainted, among the mass of human beings whose faces appeared daily at the "general delivery window," where we were stationed, with an intelligent, happy-looking Englishman, of about forty-five years of age, who came frequently to inquire for letters from home. He was a man of pleasing manners, and evidently had been well educated and accustomed to the refinements and elegancies of really good society. Being a stranger on our shores, he was glad to avail himself of an opportunity of conversing with us and spoke freely of his past and of his hoped-for future. He had come over to Philadelphia, bringing with him a little son apparently about twelve years of age, to select a residence for the rest of his family which he had left in England, and to make all the arrangements necessary to their comfort when they should arrive. He had accomplished this—had taken and furnished a house in Philadelphia, and was expecting letters from his wife informing him of her sailing with their children in the steamer City of Manchester.

We handed him a letter—it spoke of her expectation to sail in that steamer, and he went away with such glad anticipations as might be supposed to fill the heart of a husband and father long absent from the wife and children whom he soon expected to meet and embrace again. A few days passed, and another foreign mail arrived, and with it a letter to our friend from his wife, saying that she had not been able to make her arrangements in time to sail in the Manchester, but that she should certainly sail in the Glasgow. Some time after this, letters came, which she had mailed at the time of embarking in this ship, and now he was unspeakably happy with the almost certainty of seeing his wife and children in a few days, for the New York mail steamers generally make the passage but a few days sooner than our screw steamers. Soon he with many others, commenced going down every day to Queen street wharf to look for the in-coming steamer.

But who shall speak of the horrors to come? Day after day did he with many others on that sad walk, go down to the wharf and strain his vision to descry among the numerous vessels down the river, the anxiously expected steamer. We saw him when the vessel had been some thirty days out, and were startled at his appearance. The plump, happy-seeming face of one month before, was haggard as the face of Death, the eyes that so shortly before we had seen dance in the light of inward joy, were blood-shot, wild and glaring upon us with a maniac expression. He walked mopingly away, but his face haunted us still. A few days after this, a steamer arrived bringing the report that a vessel somewhat resembling the Glasgow had been seen off the Bahamas; this report brought him to us again. Oh, how that false hope had brightened his countenance! His eyes had gained their expression of intelligence, and he clung to this baseless hope, as a drowning man to a straw.

We left the Post Office a few days after this.* Yesterday we enquired concerning this wretched man, and were told that he had been for some time in the Lunatic Asylum, a raving maniac. May God reward him in eternity!

Experiments with the Electric Telegraph.

Some experiments have within the past fortnight been made at Portsmouth, with regard to this science, of a most important and remarkable character, and which would appear to open up and promise to lead to further triumphs in electricity, equal in importance to any that have already been achieved. The experiments in question were for the purpose of ascertaining the possibility of sending electric telegraph communications across a body of water without the aid of electric wires. The space selected for the experiment was the Mill-dam (a piece of water forming a portion of the fortifications,) at its widest part, where it is something near 500 feet across. The operating battery was placed on one side of the dam, and the corresponding dial on the other side. An electric wire from each was submerged on their respective sides of the water, and terminating in a plate constructed for the purpose, and several messages were accurately conveyed across the entire width of the mill-dam, with accuracy and instantaneous rapidity. The apparatus employed in the experiments is not pretended to be here explained in even a cursory manner; this is of course the exclusive secret of the inventor. But there is no doubt of the fact, that communications were actually sent a distance of nearly 500 feet through the water without the aid of wires, or other conductors, and that there appeared every possibility that this could be done as easily with regard to the British Channel as with the mill-dam. The inventor is a gentleman of great scientific attainments, residing in Edinburgh, and lays claim—and we believe with some justice—to being the original inventor of the electric telegraph; but, from circumstances, he was unable to carry out the invention to his own advantage. The experiments at the mill-dam were of a strictly private character, although they were carried out by Capt. Beatty and other engineering officers belonging to the garrison.

[English Paper.

Farms Improved by Agriculture.

Citizens of wool growing districts, are familiar with the rapid improvement of "Sheep farms," by sheep grazing alone. It is the belief of many whose opinions have been formed by observations and experience, that by placing as large a flock of sheep on a farm as the land will sustain, and in five years, without any other means, it will be comparatively rich. Were this fact more generally known, it might change the husbandry of considerable portions of this State, the lands of which are better adapted to wool growing, to say nothing of the remoteness from produce markets. The following quotations from the Transactions of the Norfolk Agricultural Society, which we find in the Wool Grower, are worthy of consideration:—

"A man having a small farm, formerly kept forty sheep, four cows and one horse, and had food enough for them the year round. The price of wool falling, he sold his sheep, and for a number of years he kept other stock altogether. He now keeps but three cows, and one horse the year round, and pastures two cows extra through the summer, sells but very little hay—not half enough to keep another cow; he has the same amount of pasture and mowing land as when he kept the forty sheep in addition to his other stock, and yet his farm does not look as well as then. He used to raise turnips among the corn for his sheep to eat in winter, and gave them besides, a few bushels of grain. The lambs, however, more than paid for his extra feed.

"Another farmer for a great number of years kept about sixty sheep, eight or nine cows, (or other stock equal,) one pair of oxen and one horse. After keeping the sheep for a number of years, he found he could then keep as large a stock on his farm with the sixty sheep, as he could keep before; showing that they had improved the farm to furnish their own support. To stock a farm entirely with sheep, would not be so profitable as to keep a limited number—yet it would pay as well as other stock. The object is to keep enough to consume that part of vegetation peculiary fitted to sheep, and which other stock will not eat, adding to the same time enriching elements to the pastures and yards by their manures. It is the opinion of many farmers, that pastures for other stock may be improved by keeping a small flock of sheep upon them a portion of the time, and the opinion seems fairly supported by reason and experiment." [Farm Journal.

Autumnal Fevers.

It has been observed that autumnal fevers do not prevail with us to such an extent now, as they did some years since; and those cases which do occur are of a milder type, and therefore more easily managed. We believe the exemption from these fevers, as well as from much other disease, can be attributed in part to the healthful and abundant supply of pure water which is furnished our citizens. As has been before ramarked in this journal, the water "runs through our sewers as clear as a brook;" and so long as it continues to do so, we can have no miasmas generating under ground, and producing disease and death. In many cities and large towns, no perfect system of sewarage has been adopted, and some of them are deficiently supplied with water, and that not of the best quality. It is not strange that in such places sickness to a considerable extent should prevail; and at this season of the year especially, that continued fevers should be of a malignant type. Our city continues healthy; there is comparatively but little acute disease prevailing, and it can with truth be said that Boston is one of the healthiest cities in the world.

[Boston Medical and Surgical Journal.

Remarkable Coincidence.—A correspondent of the Petersburg *Express*, at Charleston, Va., communicates to that paper the following series of incidents, which, if true, are certainly very singular: Washington was accustomed to wear on his watch two seals, one gold and the other silver. Upon one of them the letters G. W. were engraved, or rather cut. The seals he wore as early as 1754, and they were about his person the terrible day of Braddock's defeat. On that day he lost the silver seal. The gold one remained with the General until the day of his death, and was then given by him to his nephew, a gentleman of Virginia, who carefully preserved it until about seventeen years ago, when riding over his farm he dropped it. The other day the gold seal, lost seventeen years ago, was "plowed up," reecognized from the letters "G. W." on it, and restored to the son of the gentleman to whom Washington had presented it. At almost the same time the silver seal lost in 1754, just one hundred years ago, was plowed up on the site in which Braddock was defeated and in like manner recognized from the letters "G. W." So that in a very short time the companions will be again united. I have this whole statement from the most reliable source possible, namely, from the gentleman himself, who has thus restored to him these precious mementoes of his great ancestor.

Mulching.

This term is so frequently used by horticulturists, that it would seem to need no explanation. Yet we question if there are not many who read the word, without knowing its true import. *Mulch* from the Hebrew, (to dissolve) Webster says, half-rotted straw. But we apply the term to any thing that shades the ground around plants, whether it be straw, leaves, tanbark, rocks, chips or planks. A plant removed in the summer should be mulched; it may sometimes be mulched with rocks, or plank to better advantage than with straw or leaves, as the rocks or plank will keep the ground around the plant moist longer than fresh applied leaves or straw. Cuttings of any plant will strike root and grow freely in the summer months, if properly mulched with rocks, bricks or planks. The advantage of mulching with straw or leaves is, that the ground is not only shaded but enriched by the decaying vegetable matter. By judicious mulching, almost every vegetable, fruit or flower may be grown in perfection throughout our hottest, dryest summers. We had occasion last month to remove a new variety of strawberry; the plants were in bloom and fruit, we carefully mulched each plant and have not lost a plant. The literal meaning of mulching is, to apply straw or leaves around, or among plants. But plants may be mulched with anything that will shade the ground without taking nourishment from it, and this is mulching too. [Soil of the South.

Time to Cut Buckwheat.—It is hard to give a precise rule for the best time to cut buckwheat. The grain continues to ripen successively, and while most of the stalks remain green or succulent, the grain will not drop off. It is therefore best to let the crop remain so long as the amount continues to increase by successively ripening portions. But as soon as the plant loses its fresh appearance, and the first ripened portions are found to separate easily, no time should be lost in cutting. The rule with some farmers in the north, is to allow the crop to stand till the first night frost, and then to cut as quickly as possible, before the shelling process commences. But when frosts do not come early, it is cut before. As soon as the stalks are dead or dry, buckwheat threshes with great ease, but not before; hence the reason that when but partly dried, it is often found so difficult to thresh. At the north, it is usually sown during the early part of summer, sometimes nearly as late as midsummer; if sown too early, the grain does not set so well.

[Albany Cultivator.

Culture of Strawberries.—The New York Horticultural Society, at a recent conversational meeting, arrived at the following conclusions in regard to the best method of cultivating strawberries:—

"The best soil for the strawberry was stated to be a gravelly loam. The land should be well drained, and to every acre applied twenty bushels of unbleached ashes, ten bushels of lime, and two or three pounds of salt. The ground should be well broken up; animal manures should be eschewed; leafmould is the best, and this should be carefully spaded in. About the first of July is the best time to set out the plants. In doing this, pains should be taken to have them firmly rooted. The rows should be eighteen inches apart, and the plants a foot apart.

Geological.—In Scotland, an important geological discovery has lately been made. Zore-More, a large mountain near Apple Cross, on the west coast, on being accidentally excavated, presented a substratum of pure lime, within five feet of the surface; and on prosecuting the discovery by a further excavation, it was ascertained that the whole mountain, except an average surface of twenty feet, consists of lime fit for burning or agricultural purposes. The hill appears to have been at one time a stupendous limestone rock, which has been submitted to the action of intense heat. On the summit of the mountain volcanic remains, vitrified stone, and lava, have been found.

It was stated by Professor Mapes, at a recent meeting of the Farmer's Club at Louisville, that "the value of live stock of the United States at this time is not less than $600,000,000, and this will be increased by any increase of the grass and grain crops. More than 120,000,000 bushels of wheat are annually grown, 14,000,000 bushels of rye, 150,000,000 bushels of oats, 5,000,000 bushels of barley, 9,000,000 bushels of buckwheat, 20,000,000 pounds of butter are made, 105,000,000 pounds of cheese, and 14,000,000 tons of hay." These estimates do not include Indian corn, potatoes, beans, fruit, tobacco, and various other products, equaling in value those above named.

The Executive Committee of the Home Missionary Society state in the last number of the *Home Missionary*, that it is their desire and purpose to occupy Kansas and Nebraska, as missionary fields, as soon as possible, and arrangements are being made by the Society with that end in view.

It seems that a wrong impression has obtained in regard to the physical condition of Mr. N. P. Willis. In the *Home Journal* of Saturday, he says: "I am in some danger of recovery, I believe, here and there a doctor thinking it not impossible."

Of all the deaths in New York last year, only 30 per cent. were between the ages of 20 and 60; while nearly 65 per cent. were under 20. During the month of July just closed, there were 3632 deaths, of which no less than 1273, or 35 per cent. were under one year of age.

A rich citizen of Cologne has given to that town some $70,000 to build a public gallery of the Fine Arts. A good example—which might be followed in New York, with great advantage to the public.

Ayer's Cherry Pectoral.

"Wisdom shall bow down to it, and the great of the earth, shall kneel before it."

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La., April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.

Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere.

Election Notice.

STATE OF NEW YORK—Secretary's Office, Albany, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

Sheriff's Office, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

PROPHECY—NO. 1.

BY ELD. ELIAS BURDICK.

Having read several articles in the *Recorder* of late on the prophecies, with your permission, I have thought of showing, like Elihu, my opinion of some of them. And if I should darken counsel with words without knowledge, I should only do as I think many others have done before me. While, in these late articles, some true light has undoubtedly been shed on some of the prophecies, there has yet been, in my opinion, a strange mixing up and blending together of things far removed from each other. Prophecies which have had their exact fulfillment in events long past and gone, are brought down and applied to an imaginary something yet to come; as, in the *Recorder* of May 25th, it is said of the Russian empire, "Its head will be of gold, its breast and arms of silver," &c., while every student in the prophecies ought to know, that that image represented the Chaldean, Medo-Persian, Grecian, and Roman empires. But what seems to me to be the greatest error of many modern writers is, that they mix and blend together prophecies which point out events which are to terminate the reign of the man of sin—the reign of wickedness, in both church and state—with prophecies concerning the second advent of Christ and the final end of all things. Whoever will carefully read Matt. 25: 31—46, 2 Pet. 3: 7, and John 5: 28, 29, and allow these Scriptures to mean what they say, *must see* that the second advent, the general resurrection of both righteous and wicked, the burning of this present earth, and the final judgment, will *all* take place at one and the same time. That there will be a breaking down of all oppressive powers, and war made to cease from under heaven, and a long reign of righteousness and peace established and sustained in the earth, before the final judgment, are also among the plainest things revealed in the Bible. And those who undertake to explain and apply any of the prophecies, ought to be exceedingly careful not to cross such plain land-marks of divine truth. And readers should know better than to follow them, if they do. But there are certain prominent features of unfulfilled prophecy, which may be understood, if studied with sufficient care. And it is only to some of these that we wish now to invite attention.

First, to some of the prophecies by which the fall of the Turkish Empire is put beyond dispute. An angel was sent to the prophet Daniel, *to show him the things noted in the scriptures of truth;* that is, (as what follows distinctly shows,) to drop all figures, and relate, with the precision of a narrative, in consecutive order, a general outline of all the revolutions which should take place in that region of country, from that day to the final restoration of the Israelites to their own land. The only thing that seems to be wanting to turn it into a history of those nations, so far as the prophecy is fulfilled, is the names by which they are known in history. And even that is not wanting, at the beginning of the series. So, if any difficulty exists about reading the doom of the Turkish Empire, it is only in knowing when we get to it in this connected chain of prophecy. There are, however, two ways of gaining this point. One is the consecutive order of the rise and fall of empires, as recorded in history; the other is the manner of conquest by which this empire arose—its extent and limitations, and all the peculiarities of its character. Mr. Keith says, "The observations of Sir Isaac Newton on this prophecy contain a circumstantial detail of the historical events, and of their application to the prediction." And he gives us what he calls *a succinct and general view of it* in his work. Either of these would be too lengthy to be copied in a newspaper article. Most readers may have access to one or both of these works.

According to the order of events thus followed out in history, and applied to what is here predicted, we find the Turkish Empire introduced under the title of "the King of the North," in the 40th verse of the 11th chapter of Daniel. Then the historical accounts of the rise of the Turkish Empire—its manner of conquest—its extent and limitations of territory—their entrance into the glorious land [Palestine]—their spoiling of the Egyptians; and every minute circumstance answers exactly to the prophecy, if these researches of history are to be relied upon, of which there can be no rational doubt. Therefore it is almost as certain as mathematical demonstration, that we have the Turk under consideration, from the expression, "the King of the North," in the 40th verse, to the end of the chapter. And the prophecy is all fulfilled up to the 44th verse, where we begin to read his doom. "But tidings out of the east and out of the north shall trouble him; therefore he shall go forth with great fury, to destroy, and utterly to make away many." We would not say, it is certain that the present war will bring in the fulfillment of this prophecy. But it so far agrees with it exactly. Tidings out of the east and out of the north have troubled him. And he has begun to go forth with great fury, utterly to destroy and to make away many. According to this prophecy, we should expect success to mark his movements for a while. And still further, "And he shall plant the tabernacles of his palace between the seas in the glorious holy mountain." This seems to mark an appearance of triumph for a while. But for its particular application, we must wait to see the event. And then, if what follows is to come as the result of the present war, we may naturally expect it will be a long one. "*Yet he shall come to his end, and none shall help him.*" There is no necessity of understanding this, that none shall *try* to help him. It is enough, if none shall succeed in helping him, so as to prevent his fall. And when the time comes, his fall is certain. And let it be particularly observed, that so much as is not already fulfilled, which is contained in these two verses, (44, 45,) which terminates in the winding up of this empire, *is the next event*, in this exact consecutive order, which is seen throughout this chain of prophecy.

The next events, after the fall of the Turkish empire, are brought to view in the first verse of the 12th chapter. "And at that time shall Michael stand up, the great prince which standeth for the children of thy people; and there shall be a time of trouble, such as never was since there was a nation, even to that same time; and at that time thy people shall be "delivered, every one that shall be found written in the book." Who is Michael, the great prince, he who stands for—*is surety for*—God's chosen people, but the Lord Jesus Christ? He is also styled the arch-angel, the chief, or lord of the angels. He shall *stand up*—arise—in his might, to put his hand to a great work. Though we are not to understand that he will make a visible and personal appearance at that time; but that he will take the wicked and oppressive nations in hand, as declared in the second Psalm, "Thou shalt break them with a rod of iron; thou shalt dash them in pieces like a potter's vessel." There will then be a time of trouble, such as never was since there was a nation. Some have tried to connect this with the time of trouble which our Saviour foretold concerning the destruction of Jerusalem. That was the greatest that ever was or ever should be, in any one particular place or city. But this will be such a general time of trouble among the nations of the earth, as never was. And yet, of course, in no one place be as great as the former. But this time of trouble must be of long continuance, and this breaking of the nations a progressive work; for *at that time*, the angel says to Daniel, *thy people shall be delivered, every one*, &c. All the Israelites are then to be brought home to their own land, *in the former part* of this time of trouble, it would appear. And many other great events are to follow, *after their return*, before this work of breaking the nations is finished.

We shall now turn our attention to some other prophecies which point out some of these things more in detail. And, *first*, to the return of the Israelites, and the overthrow of a mighty army attempting to reconquer them after their return; in which it will incidentally appear, that Russia, or the Emperor who will then rule over that people, whoever he may be, will yet exercise a mighty sway over a great part of the old world. To follow it out in detail would require a volume rather than a newspaper article. But whoever will carefully read the 36th chapter of Ezekiel, will see that the whole chapter is on the return of the Israelites to their own land, and their conversion. And it is in plain language, abounding with positive statements; as verse 8th, "But ye, O mountains of Israel, ye shall shoot forth your branches, and yield fruit to my people of Israel; for they are at hand to come." And all sorts of temporal, as well as spiritual blessings, are promised them; from which they are never again to be removed; which shows that it cannot be applied to any past event. The 37th chapter illustrates the same things, in part, in the figure of the valley of dry bones; in which also the figure is interpreted and applied; as verse 11th, "Then he said unto me, Son of man, these bones are the whole house of Israel." And in the miracle of joining two sticks into one, in the hand of the prophet, is shown that the two kingdoms, anciently called Judah and Israel, are ever after to be one. In applying it, the Lord says, "Behold, I will take the children of Israel from among the heathen, whither they be gone, and will gather them on every side, and bring them into their own land; and I will make them one nation in the land upon the mountains of Israel." (Verses 21, 22.) Again, he says, "And they shall dwell in the land that I have given unto Jacob my servant, wherein your fathers have dwelt, and they shall dwell therein, even they, and their children, *and their children's children*, FOR EVER." (Verse 25.)

The 38th and 39th chapters contain a prophecy of an immense army, under a leader called Gog, which shall attempt to spoil the Israelites, after this happy settlement. And this army is to be overthrown, and buried in the land. The people over whom Gog is to be the chief prince are called Magog, Meshech, and Tubal. Mr. Brown says, Magog was the second son of Japheth, and gave name to his seed. He says, Meshech was the sixth son of Japheth, and Tubal the fifth. And he makes it appear, that the descendants of these men make up the greatest part of the people of Russia. Therefore it appears that this Gog must be the then reigning Emperor of Russia, whoever he may be; also, Persia, Ethiopia, Libia, Gomer, and the house of Togarmah, with all their bands, are to help make up his army, together with many people not named. Here, then, is seen great reason to think it will be by the hand of Russia that Turkey will fall, and that the Russian Emperor will have almost unbounded sway in the old world, till he brings his immense army upon the land of Israel, to be slain and buried in the valley of Hamon-gog. But whether it will be the present Emperor, or one of his successors, or whether that government will first be revolutionized, and a new dynasty established, before this prophecy is fulfilled, we pretend not to say.

After giving a lengthy and somewhat circumstantial detail of these events in these two chapters, the Lord says at the close, "So the house of Israel shall know that I am the LORD their God, from that day and forwards." "And the heathen shall know that the house of Israel went into captivity for their iniquity." Again, "Now will I bring again the captivity of Jacob, and have mercy upon the whole house of Israel." And finally, he says, "Then shall they know that I am the Lord their God, which caused them to be led into captivity among the heathen; but I have gathered them into their own land, *and have left none of them any more there.* Neither *will* I hide my face *any more* from them; for I have poured out my spirit upon the house of Israel, saith the LORD GOD."

Here we pause to observe, that not only in this prophecy, but in all the predictions concerning this time of trouble, from the fall of Turkey to the millennium, there is a *dark side* to the enemies of God and religion, and a *light side* to the people and cause of God—like the cloud which stood all night between the Israelites and the Egyptians, till the scene ended in the deliverance of the former and the destruction of the latter. And this time of trouble will surely end in the destruction of all the hostile opposers of Christ's kingdom, and in the deliverance of his people from every yoke of bondage. [Remainder next week.

THE HOME MOTHER.

Some one, writing for the *Masonic Mirror*, has drawn a charming picture of a home-loving, child-loving mother:—

We must draw a line—aye, a broad line, between her and the frivolous butterfly of fashion, who flirts from ball to opera and party, decked in rich robes, and followed by a train as hollow and as heartless as herself—she who, forgetful of the task assigned her, neglects those who have been given unto her charge, and leaves them to the care of hirelings, while she pursues the giddy round of her amusements.

Not so our home-mother—blessings be on her head! The heart warms to see her in her daily routine of pleasant duties. How patiently she sits, day after day, shaping and sewing some article for use or adornment of her little flock! And how proud and pleased is each little recipient of her kindness! How the little face dimples with pleasure, and the bright eyes grow still brighter, as mamma decks them with her own hands in the new dress she has made! How much warmer and more comfortable they feel if mamma wraps them up before they go to school! No one but her can warm the mitts and overshoes, or tie the tippits around the necks!

There is a special charm about all she does—the precious mother! They could not sleep—nay, for that matter, she could not, if she failed to visit their chamber, and, with her soft hands, arrange them comfortably before she slept. Her heart thrills with gratitude to her Creator as she looks on those sweet, blooming faces; and when their prayers are done, she imprints a "good night" kiss on each rosy little mouth. It may be, too, a tear will start for one little nestling laid in its chill, narrow bed, for whom her maternal care is no longer needed. It sleeps, though the sleet and snow descend, and the wild winter winds howl around its head. It needs no longer her tender care. A mightier arm enfolds it. It is at rest! She feels and knows that it is right, and bends meekly to the Hand that sped the shaft, and turns with a warmer love, if it is possible, to those little ones who are left her to love. How tenderly she guards them from every danger, and with a strong, untiring love, she watches by their bedside when they are ill! Angels must look with love upon her acts. Her children shall rise up and call her blessed, and the memory of her kindly deeds will enfold her as a garment.

PREPARATION FOR THE PULPIT.

There is much truth in the suggestions which we append from an unknown source:

After all, godly simplicity and sincerity of purpose will prove the best guide to the young student in his necessary preparation for his ministerial labors. This will preserve him from all ostentatious display of talents, real or imaginary; from all undue self-reliance on the one hand, and all undue appropriation of other men's labors on the other; from all wish to appear great rather than to be really useful, and from all danger of thinking more highly of himself than he ought to think, or of acting under the influence of any of those mean and sordid motives which, sooner or later, ruin the brightest hopes, and falsify the most promising anticipations of ministerial success.

The man who borrows from others for the purpose of enlarging his own mind, or of bringing some known truth home in a new and more powerful method to the hearts of his flock, is in a very different position from him who borrows because he is too indolent to think, and who then retails what he has read with the indifference of a school-boy going through his task.

Above all things, prayer must blend itself with all ministerial labors. Nothing, indeed, makes a thought derived from others more certainly our own, than the attempt to make it a subject of serious and earnest petition. This gives a new and somewhat original cast to the thought itself, and it flows from the mind and from the tongue with a mild yet winning force which few hearts are able to resist. To a preacher who thus combines study and devotion, though he may give no signs of extraordinary genius, the hearers listen—they know not why—and are impressed by his preaching in a manner they can scarcely understand. The secret of his influence is, that God is with him and makes whatever he does prosper.

[Presbyterian Advocate.

"Selfishness is its own curse; it is a starving vice. The man who does no good gets none. He is like the heath in the desert, neither yielding fruit nor seeing when good cometh—a stunted, dwarfish, miserable shrub."

"BEHOLD, I COME!"

BY GRACE DE LA VERITE.

Lonely and weary one,
On whom affection's sun,
Hath not its brightness for a moment thrown,
Behold, I come!

Wretched, neglected thing,
On whom disease doth fling
Its loathsome, bitter, and deep-rooted sting,
Behold, I come!

Ye who life's pleasures have,
Nor see the yawning grave,
Nor yet have deigned to call on me to save,
Behold, I come!

Ye who 'neath tyranny,
Faithful have been to me,
Your cross upraised ever courageously,
Behold, I come!

Courage, ye loving few!
Be to your Master true!
In darkest hours striving his will to do!
Behold, I come!

When 'mid life's bitterness,
Dark thoughts your souls oppress,
Know ye are not forsook in your distress!
Behold, I come!

Fear not that certain day,
When life shall ebb away;
Look then to me, nor bid the spirit stay!
Behold, I come!

Lift up your heads on high!
Soon *must* cease ev'ry sigh!
The harvest *now* doth speedily draw nigh!
Behold, I come!

SOLOMON'S KNOWLEDGE OF GOOD AND EVIL.

The knowledge of good and evil denotes, in Scripture parlance, the discrimination of truth and error. This attribute of the divine mind, and of minds endowed by him with eminent wisdom, is illustrated in the history of Solomon.

Comparatively a child, under age, he had remained in obscurity while David swayed the scepter. Now, a new crisis arrives. His father is dead. The government is thrown into his hands. His mind must energize in public affairs. Questions great and small, of all opposing interests, must come to him for settlement. To him the great game of mingling good and evil, truth and falsehood, which forms the sum of human existence, must come as to an arbiter, and his must be the arduous task of sundering between confused and conflicting semblances of truth; laying the true on this side, and the false on that. And in the rush and riot of human passion, under the complex movements of new-born empire, and the maddening whirl of fast developing manifest destiny, and in the presence of unseen, many-sided evil, alluring, beguiling, deceiving, this was no trivial undertaking.

At this crisis the Lord appeared to the youthful prince in a dream by night, saying, "Ask, what shall I give thee?"

And instantly the state of the young man's heart disclosed itself in a deep sense of need and of helplessness.

"O Lord, thou hast made thy servant king in the place of David, my father, *and I am but a little child;* I know not how to go out, nor come in, in the midst of a great people that cannot be counted for multitude. Give, therefore, thy servant an understanding heart, to judge thy people, *that I may discern between good and bad*, for who is able to judge thy so great people?"

Ah! were this the prayer of all rulers, happy were it for the world! For "the speech pleased Jehovah, that he had asked this thing." He granted his request. He gave him a wise and understanding heart, so that there was none like him before him—nor after him should any arise like unto him. And he added also that which he did not ask, both riches and honor.

Thus did the Divine Being disclose his own tastes and congenialities. Infinite in knowledge, he likes nothing better in us than ardent aspirations after wisdom, which he may abundantly gratify.

As if to exemplify that singular sagacity conferred on the young prince, several instances are immediately recorded of scenes in high life and in low life. Interests the most remote, involving the most unlike criteria of judgment, are sprung upon him, like unexpected moves upon the chess-board.

Now, from the dregs of human squalor and degradation, come two wrangling harlots.

"Oh! my Lord," cries one, "I and this woman dwell in one house; and I was delivered of a child, with her in the house, and the third day after she also was delivered; and we were together, there was no stranger with us, save we two in the house. And this woman's child died in the night, because she overlaid it. And she arose at midnight, and took my son from beside me, while thy handmaid slept, and laid it in her bosom, and laid the dead child in my bosom. And when I arose in the morning to give my child suck, behold, it was dead! But when I had considered it in the morning, behold it was not my son which I did bear!"

"Nay, nay," exclaims the other, "but the living is my son, and the dead is thy son!"

To the supercilious inhabitants of the saloons of Zion, this was a miserable wrangling of creatures too vile to be noticed. What cares the state, what care the good and pure of the upper classes, how the vermin down below may be preying upon each other? Away with the pestiferous carrion from the eye of day! Let them not pollute the atmosphere of royalty by their disreputable presence!

Not so, however, thinks justice. True justice is benevolent. The extreme depths of society merit the attention of wisdom. Nor can human beings sink so low, as that there shall not be room for divine law to administer between them. And in the due disposal of one such case, a thrill will be sent through all the nether realms of human existence.

But how decide a case so unpromising? No witnesses. No evidence. The word of neither party of a straw's weight. And cross-examination can but prolong before the throne a jargon of low-lived, vulgar contradiction.

An air of assumed impatience and haughty contempt clothes the brow of the king. In the style of genuine oriental despotism, he cries imperiously, "The one saith, This is my son that liveth, and thy son is the dead; and the other saith, Nay, but thy son is the dead, and mine is the living; *bring me a sword!*"

As much as to say, he could not stoop to be umpire between them; he would find a summary method of disposing of the whole matter, so that he should never be troubled by such cases in future.

A keen scimetar, curved and glistening, flashes in the hand of the ready executioner. "Divide the living child in two," cries the monarch sternly, "and give half to the one and half to the other."

Nothing could betray that the king was acting a part. It was an arbitrary proceeding eminently congenial to oriental despotism. Even the executioner never for a moment doubted the reality of the sentence, and prepared himself with alacrity for the fatal stroke.

Of course, there was nothing to weaken the impression of the danger upon the maternal instincts. It seemed to them real. They expected nothing but the instant edge of the pitiless steel; the effect was instantaneous and decisive.

"Oh! my lord the king?" shrieks one of the twain with a wild gesture of entreaty, "give her the living child, and in no wise slay it!"

"Nay," cried the other in a hardened tone, unconscious of the revelation she was making, "let it be neither mine nor thine, but divide it."

That moment the king's countenance changed. The grim sternness melted into a half smile. Pointing to the first woman, "Give *her* the living child, and in no wise slay it, she is the mother thereof!"

There was something in the suddenness of this judgment—there was a rapidity, a complete grasp of possibilities, a lightning insight of the heart, that sent a thrill of wonder to every breast.

The infamous notoriety of the parties only added to the impression. The story took wing. Nothing was talked of in market or bazar, but the wonderful shrewdness with which the young king had settled a dispute between two harlots.

"And all Israel heard of the judgment which the king had judged, and they feared the king, for they saw that the wisdom of God was in him to judgment."

The popular mind is quick to see and appreciate such sagacity in a ruler. The peculiar power of lightning divination by which truth is struck out vividly like an electric spark in the darkness, people instinctively recognize as a trait worthy of homage. A single instance of the sort will go further to enthrone a ruler securely in their affections than hours of high-sounding harangues.

Even the lower stratum of society—turning a clear eye up from its benightedness toward the empyrean of good behavior—will say, "Well, for a king, that is not so bad. Here is a body now, on the throne, that can understand even our affairs, and do good to us, evil and unthankful that we are."

Almost immediately upon the heels of this incident follows another in an opposite stratum of society.

Adonijah, brother of Absalom, unsatisfied with one fruitless attempt at a *coup d'état*, must needs plan another—Joab and Abiathar secretly urging him on.

Joab did not relish the new *regime.* The old general had had his own way too long not to be restive under a tight rein. He would oust Solomon from his seat. Cautious, however, and wily, the old campaigner concocted his measures in secret with Abiathar, and Adonijah was to be the active agent.

Coming to Bathsheba, mother of Solomon, with an air of humility, Adonijah begs her to obtain for him the hand of a certain beautiful Shunamite, who had cherished the declining years of King David. This, he urged, would be a kind of compensation for the loss of his birthright—he being older than Solomon, and set aside for him. In her simplicity, the queen dowager, supposing that all was right—and possibly thinking it an excellent match—proceeded forthwith to her son.

And the king rose up to meet her, and bowed himself to her, and sat down on his throne, and she sat at his right hand.

"I desire one small petition of thee; say me not nay."

"Say on, my mother."

"Let Abishag, the Shunamite, be given to Adonijah, thy brother, to wife."

Dark lightning flashed from the king's eye. He saw the skillfully-concealed plot through and through, even to the filmiest web and the black spider that spun it. To unite in marriage with his elder brother, dangerous as he was, a person like the fascinating Shunamite, who had sustained a relation so near and peculiar to the person of the late king, would be equivalent to placing the game of ambition in his power. Another than Solomon might think that disappointed ambition was seeking to console itself in the smiles of beauty, forgetful of its sinister projects. But Solomon saw that ambition would use that precious boon as the stepping-stone to power. By her means he would presently form a party in the royal household, among the old friends of David, fatal to the new authority. The beautiful Shunamite would become the focus of a Davidian party; the old *regime* as against the party of Solomon, the new *regime*. And to that focus, every malcontent, every man that remembered David's easy, good-natured way of getting along, with a not too strict discipline, as contrasted with Solomon's more rigorous rule, would be drawn. Hence, she was a talisman of power, a beautiful embodiment of partisan intrigue and cabal.

All this darted through Solomon's mind at a glance, so that he responded instantly:

"And why dost thou ask Abishag the Shunamite for Adonijah? Ask for him the kingdom also, even for him, and for Abiathar the high-priest, and for Joab the son of Zeruiah." Then lifting his hand to heaven, the king sware by Jehovah, "God do so to me, and more also, if Adonijah have not spoken this against his own life!"

Here was a mind piercing to the dividing asunder of soul and spirit. With resistless edge it sundered and sheared off the hypocritical mask of humility, and left the black reality of treason and fratricide alone in view. And the minister of justice went forth, and in that same hour Adonijah breathed his last.

And where were the confederates? Summoned unexpectedly, the astounded Abiathar heard the sentence, "Get thee to Anathoth unto thine own fields. Thou art worthy of death; but I will not at this time put thee to death, because thou hast shared the afflictions of my father!" And leaving his forfeited miter, Abiathar disappeared from the ken of history.

But what thought Joab, when the tidings reached his ears?

Times were changed since that relentless man could insult justice with impunity. The mild hand of gentle David no longer held the scepter. A hand of iron grasped now an iron rod. The veteran, hoary in crime, trembled as he saw his hour of reckoning had come. Red on his hand was the blood of the murdered Abner, the assassinated Amasa, and the slaughtered Absalom. And conscience told him to prepare to meet inevitable fate. Retribution gathered dark and lowering. Pale and haggard he fled. Yea, the bronzed warrior, whom not all the storms of battle could daunt, fled before enthroned justice! It was for him a day of the revelation of righteous judgment. And although he fled to the tabernacle, and laid hold on the very horns of the altar, it availeth not; even there inflexible justice followed him, and the sword drank his blood.

All Israel felt the salutary sensation. They felt that none were too low or too high to escape the unerring judgment of that mind. They felt that there was enthroned a power among them that was divine, and that God had, indeed, raised up a mind of extraordinary capacities, "to sit upon the throne of Jehovah over Israel." [Independent.

From the Congregational Journal.

POSITION AND INFLUENCE OF THE JEWS.

The existence of the Jews is the living miracle of the world. They are scattered and down-trodden, and yet, according to the most accurate statistics, are as numerous as they were when they left the land of Egypt; the returns made to Bonaparte giving about three millions. Expatriated, they become citizens of the world; and wherever tolerated, they commence traffic and become thrifty. Everywhere they are at home. They may be banished, but cannot be expelled; be trodden down, yet cannot be crushed. Only in the United States, France, Holland, and Prussia, are they fully citizens; but in spite of British statutes, the Russian ukase, and Turkish curse, they prosper still. The great nations of antiquity, the Egyptians and Assyrians, the Romans and Saracens, as well as the modern Turks and Christians, have attempted to destroy them, but in vain; while penal laws and cruel tortures have only served to increase their number and reinforce their obstinacy.

But the Jews exist not only as a monument and a miracle; Jewish mind has exerted a powerful influence on the world. Favored by Napoleon, the Hebrew race at once developed power which had never been suspected. Soult, Ney, and Massena, (who thus altered his name from Mannassah, to escape the odium of being an Israelite,) were all Marshals of France under the eye of the greatest warrior of his age. In politics, the Jews have Metternich in Austria, D'Israeli in England, a convert to the Christian faith, while the Autocrat of Russia has had a Jew for his confidential counsellor, and Spain a Prime Minister of the same race, and Russia her Minister of Finance. In the United States, Jews begin to figure in our national councils; Mr. Yulee, late member of the House, and Mr. Soule, recently Senator from Louisiana, being of the Hebrew stock. Mr. Cremieux, one of the most eminent lawyers of France, was what we should call the Attorney General upon the flight of Louis Philippe.

In money power, the Jews hold in their hands the destiny of kingdoms and empires, whose governments become bankrupt, and their sovereigns turn beggars, at a Hebrew's nod. Half a dozen Jews can do more to preserve the peace of Europe, by sitting behind their desks, and persistently saying No! to the royal applicants for money, than all the Peace Congresses and Conventions in Christendom. The Rothschilds, the Barings, and Sir John Montefiere, are all Jews, and with their banking establishments scattered over Europe and Asia, wield a sceptre more powerful than monarchs can hold.

Coming to the literary profession, and inquiring into the lineage of many of the most distinguished scholars and men of science, we find the Jews prominent here as well as in active life. The most renowned in Astronomy have been Jews, as the Herschels in England, and Arago in France, the Astronomer under Louis Phillippe, and who has filled the world with his fame. Those German works which are deluging the world, are for the most part the production of Christianized Jews, as those of Hengstenberg, Tholuck, Schleirmacher, Gesenius, Neander, Niebuhr, and others, whose learned treatises, Biblical criticisms, didactic theology, and general sacred literature, are found in the library of every Theological Seminary, and in the hands of every Theological student. Spinoza the famous infidel, was a Jew, and so are Ronge and Czerski, who took the lead of a new religious reformation in Germany in our day.

Such have been and are the Jews. Mysterious nation! Inexplicable enigma! A living, perpetually omnipresent miracle! A race so indomitable, so imperishable, must have been raised up and preserved for some grand purpose.

Bad thoughts are worse enemies that lions and tigers; for we can keep out of the way of wild beasts; but bad thought win their way everywhere. The cup that is full will hold no more; keep your heart full of good thoughts, that bad thoughts may find no room to enter.

THE MUSIC OF THE HEBREWS.

Except the allusion to harp and organ, as invented by Jubal the son of Lamech, (Gen. 4 : 31,) and the mention of songs, and tabret, and harp, by Laban, when he berated Jacob, (Gen. 31 : 27,) we find no particular reference to music, in the sacred sciptures, till the deliverance of the Israelites from Egyptian bondage. Standing upon the shore of the Red Sea, after Pharaoh and his host had been destroyed, Moses and the Israelites celebrated the victory which Jehovah had accomplished for them in a song. What the style of the music was, we are not informed; but the fact itself, that they sang, shows that, notwithstanding the hard servitude to which they had been subjected, they had found some opportunity to cultivate the fine arts.

After this period, we find copious allusions to music as an important branch of divine worship among the Hebrews. And it appears, that the ancient music of the Hebrews was very complete, and had in it great variety of tunes. The Psalms of David were of various meters, demanding, of course, various kinds of tunes. They had, also, many kinds of musical instruments, such as the psaltery, the harp, the timbrel, the trumpet, the cymbal, the organ. King David, who had great taste for music, seeing that the Levites were numerous, and not employed, as formerly, in carrying the fixtures of the Tabernacle, appointed a great part of them to sing and to play on instruments, in the Temple. He organized twenty-four bands of musicians, over each of which was placed a skillful leader. These bands served in the temple by turns, and were ranged in order about the altar of burnt sacrifices. As the whole business of their lives was to learn and to practice music, it must be supposed that they understood it well, whether it were vocal or instrumental.

As to the nature of the Hebrew music, we can only conjecture, because it has long been lost. But if we may draw any conclusion from its effects, we must accord to it great excellence. David, by his skill on the harp, dispelled the melancholy vapors of Saul. And the prophet Elisha, finding himself agitated, when Jehoshaphat consulted him to know what his success would be against the king of Moab, called for a minstrel to play before him; and when he played, it is said that *the hand of the Lord came upon him.* (2 Kings 3 : 15.) The meaning of which is, not that the gift of prophecy was the natural effect of music, but that the music calmed the prophet's spirits into a temper fit to receive the divine afflatus. On the whole, it may be safely averred, that the science of music was brought to greater perfection, among the Hebrews, than in any other nation of antiquity.

But music, among the Hebrews, was not a part of worship peculiar to the Levitical dispensation. The song of Moses, at the Red Sea, was before the institution of Levitical rites. In many of the Psalms, David exhorts the nations of the earth to sing the praises of God. "*Make a joyful noise unto God, all ye lands. All the earth shall sing unto thee; they shall sing to thy name. Let the nations be glad, and sing for joy. Let the people praise thee, O God, let all the people praise thee.* (Psalm 66 : 1, 4 ; 67 : 4, 5.) But if singing was of ceremonial institution, the nations of the earth would have had no concern in it; it would not have been obligatory upon them. Besides, when the Ceremonial Law was in its greatest glory, in legal sacrifices in highest esteem, singing of psalms and spiritual songs was regarded as more acceptable to God than the offering of an ox, or bullock. (Ps. 69 : 30, 21.) What other reason for this preference can be given, except that the sacrifice of an ox was of ceremonial institution, whereas singing the praises of God was a part of moral worship, which might be performed in a spiritual and evangelical manner? Moreover, when the Ceremonial Law, with all its rites, was abolished, this duty of singing the praises of God remained in full force; for at the same time that the Apostle tells the churches that the law of commandments was abolished, and they were no more to be judged with respect to meats, and drinks, and holy-days, these shadows being gone, he exhorts them to sing psalms, and hymns, and spiritual songs. (Col. 2 : 16, and 3 : 16.)

The truth is, singing is a dictate of nature. If men, dictated by natural conscience, pray to God when in distress, or for mercies they want, so, guided by the same principle, they sing the praises of God for mercies received. Guided by nature, the Hebrews could do no less than sing the praises of the God who had been their refuge, their strength, and their very present help in trouble. T. B. B.

The Minister's Prospects.—One of our exchanges notices the provision which a Boston church has made for its pastor's family, by purchasing a policy of insurance on his life; and accompanies the statement with the following sensible suggestions:—

The clergyman, in entering upon the sacred office, deliberately gives up for the benefit of his people all thoughts of worldly wealth, and can not from his salary—no matter how liberal it may be—lay by a proper provision for his family, in case of his decease. His capital, if he have any, is expended in the long course of training necessary to prepare him for his future career. His time, so valuable, if he have or have not capital, is taken up in the same preparatory study, and, at the present day, when splendid fortunes are in the grasp of men of energy and foresight, this voluntary poverty requires no ordinary self-denial; as the thinned ranks of the ministry too surely testify. If the people to whom the clergy ministers be poor, his salary requires economy to procure even the necessaries of life. If his talents make him sought for by a wealthy congregation, they require his living to be commensurate with the means of the church, and charges of worldliness are not sparing when the minister looks coldly on appeals to charity. In any case, the prospect of a provision for the widow and the fatherless in case of death, must be dark and uncertain, unless by kindness and thoughtfulness, the people of a faithful pastor, 'convey peace to his heart during his life, by providing for his family after his death.'"

BRITISH CORRESPONDENCE.

Glasgow, September 29th, 1854.

The Trieste telegraphic announcement of the arrival of the Overland Mail yesterday, in anticipation of its intelligence, says under date Canton, Aug. 5th, that all the surrounding country was in firm possession of the insurgents, that the city itself was closely invested, and was expected in a few days to be in their hands. The promise of their speedy possession of the entire empire renders it a matter of the highest importance that the rulers may be guided aright in what concerns the spiritual welfare of the vast population subjected to their sway. Their observance of God's own Sabbath, when others who have long enjoyed God's instructing word reject it, lays this people more upon our spirit, and leads us the more earnestly to pray that they may be kept from dishonoring God in any other form. Now the danger of this at present seems to be not little. The movement is under the direction of more than one individual, each of whom has high consideration and influence, and it has been repeatedly supposed, that while Tae-ping-wang himself was much under the influence of a love to divine truth, that an unfavorable intermixture of error arose from one of the other Princes. This view is substantiated by the official statement referred to in our last, in which the Eastern Prince claims to have revelations from above, of such a nature as to occasion us considerable apprehension that he may do great injury. It is a pamphlet recently brought from Nankin, commencing with a narration of certain circumstances which occurred "on the morning of the 25th of December, 1853, *being the day of worship.*" To this sentence Mr. W. H. Medhurst, the translator, has appended as a note, "*This is kept on Saturday*, by an error in the calculations of the insurgents;" which we hope will be found to have been done rather from obedience to the divine command. The document intimates that "the Heavenly Father came down into the world," giving many commands, not about doctrinal matters indeed, but as to the management and ceremonies of the Court and the general administration of the Government. And as the result of this, Tae ping-wang, who bears the title of the Celestial King, is represented as saying that "when our Celestial elder brother Jesus, in obedience to the commands of our Heavenly Father, came down into the world, in the country of Judea, he addressed his disciples, saying, 'At some future day the Comforter will come into the world.' Now I, your second elder brother, considering what you, brother Tsing, have reported to me, and observing what you have done, must conclude that the Comforter, even the Holy Ghost spoken of by our Celestial elder brother, is none other than yourself." Accordingly, this Eastern Prince, Yang-Law-Tsing, has since assumed this title, and appends it to his name in all his proclamations, and even requires his name to be included in the doxology which is addressed to the Heavenly Father, which is chanted every morning and evening.

This we may indeed be ready to regard in a light more unfavorable than we ought in the circumstances of those directly concerned. We know that Tae-ping-wang, at the very beginning of his power, and while claiming the Kingdom as his right, rejected the titles which the Emperors have usually received; and, even by the latest communications, he continues to do so. He has erred in interpreting the promise of our Lord; but he does not absolutely pronounce its application, although he says he "must conclude" as he had done. And the Bishop of Victoria, in a long letter, (the postscript to which is dated July 22,) defending in measure, and apologizing in measure for the patriots, says even concerning the assumption of a divine title by the Eastern Prince, that "the terms Shing-ling, the Holy Spirit or Intelligence, applied by some of the early Protestant translators, and found also in the insurgents' books, in the same application as Shing shin fung, to the third person of the Trinity—*are a title not uncommonly applied in Chinese writings to Chinese monarchs.*" The Bishop has evidence of this in two Government proclamations which he has seen; and on his communicating with the Rev. Dr. Legge in Hong Kong, he learned that it is a phrase very commonly applied to deceased emperors in the sense of "sacred efficacy," or "sacred intelligence," while the Doctor has seen it applied even to a living emperor.

With these explanations, the Bishop concludes that we ought not to judge prematurely or harshly; but with the fear he entertains, hopes that missionaries may be sent who shall, with the Scriptures which the patriots themselves put in circulation, help to preserve them from error and correct what is already amiss. Even the Times, (Sept. 20th,) thinks "there is no necessity for hastily despairing of Chinese Christianity, or concluding that the divine doctrines of the Gospel have been deliberately depraved for any purposes of men." Let us not forget, in the presence of our Heavenly Father, those who as Sabbath observers may be in His hand instruments of peculiar blessing, but who on this very account are not only exposed to Satan's greatest malice, but also to the church's misrepresentation.

Rome has lost the vantage gained by miracle in behalf of Sunday observance. The wondrous vision of the virgins to the shepherds at Salette, near Grenoble, about eight years ago, and chronicled by us in the *Sabbath Recorder*, threatening with the vengeance of her son those who kept not Sunday holy, is now confessed by one of those shepherds to have been a pure invention. Yet miraculous efficacy remained in the waters of a neighboring spring, and the priests were enriched by the imposture—and they are not in the least likely to return the money which has been received through the wretched imposture, nor will the Pope renounce the infallibility he assumes, though he sanctioned that imposture.

Rome has lost one of her really learued and useful men—Cardinal Mai, who recently was appointed Librarian to the Vatican. He obtained distinction and did good service by the discovery of numerous *palimpsests*, or rewritten MS.; especially copies of Virgil, Cicero, and Livy, over which, after having been partially obliterated, monkish legends had been written.

The Sultan of Turkey has forwarded to the French Embassy a vizirial letter, which prescribes to the Pasha of Jerusalem that he give ground gratuitously for the construction of a Latin church in the village of Beit-Djala. The Sultan has also denounced the venal conduct of certain functionaries, and seems desirous of promoting a more faithful administration. Thus his necessities, and the war which Russia waged because of the Sultan's necessities, may be the means of giving greater security to life and property, and of thus leading to a readier settlement in Jerusalem's land those of whom the prophet speaks as "at hand to come." J. A. BEGG.

EDUCATIONAL.

The Educational Committee appointed by the last General Conference, "to take such measures as they may deem proper in regard to our educational interests," held several sessions during the Society meetings at Little Genesee. The following Constitution was adopted as the basis of a Society organization:—

Constitution.

Art. 1. This association shall be known by the name of the Seventh-day Baptist Education Society.

Art. 2. The object of this Society shall be the promotion of Education in the Denomination, in such a manner as shall tend to the ultimate founding and full endowment of a Denominational College and Theological Seminary.

Art. 3. Any person by contributing two dollars may become a member of this Society for one year, which membership may be renewed, for a year, by the payment of one dollar. Each subscriber of twenty-five dollars, which may be met by two payments, shall be a member for life. Societies, churches, or associations, may become auxiliaries by contributing to its funds, and shall be entitled to one vote for every ten dollars contributed.

Art. 4. The officers of this Society shall consist of a President, Vice Presidents, a Recording Secretary, a Corresponding Secretary, a Treasurer, and ten Directors, whose respective duties shall be the same as those of like officers of similar associations, and shall be elected annually.

Art. 5. *Sec.* 1—The Society shall proceed, as soon as practicable, to establish a Literary Institution and Theological Seminary. The Professors in the Theological Seminary shall be Seventh-day Baptists—the Presidency of the Literary Institution shall always be filled by a Seventh-day Baptist—the other Professors and Teachers to be such as the Trustees of the Institution, acting in conjunction with the Society, shall see fit to elect. *Sec.* 2—Three-fourths of the Trustees of the Institution shall, at all times, be Seventh-day Baptists. *Sec.* 3—Any person contributing the sum of one hundred dollars, or more, towards the endowment of Literary Professorships, or securing its future payment to the Society, with the interest being paid thereon yearly, shall have the privilege of perpetually receiving in return, towards the education of a scholar, at the rate of ten per cent. per annum, for the time of actual attendance, on the amount paid or secured to the Society. All tuition in the Theological Department shall be free. *Sec.* 4—All contributions designated by their donors for a particular object, shall be accordingly appropriated. Contributions not thus designated, shall be disposed of according to the pleasure of the Society. All subscriptions for the endowment of Professorships shall constitute a permanent fund, and only the interest accruing thereon, shall be used for the objects specified.

Art. 6. The Society shall hold its annual session at such time and place as shall have been agreed upon at a previous meeting.

Art. 7. The officers of the Society shall constitute a Board for the transaction of business. The Board shall hold meetings, as often as once in three months, and special meetings as occasion may require, at the call of any two of its members, through the Recording Secretary. Five members shall constitute a quorum, and shall have power to transact all business pertaining to the interests of the Society, except locating the Institution.

Art. 8. This Constitution may be amended at any regular meeting, by a majority vote of the members present, provided such amendment shall have been recommended by the Board, or by a vote of two thirds without such recommendation.

The following resolutions were also adopted:—

Resolved, That we appoint a General Agent, whose duty it shall be to visit the entire Denomination, and secure subscriptions in accordance with the provisions of the Constitution, and that we also appoint an Assistan Agent in each Association, to assist the General Agent as he may require.

The following individuals were thus appointed: J. M. Allen, General Agent; J. R. Irish, alternate; A. B. Burdick, Assistant Agent for Eastern Association; W. B. Maxson, Assistant Agent for Central Association; N. V. Hull, Assistant Agent for Western Association; O. P. Hull, Assistant Agent for North-Western Association; Wm. F. Randolph, Assistant Agent for Virginia Association; Simeon Babcock, Assistant Agent for Ohio Association.

Resolved, That we request the friends of the enterprise, either individually or by church action, as they may deem proper, to send to the Secretary of the Committee, before the next Conference, their choice of the location for the Institution.

The method of taking this vote may doubtless be something like this: Where it is taken by churches, it may be done by ballot, each individual expressing his preference in regard to the location, and the clerk or some other one thus authorized sending the result to the Secretary. Where individuals do not thus vote, they can express their choice by letter directly to the Secretary.

Please direct all communications upon this subject, to the undersigned, Alfred Center, Allegany Co., N. Y. J. M. Allen,
Sec. of the Committee.

CENTRAL ASSOCIATION MATTERS.

DeRuyter, Oct. 9th, 1854.

To the Editors of the Sabbath Recorder:—

At the last session of the Central Association, held with the 2d Brookfield Church, some action was taken relative to certain difficulties said to exist with the churches in Jefferson County, and a Committee or Council of settlement was nominated to visit said churches, and to stand appointed, on acceptance of the churches referred to, and meet with the church at Adams on the first Fourth-day of January, 1855. It will be seen by the perusal of the following communications, that said Committee are accepted, and therefore appointed.

Forwarded as per order of Association.
J. C. Rogers, Cor. Secretary.

The Seventh-day Baptist Church of Adams, N. Y., to the Corresponding Secretary of the Seventh-day Baptist Central Association:

Dear Sir—By the minutes of our last Association, we discover that the letters of the 1st, 2d, and 3d Brookfield Churches, and also the Lincklaen Church, represented that certain difficulties existed among the churches of Jefferson County, they "asking the Association to devise some measures whereby said difficulties may be settled;" and that the Association, in accordance with their request, appointed a "council of reference and settlement;" and "entreat the brethren of Jefferson County to accept this council, and cooperate with them, in the settlement of the difficulties referred to;" and also that the churches inform you of their action with reference to the matter.

As the Church of Adams is one of the churches referred to, we would respectfully state, that we have no difficulty with any church of Jefferson County, belonging to this Association, or with any other church.

If reference be had to our position in relation to the Independent Church, we would say, as that church is composed of members, many of whom have been excluded from our church and fellowship, it is hardly to be expected that we can have that confidence in and fellowship for them, at present, that we could desire; yet we have no unkind feelings towards them, and shall be glad to fellowship them, as soon as we can have the evidence that they are in fellowship with God, and for this we shall continue to pray.

As to the council appointed by the Association, we most cordially accept them, in accordance with the rules of the Association; and shall be glad to coöperate with them in any reasonable measures for the good of our beloved Zion.

Adopted unanimously, Sept. 17th, 1854.
[A Copy.] A. M. Whitford, Clerk.

Hounsfield, Sept. 29th, 1854.

To the Corresponding Secretary of the Seventh-day Baptist Central Association:

Dear Brother—We received your official communication, in which you refer us to a resolution passed, (which was printed in the Minutes of the session of the Central Association,) relative to a difficulty of long-standing among the churches of Jefferson Co., and ask, whether we accept of the proposition for a Committee (appointed by the Association) to visit us in reference to said difficulty. In answer, we would say, there are no difficulties among our churches in this County, that we know of. On the contrary, they are enjoying an unusual degree of union, and have steadily joint communion seasons with each other. We should be very happy to have the Committee visit us, and we will refer our records to them for examination and advice, as to what has transpired since the session of the Central Association, held at DeRuyter in June, 1851, at which time the Association entertained a complaint against us, made by certain disaffected persons, charging us with corrupt discipline, which was referred to a select committee of nine (of whom Deacon Silas Spencer was chairman, and Gurdon Evans, clerk,) to whom our church records (by copy) were exhibited, and their report is as follows:—

"The Special Committee who have had in consideration the communication of the Hounsfield Church, presented their report, which was received and adopted: The Committee to whom was referred a petition from aggrieved members of the Hounsfield Church, would respectfully report, that after a careful investigation of the complaint and evidence therewith submitted, they have come to the following conclusion, that the complaint, together with the evidence adduced, are not sufficient to warrant the Association in entertaining an action against the Hounsfield Church for corrupt discipline. But in view of the circumstances which have come under the notice of your committee, they respectfully suggest, that the Association advise all concerned in the difficulty presented, prayerfully to examine themselves, and exercise due Christian charity toward each other, and that love without which, Christ has so often taught us, no man is an acceptable follower of him.
Silas Spencer, Chairman.
Gurdon Evans, Committee's Clerk.
Central Association, DeRuyter, Fifth-day, morning session, June 15, 1851.
Wm. C. Whitford, Association Clerk."

We repeat, that we have full confidence in the ability and integrity of the committee, and shall be happy to receive them as above; but we decline any trial or investigation before them, with any person or persons who have been expelled from our fellowship.

Your obedient servant,
Benjamin Maxson, Clerk.
By order of the Church.

[The letter of the Independent Seventh-day Baptist Church of Adams was printed in the *Recorder* of last week, and we therefore omit it here.]

SABBATH AND SUNDAY-SCHOOL CELEBRATION.

The Sabbath and Sunday-Schools connected with the Seventh-day and First-day Churches at Adams Centre, united in a very interesting celebration, on Tuesday, September 12th, 1854.

The scholars, with their parents, teachers and friends, assembled at their respective meeting-houses at 9 o'clock A. M., and thence went in a procession of some sixty-five carriages to a beautiful grove about one mile from the village.

After a large congregation was seated, and arrangements completed, the exercises were opened by prayer offered by Rev. J. J. Teeple; followed by nineteen addresses and dialogues by the scholars, and songs by the Sabbath and Sunday-School Choirs.

Adjourned at 12 o'clock for refreshments and recreation, during which time a bountiful repast was supplied to the whole company, and the grove resounded with the merry shouts of happy children.

After an intermission of one hour, the afternoon exercises were opened with a song, "*Again we're met,*" by the Sunday-School choir; followed by twenty-five pieces; after which Manford I. Dewey, (a Sunday-School scholar,) read the following resolutions:—

Whereas, there is a plain difference between right and wrong—a difference which seriously affects the welfare of the world—therefore, *Resolved,* That the common use of and traffic in ardent spirits is only calculated to make fools, paupers, and madmen, of some, while of others it makes knaves and nabobs, thus filling our land with poverty and crime.

Resolved, That we appeal to our fathers, and all voters, to give us the Maine Law and a Temperance Governor.

Resolved, That tobacco and rum ought to go together, and that we will forego the use of both, reserving our mouths for purposes more cleanly and respectable.

Resolved, That if we never grow to be men till we smoke or chew, we hope *ever* to remain *boys*.

Resolved, That the common use of tea and coffee is unnecessary and injurious.

Resolved, That the Bible and humanity cry out against human slavery; and that we are opposed to the fugitive slave law and the Nebraska bill, because slavery itself is wrong.

Resolved, That we are glad to see so many of our friends on this happy occasion, but feel sorry to think so many of them would have been absent from the house of God and the Sabbath-School, if this had been the Sabbath.

After these resolutions were adopted, the exercises were concluded with singing the "doxology," and benediction by Rev. J. J. Teeple. H. L. M.

LOSS OF THE "ARCTIC."

It is questionable whether any event in the last ten years has produced such thoughtfulness and solemnity in the city of New York as the loss of the "Arctic." The large number of well-known and influential persons on board, and the suddenness with which a certainty of their awful fate was announced, thoroughly aroused men to a sense of the danger which every where surrounds them. Some relief is found in the reports received from time to time of parties saved from the general catastrophe. Still a feeling of insecurity rests with oppressive weight upon the public mind—a feeling which is well expressed in the following paragraph from the *Independent:*

The possibilities of such a catastrophe are much greater than is commonly supposed. Let no one hastily censure the captain for running thirteen knots in a dense fog, or the "look-out" for any supposed delinquency. It is impossible to provide effectually against collisions at sea. Our blood runs cold to-day at the remembrance of a steamer crossing the bows of the sailing-vessel that bore us to Liverpool, so near that three minutes later a collision would have been inevitable; and yet she passed like a grim phantom in the fog, a black hull and a red pipe faintly looming athwart our bows at a distance of only twice the ship's length, while to her watch our vessel was probably invisible. We heard her paddles, and the roar of the sea as it parted before her ponderous bulk; we heard the tolling of her bell as from a phantom-ship; her direction and her progress could only be guessed by sound; but we *felt* that invisible power that might in an instant crush and overwhelm us, drawing nearer and nearer,—while the tolling of our bell, scarcely audible above the noise of her own motion, could hardly convey to her a warning of our presence. At length she passed in the fog—no longer a phantom—but a thing of life, urging her resistless way through the dense vapors with a fearful precision. We never knew her name or destiny. How easily might both ships, each to the other unknown, have sank into the depths of the sea by unavoidable collision! But here we are, by God's mercy, to record our near escape from that which has befallen six hundred of our fellows. These possibilities are fearful to contemplate while sitting quietly in our own study; but *how* fearful while lying wakeful in one's berth at sea, or groping the deck in a dripping fog. And yet, with all the possibilities of calamity by collisions, by storm, by iceberg, or by fire, that are inseparable from the navigation of the ocean by steam, that navigation is *safer* than railroad travel in the United States.

But we had come to count too much upon its safety; to regard our steamers as masters of the sea; and to talk of their achievements with a confidence almost presumptuous. How terrible the lesson of our dependence upon Divine protection taught us by this calamity! And yet, how needful and how salutary! Only such great calamities can startle the eager multitudes of this metropolis of commerce into the recognition of a Power on the land and on the sea, that is above all the calculations of gain, and all the guarantees of insurance. Only such great calamities can make the city thoughtful, sad, and solemn, as in the presence of God, or can cause the current of human sympathies to overflow the dykes that Mammon and Conventionality have heaped up all around us. There is not a heart in this great community that does not beat with sympathy for all whom this calamity has bereaved of kindred and friends. There is not a Christian altar from which prayer does not go up for these unknown mourners. There is not a countenance that is not saddened by this sudden apparition of Death in so many houses. There is not a mind but is for a moment awe-struck with the sense of the Invisible and the Almighty. The confluence of sorrows from Lake Erie and the Atlantic has made the heart of this metropolis reel under the thought of a Providence so vast and so terrible in the reach of its visitations. Oh! may that heart be aroused to the recognition of a Grace as omnipresent and omnipotent for our salvation!

JEWS IN TURKEY.

One of our exchanges says that Dr. Cohn, the president of the Israelite Consistorial Committee of Paris, had an audience of the Sultan, in the Palace of Cheragan, in which his Majesty declared that all privileges and immunities hitherto granted to the Christians were to be extended also to the Jews of Turkey, "for that the paternal heart of his Majesty would never suffer the slightest difference to exist between the rajahs (non-Mussulman subjects) of his empire." The Sultan added, "My heart is vast, and comprises in its love all my subjects equally." M. Cohn was afterward requested to explain to the Sultan the nature of the establishments of public instruction he had founded at Jerusalem. When he spoke of the Israelite school that was to be opened at Jerusalem, the Sultan interrupted him, saying, "You have the welfare of my subjects in view." The Sultan afterward consented to raise the number of Jewish pupils at the military school of Kumbar Chanah to forty, two of whom to be sent annually to Paris, or to some other capital of Europe, to complete their studies. When Dr. Cohn pronounced the Jewish benediction prescribed in the presence of monarchs, the Sultan's eyes were seen to fill with tears. He thanked M. Cohn, and said, "When you return to Constantinople you shall find your brethren in a better condition, I promise you." Ferid Effendi, who had introduced Dr. Cohn, said to him afterward, "I am happy I have been present at this audience; I never saw the Sultan so affected before." Dr. Cohn was on the same day received by Said Pacha, who likewise conceded all his requests in favor of the Jews of Egypt.

The following poetry was written for the late Anniversary of the Missionary Society, but did not arrive in season. The sentiments it contains are in agreement with the other intelligence we have received from China. It will be read with interest by all who are hoping and praying for the overthrow of paganism and the establishment of the religion of the Bible in that land. J. B.

A Voice from China.

To prayer! for while thou 'rt crying,
  Goes the commandment forth
To lands in darkness lying;
  And lo! the tribes of earth,
From their long slumber breaking,
  Send up a cry of woe;
O! by that sign they're waking,
  No after sleep to know.

A strange, deep voice is calling
  From Sinim's troubled heart—
Her Babel towers are falling—
  Their glory doth depart;
The shrines of Boodh are crumbled,
  The idol is thrown down—
How are the haughty humbled,
  Beneath the avenger's frown!

Hast thou beheld a nation
  Scattered, and peeled, and slain,
Amidst war's devastation
  Spring into life again?
Lo! where the death-cloud hovers,
  A radiant bow appears;
And hope's bright mantle covers
  A realm dissolved in tears.

Where gifts profane were proffered,
  Jehovah's name is praised;
Where incense rite was offered,
  The Sabbath hymn is raised!
O, shall the promised morning
  Be lost again in night?
Go pray thou, till its dawning
  Is merged in perfect light. L. M.

Shanghae, June 26, 1854.

Bible-Burning.—A man has lately been tried at the Londonderry assizes for burning a copy of the Scriptures, and received his just desert. It appears that a Scotch clergyman of the Secession Church, gave a copy of the Bible to a man named Dillon, a Roman Catholic, and that the latter, going to a public house, showed the book to the traverser, who said it was an adulterated version, and threw it into the fire. The jury found him guilty of burning the authorized version, but acquitted him on the counts charging an intention to bring the principles of Christianity into disrepute. He was sentenced to six months' imprisonment.

The Chinese.—The London Missionary Society have for a long time been active in missionary labors in China, and they are now seeing the result of those labors, not only in China, but in portions of our own country. In Amoy and Hong Kong many have professed Christianity and become members of the Church. It will be remembered, that a short time since a church was built at San Francisco for the sole use of the Chinese, the pastor of which is Rev. Mr. Speer. It seems that the leading members of that church were converts under the ministry of the missionaries of the London Society at Hong Kong or Amoy.

General Intelligence.

European News.

One week later news from Europe has been received since our last, of which we give the substance.

There are rumors, which seem to be tolerably well founded, of important successes of the allies in the Crimea. The 25th of September was the day fixed for the bombardment of Sevastopol. On the 14th, the main army of the allies landed, without opposition, the Russians retiring in good order.

From the White Sea, Capt. Lyons officially announces to the British Admiralty, the destruction of the town of Kola, which he burned to the ground without losing a man.

An official bulletin communicated to the Embassadors at Constantinople, and dated from the bivouac at Old Fort on the 16th, announces that the allies had intended the next day to attack an intrenched camp of 10,000 Russians posted in the direction of Sevastopol, but that the camp had been raised in the night, and the Russians fell back upon the town.

On the 13th, a Tuscan ship at Constantinople reported that an army of 30,000 was at Taganro ready to be conveyed in pontoons and gun boats to Yenikale or Kaffa. The *Journal* of Constantinople states that this force had put to sea, was overtaken by a tempest, and two hundred men drowned. This is considered doubtful.

Canton dates to Aug. 5, state that the city was in a state of seige, and would soon be in the hands of the insurgents. Business was entirely suspended.

The clipper ship Red Jacket had arrived at Melbourne, Australia, in 71 days passage from Liverpool, which port she left on the 4th of May last.

Renewed disturbances are feared at Madrid, but as yet there has been no open outbreak.

The Marquis of Ormond, and Mrs. Warner the actress, are dead.

California News.

California news to Sept. 16th was received in New York on the 8th inst. It is not important, but such as it is we give it below.

News from the mines continues to be of a very encouraging description; and the interior papers talk as if the miners in their different localities were satisfied with their average gains. In the southern mines the season is represented as being one of the most favorable for river and bar digging that had perhaps ever been known there.

The annual emigration across the plains continues to pour into this country. Moderate numbers have already arrived, who mention that many others are behind on the way. It is not, however, likely that the total number of immigrants by land will be very great this year.

By sea, the chief immigrants have been Chinese. Every ten days or so somewhere between 500 and 1,000 of these people arrive at San Francisco. The late clamor against the race has almost died away in our city. In the interior, however, it is still occasionally heard, pretty loudly repeated. Of the 40,000 Chinamen supposed to be among us, about 35,000 are said to be in the condition virtually of slaves, or peons to their more wealthy countrymen. Their employers, or rather masters, are five great companies organized to import laborers from China.

On the night of the 14th Sept. Peter Veeder, formerly of Albany, N. Y., shot and killed James Campbell, of New York. Both parties came to California with Stevenson's regiment in 1847.

At Monterey, an affray occurred in a dance-house, when three men—one an American, and the other two Spaniards—were killed. An officer who had attempted to arrest the rioters was shot by a Californian, and died almost immediately. The shooter was himself dangerously wounded by another shot, and it was believed that his wound would prove mortal. The mob, however, could not wait for their revenge. They burst into the murderer's house, hauled him from his bed, tried, convicted, condemned and hanged him, all under the advice of Judge Lynch, within an hour or two.

The interior papers every day report some murderous transaction as occurring in the different districts of the State.

From the Sandwich Islands, we have received full confirmation of the facts concerning the Annexation Treaty. Overtures were originally made to the United States Government to accept the cession of the Islands. This was thrown out as a feeler. It was received favorably, and a special messenger from Washington left San Francisco some months ago on the Flying Dart to bear the response to Mr. Gregg, our Commissioner. It was submitted to the Council, in which body it was approved by all the members except Prince Alexander, the heir apparent, and Paki, a high chief. The majority, however, decided in favor of annexation, and the treaty to that effect was brought over to San Francisco in the Restless in time to be dispatched to Washington on the steamer of Aug. 1.

"MEMORIAL" TO BISHOP WAINWRIGHT.—The Convention of the Episcopal Diocese over which the late Bishop Wainwright presided, having appointed a Committee to determine upon a suitable memorial to the deceased Bishop, they report the following suggestions:—

1. That some *visible* memorial of personal love and reverence, in form either of a monumental tablet or a memorial window, be erected, with the approbation of Trinity Church Corporation, in its new and beautiful Chapel.

2. That in addition to the above, speaking to the outward eye, there should be erected to his memory, within the Church at large, another and more spiritual memorial, viz: the creation of a Church endowment, directed to some special end, known to have been approved by Bishop Wainwright, and thus not only perpetuating his memory by bearing his name, but serving also to carry out, beyond the brief limit of his Episcopate, his own unfinished labors—so that "being dead" he may "yet speak" to us. Now, as a form of such endowment, both appropriate and greatly needed, as well as singularly pointed out to us by the touching fact that the maturing it was the last of his labors of love, even on his dying couch, so that its completion may now be regarded as a sacred debt—for such form the Committee would now name the furtherance by an adequate endowment of the cause of Church Education through the medium of the press—and, for its specific end—*the providing Church Schools with approved school books, under the supervision of the acting Bishop of the Diocese*, and to be forever known as the BISHOP WAINWRIGHT CHURCH SCHOOL BOOK FUND.

Loss of the U. S. M. Steamer Arctic.

The most terrible of the series of calamities by which this year will long be distinguished, is the loss of the Collins steamer "Arctic," with about three hundred of her passengers and crew. She left Liverpool on the 20th September, and on the 27th, at 12 o'clock M., 65 miles off Cape Race, while going at 13 knots, was run into by the bark-rigged iron propeller Vesta, bound eastward under full sail, with a strong, fair wind. The scene, and what followed, is thus described by Mr. Baahlam, second officer of the Arctic:—

On Wednesday, 27th, at noon, Cape Race bearing N. W. 65 miles distant, while running in a very thick fog, were struck on the starboard bow about 60 feet abaft the cutwater by an iron steamer, which made three large holes in the ship, two below the water, one of which was about 5½ feet in length and 1 or 1½ feet wide, leaving the whole cutwater and stem of the iron steamer clean through the Arctic's side. So dense was the fog that the vessel could not be seen a minute before the collision.

The wheel was put hard to starboard; the engine stopped instantly, and backed at full speed until clear of the other steamer, which occupied a couple of minutes. The French steamer seemed to be sinking, bow first.

Capt. Luce immediately gave orders to clear away the quarter-boats, which was done, and Mr. Gourley, Chief Officer, left the Arctic, in charge of the starboard boat.

On lowering the port boat, the Captain exclaimed, "Hoist up that boat again, Mr. Baahlam;" and beckoned me to go to him. Upon doing so he ordered me to go over the bow to ascertain, if possible, what damage had been done.

I then found the holes above mentioned. Upon informing him of the facts, he gave orders to get sails up, and try and get them round the bow to endeavor to stop the leak, which was promptly done, but to no advantage whatever, so much of the bow and iron broken off from the other steamer projecting that the sails could not be brought close to the vessel's side.

The carpenter was then lowered down over the vessel's side, and pillows and mattresses passed down to him, to try if possible to force them in, but the leak was found to be so far below the water that they could not be got in, and every exertion to stop the leak proved unavailing.

Capt. Luce then ordered the ship's head to be kept for land, which bore N. W. by W. By this time we had lost sight of the chief officer's boat and the other steamer, which we supposed had sunk.

We had not been on our course more than four or five minutes before she ran over a boat and crew belonging to the other vessel, all of whom perished with the exception of one who caught hold of a rope hanging over the bow. Directly after the boat was seen, orders were given to stop the engine, which the chief engineer said could not be done, as the ship was fast sinking. In about 30 minutes all the lower fires were out, and at least three feet water in the ship, fore and aft.

By this time the confusion among the passengers was very great, but they used all efforts to assist the crew in keeping the deck pumps going, and in lightening the ship forward for the purpose of endeavoring to get at the leak from the inside, which was found to be useless.

In forty-five minutes after the collision, I came up from the fore-hold and informed the captain that the water was on a level with the lower deck beams, and that it was impossible to get at the leak. I then asked him what he thought would be the fate of the ship, when he stated his belief to me that there was no hope of saving her. He then told me to see to my boats.

On going to those on the port side, I found them completely filled with men, women and children, and no possibility of getting near them. I immediately went to the starboard side and ordered two of the crew to lower the guard boat, and asked the captain what were his intentions. He replied that "the ship's fate should be his." I then asked him if he would not allow his son to go, as I intended to take a boat, but he returned me the answer, that "he should share his fate."

It was soon discovered that there was no hope of saving the Arctic, and the lady, daughter and son of Mr. E. K. Collins, with several ladies, were put on board a boat, in the act of lowering when one of the tackels gave way and all except one lady who clung to a sailor holding fast to the boat were precipitated into the sea and lost.

I then jumped into a boat, and was ordered by the captain to cut away the tackle falls and drop under the stern. I did so, and at the same time about 20 persons, I suppose, jumped overboard, of whom 17 or 18 were picked up.

We fell in with another boat which had been lowered from the other side, and lightened her of part of her complement, leaving 19 in her and 26 in my boat. The last sight we had of the ship, her guards were level with the water, and the surface of the sea was strewn with human beings, who had jumped or fallen overboard, to whom, however, it was impossible to render any assistance, and we soon lost sight of all, as the fog continued to be very dense.

I then asked the boat's crew whether they were willing to be governed by me, which was unanimously assented to, and I was put in complete command of both boats. We were then about sixty miles south-east of Cape Race. After pulling for 40 hours with nothing to guide us but the run of the sea, which I took to be heaving from the southward, and in a thick fog, which lasted all the time, we reached Broad Cove, some 12 miles north of Cape Race.

The passengers in another boat were picked up by the bark Huron, and reached New York Oct. 11th. One of them gives an account of the sinking of the ship. He was on the raft, and spoke to the Captain when the sea was flush with the dead-lights. In less than three minutes from the time he spoke, the stern sunk—the foam went boiling over the tumbling heap of human beings—many were dashed forward against the pipe. "I heard one wild yell, (still ringing in my ears,) and saw the 'Arctic' and the struggling mass rapidly engulfed. Numbers yet clung to the imperfectly constructed raft; but, alas! we could render them no aid. Our own situation was no less precarious; and, cruel as it seemed, we were forced to abandon them to their fate. Heaven forbid that I should ever witness such another scene.

We clip from different papers the following paragraphs in relation to this sad affair:—

The vessel which came in collision with the *Arctic* is ascertained to have been the French steam propeller *Vesta*. She arrived at St. John's (Newfoundland) on the 30th September, three days after the collision, in a shattered condition. Her bows and foremast were damaged to a very great extent.

Among the passengers supposed to be lost, are the wife, son, and daughter of Mr. E. K. Collins, proprietor of the Collins steamers; six members of the family of Mr. James Brown, of the leading house of Brown, Brothers & Co.; the Duke de Grammont, of the French embassy; the wife and son of Mr. George Howland, of Brooklyn; Edward Sanford, Esq., New York; R. S. Williams, a brother of Mrs. H., and son of the late Rev. S. S. Williams, of Newburyport, Abner Benedict, Esq., and lady.

It was about 12 o'clock when the collision took place, and about twenty minutes past 4 o'clock when the last boat left. The engines worked about two hours after the collision.

One of the passengers taken up by the *Huron* says: While pulling for the *Huron* we discovered a man on a raft, and after putting the remainder of our boat's crew on board of the *Huron*, the captain of that vessel gave us a boat's crew, and Mr. Dorian and myself pulled to the raft and took him off. We found him to have been one of the steward's gang, named Peter McCabe, who stated that he was the only one left of 72 men and 4 women, who were on the raft the night before.

The Arctic was built in New York in 1850, by William H. Brown, and was considered as staunch a vessel as was ever constructed. She measured 3,500 tuns register, and cost $700,000. She was insured in England for £60,000, and in this country for $310,000—making a total of $600,000—the valuation of the ship. She was provided with boats sufficient for 500 persons.

[Since the above was given to the printer, intelligence has been received of the safety of Capt. Luce, Geo. F. Allen, and an another passenger, who were on deck when the Arctic sunk, but who caught on pieces of the wreck, from which they were taken by a passing ship. Up to Second-day morning, Oct. 16th, only 75 passengers were known to have been saved from the Arctic, leaving over 300 missing.]

DOUBLE MURDER AND SUICIDE.—A horrible double murder and suicide was recently committed near Green, Chenango Co., N. Y. It appears that one David D. Davis, a returned Californian, (the murderer and suicide,) had had a misunderstanding with his wife and lately separated, they the past summer living apart, and both parties had commenced actions for divorce. The immediate cause of the whole difficulty was jealousy. Oct. 5, Davis met his brother-in-law, Buel Hotchkiss, (at whose house his wife had been boarding,) at the house of a Mr. Gilmore, a near neighbor, and after conversation, Hotchkiss withdrew into the yard, followed by Davis, who drew a revolver and shot him, killing him instantly. He then ran to his brother-in-law's house and shot his wife, mortally wounding her, and then shot himself through the heart.

SUMMARY.

Died, at Lafayette, Indiana, September 10, Rev. Eli Noyes, D. D., aged forty, formerly a missionary at Orissa, India, and since his return classed as one of the finest Hebrew scholars in the country. He published a Hebrew Grammar, and several other exegetical works, which were distinguished for their sound judgment and learning. After his return from India, he was editor of the *Morning Star* newspaper, was pastor of a Free-Will Baptist church in Boston five or six years, and of the Roger Williams Church in Providence some years, until his health failed. He left Providence some two years ago for the West, hoping to find a climate better adapted to his health, but disease had fastened upon him too strongly to be removed.

A correspondent of the *Cambridge* (England) *Press* says: "I hear that some dozen youths from the wealthier portions of the dissenting party are about to enter Oxford, and that inquiries are being made by the head of a highly respectable family of Jews. At University College, Cambridge, Jewish youths, who have been successful, have, I believe, lodged and boarded at an establishment intended more especially, at all events, for youths of a Protestant sect."

The Drouth of this summer covered a strip of country 300 miles wide, from Nova Scotia to New Mexico—of course, with favored spots here and there; but in many places the greenest fields dried up so that they would burn like dry stubble; and streams and springs disappeared, and in many places have not yet recovered. Water sold in Illinois for 25 cents a pail full, in some of the dry places.

The Rev. Josiah W. Canning, of Gill, Mass., for many years the respected and useful pastor of the Congregational Church in that place, committed suicide on Wednesday morning by drowning himself in a small stream in that village. He was in a state of mental derangement. His age was above 70, and he was the father of Josiah P. Canning of Gill, "the peasant bard," and of E. W. B. Canning of Stockbridge.

The Mormon community at St. Benardino, in Southern California, has received an accession of fifty converts, the first fruits of missionary teaching in Australia. Among them are four men who left their wives and families, believing their salvation depended upon their joining this peculiar religious body.

A sad calamity happened at Troy, N. Y., on Sixth-day, Oct. 13th. A skiff, which was crossing the river with seventeen persons on board, was capsized by a swell of a passing steamer, and eleven persons were drowned.

Officer Reed, of the Chief's Office, who some time since was dispatched in quest of one Kissane, a notorious character who is suspected of having been concerned in the late heavy fraud upon the Chemical Bank, succeeded in capturing him in the West, and was on his way to New York with the prisoner, when the latter, while on a train of Erie Railroad cars, which at the time was going at the rate of 30 miles an hour, gave his captor the slip, jumped out a window of one of the cars, and though the train was immediately stopped and the officer and an assistant went in search of him and continued the search for several days, he made good his escape.

A most remarkable suicide occurred near the Sweet Springs in September last. A lad became displeased with his father for denying him some request, and declared that he would put an end to his own existence. Those who heard the threat paid but little attention to it, supposing that it was merely an idle outburst of temper. But the boy was resolute in his purpose; and after procuring a hoe and spade and digging himself a grave, he got a rope, attached it to a tree, and actually hung himself until he was dead.

The venerable William Darby died in Washington on Monday morning, Oct. 9th, at the age of nearly eighty years. He was for half a century the most eminent statician and geographer in this country. One of his earlier works described a journey from New York to Lake Erie, for the most part through an uninhabited wilderness. Darby's "Louisiana," and some fifteen or twenty other geographical and statistical volumes, have been regarded as high authority, in their time, but have been superseded by more recent publications.

New England is becoming a "land of Ophir," an Elderado, and may yet ravish the laurels from the brows of the young State of California. The Vermont *Mercury* says that during the past week gold has been washed from the sand of a stream in Plymouth, and the yield of the washings has been so considerable as to render it probable that a profitable business may be made out of it.

A grand national Cattle Show, under the patronage of the United States Agricultural Society, Col. Wilder, of Boston, President, will take place at Sprinfield, Clark County, Ohio, Oct. 25 and 27. It will undoubtedly be the greatest show of improved breeds of cattle ever made in America. The premium list amounts to $6,000, and will attract exhibitors from a dozen States.

The support of the New York police department for the last year cost the city $720,000—$2,000 per day for law and order. One appropriation of public charity, that to the Alms House, amounted during the last year to $490,000; nearly one dollar for each inhabitant of the city, men, women, and children. Street-begging is not a necessity in New York. Street-cleaning has set against it on the books over $234,000.

Two specimens of the American Ostrich—male and female—were recently killed near Fort des Moines, Iowa, and prepared by W. E. Moore for the Fort des Moines Museum. They are described by Mr. M. as four and a half feet long, and five feet in hight, with bills six inches long, straight and very sharp. They resemble in most points the Ostrich of Africa.

A dreadful disaster occurred on the Detroit River, near Malden, on Sunday night, Oct. 8th. The steamer E. K. Collins, bound for Cleveland, with passengers from Sault Ste Marie, was destroyed by fire, and twenty-three persons were lost by the flames or by drowning.

The Receivers of the Cochituate Bank (failed) have given notice that the claimants who proved their claims previous to Aug. 1 will receive 50 per cent. on the same, to be paid at the Webster Bank on and after Monday next.

The *Springfield Republican* says that good "peach-blow" potatoes are being delivered at the depots in that vicinity for 67 cents a bushel, and "Carters" for $1. Apples are abundant. Good fall and winter apples are sold in that vicinity by contract for $1 a bbl.

From Sept. 13 to Sept. 25, inclusive, (13 days) there were seven hundred and nine deaths from Cholera in Pittsburgh and neighborhood. Of this great number, 650 died in Pittsburgh proper, a city not larger than Albany.

On Saturday, October 7, there were eight hundred and twenty-five vessels lying in New York harbor, namely, 38 steamships, 186 ships, 118 barks, 100 brigs, and 383 schooners, besides a fleet of coal, lumbermen, etc., numbering some 300 more.

A son of Jacob Berringer, the Postmaster at Cape Vincent, was arrested on Saturday night, by Col. North, Special Mail Agent, on a charge of being engaged in robbing the mail between Rome and Cape Vincent. He was held to bail to answer the charge.

From a tabular statement in the Hong Kong *Gazette*, it appears that the emigration of Chinese passengers from Hong Kong from the 1st of January to the 30th of June, 1854, was to Australia, 5,376; California, 13,120—total, 18,496.

Last week, the Rev. C. F. Martin and wife and Mr. L. S. Murad, Missionaries under the care of the American Missionary Association, sailed for their mission among the Copts in Egypt, in the Southampton, viâ London.

Two weeks' later news from Fort Laramie, received at the War Department, says that 31 troops were killed by the Indians in the late fight, and that no subsequent attack had been made on the fort.

A dispatch dated New Orleans, Monday, Oct., 9, 1854, says: The steamer Princess, belonging to this city, was destroyed by fire near Natchez yesterday, and several persons perished in the flames, including two ladies.

Another New York Bank—the Knickerbocker Bank—suspended last week. Its circulation amonnted to $90,000, which is well secured in the Bank Department.

The loss of life by the burning of the steamer Princess, near Natchez, on Sunday, Oct. 2d, is supposed to have been 12 or 14 persons.

Dr. Graham, the man who killed Loring at the St. Nicholas Hotel a few months ago, was tried in New York last week, and found guilty of manslaughter in the second degree.

In the Hudson County (N. J.) Court, recently, a verdict of $13,000 was given in a case of seduction and breach of promise to marry.

The anthracite coal-fields of Pennsylvania will show a total product this season of 5,700,000 tons. This has not cheapened the price to the city consumer, but will yield nearly a million and a half of money to the lordly owners of coal lands.

It is reported that during the three months ending September 30th, the four coroners in this city held 851 inquests, for which they received $5,466 50, being about $1,366 62½ each. At this rate, the annual income of each coroner will exceed $5,000.

The Assay Office in New York has commenced operations. Deposits of gold and silver are now received, for which stamped bars, coin, or certificates, are given.

New York Markets—October 16, 1854.

Ashes—Pearls $6 25; Pots 7 00.

Flour and Meal—Flour 7 87 a 8 25 for common to good State, 9 75 a 10 25 for extra Genesee. Rye Flour 5 75 a 6 50 for fine and superfine. Corn Meal 4 37 for Jersey. Buckwheat Flour 3 50 a 4 00 per 100 lbs.

Grain—Wheat 1 55 for ordinary Wisconsin, 2 10 for fair white Genesee. Rye 1 12. Barley 1 12 a 1 17. Oats 47 a 55c. for State and Western. Corn 80 a 81c. for Western mixed.

Provisions—Pork 12 25 for mess, 13 50 for prime mess. Beef 6 00 for new country prime, 11 50 for new country mess. Lard 11c. Butter 12 a 17c. for for Ohio, 17 a 20c. for State. Cheese 9 a 10½c.

Hay—75 a 80c. per 100 lbs.

MARRIED.

In Albion, Dane Co., Wis., Sept. 21st, by Eld. Z. Campbell, Mr. EDWIN E. WILLIAMS to Miss NANCY M. LAWTON, all of Albion.

In Alfred, Oct. 1st, by Eld. D. E. Maxson, Mr. M. A. TELLER, of Hartsville, to Miss O. STEVENS, of Hornellsville.

In Alfred, by the same, Oct. 5th, Mr. D. C. BURDICK, of Alfred, to Miss HENRIETTA DOTY, of the same place.

In Wirt, N. Y., Sept. 20th, 1854, by Eld. T. E. Babcock, Mr. HENRY L. KINNEAR to Miss AMANDA WOODARD, both of Wirt.

DIED.

In Independence, N. Y., Oct. 6th, 1854, Mr. WILLIAM REYNOLDS, in the 79th year of his age. He was a native of East Greenwich, R. I. He had been a professor of religion many years. His first connection with the people of God was in the first Seventh-day Baptist Church of Brookfield, N. Y. At the time of his death he was a member of the Church in Independence of the same faith. It is no dictate of that spirit of accommodation with which words of eulogy for the dead are so cheap, to record for the encouragement, especially, of every aged Christian, the fact that during the latter years of his life, while the "outward man" was sinking in decay, the "inward man" was achieving new and signal victories over sin, and approximating nearer and nearer the image of Christ. T. E. B.

In Hopkinton, R. I., Sept. 24th, of typhus fever, Mrs. LYDIA EDWARDS, wife of Thomas Edwards, aged 50 years. Sister Edwards had been for over forty years a faithful and worthy member of the 3d Hopkinton Church. "Be thou faithful until death, and I will give thee a crown of life." P. S. C.

In North Stonington, Ct., on the 4th of Sept. 1854, Miss FANNY ALLEN, aged 32 years.

In Hopkinton, R. I., of pulmonary consumption, Sept. 25th, 1854, Mrs. EUNICE ADELIA HOLDREDGE, widow of the late George W. Holdredge, Esq., aged 46 years. Though she had indulged hope in Christ for several years, yet she did not openly profess religion until within some three years since. Subsequently she united with the 1st Hopkinton Church, and there remained a faithful member until death.

In Westerly, R. I., 6th of Oct., 1854, Mrs. JUDITH BURDICK, wife of John H. Burdick, aged 72 years. For more than fifty years she was a faithful follower of Christ, and a member of the 1st Seventh-day Baptist Church of Hopkinton. As might be expected, she died with a strong hope of entering that rest which remains for the people of God. C. M. L.

LETTERS.

J M Allen, T B White, S S Griswold, H V Dunham, Wm M Fahnestock, Albert M Clarke, J W Davis, W B Gillett, C M Lewis, A B Hutchins, A R Cornwell, O Champlin, Phebe Soper, J C Rogers, H G Hawley.

WILLIAM M. ROGERS, Treasurer.

"The Pearl or Scripture Library."

THE following are the opinions of a few who have spoken in reference to this work:

The work entitled "The Pearl or Scripture Library," in my judgment, is a most valuable publication, embodying all the Scripture with the parallel passages on a given subject in one small volume. It must prove an important aid to all who desire to know what God has revealed. I cordially recommend it.

GEO. C. BALDWIN,
Pastor of First Baptist Church, Troy, N. Y.

"The Pearl or Scripture Library," is a work of general utility; the subjects are important, and references good.

JOHN A. WATSON,
Pastor of M. E. Church, New Hope, Pa.

I have examined the summary of scripture texts called the "Pearl," and are pleased with the plan and general arrangement of the work, as giving an impressive view of the leading doctrines and duties of religion in the very language of inspiration.

P. O. STUDDIFORD,
Pastor of First Pres. Church, Lambertville, N. J.

I have cursorily examined the work entitled, "The Pearl," and have been pleased with the general arrangement and selection of texts.

E. R. CRAVEN,
Pastor of Dutch Ref. Church, Somerville, N. J.

This work embraces sixteen volumes neatly bound and enclosed in a beautiful case.

Agents wanted to sell these libraries.

Please address H. H. BAKER, New Market, N. J.

Alden Seminary.

THIS institution is pleasantly located in the village of Alden, Erie Co., N. Y., twenty miles east of the city of Buffalo, on the B. & N. Y. C. R. R., and is under the supervision of G. W. MAXSON and F. BABCOCK, assisted by competent and efficient teachers; and parents may confide children to their care with full assurance that no pains will be spared to promote their physical, intellectual, and moral welfare. The second term of this Seminary will commence Nov. 14th, and close Jan. 24th. The third term Jan. 31st, and close April 18th. The fourth April 25th, and close July 11th.

Expenses per Term.

Primary Department,	$3 00
Common English Branches,	4 00
Higher Mathematics and Ancient Languages,	5 00
Extras.	
French and German (each,)	$4 00
Music on Piano Forte or Melodeon,	10 00
Monochromatic Painting and Drawing (each,)	1 50

All bills must be paid by the middle of each term. For further information, address, either of the Principals, at Alden, Erie Co., N. Y.

ALDEN, October 1st, 1854.

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)

ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice commmencing Monday, April 10, 1854:—

Leave New York at 8 A. M., 12 M., and 4 and 5½ P. M.

Leave Plainfield for New York at 6.55 and 8.30 A. M., 12.20 and 5.10 P. M., passenger, and 7.30 P. M., freight.

Leave Plainfield for Easton at 9.35 A. M., 1.40 and 3.35 P. M., passenger, and 6.30 A. M. freight; and for Somerville at 7.30 P. M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare.

GEO. H. PEGRAM, Sup't.

Regular Mail Line via Stonington for Boston,

PROVIDENCE, NEW BEDFORD, and TAUNTON. Inland Route, without change of cars or detention, carrying the Eastern Mail.

The steamers C. VANDERBILT, Capt. Joel Stone, and COMMODORE, Capt. John G. Bowne, in connection with the Stonington and Providence, and Boston and Providence Railroads, leaving New York daily (Sundays excepted) from Pier No. 2 N. R., first wharf above Battery Place, at 5 o'clock P. M., and Stonington at 8 o'clock P. M., or on the arrival of the mail train which leaves Boston at 5 30 P. M.

These steamers are unsurpassed for strength, safety, speed, comfort, and elegance. The officers are experienced and attentive.

The natural advantages of this route are superior to any other. Being shorter and more direct, the trip is more pleasantly and expeditiously performed, while passengers can always rely on reaching their destination in advance of those by either of the other routes.

The COMMODORE, from New York—Monday, Wednesday, and Friday. From Stonington—Tuesday, Thursday and Saturday.

The C. VANDERBILT, from New York—Tuesday, Thursday, and Saturday. From Stonington—Monday, Wednesday, and Friday.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c.

D. C. McCALLUM, General Sup't.

Supreme Court.

IN the matter of the taking of lands for a new RESERVOIR, between 86th and 96th-sts. and the 5th and 7th-avs., in the City of New York. To all owners, mortgagees, lessees, occupants, and other persons, in any manner, by judgment, decree, or otherwise, entitled unto, or interested in the lands and premises above mentioned, or any part thereof: Notice is hereby given, that you are required to appear before the Commissioners of Appraisal in the above entitled proceeding, at their office, No. 293 Broadway, third story, front room, at 10 o'clock A. M., on any day, (Sundays excepted,) on or prior to the 21st day of October next; and to produce the evidences of your title or interest therein. In default whereof, and in case the persons entitled or interested as aforesaid shall not be ascertained by or be known to the said Commissioners, or be fully known, the same will be reported to the Supreme Court as belonging to unknown owners. It being the desire to consummate this great improvement, and to present the report at the earliest day consistent with a proper examination and due regard to the rights and interests affected, it is earnestly requested that all parties note and comply with the preceding notice, as no other or further notice will be issued. Dated New York, Sept. 1, 1854.

EDWARD C. WEST,
ABRAHAM TURNURE,
DANIEL DODGE,
} Commissioners.

ROBERT J. DILLON, Counsel to the Corporation.

N. B.—All papers published in the City of New York are requested to publish the preceding notice until the 21st day of October next, once in each week, and to send their bills, with affidavits of publication, to the office of the Counsel to the Corporation, to be paid on the final taxation of the proceedings. 2t

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order CHIMES of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings, comprising* many recent and valuable *improvements, consist of* Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited.

Miscellaneous.

About Apple Trees.

The season of Autumn, in New England, has come to be highly favorable to the operations of husbandry. Most of the three autumnal months afford delightful weather for plowing and reclaiming, for building stone walls, ditching and transplanting; the month of November, even, affording weather suitable for hauling manure and preparing the earth for the most of the crops of the coming year. The spring time for preparing the soil and getting in the various crops, on the other hand, has come to be unusually inclement and short—April being too wet and cold, frequently, either to plow, sow or plant. It is, therefore, well to accomplish as much of the farm work as possible in the fall, leaving more time in the spring to perform the important labors then before us, more considerately and thoroughly.

We know of no substantial reason why apple trees should not be transplated in the fall, and there are several reasons which, to our mind, make it *the proper* time. The first we have already adduced—there is a less demand upon our time by other things waiting to be done. We can visit the nurseries and make a more thorough examination of trees in the pleasant autumn days, than through the snows or mud of March and April. Another reason is, that trees well set in October, after having cast their leaves, "will gain fibres enough to support them before winter, and will shoot well the next spring, and better than those planted in the spring." But, in fall transplanting, care must be taken that no water remains standing about the tree through the winter; and Bradley says—in his Treatise on Husbandary and Gardening—"we must never fail to plant the same side towards the south which stood so before." The tree being set, it is a good plan to throw the soil about it to the height of a foot or more, which will steady it through the winter and keep its roots in place; in the spring it should be leveled.

Having the tree now set and finely growing, it will not do to let nature sport with it in her freest modes, nor on the other hand to be perpetually at work upon it with the pruning knife. Continual pruning makes the tree shoot into false wood and miscarry of its buds designed for fruit; and the reason of it is this—the root had filled itself with juices proportionable to the nourishment its standing branches required, and when these are taken away, the effort that nature makes is to supply new shoots to receive the sap which the root has stored up. This will be made evident to any one who will observe the great number of *suckers* or new *shoots* on an apple tree after it has been severely trimmed for grafting in the spring—the root had laid up the sap, and there not being sufficient outlet for it, it had to supply such outlet by making new wood.

It is often said, that the shaping of trees and the training of vines is entirely a matter of taste; but we cannot think the opinion a correct one, any more than it would be applied to the ox, the horse or the cow. Symmetry in shape in the latter pleases the eye and at the same time gives large muscles and corresponding strength and weight, and thus utility is combined with good taste. So it is of the tree and the vine. We believe that as much *good taste* is yet to be manifested in the management of trees, as there has already been in the improvement of our animals, and that the development of this good taste will also increase *the profit* of the fruit crops. A great many of the apple, peach, apricot, and plum trees in New England, are neither in a state of nature, nor managed according to the rules of art. They are budded or grafted trees, and are thus not according to nature; then they are hacked with axes, lacerated with dull saws, and gouged with hobnailed boots. A limb is smote off here which ought to have remained, and another left there which outrages every rule of proportion. In forming the young tree, we would start the limbs about five feet from the ground, and should allow no center perpendicular stem above them. Three or four branches coming out at opposite sides of the stem will give a round full head, in shape somewhat like an umbrella reversed, and as the tree increases, will throw out numerous lateral branches, which will fill up and form a head of beautiful symmetry, and one which is, we think, the best calculated to produce the greatest money value of fruit—perhaps not the largest quantity, but of the most value. None of these lateral limbs should be allowed to cross the tree—that is, to start from one side and grow *across* the inside of the tree. When shaped in this form, a person may walk pretty much over the top of an apple tree which has been growing twenty years; the light and air is freely admitted, the limbs do not obstruct and chafe each other, and room is left below for the comfortable cultivation of the land. Trees once formed in this manner will scarcely need the knife or saw for years in succession, unless in cases of accidents, provided the cultivator uses his thumb and finger judiciously when the shoots are young and tender.

Apple trees, however, producing different kinds of fruit, have different habits of growth—some inclining to shoot upward in a prim and slender form, others in compact, thick heads, with strong, lateral branches, while others, again, assume a pendent form. Most of the sweet apple trees have long, slender, whiplash-like branches; the Rhode Island Greening has a compact and pendulous head, the ends of the limbs often touching the ground when loaded with fruit, although leaving the main stem at a distance of five or even six feet from the ground. The branches of the Baldwin usually assume a position the most convenient to come at, either for working among or for gathering their fruit, as they seldom take a vertical or true horizontal direction. So the Blue Pearmain and the Sopsavine have forms peculiar to themselves.

Now, it will be apparent to any observer, that the same kind of pruning will not answer for all these varieties—and that, in order to prune judiciously, there must first be some knowledge of the habit of the tree operated upon. Lacking this knowledge, many trees receive precisely the kind of treatment which they ought not to get.

A word of caution may be given with regard to the depth at which a transplated tree ought to be set. If too deep, especially if the soil be cold and springy, the fibres and small roots are apt to mould and decay, and thus affect the larger roots; the tree will also frequently throw out a new set of roots just at the point which was originally the crown of the root. But if not set deep enough, the tree is too easily shaken by the wind, and the roots are so near the surface that the proper cultivation cannot be carried on without constant danger of injuring the roots. The rule should be to set the tree as nearly as possible as it stod before it was removed, varying a little, perhaps, if the soil is different from that from which it was taken.

It is essential to the thrifty growth, and even the health of trees, that the ground upon which they are set should be cultivated; and we have long observed, that where hoed crops are planted, the trees flourish the best. Digging about them for the space of 3 or 4 feet will not answer. They feel cramped and confined in such a position, and will not freely extend their roots; they shun a compact grass ground, and will shoot in any direction to avoid it. We once removed a row of apple trees, which were four years old, on one side of which was an old mowing field, and on the other a well-cultivated garden; on lifting them we found that on the side of the tree next to the grass ground there had not a root extended to the length of six inches, although the sward itself was not within two feet of the tree. Some roots had started on this side, but had all turned to the lighter earth of the garden. In this mould they had free range and pasturage and many of the roots were three feet long.

Some persons practice digging a space about the trees, and keeping it free from weeds and grass, and then plow a strip through the center of about half the whole width at which the trees are set apart; this, they say, makes a rich and mellow bed, which the roots from each side will seek, and the trees will flourish finely. We have had no experience of this kind, and cannot say how such treatment will succeed. To expect trees to thrive well on grass ground, is almost as absurd as to expect them to do so if they were annually defoliated in June.

We will suggest to the experienced, also, the importance of protecting the young trees against the effects of the droughts which prevail in our climate. It is important that the tree should be kept generously growing through the month of August. Forest trees are, probably, seldom affected by drought. The leaves which they cast, fall upon their roots and soon accumulate to such a depth that the sun's rays are excluded, and evaporation greatly impeded. The cultivator must imitate nature in this respect, and cover the ground for several feet about the tree with straw, refuse hay, saw dust, chip dirt, or anything that will have the effect of the fallen leaves. We have seen fine brush, mostly white birch, answer the purpose admirably.

With one other caution we will leave the subject for the present, and that is, to keep all cattle, horses and swine from young trees. The apple is not a difficult tree to raise; with a little but constant care almost any garden will produce enough for the wants of a common family. They can have

> "The pippin, burnished o'er with gold, the moyle
> Of sweetest honied taste; the fair pearmain,
> Tempered, like comeliest nymph, with white and red,"

together with the Baldwin, Porter, Russet, Sweeting, and a dozen other varieties.

[New England Farmer.

Remarkable Spring Discovery.

The *Tribune* have been allowed to make the following interesting extracts from the unpublished journal of Mr. S. N. Carvalho, artist, of his journey from Great Salt Lake to Los Angelos, through the Cajon Pass:—

MUDDY RIVER CAMP, May 28, 1854.

At about 3 o'clock P. M. the order was given to fill up the water cans, as we were about to commence our journey over the dreaded Jornado, of sixty miles, without water or grass. Immediately all hands were employed in supplying themselves with water—every vessel that could possibly contain liquid being used for that purpose—canteens, bottles, cans, kegs, &c. At 4 o'clock, having harnessed up our horses, and saddled our mules, we were on the road, which led through a loose sandy and stony ravine. It was very heavy, and tried the mettle of our already wearied animals. We traveled thus for eleven miles, and then gradually ascended the table land on a harder and better road; a cool north wind tempered the heat of the atmosphere, and we continued our journey through this sterile country until midnight, when we halted and refreshed our animals with water from our reservoirs.

After rest of three hours we resumed our journey, and by 10 o'clock A. M. we had crossed this dreaded desert, without any accident to our wagons or animals. We camped on a narrow stream of deliciously cool water, about twelve to eighteen inches wide, which distributes itself above half a mile lower down in a meadow covered with luxuriant grasses. This camp ground is called by the Spaniards "Las Vegas." Once more we had plenty of grass for our fatigued animals, and we determined to rest here for the day. During our journey we passed a number of deserted wagons, chairs, tables, &c. An ox-train from Little Salt Lake had preceded us about ten days; and it was not difficult to follow their trail, for in the space of one hour I counted the putrid carcasses of nineteen oxen and horses—what a lesson to those who venture on such a journey unadvisedly and unprepared! The strong north wind which blew all day raised a cloud of dust which almost blinded me, although I had goggles and a green veil to protect my eyes; however, the delightful and refreshing water of this oasis soon purified me; and I feel now, having crossed the desert, breakfasted and bathed, much more comfortable, both mentally and physically. The acacia is the only tree on this stream.

May 30.—We remained at camp all day yesterday, and at 10 this morning we were on the road to Cotton-wood Springs, some twenty miles distant, where we will find water and grass; and then will commence a journey over another desert of fifty-five miles. We followed up this little stream for about three miles, when the road turned a little to the right; but I was anxious to see the head of the stream—for, from the appearance of the surrounding country, I judged it to be very near. Parley Pratt, several other gentlemen and myself continued up the stream, and, after a ride of half a mile we came to a large spring, thirty-five feet wide and forty long, surrounded by acacias in full bloom. We approached through an opening, and found it to contain the clearest and most delicious water I ever tasted; the bottom appeared to be not more than two feet from the surface, and to consist of white sand. Parley Pratt prepared himself for a bath, and soon his body divided the crystal waters. While I was considering whether I should go in, I heard Mr. Pratt calling to me that it was impossible to sink, the water was so buoyant. I hardly believed it, and to be able to speak certainly, I also undressed and jumped in.

What were my delight and astonishment to find that all my efforts to sink were futile. I raised my body out of the water, and suddenly lowered himself, but I bounded upward as if I had struck a springing board; I walked about the water up to my armpits, just the same as if I had been walking on dry land. The water, instead of being about two feet deep, was over fifteen—the length of the longest tent-pole we had along. It is impossible for a man to sink over his head in it; the sand on the banks is very fine and white; the temperature is 78° Fahrenheit. I can form no idea as to the cause of this singular phenomenon. Great Salt Lake also posseses this quality, but this water is perfectly sweet. In the absence of any other name I have called it Buoyant Spring. I have never heard of it as possessing this quality, and should like some one of the savans to explain the cause of buoyancy. We lingered in the spring for fifteen minutes, when we dressed and resumed our ride, highly delighted and gratified by our exploration. I made drawings of this spot and surrounding mountains.

A Tale of Sorrow.

From the Anti-Slavery Bugle.

MARTINSVILLE, Belmont Co., (O.,) July 14, 1854.

Yesterday, we visited an aged colored woman, living here, who has bitterly experienced the inflictions of slavery, in all its "damned sacraments of sorrow." Raised in London County, Virginia, she was early married, as slavery understands this institution, and for some years lived with her husband, until the interest of the master required a separation; when the husband was sold for the southern market, and from the time he was started in the slave gang she has never heard from him. For weary years she mourned for him, and sorrowed as those who have no hope, wondering why such miseries were visited upon her who had labored so long and earnestly to do all that was just and right, while her tormenters lived in idleness and ease, safe and saved from those dreaded evils that rankle deepest in the life and heart of a slave.

At the command of her master, she was again married, and with her husband lived on the same plantation, until they were sold and removed to Western Virginia, where for many years they lived and raised a large family of children, that were torn from them, one after another, sold and driven far away, where there could be no interchange of affection, or kindly sympathy for mutual sorrow.

Falling into kind hands, when far advanced in years, they succeeded in purchasing themselves, and, by a course of rigid economy and arduous toil, were enabled to pay the full sum demanded by their claimant. Thus, after being robbed of a long life of labor, of nine children, whom tenderest love and bitterest sorrow had endeared to them, with intellects crushed and bodies enfeebled by fifty years' hard labor, such as is known only in slavery, they procured the acknowledgment in this Christian land that they had the right in themselves to their own labor, their own bodies and souls—that they were free *niggers*. Immediately they set about earning money to purchase some of their children, whom they hoped were still within their reach, and formed bright anticipations of some day living with them in a home purchased by their own industry, where at last they might safely live and quietly die.

Animated by these hopes, they commenced life anew, in comparative happiness, free at last, as they supposed, from any new and further infliction of slavery. But, alas, for them! their happiness was only a transitory dream, from which they soon awoke to most painful consciousness. Scarcely had they commenced to prosecute the plans they formed, when the husband was kidnapped from one of the river boats on which he was employed, and for twelve long and bitter years he has been subjected to all the horrors of slavery. Just as he passed the cup of liberty to his lips, it was stricken from his hand, and in its stead he has been compelled to drink the bitterest chalice that human sense can suffer.

With more than a widow's sorrow has this wife mourned for him, toiling on through a dreary life, vainly hoping for his return, to join her in carrying out their fondly cherished hope of a home and happiness with their children; but no tidings ever came to cheer her, and through these long years she has been left

> "Alone to bear
> The rush and pressure of dark thoughts, that came
> As a strong billow in their weight of care:
> And in silence, and in secret, and in night,
> Her noble heart hath wrested with despair,
> And rose more strong than death from its unwitnessed prayer."

Finally, she has at last heard that away in south-west, fast sinking beneath the weight of years, and heavy sorrow, her husband lives and toils a suffering, heart-broken, hopeless slave, somewhere on the Red River in Arkansas. But now, indeed, has despair settled quite down upon her. She has not influential friends to interest in his behalf; the journey to find him would be difficult and dangerous, and the proof of his identity difficult to establish, and she has no hope of meeting him again on earth. While she had hope, by almost superhuman exertion, amid difficulties that would have discouraged a heart unused to deepest disappointment, she secured herself a little home, where now, in poverty and sorrow, she is waiting until her change shall come, and she shall have a reünion with her long lost husband in that other land, where the servant is freed from his master and where all tears are forever wiped from their eyes.

There she lives, a monument of the curse and crime of American Slavery. Oh! when will this vile system be removed from among us, and good men

> "Rear another alter here,
> To truth, and love, and mercy dear."

C. S. S. GRIFFING.

HOT AIR VS. STEAM.—We understand that the Ohio and Mississippi Railroad Company have ordered a locomotive to be constructed, which shall be propelled by hot air, on an entirely new principle. Should this experiment meet with success, the use of the tender will be entirely dispensed with, and coal sufficient to take the machine to Cincinnati can be carried in a single barrel. We cannot too highly commend this Company for enterprise which induces them to make the experiment. Railroad Companies have heretofore very strangely rejected all improvements which have been brought up and proposed for the greater perfection of the locomotive, and thus the engine now in use is the very same, with a few inconsiderable exceptions, as that first made by Stephenson years and years ago. If this experiment of this influential and enterprising Company should meet with success, it will create a revolution in propulsion such as must astonish the world, and entitle the Ohio and Mississippi stockholders to the greatest honors.

[St. Louis Democrat.

I'll do it Well.

Everybody believes the old adage, "Whatever is worth doing at all, is worth doing well," yet how few practice it. The farmer sees a hole in the fence, but instead of thoroughly mending it, tinkers it up saying to himself that "it will last a while any how." Or he farms his land as his forefathers farmed it, or as most of his neighbors continue to farm it, regardless of the fact that scientific agriculture will enable him to cultivate it far better. A mechanic is called in to do a bit of work, in four cases out of five, he hurries over, caring only to make it good enough to pass, but having no ambition that it should be the best he can do. We might extend our illustrations through every walk of life. Few men say to themselves, "I'll do it well." Haste is preferred to thoroughness, the reputation of a quick workmen to that of a good one. Lawyers, ministers, and other public speakers, even make a pride of extemporaneous oratory; as if any truly sensible man could be ambitious of an impromptu speech, when with careful thought he might make his address incalculably better. The few however, who adopt for their motto, "I'll do it well," always succeed in life. The lad at school who follows this rule, rises to the head of his class. The lawyer who makes thorough work, gets the best and most lucrative practice, for people know that his opinion can be depended on, and that he makes no mistakes. The hard student in medicine has the most practice, as soon as his proficiency is discovered, which inevitably happens sooner or later. The mechanic, who turns out first rate work, obtains first rate prices and a first rate run of business. Whoever would go through life well, let him adopt for his motto at the outset, "Whatever I do, I'll do it well."

Three New Territories.

The Fort Smith (Ark.) *Herald* says: We learn from Major Doru, U. S. Agent, that he has concluded treaties with the Senecas of Sandusky, and the mixed band of Senecas and Shawnees, and the Quapaws—three small bands of Indians residing on Grand River, immediately west of the south-west corner of Missouri and south of Kansas Territory. Major D. was appointed by the President, Commissioner to negotiate treaties with these Indians, to obtain from them all of their surplus lands, and to settle up their annuities permanently. We learn from him that the Sandusky Senecas reserve 160 acres for every soul of that band, to be located in one body, and the balance of the lands to be surveyed by the United States Government and sold; the proceeds of which are to be paid to the Indians, after deducting the expenses of surveying and selling. They are to receive $16,000 for their annuities, and also something for other benefits. The Senecas and Shawnees reserve 80 acres for each member of the tribe, for which the United States is to issue patents, and they also reserve 16 sections to be held as common property, the residue of the lands to be surveyed and sold on like terms with the Senecas; their annuities to be put into one fund, and paid in four installments. The Quapaws have made a treaty in almost every respect like the Senecas and Shawnees.

The Charter Oak.

All of our citizens, says the Hartford *Times*, venerate the Charter Oak, the grand old tree that so completely shielded the written Charter, which continued to be our organic law until 1818. In song and story the old Oak is made famous, and thousands of strangers from abroad annually visit it. The tree stands upon the Wyllys place, now owned and occupied by the Hon. I. W. Stuart, who has kindly cared for it. A few years since some boys kindled a fire within its trunk, which burnt out most of the rotten parts of it. Mr. S. soon discovered the fire, and at once had it put out. He then, at considerable expense, had the hollow inclosed by a door, with lock and key. He also had the stumps of branches that had been broken off covered with tin and painted. The tree, from this time, seemed to be imbued with new life—each succeeding Spring dressing itself in a richer and denser foliage. On the 22d Sept., the New Haven Fire Companies, who came up to join their brethren in Hartford on the occasion of their annual muster, visited the famous Oak. They were of course kindly received by Mr. Stuart. To show them the capacity of the tree, he invited the firemen to enter the hollow trunk, when twenty-four of the men belonging to Capt. McGregor's Company, (Neptune No. 6,) entered together. They came out, and twenty-eight of Capt. Thomas's Company, (Washington No. 6,) then entered. By placing twenty-eight full-grown men in an ordinary room of a dwelling, one may judge of the great size of the famous old Charter Oak.

OBLIQUE RAILROAD WHEELS.—The Paris correspondent of the *New York Daily Times* says:

"One of the most interesting sights in Paris, and one that no American ever thinks of visiting, as he probably never heard of it, is the railroad from the Barrier d'Enfer to Sceaux. It is but seven miles long, and was built as an experiment upon a new system of wheels. The engine, tender, and hindermost car of the train are furnished with oblique wheels, under the ordinary upright ones. Where the track is straight, these do not touch the rails; but at the curves they come into play, rattling along the inner edge of the rails, and preventing the train from running off the track. The road was therefore made purposely tortuous, and the most sudden and seemingly dangerous bends were introduced at frequent intervals. The two stations are circular, and the train, as it receives its passengers, is doubled up into a ring of 50 feet radius. The smallest curve upon the road is 68 feet radius, and over this the train goes at full speed. The corners of the cars are cut off, so that the vehicles, in following the curves, do not infringe upon each other. Sceaux is upon an eminene, which the road ascends spirally, with something like a mile of track—it only going, in advance, a hundred feet. The invention—which, by the way, is ten years old—has proved practically very successful; but it has never been applied to any extent."

THE CULTURE OF STRAWBERRIES.—The New York Horticultural Society, at a recent conversational meeting, arrived at the following conclusions in regard to the best method of cultivating strawberries:

"The best soil for the strawberry was stated to be a gravelly loam. The land should be well drained, and to every acre applied twenty bushels of unbleached ashes, ten bushels of lime, and two or three pounds of salt. The ground should be well broken up; animal manures should be eschewed; leaf-mould is the best, and this should be carefully spaded in. About the first of July is the best time to set out the plants. In doing this, pains should be taken to have them firmly rooted. The rows should be eighteen inches apart, and the plants a foot apart. Sometimes it will be well to allow greater interval, in which case the interstices can be filled up from the growth of the runners. After setting out the plants, throw on a covering of tan-bark an inch or an inch and a half in depth, then water them plentifully, and the moisture will be retained a long time. After cold weather comes on, cover the strawberry-beds and the walks with clean straw, throwing over a little brush, or something to keep the straw in its place. In the spring remove the straw and make use of some fertiling agent to give the plants vigor, as sulphate of soda, sulphate of ammonia, or nitrate of potash. Keep the roots out, see that the plants are bountifully watered, and let nothing intervene to disturb or retard their growth till you gather the fruit. The beds should be made over as often as every three years."

PENNSYLVANIA RAILROAD TUNNEL.—The tunnel which has just been completed on the line of the Pennsylvania Central Railroad passes through the summit of the Allegany Mountains at a point known as Sugar-Run Gap. It lies in the counties of Blair and Cambria—the summit being the dividing line. It is 3612 feet long, 2685 feet of which is arched, containing 7700 perches of cut stone and 6400 perches of brick masonry, and 927 feet is cut through the solid rock where arching is unnecessary. Eight feet of the arch on each side is built of cut stone 22½ inches thick, resting on abutments of rock-range work of the same thickness, and the crown consists of five courses of hard-burnt brick—the whole laid with hydraulic cement. At grade, the width of the tunnel in the clear is 21 feet—ten feet above the grade, 24 feet. The height above the grade is 23 feet. The greatest elevation above tide is at the west end of the tunnel, where the height is 2161 feet. The grade ascending the eastern slope commence at Altona, and in a distance of 12 miles, where the west end of the tunnel commences, the height overcome is 993 feet, or 82¾ to the mile.

TESTING MARBLES.—A Washington letter-writer states that in the basement of the Smithsonian Institute there is a room where marbles are scientifically tested. Specimens from all parts of the world may be seen there, cut into squares and cubes. To prove their strength they are tested in a crushing machine. That which is brought from Lee, Mass., is said to be the strongest and best in the country for building purposes. But the marble is not tested by pressure alone. They try it also by acids, by water, by drying, etc. They have scales to weigh the crystals in, which are so delicate that ten thousand of its smallest weights are required to make an ounce. The index-tablet, for telling the weight is so fine that its movement has to be examined by a very powerful microscope, to discover the variations.

A NEW MOWING MACHINE.—Mr. Fisk Russel, of Boston, a practical mechanic of large experience, has invented a mowing machine which differs in several particulars, both in principle and construction, from those now in successful operation, and decided advantages are claimed for it. The driving-wheel is the same as in Ketchum's; but the vibratory motion is obtained from a wheel consisting of a series of cams, by the undulating rim of which a lever is made to move the knives. The knives are each separate, and play upon a steel pivot, acting as they vibrate like a pair of shears. The frame of the machine is supported by a second wheel of the same size and attached to the driving-wheel, which renders the movement of the machine more steady, and obviates, in a great measure, the side draught.

DUTCH SLAVERY.—Discussions have taken place, in the lower house of the Dutch Parliament, respecting emancipation in the Dutch Colonies. Numerous petitions have come in for that purpose. The number of slaves in the Dutch Colonies is about 53,000, namely, 39,000 in Surinam, 10,400 in Curacoa and other West India Islands, and the remaining 3,600 in the East India Colonies. The emancipation of the latter does not appear to present any great difficulty, the number of slaves being small; but in respect of the slave population of the Dutch West India possessions, the question is less easy of solution, the principle of compensation to the slave-owners having been admitted, and there appearing to be no source whence the compensation fund is to be derived.

LIGHT IN DYEING.—An English artisan proposes to employ the chemical agency of light in dyeing or staining textile fabrics; the cloth, whether wool, silk, flax, or cotton, being first steeped in a suitable solution, then dried in the dark, and subsequently exposed to the action of light, those parts which are to form the pattern being protected by pieces of darkened paper, or some other suitable material, fastened to a piece of glass. When the desired effect is produced, the time for which varies from two to twenty minutes, the fabric has to be removed, in order to undergo a fixing operation, while a fresh portion of it is exposed to light.

NEW PRINTING PRESS.—Mr. Stephen Brown, of Syracuse, has invented an ingenious press for printing four different colors simultaneously. The Syracuse *Journal* says of it: "The inking apparatus, and the principles of the machine, are so arranged, that four different colors can be printed at one impression, at the rate of about five hundred impressions an hour. And not only can different lines and letters be printed in various hues, but so perfect is the invention, that one letter may be printed in two, three, or four colors, or be printed in one color and shaded by another, all with the same impression."

C. S. Hulett, of Pittsfield, Mass., grew 592 lbs. pumpkins upon one vine; 19 ripe ones weighed 393 lbs., 15 green ones 199 lbs.

Ayer's Cherry Pectoral.

"Wisdom shall bow down to it, and the great of the earth, shall kneel before it."

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

VERMILLIONVILLE, La., April, 1853.

Mons. le DR. J. C. AYER:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

DR. J. C. AYER—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

DR. J. C. AYER:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. SANDS; retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

Election Notice.

STATE OF NEW YORK—SECRETARY'S OFFICE, ALBANY, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Assembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

SHERIFF'S OFFICE, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

PROPHECY—NO. 2.

BY ELD. ELIAS BURDICK.

We shall now turn our attention to some other prophecies concerning this time of trouble and its happy results, terminating in millennial glory.

Isaiah 2: 1—5, "The word that Isaiah the son of Amos saw concerning Judah and Jerusalem. And it shall come to pass in the last days, that the mountain of the LORD's house shall be established in the top of the mountains, and shall be exalted above the hills; and all nations shall flow unto it. And many people shall go and say, Come ye, and let us go up to the mountain of the Lord, to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths; for out of Zion shall go forth the law, and the word of the Lord from Jerusalem. And he shall judge among the nations, and shall rebuke many people; and they shall beat their swords into plough-shares, and their spears into pruning-hooks; nation shall not lift up sword against nation, neither shall they learn war any more. O, house of Jacob, come ye, and let us walk in the light of the Lord."

This looks directly forward to *the last days*—the last state of the world—the days of millennial glory. This not only shows that the religion of Christ will cease to be despised, and be established above everything else in the world, as it ought to be, *and all nations flow unto it*, to share its blessings as freely as the flowing of a stream, but also, that God's ancient people, the Israelites, at home in their own land, will become the most eminent teachers of religion. And the reason why all nations shall go up to them for instruction is declared to be, "For out of Zion shall go forth the law, and the word of the Lord from Jerusalem." This cannot be confined to the first going forth of the word of the Lord from Jerusalem; for at this time is to be the finishing up of the work of that time of trouble, in that the Lord will judge among the nations, and rebuke many people, till "nation shall not lift up sword against nation, neither shall they learn war any more." That wicked multitude which will be raised up under Satan's influence, when let loose for a season, after the millennium, will not be permitted to learn war; for when they come to contemplate it, they will be consumed. And then the final judgment will wind up the scene.

In the rest of the chapter, the prophet goes on to show them what they, and other wicked nations, must suffer for their wickedness before the coming of that happy day; much of which refers to events long past and gone. But some passages reach down to the present and the future. The expression is twice repeated, "When he ariseth to shake terribly the earth." At that time idols are to be utterly abolished. "And they shall go into the holes of the rocks, and into the caves of the earth, for fear of the Lord, and for the glory of his majesty." This arising to shake terribly the earth, and Michael's standing up, at the time when Turkey is to fall, look as if they might mean the same thing. And the movements in China look as if they might be a kind of forerunner—an example to lead the way for that universal casting away of idols which must be accomplished in that time of trouble, if not before.

We now turn to Isaiah 34: 1—5, "Come near, ye nations, to hear; and hearken, ye people: *let the earth hear, and all that is therein; the world*, and all things that come forth of it. For the indignation of the Lord is upon *all nations*, and his fury upon *all their armies: he hath utterly destroyed them; he hath delivered them to the slaughter.* Their slain also shall be cast out, and their stink shall come up out of their carcases, and the mountains shall be melted with their blood. And all the host of heaven shall be dissolved, and the heavens shall be rolled together as a scroll; and all their host shall fall down, as the leaf falleth off from the vine, and as a falling fig from the fig-tree. For my sword shall be bathed in heaven; behold, it shall come down upon Idumea, and upon the people of my curse, to judgment." Here is *first*, a universal call—to all nations—all the world—*all the people of the earth.* And why is this universal call? Because "the indignation of the Lord is upon all nations, and his fury upon all their armies; he hath utterly destroyed them; he hath given them to the slaughter." This mode of expression shows that it is a fixed decree, which cannot be revoked, that all national governments that draw the sword of war shall be overturned, and all their armies slain—not disbanded, but "delivered to the slaughter." No one can pretend that this has been fulfilled, to any considerable extent. But it must have its complete fulfillment in that time of trouble. It must be observed, that in these verses, the fearful events foretold are first stated in plain language, without figure. And then a highly wrought figure is introduced to give them a striking illustration. The kings and princes of the earth, claiming a divine right to hold the destinies of the common people in their hands, and aiming to make everything bend to their (so called) high national honor, crushing the lives and fortunes of their subjects, and even their religious principles, in the dust, whenever their notions of honor, their interest, or ambition, seem to them to demand it, are fitly represented as though they were moving in the region of the sun, moon, and stars. But they will be shaken down, as the leaf from the vine, or as the falling fig from the fig tree; and all their organizations will be dissolved; and all become a matter of history—rolled up as a scroll and laid aside. Then the way will be prepared for the saints to take the kingdom—the government of the earth. How could the saints ever get the rule of the earth, to exercise a peaceable reign of righteousness, unless these wicked, warlike powers, were first cast down, to rise no more! This political heaven, then, shall be a field of slaughter for the sword of the Lord. And, as Idumea had already been devoted to destruction, the Lord calls upon the world to look on—behold, in the overthrow of Idumea, what all the wicked governments of the earth may expect, when they have filled up the cup of their iniquity.

We have the same events foretold in Jeremiah 25: 31—33. "A noise shall come even to the ends of the earth; for the LORD hath a controversy with the nations; he will plead with all flesh; *he will give them that are wicked to the sword*, saith the Lord. Thus saith the Lord of hosts, behold, evil shall go forth from nation to nation, and a great whirlwind shall be raised up from the coasts of the earth. And the slain of the Lord shall be *at that day* from one end of the earth even unto the other end of the earth; they shall not be lamented, neither gathered, nor buried; they shall be dung upon the ground." Here we have the dark side of this cloud frowning upon the wicked. But in Zeph. 3: 8—9, we have both the dark side and the light side held up for our observation. "Therefore wait ye upon me, saith the Lord, until the day that I rise up to the prey; for my determination is to gather the nations, that I may assemble the kingdoms, to pour upon them mine indignation, even all my fierce anger; for all the earth shall be devoured with the fire of my jealousy. For then will I turn to the people a pure language, that they may all call upon the name of the Lord, *to serve him with one consent.*" Here we are instructed to wait upon the Lord, till he casts down and destroys the wicked powers of the earth; and then he will turn to all the people that are left a pure language. The *shibboloth* and *sibboloth* of party will then forever cease; and all serve the Lord with one consent. *And who shall live when the Lord doeth this?* That will be a happy day to them that survive; for there will come what is predicted in Daniel 7: 18, "But the saints of the Most High shall take the kingdom, and possess the kingdom forever, even forever and ever."

But Daniel wished to know a little more about this last wicked kingdom (the Roman,) and particularly of the last horn which sprung up, (the Papal power;) for he beheld that this powar made war with the saints, and prevailed against them, "*until* the Ancient of days came, and judgment was given to the saints of the Most High; and THE TIME CAME that the saints possessed the kingdom." And he was informed that the saints should be given into his hand "*until a time, and times, and the dividing of time.*" At the end of this period, he was informed that "the kingdom and dominion, and the greatness of the kingdom under the whole heaven, shall be given to the people of the saints of the Most High, *whose* kingdom is an everlasting kingdom, and all *dominions* shall serve and obey HIM." That is, that they shall serve and obey Jesus Christ, the Most High, while the saints administer the laws of the King; for whose *visible presence* we must wait till the day of final judgment. So, it will not do to admit that this coming of the *Ancient of Days* means the *personal advent* of Christ; for when that takes place, there will be no plurality of nations, or dominions, to serve and obey him. But there will then be one kingdom, and all the saints will be *subjects*, and not *ministers* of that government; and all the scriptures can never be fulfilled, without a long period of universal peace, while *nations* shall be ruled by righteous men—*saints*, and the *higher law* of God universally respected.

But one principal object here is to inquire and search into the question, when this 1260 years will terminate, as noted in this connection. For then, or very soon after that time, comes this universal reign of righteousness, as the above quotations distinctly show. Concerning the 70 years of the captivity of the Jews in Babylon, Andrew Fuller has clearly shown, from scripture records, that there are three points, at some distance of time from each other, from which to reckon the 70 years, to three corresponding points, equally distant from each other, in the events of their deliverance. And there is nothing more reasonable than to suppose, that future generations will be able to point out a variety of times, at each one of which a certain characteristic of the Papal power commenced, and 1260 years from which it ended. And it would seem to be a rational conclusion, that the particular characteristic of that power, which is under consideration in this connection, is the temporal reign of the Pope. For certainly, the powers described in that prophetic vision, at every preceding step, were secular powers. And knowing that the Papacy *has* sustained the character of a secular power, is it reasonable to suppose that the spirit of prophecy would represent it by a horn growing out of the head of the same beast, with a look *more stout* than his fellows, among other horns representing secular powers, with any other object than to represent it in its secular character? Whether this conclusion may be regarded as a certainty or not, there is surely too much appearance of evidence in its favor to allow us to pass it lightly over. In Mr. Jones' Church History, we are informed that the Pope exercised all the power of a temporal prince, A. D. 732. Add to this 1260 years, and it extends to 1992—138 years yet in the future. If any one can find evidence that the temporal reign of the Pope commenced sooner than 732, we should be glad to see it presented in the *Recorder*. But when we consider the vast amount of work to be done in order to usher in that glorious day—the sinking of every oppressive power—the return of the Israelites to their own land, which is to be so well cultivated that they will become rich in "cattle and goods," even before the coming of that vast army to perish in their land, when attempting to rob and spoil them—when they will "rob those that robbed them, and spoil those that spoiled them," during their long dispersion—idolatry is also to be driven from the earth—the healing streams of the water of life are also to find their way to the darkest and remotest corners of the earth; all this, and much more, must be accomplished, that the vast amount of prophecy converging to that point may be fulfilled, so "that they (who then live on the earth) may all call upon the name of the Lord, to serve him with one consent."—I say, when we consider all this, can we reasonably expect it will all be accomplished much short of the time above suggested? Surely, to expect it as soon as that, we must expect to see greater displays of the power of divine grace than have been seen since the day of Pentecost; and also, many interpositions of providence, as wonderful as that by which Haman was hanged on the gallows which he built for Mordecai, must be expected; and that, too, on an extended scale, to overthrow the powers of darkness, and break the oppressor's rod; or how could we expect every yoke to be broken, and every chain to fall off from the human mind, of those who are sunk the lowest in moral darkness and degradation, even in that length of time?

This, then, is no time for idle speculations. Every Christian should be stripped for the race, and harnessed for the battle. We are already in a mighty contest; and the battle will grow hotter and hotter, till the victory is won. Though the view here taken of the subject would seem to our narrow minds to present a very long struggle before the world's jubilee can come; yet, in the great scale of divine counsels, it is a very short period. God has always moved in a large circle (if we may so speak) when he would bring about a great event. And the latter-day glory, together with the events by which it will be ushered in, is the greatest of all events, between the creation and the judgment. This is the theme which always kindled up the hallowed fire in the souls of the prophets, whenever the Spirit poured its light into their minds, over the dark waves of sin and human woe, which rolled between them and that auspicious day. And we too, of this generation, must content ourselves with the observations of the eye of faith; and follow the example of them who endured as seeing Him who is invisible. Our portion of the labor may bear comparison with the conflicts and victories of David, who thus prepared the way for the peaceable reign of Solomon. And, if we act well our part in these mighty conflicts with sin and error, may we not expect as glorious a reward, in the world to come, as if we were permitted to share here in the fullness of the latter day glory. O! that Christians would awake to a sense of the position they occupy, and to the prospects of the victories to be won, by the blood of the Lamb, and by the word of his testimony. Then let us unite the patience of hope, and the labor of love, that we may have the happiness of seeing some of the fruits of our labors while we live, and leave much good seed sown by the labor of our hands, for others to reap after we are gone, so that at last, "he that soweth and he that reapeth may rejoice together," when the full harvest shall be gathered in.

TRUXTON, N. Y., June 21, 1854.

MORAL CAUSES OF CHOLERA.

The London *Christian Times* suggests that moral causes have much to do in engendering cholera; and that moral remedies may go far to alleviate or cure it. It says:—

"The filthy, low-lying regions, where the disease presents itself with most inveteracy, are also the regions of coarse, imbruted vice. Self-indulgence in sordid and unwholesome luxuries undermines the constitution. Perseverance in such indulgence for a series of generations debilitates a race. The harass and anxiety attendant upon precarious and dishonest means of obtaining a livelihood, shake terribly such enfeebled constitutions. Vicious indulgence and sordid habits, by demoralizing a large proportion of the lower classes, are the real cause of the predisposition to a new and awful form of disease. The filth and squalor are merely the external indications of this internal rottenness. When a large portion of any community has been thus predisposed, disease catches around it like wildfire, and even those who have kept themselves above the general degradation are not exempted from its visitations. The honest poor are by their poverty brought into contagious proximity to the class prepared for sickness. The wealthy are brought into contact with the infected stratum of society by business relations. Let the whole truth be told; the vicious and the unreflecting of the wealthier class expose themselves to contagion by visiting infected dens in search of illicit pleasure. Nay, more; the anxious, mammon-hunting, voluptuous habits of the wealthy predispose them to contagion.

Moral causes of disease can only be combated by counter agents. It is not meant that physical remedies and lenitives for cholera are to be dispensed with, but that moral remedies and lenitives are to be superadded."

HOW IT STRIKES A STRANGER.

Dr. Duff, the distinguished Scotch missionary, who visited this country a few months ago, on his return home made a speech four hours long before the General Assembly of the Free Church in Scotland, telling the people what he saw in the United States. Among other things, he says, "In all the Northern States, what have been called common schools have been got up at the public expense. They voluntarily tax themselves for these, and children are here taught free; and in every new State they set apart millions of acres to be devoted some day to education. In every district of sixteen miles square, they set apart one square mile, or the sixteenth part, as a fund for common education when that district is planted with human beings. Why, it is astonishing to see the edifices they get up there for educational purposes. They say that they will have nothing to do with small, paltry, close, confined, ill-ventilated school-houses. Their common school-houses in New York and elsewhere are like palaces, three or four stories high; and they get some 1,500 or 2,000 children to attend. They are really furnished up and replenished most tastefully and handsomely, and the rooms are remarkably healthy and airy. Go into one of these crowded rooms, containing 500 children, and as far as fresh air is concerned, you may almost as well go into the airiest drawing-room or saloon in Edinburgh. And the training of the children in these schools is admirable. Why, every little boy in any of them has the idea that he may some day be the President of the United States; and why should he not endeavor to become a great man? The whole training is well fitted to develop not only the mental faculties, but to inculcate the duties of citizenship. There is an energy and vigor, and an apparently precocious thoughtfulness and free outspokenness, in even a boy of the age of twelve, that makes him appear already a little man. This is the training which these children are receiving for American citizenship."

SERMON ON THE GREAT CALAMITY.

Several clergymen in New York have discoursed on the loss of the steamer Arctic, and the lessons it teaches. From the sermon by H. W. Beecher, we take the following extract:—

There is no reading person in the community, I suppose, who has not with painful eagerness watched the melancholy progress of news in the daily papers respecting the ill-fated Arctic and her precious freight of human lives. The ship itself, with its fellow ships, was connected with popular regard by patriotic feelings. Without one unkind feeling toward Old England, with sincere kindness and good wishes, it was yet natural and proper that we should rejoice in the success of any fair competition upon so grand a field as the ocean; and by an instrument that stands at the top of all human endeavor—an ocean steamer propelled by a marine engine. There is no skill and no art, yet, nobler than such a vessel as rests now upon the bottom-sands of Newfoundland waters. But all this feeling, which would still have lamented the disaster, even if every soul had been rescued, for the mere ship's sake, that had so often carried our flag through night and storm, reading her way across the deep by that mysterious eye in the binnacle, is intensified a thousand fold by the dreadful and needless destruction of precious human life. And in the gloom of this terrific disaster, there are but these consolations only—the heroism of a few, to whom honor and duty were more precious than life, and the Christian cheer of many, we may hope, who, in the direst surprise of that evil hour, found in God "a very present help in time of trouble;" who sat serene, though the sea roared and the waves thereof, and gave up their trusting souls with sweet resignation to the convoy of Christ's angels that waited around the spot to give them swift deliverance and instant passage heavenward. They fondly thought—these Christian hearts—that they were but *three days* from home. Indeed, they were but three hours from Home. Many of them said to themselves, "Once more among familiar places, and there we will abide; we will never wander again, pilgrims in strange lands; we will never tempt again the perils of the deep." And God said, "Verily, ye never shall." This Christian faith, and its irradiation in the dying hour, even when that hour comes like a bolt, is in such contrast with other horrors of the scene, that we love to hover over this thought. We turn from every other view appalled, and quiet our agitation and bitter sympathy in the radiance and soft glory of the Divine presence and benediction, which snatched, we may hope, slaves from the hands of terror, and wrapped them in the bosom of peace and serene resignation.

It was autumn. Hundreds had wended their way from pilgrimages; from Rome and its treasures of dead art, and its glory of living nature; from the sides of the Switzer's mountains; from the capitals of various nations; all of them saying in their hearts, we will wait for the September gales to have done, with their equinoctial fury, and then we will embark; we will slide across the appeased ocean, and in the gorgeous month of October we will greet our longed-for native land, and our heart-loved homes. And so the throng streamed along from Berlin, from Paris, from the Orient, converging upon London, still hastening toward the welcome ship, and narrowing every day the circle of engagements and preparations. They crowded aboard. Never had the Arctic borne such a host of passengers, nor passengers so nearly related to so many among us. The hour was come. The signal ball fell at Greenwich. It was noon also at Liverpool. The anchors were weighed; the great hull swayed to the current; the national colors streamed abroad, as if themselves instinct with life and national sympathy. The bell strikes; the wheels revolve; the signal gun beats its echoes in upon every structure along the shore, and the Arctic glides joyfully forth from the Mersey, and turns her prow to the winding channel and begins her homeward run. The pilot stood at the wheel, and men saw him. Death sat upon the prow, and no eye beheld him. Whoever stood at the wheel in all the voyage, *Death was the pilot* that steered the craft, and none knew it. He neither revealed his presence nor whispered his errand. And so hope was effulgent, and lithe gayety disported itself, and joy was with every guest. Amid all the inconveniences of the voyage, there was still that which hushed every murmur—*home is not far away.* And every morning it was still one night nearer *home*, and at evening one day nearer home! Eight days had passed. They beheld that distant bank of mist which forever haunts the vast shallows of Newfoundland. Boldly they made at it, and plunging in, its pliant wreaths wrapped them about. They shall never emerge. The last sunlight has flased from that deck. The last voyage is done to ship and passengers. At noon there came noiselessly stealing from the North that fated instrument of destruction. In that mysterious shroud, that vast atmosphere of mist, both steamers were holding their way with rushing prow and roaring wheels, but invisible. At a league's distance, unconscious, and at nearer approach unwarned, within hail and bearing right toward each other, unseen, unfelt, till in a moment more, emerging from the gray mists, the ill-omened Vesta dealt her deadly stroke to the Arctic. The death-blow was scarcely felt along the mighty hull. She neither reeled nor shivered. Neither commander nor officers deemed that they had suffered harm. Prompt upon humanity, the brave Luce (let his name be ever spoken with admiration and respect) ordered away his boat with the first officer to inquire if the stranger had suffered harm. As Gourlay went over the ship's side, O that some good angel had called to the brave commander in the words of Paul on a like occasion, "*Except these abide in the ship, ye cannot be saved.*" They departed, and with them the hope of the ship—for now, the waters gaining upon the hold and rising up upon the fires, revealed the mortal blow. O, had now that stern brave mate, Gourlay, been on deck, whom the sailors were wont to mind—had he stood to execute efficiently the commander's will—we may believe that we should not have to blush for the cowardice and recreancy of the crew, nor weep for the entirely dead. But, apparently, each subordinate officer lost all presence of mind, then courage, and so honor. In a wild scramble, that ignoble mob of firemen, engineers, waiters, and crew, rushed for the boats, and abandoned the helpless women, children, and men, to the mercy of the deep! Four hours there were from the catastrophe of the collision to the catastrophe of SINKING. In that time near two hundred able-bodied men, well directed, might have built an ample raft, stored it for present necessity, filled the boats with discretion, and put off from the sinking ship with a flotilla, that ere many hours would have been hailed by some of the many craft that pass and repass that ill-fated spot. It was not so to be. All command was lost. The men heeded but one impulse, and that the desperate selfishness of an aroused and concentrated *love of life.* They abandoned their post. They deserted their duty. They betrayed their commander. They yielded up to death more than two hundred helpless souls committed to their trust. And yet, even for these let there be some thought of charity. Let us not forget the weakness of the flesh. The absence of the first mate, whom they were wont to obey, the terrible force of panic, even upon brave men, the sense of the hopelessness of effort to save many, and the instinctive desire of self-preservation; all this is but a little. But so much extenuation as there may be, let them have its benefit, who certainly need every cover of charity to save them from the indignation of a grieved and outraged community. Let it be remembered, also, that *individuals* among them acted most nobly, and because the multitude were loose, let not the exceptional ones be forgotten. Let that single officer, who did cling to the last manfully to his duty—the third mate, Dorian—be remembered; and that man set to fire the signal gun of distress, who stood by his post till the ship sunk, and was in the very act of firing as the last plunge was made; and that engineer, who had a boy under his care, but refused to leave in the boat when a place was offered him, because he could not find his ward and would not go without him. Let us charitably hope that many more such individual acts occurred, unnoticed or unreported, to redeem the crew and engineers from such disgrace as weighs heavily upon them. Many a poor fellow lies beneath the waves, unable to defend himself, who may have lost his life because he *was* faithful to the last; and his heroism may be without a witness, his name without a defender. How nobly, in the midst of weakness and terror, stood that worthy man, Luce, in this terrible scene—calm, self-sacrificing, and firm to the end. Of all the witnesses, but *one* has disparaged his exertions. *He* says that this noble commander "*seemed like a man whose judgment was paralyzed.*" Yet this man says that when *he* was rushing desperately for the boat, Capt. Luce withstood him and tore the very raiment from his back, exclaiming, "*Let the passengers go in the boat;*" and with disgraceful naiveté says, "*No more attention was paid to the Captain than to any other man on board. Life was as sweet to us as to others.*" Without doubt such a man would think *his* judgment paralyzed who would not run; whose life was not so sweet as his duty; who could die, but could not abandon a trust as sacred as was ever committed to human hands. Nor do I remember, in all my reading, any Roman heroism that can compare with one incident recorded by our witness. When Capt. Luce was urged to enter one of the boats, he declined utterly. He was urged to let his son go in—that son whom, sinking, he carried in his arms—that son who, rising from the wave afterward, was slain in his arms by the stroke of a piece of the wreck. But should a man give precedence to anything that belonged to him, over the hundred helpless creatures that clung to him? His thrice heroic reply was, "My son shall share his father's fate." Now all over the deck was there displayed every frantic form of fear, of anguish, of bitter imploration, of transfixed despair. Some with insane industry strove at the pumps, others rushed headlong over the sides of the ship; the raft was over-burdened, the sea was covered with men struggling for a little time against their fate.

But let us remember, that there were other scenes than these. There were scores there who had long known that by death heaven was to be entered. There were those who had rested the burden of their sin upon Him who came to take away the sin of the world. Not in vain had they prayed every day for years, that they might be ready whenever the Son of man should come. There were mothers there, who, when the first shock was over, settled their face to die, as if it were to dream in peaceful sleep. Maidens were there, who looked up in that tremendous hour as the bride for her bridegroom. Oh, in the dread crisis, upon that mournful sea, which mists covered, that the tragedy of the waters might not be seen of the sun, how many were there that could say, "*God is our refuge and strength, a very present help in trouble.*" There, friends exchanged their last embraces; they determined to die holding in their arms those best beloved, and to yield up together their lives to the hand of God. Oh, noble loves! that in such an hour triumph over all fear, and [illegible]own the life with true grandeur! Oh, noble trust, that in the shock of such sudden death, could mount up above the waves, and behold the Redeemer, and *rest* in him, to the taking away of all fear! In such an hour, every one was tried by infallible tests. *Then* the timid became heroic, and the heroic became timid. Then it was neither wealth, nor honors, nor station, nor pretense, that could give help. Strength, and skill, and foresight, were all useless. Nothing was of worth except a clear eyed piety, that could behold the Invisible—a faith that could rest the very soul in the hands of its Creator, and a hope that could behold so much in heaven that it willingly let go its hold upon the earth. I will not doubt that in those state-rooms many a prayer was uttered which attending angels wafted to heaven; in that cabin there were men and women who waited calmly for the event, as one waits for the morning. At length the time was ended. That great ship, treacherously stabbed, and drinking in the ocean at its wounds, gave her last plunge. With one last outcry the devoted company were whelmed; and high above all other sounds there came a roaring from the chimney, as if the collected pains of all were mingled with the last groans of the ship itself.

Oh, what a burial was here! Not as when one is borne from his home, among weeping throngs, and gently carried to the green fields and laid peacefully beneath the turf-covered flowers. No priest stood to pronounce a burial service. It was an ocean grave. The mists alone shrouded the burial-place. No spade prepared the grave, nor sexton filled up the hollowed earth. Down, down they sank, and the quick returning waters smoothed out every ripple, and left the sea as if it had not been.

THEOLOGY OF THE CHINESE INSURGENTS.

The following extract is from a translation for the *London Times* of an official statement relative to a religious feast among the Chinese Insurgents. It shows a strange blending of carnal and spiritual things:—

"On the morning of the 25th of December, 1853, being the day of worship, the Northern Prince, accompanied by the Marquis Tingtheen, the Minister of State, and other officers, came to the palace of the Eastern Prince, to pay their compliments and to deliberate on the affairs of Government. When the deliberations were completed, the Northern Prince, with all the officers, knelt down and exclaimed, 'May your highness, the Eastern Prince, enjoy felicity and repose!' The Eastern Prince then commanded the Northern Prince to return to his palace, and all the officers to repair to their official residences, after which the Eastern Prince retired to his inner palace. In a short time the Heavenly Father came down into the world, and summoned Yang-shway-keaou, Hoo-kan-keaou, Tan-wan-mei, and Sang-wan-mei, saying, 'Do all you young women come forward and listen to the commands of me, the Heavenly Father.' Yang-shway-keaou, together with the female chamberlains, then approached into the presence of the Heavenly Father, and, kneeling down, inquired, saying, 'Since the Heavenly Father has taken the trouble to come down into the world, we young women have all come forward reverently to listen to the Heavenly Father's sacred commands, and to solicit his instructions.' The Heavenly Father then manifested considerable displeasure, and for some time would not speak. The female officers implored, saying, 'The moving of our Heavenly Father to take the trouble to come down into our world is to be ascribed to the faults of his sons and daughters, whose transgressions are multiplied. We, therefore, earnestly beseech our Heavenly Father's forgiveness, and entreat the removal of his displeasure, for which we pray, and pray again, with all imaginable earnestness.' The Heavenly Father then said, 'Since you little ones are sensible of your faults, do you immediately call your Northern Prince to come hither and listen to my commands.' The female chamberlains then replied, 'We will obey the Heavenly Father's sacred commands.' The female chamberlains then hastened out of the door of the second palace and sounded the drum, announcing the descent of the Heavenly Father, and informing the male chamberlains that the Northern Prince had been summoned into his presence. The male chamberlains, in obedience to the orders given, went immediately to the Northern Palace to make this announcement. The Northern Prince then came to the Eastern Palace to listen to the sacred commands of the Heavenly Father, who had come down into the world," etc., etc.

A BAD BOOK.

About twenty-five years ago I formed a most intimate acquaintance with a young man of fine education and commanding talents, and we soon became bosom friends. One morning after school, at a street-corner, he handed me a book, which he said he could loan me for only one quarter of an hour. We stood at that corner for a few moments, while I looked at the obscene pictures and read a few pages in that polluting volume. I handed it back to him and never saw it again; but the poison took effect, "the sin left its mark." I cannot erase the effect of the impure thoughts which in that quarter of an hour that vile boo[illegible]dged in my heart, and which, may God forgive me, I harbored there. I can and do pray against the sin, and trust by God's grace yet to conquer it; but it is a thorn in my flesh, and still causes me great bitterness and anguish.

My early friend, after well nigh accomplishing my ruin, became a dissolute man, imbibed infidel sentiments, and at last, as I greatly fear, died by his own hand. "Let him that thinketh he standeth, take heed lest he fall."

SINGING UNDER THE GOSPEL.

As we have already shown, to sing the praises of the Deity is a dictate of the religion of nature. Now, Christianity sanctions the duties of natural religion. Hence, singing praises to God is a part of religious worship under the Gospel. The express precepts and directions given to gospel churches, as well as the prophecies of the Old Testament, show that believers were to sing, have sung, and ought to sing the praises of God vocally. The testimony of ecclesiastical history, also, shows that this practice obatined in the earliest times of Christianity, and has continued to the present time. And in the book of Revelation, where the service of the churches of Christ on earth, as well as their state, condition, and sufferings, and their deliverance from sufferings, in the several periods of time till his second coming, is set forth, we find frequent accounts of their being concerned in this work of singing; particularly at the fall of Babylon, or Anti-christ, at which time, *"from the uttermost ends of the earth* will be *heard songs, even glory to the righteous."* (Isa. 24: 16.)

Christianity sanctions the use of song as a part of divine worship, in order that *all* the faculties with which man is gifted may be exercised. The *whole* man is to be consecrated to God, *body, soul,* and *spirit.* The Christian religion never seeks to destroy any purely natural faculty, with which we are endowed; it simply requires it to be properly regulated, and to be employed in God's service. And since God has created man musical, or with a propensity to express himself in musical strains, Christianity ordains, that this gift of our nature shall be employed to the praise of the Creator, as well as every other gift which we possess. And so, when Christianity shall have accomplished all its work upon the human race, music, in its most exalted and perfect form, will constitute no small part of our employment. Heaven itself will not be complete, till the redeemed shall fill its courts with songs of praise.

As Christianity sanctions the use of song in the worship of God, it might be supposed that the New Testament would contain some general directions respecting the manner of employing it. Accordingly, we find that it does contain such directions. They are, however, only *general,* no very minute specifications being made as to how often we shall sing, what shall be the words of our songs, or what sort of tunes they shall be set to. We find nothing more minute than the following: "*In psalms, and hymns, and spiritual songs, singing with grace in your hearts to the Lord.*" (Col. 3: 16.)

The precise meaning of each of these terms may not be easily defined. According to some, the *psalm* is such a song as is usually sung with other instruments besides the tongue. *Hymns,* such as are made only to express the praises, and set out the excellencies of God. *Songs,* such as contain not only praises, but exhortations, prophecies, thanksgivings; and these only sung with the voice. It is certain, however, that the word translated psalm is used in several places in the New Testament, where we cannot suppose that instruments of music are alluded to; also the word for song is used in the Apocalypse, where harps are joined with voices in the emblematical prophecy. Perhaps the New Testament signification of these terms is something like this: A psalm is a general name for anything that is sung in divine worship, whatever be the particular theme or matter; a hymn intends a song, whose matter or design is praise; and a song denotes any theme or subject, of a religious nature, composed into a form suitable for singing.

So far does the New Testament go, in giving direction as to the matter of our singing. But we do not suppose, that this is to be regarded as a command to sing only what are called the Psalms of David. For though it be true that all these varieties, (namely, psalms, hymns, and spiritual songs,) are embraced in the Book of Psalms, it by no means follows, that other religious compositions may not be thus designated with perfect propriety. And unless there is strong evidence, that the Apostle referred to the Book of Psalms particularly, and to nothing else—which evidence we have never yet seen presented—we are at liberty to suppose, that he intended to say that Christians should praise God with such compositions, inspired or uninspired, as either or all of the above terms might be properly applied to.

In regard to the frequency of our praises, the Scripture gives no direction. We have only this general rule: "*Is any merry? let him sing psalms.*" (James 5: 13.) Whether the Christian, in his individual capacity, shall lift up a song to his Maker once, twice, or thrice-a-day; or whether the assembled church shall, at each meeting, employ one or several hymns of praise, is nowhere set forth. But it seems to be taken for granted, that Christians will have their thoughts much upon Him who loved them, and washed them from their sins in his own blood, and that they will, therefore, find reason to be "merry" very frequently. Indeed, the Apostle says that Christians should *always* rejoice in the Lord. (Phil. 4: 4.) And it seems reasonable to argue that, if the Jewish Church found occasion for abundant song, though they saw the way of salvation but "through a glass, darkly," the songs of the Christian Church ought to be exceedingly abundant in praise of Him who has rent the vail, and made the way into the Holiest of All manifest. Let the Christian, then, sing often, and by much meditation upon the love of Christ, keep his heart in a suitable frame for singing. T. B. B.

THE NORTH-WESTERN ASSOCIATION.

The North-Western Seventh-day Baptist Association convened with the Seventh-day Baptist Church at Milton, Rock Co., Wis., Sept. 20th, 1854. The introductory discourse was preached by Eld. O. P. Hull, of Walworth, Wis., from Matthew 13: 25.

The Association was organized by appointing Eld. STILLMAN COON, of Milton, Moderator, and H. M. COON and E. M. CRANDALL, Clerks.

The letters showed the following as the statistics:—

Milton—V. Hull, Pastor; D. Babcock, R. C. Bond, Elders; L. H. Bond, Nathan Maxson, Jonathan Bond, Deacons; A. D. Bond, Clerk; members, 181.

Albion—A. W. Coon, Elder; James Weed, licentiate; James Weed, Joseph A. Potter, Samuel P. Burdick, Luke Coon, Norman Palmer, deacons; J. H. Potter, clerk; members, 137.

Walworth—O. P. Hull, pastor; Wm. H. Redfield, J. M. Lanphear, licentiates; Alfred Maxson, Wm. S. Clarke, deacons; E. Maxson, clerk; members, 64.

Christiana—Z. Campbell, pastor; T. C. Maxson, licentiate; Zina Gilbert, deacon; Wm. H. H. Coon, clerk; members, 60.

Berlin—J. M. Todd, pastor; C. Clarke, C. Hubbell, deacons; D. E. Lewis, clerk; members, 58.

Dakota—G. C. Babcock, H. Hull, licentiates; G. C. Babcock, R. I. Crandall, deacons; C. Thorngate, G. C. Babcock, clerks; members, 28.

Farmington and Southampton, Ill.—No returns.

Eld. N. V. Hull, delegate from the Western Association, was present during the latter part of the session, (being detained on his journey until Fifth-day evening,) and took part in the deliberations of the Association. Eld. C. M. Lewis, delegate from the Eastern Association, was taken sick in Genesee, and could come no farther. His providential detention was regretted by the Association.

Eld. J. M. Todd was appointed a delegate to represent this Association at the Eastern, Central, and Western Associations, at their next sessions. Eld. O. P. Hull was appointed a delegate to the next session of the General Conference.

The next session of this Association will be held with the church at Berlin, Marquette Co., Wis., on the fifth day of the week before the fourth Sabbath in Sept. 1855. Eld. Z. Campbell was appointed to preach the introductory discourse; Eld. J. M. Tood, alternate. Eld. S. Coon was appointed to write an essay on the subject of Missions, Hamilton Hull an essay on Church Discipline, and H. B. Lewis an essay on Sabbath-Schools, all to be presented at the next session of the Association.

Report of the Committee on the State of Religion.

Your Committee would respectfully report, that the past year has been one in which the long-suffering and forbearance of God have been signally manifested to us as a denomination, in preserving our churches during the prevailing apathy from the disorganizing and dividing influences surrounding them. The reports of the churches show a general union existing among them, and a freedom from the divisions which sometimes afflict the church of God, but the letters indicate a want of faithful, earnest devotion to the service of God. Our churches are not making the progress in divine things that is desirable. But while there is much to be regretted, and to cause us to humble ourselves before God, we find much to encourage us to renewed energy and effort. There is manifested a strong determination to maintain the order and ordinances of God's house, and a desire for more of the manifestations of Divine grace. May God in his mercy grant them this desire, and make them truly the light of the world, is the prayer of your Committee.

Report of the Committee on Education.

Your Committee, to whom was referred the general interests of education within the bounds of this Association, would respectfully report the following as the result of their deliberations. In looking over the field of education, we are gratified and encouraged to see a wide-spread and growing interest in the cause of general education. Commodious buildings are being erected in different parts of the country, and parents are feeling more and more the necessity of at least putting their children on a level with others in obtaining an education. We look forward with fond expectation to the growing prospect of our interest in this important department of Christian labor, and are gratified to see the prevailing desire on the part of the young to avail themselves of the benefits of an advanced education, which manifests itself in the attendance of a goodly number at the school at Milton, under the superintendence of Bro. A. C. Spicer, where a building is now in process of erection. In accordance with the direction of the Association held at Albion, in 1852, under the direction of the Educational Board appointed by that body, a building is now erected, which will be completed by the middle of October, at a cost of about $3000, when a school will be opened under the superintendence of Bro. Thomas Williams, and commends itself to the patronage of this Association and community at large.

Resolutions.

The following were presented and adopted:

Resolved, That we hail with joy the establishment of a mission in Palestine by our Missionary Board, and pledge to its support our prayers, our sympathies, and our contributions.

Resolved, That we recommend the cause of Sabbath-Schools and Bible Classes to the favorable consideration of our churches.

Resolved, That the action of the present administration of the government of the United States, in the passage of acts promoting and extending the system of slavery, is unworthy of the support of liberty-loving voters, and that any person supporting this administration, or any one not pledged against slavery, by his vote, commits an act which ought to exclude him from membership in that body which is styled the light of the world.

Resolved, That as Secret Societies are in their nature and effect inconsistent with the principles of Christianity, this Association recommends that the several churches composing it discountenance all connection of church members with such Societies.

Resolved, That this Association, in view of the low state of religion in the church, now repeats its past recommendations, to *all,* daily practice of fervent *family* and *secret* prayer, and a more careful reading of the sacred Scriptures.

Other resolutions were presented, and laid on the table. The first resolution was sustained by S. Coon, N. V. Hull, J. M. Todd, and H. Hull. The second passed without discussion. The fifth was sustained by A. C. Spicer, H. Hull, V. Hull, and others.

Preaching on Fourth-day evening by a Presbyterian clergyman from New York State; on Fifth-day evening by J. M. Todd; on Sixth-day evening by N. V. Hull; on Sabbath morning by N. V. Hull at the church, and H. Hull at the Academy; in the afternoon by O. P. Hull at the church, and J. M. Todd at the Academy; in the evening by N. V. Hull; First-day morning by N. V. Hull; afternoon by V. Hull; in the evening by N. V. Hull. We trust the seed sown will produce an hundred fold to the glory of God and the upbuilding of his cause among us.

H. B. LEWIS, Rec. Sec.

ALBION, Oct. 12th, 1854.

THE VIRGINIA ASSOCIATION.

The Seventh-day Baptist Virginia Association met with the church on the South Fork of Hughes' River, Ritchie Co., Va., Sept 21st, 1854, at 11 o'clock A. M. The brethren appointed at our last meeting to preach the opening discourse not being present, by request Eld. H. W. Babcock preached it, from Romans 12: 1. After sermon, Eld. S. D. Davis called the meeting to order, and O. P. Zinn and M. H. Davis were appointed a Committee to nominate brethren for Moderator and Clerks. Adjourned for 1 1-2 hours.

Met according to adjournment; prayer by Eld. A. Bee. The report of the Committee was called for, received, and adopted. The nomination was, Eld. S. D. DAVIS, Moderator, and J. F. RANDOLPH and ASA BEE, Jr., Clerks.

Eld. H. W. Babcock, from the Western Association, being present, was cordially received, and invited to participate in our deliberations. The brethren present from sister churches were also invited to act with us in our investigations.

The letters from the churches were called for and read, from which the following statistics were taken:—

Lost Creek—S. D. Davis, elder; P. S. Davis, licentiate; Wm. Kennedy, deacon; L. Bond, Jr., clerk. Added 1, deceased 3, total 81. Constituted 1805. Delegates, S. D. Davis and M. H. Davis. Communion second Sabbath in June, and once in three months.

Hughes' River—A. Bee, elder; J. M. Lowther and Asa Bee, Jr., clerks. Added 1, total 33. Communion once in twelve months, on the evening of the Passover. Delegates, A. Bee, J. Meredith, J. M. Lowther, O. P. Zinn, Z. Davis, L. Davis, L. Bee, J. H. Davis, and A. Bee, Jr.

Middle Island—E. Bee, elder; J. Bee, deacon. Members 23. Delegates, E. Bee, S. T. Davis, A. N. Davis, J. D. Bee, and N. D. Jeffrey. Communion first Sabbath in May, and once in three months. Constituted 1832.

New Salem—P. Davis and S. D. Davis, elders; L. H. Davis, deacon; Wm. B. Davis, clerk. Members about 90. Delegates, G. P. Davis and J. F. Randolph.

Committees were then appointed. 1st. *On Petitions*—Z. Davis, M. H. Davis, and S. T. Davis. 2d. *On Finance*—M. H. Davis, J. Meredith, and J. F. Randolph. 3d. *On Arrangements for Worship*—O. P. Zinn, A. Bee, Sen., and J. F. Randolph. 4th. *On the State of Religion*—H. W. Babcock, S. D. Davis, and E. Bee. 5th. *On Resolutions*—H. W. Babcock, S. D. Davis, E. Bee, G. J. Davis, and J. Meredith.

The Treasurer reported 35 cents in his hands. The Corresponding Secretary reported no correspondence. J. F. Randolph was appointed Corresponding Secretary for the ensuing year, and E. Bee, Treasurer.

The Constitution of this body was then read.

The Lost Creek Church requested that the next Association should be held with them. It was referred to the Committee on Petitions.

Adjourned until 9 o'clock to-morrow morning.

Met Sixth-day morning, at 9 o'clock. Prayer by H. W. Babcock.

Reports of Committees were called for and received.

On Resolutions.

1st. *Resolved,* That this Association disapproves of the use of and traffic in alcoholic liquors as a beverage.

2d. *Resolved,* That this Association heartily approves of the Missions of the Seventh-day Baptist Missionary Society, and commends them to the support of the churches of this Association.

3d. *Resolved,* That we regard American Slavery as a sin of great magnitude in the sight of God, and a flagrant violation of the rights of our fellow men, and that it is our duty to use all our influence against it.

4th. *Resolved,* That we commend to the patronage of the people of this Association the publications of the American Sabbath Tract Society, and of the Seventh-day Baptist Publishing Society.

5th. *Resolved,* That we tender our thanks to the Western Association for the help and encouragement they have given us by sending a delegate to sit with us in our deliberations, and to join with us in our devotional exercises, and earnestly solicit a continuance of their co-operation.

6th. *Resolved,* That we commend the School at West Union to the confidence of the people within the bounds of this Association, and earnestly recommend that they endeavor to give it an enlarged support.

The above resolutions were discussed and unanimously adopted. Adjourned until 2 o'clock P. M.

Met according to adjournment; prayer by O. P. Zinn.

The Committee on Finance reported no business.

The Report on the State of Religion was read and accepted, as follows:—

The Church at Lost Creek complains of too much apathy, but acknowledges refreshing showers of grace during the past year, and is in a state of union. The communication from the Church at the South Fork of Hughes' River represents that a number there are willing to learn and suffer God's will, that the Church is in fellowship, has a Sabbath-School, Bible-Class, and investigation meetings. Middle Island Church is wading through serious difficulties, and is apprehensive of disastrous results, and desires the friendly counsel of her brethren of sister churches. The Church at New Salem is in a somewhat cold and languid state, but still keeps up its public meetings, and a number of the brethren and sisters appear anxious for a revival of religion. In conclusion, your Committee would earnestly recommend to the churches composing this body a more thorough consecration to the service of the blessed Redeemer.

Corresponding Letter.

The Seventh-day Baptist Virginia Association, to her sister Associations and brethren:—

DEAR BRETHREN IN CHRIST,—By the kindness of our Heavenly Father, we have been permitted to hold another Anniversary. We were cheered to meet kind friends, who we trust are trying to walk in obedience to all of God's commandments, and in the faith of Christ. Our business has all been done in harmony. We have passed resolutions which, if carried out by us, will be of great interest to us as a denomination. We very much need increased facilities for education, that our youth may be instructed, and qualified to fill any calling that the Lord may call them to. We also need to be freed from the use of and traffic in ardent spirits as a beverage, for they lead to evil and everlasting punishment, for it is written, "that no drunkard shall inherit the kingdom of God." Our Association is small, and we have much to obstruct our path, and though the horizon does sometimes look dark, we will hope on, knowing that truth alone will stand the trying test, and be as gold seven times tried in the fire. We were much pleased to meet Eld. H. W. Babcock as a delegate from the Western Association. We were much cheered by his presence and encouraged by his faithful labors, which may be as bread cast upon the waters. We regret very much that his stay with us could not have been of longer duration. We feel grateful for such favors, and hope that they may be more frequently enjoyed by us. Brethren, remember us at the throne of grace, that we may not only profess to love God, but honor that profession by walking in all of his commandments and in the faith of Jesus Christ.

The Secretaries were instructed to revise the minutes, forward them to the editors of the *Sabbath Recorder,* and request their publication.

E. Bee was appointed to preach the introductory discourse at our next session; A. Bee, alternate.

The Committee on Petitions recommended that our next Association be held with the Church at Lost Creek, Harrison Co., Va. The Association adopted the recommendation, and adjourned to meet at that place on the fifth day of the week before the fourth Sabbath in September, 1855, at 10 o'clock A. M.

S. D. DAVIS, Moderator.

J. F. RANDOLPH,
A. BEE, Jr., } Secretaries.

LETTERS FROM PALESTINE—NO. 5.

JAFFA, 7 mo. 1, 1854.

There has been some sickness the past two months, both among our little colony and the people of the country. A great many have called for medicine, or sent for me to visit them and try to relieve their sufferings. Much of my time has been taken up in this way, and very cheerfully on my part, when I found I could make acquaintances which in the end may lead to the introduction of the gospel. It is now more healthy. The climate on the whole is healthy; the summer has been quite warm, but not so much so as we found the summers of the West Indies. The thermometer for July averaged 73° 2' in the morning, 84° at noon, and 79° 2' at sunset. For August 71° 2', 84°, and 80° 2'. The dry season is upon us, with all its rigors. The day of our arrival in the harbor of Jaffa, (May 17,) we had several little showers of rain. We were then some fifteen miles from land. The 21st ult., we had a little sprinkle and a beautiful rainbow—two items worthy of remembrance. A day or two after landing here, I recollect a slight sprinkle of rain. Excepting these few drops, we have had no rain since our arrival; indeed, none at all to water the earth, and we do not expect any for two months.

The country appears very quiet. I do not see that the war affects the business of the people, except perhaps to raise the price of provisions. Some time ago an edict was issued from Constantinople, forbidding the exportation of grain, since which prices have fallen a little. We hear but little from the war, except by way of the States.

On the Fourth of July, the Americans in this vicinity were invited to the American Consul's house in the city, where they spent a couple of hours very pleasantly. They were treated to coffee, lemonade, apple preserve, sweet cake, apples, oranges, mulberries, &c. We were offered, but refused, pipes, cigars, and sherbet. Probably a hundred called at his house during the day. To us it was a pleasant Fourth.

The same week a company of fourteen or fifteen of us, our Consul and his family included, visited Crooked River, the Mills, and went some three miles above where we had been before. There is a splendid valley of land in that section of the country, out of which might be made many good farms. Since then I have been shown a number of gardens and patches of land which are for sale. I am inclined to think the neighborhood of Jaffa a very good place to locate our mission, but time and acquaintance with the country will determine that.

Not long since, a Jew from Jerusalem called at my house, and informed me that he had met with Christians a few days' journey south of Cairo, who kept the Sabbath. He called the name of the country or city Habath. I hope I may yet find others who have visited the same people, and learn something that will interest our denomination.

The Sabbath question receives now and then a little attention. With one I have several times dtscussed the subject, (and also the subject of Baptism;) to another I gave a copy of the book of Sabbath Tracts, which was acknowledged to have been the means of removing some doubts and of confirmation in the Sabbath of the Lord; and to another I gave a parcel of English, French, and German Sabbath Tracts in Constantinople. May the little messengers of truth find their way to the hearts of many, who are now ignorant of the blessed rest of Jehovah.

We have meetings as usual on the Sabbath—preaching in the forenoon, and Bible-class in the afternoon. On Sabbath, the 22d July, we held meeting in French, and also on the 23d, which was First-day; since which they have been held every First-day afternoon. After a short discourse in French, the substance of it is repeated in English, and once a gentleman present explained a little of the same in Arabic. This I requested for the benefit of those who understood neither French nor English. From ten to twenty-five persons have been in attendance.

In closing this letter, I would ask an interest in the prayers of God's people for success to attend our humble efforts. WM. M. JONES.

DEDICATING CHILDREN TO MISSIONS.

During the recent meeting of the American Board of Commissioners for Foreign Missions, one evening session was devoted to a consideration of the prospects of a supply of missionaries, and the inducements to devote children to that work. The following sketch of the remarks of several of the speakers is worthy of serious consideration:—

The Rev. Mr. Graves of New York spoke feelingly of the interest which had been awakened in his mind, in the cause of Missions, by the dedication of his two sons to this work, and called upon parents and educators of youth to train young men for this work.

Rev. Dr. Matthews of New York portrayed the present exigencies of the missionary work, as demanding a great increase of laborers. Here are two of the largest and most populous empires of the world, China and India, opened to the gospel, and the only way in which laborers can be furnished for these opened fields is by Christian parents consecrating their children to the work. We must look especially to our Christian mothers to raise up a generation of godly and devoted ministers. Said Napoleon to a noble lady, in response to her question, What does France most need? "Good mothers, madam!" So the Church at this day needs good mothers to train up their children for the great work of Missions.

The Rev. Dr. Adams thought it too late to talk of self-denial in giving the children of Christian parents to the missionary work. The great question is, Who shall have the honor and privilege of giving their children? Dr. Scudder, with his *five* sons either with him or about to join him in the missionary work, was the most honored man connected with this Board.

The Rev. Dr. Tyler of East Windsor had six children, who were all a comfort to him, but the missionary in Africa was his greatest delight; and so far from considering it an act of self-denial to part with him, if God please to order it so, he not did care to see him till he met him in Heaven.

The feeling of the audience at this time was evidently greatly elevated, and Dr. Adams led in prayer.

Dr. Baird thought the church needed prayer at this time more than any other gift. There was power in prayer. He related a remarkable instance of the power of prayer, which had come to his knowledge. In 1830, at the anniversary of the French Missionary Society at Paris, it was announced that there was but one person studying under their care anticipating the missionary work. This statement awakened prayer to God to raise up laborers, and the next day *five* young men offered themselves, and in a little time they had *nine* young men preparing for the foreign field. It is important that men should feel, when called to *preach* the Gospel, they are called to *preach it* every where.

The Rev. Mr. Thompson of New York gave an interesting account of President Edwards' dedicating the son bearing his name to the work of Missions—and detailed interesting incidents connected with his own conversion, and that of a classmate, through maternal influence and the power of prayer.

Dr. Pomroy could state from personal knowledge, derived from visitation of Colleges and Seminaries, that more than one hundred young men in New England were looking forward to the foreign field—a greater number than had been known at any previous time.

The Rev. Mr. Harding confirmed Dr. Tyler's statement. He had four children, and rejoiced more in her who was a missionary in Turkey than in all the others.

Dr. Hawes' experience differed from that of these brethren. He found it very hard to part with his daughter, but rejoiced that she had gone to Turkey, and believed she had been more useful in her death than she would have been had she lived.

THE GIRARD ESTATE.—The Philadelphia *Ledger* says the annual rental of the Girard property belonging to the city, and comprising lots, dwellings, stores, warehouses, wharves, bridges, &c., amounts to $98,542. There are also in the hands of the Treasurer of the Girard Fund, held by the Mayor, &c., in trust, under the will of Stephen Girard, stocks and loans to the amount of $1,033,116 22, divided as follows:—

Trust fund for the imp. of Delaware-av.	$514.480 86
Trust fund to purchase fuel	9,262 05
Trust fund for the residuary	509,273 31
Total	$1,033,116 22

GEOLOGY AND THE BIBLE.—We have received from Dr. Fahnestock an article on Geology, in reply to D. E. Maxson, which we are compelled to defer until next week.

PRAYER IN PUBLIC SCHOOLS.

The following letter from the State Superintendent of Public Instruction in Wisconsin, is in reply to this question: "Is it a part of the duty of the Teacher in conducting the Public School to open it mornings with Prayer?"

OFFICE OF STATE SUPERINTENDENT,
MADISON, Wis., Sept. 13, 1854.

DEAR SIR: Yours of yesterday has just come to hand, and I hasten to reply, that it is no part of the duties of the teacher in our public schools to open or close his school with prayer, nor can he require any scholar under his charge to listen to that exercise. Neither can a school committee or town superintendent, whose duty it may be to examine applicants for teaching and grant certificates of qualifications, require that such applicants shall conduct such exercise in school or acknowledge belief in any particular religious tenets, before they will grant a certificate. Such a proceeding would be in direct violation of the Constitution and laws of the State, and would be an assumption on the part of school officers to have that done in schools which the law says shall not be done; else, why should such a test be imposed?

Our present free school system, endowed by public funds and adopted by the people, was founded for the purpose of securing to all classes of persons, without reference to their religious, political, or other opinions, a common English education—distinctly repudiating the idea of aiding, even in the most indirect manner, the propagation of the doctrines of any religious sect.

This is a wide departure from the school systems in other countries; but is regarded by the great body of our people as the wisest principle in our government. In our schools no sectarian instruction can be allowed; and, as there is no medium between sectarian instruction and the broadest toleration, in our schools the scholars should not be compelled to listen to an exercise which their consciences tell them is repugnant to the doctrines of their church; for prayer, as well as any other religious exercise, may be and often is sectarian. Neither should the time of the teacher be thus occupied, which should be devoted to giving instruction in the branches required to be taught in our public schools. It may be a matter of regret to some, that our laws have banished from the school-room religious instruction; but in my view, such instruction is properly consigned to the family circle, the Sabbath-school and the church; leaving the school house neutral ground where instruction should be limited to that ordinarily included under the head of intellectual culture, and to inculcating those principles of morality and virtue, in which all sects, and good men belonging to no sect, can equally agree.

Yours, respectfully,

H. A. WRIGHT, State Superintendent.

COVENANTER MISSION.—The failure of the Covenanter Mission in Hayti, consequent upon Mr. Morton's embracing the Sabbath, seems not to have entirely discouraged that people. A new mission is now proposed by them, and the *Covenanter* for October recommends Cambodia, in South-eastern Asia, as the field. That paper says:—

"Cambodia is a much smaller region than either China or Hindostan, but it has peculiar claims. It lies south-east of Siam. It touches upon some important states bordering upon China on the north west. It is accessible. The Papists are there already, but there has been no effort by any Protestant on its behalf. Lying on the way from Hindostan to China, it has been overlooked; and the missionaries to Siam have had enough to do in their own locations, and consequently have not been able to work Cambodia. It would be a great work to go into the thick darkness of that peninsula—give them the Bible in their own tongue—counteract the Man of Sin—and do something toward turning a nation to Christ. The language is difficult, but could be learned in Siam of some of the thousands of Cambodians in that country."

ILLNESS OF DR. DUFF.—An English correspondent of one of our exchanges says that Dr. Alexander Duff, the missionary, who recently visited this country, is now lying seriously ill at Leamington, a salubrious watering place, whither he had gone with a view to recruit his health previous to his departure for Calcutta. The result of a thorough medical examination has been the detection of very serious ailments. Congestion of the brain, inflammation in some of the membranes, and other affections, have been detected—the result of long continued and exhausting labors, and rendering it unsafe for Dr. Duff to return to India in less than 12 or 18 months. In the mean time, his medical advisers gave it as their opinion that he must seek a more genial climate than England for the approaching winter; and it is intended that in the course of a few weeks at farthest he should proceed to some mild, sanitary station abroad. Every expedient must be resorted to in order if possible to prolong so valuable a life.

OFF-HAND TAKINGS; or, Crayon Sketches of the Noticeable Men of our Age. By GEO. W. BUNGAY. Embellished with twenty Portraits on Steel. New York: Dewitt & Davenport, publishers, 160 and 162 Nassau-st.

Every body is interested in personal gossip; and of course a book like this, which tells all about the men whom we hear talked of daily, will not lack for readers. In this volume we have sketches, with portraits, of Edwin H. Chapin, Wm. H. Seward, Edward Everett, John P. Hale, Henry Ward Beecher, John Van Buren, G. C. Hebbe, Solon Robinson, P. T. Barnum, Sam'l Houston, Horace Greeley, Neal Dow, Ogden Hoffmam, Wm. Cullen Bryant, Gerrit Smith, T. H. Benton, George Law, S. A. Douglas, and John Mitchell; also sketches, without portraits, of Dan'l Webster, Henry Clay, J. C. Fremont, G. P. Morris and N. P. Willis, Father Taylor, J. C. Calhoun, L. Cass, C. C. Burleigh, Albert Lawrence, R. W. Emerson, J. G. Whittier, Washington Irving, G. W. Bethune, E. P. Whipple, Rufus Choate, Horace Mann, Dr. Boardman, John Ross Dix, Dr. E. Kane, Nathaniel Hawthorne, S. F. B. Morse, G. W. Kendall, Pierre Soule, W. Thackery, and about thirty others.

Progress in India.—Rev. R. W. Hume, missionary at Bombay, states that a large part of the more influential native young men of British India, have acquired and are acquiring a knowledge of the English; and there is a passion for English education among all the better classes in the large towns; and means are devised, by circulating libraries and other methods, to furnish a supply of good English reading. He adds:—

"A magnificent system of electric telegraphs is rapidly progressing here, which will bring all the distant cities of this great country into close neighborhood. Soon, by its means, we shall have instantaneous communication with Madras, Calcutta, Delhi, Agra, Lahor, Benares, etc. A grand system of railways is also in progress. Education is advancing, superstition is on the wane; God is carrying on his work in many ways, and hastening on the day when the idols shall be abolished, and the kingdom of his Son fully established in this dark land. The number of converts is still small; it is in many respects the day of small things; but our hearts are cheered by many encouraging indications of progress. And more than all, we are strengthened by the assurance that God will fulfill his great promises in due time, and that idolatrous, benighted India shall yet be full of the knowledge and the glory of God. Slow as it may seem to us, God is, I am persuaded, hastening on the fulfillment of these promises with lightning speed. Let us be remembered in your prayers. Would that there were more of a spirit of prayer among the churches on our behalf."

Wesleyan Reformers.—The "*News of the Churches*" says it is pretty generally known, that for some years back a feeling of dissatisfaction has prevailed among a portion of the Wesleyan body with the constitution and proceedings of the Conference. This dissatisfaction professes to be based chiefly on the fact of the Conference consisting solely of the preachers of the body, and its proceedings being conducted in private. The body of "Wesleyan Reformers," which has sprung into existence since 1849, is now said to possess

Chapels or preaching places	1,458
Preachers	2,963
Circuit agents	77
Class leaders	3,160
Members	49,082
On trial	1,293
Sunday schools	779
Sunday school teachers	13,573
Sunday school scholars	80,000
Tract societies	167
Tract distributors	1,401
Benevolent societies.	171

The sixth annual meeting of the delegates of this body, amounting to 300, was recently held at Birmingham. The conference was occupied for three days in the discussion of matters bearing on the interests of the "Reform cause," and especially in the consideration of the expediency of forming a League for the prosecution of the objects contemplated by the body. It appeared from various statements by different speakers, that the interest connected with the Reform movement is on the decline.

Sir John Franklin.—It is generally believed that the remains of Sir John Franklin's party have been discovered. Dr. Rae, after more than a years' absence, has returned to York Factory, whence he has sent letters to Sir George Simson, Governor of the Hudson Bay Territory, announcing the discovery of the remains of the party, and adding that they were starved to death in the spring of 1850, to the north-west of Fox River. This information came through the Esquimaux, among whom were found various articles of European manufacture, and several silver spoons and forks, one of which was marked with Franklin's name.

Doctorates in Germany.—The *Congregational Herald*, in an article on doctorates, says that in Germany there is one substantial advantage in being dubbed D. D., for one who possesses this distinction there, when he is called to undertake the pastoral office, is ordained without the examination which others must undergo. Degrees there are academical, and not ecclesiastical, and that of Doctor of Divinity is often held by distinguished Biblical scholars and professors, who are not clergymen. Thus the degree of D.D. was lately conferred on Chevalier Bunsen, who had previously been Doctor of Philosophy (Ph.D.,) which is equivalent to the English Master of Arts. Thus, also, Tholuck was Doctor of Divinity and Professor of Theology before he was ordained to the ministry, which latter consequently took place without the usual examinations.

Scotch Free Church.—This Church is engaged in a project which throws into the shade our American projects for raising our fifty thousands and our hundred thousands for church buildings. They have three objects combined in one: The manse scheme, which is to complete the building of parsonages for the ministers; the church building scheme, which is to secure the building of the church edifices yet needed; and the scheme for paying debts on the existing edifices. For all these schemes two hundred and fifty thousand dollars are needed. And limited as the Free Church is, compared with some of the larger church organizations of this country, they have commenced with a serious purpose to raise this large amount.

Anti-Slavery Lectures.—A course of lectures on Slavery is announced to commence in Boston on the 16th of November, by Hon. Chas. Sumner, with a poem by Rev. John Pierpont; and these to be followed at intervals of a fortnight, by Salmon P. Chase, Anson Burlingame, N. P. Banks, Cassius M. Clay, Horace Greeley, Henry Ward Beecher, John P. Hale, R. W. Emerson, Lewis D. Campbell, David Wilmot, Charles W. Upham, and Thomas D. Eliot.

Rev. Peter Donon, a member of the Presbytery of South Alabama, located at Pensacola, Florida, lately removed to Missouri, and united with the Campbellites.

RELIGIOUS INTELLIGENCE.

A letter from Mrs. Buel, of the Greek Missions gives many deeply interesting particulars of the influence of the Holy Scriptures in Corinth, whtch she visited early in the past summer. The desire to read them and the confidence in their authority are increasing in a remarkable degree. Mrs. B. describes in graphic language the satisfaction she experienced in reading the epistles of Paul to the Corinthians in the very city of Corinth, and the repeated confirmations she met at every step of the appositeness and unerring truthfulness of the apostle's allusions and illustrations.

The Richmond *Enquirer* says that the oldest church now existing in the United States is one near Smithfield, Isle of Wight County, Va. It was built in the reign of Charles I, between the years 1630 and 1635. The brick, lime and timber were imported from England. The timber is English oak, and was framed in England. The structure is of brick, erected in the most substantial manner. The morter has become so hardened that it will strike fire in collision with steel.

A premium of six hundred dollars will be awarded for the best Tract on Systematic Beneficence, with particular reference to the peculiarities of the M. E. Church, to be given at the discretion of the adjudicators in one sum, or, should three essays be selected, in sums of three hundred, two hundred, and one hundred dollars respectively. All manuscripts to be directed (post-paid) to "The Committee on the Prize Tract Essay, No. 200 Mulberry-street, New York City."

The Hawaiian Missionary Society, has appropriated $1,000, and placed it at the disposal of the American Board, for the purpose of sending a missionary to Japan. The immediate cause of this action was the arrival at Honolulu of the United States ship of Saratoga, with the news that Commodore Perry had concluded a treaty of amity and friendship with Japan, thus affording the hope that the way is preparing for the spread of the gospel in those islands.

The *Shepherd of the Valley*, the Roman Catholic journal published at St. Louis, being defunct, the materials have been purchased by the members of the order of "Know-Nothings," who now issue therewith a paper called the "True Shepherd of the Valley, or St. Louis Know-Nothing." It is edited by a Protestant clergyman.

We learn from the *Christian Index* of Aug. 31, that Rev. James P. Boyce, of Columbia, S. C., has given ten thousand dollars to the Furman University. B. C. Pressly, Esq., has also just given two thousand dollars. Including these two donations, nineteen thousand were subscribed by a few gentlemen of the Board at the recent meeting of the Trustees.

The first annual report of the Executive Committee of the Central University of Iowa has just been issued. The institution is located in Marion County, in the village of Polla, and is under the control of the Baptist denomination.

Rev. Dr. Ives, late Episcopal Bishop of North Carolina, but latterly a convert to Catholicism, is now sojourning in New York with his brother-in-law, Rev. Dr. Hobart, he having recently returned from Europe.

His Excellency T. Watkins Ligon, Governor of Maryland, has appointed Thursday, November 23, as "a day of Thanksgiving to Almighty God, to be kept and observed by the people of Maryland."

The Rev. D. D. Lore and family, late of the Methodist Mission to South America, arrived in New York, Oct. 9th, from Buenos Ayres, in the bark Hugh Burckhead.

The *Baptist Memorial* for October reports 2,686 baptisms, in its "monthly record." This number includes 381 baptisms at foreign missionary stations, which were reported in this country during the month. These statistics are for the month of August.

Rev. Dr. Brinsmade, pastor of the Congregational Church in Beloit, Wis., and Prof. J. Bushnell, have endowed the Professorship of Mathematics in Beloit College, by a donation of $5,000 each.

At Raratonga, in the South Sea Islands, there is a Christian college, for the education of native men and their wives, which, since its establishment, has sent out more than 130 missionaries.

The "Quarterly Journal of the American Unitarian Association," for October, contains a "circular" of the Association on the effort to raise $50,000 as a publishing fund.

A correspondent of the *Independent* says that John Ronge, the German Reformer, is now preaching to a small congregation of Germans in London. His wife supports and teaches a "Children's Garden."

According to the Rev. R. Bickersteth, there were, about 6 years ago, upwards of 5,000 priests in Ireland; last year, as appeared from a return, there were only 2,366.

An Illustration of Slavery.

A Mr. Thomas K. Knowland, of Warrenton, Miss., has written to the editor of the New York *Tribune* a letter from which the following is an extract. It is instructive, not only as showing in what a cool and business-like way slaveholders can set forth the particulars of their traffic in human flesh, but as showing what an honorable pedigree some of the slaves can boast, and how intelligent and capable some of them manage to become. Mr. Knowland says to Mr. Greeley:—

"My object in addressing you these lines is this: I own a negro girl named Catharine, a bright mulatto, aged between 28 and 30 years, who is intelligent and beautiful. The girl wishes to obtain her freedom and reside in either Ohio or New York State; and, to gratify her desire, I am willing to take the sum of $1,000, which the friends of Liberty will no doubt make up. Catharine, as she tells me, was born near Savannah, Ga., and was a daughter of a Judge Hopkins, and at the age of 7 years, accompanied her young mistress (who was a legitimate daughter of the Judge's) on a visit to New Orleans, where she (the legitimate) died. Catharine was then seized and sold by the Sheriff of New Orleans, under attachment, to pay the debts contracted in the city by her young mistress, and was purchased by a Dutchman named Shinoski. Shinoski, being pleased with the young girl's looks, placed her [illegible] a quadroon school and gave her a good education. The girl can read and write as well or better than myself, and speaks the Dutch and French languages almost to perfection. When the girl attained the age of 18, Shinoski died, and she was again sold, and fell into a trader's hands, by the name of John Valentine, a native of your State. Valentine brought her up to Warrenton, where I purchased her, in 1844, for the sum of $1,150. Catharine is considered the best seamstress and cook in this county, (Warren,) and I could to-morrow sell her for $1,600, but I prefer letting her go for $1,000, so that she may obtain her freedom. She has had opportunities to get to a free State and obtain her freedom, but she says that she will never run away to do it. Her father, she says, promised to free her, and so did Shinoski. If I was able, I would free her without any compensation, but losing $15,000 on the last Presidential election has taken very near my all."

European News.

The steamer Baltic, with London dates to Oct. 4th, arrived in New York on the 16th.

She brought very important and exciting reports from the seat of war in the East, to the effect that Sevastopol had been taken, 18,000 Russians killed, 22,000 made prisoners, Fort Constantine destroyed, the other forts with 800 guns captured, six Russian ships-of-war sunk, and Prince Menchikoff retired to the head of the bay, with the remainder of the squadron, declaring that he would blow them up rather than make an unconditional surrender. But there is reason to doubt the literal truth of this statement, although there is no doubt that sanguinary fighting has taken place.

The news from other points is not important. From Hong Hong, China, under date of Aug. 6, we have the following:—

A sad state of anarchy and disorder prevails not only at Canton but throughout the entire Province of Quang-tung. Since the departure of the last mail every day has brought the most ugly rumors of the condition of the beseiged city—for such Canton must now be considered. Unable to drive the rebels from Fat-shan, the imperialists have centralized themselves in Canton City, and disaffection, plunder and rapine do their work all around. The insurgents are now casting guns at Fat-shan for the purpose of attacking Canton in earnest; and when they commence, the end is already anticipated—the fall of the place. In this belief almost every thing of value has been removed from the city to the interior, or conveyed hither and to Macao. The city gates, except one, remain closed. Nothing of a serioos nature is likely to happen to the foreign factories, which are well protected by British and American ships of war.

Three Days Later.

The steamer Africa, with three days later news from Europe, arrived at New York on the 20th. The foreign papers are principally occupied in discussing the *hoax* of the downfall of Sevastopol. That stronghold was not at last accounts in possession of the allies, nor was it certain soon to be. There had been some fighting in the vicinity, however, which resulted favorably to the allies. From other points the news is quite unimportant.

Dead-Heads.—On the New York and Erie Railroad, according to very careful computations, the dead-heads would produce, if they paid regular fare, $160,000 a year—equal to 20,000 through-passengers, or nearly 60 per day. The records of "dead-heads" show that the free class consists mainly of men engaged in the freighting business, hotel-keepers and their clerks, members of the Legislature, and State-officers, City Councilmen and officers, Judges of Courts, clergymen, officers and employés of other roads, and favorites of superintendents and directors. The free passes to the press, about which there is so much noise and grumbling, amounted to less than one per cent. of the "dead-heads." On the New York and New Haven Road, there were 8174 free passes issued during the year, of which the press received 75! The whole investigation proved that the great cry of the press riding the roads to death was all moonshine, and that the real "dead-heads" were a class of people who had no business, by courtesy or interest, or *quid pro quo*, to a pass. [Tribune.

Missionary Murdered by Indians.—We find the following sad story in the St. Paul *Minnesotian*: "A lady from the neighborhood of Fort Ripley, now in St. Paul, brings information that the wife of Rev. Mr. Spencer, missionary at Red Lake, was murdered a short time since by a war party of Sioux Indians. Mrs. Spencer was sitting in her apartment after dark, when she was fired upon and killed instantly. She was an estimable lady, who had resided several years with her husband as a missionary among the Chippewas. Red Lake is entirely within the Chippewa country, and the murderers were no doubt a war party of Sioux, who were out in quest of Chippewa scalps."

The Liquor Law in Connecticut.—In Stonington, Conn., on the 17th ult. a town meeting was held, for the purpose of considering a petition from twenty-five enemies of the prohibitory liquor law, asking that no money be appropriated by the town for the sale of liquors for mechanical and other purposes. The petition was voted down by the friends of the law, who then adopted this resolution: "*Resolved*, That it is the sense of this meeting, that the sole object of the petitioners, at whose instance this meeting was called, is to defeat the ends of the law, and that we regard it as one of a series of concerted plans to bring the law into dispute, by misrepresentations and other dishonorable means."

Arnold Douglas having forced upon the country his plan for getting Slavery into Kansas, Mr. Frederick Douglas announces his plan for keeping Slavery out of it. This plan is simply the settlement in Kansas, at the earliest possible period, of a large and well-disciplined body of free Colored people from the Northern States. "There is nothing," says Mr. Douglas, "confessedly, which the slaveholder more dreads than the presence of a numerous population of industrious, enlightened, and orderly colored men. Where they are to be, he will be careful not to come."

Uncurrent Money.—*Thompson's Bank Note Reporter* says: The smoke of the panic has cleared away sufficiently to enable us to fix on rational quotations:

All Wisconsin	1¾ dis.
All Ill. except Chicago	1¾ dis.
All Chicago Banks	1 dis.
All Ind. Free Banks	2¼ dis.
Indiana State Bank	1¾ dis.
Kentucky and Missouri	1¾ dis.

Cochituate, Boston	40 discount.

SUMMARY.

A number of citizens of Eden Valley, Erie Co., N. Y., were endeavoring to remove an old bridge, over Eighteen-mile Creek, for the purpose of substituting a new one, on the 16th inst., when the timbers gave way, and all the persons engaged on the bridge, with the bridge, were thrown into the creek. There were forty persons on and under the bridge when it gave way. Of these, two, Deacon John Carter and Curtis Hubbell, two of the most prominent and estimable citizens of that town, were so fatally injured that they lived only a few hours, and five were badly wounded.

The Syracuse and Binghampton Railroad is opened throughout. The new road is eighty miles long, crosses no large streams, and has little or no rock-cutting, but rises by a pretty heavy grade from Syracuse some twenty miles to Tully, on the south line of Onondaga County, where it strikes the head waters of a branch of the Chenango, thence following the course of that stream and descending by easy grades through Cortland, Chenango and Broome Counties to the Susquehanna River and Erie Railroad at Binghamton.

A Utah correspondent of the St. Louis *Republican* says that Lieut. Beckwith has succeeded in finding a new route from Great Salt Lake City to Carson Valley, which, in addition to being as good or better than the old northern routes for grass and water, &c., shortens the distance to California at least one hundred and fifty miles. The road is considered good, and on many accounts it will doubtless be far preferable to the old one.

We learn from the Rockford (Ill.) *Democrat* of the 3d, that in the town of Howard, Winnebago County, on Saturday, Sept. 24th, five out of one family—father, mother-in-law and three children—were in the space of a few hours hurried into eternity. They were all well in the morning and ate a hearty breakfast, but ere night five had ceased to exist. It is thought by some that poison was the cause—by others that it was cholera.

The total loss of life by the burning of the steamer Princess on the Mississippi, a few days since, was as follows: Mrs. Wise and child, Miss Wilson, a little boy, Andy Thompson, Jr., the pilot, George Barritt, the first engineer, two negro women, and fifteen hands and slaves belonging to the boat. The boat was entirely destroyed, with her cargo of 3,000 bales of cotton.

The Grand Jury of Richland District, S. C., among its presentments, has recommended the reöpening of the African slave-trade! They set forth its supposed advantages, and even necessity, to the South, and justify its humanity and morality! All this is in entire keeping with the ridiculousness of the application which they propose to make to the General Government to remove the present restrictions on that trade.

A dispatch dated Halifax, Tuesday, Oct. 17, 1854, says: The screw-steamship Osprey, from St. Johns, N. F., the 11th inst., contrary to general expectation, brought no other tidings relative to the passengers of the ill-fated Arctic. The only remaining hope, therefore, is that some of the missing passengers may have been rescued from pieces of the wreck by passing vessels which have not reached any port.

The parties already sent out by the New York Kansas League have amounted altogether to about 600 or 700 persons, and among them have been a number of families. 1,000 or more are preparing to follow this month, many of whom belong to the American Settlement Company, whose leaders went about three weeks since to choose a location, occupy a large tract, and lay out a city.

Kissane, the supposed forger, was arrested a few days since at Cuba, on the New York and Erie Railroad. When he leaped off at Hornellsville, a freight train was standing on the switch. He managed to secrete himself between two freight-cars, and when they moved on he was carried along with them. He was arrested by the same officer who had him in charge.

In the United States Circuit Court for the Northern District of New York, the Jury have returned a verdict of $700 for the plaintiff in the case of Nathaniel B. Powers vs. John Wait, Leaverett Moore and Lebbens Booth, for infringement of letters patent for improvements in the method of setting blocks for printing oil-cloths.

The Harrisburgh *Herald* states that on the 3d inst. a drover undertook to drive about nine hundred sheep across the Susquehanna River near Liverpool, Pa., and lost seven hundred of them. The citizens went to the rescue with boats, and with a great deal of difficulty succeeded in rescuing about two hundred.

Turkeys are selling in New York at 14 and 15 cts. per lb., live weight. This is equal to 17 cts. as ordinarily dressed, or 20 cts. drawn and ready for the spit. It will pay to fat turkeys at that.

The ground was covered with snow to the depth of two inches in Montreal on Monday morning, Oct. 16th. The hills of Vermont were likewise white with snow on the same day.

The snow storm on Monday, Oct. 16th, seems to have been somewhat extensive through Canada East, Maine, New Hampshire, Vermont, and the north part of Massachusetts.

The Syracuse *Standard* understands that Nelson, who is charged with robbing the Post Office at Keesville, and escaped from the Troy jail, a few nights since, passed through Syracuse, on his way to Canada by way of Oswego. He is a son of the celebrated Canadian patriot, Wolfred Nelson, and has probably escaped to Canada.

A regular manufacture of Egyptian antiquities goes on at Birmingham. They are exported to the banks of the Nile, and sold at a profit by the Arabs to incautious travelers. Malay Kreeses are also manufactured, which are sold as the "genuine article" to the unwary voyager at Pinang, Malacca, and Singapore.

A letter from Samuel C. Pomeroy, now in Kansas, speaks of the country as very beautiful, "and no humbug," and thinks the contest there between freedom and slavery by no means certain to result immediately in victory to the former. It will, he says, be long and hotly contested.

The Chicago Times says: Visiting the Michigan Southern Railroad depot a few days since, we heard by accident that a contract had been made with that road for the delivery of flour from St. Louis to New York at $1 70 per barrel, and that already over thirteen thousand barrels had been carried.

The Syracuse and Binghamton Railroad was formally opened on Thursday last by excursion trains over the track, and a dinner and speeches at Syracuse, at which much enthusiasm prevailed, and the highest anticipations of the value and prospects of the enterprise, were indulged in.

Capt. Inglefield sends dispatches to the Admiralty from the Arctic regions, reporting the discovery of extensive mines of good anthracite coal on the coast of Greenland in about latitude 71°. This coal will prove valuable should screw ships be sent there for whaling, as is very likely to be done.

A Bangor correspondent of the Boston *Post*, writing Oct. 9, states that much excitement had pervaded the commercial community in that city for the past two days, in consequence of the failure of Charles Cooper & Co, of Bangor, and the suspension of the Ellsworth Bank.

The celebrated Warm Springs, in Bath County, Va., were sold at auction on the 1st inst., for the sum of $50,000—Messrs. Mays, Francisco, and a gentleman residing in the neighborhood, were the purchasers. There are about 3,000 acres of grazing land attached to the Springs.

Under the law and regulations of the Post-Office Department, it is held that postage can not be prepaid on regular newspapers or periodicals for less time than one quarter; and in all cases postage must be paid on such matter at the commencement of a quarter.

In New York, on the 20th inst., sixty-two persons were arrested by the Sixteenth Ward Police, under command of Capt. Stephenson, for selling liquor without license. The prisoners were taken before Justice Stuart at Jefferson Market, and held to bail in the sum of $300 each to answer the charge.

Indiana Free Bank Bills are now at a great discount, and are not used in trade. The Chicago *Journal* states that a number of the banking houses there refuse the notes of all the Indiana free banks. The same decision has been agreed upon by the management of the Railroads entering that city.

The brig Sierra Leone, formerly the Lyra Ann, cleared from New York on Wednesday of last week, for the west coast of Africa, and was seized by the authorities on the ground of being intended for slave trading. The District-Attorney and several revenue officers were on board of her during the day.

There is a man in Southwick who has a collection of 250 dozen live pigeons, which he is fattening for market. They consume fifteen bushels of corn in one week. Others in the same town have smaller quantities on hand.

The Pawtucket *Gazette* learns that the old stone-mill lot in Newport, R. I., has been secured for a public park. The citizens have subscribed $5,000, which, with the $10,000 legacy from the late Judah Touro, for that object, makes up the requisite sum.

On Sunday, Oct, 15, snow fell at Watertown, Jefferson County, N. Y., so that the boys took their first bout at snow-balling. On Monday morning the mud was frozen quite stiff.

New York Markets—October 23, 1854.

Ashes—Pearls $6 25; Pots 7 00.

Flour and Meal—Flour 8 12 a 8 44 for common to good State, 8 43 a 8 75 for common to good Ohio, 10 00 a 10 50 for extra Genesee. Rye Flour 6 00 a 7 00. Corn Meal 4 37 for Jersey, Buckwheat Flour 4 00 a 4 18 for 100 lbs.

Grain—Wheat has advanced slightly, and is selling at 2 00 for prime white Canadian, 2 25 for good white Genesee. Rye 1 15 a 1 17. Barley 1 20 a 1 25. Oats 50 a 52c. for State, 54 a 56c. for Western. Corn 79 a 80c. for Western mixed, 82 a 83c. for round yellow.

Provisions—Pork 11 31 for prime, 12 37 for mess. Beef 6 00 for new country prime, 11 00 for new country mess. Lard 9¾ a 10½c. Butter 13 a 18c. for Ohio, 18 a 22c. for State. Cheese 9 a 10½c.

Hay—65 a 75c. per 100 lbs. for shipping.

Potatoes—2 00 a 2 50 per bbl. for Pinkeyes, 2 50 a 3 00 for Mercers.

Seeds—Clover 11 a 11½c. Timothy 3 00 for mowed, 3 75 for reaped. Flaxseed 1 65 a 1 75.

Tallow—12½c. for Butchers' Association.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

DIED.

In Leonardsville, N. Y., Oct. 20th, Mr. George O. Clarke, in the 25th year of his age. In the death of Mr. C. our community has suffered the loss of a very amiable and much-loved young man. He has been married one year and one month, and has left a widow and parents to lament his loss—which is, however, greatly relieved by a very satisfactory evidence that he sleeps with Jesus.

WILLIAM M. ROGERS, Treasurer.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

The location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Bound Volumes.

On hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Me*[illegible] bound together, in cloth and leather. Price in [illegible] $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commencing Monday, April 10, 1854:—

Leave New York at 8 A. M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare.
GEO. H. PEGRAM, Sup t.

Regular Mail Line via Stonington for Boston,

PROVIDENCE, NEW BEDFORD, and TAUNTON. Inland Route, without change of cars or detention, carrying the Eastern Mail.

The steamers C. VANDERBILT, Capt. Joel Stone, and COMMODORE, Capt. John G. Bowne, in connection with the Stonington and Providence, and Boston and Providence Railroads, leaving New York daily (Sundays excepted) from Pier No. 2 N. R., first wharf above Battery Place, at 5 o'clock P. M., and Stonington at 8 o'clock P. M., or on the arrival of the mail train which leaves Boston at 5.30 P. M.

These steamers are unsurpassed for strength, safety, speed, comfort, and elegance. The officers are experienced and attentive.

The natural advantages of this route are superior to any other. Being shorter and more direct, the trip is more pleasantly and expeditiously performed, while passengers can always rely on reaching their destination in advance of those by either of the other routes.

The COMMODORE, from New York—Monday, Wednesday, and Friday. From Stonington—Tuesday, Thursday, and Saturday.

The C. VANDERBILT, from New York—Tuesday, Thursday, and Saturday. From Stonington—Monday, Wednesday, and Friday.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New-York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

Supreme Court.

IN the matter of the taking of lands for a new RESERVOIR, between 86th and 96th-sts. and the 5th and 7th-avs., in the City of New York. To all owners, mortgagees, lessees, occupants, and other persons, in any manner, by judgment, decree, or otherwise, entitled unto, or interested in the lands and premises above mentioned, or any part thereof: Notice is hereby given, that you are required to appear before the Commissioners of Appraisal in the above entitled proceeding, at their office, No. 293 Broadway, third story, front room, at 10 o'clock A. M., on any day, (Sundays excepted,) on or prior to the 21st day of October next; and to produce the evidences of your title or interest therein. In default whereof, and in case the persons entitled or interested as aforesaid shall not be ascertained by or be known to the said Commissioners, or be fully known, the same will be reported to the Supreme Court as belonging to unknown owners. It being the desire to consummate this great improvement, and to present the report at the earliest day consistent with a proper examination and due regard to the rights and interests affected, it is earnestly requested that all parties note and comply with the preceding notice, as no other or further notice will be issued. Dated New York, Sept. 1, 1854.

EDWARD C. WEST,
ABRAHAM TURNURE, } Commissioners.
DANIEL DODGE,

Robert J. Dillon, Counsel to the Corporation.

N. B.—All papers published in the City of New York are requested to publish the preceding notice until the 21st day of October next, once in each week, and to send their bills, with affidavits of publication, to the office of the Counsel to the Corporation, to be paid on the final taxation of the proceedings. 2t

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations*, etc., made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y.

Miscellaneous.

The Loss of the Arctic.

The deep interest everwhere felt in the particulars of the loss of the Steamer Arctic, induces us to give below several reductions and extracts calculated to elucidate the matter:—

Statement of Capt. Luce.

The Arctic sailed from Liverpool, Wednesday, Sept. 20, at 11 A. M., with 233 passengers, and about 150 of a crew. Nothing of special note occurred during the passage, until Wednesday 27th, when at noon we were on the Banks, in lat. 46° 45' N., and lon. 52° W. steering west by compass.

The weather had been foggy during the day; generally, a distance of half to three-quarters of a mile could be seen, but at intervals of a few minutes a very dense fog, followed by being sufficiently clear to see one or two miles. At noon I left the deck for the purpose of working out the position of the ship. In about 15 minutes I heard the cry of "Hard starboard" from the officers of the deck. I rushed on deck and had just got out when I felt a crash forward, and at the same moment saw a steamer under the starboard bow, and at the same moment she struck against our guards and passed astern of us.

The bows of the strange vessel seemed to be literally cut or crushed off for full ten feet, and seeing that she must probably sink in a few minutes, and taking a hasty glance at our own ship, and believing we were comparatively uninjured, my first impulse was to endeavor to save the lives of those on board the sinking vessel. The boats were cleared, and the First Officer and six men left with one boat, when it was found our own ship was leaking fearfully.

The engines were set to work, being instructed to put on the steam pumps, and the four deck pumps were worked by the passengers and crew, and the ship headed for the land, which I judged to be about 50 miles distant. I was compelled to leave my boat with the First Officer and crew to take care of themselves. Several ineffectual attempts were made to stop the leak by getting sails over the bows, and finding the leak gaining on us very fast, notwithstanding our own powerful efforts of keeping her free, I resolved to get the boats ready and as many children and ladies placed in them as possible. But no sooner had the attempt been made than the firemen and others rushed into them, in spite of opposition.

Seeing this state of things, I ordered the boats astern, to be kept in readiness until order could be restored, when to my dismay I saw them cut the rope in the bow, and soon disappear astern in the fog. Another boat was broken down by persons rushing at the davits, and many were precipitated into the sea and drowned. This occurred while I had been engaged in getting the starboard guard boat ready, and placed the second officer in charge, when the same fearful scene as with the first boat was being enacted, men leaping from the top of the rail, twenty feet, pushing and maiming those who were in the boat.

I then gave orders to the second officer to let go and row after the ship, keeping under or near the stern, to be ready to take on board women and children as soon as the fires were out and the engines stopped. My attention was then drawn to the other quarter-boat, which I found broken down, but hanging by one tackle. A rush was made for her also, and some fifteen got in and cut the tackle, and were soon out of sight.

I found that not a seaman was left on board or carpenter; without any tools to assist us in building a raft as our only hope, and the only officer left was Mr. Dorian, the third mate, who aided me, with the assistance of many of the passengers, who deserve great praise for their coolness and energy in doing all in their power up to the very latest moment before the ship sunk.

The Chief Engineer, with a part of his assistants, had taken our smallest deck-boat, and before the ship went down pulled away with about fifteen persons. We had succeeded in getting the fore and main yards and two topgallant yards overboard, together with such other small spars and materials as we could collect, when I was fully convinced that the ship must go down in a very short time, and that not a moment was to be lost in getting the spars lashed together to form a raft—to do which it became necessary to get the life-boat, our only remaining boat, into the water.

This being accomplished, I saw Mr. Dorian, the chief officer of the boat, taking care to keep the oars on board to prevent them from leaving the ship—hoping to get most of the women and children in the boat at last. They had made considerable progress in collecting the spars, when an alarm was given that the ship was sinking, and the boat was shoved off without oars or any thing to help themselves with; and when the ship sunk, the boat had got clear probably an eighth of a mile to leeward.

In an instant, about a quarter to 5 P. M., the ship went down, carrying every soul on board with her. I soon found myself on the surface after a brief struggling, with my own helpless child in my arms, when again I felt myself impelled downward to a great depth, and before I reached the surface a second time, had nearly perished, and lost the hold of my child.

As I again struggled to the surface of the water, a most awful and heart-rending scene presented itself to my view. Over 200 men, women and children struggling together amid pieces of every kind of wreck, calling on each other for help, and imploring God to assist them. Such an appalling scene may God preserve me from ever witnessing again.

I was in the act of trying to save my child when a portion of the paddle-box came rushing up edge-wise, just grazing my head, falling with its whole weight upon the head of my darling child. Another moment I beheld him lifeless in the water. I succeeded in getting on to the top of the paddle-box in company with eleven others—one however soon left for another piece, finding that it could not support so many.

Others remained until they were, one by one, relieved by death. We stood in water at a temperature of forty-five degrees up to our knees, and frequently the sea broke directly over us. We soon separated from our friends on other parts of the wreck, and passed the night, each one of us expecting every hour would be our last. The wished-for morning came, surrounded with dense fog, not a living soul to be seen but our own party, seven now being left.

In the course of the morning we saw some water casks and other things belonging to our ship, but nothing that we could get or afford us any relief. Our raft was rapidly settling, as it absorbed the water. About noon, Mr. S. M. Woodruff of New York was relieved by death. All the others now began to suffer very severely for want of water, except Mr. George F. Allen and myself.

In that respect we were very much favored, although we had not a drop on the raft. The day continued foggy, except just at noon, as near as we can judge, we had a clear horizon for about half an hour, and nothing could be seen but water and sky. Night came on thick and dreary, with our minds made up that neither of us would again see the light of another day, for very soon three more of our suffering party were relieved by death, leaving Mr. Allen, a young man, and myself.

Feeling myself getting exhausted, I now sat down for the first time, about 8 o'clock in the evening, on a trunk which providentially had been found on the wreck. In this way I slept a little through the night, and became somewhat refreshed. About an hour before daylight—now Friday, the 29th—we saw a vessel's lights near us.

We all three of us exerted ourselves to the utmost of our strength in hailing, until we became quite exhausted. In about a quarter of an hour the light disappeared to the east of us. Soon after daylight a bark hove in sight to the north-west, (the fog lighting) steering apparently for us, but in a short time she seemed to have changed her course, and again we were doomed to disappointment; yet I felt hopes that some of our fellow sufferers might have been seen and rescued by them. Shortly after we had given up all hopes of being rescued by the bark, a ship was discovered to the east of us, steering directly for us.

We now watched her with the most intense anxiety, as she approached. The wind changing caused her to alter her course several points. About noon they fortunately discovered a man on a raft near them, and succeeded in saving him by the second mate jumping over the side and making a rope fast around him, when he was got on board safely. This man saved proved to be a Frenchman who was a passenger on board the steamer which we came in collision with.

He informed the captain that others were near on pieces of the wreck, and going aloft he saw us and three others. We were the first to which the boat was sent, and safely taken on board about 3 P. M. The next was Mr. James Smith of Mississippi, second class passenger. The others saved were five of our firemen. The ship proved to be the Cambria of Halifax from Glasgow, bound to Montreal, Capt. John Russell, who commanded the bark Jesse Stevens, and was rescued by Capt. Nye of the Pacific.

The Ebenezers.

From the Niagara Democrat.

It has lately been announced, that this singular and yet permanently successful community are desirous of breaking up their establishment in order to remove to some of the new States or Territories at the West, where they can obtain a larger domain! and perhaps with the additional motive of becoming more isolated than they can be in their present location. It is stated that they have been offered $5,500,000 for their property, which is $500,000 short of their asking price.

Their domain is eight miles from the City of Buffalo, on the Old Seneca Reservation. The agents of the Society purchased about 6,000 acres of the land of the Ogden Company soon after the Gillett Treaty, in 1842; and about 3,000 have been added by subsequent purchases. A large portion of it is very large fields more thoroughly cultivated than any lands in Western New York; indeed, it is almost garden, instead of field cultivation. Their farm buildings, especially their immense barns, are specimens of convenience and capacity, in all their appointments, which we have never seen excelled in this class of buildings.

They reside principally in three separate villages, that have a quiet rural aspect; the buildings, of brick and wood, plainly but substantially constructed. There is valuable water-power upon the streams we have named, which they have improved by the erection of saw-mills, woolen and cotton maufactories, and for other manufacturing purposes. They excel in woolen manufactures, broadcloths, cassimeres, and flannels, especially; and they have among them some superior artists. They have large flocks and herds; and what is singular in this country, their sheep are under the care of shepherds. Order, system, neatness, characterize their wide domain throughout. Work, work, work, is the order of the day with them—industry as steady as the movements in a tread-mill; and in their working ranks, without much distinction of sex, in field and forest, gardens, manufactories and mechanic shops, are embraced all ages, from seven years upward. The population is now about 2,000.

It is a communist, or common-property association, of a distinct religious type; Protestant, but what kind of Protestants we are unable to state. Whatever their faith is, they are extremely devout; and as we should judge, sincere, and even severe in their religious observances. They "marry and are given in marriage;" but what will be regarded as most extraordinary, they are practical Malthusians when the economy of their organization demands it. We have been told, that when they contemplated emigration to this country, in view of their then condition, and what they must encounter in fixing a new home, they concluded there should be no increase of their population by births, for a given number of years; and the regulation was strictly observed. But a glance at the flocks of "juveniles" in their community now, would be evidence that to "multify and replenish the earth" was a part of their religious creed.

The organization had its rise in Germany, on the banks of the Rhine, and has existed nearly an hundred years. They have an elective board of Governors, or elders—thirty in number—upon whom devolves all the legislation of the community; but they appoint a single executive officer, upon whom devolves the entire superintendence of their varied enterprises. In addition to their other enterprises, they are becoming large money lenders. We know little of the details of the internal policy of these very successful and flourishing communists, beyond the fact that it is entirely voluntary; a member of the community is at any time at liberty to withdraw from it, and to draw out of the common funds all he has contributed, and its proportionate increase.

Our readers who are familiar with their Bibles—as we are to presume they all are—will readily infer what is the scriptural derivation of the name "Ebenezers."

Indian Life.

Nothing dashes so effectually one's romantic notions of Indian life as the details of it, seen in the tent or wigwam—the total absence of those minor proprieties which we cannot separate from any tolerable condition of existence. The Indian seems not to have a trace of the bump of order—every thing within the poetic wigwam is awry or in confusion. It is smoky, in cool weather at least; the ashes lie about the centre; the earthern floor is cold or damp; the pappooses sprawl and squall about the ground; the dogs snarl and fight in the corners; utensils, blankets, weapons, lie any where or every where, certain (we had supposed civilized) vermin infest every thing, carrying undisputed sway by day as well as by night, to the terror of civilized visitors. The Indian dogs are almost as numerous as the Indians themselves, and a more heinous, wolfish, rascally race of brutes, you never saw. They are long, lank, scrawny, cowardly-looking creatures, out of whom the hard romance of Indian life seems to have extinguished the last aspiration of even a dog's sentimentality. They appear starved and chopfallen, and consciously mean for being found here out of the bounds of civilization. And poor brutes! they have a hard enough fate of it; there are no superfluous amounts of offal from the Indian tables for them, except occasionally after a successful hunt, and they are literally meagre and ravenous for food. Why is it that the lowest canine breeds, the most misshapen curs, congregate so abundantly about the lowest conditions of human life? Did you ever know a drunken Irishman's home, whether in cellar or garret, to be without one? Our low suburban negro houses around most of the Northern cities, are often little more than kennels for them. And here in the far-off primeval woods, the same meagre, miserable looking cur abounds and starves among the Indian wigwams. Our camp was alive with them; there was a sort of Indian beadle or sexton, whose chief duty it was to keep them off from the seats of the congregation in time of public service; at every interval in the sounds of worship, by night or by day, their wolfish concerts could be heard ringing through the forests, and when a well-picked bone (for they get none other) happened to be thrown by an Indian to one of them, it turned a large section of the camp into a canine battle ground, and set the woods resounding with howl.

Cleanliness is almost an unknown idea among Indians, except in the most thoroughly reclaimed Christian families. My friend F., who had known them for years, insisted in the outset upon our taking some hard provisions with us, affirming that it would not be possible to stomach their cookery, if we should happen to need it. We had hardly walked around the camp once before the propriety of his suggestion became irrefragible, and the next morning, when the squaws, nearly every one of them with a pappoose on her back, marched in procession around the camp to take leave of us, we had full demonstration of Indian notions of cleanliness. Among all the children there might have been three or four whose faces seemed to have been washed and their heads combed within the last week, but others eyed us from the backs of their mothers with unsopbisticated aboriginal faces and heads. Some of the little heroes seemed literally painted dirt; and as the march began, we were admonished by an experienced friend to shake hands with a stout glove on and a well-extended arm. [National Magazine.

An Eccentric Will.

Mr. Railing, of New Hampshire, (Eng.) was among the victims of the last railroad accident between Brighton and London. His heirs, after having paid him the customary funeral honors, did what all heirs do in similar cases, opened the will of the deceased, to ascertain what share each was to have in his posthumous liberalities. As he had never given a penny to either of his relatives, during his lifetime, they expected to be the richer, now that he was no more. One may imagine the surprise caused by the first line of the will:

"This is my testament. I give and bequeath all my goods, present or future, movable or immovable, in England or on the Continent, to that railroad company on whose road I have had the happiness to meet with death, that blessed deliverance from my terrestrial prison."

Further on, the testator gives his reasons for his bequest. The idea had taken firm possession of his mind, that he was destined to die a violent death, and the most desirable one in his view was that caused by the explosion of a locomotive. He traveled, therefore, constantly on the railroads in England, Belgium, and France. There was not a station where he was not known. All the conductors were familiar with his peculiar costume. He had narrowly escaped death several times. Once he was shut up in a car under water, another time he was in the next car to the one that was shattered, and he described with the greatest enthusiasm those terrible accidents, when he saw death so near, without being able to obtain it. Disappointed in Europe he went to the United States. He made frequent excursions on the Ohio, the Mississippi, the Ontario, the Niagara, but notwithstanding their frequent explosions, he returned with a whole skin. He was destined to be crushed under a car of the mother country. It is said that the relatives will attempt to break the will on the ground of insanity, but it is probable that the railroad will win the suit in spite of the proverb that the murderer never inherits from his victim.

Anecdote.—A collector of Church-rates in England called upon a Quaker who kept a dry goods store, for the usual sum; the latter said, "Friend, is it right that I should pay, when I never attend the Established church?" "The church is open to all," answered the collector, "and you might have attended if you had a mind to." The Quaker paid the money, and on the next day sent the collector a bill for broadcloth. The man came immediately, and, in a great passion, asked the meaning of it, declaring that he never had a single article from his store. "Oh!" said the Quaker, rubbing his hands, "the store was open for thee, and thou mightest have had the cloth if thou hadst a mind."

From the New England Farmer.

The Song of the Farmer.

BY THE "PEASANT BARD."

Give to the lord his palace grand,
And halls of splendid pride;
A fig for all his dignities,
And all his pomp beside!
Give me the Farmer's peaceful home,
Beneath the maples high,
Where Nature's warblers wake the song,
The waters prattling nigh.

The citizen may love the town,
And Fashion's gaudy show;
The brilliant pageanty of Art
May please the eye, I know;
But Nature's charms delihgt the heart,
All simple though they be;
The acres broad, the streamy vales,
The lowing herds for me!

What though the bronze is on our cheek,
Toil-calloused is our hand,
With honest pride we stand erect,
The nobles of the land;
For "patriot Truth," that spirit bright,
In this wide world so rare,
Points proudly to the Farmer's home,
And cries—My own are there!

CHORUS.

Then here's to him who tills the soil,
The true, the strong, the brave!
Without him Art would fly the land;
And Commerce leave the wave;
And yet no frown of hauteur cold
Distains his manly brow;
Hail to the Farmer! thrice all hail!
Lord of the mighty plough!

Cows and their Milk.

Though addressed to the farmers of the Green Mountain region, the following remarks from the Vermont Watchman are worthy the attention of the dairymen in other meridians—wherever the production of rich milk, and good butter and cheese, are prominent objects:—

"No part of the business of a farmer requires more skill and attention than the dairy. If judiciously managed, it is profitable. If badly managed, it is worse than useless. To obtain the best cows for the dairy, subject the milk to the test of comparison, one with the other. Keep those which give the most and the richest milk for breeders and the dairy, and sell the rest to the drover or the butcher. It is not so much the amount of milk a cow gives per day, as the cream her milk produces, which constitutes her value as a milker.

Having thus ascertained the best cows, the next consideration is the keeping they are to receive. Much, very much, depends on this. It is unreasonable to expect from the very best of cows either butter, or cheese, or beef, to any valuable extent, if fed merely on dry hay in winter, or kept in a poor and sour pasture in the summer. Roots of various kinds should be raised in abundance by every dairyman who hopes to profit by his vocation, and the food of cows should be varied in the winter, from week to week; kept clean and warm, and enjoy fresh air every day in the week, Sundays not excepted. It has been found by experiment, that a cow fed on grass, in a good and sweet pasture, (hill pastures are the best) will yield a greater quantity of milk than if fed upon any other food. We have thoroughly tried the experiment, and have no doubt of the fact.

There is nothing like a clean Green Mountain pasture, free from brakes and filthy and sour weeds, upon the hill sides, to fill a milk-pail or a churn; and in the winter, for the same purpose, there is no better food than sweet meadow and mountain hay, and the stocks of corn; and for roots, the carrot, rùtabaga, mangel wurzel, the turnip and sugar beet. Try this course of feeding, try it faithfully, brother farmers, and our word for it. you will have good cows, abundance of rich milk, good butter, and fat cheese, provided you do not skim the milk of which the latter is made.

And now a little about milk. Let us talk the matter over. Milk obtained from cows in the morning is generally richer than that obtained in the evening, and usually less in quantity. It is equally true that some pasture grounds are much better than others for the production of rich milk. Examine the kind of grass, and the nature of the soil in the pasture producing the best milk, and stock other pastures, of a similar soil, with the same kind of grass. The subject of sweet pastures or good grazing grounds has not received that attention which its importance demands."

Scottish Harvest Scenes.

A large quantity of the wheat is now down, and everywhere the fields are filled with laborers plying the sickle or binding the sheaves. It is a most animating sight. Where the field is large, and the grain heavy, the proprietor engages a large number of hands, to be ready on a fair day to enter the field. I have seen from fifty to a hundred engaged at one time. It is said that a hundred are sometimes seen at work in a single field. They are men and maidens. The women are as expert with the sickle as the men. Their wages are less; but it appeared to me, as I looked on, that their work was not any less than the men's. When first I saw women at work in the fields, as I did every where on the Continent, I felt, as an American naturally would feel, a mingled pity and disgust. But it is wonderful how soon such things cease to affect us. Here, in Scotland, it actually has come to look picturesque and agreeable. The women—especially the young women—seem to enter into it as a sort of frolic. They form quite an item in the tableaux. They wield the sickle with dexterity and gracefulness. I have seen a woman in a shop bargaining for one of these instruments, and examining its edge and remarking upon it with all the nice discrimination of an experienced reaper. I have seen it upon her shoulders, as she marched to or from the field; I have seen it flash in her hand as the corn fell before it, while, with a graceful movement of the arm, she caught the falling grain and laid it in its proper place. The men with their red caps, and the women with neat white plaided ones, move together, and before them rapidly disappears the standing corn, whilst behind them another group, in close pursuit, gather and bind the falling stalks. The older women have a sort of loose, short gown and cap, rendering their movements easy and unembarrassed; whilst the lasses indulge in something more fanciful, as a white or brown flat on the head, and the dress fitted to the form, and neatly tucked up, so as to keep out of their way the otherwise too flowing skirt.

All look contented and happy. The bright eye flashes from under the freckled brow, the joyous laugh is heard, and the whole scene is one of pleasurable excitement. Good spirits, good appetites, good temper, and good health, are all attendant on this rustic and social occupation. There is no ennui known upon these "bonnie lassies." There is no dyspepsia, no spinal complaints, no nervousness, no low spirits. It is true they have a somewhat bronzed complexion, a hand not the most delicate, a foot cased in rather rough leather. Their waists are not very small, nor have they a mincing gait. [Traveler.

"Cut loose again, Mister."

A friend of ours, who is a most accomplished salesman, and who is kept very busy in one of the up-town dry goods houses, was complimented, not long since, in manner and form as follows, to wit:—

He had a countryman in the store, and was showing him a very handsome piece of ladies' dress goods, not with any hope of selling it; still there was some slight chance, and besides, it is necessary, so our friend avers, to keep constantly in practice. So he dashed ahead in fine style—praised the richness of the pattern, extolled the texture of the fabric, held it up to a favorable light, vouched for its ultra fashionableness, and, in short, let loose a torrent of eloquence, in which it was difficult to distinguish which was the most flattered, the taste of the admiring rustic, or the quality of the magnificent *mousseline.* Bumpkin's eye flashed with gratified pride at the complimentary allusion to himself, and concealed astonishment at the development of beauty in the goods, and fluency in the salesman. Catching our friend by the arm, he exclaimed, "Stop right here one minute!" and dashed out of the store with two or three rapid bounds. Grodenap stood still, a little bothered, holding the bolt of goods across both hands, just as though he had frozen in the attitude in which he had so thoroughly impressed the rural gentleman. Meanwhile this last mentioned individual whisked two bouncing girls out of a carryall which stood in front of the store, and half pushing, half pulling them, brought them up in front of him of the fluent tongue: "Gals, stand there—right there, Sally; and now, Mister, *cut loose again! I just want the girls to hear you!*"

It is almost needless to say, in view of the peculiarity of the circumstances, that our friend was utterly overwhelmed with his emotions, and for once in his life failed in his utterance—to the great disappointment of both father and daughters.

Cisterns.

Look well to your cistern. To any one who has examined the contents of a cistern, it is evident that the water and dirt at the bottom often have a strong stench in them, while the water in the upper part of it is comparatively sweet and pure. This is owing to the animal matter that settles to the bottom, forming a mass of putrid carrion.

In all rain, river, and sea water, there are immense numbers of animals so small as to be invisible to the naked eye. Infuse a little pepper into it, to give activity to them, and then place it under a microscope, and it will be alive with animals. They are called *infusoria.* They are short-lived, and from their immense numbers, often form one-fourth of the rich mud at the mouths of our rivers.

So with the mud in the bottom of our cisterns. It is caused, principally, by the deposit of this animal matter, and undergoes decomposition, putridity, and produces stench, the same as any other animal matter. Unless it is cleansed out at least once a year, the water becomes the essence of carrion. To say nothing of the unpleasant smell, its use, undoubtedly, is often the cause of sickness and death. [Ohio Farmer.

Results of Artificial Fish-Breeding.—A correspondent of the Barnstable (Mass.) *Patriot* gives the following account of an early, and we presume the first, experiment in artificial fish breeding in this country: The tautog, we understand, was not originally found in Massachusetts bay, but was introduced about the year 1798. The skipper of a well-boat from Narraganset bay tried his luck on the Baston market with a boat filled with tautog. The voyage proved unsuccessful—Boston people having no acquaintance with these fish, would not buy, much to the chagrin of our adventurer. The circumstances becoming known among the merchants frequenting the Massachusetts Fire and Marine Insurance office, they, at the suggestion of either the late Crowell Hatch or Benj. Bussey, Esq., raised a purse of money for the skipper, and had all the fish let loose above Charles River ridge. Since that time they have gradually increased from so small a parcel as to now stock our coast wherever appropriate food can be found. It is well known, that our smacks or well-boats ply to New York filled with lobsters, and return empty of fish. If these boats could be induced to pass through Narraganset bay on their return, and fill up with scuppaugs and rock or black bass, we would soon have an abundance of these beautiful and delicious fish on our shores and the Vineyard Sound at this season. Both kinds of these fish are plenty and cheap on Narraganset bay.

Farms and Farmers.—Farms occupy two-thirds of the land of England. The number of the farms is 225,318; the average size is 111 acres. Two-thirds of the farms are under that size, but there are 771 of above 1000 acres. The large holdings abound in the south-eastern and eastern counties; the small farms in the north. There are 2000 English farmers holding nearly 2,000,000 acres; and there are 97,000 English farmers not holding more. There are 40,650 farmers who employ five laborers each; 16,501 have ten or more, and employ together 311,707 laborers; 170 farmers have about 60 laborers each, and together employ 17,000.

It has been calculated there are not fewer than eight thousand dwelling-houses in Manchester, England, without tanants at the present time, a larger number than was ever known before. It is accounted for by the high price of provisions and want of employment, having induced many families of the working classes either to go into lodgings, or to live two families in one house.

Gov. Slade arrived in Albany recently, accompanied by twenty-five young women on their way to the Far-West as teachers, under the patronage of the Educational Society. They are apportioned to Mississippi, Arkansas, Indiana, Illinois, etc. The Society has sent out over 400 teachers, some having gone to Oregon, California, and Texas.

The aggregate of the appropriations of the last Congress is $67,545,000.

Ayer's Cherry Pectoral.

"Wisdom shall bow down to it, and the great of the earth, shall kneel before it."

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La., April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

G. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.

Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists everywhere.

Election Notice.

STATE OF NEW YORK—Secretary's Office, Albany, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

Sheriff's Office, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

The Sabbath Recorder.
PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

Rates of Advertising.

For a square of 16 lines or less—one insertion, $ 75
" " " each subsequent insertion, 50
" " " six months, 6 00
" " " one year, 10 00
For each additional square, two-thirds the above rate.

DISINGENUOUS DISPUTATION.

"Pulchrum est accusari ab accusandis."

From a considerable experience of free intercourse with all classes of society, affording ample facilities to estimate literary tastes and habits, and as an Editor of a paper devoted to the advancement of Education and Science, more than twenty years since, I have become perfectly convinced, that metaphysical disquisitions, and abstruse hypotheses in science and theology, are, generally, very unpalatable and unprofitable subjects to most of the readers of a hebdomadal print, and are mostly laid aside without perusal, by the great majority of its patrons. Persons who relish such reading, and desire to prosecute such inquiries, seek for them in the Quarterly Reviews, or in special Treatises; and being fully certified of that fact, I should never think of entering, voluntarily, upon an extended "*argument*" to advance or refute any system of Science, Philosophy, or Theology, in a weekly newspaper. Isolated portions, or principles, may be discussed in some faint degree, or to some slight extent, and a mere smattering be given to the general reader—a kind of one-sided view—but the true merits, or demerits, of a Science, cannot be discussed, satisfactorily, through such a restricted medium.

So perfectly convinced am I of the correctness of this position, I restricted myself in my article on *Stultifying the Scriptures*, to the one idea of the damage done to that precious Word of Truth, by the *follies* perpetrated by the professed friends of Revelation, in their futile attempts to make it harmonize with the "*geological fact*" of modern times; without pretending to designate the scope of all its mooted points, or refute, by extended "argument," the sophistry by which many of those fanciful theories—*reveries*—are pertinaciously maintained; for most of them are "*assumed*," and, therefore, do not call for "arguments" to overthrow them. It would be a Quixotic undertaking. I disclaimed all such purpose, on that occasion, and distinctly announced, that I should restrict my remarks to exposing the fallacy and the danger of tampering with *geological speculations*—to take a mere *glance at a few glaring absurdities*, which ingulf the faith, or at least the consistency, of Believers in Revelation, by making void the Word of God, when led into the bogs of Infidelity, and left there to be overwhelmed by their *folly*. I confined myself to that one proposition, without rambling into any other, or every thing else; and treated in a manner that such *follies* deserve when they become *presumptuous*, not with "arguments," but with the *lash of satire*; on the scriptural principle: "Answer a fool according to his folly, lest he be wise in his own conceit." I took what I regarded the shortest and most effectual way of knocking that conceit out of the abettors of like follies. Satire, it is true, is a hazardous undertaking, but sometimes the masses have more difficulty to comprehend that style, than the writer has to pen it, and for want of that understanding, blunder egregiously in their reading of it. Notwithstanding a writer of that class may be misunderstood, to some extent, still it is oft-times perfectly legitimate, and constitutes the most efficient weapon, "to shoot at folly as it flies.' I am happy, however, to find some who do not make such clumsy readings of it, and feel no discomfort, whatever, at one writer designating the same passage, "sarcastic severity," that another, disingenuously, denominates "a clumsy attempt at paraphrase," and denounces as "misrepresentation"—"baseless assumptions."

Having anticipated the ire of blind devotees to the "geological fact," I designed to let my original article speak for itself, and maintain an imperturbable silence to their disingenuous imputations; and had I not felt called upon to respond to the *compliment* to spend "a few weeks in traversing the geological formations of Central and Northern New York," I do not suppose, nay, I am confident, I should not have penned another line on the subject; but having done so, and being placed in a false position by "D. E. Maxson," I feel myself constrained to add a few more remarks, to refute a breach of propriety—not to call it absolute calumniation; and not wishing to appear again in this kind of unamiable contest, have waited, patiently, until all the fume and froth of sensitive Would-be-Geologists should evaporate, as the Brewer patiently waits the flow of foam and yeast from his beer barrels, to see whether there be any thing left behind after the completion of the process of fermentation. I have waited, patiently, but to little purpose, for those great efforts have turned out much like Sambo's expression, when he exclaimed: "More noise dan wool, as the debil said, when he whar sheerin' hogs." Yet, the reader has had a good specimen of a tempest in a tea-pot. Touch a tea-pot, or a cat's tail, after that, good reader, and I shall commend your courage—emblazon it in an epic. I had the temerity to tread on the tail of a geological cat across the ocean, and lo! that tail was long enough to reach to this distant hemisphere, and raise such a caterwauling as is seldom performed over the types of a religious newspaper. It danced through some sympathetic medium—some kind of *hocus pocus presto change* wires, to the *itching ears* and *scratching nails* on this side of the great waters, and pell mell they fell on the unlucky wight who had the misfortune to stumble, so clumsily, on so loved a pet. However, like all galled gladiators who have been made to wince, they spit their spite, and have left unnoticed the real points at issue.

Not being in the habit of fighting the air, and making battle with wind-mills, or entering special pleadings to *false issues*, and much less to torture language "to make the weaker *argument* appear the better reason," I pass by most of the disingenuous *imputations* and personal *innuendos*, made by those who bandy words to display their obsequious devotion to a mistaken cause, and shall make allusion to but a few disingenuous flings, to cover their weak position.

The second Would-be-geological Gladiator, who made a pounce on my article, *Stultifying the Scriptures*—"D. E. Maxson"—commences with reading a lecture to "superficial philosophers", on "science and religion," in which he proves, beyond contradiction, that he knows very little of true religion, or true science; for he assumes, that "scientific truth is religious truth." Just about as much "religious truth" as benevolence is Christianity, as has been "assumed" by moralists. Christianity certainly is benevolence; while the converse is a perfect absurdity, or the veriest Infidel would have to be classed among Believers. So religious truth is scientific truth; but it is the greatest arrogance to presume that scientific truth is equally sacred. What may be scientific truth to day, may be error to-morrow. Hundreds of instances of the turnings and overturnings of "scientific truth" might be adduced, but they would lead me into the *Difficulties of Geology*, and occupy too much space. O, spare the Bible such a slander. Mutability is stamped upon every hypothesis of man call it scientific or religious. The history of Science is the history of changes. When the writer first studied Chemistry, nearly forty years ago, we [illegible] dreamed of; at present we have, at least, *fifty-four*. Could the four be religious truth? and can the fifty-four, now, be religious truth? O, spare the Bible such a slander.

In extenuation of this "clumsy attempt" to identify scientific truth with religious truth, "D. E. Maxson" contends, that "if it be urged, that scientific men often put forth contradictory hypotheses, and are therefore to be regarded with distrust, it may be urged, that theologians often put forth contradictory *interpretations* of the revealed Word, and hence, by parity of reasoning, their interpretations are to be regarded with distrust." Certainly so, when they leave the simple teachings of the ungarbled testimony of God. Two wrongs never make a right. Both are to be condemned; but the more condemned, where both are united in one person, to distort Truth in the "conceits of men." Where both are united in one person, that individual becomes the greater engine for evil. They are those who, in the caustic language of Voltaire, "put themselves, without ceremony, in the place of God, and destroy and renew the world after their own fashion." Such a homily might do to send to the Japanese; but proves a most jejune, if not an audacious pretension, to persons who have been advocating *true science*, and commending the connection between Science and Religion, for more than a quarter of a century.

Are such blind devotees the proper persons to determine "scientific truth," which must be regarded as "religious truth?" A Daniel, yea, a second Daniel, has come to judgment. I blush for a Christian who can utter such a folly. One of the profoundest scientific sages of the present century, Professor Hare, of the University of Pennsylvania—at this day Emeritus Professor of Chemistry in that Institution—who undertook to unravel "spirit rappings" and "table tippings," on scientific principles, has, with all his science, (and no one in the land is his superior,) come to the conclusion, that it is accomplished by a *spiritual* influence; and within a few weeks, has, openly, declared himself a believer in the spiritual science. Does such "scientific truth" make spirit mongery "religious truth?" Dr. Hare is no bungler—his scientific acquirements are attested by the enlightened of all the nations of the earth. He has been my intimate, my warm, my valued friend, for upwards of thirty years, but I must exclaim: "Lord, preserve me from such scientific truth."

Next, the same Would-be geological Gladiator accuses the writer with "misrepresentations" and "baseless assumptions;" and it is to meet these gratuitous accusations, which induces me to take my pen in hand, on this occasion, to refute that deliberate libel. I was so careful to give the writers, whom I criticized, the most impartial and ungarbled representation, that I did not attempt to epitomize their views myself, but took them from their admirer, Hugh Miller, the great expounder of the great "geological fact"—the most prominent man of the present era in that department of human knowledge, who would be the last person to *misrepresent* his whilom friends. That "Buncome" *libel* might be deemed sufficiently refuted by the accuser quoting the very words I introduced, and probably from my own excerpt, as may be seen by comparing them; only that "D. E. Maxson" garbled the "extract" as given from Hugh Miller, and disingenuously withheld part, which makes against him, and fully justifies my criticism. Pulchrum est accusari ab accusandis. But lest that blunder should be evident to the most careless reader, "D. E. Maxson" declaims on my "clumsy attempt at paraphrase." *Paraphrase!* I never dreamed of attempting a paraphrase. "D. E. Maxson" better go to school again, and learn the meaning of paraphrase. Not any thing but wanton obtuseness, or blear-eyed malignity, could possibly come to such a perverted conclusion. I simply made allusion to the prominent points—the startling points—without repeating all the absurdities, or amplifying the language, presuming that my readers had gumption enough to apprehend the allusion as once set forth. If "D. E. Maxson's" tremor has subsided, and he will rub his purblind eyes, he may see that he has made a most bungling reading, if not a willful perversion of the passage, for which any school boy would deserve a good spanking.

"D. E. Maxson" afterward assails the medical profession, to screen the audacity of geologists. I did not pretend to hold *geology* responsible for a sentiment expressed by Hugh Miller, and exercise the whole tribe for that honest avowal of the ultimate tendency of the great "*fact*," but endeavored to show, that geological speculations, when allowed to run riot, unquestionably tend to such a result; neither would I defend any "M. D." for an infidel "iniquity." A writer of the greatest qualifications to form a true estimate, and one of unbounded impartiality—one who has given decidedly the most rational phase of the question regarding the harmony of the Bible with the Geology of modern times, the learned and excellent Dr. Wiseman, (D. D., not "M. D.") now a Cardinal, shall be the umpire to determine on the comparative merits of the two professions, theology and medicine, respecting their influence to promote and establish the connection between Science and Religion; which cannot fail to drive into nothingness all the fretted soap-water bubbles of my assailant:—"Of all sciences, (says Dr. Wiseman,) none has been more given up to the devices of man's heart and imagination, than *geology*; none has afforded ampler scope for *ideal theories*, and brittle, though brilliant, systems, *constructed* for the most *conflicting purposes*." And in another place, the same writer says, "This would seem to conduct us into the department of *medicine*; and, however strange it may appear to you, it is through this study that I mean to lead you into the natural sciences. You will probably ask, what light the progress of medicine can throw upon the truths of religion. Not much, perhaps, if we consider it an aggregate of principles, varying in different schools, as a succession of theories most conflicting, and not often referred to any illustration of sacred doctrines. But in particular cases, in the examination of individual facts, where science has been first invoked by the adversaries of Revelation, a fuller and more learned discussion, based exclusively on scientific principles, has done the work of confutation much more effectually, and much more satisfactorily, than mere theology could have done it."* *So much for Buckingham!* Pulchrum est accusari ab accusandis. I repeat, I did not make "geology" responsible for the follies of Christian geologists, when pandering to those incongruities in their vain attempts to harmonize the Mosaic narrative with the "geological fact" which has brought forth such miserable abortions, and such ridiculous monstrosities. What "arguments" were needed to expose the *folly*, if not the blasphemy, of representing the Lord as having, in the first act of the first day's work recorded in Genesis, *started* creation, and left it for secondary causes to effect what His fiat might have accomplished in a single natural day—yea, in a single moment, for "undefined ages" to work out by a natural process, until it should become the scene of light and life, and then play off the trick of blotting out, making void, temporarily extinguishing, all that the secondary causes had effected, during the extended period—thousands or millions of years—to play off the farce of pretending to evoke all from nothing, or from chaos, in six natural days. After all the fuss and self-glorification, assumed by "D. E. Maxson," I can safely leave my original article to the common sense of the readers of the *Recorder*, as my best vindication. I had no desire, for the sake of argument, to go over ground drowned by other writers, and appear to produce them myself, nor to reduplicate "arguments," where no argument is needed. Wherein would be the propriety of meeting by "arguments" the follies of Dr. Chalmers and Dr. Pye Smith, which "D. E. Maxson," himself, says, "have never been adopted by geologists, in general," and "any popular work on geology will present a more satisfactory refutation." Hey! A little too fast!

"Little Dicky was too quicky
He tumbled over the timber;
He bent his bow to shoot a *crow*,
But kill'd the *cat* in the winder."

To meet all the endless absurdities by "argument" would occupy the whole page of the *Recorder* for months, without any equivalent to the reader, who cares little for hair-splitting *distortions*. It may suffice to state, that to give a thorough sifting of the different "schemes" designed to invalidate the integrity of the Scriptures, I should have to deal, not with *three* great absurdities, but with *scores* of them; for nearly fifty years ago the French Institute enumerated *eighty* theories hostile to Revealed Truth; many of which have been laid aside, and others are being revised—vamped over, and woven, anew, into flimsy tissues with the "geological fact." A jumble of some of these, incorporating the main features of modern geology, may be found in a work presumptuously styled: "*The Philosophy of Creation*;" purporting to be a revelation from the shade of "Thomas Paine, through the hand of Horatio G. Wood, medium"—a miserable concoction—a bare-faced imposition on the good sense of the community; yet, a good deal more specious and better sustained by "arguments" than many of the recent attempts at "religious truth," because assumed to be "scientific truth." One is about as much "religious truth" as the other, for they are, generally, predicated, with slight variations, on the received "geological fact," or at least endorse it, in the main, that "religious truth." The amount of that blasphemous "Philosophy" is:

> "God is a creature of *idea*, and a being of whom no one has a very exalted or satisfactory knowledge; for the idea that there is a being, who created and presides over the grand economy of Nature, is fast disappearing from among you; and soon will the world be willing to listen to the voice of Reason, and believe that God is not a being, but a principle. . . . God is not a person, but a principle, the all-animating principle of all things. . . God is nought but a principle, and that too of necessity. He can exist, does exist, but cannot, by any possibility, cease to exist. He is an innate quality of and principle in matter. . . . Deity is generally regarded as the author of all matter, but instead of that, he is a principle of matter. It is said in Holy Writ, as it is called, that no man has ever seen God, nor ever will. This is well said, and for the support of that book was necessarily said. God is eternal, ever has and ever will exist; but he is no more eternal than matter, for both are eternal as they are coëxistent. . . It is claimed, that in six days God created the heavens and the earth, and upon the seventh rested; but let me say, without any irreverence for Deity, that if he did create the earth in six days, he needed to rest upon the seventh. But the question is, did he create it in six days? I answer, No. Data, independent of any I shall bring forth to substantiate this proposition, gathered by men of science in the flesh—data, too, that no man sees fit to deny—plainly show, that matter originally existed in a liquid state, and that it remained in this state for millions of years. And, too, that the planet Earth for millions of years existed, before it was prepared for the reception of animal or vegetable life. Not because it did not contain within itself the elements necessary to produce and support it, but because those elements had not been reduced to the proper condition necessary to generate and support life. Each different state or condition of matter has possessed its different powers to generate and sustain life, and hence, in various ages and periods of the Earth's existence, different species of animal and vegetable life have existed. Fossil remains of animals and vegetables, at this day found in various portions of your Globe, in different formations, show plainly, that no less than seven times has the whole course and kind of life, both animal and vegetable, been changed; and, *too*, that these changes have been millions of years in being effected. Now, the fact is here, either Science or the Bible is false. Which will you accredit? Science is based on well-known data. The Bible is entirely, wholly, in this instance, based upon imagination. It is the mere creature of a 'wild and sickly fancy.'"

Is such "scientific truth," for it is regarded as "scientific truth" by some scientific men, and is unquestionably german to the present "geological fact," and blinks quite sufficiently to Hugh Miller's pantheism, "religious truth?" "Who is the Infidel, and who the Judas, now?" Pulchrum est accusari ab accusandis. Does it need any arguments to confute so vile a blasphemy, "assumed" to be vomited forth from the spirit-land, by the shade of one who could not be believed while on earth. "If they will not believe though one be sent from the dead." It would be too great an absurdity to meet it with "arguments"—it is too contemptible for satire.

My crime, in the eyes of pseudo-Christian geologists, unquestionably is, that I told too much truth, in too blunt language. I "cried aloud and spared not." I exposed in too astounding phrases the glaring absurdities of those who had tampered with geological speculations, until it precipitated them into a vortex of execrable follies, and in not mystifying those glaring follies by confusing "arguments." Doubtless rather than see them exhibited in their naked deformity, and scourged with appropriate *satire*, the obsequious followers of the "geological fact" would have rejoiced to see them smothered beneath the rubbage of metaphysical contradictions, that they might ensnare some proposition in their wily net, and thereby throw dust into the eyes of the unsuspecting. To the humble Christian—the soul not puffed up with vain science—the integrity of the Word of God is everything; it is the very periapt of his spiritual existence. Frittering away any part of it, by a scientific phase, must entail inevitable disgrace, and and pave the way for its eventual overthrow. To discuss the claims of the subject under consideration with "arguments," to afford any satisfactory appreciation of its importance, would require an endless investigation for the columns of a weekly newspaper. To determine the bases of the "formations" of the globe, we should have to discuss the claims of the plutonian or vulcanian theory, attributing all the products of the crust of the globe, or, perhaps, the whole globe, to igneous fusion, which is supported by Buffon, Halton, Playfair, Hall, Flurian de Bellevue, and others; then the neptunian theory, ascribing all the products of the globe to aqueous dissolution and crystalization—supported by Saussure, De Luc, Werner, &c.; and the third, introduced by the ancients, revived by Anaximenes, and advocated by M. de la Merthrie, and others, who attribute the formation of the earth, or at least the earth's crusts, to aëriform substances—"d'air et d'infini"—air and infinity. All this would be a necessary preliminary. These, all, have been discussed, by "arguments" to any extent, yet, not any one of them has been determined, and there is not the least probability that they ever will, save by assumption; because the process was a miracle, and does not pertain to the dominion of Natural Science or Metaphysics. It has, even, not yet been determined, although confidently "assumed," on either side of the question, whether the original "chaotic ocean" was a primitive "chaotic period," as the advocates for the aqueous geology maintain, or an "amorpaous paste," which the "igneous geologists" advocate. Besides these extended examinations, to give the reader any fair opportunity to appreciate the different theories named, it would become necessary to pen a few chapters on Chemistry and Meteorology, &c. From the difficulties which surround this subject, in a *scientific* point, on every side, and must continue to surround it forever, unless we cut the knot without untying it, it would be a waste of time to discuss it, and crowd the sheet, week after week, without approximating any nearer than we are at present by presumptuous assumptions.

In this predicament, it would be far better for purblind philosophers, and especially for Christian geologists, to fall back on the unerring word of Truth, and recognize the Mosaic account. Newton, one of the wisest and best of sages, correctly says: "It seems probable to me, that God, in the beginning, formed nature in solid masses, hard, impenetrable, movable particles, of such sizes and figures, and with all other properties, and in such proportions to space, as conduced to the end for which He formed them. All material things seem to have been composed of the hard and solid particles above mentioned, variously associated in the first creation, by the counsels of an Intelligent Agent. For it became Him who created them to set them in order; and if He did so, it is unphilosophical to seek any other origin of this world, or to pretend that it might rise out of a chaos by the mere laws of Nature; though, being once formed, it may continue by those laws for many ages." I shall only add, that Newton, a giant among pigmies, approximates nearer to a rational solution of all the "assumptions" than any other "scientific truth."

If any other "arguments" are needed, let those itching spirits take the true points of my article, on *Stultifying the Scriptures*, and controvert the legitimate points. There are several distinct propositions in that article, for "arguments," without raising false issues, and descending to disingenuous imputations.

1st. I have said, that Creation is a *miracle*, and that *Natural Science* is not competent to fathom or controvert a *miracle*. Buckle to, gentlemen, and try to establish, 1st, That Creation is not a *miracle*; 2d, That *Natural Science* is competent to fathom and controvert a miracle. Don't flinch—don't quibble. Unless you can establish both, the discussion would become an endless and a fruitless undertaking; for the matter in point would remain the same forever.

2d. I have shown, in the language of Hugh Miller, which need not be reduplicated, in what Dr. Chalmers' *scheme*, to reconcile the Mosaic account of the Creation, consists. Buckle to, gentlemen, and prove by "arguments," that after God had created the earth, or the matter of the earth, and the "secondary causes" in operation for "indefinite ages," "lengthened periods," had perfected the "creation," so that our planet had enjoyed light, and been the residence of life, yet "become void," and the source of light be "temporarily extinguished," God reproduced all again in the course of five days—save the creation of the sixth day. If you can show that by "arguments," and do no damage to the Scriptural account, I will acknowledge, frankly, that you are better at "argufying" than I am.

3d. I have shown, in the language of Hugh Miller, that Dr. Pye Smith has limited the Mosaic account of the six days' creation, or, perhaps, the sixth day's creation, to a "few provinces in Central Asia," enveloped in light and darkness, outside of which limited, [illegible] to, gentlemen, and prove by "arguments," that God had created the whole earth, complete, save "the existence of the sixth-day's creation," and while darkness and confusion, out of which that creation was evoked, was of but "limited extent," and outside its area, and during its existence, "many of our present lands and seas may have enjoyed the light of the sun, and been tenanted by animals, and occupied by plants, the descendants of which continue to exist," He, the Lord, played off the sham creation, as recorded by Moses. At it, gentlemen, at it, and prove, by "arguments," that such was the case; and I will acknowledge that you can make "the weaker argument appear the better reason." Buckle to it, gentlemen. Be valiant as you are in empty words and disingenuous imputations; drop your pettifogging recriminations, and work out a "scientific truth" from these propositions; which I criticized freely, but not misrepresented, that they may at least approximate to "religious truth," and I shall be the first to cry, Encore! encore!

Such "schemes," however, and ten thousand such "schemes," can never benefit *religion* a particle. They may do much damage to religious truth, but never benefit true science, if "scientific truth" is "religious truth." Creation, I reiterate, is a *miracle*, and Natural Science is not competent to fathom or controvert it. If not a miracle, but a *natural process*—the operation of secondary causes—the Bible is not responsible for the manner in which it was accomplished, and might stand aloof, or be withdrawn entirely from the controversy, and suffer no damage by such a course, for it does not profess to be a *Manual of Physics*; but if a *miracle*, it stands pledged for that *verity*, and Natural Science, in meddling with it, goes entirely beyond its province. If a *miracle*, it becomes a matter of faith, to which every Believer in the Bible ought, most certainly, cry Amen! Making it a mooted question, by clumsy attempts to harmonize the "two records"—the Mosaic and the Geological—the pseudo Christian geologists are responsible for their gross blunders, in pandering to a *vain science*, which must eventually uptrip them, and great will be their fall.

I repeat, that I do not "discard" legitimate geological *investigations*, while I repudiate *vague surmises* and *glaring assumptions*. The theologico-geology, which has to change its phase with every advance of the vaunted "geological fact," scientifically determined, is a poor "religious truth" to rely upon. The geology that triumphed over infidelity, was the geology that ascribed all the difficulties between the "two records" to the Deluge; and it was satisfactory. It was religious truth scientifically determined. Infidels grew bolder, and chicken-hearted theologico-geologists yielded to their preposterous assumptions. Dr. Chalmers formed a new scheme in 1814; but the scheme of Dr. Chalmers in 1839 was found no longer adequate to harmonize with the progress of geological development; and the "scheme" of Dr. Pye Smith was concocted to supply that demand; and, *now*, 1854, Hugh Miller boldly proclaims the necessity of another concession to geological discovery, which demands a *new* scheme of reconciliation. If the former scheme of reconciliation was scientific truth, what became of its religious truth in 1814? If the "scheme" of Dr. Chalmers was scientific truth in 1814, what became of its religious truth in 1839? And if the "scheme" of Dr. Pye Smith was scientific truth in 1839, what has become of its "religious truth" now, when Hugh Miller demands another "scheme?" Can scientific truth command any respect with such shifting policy, such instability? Can such "scientific truth" be religious truth? The suggestion of Hugh Miller is to go back to the old unqualified demand of length of days—"undefined periods"—an exploded scheme—which is all that Infidels ask, to gain all the rest of their designs, in stabbing, vitally, the whole Scriptural narrative; knowing full well, that that must eventually demolish all the claims of the Bible to credibility. Infidels chuckle and laugh in their sleeves, while the deluded Christian geologist runs off with that rope, satisfied that, very soon, they must prove their own executioners. Whether the proof is for or against the scriptural days being natural days, or indefinite periods, (and it certainly would require something better and more conclusive than "D. E. Maxson's" second essay, to establish it in the mind of the most superficial reader,) it has not anything to do with the follies of Dr. Chalmers' and Dr. Pye Smith's "schemes." We do not gain anything for the dignity of the Scriptures by torturing the period of each Mosaic day into "indefinite ages," but lose greatly thereby, in invalidating our confidence in the integrity of the Sacred Record. Adopting the "scheme" of God having simply created the crude matter, and then leaving it to *secondary causes* to work out the rest, through "indefinite ages," robs God, if not entirely of his prerogative to create and destroy, but of the most soul-elevating emotions which can inspire the human breast, from the contemplation of His stupendous work, by *the word of his power*. Throwing God out of the immediate province of fathering every particle, by his personal presence and might, detracts infinitely from the meed of homage due to his creative energy, and casts a barren sadness over the handiwork of the Most High. It smites the beauties of Nature with a sickening void, while the assurance that the whole creation, all and every individual form, has come, distinctively, from the plastic hand of the Great Jehovah, elevates our hearts in votive ascriptions to Him "*who* spake the word, and they were made: *who* commanded, and they were created." Granville Penn pertinently remarks:—

> "The briefness of the clause, (Gen. 1: 9,) and the nature of the subject, have caused it to be little contemplated in proportion to its importance, and to the fullness of the instruction it conveys; and therefore it has not been observed, that the same sublimity which is universally perceived in the clause, 'Let there be light, and there was light,' subsists equally in the clause, 'Let the waters be gathered together into one place, and let the dry land be seen, and it was so.' [illegible] of sublimity in the instantaneous transition of the universe from the profoundest darkness to the most splendid *brightness*, at the command of God. But the nature of the change which must necessarily have taken place, in suddenly rendering visible a part of a solid continuous globe, whose universal surface was overflowed and concealed by a flood of waters, is not so familiarly and so instantly apprehended. Hence, both commentators and geologists have equally failed to draw the immediate and necessary inference from the revelation of that great and undeniable geological fact."*

The Mosaic account affords us all those sublime and soul-inspiring emotions, which are utterly sunk and destroyed in the natural process of "indefinite periods." Aside from vouchers for the truth of the "two records," how incomparable is the inherent claim for the Mosaic narrative to the soul-blighting dearth of the mineral geology.

Were it possible for Geologists ever to establish their "fact" by absolute demonstration, as the Copernican system has been apparently established, I might ponder and hesitate in my ardor for the literal interpretation of the introduction to the Sacred Record, "incidentally" declaring the history of the creation; but such, in the nature of things, can never be the fact—it must ever remain an hypothesis, a vague, unsatisfactory hypothesis—the *consummation* devoutly wished for by Infidels, and the terror of the humble Believer. Should they approximate to any thing beyond vague surmises, I should, still, have to be satisfied on one point, pretty much overlooked or kept in the dark by advocates of the Mineral Geology, in reference to the "lengthened days," indefinite ages to each day. What, I should demand, are the evenings and the mornings of those "lengthened days?" Each day of creation, whether a day of twenty-four hours, six thousand, or a million of years, must have had its "evening" and its "morning." What were those evenings and mornings, and how distinguished, without stultifying the Scriptures? They must point out those distinct evenings, and those distinct mornings, or they completely stultify their own assumptions. Buckle to, gentlemen, and show, clearly and distinctly, the evening and the morning of each day of "lengthened periods," without more glaring assumptions, and we may better comprehend the *indefinite* length of "lengthened days." Buckle to, gentlemen; be valiant in your facts and "arguments," as you are in frivolous assumptions.

If I have manifested some earnestness in repelling the follies of pseudo-Christian geologists, and in refuting the disingenuous imputations of their silly abettors, it must be ascribed to my profound conviction, after much diligent research into the subject, of the evils with which such follies are fraught, and to my zeal for the unmutilated Word of God; whose integrity I deem the sole foundation and superstructure of the way of life, and our only hope for the reality of Revelation. If we have license to spirit away the least part of its teachings, we may go on and spirit away one portion after another, until we have scarcely a shred left to connect its shattered fragments, and speedily must we witness the entire destruction of the whole fabric of Revealed Truth. Could I bring myself to disconnect the plain cosmogony of the Bible, and embrace the visions "assumed" by geologists, I could soon learn to disregard it altogether. It is my only safeguard against infidelity—against blighting infidelity.

Should it be surprising, then, that I contend, in so momentous a matter, with some affection, when I see a lever forced underneath the Rock of Ages, with whose disruption I lose all my hopes of eternal life. No! never! I can bear the loss of everything else in this world, but the precious Word of eternal Truth. Spare, O, spare the Bible, from infidel *distortions*. Spare, O, spare the Anchor of my salvation, from insidious, chilling, blighting infidelity. Could I elect my own mode of approaching the portals of Heaven, it would be in the attitude of an humble but *confiding* Believer, clasping the unmutilated Word of God to my heart with one hand, and clinging to the Cross of Christ with the other. Destroy the integrity of that "*sure testimony*," or shatter that blood-stained Cross, and I sink to interminable woe, a poor, sad, wretched, smitten Infidel. W. M. F.

CHRISTIAN PSALMODY.

It is the opinion of some, that the portion of Scripture called the Book of Psalms was designed to be a manual of praise for the Church of God in all ages, and that it is wrong to use any other. Of course, those who hold this opinion do not contend, that the Psalms ought to be sung, always, in the Hebrew language. They admit the propriety of translating them, so that all who sing praises may do so in their own vernacular. They admit, therefore, since only the original Hebrew can claim to be inspired, that the words of our songs may vary from the exact words of inspiration, so far as it is necessary to enable us to "sing praises with understanding." (Ps. 47: 7.) It must be understood, however, that they admit no other variation from the inspired Hebrew, except such as necessarily belongs to a translation; and they are rigid in the doctrine, that the words employed in praising God should be only those which are recorded in the Scripture.

Since, then, the Psalms must be translated, it becomes an important question how, or in what manner, this must be done, so as to fit them for Christian worship. And we think it will readily be conceded, that they must be translated in a different manner from what is necessary to prepare them merely for reading. Otherwise, no other style of music could be employed in our churches but *chanting*, or else every psalm must be set through to music, [illegible] deprive the greatest part of every congregation from the privilege of joining in the praises of God, and this part of divine worship would, therefore, have to be given up wholly to trained choirs. Certainly, it will not be pretended, that this would be in accordance with the simplicity of the gospel.

It hence follows, that such management in the translation is called for as will adapt the Psalms to a style of singing within reach of the great majority. Those who contend that they were designed as a Psalter for the Christian Church to use in singing, do not scruple, therefore, to advocate a *metrical* translation; that is, one in which every psalm is arranged in lines, each line consisting of a certain number of syllables, called feet—this being the only way in which the whole book can be accommodated to the very few tunes which are attainable by the great mass of every Christian assembly. It is not a mere matter of taste, therefore, that the old Scotch version of Rouse, rather than the plain translation of King James, is adopted by the advocates of this opinion as their Psalm-book; for to the use of it, or something of the same nature, they are driven by the necessity of the case.

Now, since a metrical version of the Psalms is the only kind which is suited to the capacity of Christians generally, the next inquiry of importance is, whether it is possible to provide such a one, without varying from the words of inspiration to such an extent as to render it [illegible]ent for the advocates of the opinion referred to in the beginning of this article to use it. We believe that it is not; and in support of our belief, we refer to the numerous instances in which the Scotch version exhibits this variation. For we take for granted that, were it possible to produce a metrical version which would be at the same time an exact translation of the inspired text, the zeal which prompted the Scotch version would have accomplished it. Or if this version has been, in the opinion of those who have always used it, a failure in this respect, something better would have been got up, long before this. The Scotch version, however, continues to hold its popularity; and its use, to the exclusion of all the books of psalmody current among Christians generally, is advocated on the ground that it is sinful to praise God in anything else but the words of His own inspiration. It may safely be averred, therefore, that the Scotch version is as nearly an exact rendering of the original as it is possible for any metrical version to be.

But let us see if this boasted version does not, after all, embody the very principle, which is made the ground of objection to the current hymnology of Christendom. A few quotations, taken at random from different parts of the work, will set the matter in its true light.

The first shall be from the 75th Psalm, 8th verse, which in the common translation reads thus: "*For in the hand of the Lord there is a cup, and the wine is red; it is full of mixture, and he poureth out of the same: but the dregs thereof, all the wicked of the earth shall wring them out, and drink them.*"

The Scotch version is as follows:—

"For in the hand of God most high
Of red wine is a cup:
'Tis full of mixture, he pours forth,
And makes the wicked all
Wring out the bitter dregs thereof;
Yea, and they drink them shall."

The reader will observe, that in the fifth line the adjective "bitter" is made to qualify "dregs." But what authority does the text furnish for the introduction of this qualifying adjunct? None at all. It is a mere expedient to make out the needed number of feet for the line. And though we usually connect the idea of bitterness with the word dregs, it is not necessarily involved. We mean, simply, that which subsides to the bottom of the vessel—the sediment, or feculent matter, which remains after the pure wine has been drawn off; it may be bitter, or it may be simply foul, nasty, or tasteless.

Again, 103d Psalm, 12th verse: "*As far as the east is from the west, so far hath he removed our transgressions from us.*"

Scotch version:—

"As far as east is distant from
The west, so far hath he
From us removed, in his love,
All our iniquity."

The expression "in his love" is not in the inspired text. True, the removal of our transgressions from us is the effect of God's love; it cannot be the effect of his anger, nor of indifference. Still, the Holy Spirit did not see fit to use the expression, in this instance, and why should we presume to do so, if it be wrong to praise God in any thing but the words of inspiration?

Psalm 27th, 4th verse: "*To behold the beauty of the Lord, and to inquire in his temple.*"

Scotch version:—

"That I the beauty of the Lord
Behold may, and admire,
And that I in his holy place
May rev'rently inquire."

Unquestionably, a good man, beholding the beauty of the Lord, *admires* the same; but where do we find any such idea in the original text? This, therefore, is another expletive by way of filling out the meter.

Psalm 110th, 5th verse: "*The Lord at thy right hand shall strike through kings in the day of his wrath.*"

Scotch version:—

"The glorious and mighty Lord,
That sits at thy right hand,
Shall, in his day of wrath, strike through
Kings, that do him withstand."

That the Lord is "glorious" and "mighty," will be disputed by nobody. Neither will it be disputed, that striking through kings in the day of His wrath will be a striking exhibition of both glory and might. But if it be wrong to make the matter of our praise anything else but inspired language, why are the terms employed here? So also of the phrase "that do him withstand," in the last line; why is it employed, since it is not in the text?

Psalm 105th, 6th verse: "*O ye seed of Abraham his servant, ye children of Jacob his chosen.*"

Observe, that Abraham is designated simply as "his servant," without any adjective, or qualifying term, to show what kind of a servant he was, whether faithful, or wicked and slothful. An obvious inference supplies the deficiency, it is true, and the history of Abraham, as recorded in another part of the Scripture, removes every vestige of doubt. But the Scotch version, not content to leave it just as it is in the text, or rather necessitated by regard to the meter, throws in a qualifying expression, and renders the verse as follows:

"O ye that are of Ab'ram's race,
His servant well approven;
And ye that Jacob's children are,
Whom he chose for his own."

Psalm 41: 1: "*Blessed is he that considereth the poor: the Lord will deliver him in time of trouble.*"

No doubt, it is the part of true wisdom to extend relief to the poor. But the text itself says nothing about the wisdom of the thing; it simply sets forth the duty, and pronounces a blessing upon the man who performs it. But to make the meter good, the Scotch version slips in the term "wisely."

"Blessed is he that wisely doth
The poor man's case consider;
For when the time of trouble is,
The Lord will him deliver."

In the 5th Psalm, 3d verse, the Scotch version throws in a whole line by way of expletive:

"Lord, thou shalt early hear my voice;
I early will direct
My prayer to thee; and, looking up
An answer will expect."

We are far from thinking that this expletive line makes any alteration of the meaning; for, no doubt, the Psalmist did expect an answer to his prayer, and, for that very reason, "looked up" to God, from whom the answer was to come. But the inspired text reads simply thus: "*In the morning will I direct my prayer unto thee, and will look up.*"

Psalm 143: 4: "*Therefore is my spirit overwhelmed within me; my heart within me is desolate.*"

In the Scotch version, thus:—

"My sp'rit is therefore overwhelmed
In me perplexedly;
Within me is my very heart
Amazed wonderously."

The introduction of the word "perplexedly," and the substitution of "amazed wonderously" for the simple term "desolate," furnish additional proof of the inability of the Scotch version to carry out the principle upon which it professes to be based.

We might go on to multiply quotations, but these are sufficient to show, that a metrical version of the Psalms, such as is adapted to the worship of Christian assemblies generally, necessarily admits the principle of departing somewhat from the words of inspiration. But as we intend to resume the subject, we forbear farther remarks at present.

T. B. B.

The True Uses of Government.—Macaulay sums up the argument against "Jewish disabilities," as they exist in England and other parts of the world, in the following manner:—

"It is because men are not in the habit of considering what the end of Government is, that Jewish disabilities have been suffered to exist so long. We hear of essentially Protestant Governments and essentially Christian Governments, words which mean just as much as essentially Protestant cookery or essentially Christian horsemanship. Government exists for the purpose of keeping the peace, for the purpose of compelling us to settle our disputes by arbitration, instead of settling them by blows, for the purpose of compelling us to supply our wants by industry, instead of supplying them by rapine. This is the only operation for which the machinery of Government is peculiarly adapted—the only operation which wise Governments ever present to themselves as their chief object. If there is any class of people who are not interested, or who do not think themselves interested, in the security of property, and the maintenance of order, that class ought to have no share of the powers which exist for the purpose of securing property and maintaining order. But why a man should be less fit for the exercise of those powers because he does not eat ham, because he goes to the synagogue on Saturdays, instead of going to church on Sundays, we cannot conceive."

BUSINESS FOR SABBATH-KEEPERS.

DeRuyter, Oct. 18, 1854.

To the Editors of the Sabbath Recorder:

I herewith transmit a copy of the Articles of Confederation of DeRuyter Manufacturing Company, thinking that some of your readers might be interested to know that an effort is here being made to accommodate Sabbath-keeping mechanics with profitable employment, in an establishment where they may, if they choose, be proprietors as well as operators.

We have for a long time felt that something should be done to remove the temptations of some, and the annoyance of others, who attempt to maintain their Sabbath, surrounded by opposing interests and Sunday influences. Parental hearts have often been pained to see their sons exposed to the jeers of opposers, while nobly stemming the popular tide, or, what is more sad, many have seen those sons carried away by that tide to join the hosts of those who disregard God's sabbatic law. Our churches have had many of their hopes blasted by the turning away of those who had run well for a season; and many, *very many*, been borne from us before the principles of truth and love have taken deep, saving root, in their hearts; and the evil goes on. It is of no avail to follow them with reproof, and say they were fickle or worldly-minded, or to fret and scold, and charge them with trifling with God and their own consciences. Our loss is not made up in this way, nor are they restored and saved. The Saviour taught the prayer, "lead us not into temptation," which involves the idea that we should avoid every avenue to temptation. Hence it seems to me that one of the first duties of our societies is to guard their lambs, by furnishing to all facilities for observing the Sabbath, where the doors of prosperity are as widely open to them as to others.

We invite capitalists to join us in this enterprise, by taking stock in this company; also parents, who wish to locate their sons where they may learn or practice a trade in an unmixed Sabbath-keeping establishment. Young mechanics, with little or no capital to invest, can take stock and pay in their labor. Mechanics wishing to educate their families would here be in convenient proximity to our Sabbath-keeping Institute. Investments may be made in four semi-annual payments, commencing Jan. 1st, 1855. Persons proposing to invest, or wishing further information, may address J. B. Wells, Secretary, at DeRuyter, Madison County, New York.

James R. Irish.

Articles of Confederation of DeRuyter Manufacturing Company.

We whose names are hereunto set, desirous of promoting good society, and aware that *industry and thrift* are necessary to its perfection, with special reference to this object, and with the hope of advancing our mutual and individual interests, do form ourselves into a Stock Company, under the name of DeRuyter Manufacturing Company, primarily for the purpose of manufacturing Agricultural Implements, and such other articles of use as may be deemed profitable to manufacture in connection therewith, and also to carry on any trade, commerce, or occupation, which may be deemed expedient by this Company.

To perfect the foregoing object, we adopt the following

Constitution.

Article 1. The name of this body, or association, shall be, *DeRuyter Manufacturing Company*, under which name it shall do its business.

Art. 2. This Company shall do its business, and have its chief office of account and record, in DeRuyter village.

Art. 3. The capital stock of this Company shall be at least *ten thousand dollars*, which may be increased, by the vote or act of the Company, to any sum not exceeding one hundred thousand dollars, said stock to be divided into shares of fifty dollars each.

Art. 4. The officers of this Company shall be a President, a Vice-President, a Secretary, a Treasurer, and three Directors, who together shall constitute a Board of Trustees to transact the business of the Company, said officers to be elected annually by the stockholders.

Art. 5. It shall be a fundamental rule of this Company, that no business shall be transacted in the name of the firm, nor shall any shop, store or wareroom, be open for business, or any transaction inconsistent with the sacredness of the Sabbath, on the seventh day of the week, usually called Saturday, nor shall this Company be a party in any firm so carrying on business on said seventh day, and every shop, store, or wareroom, occupied by said Company, shall be closed at or before the setting of the sun on the sixth day of the week.

Art. 6. No alteration of the fifth article of this Constitution shall ever be made during the existence of this Company.

Art. 7. Any article of this Constitution, except the fifth and sixth, may be altered, amended, or annulled, at any regular or special meeting, by an *unanimous* vote of the stockholders present or voting by proxy, provided a definite notice of the proposed alteration be given according to law one month previous to said meeting; and the whole Constitution may be annulled, and the Company dissolved, by a *majority* vote, to take effect on the first day of January in the year of our Lord one thousand eight hundred and sixty-five, (1865,) said vote to be taken at any regular or special meeting, previous notice of the same having been duly given.

"CONFLICT OF AGES."

Such is the title of a book written by Rev. Edward Beecher. The title seems most appropriate to the subject of which it treats; for no one can read the book without having his sympathies excited for those mental and moral conflicts which are there brought to view—the descriptions there given of that mighty struggle in which the human mind has been engaged for ages in endeavoring to reconcile the various systems of theology with reason and common sense; for men have framed systems of religion and theology, so antagonistic to the intuitive perceptions of reason and of conscience, as to have well-nigh crushed some of the strongest intellects ever made. Still, man would subject his reason to a blind faith, as though the interest of universal being depended on the triumph of the former over the latter. And how could it be otherwise? The human soul instinctively cries out for a God—the living God. And although, by reason of its own self-perversion, it gropes, yet it feels after God. But when the Divine Being is made to assume a character repugnant to the very instincts which himself implanted in the human soul, the understanding, the reason, yea, the very conscience, turns from it with disgust; for these instinctive, intuitive perceptions of the soul, are deep, permanent, sacred. Says the "Conflict of Ages":—

"There have been, and still are, those who think so much more of the verbal revelations of God, than of any other, that they almost overlook the fact that the foundations of all possible knowledge have been laid by God in the consciousness and the intuitive perceptions of the mind itself. Forgetful of this fact, they have often, by unfounded interpre[illegible] done violence to the [illegible] mind, and overruled the decisions made by God himself through it, and then sought shelter in faith and mystery."

The above enunciation of one of the great first truths of man's universal consciousness, the author of the "Conflict" sustains by copious references to names highly distinguished in the theological world, some few extracts, of which I will quote.

Says *Dr. Alexander*: That God, as a moral governor, has implanted the elements of his law into our very constitution.

Prof. Hodge: "When they (Gentiles) practice any of the virtues, or perform any moral acts, these acts are evidence of a moral sense; they show that the Gentiles have a rule of right and wrong, and a feeling of obligation. It is neither by instruction nor example, but by their own innate sense of right and wrong, that they are directed."

Prof. Stuart: Although a heathen man has no Scripture, yet he has an internal revelation inscribed on his heart, which is a rule of life to him, and which, if perfectly obeyed, would confer justification on him, as well and as truly as entire obedience to the written law would confer on you (Christians.) Those commit a great mistake who deny that men can have any sense of moral duty or obligation, without a knowledge of the Scriptures. The great principles of moral duty are deeply impressed on our moral nature, and co-exist with it, even when it is unenlightened by special revelation."

Dr. Chalmers: "There do exist, in the remotest tracks of paganism, such vestiges of light as, when collected together, form a code and directory of moral conduct. There are still to be found among them the fragments of a law, which they never follow but with an approving conscience, and never violate but with the check of an opposing remonstrance."

Melancthon: "Wherefore, our decision is this, that those precepts which learned men have committed to writing, transcribing them from the common reason and common feeling of human nature, are to be accounted as not less divine than those contained in the tables given to Moses; and that it could not be the intention of our Maker to supersede, by a law graven on stone, that which is written by his own finger on the table of the heart."

Tholuck: "By the law written on the heart, Paul meant the conscience—that which constitutes the bond of relationship between man and God, and which discovers itself as a sense of what is just and good."

Calvin: "Since all nations are spontaneously inclined to enact laws for themselves, it is too clear to be doubted, that there are certain conceptions of justice and right which exist by nature in the minds of men."

Barnes, on Rom. 2: 15, says: "By nature every man approves or condemns his own acts; and there is not a profounder principle of the divine administration, than thus compelling every man to pronounce on the moral character of his own conduct—become his own executioner."

Adam Clarke, on the same: "It does not follow, that because one people are favored with a divine revelation, that therefore they shall be saved, while the others, who have not had that revelation, shall finally perish; this is not God's proceedure."

William Penn: "The corner stone of our fabric is the Light Within, as God's gift for man's salvation. This is Emanuel, or God with us, and this admits not any book or judge to come between this voice of God in the soul as its rule of faith and practice."

Conflict of Ages: "The intuitive convictions of the minds of created beings, as to honor and dishonor, right and wrong, are the most important in the universe. They are the voice of God himself in the soul. On them, all just views of God depend. On them as a basis his universal and eternal government must ever rest. Shake them, and you shake the very foundation of his kingdom."

The above are a few of the many outbursting sentiments of universal consciousness of the universality of the intuitive, instinctive perceptions of right and wrong implanted in the human soul; and yet a conflict, terrible as the crushing of humanity, has been waged, in order to harmonize with this law of our nature the shibboleths of creeds and a false theology.

S. S. Griswold.

THE CHINESE WAR.

The Boston *Traveler* is furnished with an extract from a private letter just received from Dr. Parker, the Missionary Surgeon of Canton, which will be read with interest. The letter is dated Canton, July 18, 1854, and reads as follows:—

"China is at present the theater of civil war and revolution, and within the last fortnight all their horrors have been exhibited very near to us. On the 6th of July, Fiehshon, a town 10 or 12 miles west of Canton, embracing nearly a million of people, fell into the power of the insurgents, and the imperialists have endeavored in vain to recapture it. The smoke by day and fire by night, of burning villages, have been visible from my terrace. On the 13th inst. the first blood was shed on the north of this city, a few miles distant, if we except that spilt by the sword of the executioner, the number of decapitations daily averaging 50 or 60, and for the last ten years 50,000! To-day there has been a second battle in this vicinity—68 insurgents taken prisoners, and 100 slain.

"Day before yesterday the insurgents were victorious and 300 imperialists were killed. It is said some of the captives to-day were brought in on poles, their hands and feet being tied like pigs; others were brought in on the points of sharp bamboos; some have their ears cut off; others are ham-strung. The panic in the city, as the gates were closed during these skirmishes, and the flight of women and children, it is difficult to portray; and from hour to hour we know not what may become the condition of foreigners. But most fortunately, at present there is a naval force—British and American—able to protect us against any *mob*. Alas, for China. It would seem the declaration, that the nations that will not serve God shall be destroyed, is about to be fulfilled. Our only consolation is, the Lord reigneth!"

"SWEAR NOT."

Swearing, or oath-taking before a civil magistrate, is not generally regarded as violative of the teachings of Christ. It seems to me that at least it is time the question was raised, for the purpose of ascertaining the truth upon that point. For one, I am inclined to the opinion, that judicial oaths and affirmations are forbidden the Christian. Desirous, however, of further light, I propose the following questions, which I should be glad to have elucidated in the *Recorder*:—

1. Does Christianity forbid its disciples the taking of an oath before the civil magistrate?

2. What is the difference between swearing, or oath-taking, and what is termed affirmation?

S. S. Griswold.

Protestant Chapel at Rome.—The New York *Observer* states that Rev. E. D. G. Prime lately embarked for Rome to take charge of the American Protestant Chapel in that city, which is connected with the American Legation, Mr. Cass being the Minister Resident, and says:—

"This chapel has been sustained for some years by the American and Foreign Christian Union, and has been the means of great usefulness and enjoyment to our countrymen who visit the 'Eternal City.' During the last winter and spring, the chapel was sometimes so crowded that people were obliged to go away for want of room. As the British Government has no diplomatic relations with the Pope, the English are not allowed to have a chapel within the walls, and of consequence the American chapel is the only place in the city where the Gospel can be heard in the English language. Nor could this boon be enjoyed, were it not for the noble and praiseworthy stand maintained by Mr. Cass, who has the right to a chaplain in his own house, and who has fitted up within his walls, and under the protectorate of the American flag, a large and handsome apartment, with seats for about 200 persons, and here divine service is enjoyed twice on every Sunday. As the services are altogether in the English language, it is not expected that the preaching of the truth can have any direct influence upon the Roman Catholic people of the city, but it is of great importance and interest, that in the very seat and center of the Romish power, a standard should be held up, and the doctrines of the cross fearlessly proclaimed."

Our "Native Land."—Rev. Dr. Waterbury, of Boston, on the Sunday after his late return from Europe, said to his congregation, as reported in the *Traveler*:—

"After all that had been seen and enjoyed in foreign lands, he came back to his native country with a deeper conviction than ever before experienced, of the general superiority of our own institutions for the full development of the intellectual and moral character of men. He came back, too, with a deeper conviction than ever of the importance of a spiritual religion—one that moves the heart and improves the life—one based on the simple truths of God's word, open to all, read and studied by all—in distinction from a religion of forms and ceremonies, lifeless and fruitless. And, in conclusion, he urged with much earnestness upon his hearers, that the attainment of a good hope through grace—the possession of that which would prepare them to meet death, in any of its varied forms, with calmness and hopefulness—to lie down and sleep peacefully under the green sods of their native land, or to encounter it suddenly, as multitudes had of late been compelled to do, amidst the terrors of the ocean—should be the grand object of life."

The Students at Harvard College.—The Boston *Transcript* says that the undergraduates at Harvard University are by the rules obliged to attend church on Sunday, and if the parents or guardians do not wish them to attend services at the College Chapel, they state where they wish the student to worship, and the college funds pay for the rent of the seats occupied by those who worship at the Cambridge churches. In accordance with this arrangement, the following payments have been made to the several religious societies in Old Cambridge for the present academic year, 1854:—Baptist Society, $52; Unitarian Society, $70; Episcopal Society, $135; Orthodox Society, $183 20; total, $440 20.

Cost of Public Worship.—It is estimated (says the *Transcript*) that the current expenses of the churches of Boston will amount to $240,000 a year. The value of the church estates is about $4,000,000. The expenses of the different societies vary from $1,500 to $5,500 a year. The cost of public worship in the churches occupied by the wealthier portion of the citizens will average about $100 a Sunday. The clergyman has a salary of $3,000, the music costs about $1,000, and the miscellaneous expenses will be from $1,000 to $1,500 a year. The taxes on the pews vary from $8 to $70 a year, according to their value. The Methodist preachers have the smallest average salaries, and the Unitarians the largest. The Protestant sects have ample pew accommodations for their worshipers, but the Catholics greatly need a large edifice at the West End. They are now erecting spacious churches in the South Cove and at the south part of Tremont-st. North of the line of State, Court and Cambridge-sts., the Catholics have not more than one-half room enough for members of their faith. About twenty sects have places of worship in the city, and the figures given above will show that no compulsion is needed to insure a liberal support for public worship from the community.

Prohibition in Pennsylvania.—The Legislature of Pennsylvania last year refused to pass a Prohibitory Liquor Law, but determined to submit the question to a direct vote of the people. That vote has just been taken, and shows that of the 300,000 voters a majority by about 3,000 are opposed to prohibition. One county, however—Berks—gave a majority of about 8,000 against prohibition, while in a large majority of the counties the vote was in favor of it. One of our exchanges sums up as follows the results of this contest favorable to Prohibition:—

1. A large majority of the Counties;
2. A majority of both Senate and Assembly Districts, showing that the power of the State is in the hands of the Prohibitionists;
3. A Governor pledged and ready to sign a Prohibitory Law;
4. A majority for Prohibition in Philadelphia, Pittsburgh, and nearly or quite every other city,—that is, in all the centers whence intelligence and influence are radiated;
5. A majority in nearly every County whose inhabitants are mainly of British descent, and can be addressed in the language of the country.

The World as it is: or, a miniature Sketch of the Earth and its Inhabitants. For Families and Schools. By Francis C. Woodworth, author of "Uncle Frank's Home Stories," "Theodore Thinker's Tales," "Stories about Animals," &c. Philadelphia: Lippincott, Grambo, & Co. pp. 212.

We have received the first two of a series of twelve volumes, intended to give a condensed sketch of all the most important sections of the globe; embracing a glance at the most notable features in the history of each nation respectively, a geographical account of it, the products of its soil, its curiosities of nature and art, its manufacturing and agricultural interests, the government of its inhabitants, with their peculiar manners, customs, and characteristics. Each volume of the work is to contain about 200 pages, and be complete in itself. The whole series will make a condensed geography and history of the world. For the preparation of such a work, adapted especially to youth, and interesting to all, Mr. Woodworth is happily qualified.

Education among the Free-will Baptists.—At the recent Anniversaries of the New Hampshire Baptists, Rev. H. Whitcher, the Freewill Baptist delegate, gave some account of the benevolent operations of the denomination which he represented, and stated, among other things, that they have recently secured $20,000 as a permanent fund for the endowment of their Educational Institution at New Hampton.

RELIGIOUS INTELLIGENCE.

The Boston *Journal* is informed that a large edition of the Italian New Testament, of at least 30,000 copies, is to be published in Italy, under the superintendence of Dr. G. Achilli, as soon as funds for the purpose can be procured. Letters lately received from Italy show the great need of such an edition, and pledge the aid of responsible parties to circulate the books. The work to be printed will be a second edition of the new Italian translation of the New Testament made by Dr. Achilli from the original Greek, and published by the American Bible Union.

The Washington *Star* states that there has been going on for some time in several of the Methodist Episcopal churches, and perhaps all of them, in Washington, an extraordinary revival of religion. The number of converts is said to be unusually large for such meetings. Though the ladies predominate among the converts, there are many of the sterner sex who yield to the eloquent appeals of the ministers, and some who went "to scoff, remain to pray." According to all accounts, there has never been so great a revival as this before in Washington.

Rev. J. S. Dennard, missionary of the Southern Baptist Board at Yaruba, coast of Africa, died on the 18th of June last. Mr. D. had been for several months upon his field, and it was fondly hoped that he had become so far acclimated that he might very soon engage in active service. He was seized, however, with a severe fever on the 7th of June, from which he rallied, but on the 17th, he was prostrated with a relapse, and expired on the following day.

The *Christian Secretary* records the death, by typhoid fever, of Rev. N. Whiting, late pastor of the Baptist church, Greenville, Ct. His age was forty-two years. The last Scripture passage which he quoted was: "Return unto thy rest, O my soul, for the Lord hath dealt bountifully with thee."

The Governor of Pennsylvania has appointed the 30th November, to be observed as a day of Thanksgiving and Praise. Four other States have also fixed on the same day, while two others have selected the 23d of November.

General Intelligence.

European News.

European dates to Oct. 18th are received. They give sad and sickening details of the fighting in the vicinity of Sevastapol. The order of events is thus narrated by a letter-writer:—

The Allies embarked between the 2d and 6th of September at Bourgas, Verna and Baltshik; rendezvoused on the 9th off the Isle of Serpents; lost three days in consulting about the proper place for debarking in the Crimea; landed on the 14th–16th at Old Fort, north of Sevastapol; occupied on the 15th the little town of Eupatoria, at the north; marched on the 19th toward Sevastopol, and encountered the Russians on the 20th on the hights above the river Alma. The plan of the battle was simple. The French had to outflank the left wing of the Russians—the English had to do the same on the right wing. Gen. Bosquet, supported by the allied fleet, succeeded without considerable loss, and carried the village of Alma, threatening the center of the Russian army; but Sir George Brown, on the left wing of the allied armies, could not succeed in outmaneuvering the Russian cavalry with his few dragoons. The plan had therefore to be altered, and Lord Raglan gave orders for an attack in front. The dogged bravery of the English carried the Russian positions, but only with severe losses. Twenty-six officers were killed and seventy-three wounded, whilst the French lost only six officers. The want of cavalry prevented the allies from pursuing the enemy; only two Russian guns were captured, but above six hundred wounded Russian soldiers were found lying on the battle-field, together with more than six thousand knapsacks and muskets. Prince Menchikoff, beaten on the Alma, divided his army into two corps; one marched back to Sevastopol, the other fell back upon Baktshi Serai. On the 24th the allies crossed the Kateba and the hights of Balbeck, and marched toward the small port of Bolaklava, south of Sevastopol, where the fleet would easily disembark the seige artillery, to be carried on the high road toward Sevastopol. On the 28th the little fort of Balaklava surrendered; a *Russian* convoy of ammunition was intercepted, and Field-Marshal St. Arnaud fell ill. On the 29th he died, and Gen. Canrobert succeeded in command. Up to the 4th no serious action had taken place, though Sevastopol was invested.

The French and English Generals have officially notified their Governments, that on September 23, immediately on the reception of the news of the battle of Alma, Menschikoff sunk five of his line-of-battle ships and two frigates in eight or ten fathoms of water, thus completely blocking up the entrance to the harbor of Sevastopol, and preventing the possibility of an attack by sea. These ships were sunk with all their guns and stores on board, and rigging standing.

One of the numerous narratives of the battle of Alma says:—

"The field of battle was crowded on the 21st with officers from the fleet, carrying flasks of brandy and water, visiting the wounded, and giving them all the relief in their power. The doctors from the ships were on shore all night giving medical aid. So many soldiers from each regiment were told off to bury the dead; the Russians were buried outside the mounds; the English and French inside. There was great spoil on the field—coats, dresses, swords, guns, rifles, &c., &c., and in some instances large sums of money. Everybody brought off some memento—either a sword, casque, or musket. The Highland bonnets, I regret to say, formed quite a heap. It appears that a certain class of visitors made a profitable day's work by visiting the field of battle; almost every one 'found' something. One I heard boast that he had picked up nine revolvers and fifty sovereigns; and one, a Maltese, is reported to have realized upwards of £150 in gold. Coats, boots, &c., were all taken off by pillagers, and in many cases the gold lace ripped off the uniforms of the dead."

The special correspondent of the London *Times* writes as follows:—

"It was a terrible and sickening sight to go over the battle-field. Till deprived of my horse by a chance shot, I rode about to ascertain, as far as possible, the loss of our friends, and in doing so I was often brought to a stand-still by the difficulty of getting through the piles of wounded Russians, mingled too often with our own poor soldiers. The hills of Greenwich Park in fair time are not more densely covered with human beings than were the hights of the Alma with dead and dying. On these bloody mounds fell 2,196 English officers and men, and upward of 3,000 Russians, while their western extremity was covered with the bodies of 1,400 gallant Frenchmen and of more than 3,000 of their foes."

Another letter says:—"The battle-field was dreadful to walk over in the evening and following day; the battle ended too late for us to remove even our own wounded that day, and the fearful spectacle of heads blown off, shattered limbs, broken arms, the groans and sighs of the wounded, all together made a scene I never wish to see again."

One letter says that just before his death, Marshall St. Arnaud addressed a farewell to his army, in which he says that, overcome by the cruel disease against which he has so long struggled, he is obliged to resign his command. He pays the highest compliment to his successor, (Canrobert,) who, says the Marshal, "will pursue the victory of the Alma, and will have the good fortune which I had imagined for myself, and which I envy him, that of leading you to Sevastopol."

From China, we hear that Canton continued in a state of seige, and Shanghae was still in the hands of the insurgents.

An Asylum for Inebriates.—Active measures are on foot for the establishment of an Asylum for Inebriates. The object of the projected Institution is to provide for the destitute Inebriate an asylum, where his physical and moral wants will be attended to. Looking upon drunkenness as a disease, the first grand step to be taken is to make the victim of intemperance feel that he is yet a man physically, and for this purpose the institution will be furnished with the best medical aid. The establishment will be self-supporting. In connection with it will be a number of workshops, in which the patients will be employed, after acquiring sufficient strength. The proceeds of their labor are to be disposed, in part, for their own support; and the residue for the maintenance of their families. The workshops will be of sufficient capacity to give employment to one thousand persons. The institution will be situated in New York, but the precise location has not as yet been determined upon. A great reformation is anticipated from this project. At the present time there are from 8,000 to 10,000 habitual inebriates in New York city.

California News.

By the steamers George Law and Star of the West, two weeks later news from California, and $2,000,000 in gold, was received in New York Oct. 27th.

The business and mining news from California is of a cheering character. Trade has greatly revived, the yield of gold is not stinted, and the returns of agriculture are profuse.

The British steamship Peytona had arrived at San Francisco from the Sandwich Islands, being the pioneer of a new line, with a full cargo and 37 passengers; a portion of the latter arrived here by the Star of the West, being the first who ever arrived at this port traveling the entire distance by steam. She brought intelligence of the long missing Arctic ship Enterprise, sent in search of Sir John Franklin.

We have recent intelligence from the northern Russian settlements of the whaling fleet in that region. As a general rule, the fleet has had good luck, in spite of some severe damage.

By this arrival it is announced that a frightful massacre of immigrants by the Indians had taken place on the Plains, and one still more hideous near Fort Boise in Oregon. In the latter, more than a dozen persons fell victims, some of them after the most shocking outrages. In the former it is said that about fifty persons were killed.

Mr. Livingston had come from Caborca by the Tinijalta trail, and learned from some Mexicans that he met, that, during the last two months, some twenty-five Americans had perished for want of water on that route.

Sir John Franklin's Party.

Montreal papers contain some additional details concerning the discovery of Sir John Franklin's party, obtained by Dr. Rae from the Esquimaux. The report is as follows:—

"In the Spring of 1850, a party of white men, amounting to about forty, were seen traveling southward over the ice, and dragging boats with them, by some Esquimaux Indians, who were killing seals on the north shore of King William's Land, which is a large island, named Keliktak, by the Esquimaux. None of the party could speak the native language intelligibly, but by signs the natives were made to understand that their ships had been crushed by ice, and that the whites were now going to where they expected to find deer to shoot. From the appearance of the men, all of whom, except one chief officer, looked thin, they were supposed to be getting short of provisions, and they purchased a seal from the natives. At a later date during the same season, but previous to the disruption of the ice, the bodies of about thirty white persons were discovered on the continent, and five more on an island near it, about a long day's journey, say thirty-five or forty miles, to the north-west of a large stream—which can be no other than Back's Great Fish River, as its description and that of the low shore in the neighborhood of Point Ogle and Montreal Island agree exactly with that of Sir George Back—some of the bodies had been buried, some were in tents under a boat that had been turned over to form a shelter, and several lay scattered about in different directions. Of those found on the island one was supposed to have been an officer, as he had a telescope strapped over his shoulder and his double-barreled gun lay underneath him. From the mutilated state of many of the corpses and the contents of the kettles it is evident that the party had been driven to the last resource, "cannibalism," as a means of prolonging life. There appears to have been an abundant stock of ammunition, as the powder was emptied in a heap on the ground by the natives out of the kegs or cases containing it, and a quantity of ball and shot was found below high water mark, having been left on the ice close to the beach. There must have been a number of watches, telescopes, compasses, guns, &c., all of which appear to have been broken up, as Dr. Rae saw pieces of these different articles with the Esquimaux, together with some silver spoons and forks, as many of which as could be obtained were purchased, and a list of the most important of the relics found, with the drawings of others, were to be forwarded to London."

Dreadful Railroad Accident.

On Sixth-day, Oct. 27th, a sad and fatal collision occurred on the Great Western Railroad, about thirty miles from Detroit, Mich. The westward bound passenger train which left the Niagara Falls Suspension Bridge on Fifth day afternoon, met with several slight interruptions, and so got behind time. A few minutes after 5 o'clock, when near Baptist Creek, the train, which was proceeding at the rate of about 20 miles an hour, came in collision with a gravel train which was backing towards the east at the rate of 10 or 12 miles an hour. The gravel train was composed of 15 cars, heavily loaded with wet gravel. The shock produced by the collision was tremendous. The second class cars were smashed into atoms, and nearly every person in them killed or dreadfully injured. The first first-class car was also badly smashed, and most of the passengers in the front part of it met with the same fate as the passsengers in the second class cars.

The scene presented after the collision was a horrible one. Intermixed with the fragments of the broken cars, dead bodies lay in profusion, many of them mangled in the most dreadful manner; while from out the heap of ruins proceeded the groans and shrieks of the wounded.

The passengers who were so fortunate as to escape uninjured immediately set to work to draw out the wounded and the dead from the heap of ruins in which they lay. At 11 o'clock A. M., the bodies of twenty-five men, eleven women and ten children, had been brought to light, and it was supposed that from ten to twenty others yet remained to be discovered. Twenty-one men and twenty women and children were found to be badly injured—many of them fatally. Several of the dead were crushed out of all human shape, presenting a heart-sickening sight.

The two second-class cars, which bore the main brunt of the collision, were filled with emigrants, mostly Germans. The first first-class car, a number of the inmates of which were killed and others wounded, also contained some emigrants.

The second, third and fourth first-class cars were somewhat injured, and some of the passengers received some injuries, but none, we understand, of a dangerous character.

The latest accounts give the names of forty-seven persons killed by this calamity. It is also stated that twenty-four men, eleven women and sixteen children, are badly wounded, and were taken to Chatham. A large number of the passengers are more or less bruised.

Important Arrests.

The Springfield *Republican* says that for some time past the officers of the Western Railroad have been much annoyed by frequent depredations upon freight in course of transportation on board their trains, and every effort has been made to discover the perpetrators, but all to no purpose, till the arrest of Edwin Bates, the bigamist. He disclosed to Officer Walker the names of several men who had been engaged in these operations. All of them proved to be employés of the road—assistant freight conductors and brakemen. Measures were immediately taken to arrest them, which was successfully accomplished. Three assistant freight conductors and six or seven breakmen were arrested, and about $1,000 worth of stolen goods recovered from their possession. It appears that a regular system of robbery has been carried on by these men, light merchandize of almost every description having been abstracted by them from boxes and packages of freight on the trains upon which they were employed. There was a mutual understanding among them, that no man should take more than he required for his own use, and while most of them adhered to that rule, some of the more avaricious appropriated enough to stock several moderate sized variety stores.

Here is another of the same sort:

An extensive combination of railroad thieves has just been detected at Mad River, Ohio, and six of the members arrested. Their mode of operation was to purloin goods from the freight cars and stations. Among the six arrested were three of one family—a father and his two sons—and all of them were in the service of the Railroad Company whose trains and stations they plundered. The Columbus (Ohio) *Statesman* says that ten or twelve freight conductors on the line between that city and Erie were dismissed last week, for the too frequent habit of constituting themselves silent partners of the company, and declaring dividends without owning stock.

A College Burnt.—We have been permitted, says the Augusta (Ga.) *Sentinel*, to make the following extract from a private letter of a gentleman to a friend in this city:

Marion, Ala., Oct. 16, 1854.

"I am sorry to inform you, in this connection, of a very sad occurrence which took place here on last (Sunday) night, about 12 o'clock—that is, the burning down of 'Howard College.' There were sleeping at the time, in the third and fourth stories of the building, about 26 or 28 young men and two negro men, all of whom were required to jump from 30 to 40 feet, to the ground below. And horrible to tell, 22 of the number were mangled in a frightful manner—some more and some less. I have just come in from a visit to them, with my very heart sick. Some of the boys are burned very badly, in addition to other injuries. Our town is in mourning and looks gloomy enough. I learned, a few moments since, that one of the black men was dead. He rushed down through the flames to the door. Two or three of the boys are expected to die. The rest will probably recover. There is, however, no knowing exactly the extent of their injuries. I trust all things are better than we now think. The College building, with everything in it, is in ruins. Nothing was saved, as I understand. It is supposed now that the building was set on fire, though I cannot at present believe it."

The Price of Potatoes.—The high price at which potatoes are selling in New York, naturally leads to inquiry as to the prospect for the future. The N. Y. *Tribune* has a long article on the subject, which winds up as follows:—

Owing to the breadth of ground late planted—to the drouth and consequent keeping back the growth till late—to the prospect of a very high price, which has kept farmers from sending the crop forward—to the great economy which has been practiced every where in the use of potatoes—to the entire absence of disease—to the late watering and consequent improvement of quality for winter use—to the fact, too, that late turnips are good, sweet and rich, and will supply the place of potatoes in a measure for stock, and also that apples are generally good—owing to all these causes, and some others, we give it as our candid opinion, there will be more potatoes within reach of New York, of a good quality, in sound keeping condition, on the 1st day of December, than we have had before in ten years. If this is the fact, is there any reasonable probability that the combined forces of all that numerous class who buy low of the farmer, and sell high to the consumer, can maintain the present exorbitant high price of this almost indispensable food of the hungry.

An Infernal Machine.—On Sabbath afternoon, Oct. 28th, Earle's Hotel, in Park Row, N. Y., came near being blown to atoms by an infernal machine. It appears that a gentleman, one of the lodgers in the Hotel, who was about taking his departure, went behind the book-keeper's counter for the purpose of selecting his baggage, and while the porter, Peter Moran, was putting out a small valise, a terrific explosion took place, by which the windows were blown out, several partitions demolished, and four persons badly wounded. From fragments which were collected and inspected by the authorities, it appears that in the valise had been deposited a small tin can, containing probably about twelve pounds of powder. In one end was placed the muzzles of a small double-barreled pistol, and it is believed that the whole was so arranged that by moving the valise by its handle, it would cause to take fire some combustible materials lying beside the powder. The absence of everything in the shape of traveling necessaries, in the contents of the valise, clearly proves a diabolical intent.

SUMMARY.

The failure of Mr. E. G. Merrick, of Sackett's Harbor, is announced. He was very largely engaged in the lumber trade in Canada, and also in milling at Oswego, using liberal credits with several of the country Banks in his vicinity. He was President of the Sackett's Harbor Bank, though his involvments, we hear, will not necessarily embarrass the Bank. His present liabilities are estimated at $300,000. The lumber business, in which he was actively interested, is proving a disastrous one this season. The yards at Albany and Troy, as well as in New York, are greatly overstocked.

A Baltimore correspondent of the *National Intelligencer* writes that it is a singular fact, and one important to be generally known, that the oysters of our waters thus far this season have proved markedly deleterious to health. Persons have been taken violently ill after eating them, (raw especially,) with cramp, colic, cholera morbus, &c., and in some cases death has ensued. Crabs, too, have produced similar results. An old and experienced fisherman states that in his judgment oysters and crabs, this season, are unhealthy, possessed of some poisonous substance, and unsafe to be eaten.

The first sale of lands under the present law for the collection of taxes, was held on the 7th of December, 1852, and the two years allowed for redemption will expire December 7, 1854. Non-residents, and others, will do well to attend to this. Up to November 6, the money may be paid at Albany, at the State Treasurer's office. After that only at the office of the County Treasurer, where the land was sold. A neglect to redeem may cause the loss of many a widow and orphan's only inheritance.

The catalogue of steamers lost on the Atlantic this year, numbers some of the best vessels in the world. The following are the names of those running from ports in the United States, which have been destroyed the present year:—San Francisco, from New York for California; City of Glasgow, from Liverpool for Philadelphia; Humboldt and Franklin, from Havre for New York, and the Arctic, from Liverpool for New York.

The dullness of the freighting business is illustrated by the fact mentioned by the *Tribune*, that one of the New York merchants, extensively engaged in the shipping business, has had a first class ship offered to him for a twelve months' voyage, gratis—nothing being required by the owner but a guarantee that the vessel should be returned to him at the expiration of that period in as good condition as when she was taken.

The *Palmer* (Mass.) *Journal* describes the operation of the shingle-riving machine said to have been invented by the spirits, and constructed by A. C. Billings of Palmer. It is a neatly-finished, strongly-built machine, and it walks into the blocks, which are fed in from two iron sides, like a huge giant. It does the work admirably, splitting the blocks into pieces of any thickness desired for shaving. It is said to be capable of riving 35,000 shingles per day.

A shocking affair, by which a man and wife named Smith were sent into eternity, occurred in the Village of New Windsor, about 4 miles from Newburgh, on Saturday night, Oct. 21st. The husband had been for some time in a depressed state of mind, and finally wound up his earthly career by murdering his wife and then taking his own life.

We hear of several deaths of most respectable citizens caused by severe cholera morbus following the taking of oysters. It is very evident that there are oysters in our market that have been too long out of water, or are otherwise poisonous. Better give all oysters a wide berth till cold weather sets in.

A dispatch dated Albany, Tuesday, October 24, 1854, says: In the case of Cyrus H. McCormick vs. Seymour & Morgan, for the infringement of McCormick's patent for a reaping machine, in the Western Circuit Court, the jury have just found a verdict for plaintiff for $7,750.

On Thursday afternoon, Oct. 19, a lawyer named Halstead, son of Capt. Charles Halstead, of Newburg, committed suicide by shooting himself with a pistol. He borrowed the pistol of a friend, for the purpose, as he represented, of shooting cats; but immediately after procuring it he proceeded to his residence, and, locking himself in his room, committed the fearful deed.

The late Roman Catholic Council in New York came to the conclusion that the connection between the church and their self-constituted oracles of the press, should be publicly severed; and that when an organ was to be recognized it should be placed in charge of competent theologians, and confined within strict limits of theology.

A correspondent of the Boston *Chronicle* says that the Massachusetts Arms Company, at Chicopee Falls, are now constructing for the British Government a complete set of machinery for doing gun work. The machines are modeled from those at the arsenal in Springfield.

Mr. P. Smellee, a school teacher from the North, has been compelled to vacate his situation as principal of the public schools at Jackson, Miss., in consequence of a letter, which is said to have been written by him, containing abolition sentiments, having been discovered in the Post Office at that place.

Twenty-seven thousand dollars is the declared cost of catching and sending into Slavery the negro Burns. Fifteen thousand of the sum was paid from the United States Treasury, Oct. 25th. Hail, Columbia! happy land!

Capt. D. Pratt, wife and son, were rescued from his ship, the Pomogosta, which foundered at sea a few weeks ago, and were carried into Liverpool, whence they took passage in the Arctic, and are probably all lost.

The ship Ariosto, Balch, from Sumatra, of and for Boston, with a cargo of pepper, was lost on the 31st of July last, off the east coast of Africa. The officers and crew were all saved.

The influx of immigrants two days of last week was quite extraordinary, being no less than nine thousand three hundred and forty-four.

Dion Bourcicault, in a letter to New York, speaks of the new Boston Theatre as beyond question the finest theatre in the world, as far as the auditorium is concerned.

The Vermont *Chronicle* says that Hon. Geo. P. Marsh addressed the citizens of Burlington on the evening of the 5th Oct., in the Congregational church, upon the American Mission in the Turkish Empire. After giving an interesting description of the religious institutions and character of the Turks, the number and character of the Greeks and Jews, Mr. Marsh gave a very decided testimony in favor of the good influence exerted by our missionaries in Turkey. He thinks that at the close of the war, the Western Powers will insist on an equality of all religious beliefs, and expresses the opinion, that Nicholas was induced to declare war against Turkey in part from his jealousy of the mission.

Mr. James Upton, of Greece, N. Y., an extensive agriculturist, has shipped twenty thousand barrels of apples to New York, by canal, this season, and has now several boats loading with the same fruit. He purchases apples at all points thereabouts, accessible to the canal. The crop this year is an excellent one, better than those of several previous years, and the demand for the fruit abroad makes it a profitable one.

Among the upward passengers on the Eastern Railroad yesterday, (says a Boston paper), was a patriarchal family, consisting of a father, mother, and thirteen children, who were journeying from their home and birthplace in Maine to cast their lot in the fruitful West. They were bound for Wisconsin. The eldest of the family was a smart young man of about twenty-five years of age. The youngest was a child in its mother's arms.

The Cleveland (O.) *City Fact* says that one of the most pleasing things exhibited at their late County Fair was a lot of brook trout, artificially bred by Drs. Garlick and Ackley, whose labors in this line we have heretofore noticed. They showed several broods of fish in different stages of growth, and have demonstrated that it is just as easy to grow fish as it is fowls, or any other description of food.

A new swindling operation was brought out in New York last week, showing that a company calling themselves the Merchant's Exchange Bank, and keeping an office at No. 60 William-street, have put in circulation false bank bills to a large amount.

The danger of collision between the New Englanders and Missourians in Kansas is said to be very great, and daily increasing. Differences as to claims and titles are at the bottom of the difficulty.

The wreck of the steamship Franklin, as she lies on the beach, opposite the village of Moriches, L. I., was sold at auction by L. N. Hoffman & Co., for $1,625—purchased by G. S. Lewis.

The telegraph brings news of the death of Gov. Burt of Nebraska. Gov. B. was a brother of the Hon. Armistead Burt, member of the last Congress from South Carolina.

On the morning of Oct. 28th, a fire occurred in Cleveland, Ohio, which destroyed property estimated to be worth more than a million of dollars.

The Lewis County Bank, one of the old Safety-Fund charters, is reported in trouble; the circulation is about $150,000.

Gov. Price has appointed the 23d day of November next as a day of Thanksgiving in the State of New Jersey.

The New York City Tax this year amounts to about $5,000,000.

At a fire in Williamsburg, last week, two boys were burned to death.

New York Markets—October 30, 1854.

Ashes—Pearls $6 25; Pots 6 87.

Flour and Meal—Flour 8 50 a 8 75 for common to good State, 9 06 a 9 37 for common to good Ohio, 10 50 a 11 00 for extra Genesee. Rye 7 25 a 7 75. Corn Meal 4 50 for Jersey. Buckwheat Flour 4 00 a 4 18 per 100 lbs.

Grain—Wheat 1 95 a 2 00 for Western mixed, 2 10 a 2 17 for Ohio, 2 45 a 2 50 for prime white Genesee. Barley 1 35 a 1 45. Rye 1 18 a 1 20. Oats 54 a 58c. for State and Western. Corn 81 a 82c. for Western mixed, 83 a 85c. for round yellow.

Provisions—Pork, 12 50 for prime, 13 50 for mess. Beef 10 00 a 11 50 for country mess. Lard 9½ a 10½c. Butter 13 a 18c. for Ohio, 18 a 22c. for State, 22 a 24c. for Orange County. Cheese 9¾ a 10¾c.

Hay—70 a 75c. per 100 lbs.

Lumber—16 00 a 17 00 for Eastern Spruce and Pine.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

MARRIED,

In Leonardsville, N. Y., Oct. 5th, by Eld. W. B. Maxson, Mr. James Tuttle, of Columbus, N. Y., to Mrs. Fanny Reed, of Exeter, N. Y.

In Bolivar, N. Y., Oct. 18th, by Elder Thomas B. Brown, Mr. Edwin B. Torrey, of Wyoming County, to Miss Lydia Maria Cornwell, of the former place.

In Genesee, by the same, Oct. 24th, Mr. Samuel S. Perkins, of Scio, to Miss Martha Woodward, of Wirt, Allegany Co., N. Y.

In Stonington, Ct., Oct. 18th, by Eld. S. S. Griswold, Mr. David L. Larkham, of Richmond, R. I., to Miss Sarah Brackett, of Stonington, Ct.

DIED,

In Portville, Cattaraugus Co., N. Y., Oct. 16th, 1854, Mrs. Content Perry, aged 85 years and 7 months. Her life had been one of many afflictions, but was adorned by meekness of submission to the will of God, and by a firm confidence in the Saviour of sinners.

In Milton, Rock Co., Wis., Sept. 30th, 1854, of dysentery, Saloma Louisa, daughter of Leonard and Eunice S. Woolworth, aged 1 year and 11 days.

Thou art gone, dear lamb of Jesus' fold;
Thy angel visit soon is o'er;
I know that I shall go to thee,
But thou 'lt return to me no more. E. S. W.

In Brookfield, N. Y., on the morning of October 22d, of fever, Miss L. Laverne, daughter of Leonard and Elnora Babcock, aged 15 years. She having been modest and retiring in her disposition, affectionate and amiable in her manners, was known only to be esteemed. And hence, by this mysterious providence, have not only the fondest hopes of a doting father and affectionate mother been blasted in an hour, but a large circle of youthful associates are deprived of the society of a devoted friend. O that God would sanctify this afflictive providence to the good of all; but especially to the youth in this place. J. C.

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commmencing Monday, April 10, 1854:—

Leave New York at 8 A. M., 12 M., and 4 and 5½ P. M.

Leave Plainfield for New York at 6.55 and 8.30 A. M., 12.20 and 5.10 P. M., passenger, and 7.30 P. M., freight.

Leave Plainfield for Easton at 9.35 A. M., 1.40 and 3.35 P. M., passenger, and 6.30 A. M., freight; and for Somerville at 7.30 P. M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare.

GEO. H. PEGRAM, Sup't.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c.

D. C. McCALLUM, General Sup't.

Supreme Court.

IN the matter of the taking of lands for a new RESERVOIR, between 86th and 96th-sts. and the 5th and 7th-avs., in the City of New York. To all owners, mortgagees, lessees, occupants, and other persons, in any manner, by judgment, decree, or otherwise, entitled unto, or interested in the lands and premises above mentioned, or any part thereof: Notice is hereby given, that you are required to appear before the Commissioners of Appraisal in the above entitled proceeding, at their office, No. 293 Broadway, third story, front room, at 10 o'clock A. M., on any day, (Sundays excepted,) on or prior to the 21st day ~~of October next~~; and to produce the evidences of your title or interest therein. In default whereof, and in case the persons entitled or interested as aforesaid shall not be ascertained by or be known to the said Commissioners, or be fully known, the same will be reported to the Supreme Court as belonging to unknown owners. It being the desire to consummate this great improvement, and to present the report at the earliest day consistent with a proper examination and due regard to the rights and interests affected, it is earnestly requested that all parties note and comply with the preceding notice, as no other or further notice will be issued. Dated New York, Sept. 1, 1854.

EDWARD C. WEST,
ABRAHAM TURNURE,
DANIEL DODGE,
} Commissioners.

Robert J. Dillon, Counsel to the Corporation.

N. B.—All papers published in the City of New York are requested to publish the preceding notice until the 21st day of October next, once in each week, and to send their bills, with affidavits of publication, to the office of the Counsel to the Corporation, to be paid on the final taxation of the proceedings. 2t

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order CHIMES of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited.

A. MENEELY'S SONS, West Troy, N. Y.

Miscellaneous.

Loss of the Arctic.

To the Editor of the N. Y. Tribune:—

SIR: Perhaps no marine disaster in the history of commerce has given a wider field for the exercise of sorrow and regret than the loss of that proudest specimen of a nation's skill, the steamer Arctic, with her most precious freight of human lives. A providence so vast and astounding should if possible be correctly interpreted, and the true lesson taught be laid up for our guidance in the future. To aid in pointing out this lesson is the object of this communication.

Let me first give a brief statement of a *series* of circumstances and *blunders* which, following each other in a most remarkable way, culminated at last in the loss that we so much deplore. And then, following these, let us see where, if possible, culpability shall rest.

1st. It is in evidence that there was not used, on the fatal day, the means provided for the ship to guard against surprise and accidents of this nature.

2d. It is also stated by an officer in evidence, that at the first moment of surprise at the appearance of the Vesta, she was standing nearly head-on, and in the act of passing by the *port* or left side of the Arctic. The officer of the deck, on the first sight of the stranger, instead of ordering the helm a-port—which would have, in great probability, caused them to pass the steamer with at least a rub, or at most a running of her under the wheel of the Arctic—he ordered the helm *a-starboard*, the consequence of which was that she was turned *across* the track of the Vesta. The first officer, who was alarmed by the sudden order, ran upon deck, and seeing the danger and the necessity of prompt action at the wheel, reëchoed, instead of correcting, the fatal error.

3d. The collision having occurred, another error was committed, and in the end most fatal in its consequences, in allowing the *first* officer, rather than a subordinate, to leave the ship on an errand to the injured stranger.

4th. The most astonishing, and, for the ship, most fatal error, was in not instantly stopping and sending a boat with the carpenter to examine the extent of *their own injury*—an error which was in no good sense remedied by putting a sail in a sling over the bows while the ship was dashing through the sea at the top of her speed.

5th. I must regard as the next error in the chain of fatalities, the leaving of the injured steamer before it was known that they might not have afforded mutual assistance to each other; while at the same time they lost a boat and two valuable officers of the ship by running away from them also.

6th. In less than half of an hour it was demonstrated by the water rising in the ship at the rate of one foot in ten minutes, notwithstanding all the pumps were at work, that they could not steam more than two hours before the fires would be extinguished; yet they utterly and worse than wasted their most valuable time in a mad and hopeless endeavor to run her ashore.

7th. The only effort to stop the leak in the ship appears to have been to draw a sail over the bows of the ship while she was pressing her way through the water at the top of her speed, notwithstanding it was at once seen that fragments of the other vessel, as well as splinters of their own, would prevent the sail from being of use, and that at any rate it could not be made to sink so as to reach the leak while the ship was going ahead.

8th. All hopes of going to the shore or of saving the ship having been abandoned, we see another officer of the ship—and that one again the highest remaining officer—ordered to one of the boats with orders to fall into the wake of the ship. Thus the two principal officers were detached from duty on board the wreck with at least a dozen of the best seamen, one or more quartermasters, and two out of the boats gone. Two more of the boats were soon after dispatched with such of the passengers and crew as appeared the most anxious to save themselves.

9th. We next see the ship sunk to the upper deadlights, but without any water being in her main cabins, and yet no efficient plans for forming a raft. At last it is decided to bring down the yards, and one by one to launch them to construct a raft; and one of the boats, and the last one—for the fifth one had been taken by the chief engineer and his party—was launched to aid in its construction, and the next highest officer detached from the wreck to its command. For the purpose of getting down these spars, the main dependence appears to have been on the passengers, for the seamen, with their officers, were nearly all detached for other purposes, or had one by one dropped into the sea to secure a place in what *they* knew must be their only hope of safety. Of *mutiny* there yet appears no evidence.

10th. It is now about three hours from the fatal collision; the officers of the deck all gone, an effort is now, for the first time, seriously set on foot to make a raft from the spars, which, until now, had reposed in their places upon the masts. These were now to be taken under great disadvantages, down by the passengers, firemen and coal-heavers, and launched overboard, where Mr. Dorian, with the aid of his boat's crew of sailors and firemen, received them and attempted to make them into a raft—an arduous task to be undertaken when the hope was not encouraged that even one half hour remained for its accomplishment.

Thus we have no less than *ten* errors committed, and as yet nothing done which resulted in the saving of more than *one* individual.

Now let us see what might have been done had there been wise counsels and no panic among her officers:—

1st. Had the Arctic been wisely stopped to inquire what were the chances or necessities of the little steamer, they would have seen Capt. Duchesne's coolly stopping and setting to work to repair his damages before he attempted to press his damaged bow into the sea. They would thus have avoided the necessity of leaving the first officer and boat to the mercies or chances of the sea, or of running down the boat load of human beings from the Vesta.

2d. Had this time been wisely employed, the carpenter, with the aid of a boat, would have found a leak in the nearly vertical side of the Arctic, less than six feet under water, which, in every probability, a gentleman's *overcoat* would have sufficiently closed to bring the leak within the control of the pumps of the ship, and have been sufficiently secured by being driven into the hole by the rushing water, and retained by the pressure of the water and the impaling of the slivers, or at most could have been staunched by a *basket of blankets and sheets* forced into the holes by the aid of an oar, or by *diving* with the *hands*. Above water he would have found a hole easily covered with blankets, sails or boards, sufficiently secure to have made a voyage around the earth; and one hour would have been probably an ample allowance of time to make these repairs.

3d. Allowing that I have been mistaken in the nature or extent of the injury, (which no man experienced in such matters *will* allow,) and that the ship was doomed to sink by irreparable injury, as all seemed to believe, very much might have been done in the three hours after her engines stopped in forming a flotilla from her spars yards and other timber, water casks, hatch coverings, aided by the furniture of her cabins, had the officers of the ship been kept on board to direct the anxious crew and passengers. There was nothing in the state of the weather or sea to prevent the most ample provision being thus made had there been an order given to concentrate efforts upon such an object.

4th. Beyond all of this there was still other relief, had it been found impossible to have made a safe flotilla of such fragments. There was an extensive range of houses on the deck of the Arctic that, with the sixty axes at hand on her main deck, in the hands of the most unskillful of passengers, could have been cut from her deck in *less than half an hour*, which would have floated from the wreck when she sunk, or by being cut into pieces could have been launched over by the aid of the masts and tackle. These decks, either side up, could have sustained her whole crew and passengers and provisions for a week. Then by the aid of even one of the boats, security, a good degree of comfort, and ultimate hope of relief, would have buoyed up all, and few if any deaths would have followed the sinking of the noble ship.

Had measures any thing like the foregoing been proposed, what sane man would have deserted the ship? It was only when experienced men saw *no effort* was made, or was like to be made, that, availing themselves of opportunities existing and in their power, they one by one secured those advantages for themselves—just as most men, possessing higher moral sense than most seamen claim, would have done themselves.

It is not my purpose to say or point to whom these omissions, errors or delinquencies belong, or who increased or exaggerated them, but to point out the facts for the future guidance of those who commit themselves to the deep on either ships or steamers. The public being enlightened in the facts of the case will not fail to see who were incompetent or unworthy of their places, or what measure of confidence shall hereafter be imposed upon such of them as have survived the disaster.

In any, like myself, who have lost friends or valued acquaintances, can comfort themselves with the thought that God over-ruled it all, by not vouchsafing to those on board their accustomed wits, they will deal gently with the unhappy survivors of her officers or crew—while they will draw from it the lesson that we should never despair, and so unfit us for our duties to ourselves or our common humanity, and so, taking all that befalls us, beyond our control, as for the best, coolly set to work to make the best of what is yet left to us.

PAUL STILLMAN.

Biography of Sir John Franklin.

The reported discovery of the remains of this illustrious navigator—whatever doubts may be thrown upon the credibility of the narrative—furnishes a suitable occasion for collecting the scanty details of his biography, which have thus far been communicated to the public. Sir John Franklin was born in 1786, and would accordingly have been 68 years of age had he survived to the present time. His native place was Spilsby, a small town in Lincolnshire, in the vicinity of the North Sea. From his earliest years he betrayed a certain boldness of disposition and love of adventure. His father endeavored to cure him of his seafaring propensities, by permitting him to try the experiment of a voyage to Lisbon in a trading vessel. But this only produced the opposite effect. He was confirmed in his taste for the ocean, and would not be satisfied until he had procured the consent of his father to his entering the navy. He obtained a midshipman's warrant in his fourteenth year. His first service was in the frigate Polypheme, where he was distinguished for his youthful courage and energy. He was in the battle of Copenhagen in 1801, and two years after accompanied his relative, Capt. Finders, on a voyage of discovery to the South Sea, during which he was shipwrecked on the coast of New Holland. At a subsequent period, he was in the Bellerphon at the battle of Trafalgar. In 1814 he was a lieutenant in the Bedford, which brought the allied monarchs to England. He was concerned in the attack on New Orleans, where he gained great credit by his bravery and skill. In 1818 he commanded the brig Trent in the Polar Expedition under Capt. Buchan. After the failure of the search for the North-West Passage by Capt. Ross., he received the commission in 1819 to undertake an expedition by land from Hudson's Bay to the mouth of the Copper Mine River, in conjunction with Richardson and Bach, to coöperate with Capt. Parry, who was to visit the region by water. On this expedition he followed the coast as far as Cape Turnagain, 68° 30′ north latitude, and after incredible hardships, having been once rescued from death by the Indians, he returned to England in 1822. He was promoted to the rank of Post-Captain, and three years after undertook a second expedition to the Polar Sea, visiting the coast between Mackenzie River and the Copper Mine River. By the middle of Aug. 1827, he had reached the seventeenth degree of latitude, and the one hundred and fiftieth degree of longitude, but was compelled to return by the early setting in of extreme cold weather. In recognition of his merits on this expedition he received the order of knighthood from George the Fourth. In 1830 he commanded a ship of the line in the Mediterranean, and afterward was appointed Governor of Van Diemen's Land, from which post he was recalled in March, 1843. Returning to England in the spring of 1845, he was entrusted with the command of the fatal expedition in which his life has fallen a sacrifice. The two vessels, Erebus and Terror, in which the younger Ross had accomplished his expedition to the South Pole, were selected for the voyage, and two distinguished officers, Captains Crozier and Fitzjames, were appointed as his companions. The Expedition sailed on the 19th of May, 1845, arrived at the Whale Fish Islands on the 4th of July, and was seen for the last time in Melville Bay, on the 26th of that month. It was not until after the return of Capt. Ross in 1849, who had been sent in search of the missing navigators, that general anxiety was felt for their safety. In 1850 an Expedition was fitted out by Lady Franklin, and another by the British Government, to seek the lost vessels. About the same time, our townsman, Mr. Henry Grinnell, dispatched the two ships Advance and Rescue for the same purpose. The unsuccessful result of these Expeditions is well known. During the past year a large fleet was sent out by the British Government, to make renewed search for Sir John Franklin. Mr. Grinnell also dispatched the Advance, under the command of Dr. Kane, on a similar errand. But all in vain. Before the announcement of the recent intelligence, no further hope was cherished that the lives of the brave explorers had been preserved. Their names were some time since stricken from the Admiralty list, and orders issued for the recall of the Expeditions. [Tribune.

Poverty of Authors.

Mrs. Inchbald, so well known as the author of the "Simple Story," and other novels, as well as in her capacity of editor, dragged on, as we are told, to the age of 60, a miserable existence, living always in mean lodgings, and suffering frequently for the common comforts of life.

Lady Morgan, so well known as Miss Owenson, a brilliant and accomplished woman, is now dependent altogether upon the public charity administered in the form of a pension of less than $500 a year.

Mrs. Hemans, the universally admired poetess, lived and died in poverty.

Leman Blanchard lost his senses and committed suicide, in consequence of his being compelled, by his extreme poverty, to the effort of writing an article for a periodical, while his wife lay a corpse in the house.

Miss Mitford, so well known to all of us, found herself, after a life of close economy, so greatly reduced as to have been under the necessity of applying to her American readers for means to extricate her little property from the rude hands of the sheriff. Like Lady Morgan, she is now a public pensioner.

Leigh Hunt is likewise dependent on public charity.

Tom Hood, so well known by his "Song of a Shirt," the delight of his readers, and a mine of wealth to his publishers—a man without vices, and of untiring industry—lived always from day to day on the produce of his labor. On his death-bed, when his lungs were so worn with consumption that he could breathe only through a silver tube, he was obliged to be propped up with pillows, and with shaking hand and dizzy head, force himself to the task of amusing his readers, that he might thereby obtain bread for his unhappy children.

Moore, with all his reputation, found it difficult to support his family; and all the comforts of his declining years were due to the charity of his friend Lord Lansdowne.

Campbell, in one of his letters from Germany, expresses himself with joy to hear that a double edition of his poems had just been published in London. "The unexpected £50," says he, "saved me from jail."

Haynes Bayley lived and died in the greatest poverty.

Similar statements are furnished us in relation to numerous others, who have, by the use of their pens, largely contributed to the enjoyment and instruction of the people of Great Britain. It would, indeed, be difficult to find many cases in which it had been otherwise with persons exclusively dependent on the produce of literary labor. With few and brilliant exceptions, their condition appears to have been, and to be, one of almost hopeless poverty. Scarcely anything short of this, indeed, would induce the acceptance of the public charity, which is occasionally doled out in the form of pensions on the literary fund.

Hutchinson's Stave-Jointer.

Mr. C. B. Hutchinson, of Auburn, N. Y., whose rapid stave-cutter received last year the highest award of the Crystal Palace Exhibition, has lately introduced a machine for jointing, which in novelty and interest fairly seems to excel it. This stave-jointer, which was patented in October, 1853, joints the staves entirely by sawing, and the means by which the proper swell is given to the bilge, and the proper bevil to the edges of staves, of any width, make this an object of considerable curiosity. A narrow stave may be succeeded by a wide one, and this again by one extremely narrow, a single and easy motion of a lever (supposed to be always held in the left hand of the attendant,) being sufficient to adapt the parts in every respect. The saws, two in number, are circular, and mounted side by side, although on separate shafts or arbors. Each arbor is carried in bearings on a movable carriage, so that the saws may be made to approach or recede from each other. The motion of the carriage is controlled by grooves bent vertically in such a manner that the saws would fit face to face, if brought quite together, but become inclined as they separate, the upper points being always nearer than the lower. These two carriages are connected by links to the aforesaid lever, so that they approach or recede simultaneously, from which it follows that whatever their distance apart, the bevil in which they cut is always closely approximating to that desired. The method by which the bilge or swell in the middle of the stave is produced, is perhaps still more admirable, it being perfectly self-adjusting. The lever, and consequently the position of the saws, being held stationary during the jointing of a stave of any given width, if the wood was fed up in a rectilinear line, it would be sawn in the proper bevil, but of equal width throughout. The means by which the proper swell in the middle is attained in this machine is simply that of allowing the stave to be moved forward in a curved rather than a straight line. The feed apparatus is in fact a species of endless chain, the links being equal to that of the longest stave ever required, and the wood being held between hooks on the links, which tighten by their own motion. The joints or hinges of the chain being carried in guides, nearly horizontal, but curved so as to be highest in the middle position, or between the saws, the stave is in fact a chord of an arc, and the middle passes the saws at a lower point, and where the saws are wider apart than at the ends. By properly proportioning the curve given to the guides, any amount of swell may be given, as required. A set of Hutchinson's machines, as now perfected for cutting, jointing and crossing, are stated by the proprietor to make from 800 to 1,000 barrels per day. [N. Y. Tribune.

Ocean Telegraph.

No project of the present day is of more importance than the union of the Old and New Worlds by the lightning railroad. That such an event will be consummated some day not many years hence, we have not the least doubt, and all honor, as their just due, will be awarded to those men who have had the courage and the means to plan and accomplish this grand enterprise. We understand that a company, having this object in view, has been organized in this city, and from the high standing, wealth and experience of some of its members, we expect that the word 'fail' will form no part of their vocabulary. Peter Cooper, Esq., is President, and professor Morse is Vice President; T. P. Shaffner, of Washington, Secretary of the American Telegraph Association, being one of the most active directors.

Dr. Turnbull, of Philadelphia, author of an excellent work on the telegraph, in an article in the last number of the *Journal of the Franklin Institute*, discusses the practicability of an Atlantic telegraph, and comes to the conclusion that there are no difficulties in its construction and operation which may not be overcome. The difficulty consists principally of three parts. First, the depth of water in the ocean, and the form of its bottom. Second, the laying down of a marine cable of such great length; and, finally, the working of such a long line. The distance between Newfoundland and Ireland, on the projected line, is about 1,600 miles, and there has been discovered an ocean plateau, between the two places, the surface of which is very level and disturbed by no ocean current, consequently, this is very favorable to laying down a marine cable and preserving it from injurious action when it is laid. Two or three steamships could lay down the cable in three or four weeks, and a perfect insulated wire can be worked the whole distance with a Grove battery of 480 cups. There does not, therefore, seem to be any very serious difficulty in the accomplishment of this scheme; the greatest, we suppose, will be the money, for the cost cannot be less than between two and three millions; but this amount will eventually be obtained. If the bed of the ocean between every point of America and Europe had been formed of sub-marine hills and valleys, with abrupt precipices and deep rolling currents, we would have concluded that it was impracticable to lay down and work a marine cable of such length; but since it has been discovered that nature has provided such a favorable ocean route for the ocean railway, we now look forward with hope to the speedy accomplishment of this grand project. [Scientific American.

General Washington's Appearance.

We find in the *Courier des Etats Unis* a fragment of a Journal of M. de Broglie, written in 1782, in which the personal appearance and manners of Washington were described by a Frenchman:—

The General is about forty-nine years of age; he is large, finely made, very well proportioned. His figure is much more pleasing than the portraits represent it. He was fine-looking until within about three years; and, although those who have been constantly with him since that time say that he seems to have grown old fast, it is undeniable, that the General is still fresh and active as a young man.

His physiognomy is pleasant and open; his address is cold though polite; his pensive eye is more attentive than sparkling; but his aspect is kind, noble, and composed. He maintains, in his private deportment, that polite and attentive decency which satisfies all, and that reserved dignity which does not offend. He is the enemy of ostentation and vain glory. His character is always equal; he never manifests the least ill-humor; modest even to humility, he seems not to estimate himself duly; he receives with good grace the deference paid to him, but rather shuns than courts it. His society is agreeable and pleasing. Always serious, never constrained; always simple, always free and affable, without being familiar, the respect which he inspires never becomes painful. He talks little, in general, and in a very low tone of voice; but he is so attentive to what is said to him, that you are satisfied that he understands you, and are almost willing to dispense with a reply. This conduct has often been of advantage to him in various circumstances; no one has more occasion than he to use circumspection, and to weigh his words.

LIFE-PRESERVERS.—The recent dreadful sacrifice of life in the wreck of the "Arctic," shows how little reliance can be placed for safety on the life-preservers in common use, and as ordinarily constructed. At any great distance from land, in an open sea, without other refuge, they can at best only protract one's sufferings for a little while. If they could be made with some little buoyant case attached to them containing even half a pint of water, and some morsels of pemmican, or prepared biscuit, or any concentrated nourishment, even in the smallest quantity, that would add greatly to their value. Some of the most painful, heart-rending instances of death in this terrible shipwreck are of those who have been preserved a day and a night in the deep, even on floating pieces of the wreck, but have sunk at length, exhausted from thirst and want of nourishment, and died almost within sight of deliverance. A teaspoonful of brandy, a small vial of water, a morsel of bread, might have prolonged the energies of life till relief came. How painful the thought of their dying, perhaps within an hour of such relief, from utter exhaustion. A morsel of food and a few drops of water might have enabled the system to bear up much longer under all that exposure and fatigue. [Independent.

A NEW KIND OF BRICK.—We were shown yesterday, (says the Kenosha *Telegraph* of Sept. 21,) an entirely new material for the construction of buildings. It is a preparation of sand and lime put into moulds, and operated upon with a most powerful press. The specimens we saw had about three times the superficial area of a common brick, though, of course, their size would depend upon the pleasure of the maker. They are made with an open space in the center occupying one half the length and about one-third the breadth of the brick. Those we saw were a handsome gray color, as smooth as dressed stone could be, and apparently as solid as granite. Their real solidity was about equal to a good burnt brick, though they had been made but about three weeks, and time and exposure is expected to harden them continually. They can be furnished as cheaply as brick, and unless some difficulty is developed with regard to them not now apparent, it seems to us they must come into active demand for building purposes. They would certainly appear as beautiful as the finest stone, and making, as they do, a hollow wall, with a smooth interior surface, they can be papered against, or painted, or whitewashed, without the necessity of lathing or plastering.

AMERICAN MACHINERY ABROAD.—The Messrs. Adams, of South Boston, have constructed two of their improved six-roller printing presses for Scotland, which are now ready to be shipped. One of them is for Blackey & Son, Glasgow; the other is for a printing house in Edinburgh. They are designed for printing the nicest wood cuts, and have improvements, consisting of movable flys and strings, that obviate all difficulty heretofore existing in the way of good work, that which caused the sheet to blur after the impression was given. The order is complimentary to the Messrs. Adams, as in Scotland printing is eminently good, and the printers in that ilk well know what machinery will do it the best.

VARIETY.

After long, continued experiment, Mr. Dalroll, of Connecticut, has succeeded in constructing a mechanical Fog Trumpet, for light-houses and light-ships, so arranged that it blows at stated intervals, and so loud that it is said to sometimes send the sound a distance of eight or ten miles. The machinery is inclosed in a small frame building, twelve feet square, and is regulated by a clock, which puts the apparatus in motion, stops it, and blows the alarm at will, once in one, two, three, or five minutes, as the keeper may please to adjust it. The trumpet is made of brass, about four feet long, with a mouthpiece similar to the organ pipe. The tongue is of hammered brass, German silver, or steel. This apparatus has been tried on Long Island Sound, and is said to be far preferable to the Fog Bell.

Mr. D. C. Grinnel, of New York, has exhibited to the *Tribune* the drawing of an improved railroad track of his invention. The improvement consists in making the track of four rails instead of two, or one guage within another. Each car has trucks of two widths, and there is a double safety against running off. The weight of the locomotive being borne on the double track may also be greatly augmented, and a much higher rate of speed attained than is now possible. It is estimated that a road built in this manner might be traversed with security at from 100 to 150 miles per hour. The expense would not be double that of an ordinary track, as lighter rails may be used.

M. T. Bailey, of Ballston Spa, New York, late proprietor of the well-known establishment at that place for the manufacture of knitted goods, has produced an admirable machine for knitting in a continuous tube, which seems likely entirely to supersede the present method of knitting in flat sheets and sewing together. Neither form of machine perfects salable goods without the subsequent aid of the shears and needle; but the new machine turns out the knitted fabric in a form more nearly approaching that desired, and requiring a much less objectionable seam.

The coal operators in Schuylkill County, Pa., have combined to suspend shipments of coal for the present, alledging as an excuse for this extortionate act, that the wages of laborers are too high to enable them to carry on mining without loss. The consequence is that the Reading Railroad is almost entirely without business from that source, the amount transported last week being only 28,000 tuns, against an average weekly transportation of over 50,000 tuns, which has been made for some time past.

An honest Jonathan, on his visit to the metropolis, was awakened one night by the cry of 'Oyst, buy any oysters,' in the mellifluous tones of the vender of the luscious shell-fish, who was passing under the windows of the hotel. A noise so near to his ears startled him, and he roused his room-mate to inquire what it meant. 'They are only oysters,' replied his fellow-lodger pettishly. "Oysters!" exclaimed Jonathan in astonishment, "and do oysters holler as loud as that?"

The Lowell (Mass.) *Cabinet* says, when Gen. Lafayette was in this country, two young men were introduced to him. He said to one, "Are you married?" "Yes, Sir," was the reply. "Happy man," quoth the General. He then put the same question to the other, who replied, "I am a bachelor." "Lucky dog," said the General. This is the best essay on matrimony extant.

Mr. S. O. Cross, of Sandy Hill, has invented a very convenient frame or trellis for grape vines. The advantage of the frame is that it is on hinges at the bottom, so that it can be raised and lowered, pitched at any angle, and either laid upon the ground or made perpendicular. By this means the posture of the vine can be changed according to the weather and the season without in any way injuring its vigor and fruitfulness.

An aspiring youth in the service of King George the Third, complained to his Majesty one day of the smallness of his compensation for his services. "What do you get?" asked the king. "Nothing but my victuals and clothes." "That," replied the old fogy, "is all I get."

An exchange claims to have received the following *poetry* in connection with an obituary notice:—

"But now another flower is gone,
From six have taken four;
Dear Lord, be merciful to me,
And please don't take no more."

The Teller of the Ocean Bank, in New York, is a defaulter to the amount of near $100,000. Probably half that amount will be realized from his securities. The business of the bank will not be interrupted by the affair.

A telegraphic dispatch from Cincinnati announces the failure of P. B. Manchester, a private banker of that City, and of the Kentucky Trust Company and Ohio Savings Bank.

The Prohibitory Liquor Law has been defeated in Pennsylvania by a small majority.

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

VERMILLIONVILLE, La., April, 1853.

Mons. le DR. J. C. AYER:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M.D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

DR. J. C. AYER—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

DR. J. C. AYER:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.
C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.
Harvey, McKenney, & Co., State Gazette, Burlington, Iowa.
J. Knabb, & Co., Journal, Reading, Pa.
Raymond, Harper & Co., New York Times.
S Cobb, Christian Freeman, Boston.
Wm. B. Jacobs, Christian Chronicle, Philadelphia.
Hon. J. Wentworth, M. C., Democrat, Chicago, Ill.
Rev. E. G. Reese, Methodist Protestant, Baltimore.
W. M. Wightman, Christian Advocate, Charleston, S. C.
J. M. Magennis, True Delta, New Orleans.
T. M. Donnell, Daily News, Savannah, Ga.
Geo. D. Prentiss, Louisville Journal, Ky.
Hon. Schuyler Colfax, M. C., South Bend Register, Indiana.
A. Commings, Christian Mirror, Portland, Me.
M. H. Bartlett & Co., Republican, Hartford, Conn.
Chaddick & Berry, Banner of Peace, Lebanon, Tenn.
Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. SANDS; retail by RUSHTON, CLARK & Co., and by all Druggists, everywhere.

Election Notice.

STATE OF NEW YORK—SECRETARY'S OFFICE, ALBANY, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Assembly;
A Surrogate, in the place of Alexander W. Bradford;
A Recorder, in the place of Francis R. Tillou;
A City Judge, in the place of Welcome R. Beebe;
A Mayor, in the place of Jacob A. Westervelt;
A Register, in the place of Garrett Dyckman;
A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;
A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;
Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;
A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;
A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;
A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

SHERIFF'S OFFICE, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER,
Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

The Sabbath Recorder.

PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
GEO. B. UTTER, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be *stopped*. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

Rates of Advertising.

For a square of 16 lines or less—one insertion, $ 75
each subsequent insertion, 50
six months, 6 00
one year, 10 0

For each additional square, two-thirds the above rate.

HINDRANCES TO ZION'S PROSPERITY.

(Concluded.)

This subject may be farther extended by a consideration of the state of the churches at large. No doubt there are thousands in our Zion whose minds are properly influenced, and whose lives are conformed to the great requirements of divine truth, and thus constitute a light in a dark place. Many holy and devout men and women present, by their every-day deportment, an indisputable evidence of the truth and excellence of the Christian religion, and condemn an ungodly world around them. There is enough, however, among professors, to encourage the unbelief and infidelity of mankind, and discourage the spiritual part of the membership of the churches and the faithful ministers of Christ—enough to make the genuine Christian retire into the closet, and mourn before the Lord over the desolations, at least over the low estate of Zion, caused by the conduct of the professed followers of the Lamb. The ambassadors of the cross, too, move on in their solemn work with a heavy heart, and exclaim, like the ancient prophet, "Who hath believed our report?"

The prevailing sin of the church at the present day is conformity to the world. Pride, and show, and fashion, are too conspicuously presented to our view to admit of a doubt as to their prevalance. With what eagerness are the fashions of the day followed by *professors of religion!*—yea, it seems as if the church vied with the world in this respect, and took the lead too. The most showy, and fashionable, and expensively attired in churches and congregations are individuals professing godliness, and members of churches. How does this appear in the eyes of a vain and pleasure-seeking world? What will this effect in connection with exhortation not to be conformed to this world? What proof is this, that the grace of God transforms a worldling into a spiritual man, and fixes the mind on more substantial and ending things than the gaudy fineries of earth? Ministers are not free from these things, though it perhaps may be conformed to in order to please their congregations—for in these latter days, people think their minister must be a gentleman, and look as fashionable in his dress and in everything pertaining to him as any, and a little more. In some cases, it is to be feared, a minister's appearance is more heeded than the sermons he delivers; and in fact a showy man, with a scanty intellect, and a mind as scantily stored with information and theological knowledge, whose sermons are never remembered (because there is nothing to remember,) is preferred to the plain, faithful, and honest dealing man of God, who stands aloof from the prevailing fashions of the day, and spreads out a feast of fat things for the immortal soul. The minister is not to be justified in this matter. He ought to stand out the independent man, and show himself as a pattern of plainness and simplicity and purity and heavenly-mindedness, and that the great concern of his life was to lead souls to Christ and heaven.

Fashionable life must certainly be a great hindrance to the progress of the gospel and to its reception by the hearers. How many fashionable ladies, members of churches, spend most of the time previous to public worship and preaching, at the toilet, instead of preparing the mind for the important exercises of the sanctuary, and praying to God that the minister may preach with power, to the edification of saints, and the conversion of sinners. If half the time was spent in holy meditation and prayer, which is occupied in fixing fine fashionable dresses, converts to the truth and to Christ would be multiplied, to the joy of ministers, and those who sigh for Zion's extension. What is the principal topic of discourse among our young female members especially, if not fine dresses, and new fashions, and all the routine of follies and vanities with which the world abounds? Certainly, it must be for a lamentation.

There is also a miserable amalgamation between the church and the world. To such an extent is this carried, that no difference is apprehended, and it may be said with regard to many professors, that they never would be known as members of Christian societies, were it not for their appearance at the communion table. Alas! what a mass of corruption and worldliness and vanity and uncharitableness is carried there, with the emblems right before them of the most astonishing transaction in the universe of God! The instructions of the Apostles require that we come out from the world and be separate, and thus make the line of distinction definite and clear; but this seems to be an obsolete idea in this advanced age. Members of churches, and some who fill important offices too, unite with the world in every respect. They join with worldly men in business partnerships. They have the same tricks of trade as others. They marry irreligious persons for life companions, both men and women, and all in the face of divine prohibition. It cannot be but that corruption and death will be the result of such strange admixtures, in the individuals themselves, and in the Christian communities with which they stand connected. It is high time that this unholy alliance was broken up.

A want of unity and Christian love, arising from various causes, must necessarily be a drag on the energies of the church, and an impediment in the way of Christian labor. In this great enterprise, Christians must work together—their prayers must be united, and their labors blended. If they allow themselves to be diverted from the glorious work of diffusing the glad news of salvation to the perishing, by differences of opinion on doubtful points, by jealousies and envyings and offenses, or by a party spirit, no wonder at the small progress made in the cause of Christ, or the few conversions among particular bodies of Christians. Love is the grand element of Christianity—love to all who give evidence by their lives of faith in Christ. Unity in the observance of Christian ordinances, and in active effort in carrying out the purposes of love and mercy to mankind, is the result. The Divine Spirit is love, and cannot dwell with strife and contention. The Spirit's presence is essential to success at home and abroad, nor can prosperity be expected, unless Christians are living in the atmosphere he breathes.

The denominational spirit, carried out as it is, especially among the Baptists, both First-day and Seventh-day, is opposed to the unity of feeling and action among Christians essential to the progress of the gospel and the prosperity of Christ's kingdom. When Christians cannot break bread together at the table of one common Lord, it remains to be proved how they can co-operate in one common cause, and convince an unbelieving world that Christianity is supremely excellent, and all that is necessary to make men happy. To see the followers of Christ separate here, is an astonishing spectacle to unbelievers, and an open denial to them of the existence of Christian love. The premises upon which this separation rests may be doubted as to their soundness and consistency. They go upon the principle of absolute certainty as to the correctness of our views, which must be doubted so long as we are fallible and liable to err. They seem to imply a conviction on the part of the objector, a want of moral or spiritual qualification; and yet the parties refused communion are called brethren—they are invited into our pulpits and are allowed to occupy the most important position a mortal man can, and thus acknowledged as qualified to teach the people the oracles of heaven. We unite with them in prayer and in other Christian enterprises, and then we refuse to come together to celebrate the Lord's death as an atonement for sin, and the most astonishing display of divine love, on which all our hopes depend. It is surely high time to remove all the stumbling-blocks out of the way.

GEO. R. WHEELER.

SALEM, N. J.

SWEDENBORG NO ADVOCATE OF SUNDAY-KEEPING.

To the Editors of the Sabbath Recorder:

Having been frequently asked what Emanuel Swedenborg has said concerning the day of the Sabbath, in his voluminous writings, I have obtained from Prof. George Bush the following article from the *New Church Repository*, edited by him, which he assures me contains all that he knows of particularly on the subject. Believing that the publication of it in the *Recorder* will subserve a useful end, I ask of you its publication.

PAUL STILLMAN.

Interpolation in the Dictionary of Correspondences.

MR. EDITOR,—Under the article "Eighth Day," in the "Dictionary of Correspondences," (Bost. Ed. 1841,) we read as follows:

"Eighth Day (the,) denotes every beginning, consequently continuation. This is one reason why the Sabbath was changed from the seventh day to the first, that is, by way of continuation, the eighth day, which denotes the beginning of a new Christian Church, at the end of the Jewish Church."—*A. C.* 2633,

Having some curiosity to learn what Swedenborg really taught on this subject, and not recollecting to have met with any such passage as the above in my reading of the Arcana, I turned with special interest to the number referred to, and to my surprise found only the following:—

"A son of eight days." That it signifies beginning and continuation appears from the signification of the eighth day, on which they were circumcised, as denoting every beginning, thus continuation, concerning which, n. 2044."

Here evidently is nothing touching the change of the Sabbath day from the seventh to the first. Nor is there any thing more explicit in the number here referred to, 2044. He says indeed that "as the eighth day is the first day of the week following, it signifies every beginning;" but this carries with it no intimation that the Sabbath is this first or eighth day of the week. In fact, though I have scanned the writings of Swedenborg very carefully to see if any hint could be met with which seemed to recognize the change of day which has obtained in the Christian world, the search has thus far been fruitless. On the contrary, it would seem from the language of Swedenborg in the following extracts that it was not the *time*, but simply the *character*, of the day that was changed.

"The Sabbath, among the sons of Israel, was the sanctity of sanctities, because it represented the Lord; the six days, his labors and combats with the hells; and the seventh, his victory over them, and thus rest; and because that day was the representative of the close of the whole redemption of the Lord, therefore it was holiness itself. *But when the Lord came into the world, and thence the representations of Him ceased, that day became a day of instruction in divine things, and thus also a day of rest from labors, and of meditation on such things as are of salvation and eternal life; as also a day of love towards the neighbor.* That it became a day of instruction in divine things, is manifest from this, that the Lord on that day taught in the temple and synagogues, (Mark vi. 2; Luke iv. 16, 31, 32; xiii. 10;) and that he said to the man who was healed, *Take up thy bed and walk;* and to the Pharisees, *That it was lawful for the disciples on the Sabbath day to gather the ears of corn and to eat,* (Matt. xii. 1 to 9; Mark ii. 23 to the end; Luke vi. 1 to 6; John v. 9 to 19;) by which particulars, in the spiritual sense, is signified, to be instructed in doctrinals. That that day became also a day of love towards the neighbor, is evident from those things which the Lord did and taught on the day of the Sabbath, (Matt. xii. 10 to 14; Mark iii. 1 to 9; Luke vi. 6 to 12; xiii. 10 to 18; xiv. 1 to 7; John v. 9 to 19; vii. 21, 23; ix. 14, 16.) From these and the former passages, it is manifest why the Lord said, that *He is Lord also of the Sabbath,* (Matt. xii. 8; Mark ii. 28; Luke vi. 5;) and because He said this, it follows that that day was representative of Him."—*T. C. R.* 301.

So again elsewhere:

"The Lord when he was in the world and and united His Human to the Divine itself, abrogated the Sabbath as to representative worship, or as to the worship which prevailed amongst the Israelitish people, *and made the Sabbath day a day of instruction in the doctrine of faith and love.*"—*A. C.* 10,360.

Here is no hint of a *change of the day*, but only of its *uses*. Indeed, as the Sabbath denotes spiritually the state of rest consequent upon the labors and conflicts of the six days of regeneration, it constitutes a problem how, under the new dispensation, the Sabbath, which signifies the repose and tranquillity of the last day of the spiritual week, should properly stand at the commencement of that week. Would not this imply that conjunction came before combat?—victory before temptation?

I do not, however, propound this matter for the sake of argument. Perhaps the time may come when the whole subject will demand at the hands of New Churchmen a more thorough-going and radical canvassing than it has ever, in modern times, received. But at present my object is simply to bring to notice the foregoing palpable interpolation in the Dictionary of Correspondences. I would ask upon what authority such a sentence as the above has found its way into the work in question? It may be replied, that it is copied verbatim from Nicholson, whose work is the basis of the Dictionary. But what authority had Nicholson so to mix up his own opinions with the statements of Swedenborg as to mislead the reader by making him think that Swedenborg had said what he never did say? As a general fact I have found Nicholson very fair in representing his author, but the present is plainly an exception, and though both his work and the Dictionary of Correspondences, founded upon it, are very useful manuals, yet it is to be hoped that the passage in question, if it be not expunged from future editions, may at least be known to receive no countenance from any thing advanced by Swedenborg.

SCRUTATOR.

CHOOSING A FIELD.

A young licentiate, on leaving the Theological Seminary a few years since, accepted an invitation to a very feeble congregation, whose aspects were, in every respect, discouraging. Going into the study of a city pastor not far distant, he mentioned his intention. The pastor expressed some surprise. The licentiate was quite talented, very energetic, and was blessed with unusually pleasant social qualities.

"How, my friend, does it happen that you have chosen that forlorn place?" said the pastor. "The prospects there are very unpromising, so much so, that they have been unable for years past to prevail upon any one to settle there." "That is the reason I am going there," replied his visitor. "Other churches have invited me to become their minister, but all of them can easily get some one else; indeed, they are rather in demand. But this little flock nobody else will have, and I think that is reason enough why I should cast in my lot with them." The pastor could say nothing more. The young minister's spirit rebuked him, and at the same time excited his admiration. The call proved to have been a providential one, for no sooner had the earnest, faithful laborer entered on his work than the neglected vine began to revive and soon brought forth fruit to the glory of God. The congregation increased to a respectable size, the house of worship was repaired, many souls were converted, and, in a few years, when the church had attained such a degree of prosperity that somebody else "would have" it, the young minister accepted a call to a wider field, and is now the pastor of a city church. The time spent with this cast-off people was the means of building them up.

AGRICULTURE IN PALESTINE.

The following article, copied from the N. Y. *Tribune*, is from the pen of Mrs. C. S. Miner; and as it contains useful and interesting matter of general interest, it is copied for the benefit of our readers. It is dated Mission Farm, north of Jaffa, July 18, 1854.

IRRIGATION.

The dry weather is here, and we now have the additional labor of raising water for the fruit trees, and summer crop of corn and vegetables. Our mules work constantly and yet improve in appearance, which greatly surprises our neighbors, who lose so many by neglect of proper care.

METHOD OF RAISING WATER.

An endless willow rope, bound thickly with earthen jars, pours a constant stream of water over the pulley wheel, into a reservoir, whence it is taken in many small channels, among the trees and plants; delighting the eyes as we sit under the shade of the orange or pomegranate trees to watch the rapid growth which the irrigation produces.

PRODUCTIONS.

We have just gathered some of the finest specimens of Indian corn we have ever seen; ears more than a foot in length, and containing over 600 large kernels. The present system of watering is expensive, and on fresh soil, we have ascertained that all kinds of grain, and most all vegetables, can be perfected, at some seasons, without irrigation, or only twice a year. We would irrigate gardens and fruit trees, and depend on improvements in field culture, for stable crops, such as cotton, silk, wheat, barley, corn, potatoes, and *sim-sim*, (for oil); all of which can be grown profitably without water, by deep plowing and good tilling. The finest melons and grapes, probably in the world, grow here; also olives and figs.

ARAB PLANTATIONS.

At first we have to occupy houses and lands arranged after the Arab fashion. These, near Jaffa, consist of an immense orchard, with a garden, dwelling-house and well, and machinery for irrigation. The orchard cannot be left, as in the United States, to take care of itself, but must be dug and watered every dry season. It is better for Americans to get unoccupied lands, because in leasing a dwelling the orchard must be taken with it, and taken care of. But upon unoccupied land, buildings and farm can be arranged to suit our system, which is so much better than that of the Arabs, as it will not require half the labor to produce greater returns—at least double.

THE BEDOUINS.

We have many friendly visits from the Bedouins, and have tried to learn and profit upon their knowledge of the climate, soil, seasons and suitable crops. Many of their simple methods are peculiarly adapted to this country. This lawless people are generally much feared and shunned by Europeans. At first the poor women came to us bringing laps full of barley and wheat to sell, and to buy medicine. They were wild, and at first apprehensive, when we closed the gates upon their entrance to our court-yard. Kind treatment soon gained their confidence, and as we manifested no fear, they grew friendly, and often on their way to Jaffa called to get water for themselves and beasts of burden. A poor woman, with a sucking infant upon her back, leading two small children, had come a long distance to glean after the reapers near our place. She begged permission to leave her children in the shade in our yard, while she pursued the same labor that Ruth did in the field of Boaz. In the evening, when she came for her children, she was surprised to find them contented and happy, and one little girl, who was covered with a dirty rag, now washed and dressed in a neat slip. As an expression of her gratitude, when she came again next morning to pursue her hard and ill-paid toil in the field, she brought us a large earthen jar of milk. This pleasant interchange of civilities continued some days. Next came one of the principal men under the "Great Shiek" of the River Bedouins, to sell two camel loads of barley. It was measured and paid for, to his satisfaction, and then he was highly flattered that we should invite him to take breakfast at our table with the family. This was a bond of peace. He had broken and eaten bread with us, and in return begged us to fix a day and come to their camp and eat with them. This we defined as a mere compliment of a well-bred man of his class; but a few days afterward he came with a present of "first fruits," and insisted upon our accompanying him home. It was a novel thing for a Christian family to be invited to visit their Bedouin neighbors, and several of our family volunteered for the occasion to accompany me.

VISIT TO THE SHIEK AND BEDOUIN CAMP.

We inquired the distance, and he, as we afterward learned, fearing we should not consent to go so far, replied, "Only half an hour this side of the mills." So, anticipating only a morning ride, we set off on mules and donkies, with Mahmoud and his camel in the lead northward, Abdallah, Mordecai and our German helper and interpreter John Steinbeck following. After riding an hour I inquired, "How much further?" He replied, "Swaycoh," (only a little.) Again and again the same inquiry was made, and the same answer returned. He was very talkative, and showed us an interesting ancient ruin by the way, situated on the top of what seemed to be be an artificial hill, rising on all sides abruptly from the plain. He assured us that it was the remains of a Christian Fort which Mahommed destroyed when he took possession of this country. After the first hour the road led up an extensive valley by the side of the River Ogee, of which and its ancient mills three miles north of our Bianah, I have before written to you. He informed us that this river rises in the mountain regions beyond Nablons; its course seemed about west. At length we came to a dam across the river, of very ancient masonry, at one end of which had been introduced two modern arches, through which the river now passes. The dam extends several rods across, beyond the present width and course of the river, on the further end of which are considerable ruins of an ancient mill—hewn stone, broken arches, and stone causeways for the water, half filled with rubbish and overgrown with bushes. As the dam forms a good bridge, we crossed here, and following the river upon the other side soon after entered upon an immense plain of bottom land, widening on each side of the river. The soil appeared to be very rich. We passed droves of tame buffaloes, shepherds with large flocks of sheep and goats, and many herds of fat cattle of a larger size than any we have before seen in this land. One drove of camels that were pasturing on the prairie-like plain on the opposite side of the river, our guide and Abdallah estimated to contain 250 head. At length the land became more undulating, and we turned aside from the river and began to ascend broken ridges. The road thus far had been wide and smooth, and good for carriages. In the distance we now saw clusters of black tents, and hoped that our journey was finished, but our guide still persisted in the same reply, "A little further." He informed Abdallah that he must not stop with us short of the Bate (house) of the Great Shiek. Here and there among the tents were fine horses tied, but as it was near noonday few persons were stirring.

THE CHIEF'S TENT AND FAMILY.

About a mile from our reaching the outpost tents we came to the large tent of the Chieftain. One end was open, where we saw a company of grave looking men, seated on mats round their superior, like a miniature court or divan. For a moment only the thought crossed my mind—Have we been brought here by stratagem, for evil? But in another I was lifted carefully from my saddle and led by Mahmoud past the array of armed men to the other (or female) end of the tent, and ushered without ceremony into the presence of the lady Bedouins, while my Jew and Gentile attendants were respectfully received by the Sheik. A fair young woman, with very delicate features, and tall, graceful form, pleasantly welcomed me. She immediately rose, and, laying down an infant which she held in her arms, spread a rich Persian rug on the bare ground, on which she had been sitting, and invited me to occupy it. Two little children were sleeping on a mat near her—one was her own fair child, her first born; the other was very black—while several female attendants stood gazing in the other end of the tent with apparent astonishment. Tents were pitched at a few rods from each other, in every direction, on the elevated ground around us, and soon after our arrival one and another of their mothers, and wives and sisters came in to see me, until a large company were seated. I seemed to be an object of great interest, as they had never before seen a Frank face or dress! and they made many sensible inquiries—yet, with all their earnest curiosity and simplicity, not one spoke or behaved in an indecorous or improper manner. The Shiek's sister (a woman of 40 years) most particularly interested me. She also was fair, very fine looking for her age, and intelligent; but her soft manners, gentle voice and tender expressions, in controlling the juveniles of our party, who seemed easily influenced by her, mostly affected me. There were some very pleasant young faces—one, a girl of 14, had light hair and blue eyes, and her bright expression would never betray her wild origin. There were a few very black women and children, but I could not discover the least distinction among them on that account; one of these women seemed to be peculiarly respected and consulted. I had not long been seated when the Sheik came in to see that I had suitable attention. He directed two satin pillows to be placed on my rug, had a glass cup of lemonade immediately prepared, and soon after coffee. They sent for a flock of goats, milked and churned sweet white butter, which they covered with fine sugar, and gave me with thin hot cakes of bread. My conversation with the women and with the Sheik would make my letter too long. He expressed pleasure at my visit, insisted that we should sleep in his house at least one night, and that himself would essort us home next day. His sister was so anxious that she once intimated in a kind manner that her brother *would not permit* my immediate return.

THE SHEIK AND HIS TRIBE.

He is a man of about thirty-five years, and would be regarded as a superior person any where, rather handsome and richly dressed. He said he had always lived in a tent, that he disliked stone walls, that he much preferred a house of hair. Said he had one hundred men or families under him, and that there was not one blind or sick person among them! This fact confirms an opinion of the healthfulness of this climate, in situations removed from the local causes of disease, so numerous in the towns and cities of this land. He possesses extensive rights to land on the mountains, and on the river plains, and his people have numerous herds of cattle, sheep, goats, camels, horses, and donkies. He said they removed every winter to the mountains, where there was plenty of wood for fires, and abundance of large trees! but all returned to the plains, or the elevations in their vicinity, to harvest their extensive wheat and barley sowing. I could scarcely admit my own consciousness, when I saw such fine looking, naturally intelligent persons, in such a migratory, uncivilized position, and that I was really in the midst of the wild Bedouins. Soon after we arrived, it being noon, the hour of prayer, all the males were engaged in their devotions. The women informed me that they had never been at Jaffa; it would be a sin for them to go. I invited them to visit our bianah—the sisters—one of which replied that it would be a great pleasure, but she knew that her brother would not permit it, he esteemed it a sin for a woman to visit any but their own relatives. The families seemed to be all related to each other. They assured me that they lived in perfect harmony, and that they loved their husbands and children very dearly, their eyes kindling, and their faces glowing with emotion as they spoke. They stated that the Bedouins regarded having more than one wife as a sin, while the Mahommedans of towns and cities allow it. I was repeatedly assured that no males, not even the young lads of his people, were ever permitted to see the wife of the Sheik, or enter her tent. Notwithstanding their urgent entreaties to remain over night, we excused ourselves on account of the family at home being unadvised of such a step, and soon after 3 o'clock, with their kind benedictions, we quietly left their encampment, and returned safely home before dark. The next day Abdellah informed me they were much disappointed, as they had killed a lamb, and were preparing a feast for us. Since that time the Sheik visited us at our house one and a half miles from Jaffa, and also here at our work in the bianah. He express an earnest wish that we would take some of his land, any situation we may choose, even the old millseat, and build and plant near him. Of his own accord he asked if we would not take his sons and teach them. He has one of ten years. Our native Consul, hearing of our acquaintance, assured us that it was an important matter to secure the friendship of this Sheik and the general regard of the Bedouins, himself being afraid to ride as far as the river.

THE SHEIK'S VISIT TO THE FARM.

Since commencing this letter, I was interrupted by his calling with another powerful sheik. Our large yard was filled with their gaily-caparisoned, beautiful horses, while they and their attendants crowded into the little mud-covered room where I was writing. The two chieftans were dressed in red and yellow striped satin gowns, and blue embroidered outer garments or mantles, monstrous gay silk turbans, and girdles garnished with heavy pistols and swords. They were much amused with an astronomical atlas on our table, and surprised to see a female write. They admired and accepted some ears of Indian corn, but refused potatoes, of which they knew nothing before. One of Ross' patent hand-mills, (just received through the kindness of the inventor and a personal friend in Rochester, N. Y.,) excited their particular attention—the fineness of the flour, and the ease with which one of their sturdy vassals turned it. Our men were all at their work below in the bianah. The wife of one of our German helpers and myself served them to coffee, and they behaved themselves properly and respectfully, and gave us no reason for alarm. Each of the chieftains was accompanied by his standard-bearer; the standard was a staff some twelve feet long, pointed by a lance, just below which was a mop of black hair, ball-shaped, and a foot in diameter. On a former visit, the sheik had requested medicine for himself, (an experiment he had *never tried*,) for a troublesome affection of the head. I suspected a costive habit and full eating as the cause, and gave him salts. He now expressed himself highly gratified with the relief he had experienced. After an hour they left, saying, "peace, peace be unto you."

ROTHSCHILD'S ALMS TO JERUSALEM.

The Chief Rabbi came out last week and informed us that Rothschild of Paris had sent his secretary with a large amount of funds to invest in this land, and commence some industrial operations for the poor, the character of which he was not informed. He expected him by steamer the next day, and that he would spend some hours at his house before proceeding to Jerusalem. He *insisted* that I would give him a letter containing a statement of our plan, and an appeal for the Jaffa Jews, which he says have generally been neglected in the distribution of alms. Yesterday, in company with a Jewish banker of Beirout, he came to show our cultivation. His friend remarked that he had visited Mr. Levi's bianah before, and found it in a wretched condition, but now he rejoiced to see every thing in good order and flourishing, and was happy to see a Jewish estate here give such fine promise. Mr. Levi also informed me that the secretary of Roshschild had read our statement, and said he would first spend a few weeks in Jerusalem, and then visit Jaffa, on his way to Constantinople, to obtain a firman to secure the land and privileges he should afterward require; but his definite intentions were either not matured or withheld from Mr. Levi. About two weeks since, Sir Moses Montefiore sent a large sum of money as alms to the poor in Jerusalem, who have suffered exceedingly from the late high prices of breadstuffs. We are happy, however, now to inform you that the present harvest returns have been unprecedented in quality of grain and quantity gathered.

PRESENT CROP AND PRICE OF WHEAT AT JAFFA.

Before harvest, wheat advanced to 25 piasters per measure; now there are immense quantities daily coming to Jaffa, and the price had yesterday fallen as low as 8 piasters per measure. Several English vessels had obtained a cargo, others waiting in the harbor, receiving letters from England of the fall of the price of grain at home, weighed anchor and left the grain merchants disappointed.

THE JEWS LEARNING AGRICULTURE.

Mordecai, an interesting young Jew who had labored industriously with us nine months, having saved his little earnings for that purpose, will leave us now, for a few weeks to visit his friends in Damascus and bring his wife and child. We have received two laborers this week, Elias, a very poor man from Aleppe, and Marcus, a young German Jew from Jerusalem; he is without parents or friends and is very anxious to labor with us. We still mourn our inadequate ability to receive and accommodate a tithe of the most destitute.

WANTS OF THE MISSION.

We need *shelters*, also coarse blankets and coverlids. We make mattresses of coarse muslin filled with corn husks, but we cannot easily obtain a substitute for the blankets. The nights being damp and cool, and sleeping on the ground, out doors, or in exposed places, makes a larger supply necessary than if we had comfortable rooms and bedsteads—a luxury that the poor of this land never enjoy. The supply we first brought with us, and those received a year since, from such constant hard usage, have become much worn, despite of mending and washing and the best care.

CHRISTIAN PSALMODY.

Our quotations have been sufficient to show that, in the preparation of a metrical version of the Psalms, a strict adherence to the text is impossible. Either the principle must be admitted, that God is suitably worshiped in psalms, and hymns, and spiritual songs, of human composition, or else Christian congregations must universally adopt the style of music called *chanting*. We might multiply our quotations to almost any extent, showing how the Scotch version often slips in a word not warranted by the original, to say nothing of the substitution of other words for those found in the text, not always synonymous, the frequent changes of tense, the substitution of plural nouns for singular, and *vice versa*. But any one who will take the trouble to compare the version with the common translation, will be convinced that we have brought against it no unjust charge.

Now, since the principle of varying from the exact language of the text is, necessarily, adopted in any metrical version of the Psalms, we cannot see but what such a version is as substantially a human device, as are the psalms of Watts, Milbourne, Tate and Brady, Patrick, and others. The difference is only in the extent, or degree, to which this variation is carried. Watts makes no pretension of adhering, rigidly, to the *language* of inspiration, in his compositions; yet he does pretend to express Bible *ideas;* and so far as all the purposes of psalmody are concerned, we are not able to see wherein his compositions are deficient. The principal purpose of psalmody is "to express unto God what sense and apprehension we have of his essential glories, and what notice we take of his works of wisdom and power, vengeance and mercy; it is to vent the inward devotion of our spirits in words of melody, to speak our experience of divine things, especially of religious joy."

Such being the object and intent of this part of worship, we must candidly say, notwithstanding it may appear irreverent to some, that we consider the compositions of Dr. Watts better suited to the circumstances of Christians than a literal rendering of the Psalms of David. For though the Psalms of David celebrated the wisdom, and power, and vengeance, and mercy of God, as illustrated in his dealings with the Hebrew nation, and were a fit expression of the joy that pious Israelites felt, when they saw how God fought for them, what miracles he wrought for them, and with what particular circumstances of justice he rebuked the heathen nations round about them; it cannot reasonably be pretended, that the condition of Christians is so similar, as to demand the same language for the expression of their praise. Did *Christians* undergo a servitude in Egypt? Did *they* escape, pursued by Pharaoh and his host? Did *they* pass over the Red Sea on dry land? Did *they* behold their enemies all dead upon the sea shore, that they should make it the occasion of praise to God, as though the deliverance had been wrought for *them?* Would it be an expression of *their* experience to say, "O God, the heathen are come into thine inheritance; thy holy temple have they defiled; they have laid Jerusalem on heaps. The dead bodies of thy servants have they given to be meat unto the fowls of heaven, the flesh of thy saints unto the beasts of the earth. Their blood have they shed like water round about Jerusalem; and there was none to bury them. We are become a reproach to our neighbors, a scorn and derision to them that are round about us?" (Psalm 79.) Can *Christians*, with any truth, regard themselves as assaulted by Edomites and Ishmalites, Moabites and Hagarenes, Philistines and Amonites, and then call upon God to do unto them as to the Midianites; as to Sisera, as to Jabin at the brook of Kison?—to make their nobles like Oreb, and like Zeeb, and all their princes as Zebah, and as Zalmunna? (Psalm 83.) Can *Christians* pray, "Forgive us our trespasses, as we forgive them that trespass against us," and then sing, "As for the head of those that compass me about, let the mischief of their own lips cover them; let burning coals fall upon them; let them be cast into the fire; into deep pits, that they rise not up again?" (Psalm 139: 9, 10.)

Now, as the object of psalmody is to express *our own* personal experience of divine things—to declare to God how *we ourselves* feel in view of his works of wisdom, power, and mercy, as displayed in our behalf—it must be allowed, that language like the foregoing, and a great deal besides in the Hebrew Psalter, is not appropriate to those who live under the gospel. The only way in which its use can be defended, is to say that, while we sing the words of David, we must apply them in our own meditation to the things of the New Testament. But if, while we use such words, we do not mean what they literally express, why should we be confined to them? Why should we not employ such words as will express just what we *do* mean? If the Church of Christ, speaking of herself, in the language of the Psalmist, as having once been in Egypt, means, in reality, that she was once in bondage to sin, where would be the sin of expressing it thus in so many words? If her redemption from Egypt, for which she gives God praise, means nothing more than her ransom from sin by the blood of Christ, why not say so? If her afflictions at the hands of Midianites, and Amorites, and Moabites, and so on, mean her persecutions from the wicked powers of the world, would it be wrong to express it so in plain terms? If her captivity in Babylon, her sitting by the Euphrates and weeping at the remembrance of Zion, mean some remarkable event in her own history, why not let her song of mourning, or of praise for delivering mercy, express plainly what event is alluded to, so that every one of her members may "sing praises with understanding?" If the language, "I will divide Shechem, and mete out the valley of Succoth; Gilead is mine, Manasseh is mine, Ephraim also is the strength of mine head, Judah is my lawgiver, Moab is my washpot, over Edom will I cast out my shoe, over Philistia I will triumph; who will bring me into the strong city? who will lead me into Edom?" is simply typical, under which is concealed some meaning that Christians must have in their mind when they use it in singing, what sin can there possibly be in exchanging the typical language for that which is plain? But since it is doubtful whether any thing typical was intended by such expressions, or, if there was, whether the true typical import of them is, or can be, understood by the great mass of Christians, the doctrine that the Hebrew Psalter was designed as a manual of praise for the Church in all ages, is to be received with extreme caution, to say the least. But perhaps we shall have more to say.

T. B. B.

BRITISH CORRESPONDENCE.

GLASGOW, October 20th, 1854.

The *Times* published a letter professing to be from the Chinese patriots, addressed to the residents of Hong-Kong. The tone of contempt for the "outside barbarians" which it exhibited, seemed so much the opposite of the previous courtesy of the patriots towards Christians, as to afford ground for the belief that the document was a forgery. Tae-ping-wang's resolution of putting down opium-smoking, as well as idol worship, directed suspicion to the traders in the contraband article as the inventors. Captain Edmond Fishbourne, who was at Nankin in the Hermes, has, in the *Dublin Express*, pronounced his unhesitating conviction, that the document is a forgery; but he supposes that it may have been fabricated either by the Imperialists, with a view to promote a jealousy, or by those "who think differently, on religious subjects, from the insurgents." He states, not only from his own knowledge, but also as "the united testimony of the English, French, and Americans, who visited Nankin, the head-quarters of the insurgents, that they never designate the Europeans otherwise than as 'foreign brethren,' the latter used in a religious sense, upon the supposition that all Europeans believe with them in the 'Ten Celestial Rules' or 'Ten Commandments.'"

It would be melancholy indeed to think of a zeal in religious matters which would commit forgery in order to misrepresent those whose views were disliked; but if the Chinese will indeed keep the Ten Commandments, they will have both the favor and protection of One who is able to protect them against even ecclesiastical malice. Their past preservation from the influence for evil of even erring brethren, seems worthy of notice, and of thanksgiving. He who "hath made of one blood all nations of men, for to dwell on all the face of the earth, and hath determined the times before appointed, and the bounds of their habitation, *that they should seek the Lord*, if haply they might feel after Him, and find Him"—the God of grace, who brought Paul to Athens to proclaim this blessed truth, also brought the Rev. Mr. Roberts to him who is now known as Tae-ping-wang to hear and learn the way of salvation, when haply feeling after Him. The servant of God communicating the knowledge he had derived from Scripture has success in his work, and will not lose his reward, if he hold fast to the end. His disciple proceeds in the heavenly lesson, and giving ear to God's Word becomes in one respect at least more perfect than his teacher, and remembers *God's* holy Sabbath when that teacher remembers man's. In mercy to Roberts, as well as to Tae ping-wang, the same God who brought them together for good, keeps them apart, when injury might result. In this light it is surely instructive to read brother Wardner's remark, that Mr. R. has been detained at Shanghae nearly a year, "waiting and watching for an opportunity to go to Nanking but without success. No arguments or entreaties could prevail with the officers of the Susquehanna to take him, though they took two other 'missionaries,' and one of them out of the very house in which he lives." About the same date Mr. R. himself writes, that he "is still at Shanghae, though he has greatly desired to get to Nankin." "One of his own countrymen did give him a free passage to Shanghae;" "another conveyed him up in sight of Chin-Kiang-foo; and an English gentleman has offered to charter a steamer to take him there. But he is still here." "He really believes, at this crisis of affairs there, it would be worth the trouble and expense to any nation engaged in the trade," . . . . "to send a steamer specially to convey him there." Such is his present opinion; but "the Lord seeth not as man seeth," and Mr. Roberts may yet be brought to the mind of his God in the matter.

The *Overland Mail*, which supplies us with these notes, furnishes a copy of a long letter of Mr. Roberts, from *The Friend of China* of July 29th, proposing the formation of a Committee, and plan of missionary operations, without control of the Societies by which the missionaries are sent out, leaving them answerable only to "*God and the Committee itself.*" These male missionaries from all countries he would have to "coöperate with one another, and with Tae-ping-wang and his Chinese converts, as far as practicable, in spreading the Gospel to the utmost in China." We shall hail with delight the day in which the heralds of the cross and crown of Jesus shall go forth as of old with more reliance on His omnipotence, answerable only to Him and not even to "the committee itself."

At the date, Aug. 22, Shanghae was still in the hands of the patriots, who are stated to have taken two more towns in Keang-se province, but to have sustained reverses in the north. The statements relative to these reverses, however, being extracted from the *Pekin Gazette*, may be unfounded or exaggerated. Fuh-shau, on the Canton river, formerly stated to have fallen into the hands of the patriots, has been retaken by the Mandarins. All the country around Canton is under patriot authority, and 600 Imperialists were killed in an attack upon the north gate of the city itself. That city is expected to be taken immediately, and there is every probability that the land of Sinim shall shortly have cast its idols to the moles and to the bats.

J. A. BEGG.

CENTRAL ASSOCIATION MATTERS.

BROOKFIELD, Oct. 26.

BROTHER J. C. ROGERS, Cor. Sec. of the Central Association.

DEAR SIR,—It appears, by the communications forwarded to you by the Seventh-day Baptist churches of Adams and Hounsfield, and published in the *Sabbath Recorder* of the 19th inst., that those churches do not fully comprehend the object had in view by the several churches which presented to the Association the matter in question; nor of the Association, in the appointment of a Committee to investigate and settle the matter of dissatisfaction and difficulty existing between the Sabbath-keeping churches in Adams and Hounsfield. The undersigned, who were instrumental in bringing this subject to the notice of the churches of Brookfield, and who recommended the presentation of it to the Association for its consideration, wish through you, as the organ of the Association, to explain to those churches, and to the Committee appointed to visit them, what was the intention of the Association in that appointment.

We would here say, that in the communication made to the Association relative to this matter, there was no intimation that there was any difficulty between the church in Adams and the church in Hounsfield, which were members of the Association. It seems strange that there should be any misunderstanding in the minds of the delegates from those churches as to the understanding and intention of the Association in the appointment of the Committee. It must be well known to those churches, that the difficulties alluded to are referable to the Independent Church in Adams, and to that only. It is known to all who are acquainted with the circumstances of its organization, that it originated in the unpleasant and isolated condition of those members of which it was composed, who were principally, if not altogether, expelled from the Adams and Hounsfield churches, on account of their non-concurrence in certain acts and decisions of those churches, which they believed to be inconsistent with the purity of the gospel, and the established discipline of our denomination. On this account they suspended their travel with the churches of which they were members; and after seeking in vain for relief from those churches, they carried their complaints to the Association. Relative to the complainants of the Adams church, it may be proper to state, that after their complaint was received by the Association, they withdrew it on account of the absence of certain brethren on whom they had relied as unexceptionable witnesses to sustain their complaint, being impressed that they (the complainants) would not be accepted as witnesses in their own case. But the complaint from the members of the Hounsfield church went into the hands of a special committee, to which it was referred. This committee reported, that after a careful investigation of the complaint, and evidences therewith submitted, they have come to the following conclusion, that the complaint, together with the evidence adduced, are not sufficient to warrant the Association in entertaining an action against the Hounsfield church for corrupt discipline. Now, however highly we esteem the members of this committee for their piety and talents, we are not satisfied that the course they pursued in their investigation of this complaint was in any way calculated to impress the complainants, that justice was done them in the committee's report. For the investigation was entirely *ex parte*. The complainants were not allowed to come before the committee to sustain their complaint. A member of the committee requested that the complainants should be heard; but he was told by another influential member, 'that it was not the committee's business to look up witnesses.' When it was stated that those brethren were at hand, and ready to come in when wanted, the reply was, that 'they did not want them—that their duty was similar to that of a grand jury.' The record of the church appears to be all the evidence adduced on the occasion. The complainants had good cause to be aggrieved at the course the committee pursued. Nor were all the members of the committee satisfied that the complainants had been treated with justice and Christian courtesy. One of them said the next day after they had rendered their report, that on this account he had passed a sleepless night; and another one of them said to one of the undersigned, that they did not pretend to go into a proper investigation of the matters complained of, and that he did not suppose that their investigation would be final. Their report was submitted to the Association without comment or explanation by the committee, and they could not be prevailed upon to state to the Association anything relative to the evidence by which they had arrived at the conclusion expressed in their report. However it may have appeared to the committee, it appeared to many members of the Association to be very far from a *careful investigation* of the complaint. This report was adopted, to the evident dissatisfaction of many members of the Association. The *question* was urged with the evident design to shut out remarks from the members, and it was voted upon precipitately and blindly. We are of the opinion, that since the organization of the Association, no resolution of equal importance has been adopted by it with such imprudent haste. Now the church of Hounsfield is willing to submit to the investigation of the committee appointed by the Association at its recent session, whatever their church records show to have transpired since the session of 1851, when they must know, that the corruption complained of was prior to that date. And they decline any trial or investigation before the committee, with any person or persons who have been expelled from their fellowship. There is, therefore, nothing to be submitted by this church to the committee; for it is probable that the church has expelled all who have made complaint against them.

The communication from the church in Adams seems to come a little nearer to the wishes of the Association. It says, "If reference be had to our position in relation to the Independent Church," &c. The Adams Church can have no room for a doubt that their position and relation to the Independent Church is intended, and we should rejoice in seeing these churches in a more evangelical relation to each other. The Adams church says, that many of the members of the Independent church have been excluded from their fellowship, 'yet they have no unkind feelings towards them, and shall be glad to fellowship them, as soon as they can have evidence that they are in fellowship with God.' We are glad to hear them say this. But it is a point that both the Adams and Hounsfield churches would do well to consider, that expulsion from a church is not proof of a want of fellowship with God. The man in the Gospel who was born blind, was cast out of the church for confessing what he believed to be the truth. Luther and Tyndale were expelled and anathematized by the church for the same cause; and many of our most efficient members, both in the ministry and laity, have been in like manner, expelled from their several churches, simply for obeying the dictates of truth. And for what crime were those members expelled, aside from their non-concurrence in what they deemed corruption in the disciplinary action of those churches? They should not be deemed malefactors on this account. If they have been misled in regard to their duty in this matter, and are willing to submit the whole matter of their grievance to disinterested brethren, giving assurance as they do, that they will be guided by their counsel, it does appear to be the duty of those churches, holding them in this unfriendly relation, to submit to the investigation of the committee, in like manner, every point of dissatisfaction existing between them. Though the Independent Church be not a member of the Association, they are not the less our brethren, and as really Seventh-day Baptists as they were before their separation from their respective churches. If they have erred, let us use kind and Christian efforts to reclaim them. If they have been wronged, let the same kind and judicious course be pursued in making them restitution. We are persuaded that if those churches will meet their brethren on this ground, they may yet be united in Christian love and fellowship. This is what the Association asks, and short of this, there is scarcely a probability of the committee being of any practical benefit, and the committee will probably consider their appointment a nullity.

W. B. MAXSON,
ELI S. BAILEY,
J. CLARK.

MISSIONARY OPERATIONS IN CHINA.

The following extract from a letter of Bishop Boone, resident at Shanghae, China, suggests a new mode of missionary operations, and shows that in China there is just now great occasion for self-denying labor:—

You know how strong an advocate I have been, and still am, for sending out married men. At present, on account of "the distress," I would recommend the sending of only single men. Of such men I would venture to send as many as six if they can be had, and keep them in the field, if we have to send the women and children all home. I shall not be at all surprised if it comes to this with respect to Mrs. Boone and our two children; but my mind is, God giving me health and strength, to stand by the work, with all the men that will cling to me, let what may come.

The distress among the people here is dreadful; it is really heart rending to hear the sad stories they are coming to me with every day. They bring their children in great numbers to our schools, and refuse to take them away, when we sorrowing are obliged to decline them. The day before yesterday I was, however, completely overborne by a widow woman. She said she had a son twelve years old, the finest fellow that had ever been seen in these parts—tall, noble-looking, clever—had been reading the books ever since he was five years old. It was in vain I told her I had now one hundred children to feed, and that money was so scarce, and provisions so dear, I could not take any more children. She said she knew it was all true; but that he was such a fine, noble fellow, and they had been our neighbors, too, at Wong-ka mo-dur, where she had seen Miss Jones every day out of her window; and her house had been burned by the soldiers, and all she had was gone. And then she stood silently wiping her eyes, and looking at me, as much as to say, you can't say no. I began to wipe mine too; but I stood firm, and I told her I really could not take any more children. She answered, "To-day is the 8th, it is too late; I can't bring him to-day, I shall bring him tomorrow." She stood before me the living picture of the Syro-Phœnician woman, and I could withstand her pleading no longer. I told her to bring her son. May he prove a chosen vessel, as noble in the sight of God as he is in his widowed mother's heart!

THE SECOND COMING OF CHRIST—NO. 2.

BY B. CLARK.

"Unto them that look for him, shall he appear the second time, without sin [i. e., without being an offering for sin] unto salvation."

The Manner of His Coming.

Many suppose that His second coming is to be spiritual, or, as Dr. Beecher said at the World's Convention in London, "the knowledge of the Lord will fill the earth; in this will be manifest the coming of the Son of Man." Far different this from Scripture testimony. His second coming is to be in like manner as was his ascension. "This same Jesus which is taken up from you into heaven, shall *so come in like manner* as ye have seen him go into heaven." Did he ascend in "*a cloud?*" Then he will come in a cloud. "And they shall see the Son of Man coming in the clouds of heaven, with power and great glory." "Behold, he cometh with clouds; and every eye shall see him."

Did he ascend *personally?* Then he will come personally. (We do not understand that flesh and blood can inherit the kingdom of God; neither that he ascended with the "natural body" which he had before his resurrection. "It is sown a natural body, it is raised a spiritual body." 1 Cor. 15: 44.) And that he ascended personally, with that same spiritual body in which he was raised, we suppose will not be disputed.

He will come "*in the glory of his Father.*" After saying this, he added, that some were present which should not taste of death till they see the Son of Man coming in his kingdom. After six days he was transfigured before Peter, James, and John; and his face did shine as the sun, and his raiment was white as the light. Matt. 16: 27, &c. This would show the glory of his coming kingdom.

He will come *in his own glory, and all the holy angels with him.* Matt. 25: 31. "When the Son of Man shall come in his glory, and all the holy angels with him, then shall he sit upon the throne of his glory."

He will come "*with all his saints.*" Zach. 14: 5; 1 Thes. 3: 13. And "*them which sleep in Jesus* will God bring with him." "They that are Christ's at his coming." He will "descend from heaven with a shout, with the voice of the archangel, and with the trump of God; and the dead in Christ shall rise first."

He will *stand on the earth.* Job saith, "I know that my Redeemer liveth, and that he shall stand in the latter day upon the earth." Zachariah saith, "And his feet shall stand in that day upon the mount of Olives, which is before Jerusalem on the east, and the mount of Olives shall cleave in the midst thereof, toward the east and toward the west, and there shall be a very great valley," &c. "And the Lord shall be king over all the earth; in that day shall there be one Lord, and his name one." Ch. 14.

As to *the condition of the world* at his second coming, I once thought that the nations would cease to learn war—that there would be universal peace and holiness—that all would know the Lord, from the least to the greatest—and that the knowledge of the glory of the Lord would fill the earth as the waters do the seas, *before* the second coming of Christ. But now I believe that this will be *after* the second coming of our Lord. Peter saith, "We, according to his promise, look for new heavens and a new earth, *wherein dwelleth righteousness;*" but that the heavens and the earth which are now, are reserved unto fire against the day of judgment and perdition of ungodly men—"that there shall come in the *last days* scoffers, walking after their own lusts, and saying, Where is the promise of his coming?" And we are to understand, that "evil men and seducers shall wax worse and worse, deceiving and being deceived." And as was the condition of the world in the days of Noe and Lot, so shall it be when the Son of Man cometh. The coming of Christ is represented to be at the same time when the whole world are being gathered to battle by the spirits of devils. See Rev. 16: 13, 14, 15. These "three unclean spirits, like frogs, coming out of the mouth of the dragon, and out of the mouth of the beast, and out of the mouth of the false prophet," we understand to be the *war doctrine* taught by Paganism, Antichristianity, and Mahomedism. These are "spirits of devils, working miracles, which go forth unto the kings of the earth, and of the whole world, to gather them to the battle of that great day of God Almighty. Behold, I come as a thief. Blessed is he that watcheth, and keepeth his garments, lest he walk naked, and they see his shame." These spirits seem to be all now at work, deceiving the nations, and gathering them for war! The spirit of Christ is, "not to destroy men's lives, but to save them." But as a frog can live in two elements, so these spirits teach that war is right—that a man can live in two elements—can *be godly*, and at the same time be a popular *murderer* or a *man-killer!*

The coming of Christ *when not expected* by the world. "For as a snare shall it come on all those that dwell on the face of the whole earth. Watch ye, therefore, and pray always, that ye may be accounted worthy to escape all these things that shall come to pass, and to stand before the Son of Man." "But of the times and the seasons, brethren, ye have no need, (said Paul) that I write unto you, for the day of the Lord cometh as a thief,"—(unexpected.) But the *brethren* were not in darkness; so that day would not overtake them as a thief.

He will be revealed from heaven with his *mighty angels, in flaming fire taking, vengeance, &c.* 2 Thes. 1: 6—"Seeing it is a righteous thing with God to recompense tribulation to them that trouble you, and to you, who are troubled, *rest with us, when* the Lord Jesus shall be revealed from heaven with his mighty angels, in flaming fire, taking vengeance on them that know not God, and obey not the gospel of our Lord Jesus Christ; who shall be punished with everlasting destruction from the presence of the Lord, and from the glory of his power; *when he shall come* to be glorified in his saints, and to be admired in all them that believe, in that day." Therefore, "take ye heed, watch and pray; for ye know not when the time is." Mark, 13: 33.

"TEMPEST IN A TEAPOT."

"Parturiunt montes, ut nascitur ridiculus mus."

The readers of the *Recorder* may remember, that I took occasion, a few weeks ago, to pen some thoughts on "*Geology and the Bible,*" suggested by the *fulmination* of "W. M. F." It seems that my efforts, humble and unpretending though they were, have entirely overcome the writer's determination not to fulminate again, and thrown the placid waters of his indignation into such fury that their foaming waves lash the very stars.

To relieve my readers at once from all concern for me, I will just here announce, that I feel *totally incompetent* to attempt a reply to the article of W. M. F., in the *Recorder* of Nov. 2. It is, beyond all question, an article that had better be let alone. It was perhaps entirely proper for the writer to scourge the "follies" of geologists with "the lash of satire," on the scriptural principle, "Answer a fool according to his folly, lest he be wise in his own conceit." There is another scriptural principle, which I deem of equal importance, and which I propose to make my rule of action in this case. It is this, "Answer *not* a fool according to his folly, lest thou also be like unto him."

I am entirely content that the reader should judge who has got up the "tempest in a teapot," and whose articles are the best demonstration of Sambo's wise saying about "more noise dan wool." The reader too may judge who has trod on a "cat's tail" and elicited "such caterwauling as is seldom performed over the types of a religious newspaper," and who has "spit his spite and left untouched the real points at issue."

The writer's objections to *argument* on the questions at issue are probably good. But still, most candid readers would decide that much argument might be contained in an article covering a whole broadside of a large newspaper, and I am not quite sure but that good substantial argument on this most interesting question, would as well become a religious newspaper, as such bar-room gasconade as fills the columns of the last *Recorder*.

I think the writer has demonstrated his own suggestion about the difficulty of writing satire, for his article falls far short of the dignity of *respectable* "satire;" and, what is most lamentable of all, is the fact that he writes in the name of religion. If *religion* resorts to *such means* for support, to what may not *infidelity* resort?

I simply wish to call the reader's attention to the true issue, and there leave the subject, until some one shall undertake to refute, by *candid argument*, the position I have assumed. W. M. F. may write as many "satires," in the mean time, as he pleases. It is not affirmed by geologists generally, that the days described in the Mosaic account were "lengthened periods," but that they were literal days of twenty-four hours each. It is not affirmed that the creation described in Genesis was a partial work, affecting only a limited portion of the earth's surface, nor is it denied that creation was a miracle. All these are false issues, dragged in to hide the true issue, and make men see facts with purblind eyes. The position assumed by geologists generally is this—that the Mosaic account *does not fix the date of creation*, and that the well-established facts of science show the antiquity of the earth to be very great. This I believe to be *truth*, and from the numerous evidences which attest it, I gave a few items in my last article. As no attempt has been made to invalidate the proof offered, I of course have no occasion to say more at present.

I have unwavering faith in the truths of the Bible, and in the perfect coincidence of the truths of science with them. I believe that science and religion are handmaids of God, each declaring his glory, and singing his praise in harmonious concert. I believe that religious truth is that truth which teaches of God and his attributes. I believe that scientific truth does teach of God and his attributes, and therefore, that it is religious truth. The heavens declare the glory of God, and the "firmament showeth his handiwork." In the good time coming, I believe that religion and science are destined to mingle their pure waters, like rivulets from adjacent hill-sides, and, thus blended, are to bear man on to his exalted destiny. May God speed the good time.

D. E. MAXSON.

THE MEMORIAL.—One more number will complete the third volume of the *Seventh-day Baptist Memorial*. Those who have not paid for that volume (about one-half of the list) are requested to do it without delay. The Board have ordered the fourth volume published, commencing with January, 1855. Those who do not notify us to the contrary before that date, will be considered subscribers for the fourth volume.

The Duty on Coal.—The duty on coal brought from England is so high (thirty per cent.) as to prevent its importation to any great extent. Taking advantage of this duty, the monopolists of coal mines in this country have raised their prices to so high a figure that the people are beginning to call for the abolition of the duty. The following petition is being widely circulated in Boston:—

To the Honorable Senate and House of Representatives of the United States:

The undersigned, people of the United States, and residents of Boston, in the State of Massachusetts, respectfully petition your honorable bodies TO REPEAL ALL DUTIES NOW EXISTING BY LAW UPON THE INTRODUCTION OF FOREIGN COALS.

Recent action of the most prominent Coal Operators in the country has demonstrated the impropriety of further protection of an interest abundantly able to take care of itself; and your petitioners represent that an immediate repeal of the existing burthensome NATIONAL COAL TAX. would be hailed with satisfaction by every class of the community not directly interested in speculative combinations to raise the price of coal.

Something Worthy of the Dark Ages.—A correspondent of the *Semeur Canadien* writes to that paper, from Christieville, under date of September 2d: On Sunday last, the 28th August, a person by the name of Chamberland (very poor) attended mass in the R. C. Church in this village. When the ceremony of kneeling arrived, he immediately knelt on one knee, not feeling strong enough to put both knees down on account of recent illness; the person employed to keep order in the church came up to him and requested of him in a peremptory manner to get down on both his knees; he made answer that he was too feeble to do so. He was in one of the aisles, and had nothing to support himself with but the knee he kept up. The employé took great umbrage at the refusal to obey his order, and summoned the poor man before a magistrate's court. The evidence given was, that Chamberland did kneel but on one knee, and, when requested to kneel on both, refused; in other respects he behaved himself decorously in church. The magistrate condemned the man to pay a fine of 5s. and costs, the latter of which will not be less than 15s."

Pastoral Letter.—Archbishop Hughes, who has gone to Rome, issued on the eve of his departure a pastoral letter, promulgating some of the regulations adopted by the late Provincial Council. Among them are these; Banns of matrimony are henceforward to be published in the usual form, in order to prevent improper marriages. The jubilee proclaimed by the Pope commenced Nov. 1, and continues to Feb. 1. The conditions upon which the benefits of this jubilee are to be secured are: 1. A worthy reception of the Eucharist and the sacraments of penance. 2. To fast once during the period, on any Friday the party may select. 3. To give alms to the poor, according to means. 4. Those who reside in the thickly-settled portions of the City of New York are to visit three churches and offer prayers for the exaltation of the Holy Mother, the safety of the Pope, the removal of heresy, and for charity, union and harmony among Christian nations. In addition, the Litany of the B. V. Mary, the Lord's Prayer, or Hail Mary seven times, must be said.

Infant Sprinkling in New England.—The Boston correspondent of the Journal of Commerce says:—

"A Presbyterian pastor of this city baptized three infants last Sabbath in his own house of worship, and in connection gave to the parents quite minute directions as to the duties they owed to their children. He gained their assent that they would perform these duties. In our Congregational churches we fear that there is considerable indifference and neglect in reference to infant baptism. In one of our oldest churches in this State, there had not been, a few years since, an instance of infant baptism for the seven preceding years. Last year there were seventy Congregational churches in New Hampshire that reported no infant baptisms. This year ninety-six churches, or about one half in the State, report none. If this indifference continues, the ordinance will become extinct in the Congregational church."

The Portuguese Exiles.—The New York *Evangelist* says that the Church of the Portuguese exiles, at Jacksonville, Ill., for whom so much public sympathy has been felt, has been embarrassed even to schism by the vexed question of the validity of Romish baptism. The pastor of the church, Mr. de Matteos, who is a converted priest, and has been a great sufferer for conscience' sake, maintains the ground that such baptism is valid; while Dr. Kalley, the old friend of the Portuguese, to whose labors the introduction of Protestantism into Madeira is due, and who naturally maintains a strong influence over his people, takes as strong ground against the doctrine. The consequence is, that the church is likely to be, if it be not already, divided.

Large Bequest.—A Mrs. Wilson, a native of Belfast, but for many years a resident of London, died of the prevailing epidemic a few days ago, leaving, it is stated, an immense estate of £30,000 to the poor of her native town; the interest of that large amount to be divided amongst poor widows over sixty years of age, each recipient to have 7s. per week. The same lady has also bequeathed £5,000 to a deaf and dumb asylum, as also £20,000 to various charities about London. Only three weeks preceding her death, she gave three donations of £500 each to charitable institutions in Belfast, when, at that period, she seemed in the full enjoyment of health and happiness.

The Kidnapper in Massachusetts.—On Sunday, Oct. 29th, Asa O. Butman, the alledged kidnapper of Burns, appeared in Worcester, Mass., where he was arrested on a charge of carrying concealed weapons. There was a great excitement, and the talk of lynching the victim alarmed some of the leading citizens, who took the fellow to the cars and let him slide. He left with the consoling fact to reflect upon, that he owed his life to the efforts of several of the most noted Abolitionists in the State.

Prohibition in Canada.—A letter dated Quebec, Oct. 28, 1854, says that the Legislative Assembly has adopted the principle of the Maine Liquor Law by a majority of 95 against 5. During the last two or three sessions, petitions for the adoption of a prohibitory liquor law have poured in in such numbers that opposition to their prayer became too perilous a thing for the popularity of members to be ventured upon to any considerable extent. Last year, the bill was only defeated by the utmost exertions of a portion of the Ministry, while it was not only supported but introduced by another member of the Government, who was pledged to his constituents to take that course. This year the result is as above stated.

A Hint for Ministers.—The *Christian Witness & Church Advocate* says: "A minister who loves leisure more than hard work; who would rather puff a cigar than handle a pen; who would rather read Dickens than Butler; who seizes upon every itinerating minister coming within hail, that he may save as many sermons as possible; who exchanges nearly half the time for the same reason; who, when forced to write a sermon, does it mainly on Saturday night, finishing it while the church-bell is ringing on Sunday morning; who goes into the pulpit with such a preparation, to give his people their portion of spiritual food, in what ought to be 'due season,' will soon find that he is not the right man for them."

Maine Law in Connecticut.—One of our exchanges says that this law is commending itself to many who at first opposed it on the ground that it could not be enforced. The law is strictly carried out, without fear or favor, and men who had not sufficient moral strength to resist the tempter when before them, are now steady and industrious, providing for the comfort of their families, as they have not for years, and the State is in a fair way to merit its old name of the "land of steady habits."

☞ **Eld. Phineas S. Crandall**, pastor of the 3d Church in Hopkinton, R. I., has been appointed Local Agent for the *Recorder* in that vicinity, and furnished with a list of subscribers showing the state of their accounts.

RELIGIOUS INTELLIGENCE.

Rev. Dr. Horatio Potter, recently elected Provisional Bishop of New York, and Rev. Alonzo Potter, Bishop of Pennsylvania, were the sons of Joseph Potter, of Duchess county, N. Y., a devout member of the Society of Friends. His eldest son, Paraclete Potter, became a bookseller and an editor at Albany, and was the first to join the Protestant Episcopal Church, of which he became a zealous member. His two younger brothers, Alonzo and Horatio, soon followed the same course.

The Committee of the Edinburgh Bible Society, with the concurrence of the directors of the several lines, have placed large Bibles in the waiting-rooms at the principal stations of the North-British, Edinburgh and Glasgow, and Caledonian Railways, for the use of the railway officials and passengers waiting the trains. The stations on several of the English lines have been supplied with Bibles and other religious books by private individuals.

An association for the diffusion of civilization and Christian light in Africa has recently issued a circular which shows that the number of blacks held in slavery in different countries is seven and a half millions, of which 3,095,000 are in the United States, 3,250,000 in Brazil, 900,000 in the Spanish colonies, 85,000 in Dutch colonies, 140,000 in the Republics of Central America, and 80,000 in European establishments in Africa.

Dr. Townsend, of this city, has donated four lots of ground, valued, in the aggregate, at $10,000, as a site whereon to erect a building for the "Christian Home for Female Servants." The "Home" is at present at No. 614 Sixth avenue, corner of Thirty-sixth street. It is effecting much good among that class of unprotected females for whose benefit it is specially designed.

"Father Sawyer," a Congregational clergyman of Maine, now in the one hundredth year of his age, preached on a recent Sunday, at Oxford, N. H. He was ordained in Oxford, in 1787, and after remaining for some years in his first charge, he removed to Maine, where he has been preaching for over fifty years.

The first meeting of the Williamette Baptist Association (Oregon) was held in 1848, at which time the number of communicants in the churches of the body was in all 87. These had increased to 442 at the last meeting of the same Association. There is a loud cry for help in that large and promising field.

Under the title of "A First Gift," £9,000 have been placed by an individual at the disposal of Rev. A. Nugee, late curate of St. Paul's, Knightsbridge, for the purpose of erecting a church in London, or in some large manufacturing town.

England and Wales have a bishop to every 2000 square miles, Scotland to every 3800, Ireland to every 2400, Upper Canada has one to every 140,000. The two Canadas have a Church of England population of about 300,000, and five bishops.

We learn of the safe arrival at Boston of Rev. Francis Mason, D. D., of the Tavoy Mission, and his family. They will, for the present, reside in that neighborhood. The health of Dr. M., though slightly impaired, renders the necessity of great quiet imperative.

One of the editors of the *Baptist Register*, who writes from western New York, says that both of the Baptist churches in Buffalo are destitute of pastors, and adds: "The complaint is that ministers are scarce. The fact is, churches want only now and then one of those that can be had."

We regret to see that an affliction has come upon the Grand Ligne Mission. The Mission premises at St. Pie, occupied by the girls' school, was destroyed by fire on Monday, the 16th ult. This calamity will, for the present, break up the school.

Some years ago, an English bishop, after taking possession of his see, made an inquiry as to what hymn-books were in use in his diocese, and he presently had not less than ninety different selections handed in to him.

European News.

European dates to Oct. 21st, state that the bombardment of Sevastapol commenced on the 13th ult. with 200 pieces of heavy artillery, and was expected to be brought to a crisis in three or four days. The next steamer will probably bring the particulars of the storming of the town. The Russian reënforcements have not yet been heard of, nor are there any indications as to when they will be on the spot, but unless the seige is at once pressed to a successful conclusion, the allies will have to fight another battle in the field before they can become masters of the town.

The French fleet has returned from the Baltic, and most of the English ships will come home also.

From the Danube, we hear that the Russians have reëntered the Dobrodja.

In Germany, a good deal of excitement is said to exist as to an apprehended rupture between Austria and Prussia.

From the various countries of the European continent there is no news of moment.

From Japan we hear of the friendly reception of the Lady Pierce, a clipper-yacht, belonging to Silas E. Burroughs of San Francisco.

In Paris great activity prevails in preparing for the great Exhibition of May next, which, if we may believe our French friends, will be the world's wonder!

Martin Van Buren.—The Paris correspondent of the *Evening Post* says that Mr. Van Buren is at Vevay in Switzerland, and is actually and earnestly at work upon his autobiography, in which he has already advanced some two or three hundred pages. He is very much interested in the work, and so will his readers be when it is published, which will not be until after his death, and that event, judging from his present appearance and condition, will be many years hence. The old gentleman seems to have parted with all his partisan animosities and prejudices—for he had some, though fewer than most men who have spent so large a portion of life in party conflict. He has been an indifferent spectator of politics in the United States so long now, that all his old prejudices and antipathies seem to have exhaled. He will not be home until next year. His health is not materially better.

Fight in Kansas.—The *Weston Register* of Oct. 19th gives account of a fight in Kansas on the 9th of October. It seems that a difficulty had for some time existed between Samuel A. Burgess and William A. Borden, with regard to a land claim on Stranger Creek. Each of the parties claimed a squatter's title to the same quarter section. They met upon the ground to adjust their conflicting claims. The matter then proceeded from words to blows, among which Borden was knocked down by stones, and a hatchet thrown by Burgess and his son, and the two Davidsons. Fleming S. Thompson then interfered to assist Borden, and was stabbed by some of the party in two places. It was feared that Thompson's wounds would prove fatal, but he is now doing better, and thought to be recovering.

SUMMARY.

A dispatch from the General Superintendent of the Ohio Central Railroad, states that the track is now completed, and a locomotive had arrived from the Ohio River. On the 15th of November the road will be formally opened by a grand excursion, in which will be represented all the great cities of the East and West. The invited guests from the cities east of Baltimore will reach there on Monday, the 13th, and will take a special train over the Baltimore and Ohio road, with the guests from Baltimore to Wheeling, where they will arrive early on the 15th. They will then go on to Zanesville, to Columbus, to Cincinnati, and, if they desire, to Indianapolis and other cities. The completion of this road opens a direct line from Baltimore to the interior of Ohio.

Beech leaves are said to be one of the best articles ever used for beds as a substitute for straw or husk, and much better than either of those, as they are elastic, clean, and very sweet-flavored, and not liable to get musty like straw in damp weather. The leaves should be gathered in dry autumn weather. Perhaps the leaves of some other species of tree may be equally good as the beech, though generally they are not so tough and free from all unpleasantness arising from long use or damp weather. They would be valuable for filling sea-going mattresses.

A Washington letter communicates the intelligence that the British Government have determined to abandon all assertion of the Mosquito Protectorate, as far as San Juan is concerned, and will leave the sovereignty of that place to be settled between the claimants without doing more than maintain the provisions of the Clayton-Bulwer Treaty as regards the freedom of the port and transit route. At the same time the claims of bona-fide British subjects for damages from the late bombardment of the town, will alone be urged by the Cabinet of St. James.

A dispatch dated Chicago, Ill., Friday, November 3, 1854, says: The passenger train for Rock Island, which left Chicago at 11 o'clock on Wednesday night, met with a most frightful accident, from the breaking of an axletree of the engine, when near the Minoka station—the result, it is said, of running over a horse upon the track. The engine and a portion or all of the cars were thrown from the track with great violence, breaking the ribs of the engineer, and killing, or wounding and scalding, from thirty to forty first-class passengers.

A dispatch dated Halifax, N. S., Friday, Nov. 3, 1854, says: The Newfoundland mail has arrived at this port, but brings no tidings of the missing boats of the Arctic. The yacht Hawk has returned from the search, saw nothing of the missing boats, and the captain thinks they must have been picked up by outward-bound vessels. Saw the body of a female, in a light dress, floating on the water, but as it was blowing a gale at the time, could not get it.

Some of the brokers are buying Knickerbocker notes at 90c., Eighth Avenue at 85c., Newport Safety Fund and Kentucky Trust Company at 40c., Bank of Hollowell and Ship Builders' at 50c., Farmers and Mechanics' Bank (Md.) and Mechanics' Bank (Memphis) at 40c., and Erie and Kalamazoo at 40 and 50c.

A letter from the N. Y. Journal of Commerce, dated Canton, July 30, says that a total cessation of business exists there. Thousands of families have already left the city, and daily others are leaving in crowds. The streets continue barricaded and guarded, and almost entirely closed, except those in old and new China streets. Engagements take place nearly every day north of the city, within a couple of miles from the city walls, and the apprehensions are great on the part of the Chinese, that the city itself must eventually be captured.

The brig Magnet, Capt. Hammond, arrived from St. Johns, N. F., Oct. 20. Capt. Hammond reports that all the vessels dispatched in search of the missing boats of the Arctic had returned, without finding any trace of them, and nothing had been heard of them at any of the ports of Newfoundland. Except, therefore, those in the boats had been picked up by some vessel bound to a distant port, all hopes of their safety must be given up.

David Thomas, who murdered Mr. Wm. H. Butler, of Caroline County, Md., on the 27th Sept., at Denton, was taken out by a mob on Saturday night, the 7th ult., at midnight, and hung. He had been convicted of murder in the second degree; but the mob thought he ought to have been convicted of murder in the first degree, and threatened to inflict summary punishment upon him at the time the Jury brought in their verdict, but were prevented by the officers of the law.

A correspondent of the Boston *Atlas*, writing from Marseilles, states that the English Consul at that place had received reliable information that the most fearful ravages of cholera were devastating Messina—no less than sixteen thousand persons having fallen victims out of a population of 40,000! A mortality hardly less than during the prevalence of the great plague in 1743.

At a late hour on Wednesday night, Nov. 1st, the extensive silk, lace and embroidery store of James Gray & Co., corner of Waverley-place and Broadway, New York, was broken open, and seventy-five pieces of silk, of the value of $10,000 or $15,000, stolen. The thieves entered by the basement, and by means of a brace and bit opened a door leading from the vaults into the store.

A return to the British House of Lords shows that there are 514 lunatics under the protection of Chancery. Of these, 36 had incomes not ascertained; 99 had less than £100 a year; 117 less than £200; 94 less than £400; 56 less than £1,000; and 65 more than £1,000. The total income of the 478 is £281,907, of which £177,825 is devoted to the maintenance of the patients.

A physician writes to the editor of the Louisville *Courier*, that a few days ago, "a young lady of Oldham county, in her ordinary health, (perfectly well, the family say,) rode two miles to a physcian and had a tooth extracted. Almost immediately a paralysis on one side of the body occurred, then stupor and death followed in a few hours. She had not inhaled chloroform or any thing of that kind."

The Winchester *Virginian* says, "Mr. John Wysong, of Berkeley county, informs the citizens that he has associated with him in the mercantile business, his daughter Virginia, and that hereafter the business will be conducted under the style and firm of J. Wysong & Daughter. We'll venture the prediction that the new firm will do a rushing business."

The Bank of England notes are now signed by machinery, which saves the constant labor of twenty gentlemen daily, who received each $2,500 a year for signing their names to about 1,500 notes daily. The saving thus effected to the Bank is $50,000 a year, and perfect uniformity is now obtained in the signatures.

The regular exhibition at the Crystal Palace closed on the last day of October; but as most of the articles that have been on exhibition since the opening will not be removed for a month yet, the Directors have determined upon admitting persons to the Palace for the nominal sum of 12 1-2 cents. All tickets are dispensed with, and none will be received at the door.

A dispatch dated Chicago, Saturday, Nov. 4, says: Eight deaths have occurred from the effects of the late Rock Island Railroad accident, at Joliet, and among them is the wife and two children of W. C. Laughlin, of Geddesburg, Pa. Twenty-five others still lie dangerously wounded at Joliet.

A statement of the profits of the Hamburg Gambling Bank shows them to average forty per cent. on the stock subscribed in shares. This is the severest commentary that can be given upon the ruinous nature of these splendid hells—forty per cent. profit after paying all expenses.

The extensive car-house of the Harlem Railroad Company, situated at the corner of Forty-second street and Fourth avenue, was entirely destroyed by fire, with a portion of its contents, between 9 and 10 o'clock on Saturday night, Oct. 28th. The entire loss is estimated at nearly $20,000.

It is computed that there will be twenty-one thousand miles of railroad in the United States on the first day of January next. The longest railroad upon the surface of the globe is the Illinois Central, which is seven hundred and thirty-one miles in length, and is rapidly approaching completion.

A writer in the London *Daily News*, who has visited the United States, and examined into the various plans and processes of paper-making in this country, says that the consumption of paper here is just four times per head what it is England, and may be put down at 300,000,000 lbs. annually.

The Monroe (Md.) *Sentinel* says:—Mr. Powell, an old Revolutionary soldier, ninety-five years of age, with his wife, seventy-five, left here on the 18th ult., for Nebraska, in company with several other citizens. Mr. P. is remarkably vigorous, capable of chasing a deer, with a rifle a-shoulder, 26 miles a day.

The money article of the N. Y. *Tribune*, Oct. 31, says: The contraction of the Banks has now continued with great severity for four weeks, during which the Loans and Discounts have been reduced nearly seven and a half millions of dollars, while the Banks have lost about $2,200,000 of Deposits.

The celebrated Lyman Cole, of Martha Washington notoriety, charged also with helping Kissane and Findlay in committing the great forgeries on the Chemical and other New York banks, has been taken at last and brought to this City.

The Morrisania *Journal*, Westchester Co., says that the original price paid for the land on which the village of Morrisania is built was $175 per acre. Single lots there are now worth $750. Indeed, some few lots, if for sale, could find purchasers at $1,000 each. In 1849 there were but 15 inhabitants; the number now is over 6,000.

The grand-jury of Richland, South Carolina, at a late session of the court, presented the laws against the African slave-trade, as detrimental to the interests of the South, and to the physical and moral nature of the slave.

We learn from Lafayette, Ind., that the Merchants' Bank of that place has suspended payment. The notes are selling in the street at 50 cents on the dollar. The securities of this bank are all Indiana 5s.

Stephen Keyes, Jr., a graduate of the University of Rochester, was ordained to the ministry at Almond, Allegany county, N. Y., Oct. 12.

The suspension of E. G. Merrick & Co., does not affect the Sackett's Harbor Bank, Merrick having resigned the Presidency before his suspension.

A new mode of making bread for the use of ships, so that it can be preserved indefinitely, has been discovered by M. Laverne, a French baker.

The receipts of the Milwaukee and Mississippi Railroad for the first three weeks of October were $54,273. The estimate for the whole month was $60,000.

The *Journal and Messenger* reports an interesting revival in Scotland, Greene county, Ind., resulting in the baptism of 36 converts.

The Governor has appointed Thursday, the 30th inst., as a day for Thanksgiving in Rhode Island.

A correspondent of the *Christian Times* reports the recent baptism of sixteen persons by the pastor of the Viana Baptist church, Ill.

The Money Brokers do not offer any thing for the notes of the Lewis County Bank.

New York Markets—November 6, 1854.

Ashes—Pearls $6 25; Pots 6 87 a 7 00.

Flour and Meal—Flour 8 56 a 9 00 for State, 8 62 a 8 75 for mixed Western, 10 50 a 11 25 for extra Genesee. Rye Flour 7 25 a 7 37 for fine, 8 00 a 8 25 for superfine. Corn Meal 4 62 for Jersey.

Grain—Wheat 2 00 for Western, 2 40 nominally for Genesee. Rye 1 30 a 1 31. Barley 1 37. Corn 85 a 87c. for Western mixed. Oats 50c. for Jersey, 52 a 56c. for State and Western.

Provisions—Pork 11 25 for prime, 12 25 for mess. Beef. 6 00 a 7 00 for country prime, 9 75 a 11 00 for country mess. Dressed Hogs 4 a 6c. Butter 15 a 18c. for Ohio, 18 a 23c. for State, 24 a 26c. for Orange Co. Cheese 9½ a 11c.

Hay—60 a 70c. for shipment, 80 a 90c. for local use.

Lumber—16 00 a 17 00 for Eastern Spruce and Pine.

Seeds—Clover 10¾ a 11c. Flaxseed 1 67 a 1 70 per bushel.

MARRIED,

At Woodville, R. I., by Eld. C. M. Lewis, on the evening after the Sabbath, Oct. 28, Mr. JOSEPH N. LANGWORTHY, of Hopkinton, to Miss MARY F. BURDICK, of Richmond.

DIED,

At Carolina Mills, R. I., on the 25th Oct., Dr. HAZARD WILCOX, in the 77th year of his age. He has long beer known as a man of skill in his profession, and much lamented in the community as well as a large number of relatives and friends, who mourn his sudden removal. J. G.

At Verona, N. Y., Sept. 23d, CHARLES JEREMIAH, infant son of B. F. and Margaret Chaplin, aged six months and seventeen days.

At his residence in Verona, Sept. 30th, JEREMIAH CHAPLIN, M. D., aged 84 years. Doctor Chaplin had been a resident of Oneida County about 50 years. Ever prompt in the discharge of his duty, remarkable for his uniform urbanity of manners, possessing intelligence of a high order, a kind husband, an indulgent father, a true friend, and a sincere Christian. He was a firm believer in the final salvation of all men, and met death with that calmness and composure which indicated his readiness for the great change that awaited him. A funeral discourse was pronounced by Rev. Mr. Machim, from Job 14th chapter, 14th verse, "All the days of my appointed time will I wait till my change come," which was listened to by a large concourse of people, after which his remains were conveyed to the solemn city of the dead. COM.

On the 2d of October, FLORILLA, daughter of John Lippincott, of West Union, Fayette Co., Iowa, aged about 18 years. She never made a profession of religion, but in her last illness she raised her heart to God in humble prayer for the forgiveness of her sins, and for admittance into the kingdom of love, where she might see the Saviour and be like him. Her father was on a visit to Ohio at the time of her death.

At Temperance Valley, R. I., Oct. 17th, ELIZABETH EVELINE, only child of Mr. Samuel P. Kenyon, aged 9 months.

In Hopkinton, R. I., on the 17th of October, 1854, at the residence of his father-in-law, Paul M. Barber, Capt. WILLIAM H. BARBER, aged 31 years.

In Hopkinton, R. I., on the 30th of Oct., 1854, Mrs. POLLY CRANDALL, widow of Amherst Crandall, deceased, in the 88th year of her age. She was a member of the 1st Hopkinton Church, and had long and patiently served the Lord.

In Walworth, Wis., Sept. 27th, 1854, of typhoid fever, Mrs. LOUISA READ, wife of Nathan J. Read, in the 36th year of her age. Sister Read lived and died a Christian, in the practical sense of that word, and the sorrow with which her family now contemplate her removal by death, is shared by a large circle of friends, whose love she won by her life of faith and labor of love. Sister Read moved with her family from Adams to Wisconsin last May, and in the brief space of four months thereafter, "just before sunset she was deposited in her grave." Our consolation is this, that those who live as she lived, and die as she died, are blessed, "for they rest from their labors, and their works do follow them." By request a funeral sermon was preached at Adams, Sabbath, Oct. 21st. J. S.

☞ In the obituary notice published three or four weeks since, of the death of Mrs. Coon, she was said to be the wife of Dea. Daniel Coon. She was the wife of Dea. Elisha Coon. J. S.

WILLIAM M. ROGERS, Treasurer.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health. A. UTTER, M. D., Physician and Proprietor.

Bound Volumes.

ON hand, and for sale at this office, the first and second volumes of the *Seventh-day Baptist Memorial*, bound together, in cloth and leather. Price in cloth $2 50; half roan $2 75; half calf $2 87; half morocco $3 00. Also, the first and second volumes of the *Sabbath-School Visitor*, bound together in cloth; price $1 00. We have also on hand several sets of the *Sabbath Recorder*, vols. 2 to 10 inclusive, which will be bound to order for those wishing them, at $2 00 per volume and the cost of binding. As the number of these books is limited, those wishing them should send their orders without delay.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commmencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare. GEO. H. PEGRAM, Sup't.

New York and Erie Railroad.

TRAINS leave pier foot of Duane-st., New York, as follows:

Buffalo Express at 6 A. M. for Buffalo direct, without change of baggage or cars.

Mail at 8¼ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Way Express at 12.45 P. M. for Dunkirk.

Night Express at 5½ P. M. for Dunkirk and Buffalo.

Emigrant at 6 P. M.

On Sundays only one express train, at 6 P. M.

These Express Trains connect at Buffalo with first-class splendid steamers on Lake Erie for all ports on the Lake; and at Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicogo, &c. D. C. McCALLUM, General Sup't.

To Printers.

A NEW EDITION OF THE SPECIMEN BOOK OF BRUCE'S NEW YORK TYPE FOUNDRY, was published in September, 1853, and will be given to those proprietors of Printing Offices who will send for it, or it will be forwarded to them by mail on receipt, in advance, of fifty cents for the postage.

In it are exhibited many articles never before shown; there have been added to the Foundry new varieties of Roman Types from Nine-line Pica to Pearl, various imitations of Writing, a great number of fancy founts, borders, both plain and illuminated, labor-saving rules, and a complete foundry of German.

The types now manufactured are cast from a new combination of great durability, and are usually kept on hand in large quantities. Every fancy fount is sold by weight, and at the printed prices, which are from ten to twenty-five per cent. less than those of some other foundries. All other printing materials are furnished at manufacturers' prices, either for cash or credit.

Printers wishing to open accounts with me, or whose dealings have been long suspended, are requested to accompany their orders with city references to prevent delay.

GEORGE BRUCE,
13 Chambers-st., New York.
51–3

Supreme Court.

IN the matter of the taking of lands for a new RESERVOIR, between 86th and 96th-sts. and the 5th and 7th-avs., in the City of New York. To all owners, mortgagees, lessees, occupants, and other persons, in any manner, by judgment, decree, or otherwise, entitled unto, or interested in the lands and premises above mentioned, or any part thereof: Notice is hereby given, that you are required to appear before the Commissioners of Appraisal in the above entitled proceeding, at their office, No. 293 Broadway, third story, front room, at 10 o'clock A. M., on any day, (Sundays excepted,) on or prior to the 21st day of October next; and to produce the evidences of your title or interest therein. In default whereof, and in case the persons entitled or interested as aforesaid shall not be ascertained by or be known to the said Commissioners, or be fully known, the same will be reported to the Supreme Court as belonging to unknown owners. It being the desire to consummate this great improvement, and to present the report at the earliest day consistent with a proper examination and due regard to the rights and interests affected, it is earnestly requested that all parties note and comply with the preceding notice, as no other or further notice will be issued. Dated New York, Sept. 1, 1854.

EDWARD C. WEST,
ABRAHAM TURNURE, } Commissioners.
DANIEL DODGE,

ROBERT J. DILLON, Counsel to the Corporation.

N. B.—All papers published in the City of New York are requested to publish the preceding notice until the 21st day of October next, once in each week, and to send their bills, with affidavits of publication, to the office of the Counsel to the Corporation, to be paid on the final taxation of the proceedings. 2t

Election Notice.

STATE OF NEW YORK—SECRETARY'S OFFICE, ALBANY, Albany Aug. 10, 1854.—*To the Sheriff of the County of New York*—Sir: Notice is hereby given that at the General Election to be held in this State on the Tuesday succeeding the first Monday in November next, the following officers are to be elected, to wit:

A Governor, in the place of Horatio Seymour;

A Lieutenant Governor, in the place of Sanford E. Church;

A Canal Commissioner, in the place of Henry Fitzhugh; and

An Inspector of State Prisons, in the place of Henry Storms;

All whose terms of office will expire on the last day of December next.

A Representative for the Thirty-fourth Congress of the United States, for the Third Congressional District, composed of the Ist, IId, IIId, Vth, and VIIIth Wards in the City of New York; for the Fourth District, composed of the IVth, VIth, Xth, and XIVth Wards of the City of New York; for the Fifth District, composed of the VIIth and XIIIth Wards in New York, and the City of Williamsburgh in Kings County; for the Sixth District, composed of the XIth, XVth, and XVIIth Wards in New York; for the Seventh District, composed of the IXth, XVIth, and XXth Wards in New York; and for the Eighth District, composed of the XIIth, XVIIIth, and XIXth Wards in New York.

County Officers also to be elected for said County:

Sixteen Members of Asssembly;

A Surrogate, in the place of Alexander W. Bradford;

A Recorder, in the place of Francis R. Tillou;

A City Judge, in the place of Welcome R. Beebe;

A Mayor, in the place of Jacob A. Westervelt;

A Register, in the place of Garrett Dyckman;

A Commissioner of Streets and Lamps, in the place of George G. Glazier, who was appointed to fill a vacancy caused by the resignation of Henry Arcularius;

A Police Justice for the Second District, in the place of Daniel W. Clarke, who was appointed to fill a vacancy caused by the death of John McGrath;

Two Governors of the Alms-House, in the place of Gustavus A. Conover and William Pinkney, appointed to fill vacancies;

A District Attorney, in the place of Lorenzo B. Shepard, who was appointed to fill a vacancy caused by the death of Nathaniel B. Blunt;

A Civil Justice and a Police Justice for the Seventh Judicial District, composed of the XIIth, XIXth, and XXIId Wards;

A Police Justice for the Eighth Judicial District, composed of the XVIth and XXth Wards.

Yours respectfully,
E. W. LEAVENWORTH, Sec'y of State.

SHERIFF'S OFFICE, New York, Aug. 14, 1854.

The above is published pursuant to the notice of the Secretary of State and the requirements of the statute in such case made and provided. JOHN ORSER, Sheriff of the City and County of New York.

All the public newspapers in the County will publish the above once in each week until the Election, and then hand in their bills for advertising the same, so that they may be laid before the Board of Supervisors and passed for payment. See Revised Statutes, volume 1, chapter 6, title 3, article 3, part 1, page 140.

aug 21 JOHN ORSER, Sheriff.

Miscellaneous.

Hakotade, Japan.

A correspondent of the N. Y. *Tribune*, writing from Hakotade, one of the ports recently thrown open to American shipping, says:—

The city has, I should guess, about 4,000 houses, and perhaps five times as many inhabitants. The two main streets are parallel and run along the foot of the mountain. Narrower streets run from the wharves up the mountain, crossing both the principal streets, one of which is about thirty feet higher than the other. The lower of these is almost as broad as Broadway, and infinitely cleaner. The houses on it are well built; most of them have two stories, with shops on the ground floor. On the cross street which starts from our wharf, and above both the principal streets, stands a temple, which has been assigned to us for our daguerreotype apparatus. It commands a splendid prospect of the city and harbor. A little to the west of this cross street is another, which seems to be the Fifth-avenue of Hakotade. The manner of building reminds one very strongly of Switzerland. A flat projecting roof is covered with shingles, which are fastened by long poles, with stones laid upon them; broad galleries run quite around the upper story; before the door is a little wooden porch; this, too, with projecting gable, which, as well as the pillars that support it, are often adorned with rich carving. The temples, one of which is at least 250 feet square, are profusely ornamented with carvings. Dragons, horses, bulls and hares figure largely, but tortoise shells and cranes carry the day. The tortoise shell is here the emblem of beauty. The swans of Venus become tortoises. Great precautions are taken against fire. Casks of water stand in the house-yards and on the roofs; fire-buckets are hanging near; fire companies are organized. The first captain who reaches a fire plants his standard there, and no other company can give any aid unless at his express desire. This insures unity of effort; but, in spite of all this, I saw traces of several recent fires. The police has a military organization. The inhabitants of Hakotade are short; they will average scarcely more than five feet. They are not so dark as the inhabitants of the more northern islands. They are good natured and have great self-control. You get to liking them after you become familiar with some of their strange customs. The Embassador of the Prince of Matsmay, especially, is a fine specimen of a well-bred, well-educated man, and has conducted himself, both as guest and host, with winning grace. One sees but very few married women; but some young girls who came to our temple to be daguerreotyped had pleasing faces and charming manners. The dress of the Japanese women consists of trowsers with a sort of tunic covering the upper part of the person. This garment opens in front, and is fastened by a broad scarf tied about the middle and holding the dress together, except when the wearer walks rapidly or runs.

Scenes on the Battle-Field.

The following extract from a letter giving some account of the battle of Alma, furnishes a glimpse of the horrors of the battle-field:—

The Russian regiments engaged against us, judging from the numbers of the caps and buttons on the dead and wounded, were the 11th, 12th, 16th, 17th, 18th, 31st, 32d, 33d, and some of the Imperial Guard. The Russian regiment consists of four battalions, and each battalion may be said to be 650 strong. The soldiers were mostly stout, strong men. Several of the regiments, 32d and 16th for example, wore a black leather helmet, handsomely mounted with brass, and having a brass cone on the top, with a hole for the reception of a tuft, feather, or plume; others wore simply a white linen foraging cap. They were all dressed in long drab coats, with brass buttons, bearing the number of the regiment. These coats fitted loosely, were gathered in at the back by a small strap and button, descended to the ankles, and seemed stout, comfortable garments, though the cloth was coarse in texture; the trousers, of coarse blue stuff, were thrust inside a pair of Wellington boots, open at the top, to admit of their being comfortably tucked down; the boots were stout, well made, and serviceable. Their knapsacks astonished our soldiers. On opening them, each was found to contain the dress uniform coatee of the man, blue or green, with white facings, and sashes like our own, a pair of clean drawers, a clean shirt, a pair of clean socks, a pair of stout mits, a case containing a good pair of scissors marked "Sarun," an excellent penknife with one large blade, of Russian manufacture, a ball of twine, a roll of leather, wax, thread, needles and pins, a hairbrush and comb, a small looking glass, razor, strop and soap, shoe-brushes, and blacking. The general remark of our men was that the Russians were very "clean soldiers;" and certainly the men on the field had white, fair skins to justify the expression. Each man had a loaf of dark brown bread, of a sour taste and disagreeable odor, in his knapsack, and a linen roll, containing a quantity of brown, coarse stuff, broken up into lumps and large grains, which is crushed biscuit or hard granulated bread, prepared with oil. This, we were told by the prisoners, was the sole food of the men. They eat the bread with onions and oil; the powder is "reserve" ration; and if they march they may be for days without food, and remain hungry till they can get fresh loaves and more "bread stuff." It is perfectly astounding to think they can keep together on such diet, and yet they are strong, muscular men enough. The surgeons remarked that their tenacity of life was very remarkable. Many of them lived with wounds calculated to destroy two or three ordinary men. I saw one of the 32d regiment on the field just after the fight. He was shot right through the head and the brain protruded in large masses at the back of the head and from the front of the skull. I saw with my own eyes the wounded man raise his hand, wipe the horrible mass from his brow, and proceed to struggle down the hill toward the water! Many of the Russians were shot in three or four places; few of them had only one wound. They seemed to have a general idea that they would be murdered; possibly they had been told no quarter would be given, and several deplorable events took place in consequence. As our men were passing by, two or three of them were shot or stabbed by men lying on the ground, and the cry was raised that "the wounded Russians" were firing on our men. There is a story, indeed, that one officer was severely injured by a man to whom he was in the very act of administering succor as he lay in agony on the field; be this as it may, there was at one time a near chance of a massacre taking place, but the men were soon controlled, and confined themselves to the pillage which always takes place on a battle-field. One villain with a red coat on his back, I regret to say, I saw go up to a wounded Russian who was rolling on the earth in the rear of the Seventh Regiment, and before we could say a word he discharged his rifle right through the wretched creature's brains. Col. Yea rode at him to cut him down, but the fellow excused himself by declaring the Russian was going to shoot him. This was the single act of inhumanity I saw perpetrated by this army flushed with victory and animated by angry passions, although the wounded enemy had unquestionably endangered their lives by acts of ferocious folly. Many of the Russians had small crosses and chains fastened round their necks. Several were found with Korans in their knapsacks—most probably recruits from the Kasan Tartars. Many of the officers had portraits of wives or mistresses, of mothers or sisters, inside their coats. The privates wore the little money they possessed in purses fastened below their left knees, and the men, in their eager search after the money, often caused the wounded painful apprehensions that they were about to destroy them. Last night all these poor wretches lay in their agony; nothing could be done to help them. The groans, the yells, the cries of despair and suffering, were a mournful commentary on the exultation of the victors and the joy which reigned along the bivouac fires of our men. As many of our wounded as could be possibly picked up ere darkness set in were conveyed on stretchers to the hospital tents. Many of the others were provided with blankets and covered as they lay in their blood. The bandsmen of the regiments worked in the most cheerful and indefatigable manner, hour after hour, searching out and carrying off our wounded. Long after night had closed faint lights might be seen moving over the frightful field, marking the spots where friendship directed the steps of some officer in search of a wounded comrade, or where the pillager yet stalked about on his horrid errand. The attitudes of some of the dead were awful. One man might be seen resting on one knee with the arms extending in the form of taking aim, the brow compressed, the lips clinched—the very expression of firing at an enemy stamped on the face and fixed there by death; a ball had struck this man in the neck. Physiologists or anatomists must settle the rest. Another was lying on his back with the same expression, and his arms raised in a similar attitude, the Minié musket still grasped in his hands undischarged. Another lay in a perfect arch, his head resting on one part of the ground and his feet on the other, but the back raised high above it. Many without legs or arms were trying to crawl down to the water side. Some of the dead lay with a calm, placid smile on the face, as though they were in some delicious dream.

The Crimea.

The expedition of the allied fleets to this peninsula, with a view to the destruction of Sebastopol, the station of the great Black Sea fleet of the Russians, gives unusual interest to its history. The Crimea is a quadrangular figure in the Black Sea, and contains 3,000 square miles—nearly the size of Massachusetts. It is connected, at the northerly point of the quadrangle, with Southern Russia, by a neck of land about 20 miles long, and at its narrowest part five miles broad. Across the neck a deep trench was dug by the Turks, during the last century, about seventy-two feet wide and twenty-five feet deep. A walled rampart was built along this trench of free stone dotted with batteries, of which there are five still in tolerable preservation. The water from the sea flows through the trench, which is crossed by draw-bridges. Sebastopol is over 120 miles from this trench, near the southern part of the quadrangle, and is the finest harbor in the Black Sea. The bay on which it is situated extends about five miles inland, and is nearly a mile wide. The buildings rise above each other, with the eminence on which they are located, presenting from the land side an imposing view. The population of Sebastopol, exclusive of the army, is over ten thousand. The public buildings, the admiralty, the arsenal, the barracks, the hospitals, the lazaretto, and other public structures—such as the docks and dock-yards—are on the most extensive scale, no labor or expense having been spared upon them. The material is of white calcareous stone, obtained in the neighborhood of the town. It resembles the shell limestone of which Odessa is built, and is extremely perishable, as we see in the houses of Odessa, which fall to pieces of themselves. The population of Sebastopol is purely Russian, with a small admixture of Greek. The population of the peninsula of the Crimea, or Crim Tartary, anciently the *Chersonesus Taurica*, is about 300,000, composed, two-thirds of a mixture of Mongol and Turks, called Tarters, the residue of Russians, Germans and Greeks. But little regard seems to have been paid to this native population in the estimate of its strength formed by the Allied Powers.

The situation of Sebastopol, near to the center of the Black Sea, gives it a command over its navigation. The fleets of Russia sally forth from this point, and in two or three days' sail could reach any of the ports of Turkey, whether in Europe or Asia, and pour destruction upon them. The direct objects of the war imposed, therefore, upon the allied fleets, is the necessity of destroying Sebastopol if possible. England and France went into the war from fear of the extension of Russia to the Mediterranean, by which the line of operation of each of those Western powers with their distant possessions might be cut. France maintains her intercourse with Algeria, and England hers with her East Indian possessions, by way of the Mediterranean, which Russia desires to control. The destruction of Sebastopol will stop the growing strength of Russia in a southerly direction, by means of the fleet which she has been building up there, since the Crimea came into her possession in 1782. We cannot suppose, that a step of such vast importance can be taken by the allied powers, without encountering all the opposition from Russia of which she is capable. That such a step was one of the great objects of France and England in entering the Black Sea, has been openly proclaimed; but it would be equally apparent, had it not been proclaimed. If, therefore, the whole strength of Russia shall not be put forth to defend Sebastopol, it will appear that it has become the policy of Russia to conquer, not by her active energies, but by her capacity of endurance—by drawing into her shell, like the tortoise, and waiting till her enemies are tired by their blows. [Journal of Commerce.

Wrecks in 1853.

The British Admiralty Register of Wrecks for 1853 has been published, and the *Lifeboat Journal* supplies the following summary of its contents:—

It is, as usual, a fearful list, numbering 832 disasters; but it is gratifying to observe, so far as loss of property is concerned, that the register of 1853 shows a very considerable decrease in the number of wrecks and casualties as compared with the preceding year, when 1,115 occurred.

In the gales of February, March, April and July, 1853, the numbers exceeded those of the same months in 1852, and the month of May in each year produced the same amount; but in all the other months of 1853 the numbers fell much short of those in the corresponding months of the previous year.

This may be accounted for by the fact that the gales of the winter months of 1853 were less frequent and of shorter duration, although they blew with occasional violence. On the other hand, however, the year 1853 records a loss of 989 lives, being 69 more than were lost in 1852, when the number, so far as is known, was 920. This increased number in proportion to the number of wrecks was caused by the great sacrifice of life which occurred in two or three individual instances. Thus, the loss of the Annie Jane shows 360 alone, that of the Queen Victoria 83, and of the Dalhousie 59.

There can be no doubt that these total numbers for each year show considerably less than the actual amount of loss of life which has occurred on and around our coast, as there are no means at command for ascertaining the number of those whose vessels sail out of the port and are never again heard of. The lives of fishermen and other boatmen are undoubtedly also often lost without any official returns being made of the same.

The Admiralty Register of wrecks is compiled principally from the coast guard returns, from Lloyd's published list, from the *Shipping and Mercantile Gazette*, and from the official reports of Lloyd's agents around the coast to the Admiralty. It is prepared by Com. J. V. Reed, R. N., and although imperfect, as any such register must be, there is no doubt that it is the most complete account of wrecks published.

Annexed to the returns is a wreck chart, on which a black spot marks the site of each wreck, fire or collision, as far as can be ascertained.

The following is a summary of the Register:

The wrecks on the coasts and in the seas of the United Kingdom in the year 1853 were 832, which may be thus classed: Totally wrecked, 369; totally lost in collision, 52; damaged seriously, and had to discharge, 386; damaged seriously in collision, 25.

The number of casualties in each month were: January, 106; February, 91; March, 52; April, 78; May, 41; June, 26; July, 45; August, 33; September, 70; October, 96; November, 71; December, 123. Total, 832.

Of these, 253 occurred on the East coast of Great Britain, 76 on the south coast, and 130 on the west coast; 81 wrecks took place on the coasts of Ireland; 6 were cast on shore at Scilly; 11 on the Channel Islands; 3 at Orkney and Shetland; and 12 at the Isle of Man; the remaining 260 wrecks occurred in the surrounding seas.

The whole loss of lives during the year, as far as has been ascertained, amounts to 989.

Fall Plowing.

So far as our observation has reached, we conclude it is not a common practice in the West to plow in the autumn for spring crops. There seems somehow to exist a prejudice against it in the minds of many farmers, for what reason is not known. It is a general belief that sandy lands are positively injured by fall plowing. This belief comes from plowing them too late, so that they have not time to settle before the winter frosts come. If plowed early—say the last of September, or earlier, thereby permitting them to subside and settle firmly, it is found to be a most judicious practice. But clay lands we desire to keep light and porous, therefore plow late, till frosts stop the work. The ground then works mellow and light the following season.

A writer in the "Country Gentleman" is much in favor of fall plowing. In such dry seasons as we have had for two years past, his crops endure the drouth much better—the corn leaves rolled ten days sooner on spring plowed than on fall plowed land. The sods rot earlier, and this gives the crop a vigorous start, and enables him to keep the weeds in subjection. Last year he had a field of corn, eight acres; a little more than half was plowed in the fall, the rest in the spring. When harvested, the fall plowed ground yielded one-third more than the other; a great deal heavier growth of stalks and longer ears. We are greatly in favor of the practice when done as and at the time it should be. [Far's. Com.

Cruelty to Slaves.

The New Orleans *Picayune* of Oct. 21, 1854, has the following:—

Fanny Smith *alias* Mrs. Hinckley, who keeps a house in St. Louis-st., between Burgundy and Rampart-sts., was charged on Wednesday last with torturing her slaves. It seems that on Wednesday morning, one of the policemen of the Second District was walking down St. Louis-st., when he was startled by the sudden appearance of a negro woman, who rushed out of an alley-way perfectly naked, with the exception of a piece of blanket tied round her waist. Her back was bleeding in several places, and on questioning her, she told the policeman that she had fled to escape the cruel treatment of her mistress, who had stripped her and was beating her when she broke from her and ran into the street. The policeman took her to the guard-house, and on examining her, her body was found to be covered with lumps and scars, the effects of former whippings. She also stated that her mistress was in the habit of beating all her slaves in the most cruel manner, and mentioned a couple of slave boys, whom she was continually tortuing by burning with red hot irons and sticking forks and other pointed instruments into them. On hearing these statements, Lieut. Monde immediately made an affidavit, got out a warrant, and had the woman arrested. When brought to the Police office, the accused indignantly denied these allegations, and produced a boy who she said was one of those she was accused of torturing, and upon whom no marks could be found. The slave woman first arrested, however, reiterated her statement, and said that the boys were kept locked up in the back yard, and no one permitted to see them. An officer was dispatched to her house, and soon returned with the two boys, who did not appear to be more than seven or eight years of age. On stripping them they were found to be marked in a number of places with the scars of fresh and old burns, and punctured wounds were found in different parts of their bodies. The accused was ordered to give security in the sum of $1,000 for her appearance for examination, which she immediately gave. The slave boys and girl were sent to the Parish Prison."

Color and Complexion—A Study for Ladies.

Red Drapery.—Rose-red cannot be put in contact with the rosiest complexions without causing them to lose some of their freshness. Dark-red is less objectionable for certain complexions than rose-red, because, being higher than this latter, it tends to impart whiteness to them in consequence of contrast of tone.

Green Drapery.—A delicate green is, on the contrary, favorable to all fair complexions which are deficient in rose, and which may have more imparted to them without inconvenience. But it is not as favorable to complexions that are more red than rosy, nor to those that have a tint of orange mixed with brown, because the red they add to this tint will be of brick red hue. In the latter case a dark green will be less objectionable than a delicate green.

Yellow Drapery.—Yellow imparts violet to a fair skin, and in this view it is less favorable than the delicate green. To those skins which are more yellow than orange, it imparts white; but this combination is very dull and heavy for a fair complexion. When the skin is tinted more with orange than yellow, we can make it roseate by neutralizing the yellow. It produces this effect upon the black haired type, and it is thus that it suits brunettes.

Violet Draperies.—Violet, the complementary of yellow, produces contrary effects; thus it imparts some greenish yellow to fair complexions. It augments the yellow tint of yellow and orange skins. The little blue there may be in a complexion it makes green. Violet, then, is one of the least favorable colors to the skin, at least, when it is not sufficiently deep to whiten it by contrast of tone.

Blue Drapery.—Blue imparts orange, which is susceptible of allying itself favorably to white and the light flesh tints of fair complexions, which have already a more or less determined tint of this color. Blue is, then, suitable to most blondes, and in this case justifies its reputation. It will not suit brunettes, since they have already too much of the orange.

Orange Drapery.—Orange is too brilliant to be elegant; it makes fair complexions blue, whitens those which have an orange tint, and gives a green hue to those of a yellow tint.

White Drapery.—Drapery of a lustreless white, such as a cambric muslin, assorts well with a fresh complexion, of which it relieves the rose color; but it is unsuitable to complexions which have a disagreeable tint, because white always exalts all colors by raising their tone; consequently it is unsuitable to those skins which, without having this disagreeable tint, very nearly approach it. Very light white draperies, such as muslin, plaited or point lace, have an entirely different aspect.

Black Drapery.—Black Draperies, lowering the tones of the colors with which they are in juxta-position, whiten the skin; but if the vermillion or rosy parts are to a certain point distant from drapery, it will follow that, although lowered in tone, they appear relatively to the white parts of the skin contiguous to this same drapery, redder than if the contiguity to the black did not exist.

[Harmony of Colors, by M. E. Chevreul.

Apples as Food for Stock.

In some sections of the country the apple crop may make up for the deficiency in corn and potatoes. Apples are plentiful and of uncommon fairness. Good varieties, of long-keeping qualities, will bring the producer remunerating prices. But in some instances autumn fruit may be so abundant as to make it expedient to feed it to live stock on the farm, rather than to dispose of it in market at very low rates. And in all cases there will be more or less—as windfalls, or such as from defects are unsaleable—which may be fed to animals with advantage. Cider being now ignored to a great degree, the use of apples for making meat may be expected to increase.

As swine-food, apples have long been known to possess considerable value, though sweet ones have been chiefly preferred for this purpose. But this preference appears to have been given without sufficient grounds. When swine are fed with apples in a raw state, they will generally indicate their choice of sweet over sour ones by first eating the former. This will be more particularly the case if the apples are in an unripe state, and the sour ones very sour. But if swine running in the orchard are allowed to select themselves, they will always eat ripe apples in preference to unripe, and will not confine their eating to sweet varieties, provided good ones of a sub-acid flavor can be obtained.

But in regard to the relative value of sweet and sour apples, in a similar state of ripeness, we are not without results of a more positive character. A very observing and careful farmer, the late Payne Wingate, of Hallowell, Maine, made some valuable experiments on the subject. He found that when swine were fed with raw apples, sweet ones were best, the animal's teeth appearing to be made sore by the acid ones; but when both were cooked there was no difference in the gain, as ascertained by weighing the pigs produced by an equal quantity of each. Mr. W. also made experiments to show the value of apples as compared with potatoes. The apples and potatoes were boiled (in as little water as practicable) separately, and about four quarts of oat and pea meal mixed with each bushel, at the time the cooking was finished, the meal being partially cooked by stirring it in with the potatoes and apples while they were hot, and the mass left to ferment, slightly, before it was fed out. Two pigs of the same litter, and nearly of the same weight, were fed for a week, one on a given quantity of the apples and meal, and the other on the same quantity of potatoes and meal. At the end of the week the pigs were weighed, and the food was reversed, the pig which had been fed with apples was fed for a week on potatoes, and *vice versa.* Their food was changed in this manner for several weeks, each pig being weighed at the week's end. The result showed that the apples were fully equal or somewhat superior to the potatoes.

Heroic Conduct.—Commenting upon the conduct of the crew of the Arctic, the New York *Express* gives the following forcible description of the heroic conduct of the brave fellows lost in the Birkenhead:—

"The circumstances connected with the loss of the British steamer Birkenhead, on the coast of Africa, not many months since, are still fresh in the memories of all. The steamer struck on a hidden rock, stove a plank at the bows, and went to the bottom, we believe in half an hour's time. There was a regiment of troops on board. As soon as the alarm was given, and it became apparent that the ship's fate was sealed, the roll of the drum called the soldiers to arms on the upper deck. That call was promptly obeyed, though every gallant heart there knew that it was his death summons. There they stood as if in battle array—a motionless mass of brave men—men who were men indeed. The ship every moment was going down and down—but there were no traitors, no deserters, no cravens there. The women and children were got into the boats, and were all, or nearly all, saved; there were no boats for the troops—but there was no panic, no blanched, pale or quivering lips among them. Down went the ship, and down went that heroic band, shoulder to shoulder, firing a *fue de joie* as they sunk beneath the waves. Men like those never perish; their bodies may be given to the fishes of the sea, but their memories are, as they ought to be, immortal."

Humorists.—It is a popular error, that humorists in what they write reflect their own outward character. It is not so. Hood was a melancholy man. So was Charles Lamb, in his moments of solitude and when not artificially excited. So was Jerrold. Goldsmith says that when he wrote "She Stoops to Conquer," he walked the fields with a tragical countenance, studying out jokes. We have often thought of the Italian actor in Paris. He was as gloomy and unhappy as Bulwer. He consulted a physician. His physician advised him to mingle in scenes of gaiety. "Especially," said he, "go to the Italian Theatre, and if Carlina does not dispel your gloom, your case must be desperate indeed." "Alas! Sir," replied the patient, "I myself am Carlina!"

Glass Brick.—Among the more recent inventions patented by manufacturers, we hear of one by Mr. Summerfield, of the glass works, Birmingham Heath, England, for what are termed chromatic glass, or glass-faced grooved bricks. By Mr. Summerfield's process, red or any other clay can be combined with glass, and this will secure durability, entire resistance to moisture, and give an ornamental appearance to the building. The form of the brick is also, by means of a groove at the side and end, made so as to add greatly to the strength of the erection, the joints by this means being brought close together; and the mortar acts as a dowell from the shape of the groove. [The London Builder.

Healthy and Happy.—It is stated that there is a wood sawyer in Boston enjoying an interest income of $800 per annum, and who earns $4 per day by still pursuing his vocation. It may be inferred, moreover, that he is free from the dyspepsia, and is not obliged to walk around the Common before dinner to get an appetite. Quite likely, also, he sleeps well, after his day's work is duly done, has no notes to pay, and no editorials to write. But no doubt his saw is sometimes dull. His case reminds us of the physician's prescription of saw-dust puddings as curative, provided the patient made his own saw-dust. [Ch. Register.

VARIETY.

It has been discovered that for the generality of flowers, and more especially for geraniums and the most delicate specimens of the lily tribe, common glue, diluted with a sufficient portion of water, forms a richer manure than guano, or any other yet discovered. Plants placed in sand on the worst soils, display more beauty and vigor when watered with this composition, than those grown in the richest mould and only sprinkled with water.

We copied a paragraph lately, (says the *National Intelligencer,*) stating that the Messrs. Washburn, in the next Congress, would make the first instance of three brothers being in Congress at the same time. A friend reminds us of a former case of three brothers being in Congress together, namely, in 1826–27, etc. They were William and John Findlay, Senator and Representative from Pennsylvania, and James Findlay, Representative from Ohio.

"When a stranger treats me with want of respect," said a poor philosopher, "I comfort myself with the reflection, that it is not myself he slights, but my old and shabby coat and hat, which, to say the truth, have no particular claim for admiration. So if my hat and coat choose to fret about it, let them, but it is nothing to me."

The Warrenton (Va.) *Whig* says: "Easter, a negro woman, the property of Mrs. Eliza F. Carter, near Upperville, in Fauquier county, died on the 17th July, having attained the age of one hundred and forty years! This is one of the most remarkable cases of longevity on record."

An Old Lady entirely out of the hearing of the preacher's voice, at a camp-meeting, being found sobbing, was asked why she wept, since she could not hear the words of the minister. "Oh!" said she, "I can see *the holy wag of his head!*"

A Liverpool (Eng.) paper says: "Within little more than half a century, Russia has advanced her frontier towards Berlin, Vienna, and Paris 700 miles; towards Constantinople 500; towards Stockholm 630; and towards Teheran 1,000."

The Portsmouth *Journal* says: "One of our esteemed citizens, whose death we recorded, having been born on the 29th of Feb., 1780, has had but eighteen returns of the day of his birth in his long life."

Power and liberty are like heat and moisture; where they are well mixed every thing prospers; where they are single they are often destructive.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherever they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y.

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La., April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M.D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.
C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.
Harvey, McKenney, & Co., State Gazette, Burlington, Iowa.
J. Knabb, & Co., Journal, Reading, Pa.
Raymond, Harper & Co., New York Times.
S Cobb, Christian Freeman, Boston.
Wm. B. Jacobs, Christian Chronicle, Philadelphia.
Hon. J. Wentworth, M. C., Democrat, Chicago, Ill.
Rev. E. G. Reese, Methodist Protestant, Baltimore
W. M. Wightman, Christian Advocate, Charleston, S. C.
J. M. Magennis, True Delta, New Orleans.
T. M. Donnell, Daily News, Savannah, Ga.
Geo. D. Prentiss, Louisville Journal, Ky.
Hon. Schuyler Colfax, M. C., South Bend Register, Indiana.
A. Commings, Christian Mirror, Portland, Me.
M. H. Bartlett & Co., Republican, Hartford, Conn.
Chaddick & Berry, Banner of Peace, Lebanon, Tenn.
Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists everywhere.

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid, except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

ELDER JOHN DAVIS.

Funeral Sermon preached on occasion of the death of Eld. John Davis, of Shiloh, N. J., by Eld. Walter B. Gillett.

"So Moses the servant of the Lord die there in the land of Moab, according to the word of the Lord. And he buried him in a valley in the land of Moab, over against Bethpoor; but no man knoweth his sepulchre unto this day. And Moses was an hundred and twenty years old when he died, his eye was not dim, nor his natural force abated. And the children of Israel wept for Moses in the plains of Moab thirty days; so the days of weeping and mourning for Moses were ended." Deut. 34: 5–8.

Our great teacher, Jesus Christ, often reminded his followers of the piety of the ancients as a lasting example to them. (Heb. 11: 40.) There has often been seen a marked similiarity between some of them and those who have lived and labored in these modern times; and we are doing no injustice to departed worth, in tracing that similarity where it actually exists. Moses was evidently a type of Christ, born and appointed to the performance of a special work, to lead the Israelitish nation from Egyptian bondage. And every believer has a part to act, a work to do, a journey to travel, a thorny maze to pass through; and so far as he answers the great design of his creation, in loving God and keeping his commandments, he is an example to others, and in that he imitates Jesus Christ. And he has this encouragement, "that when he shall appear, he shall be made like him, for he shall see him as he is." Moses was doubtless the author of the book of Deuteronomy; therefore some have entertained the opinion that this chapter should have been connected with the book of Joshua, as no man could write the history of his own death. But the more general opinion is, that this chapter was written by Ezra, the scribe of Israel. Moses had been informed that he should not live to bring that people into the promised land. Num. 20: 10—"Hear now, ye rebels; must we fetch you water out of this rock." And in the 12th verse he says, "Because ye believed me not, to sanctify me in the eyes of the children of Israel, therefore ye shall not bring this people into the land which I shall give them." And in the text we are informed, that this declaration was fulfilled with Moses the man of God.

It is not our intention to preach a doctrinal sermon from this portion of sacred writ, although much that is doctrinal is embraced in it; but our design is to use it figuratively, as a motto, in presenting to you, as far as we have the means, some facts connected with the life, labors, and death, of our venerable brother and father in the gospel, who now lies enshrouded in the coffin and the winding sheet, on the bier here before us.

The news of death always brings with it deep solemnity, admonition, and alarm; especially when distinguished characters among us, either in Church or State, are taken as its victims. It is like removing some of the principal stones from the building. Such often leave their native land, and remove to other fields of labor, and their usefulness will still be felt. But to die, they are gone from us to fill a higher, a more important station, than mortality can occupy while on earth. Such are falling by the hand of death; the honor and dignity of a station will not save them from this cruel spoiler; he will lay waste the works of God. They are as mortal as other men, and more liable to premature death than those filling more humble stations in life, from their increased labors and toils, the exposures to which they are subjected, and the constant and unceasing anxiety of mind unavoidably connected with their calling, which wear down the strength and vigor of youth, and often bring upon them disease and premature death. Hence seldom do we see the man of God in the pulpit, with the silver locks of seventy years, preaching the gospel of Christ. Occasionally we see one, as an old oak of the forest, who has withstood the toils and hardships of life, as an object of God's compassion. Yet it is no uncommon thing to see them driving the team, holding the plough, turning up the soil, and gathering in the ripening harvest. And there is no one of the public professions in life where we find so few aged as among the ministry.

In the history of Moses, there are many mysterious circumstances, that we may view with interest. Who could have thought, when he was a weeping babe in the little ark on the brink of the river, exposed to the devouring crocodile, and attracting the attention and admiration of Pharoah's daughter with her attendants, that he was to be a man to "talk with God face to face, as a man talks with his friend," and to deliver his brethren the Hebrews from their downtrodden and oppressed state, and to fulfill the prophecy long since given to that people, to which they had been looking for encouragement? In the arrangement of the gospel church, it is equally wonderful and mysterious. "Ye see your callings, brethren, how that not many wise men after the flesh, not many mighty, not many noble, are called; but God hath chosen the foolish things of the world to confound the wise." The ways of Providence with mankind have always been mysterious. He makes his own selection of those who are to become distinguished and useful, appoints to them their work, and the number of their days, and the bounds they cannot pass. Never was there a man more distinguished than Moses, and never was there a man more beloved and respected among his own people. The whole nation looked to him and relied upon him for counsel in all their journeyings and in all their work; yet he was mortal; "he died, and God buried him." Though highly distinguished, yet he was but a servant, a servant of God, and to his people. The highest station to which man can attain is that of a servant, and those who have been permitted long to serve in stations of usefulness, as our venerable father, are truly blessed, and the honor and enjoyments connected with it are both comforting and lasting. But the tomb must receive its victim; he must be buried out of our sight.

The young know that they are liable to die—that from death no age is exempt. But there is a possibility, and a probability, that their days may be protracted to old age. When one of God's servants arrives to the advanced age of three or four score years, reason teaches him that death is at the door, that it will soon enter and claim its victim, though his sight may not be dim, nor his natural force abated.

The loss of such a man as those whose marked piety has made them distinguished in the church and in the world, is always sensibly felt. It was an ancient national practice to mourn the loss of friends thirty days. "So the children of Israel wept for Moses thirty days, and the days for mourning and weeping for Moses were ended." It is a debt due the surviving of deceased worthies, to follow them to the grave with tears, as those who have loved and valued them, being sensible of our loss, and truly humble for the sins that have brought upon us those judgments. Penitential tears very fitly mix with tears of affliction. The loss of good men, especially the loss of those who have been our spiritual instructors, is much to be lamented and laid to heart, and those who do not feel it, must be stupid in very deed. However great our sorrow, yet we must not abandon ourselves to perpetual grief. As a certain writer says, "If we hope to go to heaven rejoicing, why resolve to go to the grave mourning." Death is the closing up of our earthly toils; this is a world of toil and labor to the Christian while he lives in it; but death is the end of trouble with him. Ministers are subject to constant trouble from it; there is no permanent release; they have the cares and anxieties of life as other men; and having been appointed to the gospel ministry, they watch carefully their success. To preach, exhort, and reprove, and still to see hard hearts unrelenting, and as hard as steel, is truly discouraging; and add to this the natural depravity within, in view of these they are often led to weep bitter tears, and to say, "No man's sorrow is like unto my sorrow." From all this death brings release; in the struggles of death the enemy makes his last effort; the last fear will be in passing the dark valley; and even there the Lord will not leave them, but will obtain for them a complete victory over death, hell, and the grave. At the termination of life, they enter upon a state of endless bliss. It is to be "absent from the body, and present with the Lord." Paul's great desire was, that he might depart and be with Christ." For him, to live was Christ, but to die would be gain. Happy will it be for you, my hearers, if you have such a hope; for death is in pursuit of you, and sooner or later you will fall its victim. Then may you follow those good men as they have followed Christ, that your end, like theirs, may be peace.

In some particulars, there is a similarity between Moses and this aged servant of God who has now left us. His engaging in the work of the ministry, his faithfulness, his remarkable success, the attachment of the people to him, his long life, and now his peaceful and happy death; and the number of those who are his spiritual children, as well as family relatives, tells us that there are some visible traces of departed worth, deserving of our notice and regard. Many in this assembly have been long acquainted with him, and know more of his history than myself. Others, though they have known him, yet they know but little of his past history. The most that I know of his early history, I learned from his own lips; hence it may not be inappropriate to present an outline of the life and labors of this servant of God, who has now ceased from his labors, and his works will follow him.

It is well known, that Eld. Davis was of Welsh descent. His grandfather was born in Whitechurch, County of Pembroke, in 1708, and was brought to America with a colony that emigrated when he was two years old. The colony first settled in Pennsylvania, at Pennepeck. They organized into a Christian church before leaving their native shores, and chose their pastor and other officers. After staying in Pennsylvania about two years, they purchased a tract of land in Newcastle County, State of Delaware, known as the Welsh Tract, and immediately moved and settled thereon. In that new, wild region of country, his grandfather grew up to manhood, and in 1734 he was ordained the pastor of the church among whom he had been born, and by whom, when but two years of age, he had been brought across the deep to this country. He continued to be their pastor thirty-six years. Says his biographer, "He was an excellent man, and much esteemed by all who knew him." His wife was a daughter of Elisha Thomas, Esq. He died in 1769, aged sixty-one years, leaving behind him six children, three sons and three daughters. Two of his sons became ministers of the gospel—John, who succeeded his father in the church where they lived, and Jonathan, the father of this our beloved brother in the Lord.

Through the workings of Providence, Jonathan became a Seventh-day Baptist, and wishing to enjoy privileges with people of the same faith, he removed from Welsh Tract to a settlement of seventh-day people living in North Carolina, with whom he had become partially acquainted. After moving there, he became dissatisfied, both with the country and the people. His stay in that place was short; he left, and came direct to this place, purchased an extensive tract of land, and settled on the farm about one mile from this, where he lived and died. It has been said by some of the aged, that he was a man of more than ordinary gifts, which, connected with grace, commended him to the notice of the church. And immediately after the death of the first pastor of this church, Jonathan Davis, (though of the same name they were not related,) he was chosen the pastor of this church.

As a son of that man, and on yonder homestead, John was born in December, 1775, in those days when our country was in commotion, bloodshed, and war. Had he lived, he would have been seventy-nine years old next December. In the same house where he was born he lived seventy years, an uncommon circumstance in this age of uneasiness and change among the ministers of Jesus Christ. His father being a minister and pastor of the church, he was, from his earliest recollection, blessed with religious instruction; he was always more or less under religious influences. His first lasting pungent impressions, he said, were under a sermon preached by the Rev. T. G. Jones, who supplied this church for a season with the ministry of the word after the death of Eld. Davis's father. The text from which the sermon was preached was Genesis 19: 17—"Escape for thy life." He was made to see the danger that surrounded him, and resolved to escape it by accepting of the terms of proffered mercy, and he was enabled to flee for safety to Jesus Christ. He very soon made a public profession of his faith, by offering himself to the church as a candidate for baptism; he was received and baptized by Elder Nathan Ayers, an aged minister connected at that time with this church, but long since gone to his rest. At the time he united with the church, he was twenty-eight years old. Being the youngest of his father's family, he lived to help bury them all, there being eight children, four sons, and four daughters.

His opportunities for obtaining an education were rather limited; schools and competent teachers being few and far between. Though the schools he attended were better than ordinary, yet they were far below some of our schools at the present day. His father gave him the best opportunities in his power. When but seven years old, he walked two miles to attend school, through woods, mud, and storm, as his daily task. Having made ordinary proficiency, and being left when young without a father's counsel, (he having died when he was ten years old,) at the age of nineteen he went to what was called a grammar school, near Roadstown, taught by John Preston, a competent teacher, and a minister in the Presbyterian church. A number of the students of that school became professional men; among the number were Rev. Buckley Carle, Joseph Sheppard, and Dr. Clark. The habit that he acquired of close study when young, gave him a love for books, so that, by industry and application, he was in a measure prepared to engage in the great work to which his Master had called him. He had always, from a child, been accustomed to the toils of domestic life. He being the youngest of the family, it early became his duty to stay at home, manage the farm, and take care of the affairs of the family. One after another of the family married and left, until he was left with the care of his aged mother alone. Soon after he professed religion, he married Mary Jones, daughter of Enoch Jones, Esq., of Welsh Tract, Delaware. With that woman many of you have taken sweet counsel, though now she is in her eternal rest. Our venerable brother and father in the gospel has had a family of eleven children; three of them are not, four of them are present to pay the last mark of respect to a beloved father, and four of them are in the western country.

In the days of early pilgrimage, this church was passing through some sore trials. For a number of years they had been without any stated pastor. Those they could have obtained they were not united in. Divisions about men, doctrines, means and measures, were introduced and tolerated, to the marring of the peace and prosperity of this beloved Zion. During those troublous times, our brother made himself active in religious duties. For a long time he was the leader of the singing in the congregation, and in other departments he was not inactive. Meanwhile, the more thinking part of the church had their minds directed towards him as their future leader. Finally, after due consultation, he was licensed by a vote of the church to preach the gospel of Jesus Christ, when about thirty years of age, and in less than two years after he had professed religion and joined the church. Immediate fruits were visible; divisions were healed, and an increased interest was apparent in attending the house of God. Soon, by the general voice of the church, he was called to the pastorate of the church, and he was accordingly ordained, at the meeting of the General Conference in this place, September 14, 1807, by the laying on of hands and prayer.

God in his wise Providence soon visited this people in great mercy, and blessed the labors of his young servant remarkably. Numbers were convicted of sin, and were inquiring what they must do to be saved. In the midst of this growing interest, he was prostrated upon a bed of sickness, with the bilious fever, that continued for several weeks. During that time the Spirit of the Lord was among the people; souls were converted, inquirers were multiplied, and a number of candidates were waiting for baptism. At length the fever was rebuked, he was again raised to health, and soon made an instrument of good to many inquiring souls. He told me with his own lips, that he had the privilege of baptizing willing converts nearly every Sabbath day during the entire winter and spring, until about seventy had thus publicly put on Christ as the result of the revival.

Though these gracious works of Providence presented to him encouragements, yet he was not without trials and embarrassments.

The station he occupied was an important one; he was the pastor of a large congregation, who looked to him as their teacher and guide; and he was not one of those off-hand preachers who were always ready; he was unwilling to go to the house of God, and deliver an unarranged and undigested harangue or declamation; he was a man of reading and of close study, that he might teach the people the truths and doctrines of the gospel of Jesus Christ. In addition to that, he had the cares of a growing family, and but a limited salary. And in view of these things, we may well conclude, that he had his hands full, and his heart full. His library was not large, but well selected. With him it was almost a proverb, that a few well-selected books, well read, were better than a large collection hastily passed over, and treated with neglect.

It is well known that he was not considered an easy, fluent speaker, or a natural, easy orator; therefore he was the most esteemed where he was the best known, among his own people, as such a man will never make himself popular among strangers; but few of good taste and of cultivated minds could hear him without being benefited. I well remember his appearance while standing in the pulpit in that old sanctuary, thirty years ago. He was in his manner grave and solemn, with but few gestures; his eyes resting mostly on the Bible, with an occasional glance over the congregation, that often caused the stranger to suspect that he cultivated a stiffness that was unbecoming, though it was entirely natural to himself; and was always lost sight of on a more intimate acquaintance.

During this time, he traveled considerably, usually attending the public meetings of the denomination when health and circumstances would permit. In 1821 he performed a missionary tour under an appointment of the Missionary Society, through Pennsylvania, Virginia, Ohio, and Indiana. That journey was performed on horseback, there being no accommodation of steamboats and railroads, as now; and even carriages were but little used in some of the settlements. The time he spent was three and a half months; he traveled 1821 miles; he baptized on three occasions, and ordained one minister, (Isaac Dunn, of Crawford County, Pa., since deceased.) He was one of a committee that prepared for publication a Bible Catechism; there was but a small edition published, and at present but few of them are to be found. In 1836 he was one of a special committee appointed by the General Conference to prepare, for the use of the denomination, a Question Book for Bible classes. It was published by the Conference, and is now in use in some of the congregations.

Elder Davis has assisted in the ordination of a number of our young brethren, who are now active laborers in the gospel ministry among us. Though he has been the pastor of but one church, and that in the place where he was born, and where his father was the pastor before him, yet in his early days he preached often in distant neighborhoods and settlements, especially on funeral occasions; and in the pulpits of his neighboring ministering brethren he was always received with a hearty welcome. He was universally esteemed a *good man*, sound in doctrine, upright in his deportment, and a living example in good works. Truly, he was worthy of double honor.

In 1841, in consequence of growing infirmity, he resigned the pastoral charge of the church. Since then he has lived a quiet, retired, happy life, preaching occasionally as circumstances required, until his infirmity was such that he was obliged to discontinue preaching entirely. During his labors he administered baptism to about three hundred, who became members of this church. Then, with much propriety we may conclude, that the term *Father Davis*, with which we are so familiar, has not been altogether inappropriate. For some years he has been living with his second wife, who is now left a widow, to mourn her loss, though not without hope. Though he was a man of feeble strength, yet it has been but seldom that his seat has been vacant on the Sabbath day in the house of God.

In looking over the past, we can scarcely find the person to speak of him reproachfully, who can accuse him of impure motives. His zeal was rather to suffer many inconveniences than not to preach the gospel to his fellow men. But now he is gone; his voice is hushed in death. Though for years he has not been active in the ministry, yet you will miss him; you will miss him from the house of God on the holy Sabbath, where he has been accustomed to meet you weekly from his childhood. He will be missed as a counsellor; you have sought his counsel as one of sound judgment and of experience, and by it you have been materially assisted in the business matters of the church. Since I have been with you I have often sought his counsel, and have thought it an honor to be sitting at his feet. In our business meetings, we have listened to him with deep interest. But we shall hear his voice no more. May we be profited by the past, that his labor to us be not in vain. His stay with you has been long. There are but two in the congregation older than himself. His early history is beyond the recollection of most of you. His amiableness, his ardent piety, and his exact uprightness, have gained your affections—yes, he was in every sense of the words, the *gentleman* and the *Christian*. He was a man who lived above reproach; yes, "*he walked with God.*" He will be missed by all, but more especially will he be missed by that lonely widow, who for years has faithfully watched over that feeble, trembling frame, until it has fallen, to be rebuilt in the resurrection of the great day. Though the children he has so kindly watched over are not dependent on a father's care, yet by them he will be missed. You have carefully watched him, and as strength has failed, and limbs have become palsied, and infirmities have increased, your anxieties have increased, until you saw that the angel of death had done his work, his spirit had departed, and wafted its way safely home to his eternal rest.

As God would show Israel that he could carry forward his purposes without Moses, so will he show us that he can carry on his work among the inhabitants of Shiloh without this aged father, whose influence has been so general hitherto. Among the hosts of Israel, a Joshua was found who was to take the place of Moses, and be his successor. To him they were to transfer their affection. Who or where this Joshua is, we know not. May he be found, and lead on the hosts of God's elect as our brother and father in the days of his youthful vigor has been wont to do. Happy will it be for that man upon whom his mantle may fall. May he honor it, and never disgrace it. Moses wanted to lead Israel farther; he was not satisfied with what he had done, and he sought the Lord to revoke the sentence. "I pray thee, let me go over and see the good land and Lebanon." But when denied, not a murmur escaped his lips. At the time when our brother's infirmities came upon him, he felt that his work was not done. But when he found it needful that he should retire, he murmured not a word, but it has been to him a source of satisfaction that he resigned, and retired from the field, before he outlived his usefulness. He himself, and you, I presume, have seen the hand of the Lord in it.

Brethren of the church, you have been honored in having this good man with you so many years; and you have been honored in having him die among you; and you are to be honored with his grave, where he is to be soon buried with his fathers, and your fathers, and where many of you expect soon to lie. Six worthy ministers already have a grave with you, and soon this dear brother, the servant of God, will be put in that quiet, pleasant spot, to wait the sound of Gabriel's trumpet in the resurrection morn. To many it will be a lovely, sacred spot, where rests all that is mortal of our brother in Christ.

For the Sabbath Recorder.

THE TIME TO LAUGH.

When is the time for merriment?
At morning's glorious hour,
When gem-like dew is shining
From every opening flower—
When the ambient air is laden
With melodies of love,
And joy seems hovering o'er us,
From the radiant skies above?

When forest-trees and hill-tops
Are bathed in glittering sheen,
And each quiet, flower-lined streamlet,
Reflects some joyous mien?
Is this the time that we should pass
In careless, lightsome mirth,
And laugh away the morning hours,
Around the happy hearth?

Ah! no, for on the morning air
There breaks full many a moan,
From anguished hearts, who bear grief's load
Unaided and alone.
And bitter tears are falling fast
Upon the pallid cheek,
Speaking in thrilling tones to God,
Of the helpless and the weak.

At noon, when from Sol's fervid beams
We seek the cooling shade,
Shall our light laugh ring free and clear
Throughout the forest glade?
Shall the wild-wood echo with the songs,
From hearts with gladness toned?
And the shadows flee from the flashing light
'Neath the brows where love's enthroned?

Ah! no; for hearts are breaking now
Beneath their load of grief,
And should we not at noon-tide pray,
That God would grant relief,
To those oppressed and weary ones,
Who at this nerveless hour
Are bending 'neath their endless task,
Crushed by a tyrant's power?

And should we laugh at eventide?
The calm and holy hour,
When the loving dew is nestling close
To the heart of each bright flower—
When the voices of the night are tuned
To the heart's own joyous store,
Is this the time for careless glee,
Thoughtless of sorrow's lore?

Ah! no; for on the evening air,
E'en now floats the mad cry,
"Come forth and save us from despair,
E'er hope's faint gleamings die."
And by the last red light of day,
See on that once proud brow,
The maddening impress sin has made,
And on that form laid low.

See the pale lips that o'er him move,
In words of wild despair;
See the bright threads that grief has wreathed
Within that raven hair;
View the dark room whence wailing sounds
Break forth upon the night,
From children of a once proud sire,
Where once was peace and light.

There'll be no smile upon thy lip,
And the light within thine eye
Will not be that of ideal bliss,
But of stern reality.
Thou'lt say, that morn, and noon, and eve,
Each is the time to pray,
For those who in affliction's night,
Have lost all trace of day.

GERALDINE.

HOW THE FIRST CHRISTIANS LIVED.

An approved writer, in describing the religious character of the primitive Christians, observed that when they gave themselves to Christ, they counted all things lost for him and his salvation; and the surrender was an honest, whole-hearted transaction, never to be reconsidered, never to be regretted.

Hence, from the hour of their conversion, they made little account of property. If it was confiscated by government, or destroyed by the mob, they "took joyfully the spoiling of their goods," assured that in heaven they had a better, and incorruptible inheritance. When the cause required, how ready were they to lay all at the feet of the missionaries! Generally they were poor. A rich Christian! why, such a thing was hardly known. However it may be now, it was then "easier for a camel to go through a needle's eye, than for a rich man to enter the kingdom of God." And if, as an act of special sovereignty, a man of wealth was converted, he seldom retained his riches for a long period; for such was his sympathy for the despoiled and suffering brotherhood, and such his solicitude for the conversion of the perishing, that his funds were poured forth as water. Yet poor as were the first Christians, they were liberal to a degree seldom surpassed. We, from our much, give little. They, from their little, gave much. "Their deep poverty abounded unto the riches of their liberality." Baptized covetousness was the product of a later age.

They understood Christ to be in earnest, when, standing but one step from the throne of the universe, he said: "Go ye into all the world, and preach the gospel to every creature." It was not, therefore, with them a matter to be considered, whether they should go or not go. The command was positive and peremptory; and how could they escape from the obligation? With us, to stay is the rule, to go is the exception. Wonder not that they accomplished so much—wonder not that we accomplish so little. They did not wait indolently for openings, but went forth either to find them or to make them. If defeated at one point, instead of returning to Jerusalem in despondency, and writing a book on the impracticability of Christian missions, they proceeded to another and more distant field, and then to another, until they had gone over the appointed territory. Their piety was enterprising; the spirit of obedience made it such.

From the North British Review.

VINET'S LAST HOURS.

For some time the health of Vinet had been the subject of great anxiety to all his friends, and he was urged to seek repose. But the spirit was willing, though the flesh was weak; and in the commencement of this very year (1847,) besides the ecclesiastical labors we have mentioned, and from which throughout his whole life he had scarcely rested, he was busy with many literary projects. He cherished the intention of retiring to Clarens, and devoting himself there in quietness to the execution of extended plans of authorship which he had long contemplated. Such was nevertheless the degree of debility to which he was reduced, that he was scarcely able to proceed from his bed to his lecture room.

At length he was forced to abandon all his professional duties, and on the 20th of April he was conveyed to Clarens. He bore the journey better than was expected, but any hopes of his recovery were of short duration. "Vinet knew clearly," writes M. Scherer, "the gravity of his situation. At the same time, as he had not made of his heart two parts, the one for the world and the other for God, so neither did he make of his life two divisions, the one for living and the other for dying; but he continued up to the last moment to occupy himself with the thoughts and labors which had filled his life." He continued to take a lively interest in literary matters. His last pleasure in this way was the perusal of Lamartine's History of the Girondists.

In the beginning of May, on Sunday the 2d, his sufferings greatly increased, and for the last few days he was unable to speak much. He is supposed to have purposely abstained from such statements as are often collected and recited from the lips of the dying—having cherished always a distaste for such recitals. The only memorials that have been preserved of his last moments are expressions of affection and humility. One of his friends having said that he would pray earnestly for him, he replied, "You could scarcely pray for a creature more unworthy."

At another time he asked pardon for all the offenses—so he expressed himself—which he had given by his impatience and intolerance. He left the following message for his son:—"Tell him that he persevere in the love of Jesus Christ, since he has found it."

On Monday evening he appeared better, and there seemed yet a glimmering of hope. His sister and Madame Vinet, worn out with fatigue, went to take some repose. A friend remained with him. These were their last words of conversation. "What shall I ask for you?" said his friend.

"Ask for me?" replied Vinet, "all grace, even the most elementary."

At one o'clock in the morning his breathing became heavy, and his sufferings returned. They continued to the end, but without any great struggle or agony. Some one asked a question. "I can no longer think," he answered; and these were his last words. He expired at four o'clock in the morning, on the 10th of May 1847.

A great multitude from Vevay, Lausanne, and even Geneva, met to pay the last duties to one whom they so much admired and loved. A monument raised by his friends marks the place where Vinet rests, in the cemetery of Clarens, on the summit of a smiling hill, in one of the most beautiful spots in the world.

BLESSING THE POOR CHILDREN.

"Bless the poor children who haven't got any beds to-night," prayed the little boy, just before he laid down on his nice warm cot, on a cold windy night.

As he rose from his knees, his mother said, "You have just asked God to bless the poor children—what will you do to bless them?"

The boy thought a moment. "Why, if I had a hundred cakes, enough for all the family, I'd give them some."

"But you have no cakes; what are you willing to do?"

"Why, when I get money enough to buy all the things that I want, and have some over, I'll give them some."

"But you haven't half money enough to buy all you want, and perhaps never will have; what will you do to bless the poor now?"

"I'll give them some bread."

"You have no bread; the bread is mine."

"Then I could earn money and buy a loaf myself."

"Take things as they now are; you know what you have, that is your own; what are you willing to give to help the poor?"

The boy thought again. "I'll give them half my money; I have seven pennies, I'll give them four. Wouldn't that be right?"

A great excitement is caused among the church people of England by the secession from the church of the gifted and distinguished Arch-Deacon Wilberforce, on the ground that his conscience would no longer allow him to admit the supremacy of the Queen as the head of the church.

CHRISTIAN PSALMODY.

We have no doubt that the Book of Psalms, like all the rest of Scripture, was "given by inspiration of God." As a book of *instruction*, therefore, it is profitable for saints, under the gospel. It was designed to be *read* by the people of God, in all ages. But it should be remembered, that the design of reading is different from that of singing. "By reading we learn what God speaks to us in His word; but when we sing, especially unto God, our chief design is, or should be, to speak our own hearts and our words to God. By reading we are instructed what have been the dealings of God with men in all ages, and how their hearts have been exercised in their wanderings from God, and temptations, or in their returns and breathings towards God again. But songs are generally expressions of our own experiences, or of His glories; we acquaint Him what sense we have of His greatness and goodness, and that chiefly in those instances which have some relation to us. We breathe out our souls to Him, and make our addresses of praise and acknowledgment to Him."

The evidence that the Psalms were designed for singing rather than reading, must, therefore, be found in the subject matter of them. Are they the expressions of our own experience, or of the experience of the ancient Israelites? Do they set forth that large and comprehensive experience, which those have who are instructed in the fullness of the mystery of the gospel; or only that modified experience, which was had by those who saw the way of salvation but darkly? Do they set forth experiences growing out of the severe discipline appointed to them who suffer for the faith of Jesus—who serve Christ in every condition of poverty and wretchedness, and love not their lives unto the death; or such experiences as originate in a milder and more favored probation? Do they declare what sense we have of God's greatness and goodness, as displayed in the life, death, resurrection and glorification of Jesus Christ; or do they set forth these only in the dark and shadowy language of the Mosaic Dispensation?

As far as the language of the Psalms is in accordance with our experience, it may be employed as the vehicle of our praises; but the fact that much of it is the language of those who were peculiarly situated, and is in accordance with their own peculiar experience, proves that it is not suitable as the language of our praises, without such alteration as will make it speak our present circumstances. And if *some* of the language must be altered to make it suitable for Christian worship, then it is evident that the Book of Psalms, taken as a whole, was designed, not for singing, but for reading. As a book of reading, it requires no alteration—no modification whatever; it would be sin to attempt to alter it.

Now since, in putting the Psalms into a shape for singing, some of them *must* be altered, it follows that any or all of them *may* be altered, provided such alteration do not make them express what is contrary to our experience as Christians, or contrary to sound doctrine. As a book of instruction—a record of what God declares to us—which is all that the Psalms were designed for as a whole—no one advocates, or ever has advocated, their alteration. But as a record of what we express to God, in regard to our experience or our views of His glory, we are, at most, bound to them only as a model for our general imitation.

As the design of Psalmody is, among other things, to set forth our views of God's glory, what view does the Hebrew Psalter give of the Trinity? Apart from all controversy upon this question, it will be admitted by every one, that the scriptures of the New Testament do set forth the distinctions of Father, Son, and Holy Spirit, as pertaining to the Godhead, in a light far more clear than any part of the Old Testament. Must the praises of a Christian never express any thing of this mystery, farther than it is faintly exhibited in the Old Testament language? Shall the Christian minister say to his congregation, "*The grace of our Lord Jesus Christ, and the love of God the Father, and the communion of the Holy Spirit, be with you all*," and yet be afraid to ask them thus plainly to praise the Trinity in song? While he invites them all to praise God in the language of David; and at the same time avows his solemn belief that God has revealed himself in the three distinctions of Father, Son, and Spirit, all equally entitled to praise and honor, does he show a hesitancy about inviting them to sing—

> "Praise God from whom all blessings flow,
> Praise Him all creatures here below,
> Praise Him above, ye heavenly host,
> Praise Father, Son, and Holy Ghost"—

lest he should thereby offend the God who has thus revealed himself? Who can believe, that Christ designed the praises of the Church to be thus restricted?

But that wherein the Christian singer is especially sensible of the insufficiency of the Hebrew Psalter, is its want of fullness in regard to the great mystery of Redemption. True, it sets forth the general fact, that "with the Lord there is plenteous redemption," (Ps. 130: 7,) but no one would ever learn, from any thing it contains, that Jesus of Nazareth is our Redeemer. His incarnation as a babe in Bethlehem, the descent of angels from heaven on the occasion, His baptism, His agony in the garden, His bloody sweat, His crucifixion, His resurrection from the grave, His glorification in heaven, together with many other details which help to make up the Great Atonement—are either not presented in the Psalms at all, or, if they are, are described in the dark and shadowy language of a dispensation which could not accomplish the perfection of those who live under it. Are the miracles of wisdom and power, as they are discovered in a crucified Christ, never to be dwelt upon in song? Is the dying love of a Redeemer never to be spoken of, only in the gloomy language of "smoke and sacrifices, bullocks and goats, and the fat of lambs?" Are we never to sing of Christ's triumph over principalities and powers, except under the figure of removing the Ark up to the city of David, to the hill of God, high as the hill of of Bashan? (Psalm 68: 15, 18.) Is that love which was stronger than death never to be celebrated as a fact actually illustrated in the sufferings of Calvary, nor our hearts warmed by the contemplation of it? Besides, do the Psalms set forth the heaven and the hell, which Christianity discovers to us? Can we learn from them the depth of the misery, to which the sinner is exposed? The future and eternal state, into which souls are received after death, is but darkly described any where in the Old Testament, in comparison with the flood of light which the gospel pours upon it. Hence, when David sings of deliverance from the horrible pit, though he may *mean* salvation from the everlasting punishment which Christianity represents as due to the wicked, he does not say so. *Redemption* he speaks of, in plain terms; but is it redemption from *everlasting wo?* That freedom in song, however, which the gospel sanctions, enables one to say—

> "How will my lips rejoice to tell
> The vict'ries of my King!
> My soul, redeemed from sin and hell,
> Shall thy salvation sing."

The insufficiency of the Hebrew Psalter, upon occasions of celebrating the Lord's Supper, is so manifest, that one would think this alone would convince every body of the lawfulness of using other compositions. We do not believe, that David ever wrote a hymn of sufficient glory, and sweetness, and fullness, to represent the blessings of this Christian Institution. The 23d and 118th Psalms, which are sung over and over by those who condemn the use of hymns of human composition, afford a very inadequate medium for the expression of those intense emotions, which swell the believer's soul in view of the dying love of Jesus. And while, under the influence of more liberal views, Christians can sing—

> "How sweet and awful is the place,
> With Christ within the doors,
> While everlasting love displays
> The choicest of her stores"—

the rigidness of the view we have been animadverting upon, confines all the joy of this blessed celebration to a few obscure lines.

We close this article in the words of one who has written well on this question. "I am fully satisfied, that more honor is done to our blessed Saviour by speaking His name, His graces and actions, in His own language, according to the brighter discoveries He hath now made, than by going back again to Jewish forms of worship, and the language of types and figures. All men will confess this is just and necessary in preaching and praying; and I cannot find a reason why we should not sing praises also in a manner agreeable to the present and more glorious dispensation. No man can be persuaded, that to read a sermon of the royal preacher out of the book of Ecclesiates, or a prayer out of Ezra or Daniel, is so edifying to a Christian church, though they were inspired, as a well-composed prayer or sermon delivered in the usual language of the gospel of Christ. And why should the very words of the sweet singer of Israel be esteemed so necessary to Christian psalmody, and the Jewish style so much preferable to the evangelical, in our religious songs of praise?" T. B. B.

THE SPIRIT OF DEVOTION.

The Psalmist David has given us the deepest religious experience we have on record. At times he was down by the cold streams of Babylon, with his heart overcharged with sorrow; then again, on the wings of faith, he mounted above every obstruction. In his transitions from the gloom that overshadowed him into the sunshine of the Divine Presence, he has at every point carefully noted down his religious condition. Thus the Psalmist's experience is a mirror, which shadows forth the experience of all who have passed from death unto life. All may not reach the depth or the height to which he was carried; but if we settle into the deep channels of devotion that flowed through his heart, we shall loathe our sinful selves, and greatly desire a clearer view of our duty, and a closer union with the Holy One. All our labor and disappointment, our self-denial and severe afflictions, will be but so many tributaries, to swell the stream that carries us into the ocean of love. We may lose our wealth; if this loss is sanctified to us, we shall feel more sensibly our dependence on the Giver of all our blessings. Disease may waste our bodies, but our spirits will be chastened, and we shall sink into the divine will. Those we love are taken from our embrace; then our hearts are mellowed down, and we penitently look up to meet the smiles of our kind Father. Our words then are words of prayer. How sweet and heavenly are all of the afflictions of this life, while we are imbued with the spirit of devotion! All the joys of nature, with all the endearing associations that cluster around friendship and love, concentrated upon the heart, will not satisfy us. The lion of the forest is not at home in civilized life; the fish of the sea must have their own native element. So the Christian is not satisfied, and his vital blood ceases to flow, unless he breathes the heavenly atmosphere. There is no other element for the Christian but the spirit of devotion. With great pleasure do we remember the seasons, when the heavenly dew descended upon us, causing our hearts to flow as the limpid stream. Then we could pray without an effort, and our duties were, like the pinions of a dove, raising us to higher states of holy enjoyment. Those who have enjoyed this frame of mind, know it to be the highway of holiness. No lion's whelp has trod this path. It is a way narrowed up by the law of God, and in it the spirit of devotion mingles with the spirit of heaven. So the soul is borne on, in a halo of glory, to enjoy the society of our Mediator, and the spirits of just men made perfect. It is not ostentation in the Christian to greatly desire this blessed association, and to say with the Psalmist, "As the hart panteth after the water brooks, so panteth my soul after thee, O God." To enjoy this spirit, we must labor for it. Our hearts must be presented as a ceaseless offering upon the divine altar. We must steadily aim to live sinless lives, hold constant communion with holy things, and thus walk with God. ARA.

BRITISH CORRESPONDENCE.

GLASGOW, October 27th, 1854.

The telegraphic announcement, in anticipation of the overland China mail, this morning, brings Canton intelligence of Sept. 9th. That city continued to be invested by the patriots; but it is added, that there were considerable distractions amongst these themselves throughout the country. In recurring to their state and prospects, we feel how much the circumstances of those who have conducted the revolution ought to be matter of prayer on the part of those who love the Lord and His law. All we know of Satan's malice and cunning tends to assure us, that they will be special objects for his shafts; while their own recent condition as idolaters, and the necessary occupation of affairs of state, in their yet unsettled condition, must deprive them of many advantages for the full knowledge of God's revealed will, even those who may be most desirous of being led wholly in a right way. The fact that Tae-ping-wang seeks that the people should be guided in the way of life, may surely be inferred from the extensive circulation of the Scriptures, both of the Old Testament and the New. Emphasis attaches to this, when we remember the care displayed as to the correctness of these issues. Dr. Medhurst, in a letter dated Shanghae, at the end of last year, published in the London *Patriot*, March 2d, 1854, says that, in the Old Testament they have followed Gutzlaff's version, *without the slightest alteration;* in the New Testament, that published in 1835 by Gutzlaff and Medhurst, *word for word*, and without note. Medhurst, at a subsequent period, gave statements of information he had derived from one of themselves, who had been for some time in Nankin, in which he mentioned that the immediate followers and attendants of Tae-ping socially worship God every day and before every meal. This man was questioned as to whether they kept the Sabbath? To which he replied, that it was regularly observed; that no work was done on that day except what was necessary; that they all assembled for public worship in large halls, when they knelt down to prayer, and that the chiefs exhorted them. Dr. Taylor himself heard them at Chin-kiang-foo, read from the Book of Genesis, and engage in prayer and praise. Connect this with their unsparing destruction of idols, when men less earnest, in a religious view, would have avoided shocking the general superstition, and there is much to encourage both to hope and to pray. That there are errors to correct, we do not doubt; let us therefore seek in their behalf to Him who has compassion on the ignorant and them that are out of the way. That they may be strengthened to do the will of our Father who is in heaven, aright and in a right spirit, we can only ask of that gracious Father from whom cometh down every good gift and every perfect gift.

In other forms is the work of evangelizing making progress. The great sign preceding our Lord's coming in His glory, is that the gospel of the kingdom shall be preached in all the world for a witness, and that the end of the world or age shall come. And in the midst of wars and rumors of wars, associations are here being formed throughout the land in support of the American Board, the American Protestants, and other bodies in Eastern Europe and the Turkish Empire—taking advantage, especially, of the opportunities presently afforded in the latter for proclaiming the truths of Christianity.

A Society has also been recently formed in England, under the auspices of the Duke of Manchester, the Duke of Wellington, and a number of noblemen and gentlemen, for the purpose of exploring Central Africa, "with a view to its evangelization." Encouragement to such efforts may be read in God's providential arrangements. Dr. Barth's penetration to Timbuctoo, and continued residence in that mysterious city, and the contemporaneous travel through such an extent of the southern portions of Africa, seem to intimate that a way is being prepared for those who shall be endowed to bring good tidings to those who sit in darkness—telling of the grace of the incarnate Son of God to those who have not heard His fame or seen His glory. When He comes, He shall have trophies of the power of His redeeming work, of every tongue and from every clime. And worthy is the Lamb, that He should receive all the glory.

J. A. BEGG.

EDUCATIONAL.

A Theological and Literary Institution is felt to be one of the great and imperative wants of the denomination. The interests of humanity—the interests of the church, of religion, call upon us for such an Institution. Before, however, we can fully attain an object so desirable, it will be necessary for us to raise, in addition to what may be needed for buildings, apparatus, library, &c., a *permanent fund* of at least *one hundred thousand dollars*. For the ultimate raising of this fund, the Conference Committee has drawn up a plan, in accordance with which, it is proposed to commence operations and to proceed as fast as consistent and practicable, until the object shall be accomplished. This plan is already before the readers of the *Recorder*.

Craving the privilege of offering, from time to time, a few thoughts upon this subject, we will commence by giving a kind of historic sketch of what we have already done, by way of encouragement for future effort. In doing so, it affords us great pleasure to be enabled to present several extracts from articles written in other years, illustrative of the motives and spirit that have guided our educational efforts.

Previous to 1834, we had done comparatively nothing, as a denomination, in educational matters. We had, it is true, at that time, a few resolute, persevering young men, who had either obtained an education, or were pursuing a course of study in the higher institutions of learning; but otherwise we were inactive. In a March number of the *Protestant Sentinel*, of that year, the following "*suggestion*," signed "*Concitor*," appeared:—

DEAR BRETHREN,—The object of this article is to present briefly for your consideration this suggestion. Would it not be for the glory of God, for the development of His truth, together with the better ordering of His house, and the advancement of the work of salvation among men, and especially in those parts of the vineyard of the Lord to which the efforts of this connection may extend, that there should be A THEOLOGICAL AND LITERARY INSTITUTION, under the superintendence of said connection, for the education of such as God shall call and ordain to be the ministers of the cross of Christ? Which institution may, if thought proper, be open to others who may wish to qualify themselves for other professions and callings in life."

The writer expresses, also, a desire that the brethren would seriously consider the subject, and communicate their thoughts in respect to the propriety or impropriety, expediency or inexpediency, of such a measure.

Soon after, there appeared another article signed "*Theophilus*," approving the suggestion, and advocating a learned and pious clergy. "It is no longer," he says, "a problem, whether a liberal education will aid the minister in effectually preaching the Gospel or not. It is proved to the satisfaction of all denominations, and nearly all, except our own, have their Theological Seminaries, for the education of such young men as are constrained by the love of Jesus to offer themselves to the churches as ambassadors for Christ. And what denomination needs one more than ours? I believe we are abundantly able to engage in this enterprise immediately, upon a scale sufficiently large to answer our present purposes. And I believe we are now guilty in the sight of God for having so long neglected to assist those who have considered it incumbent upon them to prepare to preach the gospel, but have never been privileged with the opportunity of acquiring the education which they needed to enable them to preach acceptably, and have been compelled to give up the hope of ever being able to preach the glad tidings of great joy. * * Brethren, think of this thing in the light of *eternity;* pray over it; and be sure that God has released you from your duty, before you say, if the subject is brought to you for support, that you will not give it your prayers and undivided support."

The *Baptist Repository*, of that day, referring to the above suggestion, says, "This is as it should be, provided, as we presume, they are able to accomplish the object. While the general diffusion of knowledge is a public blessing, no denomination of Christians can prosper at this age of the world, without provision for the education of its ministry."

Other communications appeared in succeeding numbers of the *Sentinel*, from "Economy," "W.," "Lynes," "Juvenis," &c., in connection with several editorial articles. The subjects of education, ministerial education, education societies, and a seminary, were freely discussed. The following remarks in an editorial are so much to the point that we beg leave to again present them:—

"We know that a liberal course of education has not, in former times, been considered important to a preparation for the gospel ministry, nor do we insinuate now, that it is indispensable; but times and the circumstances of community are changing, and what was consistent with former times, may be far different at the present. We are accountable for the means we employ, as the stewards of God, in the propagation of gospel truth; and should we neglect to procure intelligent advocates, when the means are within our reach, we shall be chargeable with wantonly jeopardizing the interests of the precious truths of God. * * Young men we have, who feel it their duty to press their way into the ministry; and, conscious of their need of education, are forcing their way along, through difficulties almost sufficient to discourage the most resolute, to the acquirement of a suitable education to enable them to enter with advantage on their arduous destination, and have placed themselves in different institutions in the country, at their own charge, and are compelled to interrupt the course of their studies for the purpose of furnishing themselves with the means of prosecuting them. It is not only impolitic to leave the destinies of these young men to themselves, to plod their way through a preparatory course unaided, but it is cruel in the extreme. Sufferings and trials they anticipate, when they enter their labors, if they are faithful to Him who has called them, and the least they have reason to expect is, that they shall be sustained by those who are to be benefited by their public labors. * * To an efficient, intelligent ministry, the eyes of our churches are turned. On it her hope, under God, rests for the fulfillment of his gracious design to subjugate the world to their due allegiance, through the gospel of his Son. It is a slander which the Christian church repels, and experience proves false, that 'ignorance is the mother of devotion.' Our holy *religion* flourishes most luxuriantly under the sunbeam of science and intelligence, nor shrinks from the scrutiny of philosophy. Let us aid her cause by every facility in our power, and we shall see error hide its head, and a regenerate and renewed church shall rise, 'without spot, or wrinkle, or any such thing,' to declare the glory of Him who was slain, and redeemed her to God with his own most precious blood."

As a consequence of this free expression of opinion on this subject, interest and spirit were awakened. Action followed. Societies were organized. A successful effort was made to establish a literary institution at DeRuyter—an ample building was erected, and the school was opened in the summer or autumn of 1837. In the mean time, animated by the same spirit, a similar school, though on a diminished scale, was commenced at Alfred, December 4, 1836. From that time to this, similar schools have been springing up in various parts of the denomination. Though they have had to encounter occasional trials and difficulties, yet, as a whole, they have been greatly prospered. And though the results have, doubtless, been effected in a somewhat different manner from what was anticipated, in the beginning of the enterprise, yet we have the assurance to believe, that the results, on the whole, are far greater and more beneficial than could reasonably have been expected in the start. We now have academies in almost every nook and corner of the denomination, that are so many well-springs of spiritual light and power. We have not far from sixty thousand dollars worth of stock invested in academic property. This, when taken in connection with the many benevolent contributions we have been called on to make during the time, is certainly doing very well; yet who feels the poorer for it? Who is poorer for it? It is a profitable investment—one of the best we have ever made. It has yielded, is yielding, and is destined long to yield, rich returns. The returns may not be so great in money, and stocks, and meats, and drinks—though in this respect the income has doubtless been greater than the expenditure—yet great and rich returns have come to us in spiritual goods. It has awakened slumbering energies. It has given new intellectual life and vigor. We are realizing spiritual dividends far transcending any income from railroad or bank stocks.

Though we have done much—though we doubtless have hundreds of young men and women in our higher institutions of learning, where we had fives at the beginning of the enterprise—yet the great object for which we all have been so long wishing and praying is yet unattained. We have no "school of the prophets"—no great central institution—an institution to which all of our other institutions shall be as so many perennial fountains. Shall we have such an institution? *

GEOLOGY.

To the Editors of the Sabbath Recorder—

The present aspect of the discussion respecting Geology, in your paper, induces me to propose to you to publish in the *Recorder* an article on that subject contained in the nineteenth number of the "*Theological and Literary Journal*," edited by Daniel N. Lord, and published by Franklin Knight, January, 1853, 140 Nassau-street, N. Y. My reasons for making this proposition to you are too numerous to state at large; but I will name two or three of them. In the first place, I think the subject deserves attention. Next, the article I propose for publication exhibits both sides of the question, and is, I think, very able and argumentative. Lastly, if the advocates of the geological theory wish an opportunity to engage with a controversalist of sufficient ability to make a victory over him an object, as an achievement in favor of their system, or on account of the honor it will do him who gains it, I think they will find in Mr. Lord just the man they want. I am aware that it is impracticable to insert the article I speak of in one number of the *Recorder;* but it may extend through several numbers, and afford space for a review of it as you proceed, or when it is concluded, as may suit the taste or convenience of those concerned.

For one, I am not satisfied with the premises on which geologists build their system, or from which they draw their conclusions respecting the vast antiquity of the earth. If, however, the objections to those views can be invalidated, I am willing to see it done. The time has come when this subject should be handled in the publications which the mass of the members of our churches have access to and read. If the account given of the creation by Moses is susceptible of, and must receive, the construction required by geologists, the believers in revelation ought to understand it. I would say to those interested in these questions, Let us not be prevented from thoroughly investigating them on account of any unpleasant things in each other's *manner* of disputation. It may not be practicable altogether to avoid them. Too many well-begun discussions are broken off in such a way, before justice to the question in hand has been done. The *Recorder* has exhibited several such cases, I think. I hope we may not continue to be defeated in this way in our attempts at investigation. I do not intend to cast any reflections on any by these remarks. I know too well, by experience, how to feel for those who endure the vexations of controversy, and I can make the more allowance for them. I should not make the proposition I do, were it not that I suppose the gentlemen who have been engaged in discussing the subject in the *Recorder* are through with what they propose to say. At any rate, I hope they will have full opportunity to do so, if they have not, for their ability is admitted.

LUCIUS CRANDALL.

[We shall probably print, piecemeal, the article above referred to, commencing in a week or two.]

MISSIONS OF THE PROTESTANT EPISCOPAL CHURCH.—At the late meeting in Hartford of the Board of Missions of the Protestant Episcopal Church, the report of the Domestic Committee stated the receipts in that department to have been $30,404 15. The number of parishes contributing was 620. The receipts of the Foreign Committee for one year were $60,881 69; making a total in both departments of $91,285 84. The question of agencies came up, as usual in all missionary meetings, and as usual was left about where it was found. Mr. Hoffman, missionary from Africa, addressed the meeting, presenting some interesting facts in reference to the African Mission, at the close of which he appealed earnestly to the young men to consecrate themselves to the work of spreading the gospel. Mr. Woodward, late missionary in Oregon, spoke in reference to that field. Dr. Haight dwelt upon the ignorance and culpable indifference in the Church in reference to the moral state of the world. It was estimated that more than two-thirds of the population of the world were enveloped in the darkness of heathenism, and that six out of the twenty-three and a quarter millions of the people of our own country are destitute of the means of grace.

AUTO-BIOGRAPHY OF REV. WM. JAY.—An English correspondent of the *Christian Observer* says that the auto-biography of the Rev. Wm. Jay is now before the public, a goodly octavo of 600 pages, edited by Dr. Redford and the Rev. J. A. James. It may safely be affirmed, that there has been no biographical work so intensely interesting as this published for the last half century. Mr. Jay had preached above 1,000 sermons before he had attained the age of sixteen; at the age of twenty he became the Pastor of Argyle Chapel, Bath, where he labored with constantly augmenting influence for good for upwards of sixty years, dying in his 85th year. For the chief period of his life he rose at five in the morning; and in one part of his account of himself he animadverts upon those who can "sacrifice all those advantages which he enjoyed, to the lazy, low, debilitating, disreputable influence of a late indulgence in bed." From early life, he tells us, he was conscious of the danger of dining out, and the peril connected with the use of spirituous liquors; and at the commencement of the Temperance Reformation he was one of the few British ministers who took the pledge of total abstinence. He speaks, too, with gratitude, of having been "saved from all trouble and expense induced by the habits of snuff-taking and the use of tobacco."

COLPORTAGE IN TURKEY.—There is at Constantinople an American Colporteur, who occupies himself chiefly among the merchant marine of all European nations, and his success in selling Scriptures and evangelical books to Roman Catholics as well as Protestants has been very great. He finds access every where, and to all persons, in a wonderful manner. He was in Smyrna at the time of the Koszta affair, and a few days after the sharp collision between the American corvette St. Louis and the Austrian brig-of-war Hussar. He sold a large number of Bibles on board the latter vessel, thereby accomplishing a more salutary victory than that of Capt. Ingraham himself. He was engaged in the same labors in California, in England, in Malta, in Naples, and Rome, and had the honor to be expelled from the latter place by a special order of police, for no other crime than his great usefulness.

THE HAYSTACK.—The precise location of the haystack beneath whose protection Mills, Hall, and a few others at Williams College prayed into existence the foreign missionary operations of this country, having been ascertained, it has been proposed at a meeting of the Alumni of the college to purchase a plot of land embracing the site of the stack, and an adjoining grove, to the extent of twenty acres, to be laid out and adorned as a Missionary Park, and to erect some suitable memorial on the ground where the haystack stood. "A single dollar left some years since by a Christian woman to secure this very object, should the spot ever be identified, has suggested the idea of dollar donations; and the dollars have begun to come in, though no public proposal to this effect has before been made."

A REVIVAL IN SOUTH AFRICA.—It is stated in a recent missionary paper, that the missionaries of the London Missionary Society, have witnessed a precious and long-continued revival at Lekatlong, one of their stations in South Africa. As the fruits of it, 65, chiefly young persons, have been added to the church, besides 18 from an out-station. There are also many inquirers at another out-station, some of whom were soon to be received. At Cradock the native church and congregation have built a house of worship, 57 feet by 22, with a tower and belfry, almost entirely at their own expense.

The Rev. T. R. Cressy, Baptist Missionary, whose field comprises the whole of that part of Minnesota south and west of St. Paul, states that in that region, which last spring contained no more than fifteen hundred inhabitants, there are now between eight and ten thousand.

RELIGIOUS INTELLIGENCE.

The Philadelphia Baptist Association, at its meeting on the 6th of October, 1854, resolved, "that we recommend to the American Baptist Missionary Union, the employment of Colored Missionaries in Africa, and in such other fields adapted to the labors of colored men, as the Providence of God may open to the Christian Church."

The Free Church of Scotland has lost one of its most efficient and generous supporters, by the recent death of Mr. Donald Maclaren, banker at Callander. It is stated that the Free Church, of which he was a member, received from him, during the past few years, in the shape of contributions to its various schemes, upwards of $125,000.

Deputations seem to be the order of the day. Edward B. Underhill, Esq., one of the Secretaries of the English Baptist Missionary Society, left England on the 18th of Sept. for the Eastern mission stations of that body. Dr. Anderson and his colleague, the Rev A. C. Thompson, the deputation from the American Board, were on the same vessel.

The Oregonians have established an Institution under the name of the Pacific University, at Tualatin, O. T. The President is Rev. S. H. Marsh, oldest son of the late Prof. Marsh, of the Vermont University. Mr. E. D. Shattuck is Professor of Ancient Languages and Literature. Both are gradaates of the Vermont University.

The Doctorate of Divinity (D. D.) has been conferred, this year, on 87 clergymen; on one of them, Rev. Wm. Goodel, by two colleges; and on two others, Rev. Drs. Braman and Alexander, by other colleges in previous years. The number is less by eleven than in 1853.

The Central Church in Hartford, Ct., one of the oldest in the country, of which the Rev. Joel Hawes, D. D., is the pastor, has never settled a minister who has had a former parochial charge, and it has never dismissed a pastor! Its pastors have lived and died with the people.

The death of the Rev. Reuben Tinker, formerly a useful missionary at the Sandwich Islands, is announced. He died at Westfield, Mass., a short time since. Feeble health required his return from the Sandwich Islands.

The Religious Persecutions in Tuscany have been renewed; and persons of both sexes and all ages are being thrown into dungeons for reading the Bible, or even being suspected of it, or connected with those who are suspected.

The Doctorate of Laws (LL. D.) has been conferred, this year, on 41 individuals; on one of them, Gov. Washburn, by two colleges. The number is less by ten than in 1853.

The Second Baptist Church in Chicago has received fifty members by baptism during the past three months.

The Election.—The New York State election has resulted, probably, in the success of the present Governor, Horatio Seymour, the man who vetoed the prohibitory liquor bill. The vote in his favor falls far short of a majority, but with two other prominent candidates, it is doubtless sufficient to ensure his election—a result which every friend of prohibition must deeply deplore. The *Tribune* says—what is no doubt true—that "there has never before been an election in this State wherein Fraud and Corruption were so widespread and pervading as in that just closed. The enormous contributions of the distillers, brewers and liquor-dealers, without distinction of party, cannot have amounted to less than two hundred thousand dollars. Current report names that sum as raised in this city, and twelve thousand at Buffalo, with corresponding liberality among other members of the trade in other cities and villages."

In New York City, Fernando Wood, the democratic candidate, was elected Mayor.

In Williamsburg, there was a riot on election day, in which one man was killed, and several were badly wounded. For several days subsequent, the city was the scene of much disturbance, and was in fact under martial law. Hostility between the natives and foreigners, Protestants and Catholics, was at the bottom of the disturbance.

A Slave-Trader Convicted.—Capt. James Smith, of the brig Julia Moulton, was tried before the United States Circuit Court in New York, last week, and convicted of slave-trade piracy. The penalty is death, which he will probably suffer. On the trial it was proved that the ship was built in Maine; purchased in Boston by Capt. Smith, in January last; cleared in ballast for Newport on the 2d February, and brought to this port, whence she was cleared on the 11th February with a crew of about fifteen persons. She was a regular slaver, holding 664 human beings stolen from Africa, packed like herring. It was given in evidence that the captain told the mate that the real owner was a personage named Lemos, and that the Secretary of the Portuguese Consul went with him to Boston to purchase the vessel! The defense made for the prisoner was that he was not an American—and especially that a custom-house oath should not be regarded. But Capt. Smith had been naturalized, and was considered an American citizen—though a German by birth—and was convicted accordingly.

Death of a Venerable Lady.—Mrs. Elizabeth Hamilton died in New York on the 9th inst., aged 96 years. She was the daughter of Philip Schuyler, the American Revolutionary General, and was born in 1758. At the age of twenty-two she was married to General Alexander Hamilton, who at that time was one of General Washington's Guards, with the rank of Lieutenant-Colonel. She survived her husband a little more than fifty years. After the fatal event which terminated his life, she remained for several years in New York, devoting herself to acts of benevolence; and while she commanded the grateful veneration of the poor, was regarded with profound esteem by all classes of society. Of late years Mrs. Hamilton had resided with a daughter in Washington, where, although abstaining in a great measure from general society, she was the center of a devoted circle of friends, and the object of universal admiration, as well as a genuine lady of the old school, and a noble specimen of a past century.

Printing by Steam.—The foreman of the N. Y. *Tribune's* press room makes the following statement of work done in his department during thirty hours of the 26th and 27th ult:

"We commenced at 4 o'clock A. M., on Thursday, and in thirty hours we had printed and mailed one hundred and eighty-two thousand four hundred copies of the New York *Tribune*, or three hundred and sixty-four thousand eight hundred impressions. By far the larger portion of the blank paper was received during Thursday forenoon, and of course had to be wet and turned. Had this paper been all in one pile, it would have reached the height of seventy feet; its weight, when mailed, would be about twenty-two thousand eight hundred pounds; in cubical measurement, about seven hundred and five feet and a half; its superficial measurement, if all spread out, would be about forty-two and a quarter acres; the lineal measurement would reach about one hundred and twenty-six and two-third miles."

African Traveler.—News of Dr. Barth, from Timbuctoo, has recently reached his father at Hamburgh. Dr. Barth's letters, dated in December last, were transmitted across the desert in caravans to the Mediterranean shore of Africa. One of them commences thus:

"I am still kept here in this city with its mixed and varied population and its numerous masters, each of whom strives to assume as much authority as possible. Like a helpless vessel drifting on the ocean, am I thrown about in a sea of uncertainty betwixt the power and passion of contending parties, without possessing a moment's rest or quietness. Every day brings with it something new, now of a satisfactory character, then again the reverse. Death, captivity, safe return home, are my visions by turns, and it is yet impossible to say which of the three will be my fate."

St. Paul, Minnesota.—With reference to the rapid growth of this place, the *Daily Pioneer*, published at St. Paul, makes the following statement:—

"Five years ago, Saint Paul was an unnoted spot in the center of an unsurveyed wilderness. It has now become a large and populous city—the commercial and political metropolis of a territory unsurpassed in its natural endowments, and unequalled in the rapidity of their development. History furnishes no parallel in suddenness of growth. No other territory since the establishment of our government has been populated so extensively and improved so profitably and permanently, in so short a period."

Bank Failures.—The past week was a hard one for Western Banks. A large part of the Indiana Free Banks have stopped payment, and their bills are being bought up at about 25 per cent. discount. In one day last week the list of broken banks was enlarged by the Canal Bank of Cleveland, the Exchange Bank of Buffalo, the Farmers' Bank of Chicago, and the Woodbury Bank of Connecticut. The Bank of Circleville, Ohio, one of the oldest in the State, also failed, and its failure caused a run on several bankers in Cincinnati, which induced them to suspend. Some of these individuals and institutions will probably recover, but of others there is little or no hope.

California News.

Two weeks later news from California, and $1,700,000 in gold, was received in New York on the 10th inst.

By this arrival we have intelligence of the bombardment of the Russian town of Petropoloski, situated on the western shore of Kamschatka, by French and English war ships. Petropoloski is situated on a kind of inner bay, formed by a sand-bar running across the harbor, and behind this bar were anchored the Russian frigate Aurora and the armed transport Dwina. The allied fleet were unable to approach nearer than three miles to the city, in consequence of a strong current from the northward. The bombardment continued for four days. On the second day three of the forts (the town is protected by eight strong batteries) were silenced, and a detachment of 600 marines were sent on shore for the purpose of dismantling the abandoned forts and spiking the guns. They were surprised by an ambuscade of the Russians, and great slaughter took place. The fortress of Petropoloski had recently been reënforced from Siberia, by way of the Amour River, and was defended by 120 guns, and 1,200 men. The allied fleet sailed away on the 6th September, in a very disabled condition, and afterward captured the Sitka, a vessel mounting three guns, and belonging to the Russian American Company. The British Admiral Price, previous to the commencement of the action, shot himself with a pistol, some say accidentally.

On Saturday, the 7th Oct., San Francisco was thrown into the greatest excitement in consequence of the circulation of a rumor that Henry Meiggs, late a member of the Board of Aldermen, and one of the most extensive lumber merchants of the State, had failed for $800,000—that several forgeries had been discovered—that Meiggs had purchased the bark American, fitted it up in a splendid style, and, taking with him his family and his brother, John G. Meiggs, recently elected Controller, and a large amount of treasure, set sail "for ports in the Pacific." The greatest excitement prevailed for two or three days, and for some time no idea could be formed as to the extent of the forgeries. The matter has been pretty extensively investigated since, and the following is probably not very far from the true amount of the loss sustained by Meiggs's operations.

Amount of failure	$800,000
Controller's Warrants forged	500,000
California Lumber Company forged	300,000
Forgeries on sundry firms	60,000
Total	$1,600,000

The fine steamer Yankee Blade left San Francisco on the 30th of Sept. for Panama, and when 25 hours out struck on Point Aquillos, about 12 miles to the northward and westward of Point Conception. The Yankee Blade struck at 3½ o'clock on the afternoon of Sunday, and a portion of the wreck remained together until 10 o'clock Tuesday morning, when she sank. She had on board, on leaving San Francisco, about 900 passengers, and, as reported by her agents at the time of her sailing, $213,000 in treasure as shipments, which, added to the amount in the hands of the passengers, would raise the total to at least $225,000. The number of passengers lost was between forty and fifty, and many of the survivors suffered to the utmost extent of human endurance.

Two Indians, arrested for the murder of Capt. Spaulding, at Nelsonville, on the 26th ult., were hung by the people on the 1st inst. Two others were shot. There was no doubt of their guilt.

The Chinese continue to be persecuted by the miners and others in the interior. On the Calaveras, on the 4th inst., a party of Irishmen attacked their huts and drove them from their claims. The property of the Celestials was wantonly destroyed, and finally their dwellings also. The Sheriff subsequently arrested them, and they were placed under bonds to answer for their conduct.

From Oregon, more massacres by the Indians are reported. On the 19th of August, about ninety-five miles east of Fort Boise, on the Jeffers Road, three men, named George Lake, Walter G. Perry, and E. B. Cantrel, attached to an emigrant train, were met by the Indians, and being behind their companions, were about leaving the Indians, when the latter fired at and wounded the two former. The whites killed two of the Indians, and in a running fight which ensued, Cantrel was killed. The wounded men subsequently died.

The mines continue prosperous, and, during the coming season, large amounts of gold will be taken out. Several rich leads have been discovered in various parts of the State, and, particularly in Nevada County, the claims are paying well.

European News.

We have one week later news from Europe, the substance of which will be found in the following summary.

There has been more hard fighting around Sevastopol, but the fort has not been taken, nor is it certain soon to be.

The *Moniteur* contains an account of a victory over the Russians near Gumri. They lost their baggage and thirty guns, and a Russian General was killed. The Turks began to besiege the citadel of Gumri, when the Russian corps which formerly defeated the Turks at Bajazid, advanced to the rescue from Erivan. It was, however, repulsed, and shut in a defile, where it suffered considerable loss.

There is no doubt that the Russians have reëntered the Dobrodja in force, but details are wanting.

Affairs look black between Russia and Austria. A great Council of War was held at Vienna. The Emperor presided, and Baron Hess was present. It is reported that Austria summons Russia to withdraw from the frontier of Gallicia.

The London *Morning Post*, announcing semi-officially the acquisition of Samana, says: "It amounts virtually, if not absolutely, to the annexation of St. Domingo. The acquisition, by the United States, of so important a position in the West Indies—a position threatening on either hand the Spanish Islands of Cuba and Porto Rico, and so directly affecting the British West Indian possessions, cannot be received with indifference."

The London *Times* says: "We are informed that Mr. Soulé, American Minister at Madrid, was, on Tuesday, the 24th, refused permission to pass through France, on his return from England to Spain."

Another Polar Expedition is to be sent next spring to bring home the remains of Sir John Franklin's party. Dr. Rae will have the command.

An extensive fire at Liverpool had destroyed six warehouses, and property valued at £20,000, belonging to various merchants.

The overland mail had been telegraphed, with Canton dates of September 9. Canton was still besieged, and the distress of the besieged was great. The insurgents still held Shanghai.

Hints for would-be Californians.—A correspondent of the N. Y. *Tribune* says: To those who contemplate coming hither in pursuit of fortune or pecuniary advancement, it is high time to offer a few hints; especially to that class which designs to live without hard labor. Of such, California has an immense glut. There are at least twenty professional men, clergymen excepted, where there should be one; of speculators, brokers, and every description of mere gamblers, the same; of clerks and those who would become such, and accountants, from fifty to hundreds stand waiting with their mouths wide open for even the scent of employment; and almost an equal redundancy in the mechanical aspirants for labor. The wages of labor still remain very high, giving splendid remuneration to those in employ; but chagrin and disappointment attends the major portion of employées on the Pacific coast, with destitution and suffering, unless they are able and willing to go to work in the mines. There constant employment of some kind can be had, though the pay is not high enough to satisfy the general wish for the hardships of the service performed. The only class of persons who are in demand among us now are those inured to hard labor, and who will go into the mines at once and face and overcome all hardships. Such men can mine, lumber, quarry, dig water ditches, farm, &c., and they can, by economy and industry, accumulate at least from four to six times as much on wages here as they can at home; while if intelligent and prudent in mining for themselves, they have their chance in common with those who are eminently successful.

It is estimated that 33,076 men in the United States are engaged in internal navigation; 56,021 in navigating the ocean; 65,225 in the learned professions; 119,607 in commerce; 891,749 in manufactures; and 3,719,951 in agriculture.

The Rev. Antoinette L. Brown has resigned the pastoral charge of the Orthodox Congregational Society in South Butler, Wayne Co., N. Y., with a view to the improvement of her health. She will continue, however, to preach and lecture as hitherto.

SUMMARY.

The Toronto *Colonist* states that the Grand Jury for the County of Kent, after hearing the Hon. Chief Justice Macaulay's charge, made their presentment on the 4th inst., in which they attribute the recent great loss of life on the Great Western Railway, to the culpable carelessness of D. W. Twitchett, the conductor, and J. Kettlewell, the engineer, on the gravel train St. Lawrence, both of whom are presumed to be guilty of manslaughter, by their conduct, which was in opposition to their written instructions. After the presentment, the Judge issued his warrant for the arrest of the parties named, one of whom, Kettlewell, had been arrested and is now in jail, having been refused liberation on bail.

Cabbages may be headed in winter by setting them with their roots in good rich earth just as they grew, and covering the tops so they will not freeze. This may be done with a roof of boards, hay or dirt, or brush and rails and straws covered with dirt, with little air-holes. Cabbage grown in this way is bluached, sweet and tender, and will pay much more than the cost of thus arranging the late stalks which failed to form heads in the fall. The work should be done just before the ground freezes, and at first only slightly cover the tops.

Capt. Lukes, of the clipper John Clemens, sent by the U. S. Consul at St. John, N. F., to cruise for the Arctic's boats, appears to have performed his duty faithfully, and to have cruised in the proper direction. In addition to the India rubber mattress, and the large chest, before reported seen by him, he picked up a flag staff. An officer of the steamship Baltic, spoken by the John Clemens during the cruise, recognized the flag-staff as having belonged to the Arctic.

Apples should be dried as soon as possble after they are cut, to have them light colored; stoves and kilns should be used in preference to putting them out on scaffolds to run their chance for rain or sunshine; and as soon as dried, they should be boxed up tight, to keep them from the insects which deposit their eggs among them and produce the worms which spoil so many of them. In this way they may be kept for years with perfect safety.

The *Tribune* has received an anonymous letter from Missouri, stating that a secret organization exists in all the upper counties of that State, the object of which is to carry Slavery into Kansas at all hazards. Men are pledged to repair to that Territory on the night preceding the election, present themselves at the polls the next day, and cast their suffrages for Slavery and its candidates. The Society is said to number several thousand members already.

Chester Cady, a survivor of the revolutionary struggle, died at Vernon, Oneida Co., recently, at the advanced age of something over 90 years. He entered the service of the American army at West Point in 1782, and served under Gen. Putnam. He was a much respected citizen of Vernon for many years, but for the past five or six years, being afflicted with blindness and old age, he was wholly confined to the house.

The Rochester *American* records the death of the Hon. Elisha Ely, one of the founders of that city, and among the earliest settlers of Monroe County. He died at Allegan, Mich., (where he settled in 1834,) Nov. 3. Judge Ely had occupied many high positions in Michigan. He was the projector of the system of internal improvements in Michigan, and was President of the Board of Regents of the University. He was 70 years of age, and a native of Springfield.

The Detroit *Enquirer* states that the Saut Ste. Canal, containing within its limits the largest locks in the world, will be completed by the 15th day of November. The Commissioners appointed by the Governor to superintend the work, have been notified to be present on the 20th of the present month, to judge of and accept the work, if found to be in fulfillment of the terms of the contract.

A dispatch dated Troy, N. Y., Thursday, Nov. 9, 1854, says: A large auction sale of wool took place to-day at the depot of Messrs. Herrington & Warren, of this city. 475,000 pounds of wool were sold at fair prices, ranging from 30 to 38 cents per pound. There was a large attendance of Eastern manufacturers and of brokers and dealers of New York, Philadelphia, &c.

A number of workmen were, a few days since, engaged in digging earth from an embankment at South Marcellus, Onondaga County, for the purpose of filling in at the end of a highway bridge, when the embankment fell in and killed three of the laborers. Two of them were young men; the other was a man of family.

The Hon. Josiah Butler, a distinguished citizen and prominent public man in New Hampshire, and a Member of Congress during the Missouri Compromise excitement in 1819 and '20, died at his residence in South Duffield, N. H., on Sunday, the 29th ult., at the age of 74 years, after an illness of one week.

We have heard recently of some low sales of railroad iron, but the Fayettville *Observer* quotes some purchases even lower. It states that Gov. Morehead recently bought iron for the N. C. Railroad in New York at $42 per tun; and that Col. Thompson bought for the Atlantic Road at $48. Iron not long since was selling from $65 to $75 per tun.

A very interesting and unique celebration took place at Syracuse on the 3d inst. About one hundred of the pioneer settlers of Cortland County assembled at a dinner to commemorate the completion of the Binghamton and Syracuse Railroad. Their ages varied from sixty-one to eighty-eight years.

The Troy *Budget* says there has been gathered from a single apple tree, upon the farm of Mr. Nehemiah Perkins, in Topsfield, the extraordinary quantity of one hundred bushels (40 barrels) of apples. The tree has always been a great bearer, frequently producing from fifty to sixty bushels. The tree is about fifty years old.

Judge Knowlton, of the Supreme Court of Wisconsin, has been arrested and held to bail in the sum of $10,000, at the instance of Caleb Cushing. The difficulty grows out of an injunction granted by Judge Knowlton in the suit of Cushing vs. Hungerford.

During the eleven weeks that the epidemic raged in Savannah, there were 600 deaths from yellow fever, out of a total mortality of 967.

A telegraphic dispatch from Indianapolis states that nearly all the free banks in the State have suspended payments in specie, and the Auditor was exchanging notes for stocks at par. The 2 per cent. arrangement which a few of the banks made for redemption here has been abandoned, and all Indiana free money is now quoted at 25 per cent. discount.

A dispatch dated Utica, Friday, Nov. 10, 1854, says: The Catholic Church at Oxford, Chenango County, was broken into on Thursday night, and the silver pix, a vessel cased with gold, for containing the blessed Sacrament, was stolen, and other outrages committed.

The Legislature of Vermont, now in session, has passed a law to punish the fraudulent issue and transfer of stock, making such issue a felony, punishable by fine not exceeding $1,000, and imprisonment in the State Prison for a term not less than one year nor more than ten.

A dispatch dated Boston, Tuesday, Nov. 7, 1854, says: The fourth emigration party for Kansas left here this afternoon, consisting of fifty-five men and a few women and children. Accessions to the party were expected at Worcester, Springfield, and other points.

The Ohioans are getting up the means to erect a bronze statue to Gov. Tom Corwin. Several of the leading citizens of Ohio have been appointed Commissioners to attend to the business. Mr. Jones, an artist, proposes to commence the model as soon as $5,000 is subscribed.

A dispatch dated Columbia, Thursday, Nov. 9, 1854, says: A duel was fought fourteen miles from here to-day between Peter Gaffney and Dr. Ray. The former was killed at the second fire. The latter escaped uninjured.

The Trustees of the Association known as "The Ebenezers," having visited Kansas with the view of making a settlement in that Territory, have returned, and report a location made there of 100,000 acres.

Dr. Graham, the Louisianian who killed Mr. Loring of California, at the St. Nicholas Hotel, New York, and was convicted of manslaughter, was last week sentenced to the State Prison for ten years.

The election returns from Illinois are bad for Nebraskaites. Seven senatorial and twenty-five representative districts are in, and not *one* Nebraskaite is elected! Congress all the same way, as far as heard from.

Nine months ago fifty-two per centum of the letters sent in the U. S. mails were at that time pre-paid. A recent investigation shows, that at this time quite sixty per centum of the letters so sent are pre-paid.

The life-insurance companies of this city suffer to the extent of $80,000 from the loss of the "Arctic." Of this sum $15,000 was on the life of Edward Sandford.

Six majestic elm trees, in front of a dwelling in Marlborough, Mass., have been insured by their owners in the sum of five hundred dollars, against loss by lightning or fire.

A recent census of the City of Savannah gives it a population of 11,896. The whites number 6,313, and the blacks 5,583.

The Hon. Francis Granger has published a letter proposing a reörganization of the National Whig party.

Three men were killed at Marcellus, N. Y. Nov. 8th, by the caving in of an embankment.

New York Markets—November 13, 1854.

Ashes—Pearls $6 25; Pots 6 87.

Flour and Meal—Flour 7 87 a 8 25 for common to good State, 8 62 a 8 87 for Michigan and Ohio, 10 50 a 11 25 for extra Genesee. Rye Flour 7 00 a 8 12. Corn Meal 4 50 a 4 87. Buckwheat Flour 4 00 a 4 25 per 100 lbs.

Grain—Wheat 1 90 a 1 95 for white Canadian in bond, 2 00 for red Delaware, 2 35 a 2 40 for white Genesee. Rye 1 30 a 1 32. Barley 1 35 a 1 40. Oats 52 a 57c. for State and Western. Corn 85 a 86c. for mixed Western, 87c. for yellow. Black-eyed Peas 2 75. White Beans 1 50 a 1 87.

Provisions—Pork 11 37 for prime, 12 25 for mess. Beef 5 50 a 7 00 for country prime, 8 00 a 10 00 for country mess. Dressed Hogs 6 a 7¼c. Lard 9 a 10c. for new. Butter 12½ a 17½c. for Ohio, 17 a 23c. for State, 24 a 26c for Orange County. Cheese 10 a 11c.

Potatoes—1 87 a 2 25 for Western reds, 2 25 a 2 62 for Carters and Mercers.

Seeds—Clover 11 a 11½c. Timothy 2 44 a 2 62 per bushel for reaped. Rough Flaxseed 1 65 a 1 70.

Tallow—12c. for Butchers' Association.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

MARRIED,

On the 4th inst., by Rev. Mr. Cushing, Mr. Delos Green to Miss Rhoda Ann Burdick, all of Berlin, N. Y.

At Potter Hill, R. I., on the 5th inst., by Eld. C. M. Lewis, Mr. William H. Burdick to Miss Mary E. Edwards, both of Hopkinton.

DIED,

In Verona, N. Y., Oct. 25th, 1854, Mr. Abram Williams, aged 43 years and 6 months. He was a son of Dea. Thomas Williams, of Verona, and the youngest of twelve children, who arrived at maturity, nine of whom survive him. He has left a loved companion and six children to mourn the loss of a kind husband and affectionate father; but they entertain a hope that their loss is his infinite gain. D. P. C.

At Jackson Center, Shelby Co, Ohio, of a complication of diseases, Priscilla, wife of Lemon Lippincott, in the 42d year of her age. She professed religion in her 15th year. During her subsequent years, the cause of her Redeemer seemed to lie near her heart. She has left a husband and ten children, together with numerous other relatives and friends to mourn her loss. She left the comforting evidence behind, that she died in the Lord. H. W. B.

LETTERS.

Henry Babcock, B W Millard, Wm M Fahnestock, H W Clarke, J D Stillman, A Steward, R Babcock, J B Wells, N Kuykendall, L Babcock, A Stillman, D P Curtis, J Whitford, Z Campbell, B Clarke, Joseph Goodrich, Charles Potter, Geo G Hamilton, H Burton, H W Babcock, A B Burdick.

RECEIPTS.

Quarterly Meeting.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut will be held with the Church in Waterford, Ct., commencing on Sixth-day evening, Dec. 1st, 1854, at 6½ o'clock, and continuing through Sabbath day and Sunday. Opening discourse by Eld. C. M. Lewis.

P. L. BERRY, Committee.

Saddler and Harness-Maker Wanted.

THE subscriber wishes to employ a journeyman saddler and harness-maker; also, a boy desirous of learning the trade. Those who keep the Sabbath would be preferred.

P. L. BERRY,
New London, Ct.

23–3t

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commmencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare.

GEO. H. PEGRAM, Sup't.

Miscellaneous.

Talk at the Farmer's Club.

The *Tribune* gives the following account of conversation at a recent meeting of the Farmer's Club connected with the American Institute:—

Solon Robinson exhibited two potatoes grown by T. H. Matterson, of Sherburne, Chenango County, N. Y., that were esteemed as fine specimens as ever had been seen by the members of the Club. They are supposed to be of the sort known as "peach blow," and "old English white." Both are of the kind called round potatoes, and are of remarkable specific gravity for their size. The weight of these is 17 and 18 ounces each. Mr. Robinson remarked, that the place where sea level, and had not been affected by drouth these grew, was, perhaps, 1,500 feet above the as much as other sections. From observations this year, he is satisfied that dry seasons, with late rains, in moderate quantities, are the best for potatoes; because the roots that take up the pablum, lay close to the surface. He is in favor of planting large whole potatoes, upon deeply-plowed land, but near the surface, and cultivated level. Never hill your potatoes. All the manuring should be by top-dressing, or lightly incorporating the fertilizer with the surface-soil. The great thing for potatoes is potash and carbon. It is a good plan to mulch the land deeply, after the potatoes are planted, and never do any thing more to them. For seed potatoes add more mulching, and let them remain in the hill until spring. Good crops of potatoes have been grown under swingletow, upon grass sod.

Prof. Mapes said—I tried an experiment by covering the seed with salt marsh hay, upon mellow soil. I got a good crop, but the hay dried away and became too thin, and all the tubers that came to the light were bitter and unfit to eat. When the potatoes are under the earth, mulching keeps it moist, and affords the right kind of fertilizer as it decays, and is washed down to the roots by rains. Hilling potatoes is an old-fashioned, stupid folly. Black soils, or those full of carbonaceous matter, are always best for potatoes. They want nitrogen and carbonic acid. The great weight of these specimens indicates that they are rich in starch, and that is what makes the heavy potatoes the most valuable. One man upon the Newark meadows raises 500 bushels of potatoes per acre, year after year. All such land, when freed of natural acidity, is the best soil for this valuable crop.

The subject of selling every kind of farm produce by the pound was then taken up, and an interesting discussion entered into, though the argument was all upon one side, for all were in favor of the measure.

Solon Robinson said he wanted no better argument than these big potatoes, because there would be no fair, honest way of measuring such tubers. A single potato kept off the measure would be a loss of several cents to the purchaser. Some persons would buy small potatoes in preference, thinking that they would get more food, owing to the large interstices between the tubers. That, however, is a great mistake. There is no rule so fair as weight. How can you sell cabbage, beets, carrots, parsnips, and many other coarse vegetables, honestly, in any other way?

Prof. Mapes said any city government that desired to protect the poor, should enact a law to sell every thing by the pound. Mr. Robinson has told you that they sell butter in some places by the pint. Why, it is the common practice in Dublin, and some towns in England, to sell butter by the yard. It is put in a tube and shoved out like the meat from a sausage stuffer, and cut off by the yard. The change to weights for every thing would be very easy if we had such a law. Let the bushel and smaller measures be wholly abrogated. It would save a deal of work and much cheating.

A Remarkable Explorer.

An officer of H. M. S. Pluto writes under date Fernando, July 25:

"We have had a most exciting cruise; after leaving this place, and communicating with the senior officer at Loanda, we were sent up the river Congo to settle a dispute between the master of an English merchant-brig and some Portuguese. After this was arranged we returned to Loanda for our letters; but the Polyphemus not arriving in time, the ship sailed again for the Congo, and I was left, behind in one of our gigs, with four kroomen, for the mail. During our stay I met, at the house of one of the Commissioners, one of the most extraordinary men I have ever seen, Dr. Livingston; he has just arrived from the Cape overland, a most arduous undertaking, and one never accomplished before, though often attempted. His plan of proceeding differed materially from any of his predecessors; instead of setting out with half a hundred attendants, horses, bullock wagons, &c., he commenced his journey, carrying with him only a sextant, gun, chronometer, tent, four servants, and as many days' provisions, relying on Providence and his gun for a supply when these were gone. After leaving the Cape Colony he had to travel a long way to the northeast in order to avoid the deserts and hostile tribes in their vicinity, that lay on his left; crossing in this route a great many branches of the river Zambegi and others; the names of which I have forgotten, till he arrived at a large town; there, as the chief was very hospitable, he remained a short time to recruit health, having been nearly drowned and starved half a dozen times during the nine months it took him to perform this part of the journey, and his arm badly broken in two places by a lion. It appeared he had wandered one evening from his attendants, after they had pitched their tent, in quest of game, when he came suddenly on a large lion crouching down ready for a spring at him; without waiting a second he fired, and must have been knocked down at the same moment and stunned, as he remembers nothing from the time he fired till he was found by his servants next morning; when they came up they found the doctor insensible and the lion lying dead alongside him. When he left, the chief, who was very desirous of finding a route to the westward for the transmission of his ivory, gave him twenty-four of his people to assist him on his journey. After leaving, he again traveled to the N. E., until he arrived in the parallel of Loanda. Now came the tug of war. He had upward of a thousand miles to travel across the unexplored countries of our charts, a tract never hitherto trodden by any white man, and wholly unknown even to the blacks he had seen as yet; however, this part of their journey proved to be the easiest, and it was not till he arrived near Cassanga, on the Portuguese frontier, that he met with any molestation. The country he found to be thickly populated, and the inhabitants very peaceably disposed. From their never having seen a white man before, you may fancy what an object of curiosity he became to them; wherever he stopped, the people from far and near flocked round him, with the utmost astonishment pictured on their countenances. As the doctor was very much sunburnt, his color did not so much surprise them as his hair, which was very long; this was the great object of attraction wherever he went, and highly favored did those fancy themselves who became the possessors of a lock of it. Every tribe he met with had some idea of one Supreme Being and a future existence, though they all worship in addition various animals that they hold sacred. At every place he stopped, they supplied him liberally with provisions, and it was not, as I mentioned before, till he arrived near the Portuguese territories that he met with any trouble. There the inhabitants have been in the habit of kidnapping the people further inland to sell to the Portuguese for slaves, and fearing, should a road be opened that way, it would spoil their traffic, they became very troublesome, and wanted the doctor to pay toll every step he took; however, by putting on a bold front, he managed to make his way through, and arrived at Loanda safely in the beginning of June, making it exactly two years since he left the Cape. The doctor is very much emaciated from the hardships he had undergone, and has not recovered the use of his arm perfectly yet; but as soon as he is well he is determined to return, trying this time to find a shorter road than the one he came by. We had the whole of his attendants on board, and showed them over the ship; having never seen salt water before, or anything afloat larger than a canoe, they were very much surprised and delighted, though they told the doctor they would never be able to get any of their people to believe them on their return, so perfectly astonishing did everything appear to them."

Visit of an American to Japan.

Several months ago, Mr. Silas E. Burroughs fitted out at San Francisco a clipper-ship in which to visit Japan. The *China Mail* announces the arrival of that vessel at Hong Kong on its return, and gives the following account of Mr. Burroughs' visit:—

"The Lady Pierce arrived in Jeddo Bay fifteen days after Commodore Perry had left, 'as a token of amity and peace, and without any preparations for war,' and the high Japanese officers said the visit was much more pleasing to them than that of Commodore Perry, who had with him 'too many big guns and fighting men.' The Japanese, however, expressed the utmost regard for the Commodore and his officers.

"The ship had been supplied at San Francisco, with every comfort and luxury likely to gratify and interest the Japanese, who were surprised to find such an elegantly furnished vessel used as a private gentleman's yacht. Her dimensions were taken by artists, together with delineations of her guns, tackle, &c., the authorities saying the Emperor intended to have two vessels built on the same model.

"On board was a Japanese man, the sole survivor of a crew of fifteen men belonging to a junk which had been blown out to sea, and was picked up near the Sandwich Islands after having drifted about for seven months. This man, named Dee-yee-no-skee, was received with the most lively demonstrations of pleasure by his countrymen, who listened with much delight to his graphic description of his rescue from the junk, and kind treatment by the Americans, especially on board the Lady Pierce, in which he had been, by the kindness of her owner, permitted a free passage to his native country. The Japanese, especially the lower orders, were profuse in expression, by words and gestures, of their gratitude to Mr. Burroughs, who seems to be of opinion that Dee-yee-no-skee, a man of fair talents, is likely, by his account of American manners and customs, to accomplish more than hosts of ambassadors toward forming and cementing an intimacy betwixt the Japanese and foreigners.

"Shortly after the arrival of the Lady Pierce at Urago, orders were received from the capital that Mr. Burroughs should be supplied with everything he might require, and received with 'similar hospitality to that displayed toward Commodore Perry.' With a party of the Urago officials on board, the Lady Pierce proceeded to within ten miles of Jeddo, and her owner expressed a desire to anchor off that city; but this was objected to by the officers, who said, 'It is not good; Commodore Perry did not go there, and we hope you will not.' During the stay of the vessel, every part of her was crowded with visitors, who were profusely regaled with the refreshments with which the vessel had been provided, fresh oysters and peaches being their favorite delicacies, with champagne as a beverage; and although at one time there must have been several thousands in and around the ship, and though every thing, silver-ware included, was thrown open to their inspection, not a single article was stolen. Large presents of silk, porcelain, lacquered-ware, &c., were made in the name of the Emperor, to Mr. Burroughs, who, however, was requested to give publicity to his determination that henceforward, in accordance with stipulations in the treaty, no foreign intercourse whatever would be permitted with Jeddo, but that all vessels must proceed either to Simoda or to the other ports thrown open to American trade.

"From Jeddo Bay, therefore, the Lady Pierce proceeded to Simoda, under the pilotage of three men sent on board by the authorities, and escorted by a Government cutter, manned by two officers and 20 men, who had received orders to render every assistance that might be required. During the entire stay of the vessel, no guard was placed over her, nor was any restriction put upon landing, of which Mr. Burroughs twice took advantage while in Jeddo Bay, and on both occasions was received with every mark of courtesy. He is, however, of opinion, with the officers of the United States squadron, that no extensive foreign commerce can possibly, at least for many years to come, be carried on with Japan. He says he applied for coal, and was told at first that 'Government had determined not to dispose of their sea coal;' but, after reference to Jeddo, he was informed he might have as much as he required at $1 65 per picul, or $28 a tun—such coal as he saw at the depot being of a very inferior description to that sold in Oregon at $8 a tun."

Mr. Burroughs says the Japanese are fully aware of the present disturbed state of China, which they impute entirely to the effects of foreign intercourse; and he considers the enormous prices fixed upon such commodities as he desired to purchase a certain index that fear alone dictated their Emperor's acquiescence in the demand made by Commodore Perry. He likewise asserts the Japanese to be a nation of atheists, denying the existence of a God, and selecting as an object of worship either the Spiritual Emperor at Meaco or any other Japanese. He was told by the interpreters that formerly their religion was similar to that of China, but that the belief in a Supreme Being had latterly been entirely discarded; and they professed to be much shocked on Dee-yee-no-skee declaring his belief in the Deity, to whom, and not to the Spiritual or Temporal Emperor, he said his successful applications for, and thankful acknowledgments of, deliverance from the drifting junk had been directed.

Extraordinary Ghost Story.

Most ghost stories are only foolish and laughable; but this one, from the Buffalo *Commercial*, is certainly melancholy in the extreme:—

Within the past year the people of a village in a western State became greatly excited by the alledged nightly appearance of a ghost in the village graveyard. Few of them, indeed, had dared to see it; but some had; and they, without making too familiar with it, had still seen it come and go, walk about, seat itself, etc.; and the statements of those were too well authenticated to be disregarded. What the few saw, the many believed; and the whole community soon became exercised upon the subject of this strange nightly visitation to the graves of the dead. Of course, the ghost was in the usual grave-clothes, in which, so far as we know, ghosts always appear; and it was entirely regular in its hours—always arriving among the tombs just at midnight, and leaving at near early dawn. It had often been seen to come and go, passing over fences in its course; but no one had learned whence it came or whither it went.

At length the matter from being the town talk became the town dread. Numerous individuals got excited, and superstitious ones grew melancholy and taciturn; people looked doubtingly at each other, as they passed, in twilight, and all contrived their journeying at that hour so as not to approach the last resting-place of their departed friends.

The growing dread at length became insufferable, and engaged all minds. There chanced to be in the village a youth of nineteen, from western New York, whose domestic education had carefully excluded all faith in supernatural agencies, and who therefore looked only to natural causes for explanations of the events and occurrences of this life. This youth resolved to fathom the mystery of the graveyard ghost. He found one associate; and the two after nightfall secreted themselves among the tombs to observe. Punctually as the hour of twelve drew nigh, the ghost which had caused so much dread was seen approaching. The moon was shining brightly, and the white-robed object was seen distinctly. Overcoming two fences, it entered the graveyard within actual reach of the youth who had set on foot the investigation, and as the light fell fully upon the face of the ghost, he recognized the well-known features of an acquaintance, who was then in her early widowhood. Her husband had recently been buried there; and so dreadful had been the shock, that the reason of the wife had been dethroned by it, and she was now a wandering maniac. She saw not her observers, but seated herself, as she was wont, upon the grave of him she had loved but too fondly. The two then approached the unfortunate, and addressed her in kindness. She knew them not, but conversed freely with them, calling them angels, and craving protection. She was in her night-clothes, and her wandering thus, through the agony she had suffered, and her nightly occupying this sad seat, had converted that poor mental wreck of humanity into a ghost. On this occasion she could not be induced to abandon her post; and, of necessity, she was left there to complete the hours of that night's pilgrimage. She is now in a lunatic asylum.

Keeping Winter Apples.

A great many persons lose their winter apples, not because they will not keep, but because they do not know how to keep them. We commend the following to the attention of all. Recollect that too much importance cannot be attached to keeping apples in a cool place, but where they will not freeze.

The keeping of apples and other fruits depends very much upon the care with which they are gathered, and the place in which they are deposited; hence a few hints on the subject will not be valueless to the orchardist and gardener.

Late autumn and winter apples belong to that class of fruits which are gathered before maturity, and ripened in the fruit-room or cellar; and they should be picked when they have received from the tree all the valuable elements the season will allow it to give them. English gardeners have a rule that no fruit should be suffered to remain on the trees after they cease to vegetate, and this is in general a good one. The apples above spoken of, as well as pears of the same class, may remain ungathered until there is danger of injury from frost, as the sun and air, and the still remaining vigor of the tree, seems necessary to their perfection and maturity.

Apples designed for long preservation should, as far as practicable, be picked by hand, carefully and separately, and when they are not wet by dew or rain. They should be handled so as not to bruise them in the least—as carefully almost as eggs or glass-ware. Lay them gently upon the floor of a cool and dry room, a foot deep, to sweat and season for two or three weeks; and then, on a clear, dry day, sort and pack the apples in clean, dry barrels, filling them so full that the apples cannot move after being headed in. The very best, which will keep longest, may be wrapped up separately in soft paper, before packing; or they may be placed in layers, with dry chaff around and between them.

Most cellars and ground floors are too damp for the perfect keeping of apples through the winter and spring, and also of too variable a temperature. The latter should not vary much from forty degrees. If an upper room can be so prepared as so retain about the same degree of heat, dryness, and darkness, it is a very desirable locality for the preservation of fruit, not only apples, but pears, grapes, &c. To the preservation of the two last named, considerable attention has recently been given. [New Yorker.

Perilous Mountain Ascent.

It has long been known, that some of the peaks of mountain ranges in Oregon are of great height. Our California exchanges bring us very interesting accounts of the ascent of the loftiest of these, called Mount Hood, which has now been ascertained, by actual measurement, to be full 18,361 feet in height. This is the highest peak on the American continent, and one of the highest in the whole world. The party which made the ascent was composed of a Mr. Dyer and Capt. Travaillet, who left Portland on the 4th of August for the purpose, but were afterwards joined by Mr. Lake, Capt. Barlow, Judge Olney, and others. After getting above the snow-line it was discovered by means of a telescope that the mountain is volcanic, smoke being seen to issue from the summit. On the 8th the ascent of the upper mountain commenced on the south-east by east side. After ascending several thousand feet of ever-continuous snow-fields at an angle of almost fifty degrees, three of the party (Major Hallman, Capt. Travaillet, and Judge Olney) gave out, and had to stop in consequence of dizziness caused by the rarified atmosphere. From thence upward the angle was more steep, until it reached 72½ degrees, an Indian being the guide and the road lying along a ledge of rocks perpendicular with the mountain. At 2½ o'clock P. M. on the 8th the summit was attained, and was found to be extremely narrow and crescent-shaped. From this peak mountain tops one hundred miles distant were distinctly seen. The peak of Mount Hood is thus described by the account before us:

We found the top similar to that of Mount Helens—extremely narrow, lying in a crescent shape; Mount St. Helens facing the northwest by a crescent, while Mount Hood faces the southwest. The sharp ridge on the top runs from the southwest to the north, making a sharp turn to the west at the north end. The main ridge is formed of decomposed volcanic substances of a light redish color, with cones from twenty to fifty feet high at intervals of a few rods.

These cones or rocks are full of cracks or fissures, as if they had been rent by some convulsion of nature at a remote period.

Between these cones there are numerous holes, varying from the size of a common water-bucket down to two or three inches in diameter. Through these breathing holes (as we call them) and through the crevices in the rocks there is constantly escaping hot smoke or gas of a strong sulphuric odor. In passing over the ridge for near half a mile we discovered these breathing holes; through some the heat is more intense than in others.

We did not carry up a thermometer; therefore we could not get the exact degree of heat; but from holding our hand over several of them we have no doubt that the thermometer would have shown "boiling heat" in some of them. [California paper.

The Americans as Linguists.

A writer in the *Eclectic Review* pays our countrymen a handsome compliment, for the power and facility they evince in acquiring foreign languages.

The Americans (he says) have peculiar aptitude for foreign travel. They are excellent linguists. It is even said that they learn French more easily, and speak it better, than any foreigners in France. Their knowledge of Spanish and German surpasses ours; and numerous distinguished foreigners, not British, have long been naturalized among them—the Benezets, the Gallatis, the Agassiz, the Audubons, the Girards, and the Sillimans, the family of our author. The check-work of which all nations consist, more or less, (and of which ours is a famous example, as Defoe shows in his "True Briton,") is more visibly and more audibly social check-work in the United States than elsewhere.

While the great subtratum is our "Brito-Romo-Saxo-Dano-Norman-English," there will be found superadded districts of pure German, French, and Spanish, with strong Dutch and Swedish traditions. American translations of eminent foreign books of jurisprudence and philosophy ought to be better known in England; and if all their ambassadors cannot, like Mr. Everett at Windsor, "fluently converse with each member of the diplomatic corps in his own vernacular tongue," those ambassadors, and their consuls, too, are extensively acquainted with foreign languages. So, although Mrs. Putnam has, perhaps, no equal in any country in the world for critical knowledge of languages, for "she converses readily in French, Italian, German, Polish, Swedish and Hungarian, and is familiar with twenty more dialects, besides Greek, Latin, Hebrew, Persian and Arabic;" although this extent of the linguistic acquirements is paralleled only by Cardinal Mezzofants, and some half dozen great names of both worlds and sexes, still, the fact of one American woman being thus accomplished, marks the studious tendency of her people.

How to Make One Farm Equal to Three.

G. T. Stewart, Esq., in a recent address before the Ohio Agricultural Society, thus speaks on this subject:—

"Many farmers, who are destroying the productiveness of their farms by shallow work, as they find that their crops are diminishing, think only of extending their area by adding acres of surface, as if they supposed that their title deeds only gave them a right to six inches deep of earth. If they will take those deeds, study their meaning, and apply the lesson to their fields, they will soon realize in threefold crops the fact that the law has given them three farms where they supposed they had but one; in other words, that the sub-soil, brought up and combined with the top soil, and enriched with the atmospheric influences, and those other elements which agricultural science will teach them to apply to their ground, will increase threefold the measure of its productiveness. To show to what extent the fertility of the soil can be increased, I refer to a statement in the last Patent Office Report. In the year 1850, there were nine competitors for the premium corn crop of Kentucky, each of whom cultivated 10 acres. Their average crop was about 122 bushels per acre. At that time, the average crop of wheat per acre in the harvests of Great Britain, on a soil cultivated for centuries, was about double that produced on the virgin soil of Ohio. Why is this? Simply because British farmers are educated men, and apply work wisely. They pay back to the earth what they borrow; they endeavor, by every means in their power, to enrich their ground, and in return it enriches them. If our farmers, instead of laboring to double their acres, would endeavor to double their crops, they would find it a vast saving of time and toil, and an increase of profits.

Many of them never think of digging ten inches into the soil, unless they have dreamed about a crock of gold hid in the earth; but if they would set about the work of digging in earnest, every man would find his crock of gold without the aid of dreams or divination.

We have a great advantage over British farmers, in the fact that our farmers nearly all hold the lands which they cultivate, in fee simple, while in England they are chiefly tenants, hiring the lands of the nobility, paying enormous rents to the proprietors, besides heavy taxes to government. Taxes here are comparatively light, and our farmers are their own landlords. Hence they have been able to pay threefold wages for labor to those paid in Europe, pay the cost of transportation, and yet undersell the British farmers in their own market.

Preparation of the Soil for Wheat, Grain, and other Crops.

Those who intend to put their fields down to grass and grain, should remember that the length of time in which they will remain profitable in grass, must depend materially upon the proper mechanical preparation of the soil. They should recollect, that deep plowing is now the order of the day, and not as a mere matter of fashion, but from the well-ascertained fact that deeply disintegrated soils will furnish a larger amount of pabulum for plants than those which are surface worked. Where the roots of plants can travel readily, they must of necessity come in contact with a greater amount of surfaces of particles, and therefore receive a larger amount of those materials which have been rendered suited to their use by the action of nature's laws. They should remember, also, that in deeply disintegrated soils the grains and grasses never suffer from drought; for in such soils, the condensation of moisture from the atmosphere, circulating at a greater depth, must protect the plants from those ills consequent upon the absence of a proper amount of moisture, and the presence of this moisture not only conveys such pabulum as the plant requires, placing it in a condition to be appropriated, but also supplies the conditions for the more rapid chemical changes, which should continue to take place upon both the organic and inorganic constituents of the soil during the growth of the plants. To secure these conditions, then, we should not only plow the surface deeply, but follow in the same furrow with the subsoil plow, disintegrating it to a greater depth, slightly elevating it, and thus supplying the means of getting rid of excess of water during floods, and securing a continued supply during drought. This subsoiling is absolutely necessary for the more profitable culture of those crops which are called tillering crops; and among these will be found the grains and grasses. Every farmer knows that a single grain of wheat will throw up many shoots, and that these arise from tiller roots thrown out from the crown of the plant; and he also knows, that if any one root of that plant has found its way down to the subsoil, and has come in contact with the cold and not disintegrated portions, that the termini of that root will turn brown, become sickly, and the plant will cease to tiller. It is for this reason that shallow-plowed meadows run out, and it is for this reason also that subsoiled meadows never run out. Let those who doubt this fact look at the grass growing over an old post hole that may have become accidentally filled up. Plants will continue to tiller in such a situation long after the average surface of the meadow has ceased to replace itself.

We should also be sure that the right amendments are added to the soil. We should know that the leading constituents of our crops, particularly those of an inorganic kind, are present in sufficient quantities, and if they are not, they should be added before putting down a crop, intended to occupy the soil for many years. [Working Farmer.

Accidents at Sea.—The Boston *Journal* contains a long article on Ocean Steam Navigation, from Mr. R. B. Forbes, an experienced seaman. He treats of the loss of the Arctic, and the method of providing against the dangers of the sea. Among other recommendations is the following:

A certain number of picked men should be kept in the steamship, at whatever cost, and they should be sufficient in number to steer the ship, to keep the lookout, and to have charge, under the mates, of the boats, pump—gear, and life-saving apparatus. Each boat should have a regular crew, each man to know his place in the boat, each boat should have a set of oars, and some spare oars, and be in all respects a *life-boat*, and she should be provided with a mast and sail, compass and lantern, water-breaker, and hand-port-fire, and, in some convenient and well-known locality, a supply of stores should be placed, marked, and kept ready for each boat. It is not necessary to provide roast turkey, and plum pudding, nor chronometer and theodolites, but a small supply of imperishable provisions in cannisters, ready for emergencies.

"I have heard," says Mr. Henry, "of a married couple, who, though they were both of a hasty temper, yet lived comfortably together by simply observing a rule on which they had mutually agreed, 'Never to be both angry together.'" And he adds, that an ingenious and pious father was in the habit of giving this advice to his children, when they married:

"Doth one speak *fire*? t'other with *water* come:
Is one provoked? be t'other soft and dumb."

Rest satisfied with doing well, and let others talk of you as they please. They can do you no injury, although they may think they have found a flaw in your proceedings, and be determined to rise on your downfall, or profit by your injury.

Call on a business man at business times only, and on business only; transact your business, and go about your business, in order to give him time to finish his business.

The longest railway in the world is the Illinois Central, which is seven hundred and thirty miles in length, and is rapidly approaching completion.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer; Counterpoise, Stop, etc. For Steamboats, Steam ships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

NEVER could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La, April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.
C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.

Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder.

PUBLISHED WEEKLY

By the Seventh-day Baptist Publishing Society

AT

NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to
Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

RESTRICTED COMMUNION.

Correspondence.

To Rev. A. B. Burdick:

DEAR SIR,—Believing that the publication of the sermon preached by you on the 7th inst., in the Pawcatuck Seventh-day Baptist Church, on the subject of Restricted Communion, will more extensively subserve the cause of truth, we respectfully request you to forward a copy of the same for publication in the *Sabbath Recorder*, and thereby greatly oblige

Your brethren in Christ,

J. P. STILLMAN,	N. H. LANGWORTHY,
WM. MAXSON,	E. G. CHAMPLIN,
T. V. STILLMAN,	J. MAXSON,
WELCOME STILLMAN.	CHRIS. C. STILLMAN.

WESTERLY, R. I., Oct. 15, 1854.

To J. P. Stillman, N. H. Langworthy, Wm. Maxson, E. G. Champlin, and others:

DEAR BRETHREN,—Your kind note is before me, in which you request that I will forward a copy of the sermon preached by me on the 7th inst., on Restricted Communion, for publication in the *Sabbath Recorder*. Ever feeling it a pleasure to yield as far as possible to the wishes of those whom I so sincerely love and whose judgment I have learned to respect, I have determined to waive whatever personal preference I may have on this subject, and yield to the request.

Hoping that its publication may forward the object for which it was originally prepared, with sincere gratitude for this and other marks of your appreciation of my humble efforts,

I remain, your servant in Christ,

A. B. BURDICK.

WESTERLY, R. I., Oct. 15, 1854.

A Sermon on Restricted Communion,

Preached in the Pawcatuck Seventh-day Baptist Church, Oct. 7, 1854, by A. B. Burdick.

Text—2 Thess. 3: 14, 15—And if any man obey not our word by this epistle, note that man, and have no company with him, that he may be ashamed; yet count him not as an enemy, but admonish him as a brother.

Agreeable to the solicitation of numerous individuals, that I should again preach on the subject of Restricted Communion, and in accordance with a notice read from this desk last Sabbath, and especially in agreement with my own feelings and sense of duty to you and the cause of truth, I propose to enter upon the consideration of this subject. Not, however, without feeling my entire incompetency to do justice to a question of so much importance. The discussions, through the columns of our denominational organ, of "free" and "restricted," or "open" and "close" communion, for a few months past, I have watched with increasing interest. Not only have I been pleased with the amount and variety of talent enlisted in the controversy, and the evident candor with which the writers have treated their subject and each other, but have been deeply anxious that this question, so important in itself, and so vital to us as a body, might be fully investigated, and justly and scripturally disposed of; for, in my estimation, in our final disposition of this question, we dispose of ourselves as a denomination. For nothing can be more evident, to any one acquainted with the nature of this question, and with our past history, than that the principle of restricted communion, as practiced by us, has been, and still is, essential to our denominational existence. Nor is it less evident, that our denominational history closes with the abandonment of this practice. It may be, indeed, a question with some, whether our existence as a separate and distinct body, or sect, will essentially subserve the cause of truth, and whether it might not be as well, all things considered, that we should merge into other bodies of Christians, or stand aloof from all church organizations, and practice a free communion with all, or commune with none but ourselves alone, as may to us seem most fit. The solution to this question may perhaps be more easily found, after we shall have considered and compared the merits of restricted and open communion.

I am aware that the views and practice of this and other bodies of Christians, whose practice corresponds with ours, on the question under consideration, have been regarded and spoken of as narrow, bigoted, and uncharitable, and that any effort to vindicate our position, and explain the nature of the question as viewed by us, will be regarded by some as an additional evidence that we are in possession of the unenviable qualities of mind above named. Therefore it is our earnest desire, that in our examination of this subject, we may be so assisted by the author, spirit, and word of truth, that whatever *is* truth in this question may be brought to light, and that our practice, if wrong, (as some think,) may be brought by enlightenment to a speedy abandonment. But if it shall be found that our views and practice on the subject of communion are in accordance with the word of God, then may the "churches have rest" from that unsettled condition of sentiment, in the minds of both ministers and membership, on this question, which is doing so much to paralyze our efforts in every direction, and which threatens at no distant day to founder our little bark on the fearful rocks of disunion.

In setting forth our views on this subject, we propose to notice the three following propositions, after which we will consider some of the positions assumed in opposition to limited, and in favor of open communion.

I. It is the duty of the Christian Church to withdraw from and disfellowship errorists in doctrine, and disorderly walkers of their number, as well as discountenance sinners who are without.

II. The mode of admonition generally adopted by the Christian Church is fully authorized by the Scriptures.

III. That the view which is generally taken of limited communion renders its practice indispensable to consistency and uprightness, in all instances where Christian admonition is called for.

Let us proceed at once to the consideration of our first proposition, viz: It is the duty of the Christian Church to withdraw from and disfellowship errorists in doctrine, and disorderly walkers of their number, as well as discountenance sinners who are without.

This proposition is so evidently in keeping with the general scriptural teaching on the subject, and so generally assented to by all Bible students, that very little more can be necessary than to refer to a few of the many passages which plainly sustain it.

2 Thess. 3: 4 and 6—"And we have confidence in the Lord touching you, that ye both do, and will do, the things which we command you. Now we command you, brethren, in the name of our Lord Jesus Christ, that ye withdraw yourselves from every brother that walketh disorderly, and not after the tradition which he received of us."

Eph. 5: 11—"And have no fellowship with the unfruitful works of darkness, but rather reprove them."

Rev. 2: 12—16—"And to the Angel of the Church in Pergamos, write, These things saith he which hath the sharp sword with two edges: I know thy works, and where thou dwellest, *even* where Satan's seat is, and thou holdest fast my Name, and hast not denied my faith, even in those days wherein Antipas *was* my faithful martyr, who was slain among you, where Satan dwelleth. But I have a few things against thee, because thou hast there them that hold the doctrine of Balaam, who taught Balak to cast a stubling block before the children of Israel, to eat things sacrificed unto idols, and to commit fornication. So hast thou also them that hold the doctrine of the Nicolaitanes, which thing I hate. Repent, or else I will come unto thee quickly, and will fight against them with the sword of my mouth."

In our first quotation, we find a command from the apostle to the brethren of the church of Thessalonica, on authority and in the name of our Lord Jesus Christ, that they withdraw themselves "from every brother that walketh disorderly," and who does not conform his life to the doctrine and principles of the gospel of Christ, as received from the teaching of inspiration. In the second, the apostle gives the church at Ephesus direction to disfellowship all who work the "unfruitful works of darkness," and to maintain such a relation to them as will minister reproof for their ways. These texts alone are abundant proof of our proposition. But look for a moment at the decided confirmation of this proposition contained in the third and last selection under this head. Let us ask, what is the wrong of which the Spirit here complains? With what wrong does the Holy Ghost charge that otherwise faithful and praiseworthy band of Christians? Hear the complaint which he prefers against them, attended with a most solemn exhortation, and fearful threatening, if they shall fail to purify themselves of the evil. "Thou hast there," in the church, and upheld by its fellowship, "them that hold the *doctrine* of Balaam." "So hast thou also them that hold the *doctrine* of the Nicolaitanes, which thing I hate." Here is the cause of the solemn threatening. This holding and fellowshiping in the church those who *hold* and *teach* erroneous doctrine, is the crime of which the church in Pergamos are required to "repent;" otherwise the Spirit threatens to come unto them quickly, and fight against them with the sword of his mouth. A stronger indication of the divine disapprobation, or a more fearful threatening from the mouth of the Lord, can hardly be conceived. How can any Christian man, in view of these texts, and great numbers of others of the same import, stand up and say, that there is no Scripture warrant for rejecting from the fellowship of the church those of *corrupt faith* and erroneous practice? Such indeed must be either unable to understand a plain scripture injunction, or are disposed, for the sake of gaining a point in argument, or to justify some assaulted point in their creed, to pass by such positive requisitions, by attempting perhaps to destroy by false interpretation their plain and obvious meaning.

Having seen that the Bible makes it the imperative duty of the church to withdraw from, and disfellowship, errorists in doctrine, and disorderly walkers of their number, let us pass to consider—

II. That the mode of admonition generally adopted by the church is fully authorized by the Scriptures.

In proof of this proposition, we will introduce that very important and deeply instructive passage which is recorded in 1 Cor. 5: 9—13: "I wrote unto you in an epistle, not to company with fornicators. Yet not altogether with the fornicators of this world, or with the covetous, or extortioners, or with idolaters; for then must ye needs go out of the world. But now I have written unto you *not to keep company*, if any man that is called a *brother* be a fornicator, or covetous, or an idolater, or a railer, or a drunkard, or an extortioner; with such an one, no, *not to eat*. For what have I to do to judge them also that are without? Do not ye judge them that are within? But them that are without, God judgeth. Therefore *put away from among yourselves* that wicked person."

In this passage, Paul gives direction to the church at Corinth, not only to stand aloof from the society or companionship of those of "this world," who are fornicators, covetous, extortioners, and idolaters, but, if any man that is called a "*brother*" shall be found pacticing these or similar things, the church is to show her dissent to this evil, by taking early measures to put away from among themselves that sinning one, and they are directed to stand apart from him, and keep no company with him, "*no, not to eat.*" If it is suggested, that the words, "no, not to eat," may not mean the eating of the Lord's Supper, we reply, that they must be supposed to refer to one of three things; first, either eating an ordinary meal; or, secondly, partaking of food together as invited guest, or otherwise, on some extraordinary occasions; or, thirdly, eating the holy sacrament of the Lord's Supper. If, as some claim, it refers to the first, then of necessity it must include the other two. For if we may not afford him the very slight semblance of companionship implied in partaking together a common meal; if we may not associate with him in those things which indicate the least degree of fraternity; they cannot of course join him in those things which more plainly express the friendship of those associated. If it is claimed, that it refers to the second, viz., eating together as invited guests, &c., then it must include the third, inasmuch as eating the Lord's Supper implies a higher condition of agreement than is indicated in partaking together of a friendly meal. If, therefore, the words "no, not to eat," do not refer directly and specifically to the eating of the Lord's Supper, with these "wicked" professors, who are "within" the church, and which it is the duty of the church to "judge" and "put away from among" them, it does include it by unquestionable inference. But that it does *not* refer directly to the eating of bread in communion, no person has the means of showing.

We will now pass to the consideration of our last proposition, which is—

III That the view which is generally taken of limited communion and free communion renders the practice of the former indispensable to consistency and uprightness in all instances where Christian admonition is called for.

The general view entertained on the subject of fellowship and disfellowship, agreement and disagreement, as indicated by the external act of partaking of the Supper jointly, is substantially this—that Christians consent to and fellowship the faith and practice of those with whom they usually, or from choice, partake of the Lord's Supper. This view is almost universal among Christians as *the practical* idea, whatever may be the language of their articles of faith, or of their oral professions.

In confirmation of this statement, we will invite attention, *first*, to the practice of individual churches of nearly all denominations in the discipline of members. What is the general mode in Christian churches of "suspending church fellowship?" Is it refusing the subject of discipline a place in the house of worship, or the privilege of listening with the church and others to the preaching of the gospel? Is it withdrawing from him the opportunity of bowing and worshiping with them in their circles of prayer? Is it denying him the right or welcome of lifting his voice with theirs in hymning the praises of God? Certainly not. The suspended individual, unless his offenses are of that grossly immoral nature which in their judgments unfit him for good society in the general, is generally desired and often invited in connection with the "suspending act," to continue to mingle with them in these services and privileges. By what, we ask again, is the suspension of church fellowship indicated? We answer, by refusing the suspended participation in the Lord's Supper, and a voice in the business transactions of the body, *the only two things* which distinctly indicate church fellowship. When, therefore, complaint comes up from without a church, that one of its members is guilty of any unchristian act, or that such member is unsound in faith, the church understands that she relieves herself of all responsibility, so far as giving countenance to his faith or acts is concerned, by replying to the report, "the individual is suspended from the communion of the church." Up to that time, but not after, is the church held responsible for the conduct of those whose names rest upon her records.

This view is indicated, *secondly*, by the practice of denominations of Christians in reference to other churches or religious bodies, whom they consider chargeable with important errors in faith or practice, or both, requiring admonition. By refusing to celebrate the Lord's Supper with pedobaptist denominations, the Associate or Calvanistic Baptist denomination intend and do therein administer a perpetual and well-understood admonition to these denominations for their substitution of sprinkling for baptism. By holding their communion separate from those denominations which keep the first day of the week for the Sabbath, the Seventh-day Baptist denomination holds under admonition these bodies for violating God's holy day, an admonition which is keenly felt, as is shown by the frequent and bitter complaints which it calls forth from those for whom it is intended. These limited communion denominations employ the same sign by which to admonish churches and denominations, that individual churches do to admonish the erring or sinning of their own number—a mode, as has been shown, under the second proposition, fully justified and enjoined by the scriptures. Hence it is seen, that individual churches and denominations practice upon the practical idea, that we consent to and fellowship the faith and practice of those with whom we usually, and from choice, partake of the Lord's Supper.

Lest it should be said, that this is a sentiment of restricted communionists only, and that no others feel the force of these admonitions, we proceed to show, *thirdly*, the complaint, so continually urged by open communionists, "that in the practice of restricted communion, we *virtually* charge others with being in default, either in faith or walk, or both," shows conclusively, that there is really no diversity of sentiment in respect to the real *practical* language of this act. That we do virtually charge those who in our opinion violate the Sabbatic law, or who have not submitted to gospel baptism, with being in default, by our practice of the communion, is very naturally implied on the part of others, and most readily agreed to by us. If such is the language of restricted communion, as understood both by those who practice and those who repudiate it, we hardly need ask, what is the Christian's duty in cases where Christian admonition is demanded? It is a highly important sentiment of the gospel, and one very frequently and strongly urged by the apostle Paul, that every man should exercise especial care, that the language of the distinct individual acts of his life, as well as the sum and aggregate, shall be according to *truth* and *righteousness*. Let this principle be applied in the present case, and even in the absence of any scripture teaching in relation to who we may not commune with, restricted communion, for the many reasons before stated, must be the result. But more on this point hereafter.

[Concluded next week.

Conscience is a clock, which, in one man, strikes aloud and gives warning; in another the hands point silently to the figure, but strikes not; meantime, hours pass away, and death hastens, and after death comes judgment!

THE LORD'S PRAYER ILLUSTRATED.

Our Father,
By right of creation,
By bountiful provision,
By gracious adoption;

Who art in Heaven,
The throne of thy glory,
The portion of thy children,
The temple of thy angels;

Hallowed be thy name,
By the thoughts of our hearts,
By the words of our lips,
By the works of our hands;

Thy Kingdom come,
Of providence, to defend us;
Of grace, to refine us;
Of glory to crown us;

Thy will be done on earth as it is in Heaven,
Towards us, without resistance;
By us, without compulsion;
Universally, without exception;
Eternally, without declension;

Give us this day our daily bread,
Of necessity, for our bodies;
Of eternal life, for our souls;

And forgive us our trespasses,
Against the commands of thy Law,
Against the grace of thy Gospel;

As we forgive them that trespass against us,
By defaming our characters;
By embezzling our property;
By abusing our persons;

And lead us not into temptation, but deliver us from evil,
Of overwhelming afflictions;
Of warldly enticements;
Of Satan's devices;
Of error's seductions;
Of sinful affections;

For thine is the kingdom, and the power, and the glory, forever.
Thy kingdom governs all.
Thy power subdues all.
Thy glory is above all.

Amen.
As it is in thy purposes,
So it is with thy promises;
So be it in our prayers;
So it shall be to thy praise.

BUTTERWORTH.

For the Sabbath Recorder.

"CONFLICT OF AGES"—NO. 2.

I send some more extracts from the above work, believing that many of your readers will be profited thereby. Under the head of "Statement of Moral Principles," the author marches boldly up and speaks of what justice demands in our existence:—

"Since the creatures of God do not exist by their own will, and since they exist for eternity, and since nothing more vitally affects their prospects for eternity than the constitutional powers and propensities with which they begin their existence, the dictates of honor and right demand that God shall confer on them such original constitutions as shall in their natural and proper tendencies favorably affect their prospects for eternity, and place a reasonable power of right conduct and of securing eternal life in the possession of all. If his (man's) original constitution is such that it materially tends towards evil with great power, and thus creates a moral certainty of ruin, then existence is to him no blessing, but a curse; nor has the creator dealt honorably or benevolently by him. Not only do the demands of honor and right forbid the Creator thus to injure his creature in his original constitution, but they equally forbid him to place him in circumstances needlessly unfavorable to right conduct, and a proper development of his powers."

Such is the view which Mr. Beecher takes of what justice demands as to the constitution and circumstances of a probationary, intelligent being; and he quotes largely from standard orthodoxy to back himself up.

Dr. Watts, in considering what is due from the Creator to a new-created being, says:—

"That God ought to confer on him a perfection of natural powers, both of body and spirit—that he should have no bias to sin, but a bias to holiness, that is, to the love of God and of man. If the new-made creature had not a propensity to love and obey God, but was in a state of mere indifference to good or evil, then his being put into such an union with flesh and blood, among a thousand temptations, would have been an overbalance on the side of vice."

Wesley—"How could a wise and good God place his creature in such a state as that the scale of evil should preponderate?"

The Princeton Divine—"A probation, to be *fair*, must afford as favorable a prospect of a happy as of an unhappy conclusion. What greater evil, for moral and immortal beings, can there be, than to be born contaminated in their moral nature, or under a divine constitution which secures the universality and certainty of sin, and that, too, with undeviating and remorseless effect. It is an outrage on common sense, to affirm, that it is no evil for men to be placed on their probation, under such circumstances that not one of ten thousand and millions ever escaped sin and eternal death."

The above is only a specimen of the numerous references by which Mr. Beecher supports his idea of what justice requires in the case of man as an intelligent and probationary being. Now, is it any wonder, that a conflict should be experienced by the human mind, when it contrasts the above views of justice with those creeds which maintain the damnation of non-elect and unbaptized infants, the utter perdition of all mankind except the few who have enjoyed the light of a verbal revelation, and that idea which necessitates sin in every human being, and represents God as selecting a portion of mankind for salvation, and reprobating the rest; and all this merely for his own glory, irrespective of any foreseen good or evil in the one or the other.

Unless, then, we stand ready to ignore the justice of God, or charge him with partiality, or entire neglect, in not giving to man, universally, at least some rule of moral conduct, had we not better renounce that kind of so-called orthodoxy, which brings our universal consciousness of right and justice into direct collision and conflict with it. For we may rest assured, that any system of religious belief which nullifies justice and right, or represents our heavenly Father as withholding all absolutely necessary light, or a fair probation, from any of his creatures, must be wrong and erroneous. Justice and right demand that probationers for eternity should be "placed under a system of influences most favorably arranged for their highest good, and where all needless trials and temptations to sin and ruin would be avoided. It must also appear, that God did not wrong men in their situation and circumstances, but so placed them, that all things were, on the whole, as favorably arranged for all as possible." ("Conflict.")

The above being Mr. Beecher's view of what justice demands for all intelligent beings, as probationers for endless happiness or endless misery, what must have been his conflict in order to reconcile it with another theory, held as absolutely true, viz: that of total depravity, total moral inability, and that all mankind sinned in Adam, and were thus made liable to the pains of hell forever, not excepting infants, born and unborn? Such was the conflict in the mind of our author, that for some twenty years he was theologically crucified, in order that he might attain a better theological resurrection; and at last he thinks he has cut the "knot," and solved the theological problem, by reviving the ancient doctrine of pre-existence. Thus, instead of sinning in Adam, or falling in him, in his first transgression, we all sinned in eternity, and fell in eternity, each one for himself, and now as lost spirits are eking out our salvation in mortality.

S. S. GRISWOLD.

SCRIPTURE ILLUSTRATION.

In the sermon on the Mount, says the *Eclectic Review*, our Lord says, "Whosoever shall compel thee to go one mile, go with him twain." We can all of us easily understand the other part of this command, that when struck on one cheek, we should in humility offer the other; because, unfortunately, we know what striking is. But many must have wondered what can have given rise to the command of going a second mile with the violent man who has already compelled you to go one mile. Nobody now, in this country, is ever injured by such treatment. But we learn from coins and inscriptions, that the couriers in the service of the Roman government had the privilege of traveling through the provinces free of expense, and of calling upon the villagers to forward their carriages and baggage to the next town. Under a despotic government, this became a cruel grievance. Every Roman of high rank claimed the same privilege; the horses were unyoked from the plow to be harnessed to the rich man's carriage. It was the most galling injustice which the provinces suffered. We have an inscription on the frontier town of Egypt and Nubia, mentioning its petition for a redress of this grievance; and a coin of Nerva's reign records its abolition in Italy. Our Lord could give no stronger exhortation to patient humility than by advising his Syrian hearers, instead of resenting the demands for one stage's "vehiculation," to go willingly a second time.

CHOICE OF A PASTOR.

In reading the farewell discourse of Rev. W. I. Budington, to the First Congregational Church, Charlestown, Mass., delivered at the close of a most useful and honored ministry that domestic affliction has suddenly terminated, we were struck with the following sensible advice upon the choice of a pastor:—

"I fear that a false taste has been growing in our churches as respects ministerial qualifications. So eager and absorbing has been the demand for popular talents in a minister, that questions respecting voice, and gesture, and animation, and rhetoric, have been not only proposed first of all, but most of all insisted upon. I have no disposition to depreciate these gifts; I would that I and all my brethren had them. But in comparison with the well-trained virtues of the Christian character and the Christian scholar, they fade away into nothingness; nay, to earnest souls, looking up for the word of life, they sicken and repel, as stones in place of bread. The two indispensable qualifications of a minister are, 1st, a Christian heart, that he be no hireling, that he seek not yours, but you; and, 2d, that he have good sense, and the learning requisite to instruct you and your children in the oracles of wisdom. I put these two qualifications together, because they should be regarded as equally necessary. Not every good man should be your minister. Nor every wise man. You expect, and rightfully, to be instructed by your pastor, and it is the appointment of God that you should not only love him for his goodness, but respect him for his worth. You do not need, you ought not to expect, a man of shining gifts. But you should be thankful and satisfied if you obtain a minister, who, upon trial, commends himself to you as a Christian man, loving you and the work of Christ, and a man so endowed by nature and study as to answer to the Apostle's description, 'apt to teach'

"If, in addition to these, the great prerequisites, your minister be possessed of the minor qualifications, be thankful, and value him the more; but if otherwise, care not for it, remembering that you have the substantial blessing, and having this you can well lack the merely ornamental.

"If now you agree with me in these views, you will show it by doing two things, which is all in this regard I ask you to do.

"First you will all be united in seeking a minister having the two-fold qualification I have described, and none of you will be satisfied with any man, however fascinating in his address, without this. And, secondly, when the majority are satisfied with such a man, you who find yourselves in a minority will not make your minister's deficiency in any of the lesser virtues a reason for withholding your concurrence from your brethren, or your confidence from him.

"You will not understand me as teaching that a man ought to allow a majority or any number of men to choose a pastor for him who does not possess the radical qualification of a minister of Christ. But I say, if this qualification be possessed, it is the duty of a minority cheerfully to acquiesce. It is a duty imposed not less by the spirit of democracy than by the laws of Christ. And they who thus yield their own preferences to the common will, may, in the end, find that they have sought their own, not less than others' good."

BETHLEHEM.

Bethlehem, a village, formerly a town of considerable size, is situated about six miles southeast of Jerusalem, in Palestine. It is built on a hill covered with olives and grapevines. It contains about fifteen hundred inhabitants, many of whom employ themselves in making wooden rosemaries and crucifixes, ornamented with mother-of-pearl, for pilgrims who visit the villlage. The greatest ornament of the place is the church, or convent, erected by the empress Helena over the place where our Saviour is said to have been born. "It is," says Russell, "a remarkable building. Without, a perfect fortress, with heavy buttresses and small grated windows. On entering, we immediately come to a magnificent church, with a double row of ten Corinthian pillars of marble on each side, forty pillars in all." There are two churches, one above and one under ground. The last is elegantly fitted up. A chapel is connected with it, the whole being lighted by thirty-two lamps sent by different princes. An inscription meets the eye, denoting that "here Jesus Christ was born of the Virgin Mary."

Ages have passed away, since here
Were heard those strains of heaven
Rung out by angel voices, when
Our Christ to man was given.

When to the trembling shepherds came
That sacred gospel call—
"Fear not! Behold, glad tidings now
I bring to you—to all!"

Salvation's word! Hark! Through the skies
That music swells again:
Its chorus shout is heard—"Joy, peace
On earth; good will to men!"

Release from ignorance and sin!
From every human fear!
The reign of grace and holiness,
God's great redemption-year!

Back to the heavens that seraph host
Then took their shining way;
And since that hour their triumph-song
Has lived; it lives to day!

A Christ was born; he labored, died,
And rose from death, that we
Might share with him one joy, one life,
One immortality!

Cities of earthly fame may rear
Their stately towers and fanes;
And monuments of glory rise
O'er thousand battle-plains.

Amid them all, glad Bethlehem!
Thy sight this soul shall move
To Christian labor, Christian praise,
For God's redeeming love!

I HOPE TO BE A CHRISTIAN.

You do! Why, then, do you not seek to be a Christian? Ask, and ye shall receive; seek, and ye shall find; knock, and it shall be opened to you." "Ye shall seek me, and find me, when ye search for me with all your heart."

Are you seeking for God with all your heart? No man ever yet escaped from the thraldom of sin and Satan, who did not earnestly struggle to be free; no man ever entered the strait gate who did not agonize to accomplish that glorious end. Carelessness and inattention afford no foundation for a hope that you are to become a child of God.

You hope to be a Christian! Why, then, do you not give up your sins, renounce the world as your portion, and cheerfully surrender yourself to Him who is the way, the truth, and the life? He is ready and willing to receive you. He gave his life a ransom for sinners; he freely gives his Spirit to all who earnestly ask him; he has filled his revealed word with invitations and encouragements to those who desire his grace; he has long been knocking at the door of your heart for admission. How, then, can you hope ever to be a Christian?

You hope to be a Christian! When? Not now. You are too busy, or have something in view which must first be accomplished, or are so indisposed to give yourself to the work, that this is not felt to be the "convenient season." After a while, when you have accumulated a fortune, or passed the period when you can partake in the world's pleasures, or when there is a revival of religion, or at furthest on a dying bed, you hope to a Christian. But God's commands and promises are for the present. He gives no encouragement to wait for a future season. You have no assurance that there shall be any season beyond the present. Before the anticipated time comes, you may be in eternity.

You hope to be a Christian! So multitudes of others like yourself, who were living in sin, have hoped; but where are they now? Long ago have they been cut down as cumberers of the ground. Their day of grace and day of life have closed. They lived without Christ, and they died without him; they trifled away their precious time on earth, in the delusive hope that some day or other they would be Christians. That day never came to them, and never will come. "The harvest is past, the summer is ended," and their souls are not saved.

[Presbyterian.

To find one who hath passed through life without sorrow, you must find one incapable of love or hatred, of hope or fear—one that hath no memory of the past, and no thought of the future—one that hath no sympathy with humanity, and no feeling in common with the rest of the species.

SCATTERED MEMBERS.

Some weeks ago, we called attention to a practice which we desired to see corrected, namely, that of church members removing their residence from the place where their membership is recorded, but not taking their certificates of standing with them, nor giving any information to their covenant brethren as to what has become of them. In another part of our paper, this week, we give a communication from the 1st Seventh-day Baptist Church of Genesee, publishing the names of certain of its former members, who, having located elsewhere, have failed to notify the church whether they have become attached to other churches, or not. And now, on behalf of that church, we take the liberty of saying, that we hope every one of the persons so published will attend to the matter forthwith, and enable the church to correct its statistics, so that its returns, henceforward, may be perfectly reliable. Some of them, having removed a very short distance, may, for this reason, think it of no particular importance to send any information about themselves. Perhaps they take for granted, that their present standing is well enough known—that the church can hardly be ignorant of it. They have become connected with other churches, and take for granted that the Genesee Church knows all about it, though no formal, or official, information of the fact has yet been given. But in all such cases, it should be remembered, the church needs information of a direct, explicit, and reliable kind.

Others have removed to a greater distance; and surely, they ought not to suppose that the church can tell where they are, what they are about, whether they ever go to meeting, whether they have joined other societies, or still continue in fellowship with it, while not the first syllable has ever passed between them on the subject. If they have united elsewhere, why not let the church know it? If they have not, but still retain a love for the cause, and a desire to be reckoned among God's people, would it be too much to write, once in a while, and express themselves so? A letter costs but three cents, and we can see no good reason why there should be such everlasting uncertainty on a point of so much importance.

Possibly some, included in the list, may have left the Sabbath altogether. These remarks may never meet their eyes; and if they should, we do not know that it is proper, in this connection, to expostulate with them. But does abandonment of the Sabbath destroy all obligation of courtesy to the church which has been left? To us it appears but a decent civility, when one proposes to withdraw from a people with whom he has been in fellowship, to give respectful notice of his intention. No harm, certainly, can come from such a course, and it may be productive of much good to both parties. If the list includes any such cases, we trust that this hint will, (should it ever come under their notice,) not be lost upon them.

In our former article on this subject, we suggested, that it should be devolved upon the clerk of every church, as a part of his official duty, to notify the sister church, from which a member has been received by letter, immediately, as soon as the receiving act has taken effect. We still believe, that this is the proper course. But the majority of our churches have no such rule, and the received members should not wait for any such arrangement.

It will, of course, be understood, that our remarks, though made with reference to the Genesee Church, primarily, are intended for all others in similar circumstances. T. B. B.

AUTUMN.

"The melancholy days have come,
The saddest of the year,
Of wailing winds and naked woods,
And meadows brown and sere."

Autumn is a season well suited to develop the contemplative and spiritual of our natures. The fever and heat of summer have subsided. Its bustle is over. In their stead quietness steals gently on. A sedate spirit creeps over the world. Autumn seems to meditate. To man, it is a season of memories. Thoughts of the past come rushing over his mind.

Life, which has gushed out full and free, begins to withdraw from leaf and flower and plant and insect, to the great heart of nature. For weeks there has been heard, day and night, a soft, subdued hum of insects in the air. It is the happy heart of the insect world pulsating itself away in music. Soon there comes a night of frost, and slays its myriads. Next day you walk forth among the slain. You see no life bounding along your pathway. All is still and silent, save, now and then, the melancholy voice of a lone cricket or grasshopper, lamenting the fate of his fellows.

The foliage of trees is the great attraction of an autumnal landscape. The topmost branches show a slight tinge. Death has touched them. Change spreads from leaf to leaf. Their colors become more and more varied. Yellow and red and purple, with spots of darker green, and scarlet and crimson, and orange and russet, are mingled with a richness and variety of coloring, which no painter can rival. The tree which has stood a thing of beauty and grace all summer, now adds gorgeousness to beauty. Soft sunny days, voiceless and breathless, pensively glide along. The spiritual thistle-blow floats lightly through the air. The yellow bird, with gentle undulations, like a joyous sea, sings along its airy pathway. The bright morning mists wrap their dim silvery wreaths about the brow of decaying nature.

Anon come hazy skies, with sighing winds, falling leaves, and departing birds. Brother leaves, that have grown together, receiving one common nourishment from the same parent stem, fall thick around. They together have sung and danced their lives away, and now go down to a common grave, clad in their burial garb of crimson and gold. Misty days come on. Grey fogs baptize the earth. Dull, dark clouds creep along the hills, and soon they are robed in snow.

Then soon comes that soft melancholy time —Indian Summer—with mild airs, softened light, and faint signs of returning life, like the crimson flush of the hectic cheek; but the transient vision of beauty soon passes, and gives place to winter. May we, after the labors of life are over, be like some calm, serene, mid-autumnal day, with pathway all fringed with gold, and quiet joys of a well-spent life lighting up the spirit, and the Christian's hope pointing to the glories of immortality. *

LETTERS FROM PALESTINE—NO. 6.

JAFFA, Oct. 8, 1854.

In my last, I stated that considerable sickness prevailed around us, which has since abated somewhat. There has been one new case of intermittent fever in our little colony, and our daughter has suffered severely from acute inflammation of the eyes. She can now bear a little light, and the prospect is, that she will soon recover. The weather during September was much cooler than we expected; the average of the thermometer was 67¾ at sunrise, 81¾ at noon, and 79 at sunset. A few weeks ago, we heard that the Russians had taken Erzeroom. Subsequently, it was reported that they had taken a village near Erzeroom, and were about advancing to attack the latter place, when the report of the advance of the allied armies upon Sebastopol induced them to return to protect their own interests at home. More recently we hear of the landing of some 70,000 English, French, and Turkish troops within seven leagues of Sebastopol, and that without opposition.

So far as I can learn, all Palestine is quiet. Provisions are plenty, and prices are moderate in consideration of the war and its influence on the market. From what I have seen, I should judge the Arabs an industrious people. The Jews, on the contrary, are, with few exceptions, addicted to idleness, and disposed to expect a bountiful supply from the industry and abundance of the Gentiles. By an honest, compassionate example, we believe that some, and perhaps many of them, will be induced to obtain a livelihood by the labor of their hands. The applicants for labor from among the Jews, and from others, to the several families of the colony, average one per week, and perhaps more. Two weeks ago, a converted Jew came to us, seeking employment. He was active, pious, and of affable manners. He staid with me five days. He left for Alexandria, where he hoped to complete his trade (that of a tailor,) and return to us in about six months. It grieved me exceedingly to part with him. I wished most heartily for a dozen able Sabbatarian farmers, that there might be no want of homes for the homeless and outcast. Let our brethren colonize the land, or some place in it, with a dozen or more able farmers and mechanics, and we shall then have begun a great and glorious work in earnest. How important it is for the brethren to take this subject into serious consideration. There are those who are able, and whom the churches would cheerfully recommend, who should lose no time in coming here, with their property and their families, (just as they would go to California, Oregon or Nebraska,) expecting to make a live of it. Others are expecting to colonize this land, and why should not we be among the first to get a foothold and plant the standard of the cross?

As to my labors, there is always enough to do. I have the same busy routine of studies, a little manual labor, calls, visits, &c. A few extracts from my journal will give the friends and brethren an idea how I spend my time.

Aug. 15. Festival day for Louis Napoleon. By invitation, accompanied the American Consul and suite to the French Consul's. Met there the Patriarch of the Romish Church for Jerusalem and the Holy Places, and for the Levant. He is very easy in his address, very affable and handsome. He speaks French and Italian with astonishing fluency. His long three-shaped hat was trimmed quite profusely with gold lace; he wore a heavy gold cross and watch chain; a small black cap covered his crown, which I suppose was shaven; also, large gold shoe buckles, and other things to correspond; and a rich silk robe. He wore a very heavy flowing beard; his bearing was truly majestic, and gave one an idea of a prince of this world, more than of a meek and humble follower of Jesus. He was attended by three, a priest and two friars; the latter, as is usual here, wore cords around the waist, and were very plainly dressed. There were present the British Consul, the Governor of the city, and many others. It was quite a novelty to hear a conversation from five or six gentlemen present, one in French, one in Italian, another in Arabic, another in Turkish, and yet another in Persian. After three quarters of an hour, in imitation of the rest, we bowed and left for our homes.

18th. Three months to-day since we landed in Palestine. Mailed four letters to brethren in the States. Studied Arabic an hour under our new teacher, a Protestant from Beirût. Brethren Dickson and Steinbeck called; also a converted Jew from Jerusalem. Had a discussion with my teacher on the Sabbath question. He read the first epistle of Corintians, 16 : 2, in Arabic, which he understands to say, "*On the first day of the week let each one of you remain in his own house, and keep that which is for his good.*" He read also the Arabic of Rev. 1 : 10, in which the text reads, "*I was in the Spirit on the first day of the week.*" The German Jewish convert said that the prophet Jeremiah or Isaiah had prophesied that Christ would change the Sabbath from the seventh to the first day of the week. I offered him a German Bible to point out the chapter and verse. He arose and said very politely, I am not prepared to argue the question. I told him he need only point to the place where any thing was recorded of a change of Sabbath. He insisted on being excused. The fact that the Arabic Bible, its translation and printing done in England, by the great, the good and the wise, has such mistakes in it, was a great stumbling block to our teacher. Bro. S. remarked, that his bro. F., (who is now a Sabbath keeper in this country,) once kept for a time the Sabbath in Germany. He applied to the minister of his church for information upon Rev. 1: 10. To his surprise, the minister called it the first day of the week. Bro. F. thought to himself, What a blockhead, with all your learning, not to know that John refers to the day of judgment.

Sept. 17*th*. Preached yesterday in the morning from Gal. 6: 9, and taught Bible Class in the afternoon. To-day worked three hours in my garden, 1½ miles distant, taught English an hour, and received in return instruction in the pronunciation of Italian and German. Preached at 5 P. M. in French, from Heb. 6 : 19. Five natives from the city were present. Repeated the substance of my discourse in English.

24*th*. In company with our American friends, went to Lydda, and thence to Ramlah. The country round about reminds me of the prairies of the West. Lydda and Ramlah, like Jaffa, are masses of rough stone and mortar and very dirty crooked streets or lanes, through which one has to crowd his way spite of his desire for something more agreeable. Parts of these towns look more like rough fortresses than the abodes of peaceful and industrious inhabitants. At Lydda we found Mr. J., an Armenian, one of my French congregation. He very politely furnished us a place of rest, caused mats to be brought for seats, and furnished us with plenty of prickly pears and grapes. He accompanied me to Ramlah, took us to the Armenian convert, and provided for dessert a plenty of delicious watermelons. Among other places visited, was a large tower, and a large subterranean room, probably 100 or 125 feet long, the roof being supported by massive pillars. These, with other ruins, were inclosed by a wall, likewise in ruins. Some called the place Samuel's House; others, the Tower of David. What the true name is, I cannot say. All the buildings and ruins we saw have evidently been built since the tenth century.

29*th*. Rev. Mr. Owen, of the Church of England, called in the morning, having just arrived by steamer. Expressed a desire to see our friends. Went to Jaffa; his boy hired a horse, and on my return I mounted my donkey and conducted him to Sister Minor's, then to Bro. Dickson's, and then to Bro. Saunders'. During this ride of three hours, I learned from him that a Haytien physician had arrived in the same steamer with him, intending, like himself, to make the tour of the Holy Land. Mr. Owen appeared to be much pleased with our little beginning, and the object of our mission. He had spent five years in South Africa; was acquainted with that noble pioneer of missions, Robert Moffat. He told me that he hired a dragoman in Malta, who from the day of his arrival in Palestine, he had paid two pounds per day, which included all his expenses. The time of his tour is limited to forty days.

On our return, I went to the Latin Convent, where, to our mutual surprise, I found an old acquaintance in the person of Dr. G. W. Smith, of Port-au-Prince. "Ah voici une veritable rencontre," said he, as he grasped my hand. We walked to my house and dined. Former times and scenes, and the welfare of friends, passed swiftly in review. He left Hayti in May; had visited England, France and Italy, and was now on a twenty days tour in this country. By request, I wrote for him a short account of our mission work. At 3 P. M., accompanied the Dr. to Jaffa, where he joined his companions in travel for Jerusalem. As the Sabbath was commencing, was called to Jaffa to see a sick man, Rabbi C. Thus ended a very busy day, and indeed a week's labor in which I have had no time for repose. How welcome on this occasion was the precious Sabbath of the Lord.

Oct 10*th*. In concluding this letter, I would add, that we continue our meetings on the Sabbath, in the morning for preaching and conference, and in the afternoon for Bible Class. We meet in the house occupied by Mrs. Minor, and Mr. Saunders. On first-days, I have meetings in my own hired house. The services are in French, with the addition of the substance in English, and occasionally a little Arabic. The average attendance is fifteen. As to garden work, we are now in the midst of the season for planting corn, potatoes, beans, and other garden vegetables. It is still the dry season. We hope for rain by the first of next month. May the prayers of the brethren be unceasing for the success of the mission. Your brother in Christ,

WM. M. JONES.

EDUCATION AT THE WEST.

The Society for the Promotion of Collegiate and Theological Education at the West, held its eleventh anniversary at Poughkeepsie, N. Y., on the 28th of October, when sermons were preached by Rev. A. D. Eddy of Newark, N. J., and Rev. J. H. Brayton of California. The Annual Report which was presented on the occasion stated that the importance and power of colleges, as an element in American society, became more and more obvious as they multiplied in numbers and advanced in age; that their increase had been on an average about two for each year of the present century; that one had been founded 216 years; two, not less than 150; two, more than 100, and twenty-two, not less than 50 years. The past year had been a decidedly prosperous one, although the Society had labored under many disadvantages, which operated to diminish receipts; but most of these were regarded as local and temporary. The following institutions had received aid from the Society during the year, namely, Marietta and Wittenberg Colleges, in Ohio; Wabash College, Indiana; Illinois and Knox Colleges, Illinois; Beloit College, Wisconsin; Iowa College, Iowa; German Evangelical College, Missouri; and the Collegiate Department of Tualatin Academy, Oregon. These institutions are all in a decidedly healthy condition, and steadily growing in public confidence and the means requisite to the prosecution of their work. A number of the Institutions aided had been blessed with revivals during the year, especially Marietta, Illinois, and Wittenberg Colleges; and between 40 and 50 young men are believed to have become the subjects of renewing grace.

"CENTRAL ASSOCIATION MATTERS."

To the Editors of the Sabbath Recorder:

Under the above caption, a communication appeared in the *Recorder*, Nov. 9th, over the signatures of W. B. Maxson, Eli S. Bailey, and J. Clark, for the ostensible purpose of explaining to the Adams and Hounsfield churches, and to the "council of reference and settlement" appointed by the Association, what the intention of the Association was, in the appointment of said Council; which I wish to notice briefly through the same medium.

Had they confined themselves to giving their views of the intention of the Association, instead of assuming to speak *for* the Association, and had not dragged in subjects entirely foreign to the purpose for which they pretend to speak, I would willingly have let it pass for what it might have been worth. But in their haste to reach other subjects, they seem to have lost sight of the object for which they started, and have gone into a review of the doings of the Associational Committee of 1851, and also of the communications of the Adams and Hounsfield churches to the Corresponding Secretary of the Association, and have even entered upon a review of the acts of the churches, which are deemed to be matters for investigation before the Council; thus affording another illustration of the liability of a hobby, when once mounted, to run away with its rider; and also eliciting a new principle in *hobology*, that a hobby runs away with as much apparent ease, when mounted three astride, as when rode single. Since M., B., and C., (I use the initials for the sake of brevity,) have appeared as the public exponents of the intentions of the Association, relative to the churches of Adams and Hounsfield, they should exhibit their credentials; and until they do so, there should be no importance attached to the communication, other than as being the opinions, and an index to the feelings and wishes, of its signers.

Whether the churches of Adams and Hounsfield do, or do not, comprehend the object had in view by those who were instrumental in bringing the subject to the notice of the Association, is not material; since it is with the Association that the churches have to do; and that these churches, or the Council, with the records of the Association before them, are not as well qualified to draw correct conclusions of its intentions as M., B., and C., may perhaps be mooted, inasmuch as, in the effort already made, they have failed to throw any additional light on that point.

Though they have failed in this, the communication has not been made entirely in vain; the object had in view by M., B. and C., in bringing the subject before the Association, is now on the record; there will be less room to misapprehend them now than heretofore; this is so much gained. And that object appears to be, to bring on a trial of the Adams and Hounsfield churches, with persons expelled from those churches—a trial, too, of the Hounsfield church the second time for the same alledged offense; because, forsooth, she was acquitted "to the evident dissatisfaction of many members of the Association."

In proof that this was not the object of the Association, we have the report recommending a Council, adopted by it, in which there is nothing said about investigating; and likewise the presumptive evidence, that if the Association intended a trial of the churches, it would have taken the course pointed out by its Constitution to bring it about; and we have also a declaration of the Chairman of the Association, made publicly before that body, in reference to that report, that there was no trial of the churches about it; and no one demurred to this construction. If it was wrong, why was it not corrected? Were M., B., and C., willing that a wrong construction should be received, in hope that the churches would accept the Council unconditionally, thinking to assume the right to say, after such acceptance, what the construction should be? Whether the members of the Independent Church "were principally, if not altogether, expelled from the Adams and Hounsfield churches, on account of their non-concurrence in certain acts and decisions of those churches," is a point which more properly belongs to the Council to determine than to M., B., and C. And for them to appear in the columns of the *Recorder* to plead and decide upon matters which must be at issue in any trial or investigation of this subject, upon their own assumption of facts, or at best upon *ex parte* evidence, savors strongly of a desire to forestall the Council, and to bias both the Council and the denomination. Wait a little, brethren; the subject may yet come up where you can appear, both as witnesses and advocates in behalf of those expelled persons, with much more propriety than in the columns of the *Sabbath Recorder*. Wait the good time coming.

Relative to the complaint against the Adams church carried to the Association, there is an omission in the account of it, which it may be proper to supply. The account is, "After the complaint was received by the Association, the complainants withdrew it," &c. The complaint, after it was received, was referred to the same committee to which the complaint against the Hounsfield church was referred; and it was not withdrawn until after the report on the Hounsfield case was received and adopted. Of course "dissatisfaction" with the report and its adoption could have nothing to do with the withdrawal of the complaint against the *Adams* church. O no, certainly not. It was all owing to *that witness*, who, living away down in Madison County, thought too little of having this difficulty settled, to go up some twenty-five miles and tell the Committee what he knew of matters complained of up here in Jefferson County. But the witness should not be censured hastily; his promptness in the matter since, ought surely to atone for his delinquency then.

"If they (the expelled persons) are willing to submit the whole matter of their grievance to disinterested brethren, giving assurance, as they do, that they will be guided by their counsel," &c. Where have they given this assurance? Had they given *that* assurance, the degree of confidence such assurance would be likely to inspire, may be inferred by considering how far they have been guided by the counsels of the Committee and Association of 1851, to which they appealed.

"It is a point that both the Adams and Hounsfield churches would do well to consider, that expulsion from a church is not proof of a want of fellowship with God." Very well, who said it was?

There is also another point, and it is quite as essential that it be considered, and in the present tendency to centralization of ecclesiastical authority, is in much more danger of being disregarded by those in high places, viz: that expulsion from a church is proof that the person expelled is considered by the church as being unqualified for membership, and that the church is the sole judge of the qualifications of its members, responsible *only* to the Great Head of the church for the manner in which she executes the trust, except so far as she has voluntarily become so. And now the practical question recurs, How far have the churches of Adams and Hounsfield become responsible to the churches of the Association, in virtue of the compact entered into with them? And it must be answered by a reference to that compact; and if these churches have become liable under this compact, it happily points out the course to be pursued, and the remedy to be applied. And there need be no doubt but these churches will readily and promptly meet any investigation sought in accordance with the Constitution of the Association.

If the answers of the Adams and Hounsfield churches, in reference to accepting the Council, are regarded by the Council as nullifying their appointment, we shall doubtless be informed of it in due time over their own signatures; and till then, or until they authorize M., B., and C., to speak for them, all opinions hazarded by them, like that at the closing up of their communication, must be regarded merely as evidence that M., B., and C., do not wish the Council to act at all unless they are to follow a course prescribed by them. A. M. WHITFORD.

ADAMS, Nov. 14, 1354.

PROHIBITION IN CONNECTICUT.

Governor Dutton, of Connecticut, has written a letter to Edward C. Delavan, in which he represents the Prohibitory Liquor Law as working wonders even in the land of steady habits. Here is the letter.

NEW HAVEN, Monday, Oct. 30, 1854.

DEAR SIR,—I take the earliest opportunity of replying to your inquiries regarding the practical operation of the prohibitory liquor law of Connecticut. I hazard nothing by asserting, that no candid enemy of the law will deny that it has proved more efficient than its most sanguine friends anticipated. It has completely swept the pernicious traffic, as a business, from the State. An open groggery cannot be found. I have not seen a person here in a state of intoxication since the first of August. In our cities and manufacturing villages, streets that were formerly constantly disturbed by drunken brawls, are now as quiet as any other.

The change is so palpable, that many who have been strongly opposed to such a law have been forced to acknowledge the efficacy of this. At the late State Agricultural Fair, it was estimated that on one day from 20,000 to 30,000 persons of every condition in life were assembled, and not a solitary drunkard was seen, and not the slightest disturbance was made—the effect was so manifest, that the law has been regarded with more favor since than it was before.

The statistics of our courts and prisons prove that criminal prosecutions are rapidly diminishing in number. Some jails are almost tenantless.

The law has been thoroughly executed with much less difficulty and opposition than was anticipated. In no instance has a seizure produced any general excitement. Resistance to the law would be unpopular; and it has been found in vain to set it at defiance. The longer the beneficial results of the law are seen and felt, the more firmly it becomes established. The ridiculous idea, so industriously circulated, that the sanctity of domestic life would be invaded, has been shown to be a mere bugbear. *The home of the peaceable citizen was never before so secure.* The officers of the law have no occasion to break into his dwelling, and he is now free from the intrusion of the lawless victims of intemperance.

Connecticut, by her own law, and by the laws of the adjoining States of Massachusetts and Rhode Island, is now effectually guarded against the invasion of one of the worst enemies of the human race on all sides *except the west.* The principal obstacle in the way of complete success consists in the importation of liquors from the City of New York into this State in casks and demijohns, professedly for private use.

May we not indulge the hope, that this evil may soon be remedied, and that, as the Empire State is the first in population, wealth, and influence, she will stand foremost in this great effort to repress immorality and crime, and to promote the happiness of the human race. Certain I am, if her citizens once try the experiment of a stringent prohibitory law, all the gold of California would not tempt them to abandon it.

With the highest respect,
Your obedient servant,
HENRY DUTTON.

RENTING PEWS TO PAY PASTORS.

A correspondent of the *Watchman and Reflector* comes out in favor of having our places of worship owned by churches, instead of pewholders, and then renting the pews annually for the support of the pastor and to meet the current expenses of the congregation. He thinks that among Baptist churches this course would make it much easier to raise the necessary funds, and would render the pastoral office more permanent. Several facts which he gives in support of this theory are striking, and seem to justify the following reasons which he enumerates:—

I. Because the renting process gives every person the privilege of taxing himself for just such a place in the house of God as he wants. He who is thus suited will not be likely to complain, when called upon for payment, any more than he would for any other purchase made at auction.

II. Because it gives a man the same right in religious, that he claims in temporal things, viz., of getting what he is willing to pay for. A poor man feels he has this right, if he goes money in hand to a store, or market. He would feel discouraged and injured if all the best articles were under the control of others.

III. Because it promotes enterprise, and rouses to benevolence in a good cause, and also gives an opportunity annually of changing locations, if any choose.

IV. Because it leaves church property permanently for the benefit the church. The opposite course, when members become disaffected or change their sentiments, has often involved a parish in great trouble.

V. It has an important influence in gathering an assembly, and causing them to be permanent. This course, we think, never fails to bring many to attend the ministrations of the Gospel, and help in its support, who otherwise would neglect them. Hundreds thus come from every quarter, to whom a collector would never think of going, and from whom he would get comparatively little if he did.

MORE "SACRED SUNDAY CONCERTS."—New York, it seems, is to be favored with another series of "Sacred Sunday Concerts." Advertisements in all of the daily papers announce that on Sunday evening, Nov. 19, at the Chinese Buildings, will commence "a series of grand vocal and instrumental sacred Sunday concerts," to be continued during the winter, "on a scale of grandeur heretofore unattempted in this city." The managers, it is stated, have been "engaged during the past two months in organizing a complete grand orchestra of forty performers, selected from the Philharmonic Society, Italian Opera, and M. Julien's celebrated New York Orchestra, assisted by the most distinguished vocalists and solo performers now in the city, who will appear from time to time in rapid succession. Price of admission 25 cents; reserved seats 50 cents." The foregoing announcement is made through the papers in a very business-like way, and attracts comparatively little comment—a circumstance which indicates that we are rapidly running into the habits of those countries in which the Sunday is actually and professedly only a holiday.

THE BAPTISTS OF NEW JERSEY.—At the New Jersey Baptist State Convention, held at Haddonfield, Camden County, on the 31st ult., it was reported that there are 106 Baptist Churches in the State, with a membership of over 13,700. The Missionaries of the Convention during the past year preached 1,615 sermons, made 2,298 pastoral visits, and distributed 35,000 pages of tracts. Three of the existing churches were constituted as early as 1690; and nineteen more were established during the last century. Within the past twenty-five years sixty-one of the present churches have been constituted, and 17,850 persons baptized. The Education Society has, during the past year, aided sixteen young men.

NEW YORK EVANGELIST.—This excellent religious journal has just passed into new hands. Rev. W. H. Bidwell, the editor and proprietor for the past twelve years, retires on account of continued ill health. He is succeeded by Rev. H. M. Field, of West Springfield, Mass., and Rev. William Bradford as joint proprietors and editors. Mr. Bradford has long been efficiently associated with the *Evangelist*, and brings to the new relation in which he appears much editorial experience and tact. Mr. Field is favorably known as a writer.

MONUMENT TO BISHOP WAINWRIGHT.—Several ladies of the Protestant Episcopal Church in New York have taken in hand to erect, as a monument to the late Bishop Wainwright, a church with seats perpetually free. In order to accomplish this, they invite subscriptions of not less than five dollars per year for three successive years. The location is to be on the west side of the city, in the vicinity of Fourth-st. and Eighth-avenue.

SCHOOL IN PLAINFIELD, N. J.—The Plainfield Collegiate Institute was opened on the 23d of October, under the Superintendence of O. Allen, A. B. The prospects are said to be very encouraging. A building adapted to the wants of a first-class school is soon to be erected.

RELIGIOUS INTELLIGENCE.

The Lord hath remembered his Zion in Brinfield, Ill., and his people are now rejoicing in a season of refreshing. An increase of religious interest had become manifest, and three or four adult persons had yielded to the claims of the Gospel, when the church resolved on a series of meetings that continued for three weeks under the ministrations of Rev. O. Parker; 90 or more are hopeful converts or reclaimed wanderers—24 of them heads of families—but all classes of persons have been reached, and the work has appeared genuine and thorough.

The committee selected to decide upon the merits of the tracts offered on the subject of "the responsibility of the Christian merchants of the United States, for the speedy conversion of the world to Christ," having carefully examined the various productions submitted to them, have awarded the prize of one hundred dollars to the Tract prepared by John A. Jameson, Esq., of Freeport, Stevenson county, Ill, as most in accordance with the advertised proposal, and, in their view, as best adapted to promote the objects of the donor.

Within twenty years, about one hundred churches, numbering about twelve thousand converts, have been planted along the coast of Africa; many schools also have been established, which are now in successful operation, and hundreds of natives have received and are now receiving a Christian education, and yet, previously to that time, the whole twenty-five millions of that section of Africa were in a state of deepest degradation.

The clerical petition against the Nebraska bill was so treated in Congress, that the people have resolved to send some of them to Congress, to meet their defamers. Mr. Meacham, of Vermont, just elected, is a Congregationalist, and Mr. Sabin, his colleague, is a Baptist preacher. Maine sends Mr. Knowlton, a Free-will Baptist, and Mr. Milliken, a Universalist preacher. Among the Pennsylvania delegates is Rev. John J. Pearce, of the M. E. Church.

The California correspondent of the New York *Recorder* says: "I have learned that a prominent lawyer of Sacramento, and who has filled the position of Judge of that county, was last week licensed to preach by the Baptist church in that city. He is universally esteemed, and will beyond doubt prove a most valuable accession to the Baptist ministry of California."

Among the passengers in the ship "Eureka," for Canton, which sailed on the 8th inst., was Yung-Wing, a native of China, who was a member of the Mouison School in Macao, and was brought to this country some eight years since, by Rev. Mr. Brown, the teacher of that seminary.

Mr. William Ewing, insurance broker, Glasgow, has contributed the munificent sum of £2000 toward the completion of a "Sailor's Home" there, beside undertaking to make up other £500 by his own exertions.

☞ The 1st Seventh-day Baptist Church of Genesee desires information of the present standing and church relation of the following persons. They were formerly members of our body, in good standing, but as they have removed to other parts, and may (some or all of them) have become connected with other churches, it is very much desired that they communicate with us, with as little delay as possible, informing us whether they have, or have not, been received elsewhere.

E. R. Crandall, Clerk.

Kansas.—The following, says the Worcester Spy, is taken from a letter dated Sept. 22, just received from one of the last of the Massachusetts emigrants to Kansas—a man whose statements, we are informed, are entitled to full credence:—

"The hotels and stables at Kansas are always full, and will be for some time. The roads are lined with teams from the border States. In about every fifth or eighth wagon you will see a sprinkling of negro slaves. Do not believe that the slaveholders have given up Kansas. A terrible struggle is before us at the very first election. They are determined to have a law recognizing slavery at the first meeting of the Legislature. If they do not get it then, they never will."

Hudson River Railroad.—By reference to the advertisement in another column, it will be seen that the winter arrangement on this road took effect on the 20th inst. There are now five through trains and seven local trains daily. Albany is by this road brought within four hours of New York, and communication is as frequent, even in winter, as can reasonably be asked.

Bank Failures.—There were several additional bank failures at the West last week, among which were the Mechanics' and Traders' Bank of Cincinnati, and the Merchants' and Mechanics' Bank of Chicago. Throughout the country, confidence in banking institutions seems to be wanting. Wisconsin money is now selling in New York at 10 per cent. discount, and Indiana money more than that.

Who is Governor?—This was the absorbing question throughout the State of New York all last week. The scale seemed to balance between Horatio Seymour and Myron H. Clarke, but finally turned in favor of the latter. At the time of writing this (Nov. 20th) it is generally admitted that Clarke is elected by a small majority, probably less than three hundred.

The Knickerbocker Bank has given notice that its notes will be redeemed in a few days.

European News.

European papers to Nov. 4th, three days later, have been received.

Sharp fighting had been going on before Sevastopol, but the news leaves us altogether in the dark as to particulars. Russian dispatches state that the allies had suffered two, several defeats. The French had had their works stormed and sixteen guns spiked, and the English cavalry had been attacked at Balaklava and routed, with a loss of 500 horses. British and French statements offer no explicit denial of these reports. They merely say that the Russian story is "improbable" and "exaggerated."

It is foreseen that one or more pitched battles must be fought in the Crimea, and therefore the allied commanders have determined to reduce Sevastopol, if possible, by bombardment, and thus economize the lives of their troops.

Capt. Du Val de Dampierre, aid-de-camp of Gen. Bosquet, was taken prisoner by the Russians. He begged the Russian General to send intelligence to the French camp that he was a prisoner, and not killed. The Russian told him to go himself, which he did, and, of course, returned and surrendered.

Water begins to fail in Sevastopol. Every morning women and children come outside to the wells, and are permitted to return without molestation.

Lord Raglan's chief interpreter, a Greek, has been sent to Constantinople for trial as a Russian spy.

In Great Britain, contributions to a very large amount continue to flow into the various funds established for relief of the sick and wounded. Public meetings were being held in the chief cities in aid of these "patriotic funds."

Smith O'Brien came passenger by the last Indian mail-steamer. Not being permitted to return to Britain or Ireland, he left the steamer at Gibraltar, and will probably take up his residence in Italy.

The European papers, like those of America, have a good deal to say about the refusal, on the part of the French Government, to allow Mr. Soule, our minister to Spain, a passage through France, on his way from London to Spain. Some think that the discourtesy was simply to an individual justly offensive to the French Government, while others consider it an insult to the United States in the person of one of its ministers. The Paris *Constitutionnel* gives in substance the following grounds for the discourtesy:—

1. The quarrel and duel between the French and the American Embassadors at Madrid;
2. The disregard of M. Dillon's Consular immunities at San Francisco;
3. The Republican and anti-Imperial demonstration of the French exiles in New York in presence of the French fleet then in that port.

[Since the foregoing was in type it is announced, that Louis Napoleon has concluded to yield the point in the case of Mr. Soule, and allow that gentleman to pass through France on his way to Madrid.]

Shipwreck and Loss of Life.

Again we are called upon to record a shipwreck, resulting in a sad loss of life. The ship New Era, from Bremen, went ashore near Deal, New Jersey, on Monday morning, Nov. 13, having on board a large number of German emigrants. Of the 427 passengers and crew who embarked at Bremen, only 143 reached the shore, making a loss of 284 lives.

The following account is given by the Captain, Thomas J. Henry:—

We sailed from Bremen on the 28th of September—after having laid in the roads since the 19th of the same month—with 374 steerage, 6 second-cabin, and five cabin passengers. Our cargo consisted of 600 tuns of chalk, and 20,000 cubic feet of Bremen merchandize. During the whole of the passage, we had heavy gales from the westward, and, about the 20th of October, were struck by a sea, which swept everything fore and aft, as we were lying-to. It stove the passengers' cooking-range, killed several of the passengers who were in the caboose, at the time, and injured several of the crew. It also stove the main hatch covering. The passengers killed were all of the steerage. The shock of this sea caused us to spring a leak, and by the time we had got off the American coast, she leaked enough to keep our pump going all of the time. The last observation which I took was on Friday last, when I was in 66° W. lon. 41° 50′ lat. Since that time I was prevented from taking an observation on account of the thick and rainy weather. On Saturday, judged the ship to be in 72° 30′ lon., 400 25′ lat. On Saturday night we had a strong wind from the eastward, which changed to south-east at about midnight, and the wind began to blow and the rain to fall heavily. The lead was thrown every hour, and I supposed the ship to be on the coast of Long Island, and I carried a heavy press of sail to keep her off. At 5 1-2 o'clock on Monday morning, on sounding, we found that we were in from thirteen to fifteen fathoms of water. At 6 o'clock, the weather being very thick and the sea rough, we struck. The first mate was on the deck some ten minutes before the vessel struck. I was in the cabin, about going on deck myself, when all at once, I heard him ask the watch forward, what it was that looked so light forward? On hearing this I immediately jumped on deck, and then, for the first time, heard them cry out "Breakers!" I at once ordered the wheel up, and in the same moment the ship struck. I at once caused the yards to be braced aback, to get her off, but we only thumped further on. She went head on, made two or three thumps, and swung around broadside to, and I found that she was hopelessly aground. The sea at once commenced breaking over her side, breaking up everything upon the deck. I got the passengers up out of the between-decks to the main deck. I then ordered a boat to be lowered, in order to get a line ashore. We got the line into the boat, and the crew, first mate, cook, and five men, rowed ashore, but in going let go the line; they subsequently said that they did this in order to save themselves. The boat reached the shore all right, but the sea ran too high for them to return in safety. Within half an hour after the first boat had left, the remainder of the crew, with one or two exceptions, seized the other two boats and deserted me, taking with them two of the cabin passengers. After the crew had deserted me the people on shore attempted to launch a surf-boat to come to our assistance. Then they fired a shot over us from the mortar—the attempt at launching the surf-boat having failed. This was also unsuccessful. The first shot went ahead; several of the following shots were useless—the wire connecting the line to the ball breaking. Near noon a line was thrown over us, and with the assistance of the passengers we hauled a stouter line on board. By this means we hauled a life-boat from the shore, but when it reached us it was full of water. I jumped into it to bail it out, when I found the passengers crowding on me, and I slacked the line out a little, and ordered those on shore to haul her out from the ship. They did so, and we got the boat ashore, with the loss of five persons. The boat capsized twice in going ashore, and finally the line of connection between the ship and the shore parted. Five persons, together with myself, were, with great difficulty, saved. The boat, in capsizing, turned me under, and it was some time before I got out; at length I succeeded in mounting the keel, when I was saved.

At the time I got ashore the passengers were in the fore, main, and mizzen rigging, and so remained through the night, as no earthly assistance could be offered to them from the shore. The scene on board of my ship was dreadful. I hope in Heaven I may never behold a like scene again.

A German woman, who was on board through Monday night, gives the following account:—

The weather was about as fine as any we had experienced in the course of the voyage, on Sunday last. All were soundly asleep in the berths near me, when we were suddenly awoke, between five and six o'clock on Monday morning, by feeling that the ship was thumping heavily on the ground. We hurriedly dressed ourselves, but remained quietly below, while some of the men went on deck to inquire what was the matter. When they came back, in order to quiet our fears, I suppose, they said that nothing of any consequence had happened. But it was not long before the water rushed in, which at once created a general alarm. Soon the water came in so fast that many were drowned as they lay in their berths, before they could gather sufficient presence of mind to rise. There was now, consequently, a general rush for the deck. Arrived there, we held on as well as we could, and took shelter, some in the after-cabin, and some in the forecastle. I went into the latter. The men generally climbed out on the yards and bowsprit, while every now and then one united wail went up to Heaven for aid in our distress.

For from two to three hours we managed to protect ourselves against the fury of the raging waves, wet to the skin, however, and almost reckless through despair. During this time the bulwarks and a part of the forecastle were washed away, and at about nine o'clock in the morning, the fore castle, where I had taken shelter, with some 20 others, began to break up, when I left it with my poor mother.

The waves repeatedly washed over us, and in spite of all I could do, my dear mother was knocked down two or three times as we endeavored to make our way to the rigging, where we thought we might find some shelter. At last, however, exhausted with fright, fatigue, and the continued dashing of the waves over her, she fell down on the deck, and before I had time to render her any assistance, a large wave carried her over the side. I never saw her again.

At length with much difficulty I succeeded in reaching the shrouds, where I was protected somewhat from the force of the waves. I had now partially recovered from my first fright, and looking round I saw my brother, his wife and little child, crowded with others into the place where the coals had been stored away. Seizing a favorable lull between two large waves, I joined my brother, who had repeatedly called to me, and who, like myself, had seen our mother drowned. One wave, however, caught me and threw me down. How I was saved I cannot tell. When I recovered my self-possession again, I found that the wave had torn all my clothing off my back except my chemise. I sat for hours near my brother, with the water continually dashing over us. Every moment we expected would be our last. Some two hours after midday my brother's child was torn away, by a succession of large waves, from the enfeebled grasp of his wife. It was rapidly swept out of sight. Soon after this occurred, I noticed that two men had been drowned close to us, although they seemed to be well sheltered from the fierce waves; but the repeated dashing of water over us had at last drowned them. The waves eventually carried them away too. I could see men, strong men, springing from the rigging during the intervals between the waves, in vain attempts to rescue wife or child, crying continually, "My wife!—my child!" in tones that, distressed as I already was, by my own griefs and losses, penetrated to my heart. As we sat we could see the bodies of many of our fellow-passengers, tossed about on the raging waters; not so much, however, in single ones as in masses, as if when first launched into the waves they had grappled one with another, and so drowned. We could not even take any comfort from seeing, as others have done, the exertions which were being made by the noble people on shore to aid us, since we were so placed as not to be able to see the beach; and we durst not stir, lest we should share the same fate as had those whose stiffened bodies were floating before us. Throughout the night we cried to our God for help, and with the morning assistance came; but fatigue and fright had so worn us out that we were almost deprived of any further interest in our fate.

About 7 o'clock Tuesday morning I heard a cry of "A boat! a boat!" and now that the storm had in a great measure passed away, I managed to creep along so that I could look upon the shore. To my great joy, I saw the longed-for assistance in the shape of three boats. They came alongside, when, taking advantage of the short intervals between the breaking of the waves, many of the men, pale and worn out with fatigue, dropped from the yards and rigging, and managed to get safely into the first boat; others were taken in the second, and at length I came, alone, in the third.

The publishers of weekly newspapers in the State of New Jersey contemplate raising their subscription prices from $1 50 to $2 per year—the present prices not remunerating them.

The Public Land.

A letter from Washington says that the Land Graduation Bill, passed at the last session, has very much increased the business and duties of the General Land Office, but the law requires considerable modification, if it shall not turn out entirely for the benefit of speculators, and a detriment to actual settlers. A modification of the law will, therefore, in all probability, be recommended by the Secretary of the Interior.

Large sales of public lands at reduced prices, from 75 cents down to 12 1-2 cents an acre, have already been made, but the principal entries have been made in large quantities, by speculators and not actual settlers. Of the 9,500,000 acres of public land surveyed during the last fiscal year, seven millions have been sold for cash yielding nine millions and a half to the Treasury. This is an unprecedented revenue from that source, exceeding the average revenue from the sale of public lands by upward of six millions of dollars. Many of these lands have undoubtedly been entered in consequence of the general rise of real estate which took place last year, but others were clearly in anticipation of the location of new railroads, which were to bring them into general market. Thirty thousand miles of railroad were projected during the last year, to be built by donations of alternate sections of public lands, and 19,799,000 acres of public lands were expected to be appropriated for that purpose. No such bill, however, passed the last session, and the Minnesota Bill, which did pass, was afterward repealed, though that repeal is probably ineffectual. But one million and a half acres were selected for donations to railroads during the last fiscal year—the residue of former appropriations not yet exhausted. Three and a half millions of acres were located on military warrants, and eleven millions were claimed as swamp lands for States; so that the whole amount of public lands taken up, located or disposed of, during the last fiscal year, ending June 30, 1854, exceeded actually the round sum of twenty-two millions of acres.

Murder while attempting to Kidnap.

An individual named McCord was tried at Xenia, Ohio, for the murder of a negro whom he was attempting to kidnap, and was convicted of murder in the second degree.

"McCord, riding in a buggy, overtook the negro, who was afoot, and invited him to ride. Being then in an Anti Slavery neighborhood, it was agreed between them, that the negro should represent himself as a fugitive slave, McCord passing for an agent or conductor of the underground railroad, the firm being organized for the purpose of "making a raise" out of such benevolent persons as they might chance to meet, for the joint benefit of the partners. The business, however, did not prove very lucrative. The only person that they met was a lapsed disciple of George Fox, who replied to their story, that gold and silver he had none, but such as he had they were welcome to, pulling out a bottle of whisky and treating them.

"The first house at which they stopped was that of Chapman, who informed McCord that he and his family were Virginians, and had no sympathy for runaway negroes. Upon this hint, McCord changed his plans, and having found the right kind of assistance, proceeded to capture and bind his late partner, with the view of selling him to the nearest market for such commodities. The negro stoutly refused, and even after he had been secured, as was supposed, he broke loose and ran, McCord and two of the Chapmans pursuing, catching, and overpowering him; in doing which, they so injured him by blows on the head, that he died soon afterward. Life being extinct, they placed the body in McCord's buggy, and took it some distance away, where it was found the next morning, exposed, in a sitting posture, against a tree. Two of the Chapmans (father and son) were arrested on their own confession, as participants in the outrage, and indictments are now pending against them, for trial at the next term of the Green County Common Pleas. Meantime, they are at large, on bail, and will probably leave the country."

The Cholera in Sicily.—By the bark Ithonia, Capt. Morton, from Palermo, we have advices to Sept. 17.

At Messina the cholera was making frightful havoc, taking off from 800 to 1,100 per day. On the 16th, the report was, that about one-half the population had been carried off. The disease extended even to animals—mules, cats and dogs dropping dead in the streets. All the physicians who had not fallen victims, had fled the city. The Government had issued a proclamation calling for medical volunteers from the neighboring cities, guaranteeing payment to them. There were ten who had gone from Palermo. On the 13th 1,000 soldiers or convicts had been sent from Palermo to Messina to cleanse the streets and bury the dead.

At Naples, Aug. 13, the disease had abated, the deaths amounting to about 300 per day; and on the 23d, the deaths daily had decreased to 20 or 25.

At Palermo, 26th, about 350 per day was the number. The whole number of deaths at Palermo was estimated at 15,000, and at Messina, 45,000.

Quick Time.—The steamship Northern Light, with one week later dates from California, arrived in New York on the 14th inst. Passengers by her came through from San Francisco in 20 days and 12 hours, being the shortest time yet made between that city and New York. The news is not important. It seems that the Meiggs affair had been swiftly followed by a multitude of discoveries of other frauds and defalcations of various kinds. Two of the late city officials were on trial, charged each with embezzling the sum of $300,000. A prominent broker had defrauded a principal of $36,000, and spent the money. A juryman, who was bribed, drew several thousand dollars from the briber, and when the latter refused to pay more, turned State evidence.

The strength of the Temperance party in the next Legislature of New Jersey, will be considerable. The whole of the Whig and American delegation from West Jersey, will vote for a Prohibitory Law, and the interior counties furnish several members favorable to such an enactment. As to the Essex members, at least five will support a law to be referred to the people for rejection or approval. The friends of Prohibition have certainly good reason to be encouraged at the prospects before them.

SUMMARY.

Mr. E. Meriam, in a note to the *Journal of Commerce*, after specifying several fatal accidents, by explosion of camphene lamps—nearly every instance of which arises from filling the lamp while lighted, says: "My memorandum, made in chronological order, which is immense, presents a melancholy record, and shows that more value in property is destroyed by fire from camphene, than the gross sales of all the spirit gas and camphene that is vended."

A Curious Case of Bigamy was recently in the California Courts. A man was married in England under the laws there, but the Roman Catholic Vicar General, in California, on ascertaining that the woman *had never been baptized* in the Romish Church, annulled the marriage, and married the man again to another woman by the Romish forms. This decree of "the Church," however, was not considered as valid in the eye of American law, and the man was convicted.

A letter from Washington says that the revenue from mail service is on the increase, and the deficit rapidly diminishing, notwithstanding the many Post Offices that have been created, and the mail service, which has been largely increased during the last fiscal year. It is now believed that if the Department were paid for all the duty it performs—that is to say, if the franking privilege were abolished—the revenue of the Department would exceed its expenditure.

The latest dates from Mexico, say that in the battle fought at Campo Guerrero, the victory belonged to the forces of Alvarez, who routed and killed 300 of the Government troops. Alvarez's son, at the head of some guerilla forces, had captured a number of prisoners and some 2,000 head of cattle. Gen. Alvarez had issued an address to the citizens of Mexico, denouncing the dictator Santa Anna, and closing with: "Down with the tyrant—death to the despot."

A dispatch dated Cincinnati, Friday, Nov. 17, 1854, says: At New London, Butler Co., yestesday, the tower of the new Congregationalist church in course of construction fell on the workmen and others, and killed Robert Jones, N. Jones, John C. Jones, and wounded ten others, one or two of them fatally. John C. Jones is a wealthy Welchman, and is generally known among his countrymen throughout the country.

A dispatch dated Philadelphia, Saturday, Nov. 11, 1854, says: The steamship Jewess, from Havanna for New York, stranded on Brigantine Beach, near Atlantic City, this morning, and went to pieces in half an hour afterward. She is a total loss, with her valuable cargo, consisting of sugar, oranges, cigars, &c. Her cargo was valued at one hundred thousand dollars, and the vessel at eighty thousand dollars.

Gen. Sam Houston has consented to lecture in the Boston Course of Lectures on Slavery during the coming winter, on the express condition, that he is to treat the subject exactly as he deems just, without reference to the presumed opinions of his hearers. Most of the lecturers are very naturally expected to regard Slavery unfavorably, though there is no requirement that they shall do so.

The poet and journalist, William North, committed suicide in New York, Nov. 15th, by taking Prussic acid. He was a native of England, about 30 years old, and received a highly liberal education at German universities and literary institutions in England. Poverty and discouragments were the cause of the sad act.

Many of the articles which have been on exhibition at the Crystal Palace in New York are being sold from day to day at auction. The prices they bring are unsatisfactory. One of those rich shawls, however, brought $1,025, which seems a pretty large sum to pay for such an article, in these hard times.

A woman named Sarah W. Karns, said to have been over 117 years old, died recently in New York. She was born in 1737, when Gen. Washington was only 5 years old, her father being Scotch and her mother Irish. She was the mother of 22 children, two of whom survive her.

In a recent action in the Supreme Court, before Judge Oakley, in which the defendant, Tracy, was sued for wilfully obstructing the passage of the Eighth-avenue railroad cars, by refusing to remove his horse and wagon from the track, the verdict of the jury gave the Company $50 and costs.

The British residents of New York are raising money in aid of the Patriotic Fund now being subscribed in the United Kingdom for the relief of the widows and orphans of British soldiers slain in the war with Russia.

Upward of fifty colored persons passed through Alexandria, Virginia, recently, on their way to Pennsylvania, where a tract of land had been purchased by their master, Dr. Charles Everett, of Albemarle, by whom they were recently set free.

The correspondent of the Charleston *Courier*, under date Havana, the 10th inst., says that two American schooners, with arms and ammunition on board, had been seized at Baracoa, and all the parties concerned imprisoned.

The propeller Bucephalus foundered in Saginaw Bay during a severe gale, and seven of her crew were drowned. She was loaded with corn for Buffalo. The vessel and cargo are a total loss.

New York Markets—November 20, 1854.

Ashes—Pearls $6 25; Pots 6 87.

Flour and Meal—Flour 8 12 a 8 37 for common to good State, 8 62 a 9 00 for mixed to good Ohio, Michigan, and Indiana, 10 50 a 11 37 for extra Genesee. Rye Flour 7 00 a 7 75 for fine and superfine. Corn Meal 4 50 for Jersey. Buckwheat Flour 4 00 a 4 25 per 100 lbs

Grain—Wheat 1 88 a 1 95 for mixed Western, 2 10 a 2 20 for Ohio, 2 25 a 2 40 for white Genesee. Rye 1 32. Barley 1 35 a 1 42. Oats 50 a 56c. for State and Western. Corn 89 a 90c. for Western mixed, 95c. for round yellow. White Beans 1 62 a 1 87.

Provisions—Pork 11 50 for prime, 12 50 for mess. Beef 5 50 a 7 00 for country prime, 8 00 a 10 50 for country mess. Dressed Hogs 6½ a 7½c. Lard 9½ a 10¼c. for new. Butter 12 a 18c. for Ohio, 20 a 24½c. f r State, 25 a 27c. for Orange County. Cheese 10 a 11½c.

Hay—62 a 70c. per 100 lbs.

Potatoes—2 00 a 2 12 for Western red, 2 25 a 2 75 for Carters and Mercers, 2 00 a 2 75 for sweets.

Seeds—Clover 10¾ a 11½c. Timothy 2 75 a 3 00 per bushel for reaped. Rough Flaxseed 1 75 for 56 lbs.

Tallow—12c. for Butchers' Association.

Wool—28 a 30c. for native, 42 a 45c. for American Saxony Fleece.

Proclamation,

By Horatio Seymour, Governor of the State of New York.

An acknowledgement of our dependence upon God, and of our obligations to him, is at all times the duty of a Christian people. But when the Almighty has again crowned the year with his goodness, and we are enjoying the gathered fruits of his bounty, it is eminently fitting that we should offer the sacrifice of praise and thanksgiving.

I therefore appoint Thursday, the 30th day of November, for this appropriate service; and invite the citizens of the State to assemble on that day, in their respective places of worship, to present their acknowledgments to the Parent of the Universe for his multiplied mercies. And with our thanksgiving let us mingle prayers for a continuance of the numberless blessings we, as a people, enjoy, remembering that his wisdom alone can rightly direct, his power support, and his goodness give strength and security.

In witness whereof I have hereunto subscribed my name and affixed the privy seal of the State at
[L. S.] the city of Albany, this tenth day of November, one thousand eight hundred and fifty four.

Horatio Seymour.

By the Governor: H. W. De Puy, Private Secretary.

MARRIED,

In Hounsfield, Jefferson Co, N. Y., Oct. 4th, 1854, by Elder E. Barnes, Mr. Horace G. Holloway to Miss Victoria E. Utter, all of the above place.

In Hopkinton, R I, Nov. 10th, 1851, by Eld. P. S. Crandall, Mr. Wm. A. Crandall to Mrs. Mary A. Barber, both of Hopkinton.

DIED,

In Plainfield, N. J., on the 17th inst, of consumption, aged 32 years, Eliza W. LaDue, wife of P. A. LaDue, Esq., of St. Louis, and daughter of Joseph Stillman. She professed religion at the age of nine years, and was baptized and became a member of the First Brookfield Church, there being at that time no church in Schenectady, the place of her nativity and home. At the time of her decease, she was a member of the Church in New York. From the time of her marriage till a few months before her death, she was far removed from the cherished associations and Sabbath privileges under which she had grown up, but never permitted the Sabbath to pass without observing it as strictly, and pursuing her devotions as devoutly, as though she had been in the bosom of the church. Her unwavering and steadfast adherence to principle, her mature judgment and exalted virtues, exerted a happy influence over those most familiar with her, while her deep and constant affection impressed all who felt its influence with the value of her character. A few days before her death, when condoled with by her husband with reference to her sufferings, she said, "My sufferings are not worthy to be put in contrast with the joy there is laid up for me." During the last hour of her consciousness, she was told, "The end approaches;" to which she responded, "I am ready to go." Hearing the windows rattle by the wind, she said, "Does it storm? I hope not; I am at peace, and wish to go hence in peace." Being assured the skies were bright above, she faintly replied, "My promised home is brighter still," and soon after passed peacefully away to that home. The following lines, written by a brother of hers, after her death, express the feelings cherished by the friends she has left:

Sister, thou art gone to thy rest,
Yet not to the grave do we trace thee,
But to the home of the good and the blest,
Where their forms of beauty surround thee.

Though we who remain do deplore thee,
And wait for the time of re-union,
We feel the more anxious to greet thee,
And join in that peaceful communion.

In Sangerfield, Oneida Co., N. Y., on the 3d inst, of dropsy of the head, Harlo L., son of Horatio and Mariette Green, aged 9 years and 8 months.

LETTERS.

A B Burdick, D E Lewis, Joshua Clarke, P S Crandall, C D Langworthy, W M Fahnestock, C R Burdick, J M Allen, John Utter Jr, A C Hendtlass, W B Maxson, G W Knapp, J F Randolph (yes,) Delatrius Davis, E R Clarke.

RECEIPTS.

FOR THE SABBATH RECORDER:

J Kenyon, Rockville, R I	$2 00	to vol. 11	No. 52
G S Kenyon "	2 00	11	52
Orenzo Coon, Berlin, Wis	4 00	12	26
Elisha Brace "	2 00	12	22
O B Arnold, West Edmeston	2 00	11	52
Elizabeth Millard "	2 00	11	52
Samuel Whitford, Alfred	2 00	12	18
Ezra Potter "	2 00	11	52

FOR SEVENTH-DAY BAPTIST MEMORIAL:

Ezra Coon, West Edmeston	$1 00
Nathan Lanphear, Alfred	1 00

WILLIAM M. ROGERS, Treasurer.

Quarterly Meeting.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut will be held with the Church in Waterford, Ct., commencing on Sixth-day evening. Dec. 1st, 1854, at 6½ o'clock, and continuing through Sabbath day and Sunday. Opening discourse by Eld. C. M. Lewis.

P. L. BERRY, Committee.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had.

E. R. CLARKE, Sec. of Board.

Saddler and Harness-Maker Wanted.

THE subscriber wishes to employ a journeyman saddler and harness-maker; also, a boy desirous of learning the trade. Those who keep the Sabbath would be preferred.

P. L. BERRY,
New London, Ct.

23-3t

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Central Railroad Company of New Jersey.

THE cars will run as follows until further notice, commmencing Monday, April 10, 1854:—

Leave New York at 8 A.M., 12 M., and 4 and 5½ P.M.

Leave Plainfield for New York at 6.55 and 8.30 A.M., 12.20 and 5.10 P.M., passenger, and 7.30 P.M., freight.

Leave Plainfield for Easton at 9.35 A.M., 1.40 and 3.35 P.M., passenger, and 6.30 A.M. freight; and for Somerville at 7.30 P.M.

Passengers will be required to purchase tickets before entering the cars, or pay five cents in addition to the regular fare.

GEO. H. PEGRAM, Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

Passengers taken at Chambers, Canal, Christopher, 14th and 31st-sts.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Miscellaneous.

The Inventor of Railroad.

We hear the question asked, who was the inventor of the railway? and have never heard it satisfactorily answered; and we believe there are very few persons in this country who know any thing on the subject. Some few years ago, Howitt, of the *People's Journal*, gave a somewhat lengthy sketch of the alledged inventor, who, up to May, 1836, had been neglected in England. While thousands had been enriched by his brilliant scheme, he had remained forgotten—forced by poverty to sell glass on commission for a living. How many of the railway projectors, agitators, stockholders, etc., have heard of the subject of these remarks?

"About half a century ago—the exact year is not known—there was born in Leeds, Eng., a man named Thomas Gray. Scarcely any thing is known of his early history. He was, we believe, a poor collier; and being very ingenious, he conceived the idea of facilitating the transportation of coal from the middle town colliery of Leeds, a distance of three miles, by means of a sort of a railway which he constructed of wood. Upon this his cars moved at the rate of three and a half miles an hour, to the great merriment of a wise and discriminating public, who laughed at the idea of a railway as something very visionary, and as the mere suggestion of laziness. Poor Gray thought otherwise. Magnificent visions of future railways, such as are now stupendous realities, loomed up before him, and he began to talk in public of a general system of iron railroads. He was, of course, laughed at, and declared a visionary, moon-struck fool. But the more Gray contemplated his little railway for coal, the more firmly did he believe in the practicability and immense usefulness of his scheme. He saw in it all that is now realized, and he resolved, in spite of the ridicule, the sneers, and rebuffs, that were heaped upon him, to prosecute his undertaking. He petitioned the British Parliament, and sought interviews with all the great men of the kingdom; but all this had no effect except to bring down upon him, wherever he went, the loud sneers and ridicule of all classes. Still he persevered, and at length engaged the attention of men of intelligence and influence, who finally embraced his views, urged his plans, and the result is now before the world. Thomas Gray, the inventor of railroads, who, no longer ago than 1820, was laughed at for ever mentioning the idea, still lives in Exeter, England, in the full realization of his grand and noble railroad schemes, for which he was declared insane. How much has the world been benefited by his insanity!"

England's Happy Family.

England has at least one happy family, a most thriving family, which, by the prospect of progression it holds out, would be able to supply all Europe with kings and queens for centuries to come, were we so obtuse in intellect as to believe in such a long life to monarchy.

1. The Queen Alexandria Victoria was born May 24, 1819.

2. Prince Albert Augustus Charles Emanuel, of Saxe Coburgh and Gotha, was born August 26, 1819.

The twain were married at the age of 21, on the 10th day of February, 1840. The issue has been:

3. Victoria Adelaide Mary Louisa, born November 21, 1840.
4. Albert Edward, born November 9, 1841.
5. Alice Maud Mary, born April 25, 1843.
6. Alfred Ernest Albert, born August 6, 1844.
7. Helena Augusta Victoria, born May 25, 1846.
8. Louisa Caroline Albert, born March 13, 1848.
9. Arthur William Patrick Alberta, born May 1, 1850.
10. Leopold George Duncan Albert, born April 7, 1853.

Eight children—four sons and four daughters—in thirteen years, and all alive and well.

We attach numerals to this list, in order to simplify the arrangement for the reader, as it would be a matter of difficulty to remember the names and titles of the various members of the family.

No. 1 has her private purse annually replenished by the introduction of £60,000 sterling, or $300,000. Besides this, she occupies, free of expense, four or five different residences; being quite obiquitous in character, and supposed to inhabit all four together. The names of these domiciles are, Buckingham palace, St. James' palace, Windsor castle, and the Royal Pavilion, Brighton. Her tradesmen's bills and household are exclusive of this private purse, and all three items being summed up for the year, are given in Thom's *Official Directory* as costing Great Britian a sum amounting to £372,850 sterling, or $1,800,000.

No. 2, who is a consort of No. 1, enjoys an annual purse of £40,000, with the privilege of residing at any or all of those establishments mentioned, at the will of his wife, the aforesaid No. 1. Besides these emoluments, No. 2 is entitled a Field Marshal in the British Army, Colonel of the Scots Fusileer Guards, Lord Warden of Stanuaries, Chief Steward of the Duchy of Cornwall, Chancellor of the University, and many other productive titles, each of which is synonymous with, and indicative of, a round number of English thousands.

Nos. 3, 4, 5, 6, 7, 8, 9, and 10, stepped into this sublunary sphere with not only a silver spoon in each mouth; but with £10,000, ($50,000.) annuity, until they become of age, when their income, as duly recognized and accredited children of Nos. 1 and 2, will be augmented to about £40,000.

Of this interesting group, who go up from No. 10, or come down from No. 3, with a precise regularity in height, like the "steps of stairs," No. 4 is titled Prince of the United Kingdom of Great Britain and Ireland, Duke of Cornwall, Duke of Rothsay, Earl of Carrick, Earl of Chester, Earl of Dublin, Baron of Renfew, Lord of the Isles, Great Stewart of Scotland, Knight of the Most Noble Order of the Garter, heir apparent to the crown of No. 1, and, as we see by the papers, has been gazetted as Major or Major-General of the British Army, which appointment of itself, independent of his other numerous salaries, commands some half a million of dollars.

The Queen's mother, the Duchess of Kent, annually receives $32,000, with the residence of Frogmore Lodge, Windsor, from her daughter's subjects; and other members of the royal family, relations connected with it, as uncles, aunts, and cousins to the Queen, receive from the Exchequer of the British people, sums amounting in the gross to $141,000 annually.

These facts in themselves are sufficient to stamp the law of monarchy with infamy. How people can exalt and glorify such a state of things, is really, to us common sense Americans, a matter calling into question the sanity of the English people. That men can be so crazy about slavery, and have so mean an idea of humanity, as to believe that one family is divine, sacred and unapproachable, and for this reason to be fed and worshiped at the expense of food and clothing to thousands and millions of others of better mould and mind, with more godlike shape and sense, is a mystery which none but the English people themselves can solve; and I question whether *they* can.

As to the family itself, all we can say is, that if money can bring happiness—if idleness, luxury, fashionable dress, indigestible food, and an acknowledgment of divine right to all these, can bring happiness, it ought to be (which we doubt if it is) a very happy family.

What Causes the Gulf Stream?

Mr. Stanton Shoales, an experienced navigator, gives it as his opinion that the waters of the Gulf Stream are nothing more nor less than the waters of the river Amazon. This great father of waters is bedded more than 1,000 miles immediately under the equator, and all its tributary streams for many thousand miles are constantly pouring their hot water into this mighty reservoir of water. As these waters are gathered in under the burning sun of the equator, they are extremely warm; far more so than the Atlantic Ocean waters under the equator. The great body of heated water shoots out into the Atlantic more than a hundred miles, in the face of the eternal trade winds.

The Amazon is sixty miles wide; after being bolted in its irresistible course, it curves to the left, and scuds off before the strong trade winds till out of their reach. Driven along with great force, it takes its course round the great bay formed between the two continents of North and South America. Dashing along the northern coast of South America, and passing to the leeward of the West India Islands, it laves the shore of Cuba, and proceeds along the shores of Florida, the capes of Virginia, and the south coast of North America, and passing the shores of Newfoundland, ends its mission among the icebergs which float out of the Northern Ocean. Cut off the Gulf Stream, and it would not be many years before the North Atlantic would be filled with icebergs that would be very destructive to navigation. But a wise providence has provided an eternal reservoir of hot water constantly rushing around over back of the cold Atlantic to its destination, where, after spending its vital warmth among the icebergs, it is hurried away by a new supply of native warm water from the great Amazon. Seamen can always tell when in or out of the Gulf Stream by dipping the hand in the water along side.

Undoubtedly this view will be new to some readers, but what I have written is from experience, and was seen while I was roving upon the mighty deep. The Gulf Stream, I repeat, is nothing more or less than the waters of the great Amazon of South America. I have crossed it in many places, and for many years have glided through its warm water, always pleased to have it astern. The most violent storms, from whatever quarter they may come, never change its course or its current, but it continues to move on in that irresistible power which was giving to it in the beginning by the Power above.

Thrilling Incident.

A few days since, (says a correspondent of the *Tennessee Baptist*,) Mr. Davenport, of Shelbyville, Tenn., went down into a well which he was engaged in digging, and the negro who remained at the mouth of the well became alarmed at his groans, and ran to the street, crying out that a man was dying in the well. A young gentleman chanced to be passing at the moment, and instantly ran to the well, pulled off his coat, and climbing down by the curbing till within about ten feet of the bottom, when he encountered the stream of poisonous air which had broken into the well, and finding he was likely to fall, jumped to the ground. He found Mr. D. apparently dead, and immediately made a rope or chain fast around the lifeless body, which was drawn up by people who had assembled at the well. Scarcely had he done this, however, when he became unconscious, and sank to the ground. Those about the mouth of the well, finding that the body drawn up, though seemingly dead, showed some faint signs of remaining vitality, were busily engaged in endeavoring to restore the suspended animation, forgetting for the time that some one had gone into the well; and it was not till physicians had been sent for, and several had arrived with a crowd of the citizens, and the first object of their anxiety had begun to breathe again, that they were reminded (probably by the negro) that a young man, a stranger, had gone down to rescue this man, and was now, doubtless, a corpse in the bottom of the well. What could be done? Who was there brave enough, now that the danger was fully known, to venture into the very jaws of death? They let down a light, but it was instantly extinguished. They threw burning shavings, but they only filled the pit with suffocating smoke. Meantime the question was asked again and again, who was it that went down? No one could answer till a lady present, exercising her woman's wit, caught up his coat and pulled some papers from the pocket. They were notes of a sermon. The young man was the newly chosen Baptist preacher, Mr. Faulkner, a man who has in a few weeks won the hearts of his people in a most remarkable degree, and whose promise of future usefulness has seldom been equaled. When this was known, there was a silent pause. No one would venture into the well; but among the physicians who had gathered at the first alarm was Dr. Barksdale, a deacon in the Baptist church of which Mr. Faulkner is pastor, and at whose hospitable mansion the young man made his home. He instantly stripped and prepared to enter. In answer to the remonstrances of friends, who felt that he was descending to almost certain death, he said: This young man is a stranger—he is residing under my roof—I am in a degree responsible for his life—I will at least try to save him, though I die in the attempt. They let him down, but the suffocating vapor, mixed with the smoke, compelled him to desist for a time. He was drawn up, got some fresh air, waited till the smoke had subsided a little, and then went down again. He passed a chain around the body, but could not fasten it for want of a little stick to pass through a link to lock it. They threw down stick after stick, but the poison had taken hold on his brain—his head reeled, his breath failed, and he could not find them; he could not call out that he was dying. They drew him up, and laid him apparently dead beside the other. He soon revived, however, and explained in what condition he had left the young man. Mr. Griffith, a strong minded man and strong-bodied mechanic, and most worthy citizen, volunteered to go down, carrying with him a suitable stick to fasten the chain around the body. The work was quickly done, and he was drawn back without having suffered any very great inconvenience. When Mr. Faulkner was drawn up, after he had been in the well more than an hour, he was apparently gone past all hope, but the anxious and perserving efforts of his friends, aided by the best medical skill, were blessed at length to his recovery. Life came slowly back, and he is now, though still feeble, able to walk about. In a few days he will probably be as well as ever. The others are also doing well.

The editor of the *Tennessee Baptist* says: If the by-stander, in cases like the above, would dash into the well a few buckets of water, he might descend to the assistance of his friend with impunity. Such accidents are generally caused by a collection of carbonic acid gas, the poisonous effects of which are removed by throwing in water.

Feast of Tabernacles.

The Jewish Feast of Tabernacles commenced on Friday night, Oct. 6th, being the evening of the 14th day of Tisri. In the 23d chapter of Leviticus the Jews were commanded to dwell in the tents for seven days, and to have a holy convocation on the eighth; now, however, the entire festival occupies nine days. The first two are holy days; on the five following secular business may be pursued; the eighth is held sacred, and on the ninth comes the Rejoicing of the Law. To commemorate the dwelling of the children of Israel in booths, during their journey from Egypt to the Holy Land, many Jews at this day take their meals and spend the greater part of the day in booths erected for this purpose. These booths are called "succous" in Hebrew, by which name the festival itself is known. During the first seven days the "lulev" and "esrog" are used; the *lulev* is a branch of the palm-tree, together with branches of myrtle and willow; these three kinds of branches are united with rings made of palm-leaves. The *esrog* is a pomecitron, somewhat resembling a large lemon in shape, but superior in fragrance. This citron is supposed to be "the fruit of a beautiful tree" mentioned in Leviticus. When the great "hallel" (Psalms 113 to 118 inclusive are thus termed,) is said in the morning service, those that possess a lulev and esrog, hold them in their hands, and at the repetition of certain verses shake the lulev, (which custom was prescribed by the Rabbins,) and near the close of the services, with the lulev and esrog in their hands, they walk around the reading-desk, joyfully chanting "Hosannah!" The latter custom originated during the existence of the Holy Temple, when they walked around the altar in like manner, as described in the Talmud: "While the sacrifice was laid upon the altar, a golden pitcher was filled with water at the Pool of Siloam, near Jerusalem, and then brought through the water gate into the Temple, the trumpets sounding and the people shouting 'Hosannah!' Upon the altar there were two pipes leading to a cavity at the bottom; through one was poured the water, and the wine used for the sacrifices was poured through the other, and thus the two liquids mixed together." The Rabbins also relate, that during this ceremony there was very great rejoicing in the entertainments which were offered by persons skillful and dexterous in all kinds of feats. They refer to Isaiah xii. 3, as bearing a relation to this custom. The eighth day is celebrated with additional prayers to God, that there may be sufficient rain during the following year, to cherish the produce of the earth for the sustenance of His creatures. The ninth and last day has been instituted by the Rabbins as a day of rejoicing in the Law; for on this day it was, and still is, customary in many synagogues, to read the last section of the Pentateuch. Three copies of the Pentateuch are taken out of the ark on this day; in the first roll are read the last two chapters; in the second the concluding verses of the twenty-ninth chapter of Numbers; and the third roll is used for reading the account of the creation in the book of Genesis, in order to appear as joyful to *begin* as to conclude the books of Moses. [N. Y. Tribune.

New System of Preserving Meat.

If fresh meat could be had from distant countries, where it bears a very low price, the people of France would be able to purchase a much larger quantity of animal food; but this has been hitherto impossible, for the cost of transport and of fattening would be so much as to make the meat dearer than that which is raised in France. Attempts have been made to preserve meats in the cheap countries and export them to France, but they have all failed. There is now a project before the Emperor and Minister of War, for the drying of meat in South America, where it can be had at about one sou per pound, and importing it from thence for the use of the army and navy. We have seen some specimens of meat dried in Paris, and which at the expiration of five months were perfectly good. In South America a very large quantity of meat is dried in the sun, but the process carries away a very large portion of the nutritious properties, and it remains good only for a few weeks. The process on which the government has now to give a decision is simple and apparently efficacious. The water of the meat, which forms a very large portion of its bulk, is removed; and not by heated air, which has been frequently tried, and never with success, but by mechanical means; the meat is then plunged into a sort of varnish made from the gelatinous portions of the animal, and which not only forms a hard surface, but also enters into the pores of the meat and augments the nutrition, and then the meat is gradually dried. In about fifteen days it is fit for packing, and will, according to the assertion of the inventors, keep good for two or three years. When required for use, the meat is put for a few moments into water, and it nearly resumes its original bulk, and is cooked in the usual way. If it be true that meat thus prepared will keep for two or three years, or even for one year, the adoption of the process will produce an enormous change in the economy of subsistence. In South America it can be prepared at about two sous per pound, including every cost. As it is reduced in bulk about one-half, the cost to transport would not exceed one sou, and it could be sold in France, with a profit of 25 per cent. at four sous per lb. South America meat is not, perhaps, equal in quality to that raised in France, but even supposing it to be inferior to the extent of 20 per cent. the working classes and the poor would have an abundant supply of animal food. [Galignani.

A New Tree.

A strange and beautiful tree has been discovered in Washington Territory, which is not known to exist in any other part of the habitable globe. The tree is destined, I think, to make some noise in the world. It is remarkable, because its like is not to be found elsewhere, and on account of its great beauty and fragrance. The tree varies in height from one to seven feet; the leaf resembles that of a pear, while the trunk and branches look like those of the orange tree. The upper side of the leaf is thinly coated with a gum having the appearance of oil, and of the consistence of honey. Handling them causes the gum to adhere slightly to the fingers.

The gum, as well as the leaf and bark, is highly odorous. The fragrance, which is quite strong, resembles that of bergamot, or ripe fruit, and a few leaves are sufficient to perfume a room. A leaf, fully wrapped up in paper, so as to be entirely concealed, was handed to several persons, with a request that they would tell by the smell what it was. All expressed themselves highly delighted with the fragrance, but gave different answers as to its character. Some said it smelled like ripe pears; some said that it was bergamot; whilst others thought it smelled like ripe apples. The flower resembles that of the white jessamine.

This will certainly make a very beautiful and desirable ornamental tree to grow in our gardens, around our dwellings, near the parlor window, or to form a choice bower. Its intrinsic value for these purposes is greatly enhanced by the consideration that it is an evergreen. The specimen is brought from my farm, and is taken from a grove of about a quarter of an acre. The plant is very rare, even here. The oldest settlers of the country say they never saw it growing elsewhere. Still, I have no doubt it will be found in other places. It has been known to the priests of the Mission of St. Joseph, for some years, but has not attracted attention until recently.

Apparatus for Transplanting Large Trees.

The Glasgow (Scotland) *Commonwealth* gives an account of M'Glashen's Patent Transplanter, an apparatus that is likely to be of service in ornamental planting and other operations connected with rural improvements, enabling a gentleman to buy an estate, build a mansion house, and embosom it in woods and groves, all in the space of a year or two. The operation of transplanting is effected by driving into the ground large spades or cutters around the trees; these are held together by a light framework of iron, and extension rods being attached to the upper part of the spades, the tree is lifted out of the earth (by lever or screw power, according to size,) with a large adherent ball of earth, so that the roots are not at all disturbed; nor is it necessary to dig a trench around the tree. In this state the tree with its adherent ball can be transported to any distance in safety. The tree operated upon in the presence of the writer in the *Commonwealth*, was a broad and bushy holly in the Edinburgh Cemetery. It was about twelve feet high, and estimated to be thirty years old. It was lifted with a large adherent ball of earth, and being drawn by a horse to another part of the cemetery, was safely and expeditiously placed in the pit prepared for it. Much larger trees have been successfully transplanted by this process.

Origin of Words and Phrases.

Windfall.—The origin of this term is said to be the following: Some of the nobility of England, by the tenure of their estates, were forbidden selling any of the trees upon them, the timber being reserved for the use of the royal navy. Such trees as fell without cutting were the property of occupants. A tornado, therefore, was a perfect god-send in every sense of the term, to those who had occupancy of the extensive forests, and the windfall was sometimes of a very great value.

Robbing Peter to pay Paul.—In the time of Edward VI., much of the lands of St. Peter, at Westminster, were seized by his Majesty's ministers and courtiers, but in order to reconcile the people to that robbery, they always allowed a portion of the lands to be appropriated towards the repairs of St. Paul's church; hence the phrase, 'Robbing Peter to pay Paul.'

He's caught a Tartar.—In some battle between the Russians and the Tartars, who are a wild sort of people in the North of Asia, a private soldier called out:—'Captain, halloo there, I've caught a Tartar.' 'Fetch him along, then,' said the Captain. 'Ay, but he won't let me,' said the man. The fact was, that the Tartar had caught him. So, when a man thinks to get another in, and gets bit himself, they say 'He's caught a Tartar!'

Bankrupt.—Few words have so remarkable a history as the familiar word bankrupt. The money changers of Italy had, it is said, benches or stalls in the courts of exchange, in former times, and at these they conducted their ordinary business. When any of them fell back in the world, and became insolvent, his bench was broken, and the name broken bench, pencoratto, was given to him. When the word was adopted into English, it was nearer the Italian than it now is, being bankrout, instead of bankrupt.

Roland for an Oliver.—Although no phrase is in more common use, yet few are acquainted with its origin. The expression signifies the giving of an equivalent. Roland and Oliver were two knights famous in romance. The wonderful achievements of the one can only be equaled by those of the other. Hence the phrase, 'Roland for an Oliver.'

"A Rolling Stone gathers no Moss."—Well, what of that? Who wants to be a mossy old stone, away in a damp corner of the pasture, where sunshine and fresh air never come, for the cows to rub themselves against, for the snails and bugs to crawl over, and for toads to squat under among the poisonous weeds? It is far better to be a smooth and polished stone, rolling along the brawling stream of life, wearing the rough corner, bringing out the firm crystalline structure of the granite, or the delicate veins of the agate or chalcedony. It is the perpetual chafing and rubbing in the whirling current that shows what kind of grit a man is made of, and what use he is good for. The sandstone and soapstone are ground down to sand and mud, but the firm rock is selected for the towering fortress, and the diamond is cut and polished for the monarch's crown.

Valuable Discovery.—The Washington *Star* contains the correspondence between Thomas S. Drew, Superintendent of Indian Affairs, and others, relative to a recent discovery, which bids fair to be of great importance. Dr. G. G. Shumard, Physician and Geologist to the Lake expedition, commanded by Capt. Marcy, U. S. A., to the regions of the source of the Big Wachita, and Brazos Rivers, in the north of Texas, has discovered a substitute for Gum Arabic, which he calls "Gum Mezquite," and which, he has no doubt, will prove a valuable source of revenue to the States of Texas, New Mexico, &c. It is believed to exist in inexhaustible quantities. Specimens of the gum have been forwarded by Dr. Shumard to Mr. Drew, and are described by the latter as strikingly similar to Gum Arabic, not only as regards taste and appearance, but as to their mucilaginous qualities. Mr. Drew states, that "upon diluting one ounce of this gum in two ounces of cold water, I had a fine glutinous paste, which I have used in sealing envelopes, and other packages. I have also caused it to be mixed with starch, in the application to linen, and, in both instances, have no hesitation in saying, that it is equal to the article for which it must soon become a popular substitute. In this first form, the Indian Department is permitted the privilege of its first official use. It will be seen that its adhesion or glutinous qualities cannot be excelled; as I have sealed up the box with it, and will use it on the outward envelope. Should this gum prove as valuable in form of mucilaginous preparations for the sick, as in two cases to which I have subjected it, and should it command one-half the present prices paid for gum Arabic, the gathering it would afford employment for and support of thousands of the wild Indians on the plains, and, with encouragement, it will become a valuable article of traffic on the western frontier."

Inquest Twety-six Years after Death.—The London *Times* says that a most extraordinary occurrence has happened within the last few days at Redruth, in Cornwall. As long ago as the year 1828, a miner named Williams was working in Pednandrea mine, near Redruth, when he fell, together with his brother, into the shaft. His brother, after falling about 12 feet, contrived to stop his further descent, but the deceased fell further down, and a quantity of rubbish tumbled down upon him. Though every exertion to recover the body was made for a period of two months, it could not be found, and the shaft was then closed over. In this state it remained till April last, when a company was formed to resume the working of the mine, and, in clearing one of the levels the other day, the body of the deceased was found, lying on its left side. It had on a blue coat, with metal buttons, a coarse woolen shirt, and shoes and stockings. On its being brought to the surface, deceased's brother, who fell with him into the shaft, and who was then present, was so affected that his conduct for a while was like that of a madman. The Jury returned a verdict of "accidental death." The burial of the body was witnessed by upwards of 4,000 persons.

The Newly-Discovered Palace.—Of one of the slabs taken from a buried palace recently opened near Ninevah, a missionary correspondent of the *Independent* gives the following account:—

"The most interesting thing yet uncovered is an extensive lion-hunt, in which the king is engaged personally—in one case piercing a fleeing lion with an arrow, in another thrusting a dagger into him in a hand-to-hand fight, and in a third quietly spitting with his spear an enraged beast that is leaping upon the chariot. In all, there are some thirty lions pictured; some dead; some pierced with arrows, vomiting up blood; some in cages, and one in the act of springing from his cage through a trap-door opened by a concealed eunuch. This shows that the game was either reared for the chase, or caught and kept till the king's pleasure. On one slab seems a picture of royal pleasure grounds, exhibiting large columns rising from human-headed bulls, and from lions; also a series of pointed arches, very sharp. In another place, the king is seen through a city gate-way, hunting in the distance—the first instance of an attempt at perspective."

New Kind of Boots and Shoes.—Measures have been taken to secure a patent for a new kind of boots and shoes, invented by Albert L. Murdock, of Boston. The soles, and the lower portions of boots and shoes, are made of India rubber, or gutta percha, while the upper portions are formed of some textile fabric, such as woollen, cotton, etc. The lower portions of the boots and shoes protect the bottoms and sides of the feet from wet or moisture, while the upper portions form an elastic covering for the upper part of the feet or legs, and keep the lower portions properly adjusted to the feet, and at the same time allow the free perspiration to pass off.

Sums for Smokers.—A correspondent makes a computation of the cost of segars to habitual smokers, which may well set them a ciphering and reforming. Estimating the cost of good segars at one dollar a week, and computing compound interest at seven per cent. from the age of fourteen, the cost at 20 years of age would be $397 12; at 30, $1537 88; at 40, $3807 89; at 50, $8334 70; at 60, $17,201 32; at 70, $34,975 51; at 80, $70,341 65. The cost to health and morals can not be computed. Why not let the chimneys, and furnaces, and locomotives, do the smoking?

A Scotch paper says: "It has been remarked that the Highland regiments now in Turkey have suffered less from the cholera than the other French and British regiments in the East, and their comparative exemption has been attributed to their wearing kilts made of wool, and that the cases of cholera have been most numerous and fatal in the regiments wearing white trousers."

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM (*a Silver Medal*) of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y.

Ayer's Cherry Pectoral.

"Wisdom shall bow down to it, and the great of the earth, shall kneel before it."

Never could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La, April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.
Harvey, McKenney, & Co., State Gazette, Burlington, Iowa.
J. Knabb, & Co., Journal, Reading, Pa.
Raymond, Harper & Co., New York Times.
S Cobb, Christian Freeman, Boston.
Wm. B. Jacobs, Christian Chronicle, Philadelphia.
Hon. J. Wentworth, M. C., Democrat, Chicago, Ill.
Rev. E. G. Reese, Methodist Protestant, Baltimore
W. M. Wightman, Christian Advocate, Charleston, S. C.
J. M. Magennis, True Delta, New Orleans.
T. M. Donnell, Daily News, Savannah, Ga.
Geo. D. Prentiss, Louisville Journal, Ky.
Hon. Schuyler Colfax, M. C., South Bend Register, Indiana
A. Commings, Christian Mirror, Portland, Me.
M. H. Bartlett & Co., Republican, Hartford, Conn.
Chaddick & Berry, Banner of Peace, Lebanon, Tenn.
Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co, and by all Druggists everywhere.

RESTRICTED COMMUNION.

A Sermon on Restricted Communion,
Preached in the Pawcatuck Seventh-day Baptist Church, Oct. 7, 1854, by A. B. Burdick.

(Concluded.)

Let us notice, briefly, some of the positions assumed in opposition to strict, and in favor unlimited, communion.

First—It is claimed that we ought, as Christians, to partake of the Lord's Supper with all with whom we would sing, pray, exhort, or invite to preach, or go to hear preach. This position is, perhaps, as often urged as any other, and is considered, it would seem, by those who advocate it, as nearly irrefutable as any which they espouse.

If by singing, praying, and exhorting, with those whom we cannot fellowship in the church, we are understood, by fair inference, to fellowship their errors in faith or practice, then we could no sooner join them in these services than commit any other act of glaring inconsistency. For all must see clearly, in view of such inference, that in thus participating with them, we have thereby publicly espoused and justified their erroneous views and practices. But there is a single consideration that deprives this position of its entire force, namely, no such inference follows the practice of singing, praying, and exhorting with others. The same is true, as all know, of listening to the preaching of the gospel by this class of persons. If by any common principle of interpreting actions, a Seventh-day Baptist church underwrites the practice of Sunday-keeping, by inviting a first-day minister to preach for them, they could no more consistently and justly hold such a connection with him, than they could abandon the practice of sabbatizing itself; for while they would, in profession, espouse one sentiment, in open and well-defined language, the language of practice, they would assent to its opposite. No person is of necessity suspected of being chargeable with the errors, nor is he credited with the virtues, of him on whose ministry he attends, either statedly or occasionally. Hence it does not follow, that we are under obligation to celebrate the Lord's Supper with all such as we may sing, pray, and exhort with, or invite to preach, or hear preach.

Again, it is claimed by the advocates of free communion, that "Christians have no right to say who may and who may not partake of the communion with them." But may they not have the liberty of saying with whom they choose to celebrate this ordinance? Have they not a right, in view of the express scripture teaching, and of common inference from the practice of the church on the subject, to say whom they think fit should unite with them in the service? If not, then gospel order is but another name for religious anarchy. The advocates of unlimited communion seem to proceed upon the ground that there is some natural, unalienable right, conferred by the Great Head of the Church on his followers, to take a part in the celebration of the Supper, *whenever*, *wherever*, and with *whomsoever* they may find the table spread, regardless of the conscientious views and deliberate choice of the company who may have agreed together to prepare the table for the purpose—that the rights of the community are either absorbed or destroyed by the superior rights of individuals. A more unscriptural or unphilosophical idea can scarcely be conceived. But instead of this being true, neither Jesus Christ nor his apostles have given us any direction as to whom we must or must not associate with in this ordinance; EXCEPTING ALWAYS, that we must *not do it* with those whom we ought to admonish. In such cases, we are to "withdraw ourselves," "keep no company," "have no fellowship." Hence we are free to utter the opinion, that no man can claim any right, natural, civil, or religious, to pray, sing, exhort, or celebrate the Lord's Supper, with any other person or company of persons, excepting *with their consent.* And it is, we think, a most disparaging comment on the modesty and Christian courtesy of any professed Christian, to urge such a claim against the conscientious convictions of the individual or community with which he proposes to unite in such service. That individual would be justly considered more wanting in Christian prudence than in blinded zeal, who would persist in urging his right to participate in the devotional service of prayer and singing, with those who could not freely join with him. With how much more force will this conclusion apply in the case under consideration, where so many reasons enter in to determine their choice as to whom they may, and whom they may not, partake with. This subject is divested of all its seeming difficulties, when it is seen, that with the exception above named, the question as to whom we may or may not commune with, is found to stand on the same general basis of other kindred ones, viz., the consent, either expressed or implied, of the parties concerned in the act.

Again, it is objected, "that the Christian church have no scripture warrant for using the Lord's Supper as a test of Christian fellowship." To this view we give our assent, and proceed to show, that none, so far as we know, either professedly or virtually, open communionists excepted, ever make the Supper an external test of Christian fellowship. The restricted communionist holds the communion, not as a test of Christian fellowship, but of church fellowship only, so far as his participation in it has any relation to other Christians. Hence he joins in it with those only whom he could receive into the church with himself; nor does he see it duty, or consistent, to invite those to join whom he would be bound to admonish by refusing "to eat" with them if they were in the same church together. He does not profess to commune with all who are Christians, nor is he at all confident that all with whom he communes are true saints of God, but only that their doctrine and practice is such that he is not required by the word of God to admonish them. It may be as true of restricted as of unrestricted churches, that many are in their fellowship who, in the light of this principle, ought not to be there; but this is not a necessary part of the subject under consideration. Those who are termed close communionists, believe that there are many outside of the visible church, who are the true children of God. They hold that among this number are to be found many young converts, whose hearts are glowing with the fervor of their early love, who have never been visibly connected with the church, and others who have been formally expelled from the various branches of the church, whose names are still written in the Lamb's Book of Life. For these, and all who exhibit the "fruits of the spirit" of God, they professes to have Christian fellowship and paternal regard, which, if we judge in the light of its visible manifestations, is not inferior to that of any other body of Christians. On the other hand, open communionists say in theory to commune with all of Christ's children, and profess unfeigned astonishment at the illiberal spirit which will exclude any one of them from "their Master's table." But it is well known, that there are individuals, and even churches, if not whole denominations, who call themselves Christians, and who, no doubt, have a share of Christ's friends among them, whom but very few of the open communion bodies would invite, or be pleased to see seated at their communion tables. They usually invite "all persons in good standing in Christian or evangelical churches," or use words of this import. Now, it is easily seen, that if they extend the invitation to those only, with the profession of communing with *all* Christians, it follows as a necessary inference, that in the judgment of these bodies none but those named and invited may be considered Christians. This is a contraction of Christian fellowship which the restricted communionist, with all his imputed illiberality, can hardly consent to. We are aware that there are some churches, and even small denominations, which invite all who may please to partake with them, without distinction of faith, walk, or character; but such we deem so utterly destitute of proper views on this subject, that we will not do our open-communion brethren the discredit to place them together in the same general list, as free communionists. For it is evident, from the partial restriction which the more numerous and venerable bodies of free communionists practice, that they have too just and scriptural views of this ordinance to prostitute it in the manner last named.

Again, it is urged, that the church should practice free communion, on account of its *tendencies to beget and perpetuate Christian union.* The lack of this important element in the professed family of Christ is certainly a [illegible] friends of Zion; and if there are any means, justifiable in themselves, which the Christian church may employ, to supply even in part this deplorable deficiency, she should be eager to embrace and forward to use them; for in no way can she more efficiently aid the bleeding cause of the Divine Redeemer, than by consolidating in a true and lasting union the scattered and contending ranks of His militant hosts. But let us inquire for a moment, whether mixed communion exhibits this practical tendency. If it possesses a necessary adaptation to this, it is but fair to suppose that some convincing illustration of the fact will be furnished in the many-paged history of its past operation, both upon denominations and individual churches. Has it united in a closer Christian union those denominations which have always practiced on this principle? Has it, in any perceptible degree, modified their sectarian and party strifes? We regret that facts compel us to answer, No! Has it in any instance (except by annihilation) lessened the number of denominations, or distinct denominational boards, societies, or institutions for carrying forward the benevolent and evangelical objects of the day? The continual divisions, and *consequent* multiplication of these, and the increasingly jealous and bitterly sectarian spirit which they manifest, afford the only answer to this question.

It is generally conceded, we believe, that denominational separations among Christians, (to speak in all charity,) are founded on an honest difference in their views of essential doctrines and ordinances, as set forth in the scriptures. Is there any thing in the act of occasionally partaking of the sacrament with others, more than may be realized from the joint performance of other devotional services, that is in itself calculated to change their views of scripture doctrine, or Bible interpretation? We certainly think not. Hence, as might be expected, no Christian union, to any visible extent, has ever been effected, by the intermingling of denominational communion, nor is there the most distant prospect even, that if all Christians were to mingle in the external communion, results such as are claimed in the assumption, would ever be realized. If there was any element in partaking of the communion with others which necessarily tended to harmony of sentiment, then it might be supposed that its effect would be manifest in harmonizing at least the minor shades and varieties of opinion that exist among the members of each distinct church. They sit and jointly partake at the communion table, month after month, and year after year, yet they have not thereby changed their views even on one of the comparatively unimportant points; each continues to hold and advocate his own peculiarities of sentiment, unchanged and unaffected by these circumstances.

Hence we see, that take whatever view of this subject we may, mixed communion possesses no such potency as is claimed for it, to promote Christian union. Nor can the existence of the various denominations be chargeable to limited communion. Variety in opinion originates the denominations, and not the denominations the opinions.

We now come, in the last place, to consider a most singularly self-contradictory argument, which is often urged upon our attention, by those who favor open communion. We are told, as a reason why we should *not practice restricted communion*, that it fully implies that those who are excluded thereby, are either not Christians, or, as such, are chargeable with some essential unsoundness in belief, or defectiveness in practice; hence that it is uncharitable. When it is replied to this, that limited communionists do not intend thereby to say that persons who are excluded are not Christians, but that they do not agree with their errors in faith, nor fellowship their unscriptural practices, then it is often said, that the communion has nothing to do with signifying our assent or dissent to, agreement or disagreement with, others in any respect—that it is simply between the individual and his Saviour. Taking for granted that all perceive the glaring contradiction between these naturally self-destructive positions, we will not spend time on them, except to notice one point, in which it is assumed that there is nothing in communion which signifies the agreement or disagreement of those who partake together. Having shown, under a former head, that mixed communion, as commonly viewed, *does* imply a certain *degree* of agreement and fellowship, let us inquire what confirmation this view receives from the use of the term "communion" in the scriptures. A single quotation will abundantly suffice to settle this inquiry. The apostle Paul, in exhorting the church at Corinth not to form connections, or in any way to fellowship, the idolatrous practices of the heathen around them, inquires, (2 Cor. 6: 14–16,) "For what fellowship hath righteousness with unrighteousness? and what communion hath light with darkness? And what concord hath Christ with Belial? or what part hath he that believeth with an infidel? And what agreement hath the temple of God with idols? for ye are the temple of the living God, as God hath said, I will dwell in them, and walk in *them*, and I will be their God, and they shall be my people." Here it is seen, that the term "communion" is used synonymously and interchangeably with *concord, agreement, fellowship*, and taking *part with.* These terms are unequivocal in their meaning, and show most conclusively, that some sense of agreement is attached to the use of *communion* in the scriptures.

With a brief summary, we close our remarks on this subject for the present. In our discussion of this question, we have seen, first, that it is the duty of the Christian church to withdraw from and disfellowship errorists in doctrine, and disorderly walkers of their number; and, secondly, that the mode of admonition generally adopted by the church, is fully authorized by the scriptures; and, thirdly, that the view which is generally taken of limited and unlimited communion, renders the practice of the former indispensable to consistency and uprightness in those instances where Christian admonition is called for. These propositions have been fully sustained and by (as we think) irrefutable arguments. To avoid prolixity, we have quoted but a small portion of the numerous passages which justify the views which we have attempted to defend.

The *first* assumption of those who oppose restricted communion, has been refuted, by showing, that by singing, praying, and exhorting with others, no one is ever suspected of fellowshiping their errors, either in faith or practice, and that the same is true of inviting others to preach, or listening to their preaching; hence, that inasmuch as by the habit of partaking of the communion with those whom we ought to admonish, we *are* understood to manifest external fellowship; therefore we may consistently join with them in the former services, but not in the celebration of the Supper.

The *second* position, viz., that Christians have no right to say who may and who may not partake of the communion with them, has been met by showing, that there is no inalienable right on this subject, that is, to partake of the ordinance with every body, every where, under all circumstances, regardless of the choice and conscientious views of other parties in the transaction; that no individual or church has any right, natural, civil, or ecclesiastical, to sing, pray, exhort, or celebrate the Lord's Supper, with any other individual church, or body of churches, excepting by mutual consent of the parties; and that this plain common sense view of this matter divests the whole question of limited communion of its apparent difficulties.

To the *third* objection, that the Christian church have no scripture warrant for using the Lord's Supper as a test of Christian fellowship, our assent has been most readily given, and we have shown, that this charge cannot hold against limited communionists, but against free communionists *only*, inasmuch as they profess to commune with all Christians, and at the same time exclude some who profess to be Christians, while the restricted communionist says not to commune with *all Christians*, but only with those in *church fellowship* with himself.

In replying to the *fourth* objection, viz., that the church ought to practice free communion on account of its tendencies to beget and perpetuate Christian union, we have found that in its practical operation no such adaptation has ever been exhibited, and that there is nothing in the nature of the case which gives any advantage in this respect over any other devotional exercise—that this claim set up for it has no justification, either in reason or history.

The *fifth* and *sixth* propositions were seen to be so self-contradictory, and mutually self-destructive, that little more was deemed necessary, than to state them, as the substance of both had been substantially attended to under former heads.

We have now done with these propositions. Whether we have fairly and scripturally sustained the practice of limited communion, is left for others to judge. But let no one, however, rest this subject upon the investigations of a single sermon; let them not decide a question of importance upon the conclusions which may be reached through the discussions of a single hour; but take the word of God as the chief source of light and instruction on this as on all other questions involving Christian obligation. And may the Spirit of God so enlighten all our minds, that we may clearly perceive, on this and all other subjects, the plain and peaceful path of duty; and let us fervently pray, that the time may be hastened when the principles and practice of righteousness and truth shall so thoroughly abound, that no occasion shall exist for one of the friends of Christ to admonish "any man that is called a brother."

THE COMMON LOT.

BY JAMES MONTGOMERY.

Once, in the flight of ages past,
There lived a man, and who was he?
Mortal, howe'er thy lot be cast,
That man resembled thee.

Unknown the region of his birth,
The land in which he died unknown;
His name has perished from the earth;
This truth survives alone:

That joy and grief, and hope and fear,
Alternate triumphed in his breast,
His bliss and woe—a smile, a tear!
Oblivion hides the rest.

The bounding pulse, the languid limb,
The changing spirit's rise and fall—
We know that these were felt by him,
For these are felt by all.

He suffered, but his pangs are o'er;
Enjoyed, but his delights are fled;
Had friends—his friends are now no more;
And foes—his foes are dead.

He loved; but whom he loved the grave
Has lost in its unconscious womb;
Oh, she was fair! but nought could save
Her beauty from the tomb.

He saw whatever thou hast seen;
Encountered all that troubled thee;
He was whatever thou hast been;
He is—what thou shalt be.

The rolling seasons, day and night,
Sun, moon, and stars, the earth and main,
Erewhile his portion, life and light,
To him exist in vain.

The clouds and sunbeams, o'er his eye
That once their shades and glory threw,
Have left in yonder silent sky
No vestige where they flew.

The annals of the human race,
Their ruins since the world began,
Of him afford no other trace
Than this—there lived a man.

PARTICULAR PROVIDENCES.

One of our exchanges gives the following statements as illustrations of the doctrine of "particular providences:"—

"While a sailor on the African coast, John Newton, had for a number of days been employed in going ashore in the evening, by the help of the sea breeze, and returning to the ship by the land breeze in the morning, to bring wood and water.

One day, having dined on board, he was preparing to return to the river as formerly; he had taken leave of the captain, received [illegible] boat, and just going to put off; in that instant the captain came up from the cabin, and called him on board again. Mr. N. went, expecting further orders; but the captain said, 'he had taken it into his head,' (as he phrased it,) that Mr. N. should remain that day in the ship, and accordingly ordered another man to go in his room. Mr. N. was surprised at this, as the boat had never been sent away without him before. He asked the captain the reason of his resolution, but none was assigned, except as above, that so he would have it. The boat therefore went without Mr. N., but returned no more; it sunk that night in the river; and the person who supplied Mr. N.'s place was drowned! Mr. N. was much struck when the news of the event was received the next morning. The captain himself, though quite a stranger to religion, even to the denying of a particular providence, could not help being affected; but declared that he had no other reason for countermanding Mr. N. at that time, but that it came suddenly into his mind to detain him."

Another case equally singular, which occurred some years ago, is related of a widow named Mozher, then living in the western part of the State of New York:—

Her husband had been dead many years; her only daughter was grown up and married, and living at the distance of a mile or two from the family mansion. And thus the old lady lived alone in her house by day and by night. Yet in her conscious innocence and trust in Providence, she felt safe and cheerful; did her work quietly during the daylight, and at eventide lay down and slept sweetly.

One morning, however, she awoke with an extraordinary and unwonted gloom upon her mind, which was impressed with the apprehension that something strange was about to happen to her or hers. So full was she of this thought, of some unknown evil, that she could not stay at home that day, but must go abroad to give vent to it, by unbosoming herself to her friends, especially to her daughter. With her she spent the greater part of the day; and to her she several times repeated the recital of her apprehensions. The daughter as often repeated her assurances that the good mother had never done injury to any person, and added, I cannot think any one would hurt you, for you have not an enemy in the world. As the day was declining, Mrs. Mozher sought her home, but expressed the same feeling as she left her daughter's house. On the way home she called on a neighbor, who lived in the last house before she reached her own. Here she again made known her continued apprehensions, which had nearly ripened into fear, and from the lady of the house received answers similar to those of her daughter. "You have harmed no one in your whole lifetime—surely no one will disturb or molest you; go home in quiet, and Rover shall go with you. Here Rover, (said she to a stout watch-dog that lay on the floor,) here Rover! go home with Mrs. Mozher and take care of her." Rover did as he was told; the widow went home, milked her cows, took care of everything out of doors, and went to bed as usual. Rover had not left her for an instant. When she was fairly in bed, he laid himself down on the outside of the bed; and as the widow relied on his fidelity, and perhaps chid herself for needless fear she fell asleep.

Some time in the night she awoke, being startled, probably, by a slight noise outside the house. It was so slight, however, that she was not aware of being startled at all; but heard, as soon as she awoke, a sound like the raising of a window near her bed, which was in a room on the ground floor. The dog neither barked nor moved. Next there was another sound, as if some one was in the room and stepping cautiously on the floor. The woman saw nothing; but now, for the first time, felt the dog move, as he made a violent spring from the bed; and at the same instant something fell on the floor, sounding like the fall of a heavy log. Then followed other noises like the pawing of the dog's feet; but soon all was still again, and the dog resumed his place on the bed, without having barked or growled at all. This time the widow did not go to sleep immediately—but lay awake wondering, yet not deeming it best to get up. But at last she dropped asleep; and when she awoke the sun was shining. She hastily stepped out of bed—and there lay the body of a man extended on the floor, dead, with a large knife in his hand, which had been uplifted to take her life, and which was even now extended. The dog had seized him by the throat with the grasp of death; and neither man nor dog could utter a sound till all was over. The man was the widow's son-in law, the husband of her only daughter. He coveted her little store of wealth, her house, her cattle, and her land. And instigated by this sordid impatience, he could not wait for the decay of nature to give her property to him and his, as the only heirs apparent—but made this stealthy visit to do a deed of darkness in the gloom of night. A fearful retribution awaited him. The widow's apprehensions, communicated to her mind and impressed upon her nerves by what unseen power we know not, the sympathy of the other woman who loaned her dog—and the silent but certain watch of the dog himself—formed a chain of events which brought the murderer's blood upon his own head, and which are difficult to be explained without reference to that Providence or overruling power which numbers the hairs of our heads, watches the sparrow's fall, and "shapes our ends, rough hew them as we will."

THE SUM OF RELIGION.

The following, written by Judge Hale, Lord Chief Justice of England, was found in his closet amongst his other papers, after his decease:

"He that fears the Lord of heaven and earth, walks humbly before Him, thankfully lays hold of the redemption by Jesus Christ, and strives to express his thankfulness by the sincerity of his obedience—he is sorry with all his soul when he comes short of his duty! He walks watchfully in the denial of himself, [illegible] known sin. If he falls in the least manner, he is restless until he has made his peace by true repentance; he is true to his promises, just in his dealings, charitable to the poor, sincere in his devotion. He will not deliberately dishonor God, although secure of impunity. He hath his hopes and conversation in heaven, and dares not do anything unjustly, be it ever so much to his advantage; and all this because he sees Him that is invisible, and fears Him because he loves Him—fears Him as well for His goodness as His greatness. Such a man, whether he be an Episcopalian, a Presbyterian, an Independent, or an Anabaptist—whether he wears a surplice or wears none—whether he hears an organ, or hears none—whether he kneels at the communion, or, for conscience sake, stands or sits—he hath the life of religion in him; and that life acts in him, and conforms his soul to the image of his Saviour, and and go along with him to eternity, notwithstanding his practice or non-practice of things indifferent. On the other side, if a man fears not the Eternal God, he can commit sin with presumption, drink excessively, swear vainly or falsely, commit adultery, lie, cozen, cheat, break his promises, live loosely; though at the same time he may be studious to practice every ceremony, even to scrupulous exactness; or may perhaps as stubbornly oppose them. Though such an one should cry down bishops or presbytery, though he should be re baptized every day, or declaim against it as heresy—and though he fast all the Lent, or feast out of pretence of avoiding superstition—yet notwithstanding these, and a thousand external conformities, or zealous opposition of them, he wants *the life of religion.*"

THE HAND OF GOD IN THE DESERT.

Bayard Taylor, in his "Journey to Central Africa," thus speaks of the natural beauties of the great Nubian Desert:

I soon fell into a regular daily routine of travel, which, during all my later experiences of the desert, never became monotonous. I rose at dawn every morning, bathed my eyes with a handful of the precious water, and drank a cup of coffee. After the tent had been struck, and the camels laden, I walked ahead for two hours, often so far in advance that I lost sight and hearing of the caravan. I found an unspeakable fascination in the sublime solitude of the desert. I often beheld the sun rise, when, within the wide ring of the horizon, there was no other living creature to be seen. He came up like a god, in awful glory, and it would have been a natural act, had I cast myself upon the sand and worshiped him. The sudden change in the coloring of the landscape, on his appearance; the lighting up of the dull sand into a warm, golden hue, and the tintings of purple and violet on the distant porphyry hills, was a morning miracle, which I never beheld without awe. The richness of this coloring made the desert beautiful; it was too brilliant for desolation. The scenery, so far from depressing, inspired and exhilarated me. I never felt the sensation of physical health and strength in such perfection, and was ready to shout from morning till night, from the overflow of happy spirits. The air is an elixir of life, as sweet and pure and refreshing as that which the first man breated, on the morning of creation. You inhale the unadulterated elements of the atmosphere, for there are no exhalations from moist earth, vegetable matter, or the smokes and steams which arise from the abodes of men, to stain its purity. This air, even more than its silence and solitude, is the secret of one's attachment to the desert. It is a beautiful illustration of the compensating care of that Providence which leaves none of the waste places of the earth without some atoning glory. Where all the pleasant aspects of nature are wanting; where there is no green thing, no fount for the thirsty lip, scarcely the shadow of a rock to shield the wanderer in the blazing noon—God has breathed upon the wilderness his sweetest and tenderest breath, giving clearness to the eye, strength to the frame, and the most joyous exhilaration to the spirits.

AN IDIOT'S FAITH.

The following fact occurred at the farm of Abingdon, in the parish of Crawford-John, Scotland, at the distance of well nigh a century from the present day. It then, as it is in a greater or less degree still, was the practice among the farmers to lodge wayfaring poor.

Says the narrator to his brother: "I remember an anecdote of my mother, which Sir Walter Scott would have valued. A poor wandering simpleton, or idiot, came to her father's house one winter evening, and sat by the fire. It was soon noticed that he was unwell. On being asked what ailed him, his reply was, 'Am unco' cauld.'

"After giving him warm gruel, he was put [illegible] comfortable bed in the kiln. At a late hour one of the maid servants came, saying 'that the poor thing in the kiln was aye muttering and speaking to himself.'

"My mother and others went to listen, when they distinctly overheard him repeating over and over again the following bits of rhyme:

'Three o' Ane,
And Ane o' Three;
And Ane o' Three
Will save me.'

"The next morning dawned, but the soul of the poor wanderer had gone to the bosom of that 'Ane o' Three,' on whose mercy he relied. My mother," the narrator adds, "could not relate the anecdote with dry eyes."

THE BATTLE FIELD.

The horrors of war have often been depicted, but the horrors of the battle field have seldom been more vividly described than in the following extract from the letter of an army correspondent of the *London Times*, writing from the field after the battle of Alma:—

"As your readers may imagine, there was nothing in the scene of the late strife to soothe my excited feelings, or lessen the intense disgust or sickening sensations with which I looked upon the real horrors of war. Long lines of men carrying stretchers were bearing the wounded to the rear. Their ghastly features, blood-stained clothes, and listless expression, were even more painful to notice than the long, deep moans of agony which could be heard from different parts of the valley. But the worst was to come, for I was still in the rear. Lower down, the ground was strewed with shakoes and camp-kettles, which the men had thrown off as they advanced. When the fight commenced in the early part of the day, the ground was quite dotted with Russian cannon-balls, which had ploughed up the ground in all directions. Here lay many of our dead, for the wounded had been early carried off. They were principally guardsmen, and men of the light division, who had been struck by cannon shot, for at this time they were out of range of musketry. Some had their limbs taken off, some their heads; others, who had been hit full in the body by 24-pounders, were smashed, and were mere masses of bloody rags. Mixed with these were artillery and spare amunition-horses, some torn nearly in half, while others, with their limbs mangled, were snorting and plunging, in their agony, or rolling over the corpses of the men near them.

Near the village, where the action was hotter, and there was no time to bear off the wounded, our men lay pretty thick in one long line, from the ford below the bridge to the vineyard in front of the redoubts. Here all the stragglers were busily engaged in putting blankets over the men, with their great coats under their heads, adjusting a broken limb, tying some ligature over a fast-bleeding flesh wound, or, above all, distributing water from the muddy stream the army had forded. Further on in front of the redoubts, was the largest number of our killed and wounded. After that, our casualties were few and far between; but within the redoubts, and from thence to the hills, the scene was awful. The Russian dead literally covered the ground. Within the trenches and redoubts the earth, where the corpses allowed you to see it, was slippery with blood. Never did I witness a more ghastly sight. From the place where the enemy had attempted to make their last stand, for the extent of nearly a mile, was covered with their knapsacks, which they had thrown away to accelerate their flight; 1500 or 1600 of their dead strewed the hills; their wounded, with few exceptions, had been carried off by the cavalry and artillery. Had our cavalry come up in time, half the Russian army would have perished on the spot. But to return. The Russians who crowded the field in all the horrible contortions of the last agony, were principally soldiers of the 16th and the 32d regiments. They were mostly very small-sized men, though stout, muscular, and active looking. From their appearance I should think there was scarcely a dozen above the age of 25, and the majority were much younger. Not a single officer was among their dead, at least none that we could recognize as such."

AT HOME AND ABROAD.

It is our opinion, that those employments which involve much traveling, and a great deal of absence from home, are not favorable to the growth of the soul in grace. It is true, sincere worship is as acceptable to God in one place as in another; and he who can cultivate the humble and contrite spirit, may be sure of enjoying the presence and blessing of the High and Lofty One, let him be where he may. It is certain, however, that the influences of association are powerful. Places where we are accustomed to perform our worship, and to receive tokens of the Divine blessing, acquire a sort of sacredness in our minds; and such is our constitution, that we cannot help associating with them ideas which are of great service in exciting our affections, and encouraging our devotions. The Christian who is daily at home has his "closet," where he prays to his Father in secret. It may be the barn, it may be a clump of woods, it may be the garret, or it may be a *closet* literally; but wherever it is, it is a place which becomes so intimately associated with the Divine favor, that whenever he sees it, he is reminded of his devotional duties. This is an advantage which one loses who is always moving from place to place. And we rather think, that the experience of most Christians is, that frequent and long absence from home is attended with a decline of the fervor of their religious affections.

Besides, who does not know, that the traveler is frequently put to it to find a place of retirement? How many times his lodging room is occupied with other travelers, in presence of whom he cannot bow, and feel that he has entered his closet, and *shut the door*, in accordance with the Saviour's direction! Or, if he attempt to bow at his bedside, before lying down, the consciousness that others are present distracts his thoughts, and very seriously embarrasses those feelings which are important to true devotion. Then how often is he so wearied with the travels of the day, that the offering of earnest, fervent prayer, is well nigh precluded, or he is tempted to omit it entirely! In the morning, too, the public conveyance hurries him, and he leaves his chamber without first invoking the blessing of Him without whose care he cannot even travel in safety.

His absence from his accustomed place of worship—his own church—is also an evil, which has its effect in rendering him lukewarm. For though the gospel of Christ may be preached wherever he goes, and though he may generally seek some Christian assembly on the Sabbath, and though he may find in all places those whom he cannot reckon as other than genuine Christians; *still* his Christian associates are not those who know him, and who can enter into his trials and difficulties like those who are intimate with him. He needs the encouragement, and the admonitions, of those who understand his general character. He needs the counsels and instructions of his own pastor. And he needs, too, all that strengthening and maturing influence, which is found in being actively and habitually engaged in the prayer-meeting, the Sabbath-School, the Bible-Class, and such other exercises as are usually attended to only by those why are at home.

In these days of rail-roads, and other swift modes of conveyance, all the world is in motion, and Christians partake of the general excitement. It is a grave question, whether such facilities for traveling have operated to the benefit, or injury, of Christians. No doubt, God intends that rail-roads, and steamboats, and all other accommodations of a like nature, shall ultimately subserve the prosperity of Zion; but in the mean time, are they not sources of temptation? Do not the facilities which they offer tempt Christians to extend their business over a large territory, embracing many different and widely separated localities, or which as often as necessary requires them to be much of their time from home? Do not great numbers of our young men engage in business, involving their constant locomotion, simply because railroads afford them the easy means of going and coming?

Our Sabbath-keeping brethren ought to guard themselves on this point. Much traveling in the way of business usually takes them beyond the circle of their covenant brethren; and whatever be their integrity, we do not believe that they can deprive themselves, Sabbath after Sabbath, for months together, of sanctuary privileges, without suffering results disastrous to their souls' prosperity. Whether the agencies, and book-peddlings, into which so many of our young men are entering, will not prove prejudicial in this respect, is a question which demands serious consideration. T. B. B.

◆

THE NORTH AND THE SOUTH.—The Southern Aid Society—an organization of northern pedobaptists to raise money for missionary operations in the southern States—held its first annual meeting on the 25th of October. The annual report enters into a lengthy statement of the reasons why the southern and southwestern sections of our country should receive a greater amount of missionary sympathy and cooperation than heretofore. Some of these reasons are very striking and significant. It is stated that from the first settlement of the country, the North has preserved a decided religious superiority over the South, especially in ample supply of Christian institutions, extensive acquaintance with Christian truth, and thorough Christian regimen both in the church and in the community. It is also stated, that the Southern Ministry is inferior to the northern, in number, in strength, in labor, and in access to the field; and that the missionary resources of the North are much in advance of those of the South, the vested property and the annual collections of the church at the North bring twice as large in proportion to members as those of the church at the South. These facts—for facts they undoubtedly are—show that there is something radically wrong in the institutions of the South. No doubt slavery is the source of the difficulty, and there is little room to hope that the difficultywill be removed under the preaching of a gospel which does not rebuke that institution.

PROGRESS OF EDUCATION.

In our former article upon this subject, we referred to what we had done as a people, and yet desired to do. In this we propose to glance briefly at what the American people have been doing of late in the department of education. Within this century, a new spirit has taken possession of the civilized world, but more especially of the Anglo-Saxon race. The spirit of progress has been infused into the mass of society. There is a waking up of the common mind to an extent never before known. More truth, light, knowledge, seems to be the spontaneous outgushing cry of millions of spirits, just waking to the consciousness of their destiny. There is an earnestness, a universality, in the longing and striving after a better condition, that was never before experienced. There is a casting off of old shackles, a breaking up of old bonds—there are inventions and discoveries in the arts and sciences—reforms in social and political institutions. In the intensity of the strife and heat thus occasioned, there may be an immense amount of gas and steam and dross evolved, from this renovating process, and many may grasp dross instead of the pure ore; yet on the whole there is being eliminated much of truth and progress.

But to be more particular upon this subject, we will refer briefly to educational matters in this country, as an illustration, in which rapid progress has been made.

Although the common school system was partially organized, and its importance thus recognized, in several States, yet the whole was in a languishing condition until about 1820. About this time new interest began to appear—movements were made to increase their efficiency; since which, interest in them has been rapidly increasing—schools have been multiplied, educational societies and institutes organized, papers published, conventions held, better school-houses built, libraries purchased, more competent teachers employed, with more liberal compensations, until the common schools of most of the Northern States have become justly their glory, and an assurance of the perpetuity of their independence. The New England States have a fund of between four and five millions of dollars, the income of which is devoted to educational purposes. New York, New Jersey, Pennsylvania, Ohio, and Wisconsin, have twelve or thirteen millions devoted to like purposes. And the work has but just commenced.

At the beginning of the present century, there were twenty-five colleges in the United States. Since then about a hundred have been added to the list. The grade of scholarship has been rapidly advancing in all of these. Nearly as much Latin and Greek are now required for entering college, as was then required for graduation. Then, our common school studies, such as Arithmetic, Geography and Grammar, formed a part of the college course. Since then there has been added to the list of studies most of the modern sciences, such as Botany, Chemistry, Geology, Mineralogy, &c., together with Modern Languages, and the like. Many of the academies of the present day possess far more apparatus and facilities for illustrating the sciences, together with more ample libraries and more able instructors, than were possessed by most of the colleges thirty or forty years ago.

In 1808, there was established at Andover, Massachusetts, the first Theological Seminary in America. Now there are between forty and fifty. There has been a similar increase in Medical and Law Schools. Between eight and nine thousand theological graduates have gone out to bless the world from these Theological Seminaries. In our various higher institutions of learning, there are gathered at the present time some seventeen or eighteen thousand students, under the instruction of some thirteen hundred teachers. The American Education Society has expended not far from a million of dollars in the education of the ministry.

In regard to academies, we cannot speak so definitely, except in respect to New York. In this State, sixteen years ago, there were some seventy-two academies, with six thousand students. According to the last report of the Regents, there are now one hundred and seventy academies, with twenty-two thousand six hundred students. The academic property is valued at nearly two millions of dollars. As an illustration of the rapid progress in educational matters, we will take an example on a small scale. If we draw a line forty miles each way from where we now write, it would extend over a territory in which, eighteen years ago, there was not a single academy, and perhaps not more than a dozen individuals of this district attending the academies of other places. Now within the same region there are some seven academies, with some fifteen hundred different students in yearly attendance.

And the end is not yet. Humanity has but just begun to wake from its slumbers. The cloud of ignorance just begins to move away from our spiritual vision. There are vast tracts of mind yet untouched by the plough-share of education. There are greater conquests yet to be made in the domain of thought than were ever made by Napoleon or Alexander in the domain of empire. In gaining these conquests, in gaining this supremacy, the coming age is destined to achieve much more than the past age, however brilliant its achievements may have been. The coming age will work from a higher stand-point than the past has done. Many farmers and mechanics are receiving a better preparatory education than the learned professions formerly received. They will tell upon the future. The youth that goes to school only three or four years now, will hold the same relations in the coming age as he that attended only six or eight months did in the past. The parent that now gives his children only a common school education, will find them halting, stumbling, groping through all the great activities of life. They will not have received a fair and equal start in the race with their fellows. Any denomination or people, how much soever it may have done in the past, will have to do more, far more, in the future, in order to keep up with the onward march of the world, and fulfill the obligations they owe to humanity and to God.

"CENTRAL ASSOCIATION MATTERS."

To the Editors of the Sabbath Recorder:—

In the *Recorder* of Nov. 9th is an article under the above caption, the effect of which, I fear, will be to deter the Council therein mentioned, or a part of it, from the prosecution of the duties of their appointment, by causing the Council to believe that the churches of Jefferson County had not complied with the request of the Association. Such an influence I would wish to counteract.

The writers tell us that they were the cause of the action of the Brookfield churches, and are therefore qualified to instruct the Council and the churches what the Association meant to require of the churches in order to promote the proposed settlement. I suppose the Association *said* what it *meant;* nor can I see how the agency of the writers in procuring the interference of the Brookfield churches in this business, qualifies them to become associational interpreters. Their interest in the difficulty in question, I think, disqualifies them for this office, as obviously as it would for the office of Council itself. The churches are willing to have a disinterested Council; but should a Council be composed of those so deeply interested in this difficulty as the writers in question, or should a Council regard them as instructors, the churches would be wise to either abandon the cause entirely, or refuse to commit it. We think the Council, as appointed, disinterested, and hope *they* will decide whether the churches have complied with the request of the Association or not.

The writers make such a statement of the state of affairs in the Adams and Hounsfield churches as suits them, or appears to them correct, and conclude that therefore "there is scarcely a probability of the Committee being of any practical benefit, and the Committee will probably consider their appointment a nullity." Should the churches do as the writers wish them, the appointment of the Council would be a nullity. This, however, would not remove the trouble; it would only change its character, for by so doing the churches would concede the whole ground of defense, and stand self-convicted of the most serious succession of wrongs. For the churches to recognize the evangelical character of the Independent Church, and fellowship them, would be to confess themselves wrong in all their acts towards that body, and guilty of the grave charges they have so long urged and reported against them, and confess themselves unworthy of Christian comity and confidence. They have ever, and now continue to plead *not guilty*. The Association, instigated primarily by the writers referred to and the Independent church, appointed the Council "to investigate and settle the matter." To satisfy the public mind, and put a quietus on the controversy, or restore the Independent members on gospel principles, the churches, having the fullest confidence in the ability and integrity of the Council, have complied with the request of the Association, and agreed to "cöoperate with them in the settlement of the difficulty referred to." So they understand it. The Association could never have asked the churches to come upon the same platform with the Independent church, in order to have the Council act, for this is the very question pending for the Council to decide. I hope, since the writers have, after such unwearied effort, succeeded in having the Council appointed, they will now leave the whole matter to the Council, to manage for themselves, and do nothing to forestall them, or dissuade them from coming. If it would not disturb the quiet of their minds, rather than quiet them, I would just say, they need fear nothing from this Council, for I believe "justice will be done."

The churches here have fallen into a common error. Supposing they had a right to administer their own discipline, they have excluded some from their fellowship; and, as is usual, these are not satisfied. I hope, for the sake of our churches here, as well as elsewhere, the Council will set this troubled question at rest. Let our churches know, as early as possible, that this is all wrong—at least for the Jefferson County churches; and likewise, that minorities are under no obligation to yield to majorities, who are corrupt and oppressive. Let the Council come and say if this is right or wrong. We wait to hear some one speak besides those so deeply interested with the disaffected.

The dissenters are not the people here styled "*malefactors*," nor did they leave it optional with the churches to exclude them or not. Many months before this painful and solemn duty was performed by the church, they were holding separate meetings, and organized themselves into an independent society, while yet members of the Adams church. If, as the writers give notice, excluded church members "are not *less* our brethren than they were before their separation from their respective churches," the act of exclusion should hereafter be unknown among us as a people, and the disowned should receive aid and comfort from this very catholic proclamation of the writers. I hardly think the excluded members of the Brookfield churches are in perfect fellowship with Elders Maxson, Bailey, and Clarke.

I have no disposition to defame the excluded members of the churches—they are of course good or bad, according to what they do. "By their fruits shall ye know them; ye do not gather grapes of thorns, nor figs of thistles." This is a gospel rule. Luther and Tyndall were excluded church members. Abner Kneeland was also an excluded church member. Bad churches exclude their good members, and good churches exclude their bad ones. The business of the Council is to say which character belongs to the church, and propose a plan of restoration for the wrong. It is a simple question of right and wrong, of order and confusion. Let the Council decide it.

The reflection cast upon the delegates of the Adam's Church by the writers, is uncalled for, as the church acted, not upon the report of her delegates in this matter, but upon the Corresponding Secretary's letter, and the associational record, and probably with one eye upon the Constitution of the Association, made to govern and guard all the churches except those of Jefferson County.

It may be that the council will not succeed, but I hope they will try. Possibly they may share the unenviable praise accorded by the writers alike to the churches, the association, and the former council to the Hounsfield and Adams churches. They certainly know now what they must do to secure their praise. Should the council not come, I believe, from extended means of information, the church will now be sadly disappointed. If they come, she will do all she can to facilitate their task, and pray for their success.

I write for myself, and claim no more right to express the sense of the church than I believe the writers have to express that of the Association. • JAS. SUMMERBELL.

LETTER FROM ELD. WM. M. JONES.

JAFFA, Palestine, Oct. 18, 1854.

To the Editor of the Sabbath Recorder:—

Two numbers of the *Recorder*, Sept. 7th and 14th, came to hand to-day. In that of Sept. 14th, appears a short article entitled "THAT VANDALISM," which assails the character (as it is here understood) of Mrs. Minor, and those engaged with her in the work of missions in this vicinity. As to the character of the man named *Jones*, I have nothing to say, except that the account of his doings by Consul Finn seems to be a very hasty and summary way of doing and disposing of the affair. It is here reported that he has not sold any curiosities or relics. Leaving him to make his own defense, if he chooses, I cannot feel it in my heart to be silent in regard to sister Minor. *She is a very humble, patient, persevering, and prudent laborer in the vineyard of the Lord.* I speak thus after a personal acquaintance of five months. Whatever exceptions persons think to find in her past course, her conduct, self-denial, and zeal, since my acquaintance with her, is enough to redeem and place her character above all suspicion. All her receipts and expenditures are known to the contributors to her benevolent work. Oh, how cruel it seems, to see anything from the American press, and especially from our own Sabbatarian press, disparaging to one so innocent and so useful. I can but believe the insertion of the article in the *Recorder* accidental, which I hope has been speedily repaired. What evidence the editor of the *Observer* has, that "the rest of the persons employed in the so-called Agricultural Mission in Palestine," are not entitled to support, I am at a loss to conceive. I must believe that he is filled with prejudice from the very spirit of his article. "*Convinced against his will!*" Verily, he merits a castigation a hundred fold over that invoked by Consul Finn on the head of Mr. Jones. May the Lord rebuke him. Let us bear in mind, dear brother, that sister Minor is engaged in a good Samaritan work, working with her own hands, and sacrificing her own property, home comforts, and exposing her very life, for the sake of the Gospel. Aside from her nearness to us on account of her Sabbath sentiments, we believe, from what our own eyes have seen, that she is entitled to the confidence and support of Christian people of our own or any other country; and without any fear of blame, or of any consequences or judgment upon ourself, from others, we do most unhesitatingly commend her and her household to the warmest and most cordial regards of all Christian people, and of all well wishers to humanity. The publishing of the article referred to, so far as it bears upon sister Minor, is certainly a great grief to us. As a brother in Christ at the head of a valuable and ably-conducted paper, I trust we shall yet see something from you in reparation of the injury. If your mind is prejudiced against the person or persons in question, I would take this opportunity of disabusing it in their favor. The writer of the article must have some envy in his heart, to hold up in so unfavorable light a lone, innocent female, and traduce her character with that of another. May he repent, for as certain as there is a judgment, Jesus will remember what has been done against one of his innocent ones. "Let her alone, for she hath wrought a good work for me," seem to be the whisperings of the still small voice. Although I have not written specially for publication, you are at liberty to publish the whole or a part of the above. It is at your disposal.

Affectionately and truly yours in Christ.
WM. M. JONES.

Since writing the above I have concluded to ask you to publish the foregoing, not a part, but the whole. Yours, W. M. J.

REVIVAL.

PERSIA, Nov. 19, 1854.

To the Editors of the Sabbath Recorder:

Thinking that it would be interesting to the readers of the *Recorder* to hear of revivals in any part of our beloved Zion, or elsewhere throughout the world, I now proceed to state what the Lord has been doing in this section of the country, by the outpouring of his Holy Spirit, in reviving some of his churches, and in the conversion of many precious souls. This work seemed to commence in a protracted effort among the Methodists in the adjoining town to Persia. The work seemed to spread in other directions, and to make its way into the bounds of the Persia Church. Some few having been brought out in religion, the Persia brethren sent for me to come and administer baptism for them, and labor a season with them. I went to visit them; found the church awake in a good degree in the cause of Christ. The brethren here, in connection with the Methodists, commenced a series of meetings, carried on by the Methodist preachers and myself. The work has been powerful. The meetings have been held over two weeks every evening, with a steady increase of the work of divine grace upon the hearts of the people. The work continues to spread; this little church has been generally revived, and backsliders have come home to their father's house again. I have baptized in this church twelve, since I came here, of whom eleven united with the church. There is a prospect of a number more soon. It is thought that since the commencement of this revival there have been about seventy conversions. The work seems now to be spreading, and our meetings still continue. May the Lord revive his work in all of his churches throughout the world. Last Sabbath three united with the church by letter, and one restored, making fifteen added to the church.

H. P. GREEN.

◆

THE DESPOTISM OF SLAVERY.—The editors of Putnam's Monthly *Magazine*, not content to have that work a mere repository of love stories and fashion-plates, have lately taken to discussing some of the social and political questions which are uppermost in the minds of the people. So long as they did this without touching upon the subject of slavery, nobody complained. But in a recent number that vexed question was discussed in a frank and manly way. The consequence is, that the Southern papers are down on the *Magazine*. The following extract from the Richmond (Va.) *Inquirer*, is a specimen of the treatment it receives, and a good illustration of the despotism of slavery:—

"Mr. G. P. Putnam is industriously writing down his Magazine at the South. In the last number, he characterizes Slavery in these words: 'From its very nature it is a despotism of force, of law, and of opinion, combined—partially mitigated in practice by humane personal considerations, but in theory absolute. It is administered, for the most part, by the whip; it is sanctioned by legislation; and it admits of no scrutiny or discussion. All that can be said of it, in the regions where it prevails, even by those most deeply interested in its results, must be said in its favor, on pain of peremptory banishment or assassination.' If all Northern periodicals would speak in this spirit, there would be some hope of a Southern literature. We are glad to learn from the booksellers here, that Putnam is rapidly vanishing from the market. The void should be supplied by the *Southern Quarterly Review*, the ablest periodical in the country."

◆

HEBREW BENEVOLENT SOCIETY.—The 33d anniversary of the Hebrew Benevolent Society was held in New York on the evening of the 22d inst. Several distinguished GENTILES were present who did not scuple to take part with the Jews in making speeches and drinking toasts. Among the toasts was one to the memory of the late Judah Touro, who gave a considerable sum to the benevolent fund of the Society. The Annual Report stated that about two thousand poor and needy Hebrews, from all countries, had been assisted during the past year. The donations made during the anniversary amounted to $3,120.

◆

HISTORICAL SOCIETY.—The New York Historical Society celebrated its fiftieth anniversary on the 20th of November. An oration by George Bancroft, and a dinner at the Astor House, followed by speeches from a number of distinguished sholars, made up the exercises. Mr. Bancroft's oration was an elaborate exposition of the principles of human progress; and though nearly two hours were occupied in its delievery, it was listened to throughout with unabated interest.

STATE OF THINGS IN LIBERIA.—A correspondent of the N. Y. *Tribune*—for whose intelligence and trustworthiness that paper vouches—gives rather an unfavorable account of the condition of things in Liberia. According to him, there is a vast deficiency of resident physicians to meet the pressing necessities of the emigrants hitherto, who have to be acclimated in unhealthy places, and, failing in that process, die off with pestilential rapidity. The Government is pronounced feeble, and the municipal arrangements worthless. For every mouthful of beef the Liberians get, they are dependent on the natives. There is no regular market. Scarcely any of the people in the city work, but nearly all sit down and depend on living by trade with the natives; and thus, while a few with capital grow rich, most of them live only from hand to mouth. The policy, too, with the natives is condemned. The latter neither attend churches nor schools. One teacher with sixty scholars counts not a single native among them. While African education is wholly neglected, fire-arms are liberally sold to the savages, to destroy, if they choose, the settlers. The town is on the seaboard, and there is no road five miles into the interior. The tribes combined could easily destroy the colony. Among the citations of the writer, is the case of the Morgan Dix, which sailed from Baltimore in 1851 with 151 emigrants, and arrived at Bassa all well, so reported in the *African Repository* for December, 1851, and April, 1852. Of the whole number, but nine are living, the rest having died—sacrificed by sending them to such a climate without necessary sanitary arrangements.

◆

A DINNER.—The following proclamation sets an example, which is not likely to be so extensively followed as to become a dangerous precedent:—

He that giveth to the poor lendeth to the Lord. A proclamation by Louis Lewisson. In obedience to the dictates of my belief in the blessings of one all-wise God unto Him who dispenseth liberally unto the poor, therefore, I, Louis Lewisson, of the City of Providence, State of Rhode Island and Providence Plantations, do hereby invite indiscriminately of all religions, all poor people to call on the 30th day of November, 1854, beginning at 7 o'clock in the morning and continuing through the whole day, and receive a good, substantial Thanksgiving Dinner, in front of my prosperous bazaar. And I further invite all the poor people who should happen to be sick to send their neighbors, a few weeks previous to Thanksgiving, to my bazaar, and leave the address of such poor sick people, and I will send them a good, substantial Thanksgiving Dinner, by my own express, to relieve them. And I further invite all my work-people who have ever worked for me since I came to Providence to call on me privately, the day previous, and receive a bountiful supply for a Thanksgiving Dinner. LOUIS LEWISSON.

◆

MEN OF THE RIGHT STAMP.—A writer in the *Baptist Observer* is a little puzzled to know what is the import of this phrase, which has been growing into current use.

"Men of the right stamp. Men of the right stamp. I often hear it said, we want missionaries for this and that destitute association—for this and that destitute field of ministerial labor, but *men of the right stamp* can't he found. Now, what kind of men are the men of the right stamp? Are they such as a brother in a private letter to me described? Says he, 'the man of the right stamp to be a pastor, must have no gray hairs—can show forth a 'high' intellectual 'talent for a very small salary.' He must also possess a good degree of 'a missionary spirit and talent.' And 'to be a first rate pastor, he must take the responsibility of the deacons, and all the church, by doing his own duty and theirs too.'"

◆

THE LIQUOR LAW IN CONNECTICUT.—Judge Williams, of Connecticut, at a recent Temperance Convention in that State, submitted the following resolutions, which were unanimously passed:—

Resolved, That our confidence in the law "For the Suppression of Intemperance," recently passed, remains undiminished, and its effects, as witnessed by us, and as reported to us, furnish fresh wisdom of its provisions, the duty devolving upon us as Christians, and as patriots, to labor for its continuance and enforcement.

Resolved, That to guard against the assault of those who are enemies of this law, it is incumbent upon the friends of temperance, until they can give us a better, to unite in one firm phalanx to aid in carrying the law into effect, by supporting such officers as will faithfully exert themselves in its execution.

◆

THANKSGIVING.—The attempt has been made but without success, to get all of the States of the Union to hold their thanksgiving festival on the same day. This year it was held on the 23d inst. in New Jersey, Pennsylvania, Delaware, Maryland, South Carolina, Georgia, Florida, Louisiana, Wisconsin and California. To-day, Nov. 30th, is thanksgiving day in Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, Vermont, New York, North Carolina, Kentucky, Ohio, Michigan, Indiana, Illinois, and Iowa.

NEW PUBLICATION HOUSE.—Several months ago, a house was purchased in Philadelphia for the use of the General Assembly's Committee of Publication, and its Education and Missionary Associations. The building having been altered and improved to suit the new purpose, was opened with appropriate religious exercises on the 20th inst.

The Committee of Award for the best tract upon "The Scriptural and Political Remedy for the North in the present Crisis on Slavery," not finding among those presented for examination any which they could accept under the terms of the offer, Mr. Thomas Boardman, in view of the fact, renews his offer of the premium of $100 for the best tract on the subject above named, which must be original, not exceed thirty-six pages 12 mo, and be deemed by the judges worthy of publication.

It is stated in the Hartford *Daily Courant*, that the jail in Windham county is to let for a boarding-house! The operation of the new anti-liquor law in Connecticut, it is said, has brought about this result.

RELIGIOUS INTELLIGENCE.

The Baptist Almanac for 1855 states that in 1853 there were in the United States 10,131 Baptist churches, 6,475 ministers, and 808,754 members. These are all regular Baptists. In addition, there are 5,800 Anti-Mission Baptists, 51,775 Free-will Baptists, 2,189 General, 5,351 Seventh-day, 8,000 Tankers, 13,500 Church of God, and 225,000 Reformers. All the New England States are reported to have but 92,008, while Virginia alone has 88,779. The Southern States of Alabama, Georgia, Kentucky, Mississippi, South Carolina, and Tennessee, have 354,975. In the Western States about 75,000 members are reported.

There will be a good sprinkling of clergymen in the Thirty-Fourth Congress. James Meacham, from the First District of Vermont, is a clergyman, and so is Alvah Sabin, from the Third District. Ebenezer Knowlton, from the Third District of Maine, is a Free-Will Baptist preacher. John J. Pearce, elected in the Fifteenth District of Pennsylvania, Robert B. Hall in the First District of Massachusetts, and Mark Trafton, in the Eleventh, are Ministers of the Gospel.

The Rev. Mr. Happer, Macao, China, presents a discouraging aspect of the revolution in progress in that Empire, though threatening to overthrow the Tartar dynasty. He also states that the opium trade has increased from 75,000 chests in 1852 to 100,000 in 1853. The Rev. Mr. Cunningham, of the South Methodist Mission, Shanghae, China, writing independently of the Rev. Mr. Happer, concurs in important respects in the view of the Chinese insurrection.

Rev. J. S. Everett, in remitting to the American Tract Society $1,000 for publications sold in Turkey, says: These are times of war and bloodshed. For the last two days steamers have been constantly bringing down the wounded from the dreadful battle before Sevastopol. Many of those who have fallen—most, indeed—have been supplied with the New Testament; but how opposed the spirit of war to that blessed book!

The French Canadian Missionary Society is doing good service for Christ and souls among our neighbors in French Canada. By the preaching of the Cross, the circulation of Scripture truth, and the Christian training of the young in the Institutes at Pointe Aux Trembles, already more than 800 persons have repudiated the errors and superstitions of Popery, of whom it is believed that a large number have been hopefully converted to Christ.

Intelligence has been received of the death of the Rev. Amos Sutton, D. D., at Cuttack, Aug. 19. He was for thirty years a devoted missionary in India, and was the translator of the Scriptures and other publications in the Orrissa language. In his repeated visits to this country, as well as by his correspondence, he became widely known, and was much beloved.

The receipts of the American Tract Society for the month of October were $26,045, and the grants 6,188,464 pages. The expenditures of the Society, in supporting more than five hundred Colporteurs, and in carrying forward their world-wide operations, are more than $1000 a day, and require large donations from the friends of religious knowledge.

From the fiftieth report of the British and Foreign Bible Society, we learn that the grand total of the receipts of the society, during the past year, was £222,659 5s. 10d.; the number of issues of the year has been 1,367,852 copies of the Bible; and the total issues, since the formation of the society, 27,938,631 copies.

The Catholic Vicar-General of New York, having announced that henceforth the *Freeman's Journal* is to be recognized as the "official paper" of Archbishop Hughes, the editor, in referring to the announcement, intimates that it imposes certain restraints upon him, to which he has hitherto hesitated to submit, but to which he has at length acceded.

A Presbyterian clergyman of Louis Co., Kentucky, states that there are now organized in that State twenty anti-slavery churches, and that there is in that region an increasing demand for anti-slavery preachers.

The Philadelphia *Christian Chronicle* reports revivals in East Kensington, Saltsburgh, Moreland, Mill Creek, and Big Whitby churches, Pennsylvania.

"THE CRAYON."—Under this title, W. J. Stillman and J. Durand propose to publish in New York, commencing the first week in January, 1855, a Weekly Journal devoted to the Graphic Arts, and the Literature related to them. The following is the substance of their prospectus:—

In presenting this new enterprise to the public, the Editors propose to supply a want long felt by those who are interested in Art, of a journal which should advocate its interests—a medium between Art-thinkers and Art-lovers—between those who have studied and desire to instruct, and those who have admired and desire to learn.

In undertaking to fill this vacant field, we promise that with all the power given us, we will endeavor to lead those whom we may influence to the perception of the Highest Beauty, or at least, to the distinguishing the difference between that which *is* beautiful and that which *seems* so; and to prefer that which is true and earnest to that which is only powerful or attractive by display of superficial excellence.

In this work we shall spare no pains to secure the coöperation of the most powerful writers, of whatever country, and particularly that of artists themselves, whose communications possess a practical value the thoughts of mere theorists can never have. Our Foreign Correspondence will be the most complete and valuable we can secure, and will be drawn from all places of interest in an artistic point of view.

Our plan, while it includes essays on all the Representative Arts, will not be limited to the purely instructive development of the Principles of Art, but will be open to its Romance and its Poetic relations, and, incidentally, to the esthetics of Dress, Music, the Drama, and all things wherein Beauty makes daily approach to our unpoetic lives.

Criticism will, in all cases, be placed in the hands of those who, by education as well as by feeling, are qualified to judge in the premises.

THE CRAYON will consist of 16 pages, quarto, printed in handsome type, in three columns, and will be published at $3 per annum, payable in advance.

European News.

We have European news to Nov. 11th.

The news from Sevastopol is to Oct. 29th. There is a report that Fort Constantine and the Quarantine Fort were already razed. This is doubtless an exaggeration. Both those forts were damaged, but not destroyed, by the sea attack, of which we have before had accounts; and that attack, it is expressly stated, had not been renewed. Fort Constantine lies at the mouth of the main bay, on the north side, as the Quarantine Fort lies on the south.

On the evening of the 26th (the day succeeding the engagement at Balaklava, the account of which was received per last steamer) the Russians, 8,000 strong, made a sortie from the town of Sevastopol, as well as from the direction of Balaklava, but were repulsed with great slaughter, one thousand men, it is stated, being left dead upon the field.

The telegraphic dispatches, published in London on the morning of the 7th, state that the town of Sevastopol is a mass of ruins; that the French Chasseurs kill all the artillery-men who show themselves at the embrasures, and that during all the nights showers of balls were poured into the forts, leaving the enemy no possibility of repairing disasters.

The Russian fleet had sought shelter under the buildings alongside the quays, but the allies were about to fire upon them from new batteries with red hot balls.

It is stated that the French have lost 200 men by explosions, &c., while the English loss is under 100 killed and wounded.

As both the British and French forces have been much cut up by disease and losses in engagements, reinforcements are urgently called for, both from England and France, and they are forthcoming. During the past two weeks about 4,000 men have been sent out from England, including among them detachments of regiments which recently left Canada.

It appears very doubtful, after all, whether Austria and Prussia will not have recourse to the bloody arbitrament of arms in the kingdom of Poland. Russia has gathered 200,000 men facing the Austrian frontier, while Austria has embattled along her frontier from Cracow to the Danube 200,000 men, and 25,000 in the Principalities. Both sides show great activity.

A very important piece of intelligence, if true, is that the Prussian Embassador at St. Petersburg has been refused an audience by the Czar.

In Asia, the Russian Gen. Nicholas is reported to have beaten Shamyl, but to what extent is not stated.

The report that Mr. Soulé has been allowed by Napoleon to enter France is confirmed.

Later and Important.

The steamer Baltic, with European dates to Nov. 15th, arrived at New York on the 26th.

From the seat of war in the Crimea, the news is such as to create in England a feeling of anxiety and even of alarm. It is now confessed on all hands, that there is no such superiority as has been claimed on the part of the allied armies over their antagonists; that Sevastopol is stronger, Menchikoff an abler General, and his army far more formidable, than was supposed; and that instead of certain and decisive victory, the French and English now stand exposed to possible failure and disgrace. This feeling is manifested by the very energetic action of both the French and English Governments. Desperate efforts are making to hurry reënforcements to Sevastopol; the United Kingdom is drained of its last soldier; many steamships are taken up as transports; and 50,000 French troops are sent forward, all in the hope of arriving at the scene of action before it shall be too late to take part in the final, decisive struggle.

The particulars are received of the charge of cavalry on the 26th of October, by which such sad havoc was made. It seems that the charge lasted but fifteen minutes, and that only 198 out of 607 returned from it.

On the 5th of November, the Russians attacked the right of the English position before Sevastopol; the struggle lasted all day; and the Russians were repulsed with great loss. English accounts say with the loss of 8000 or 9000 men. At the same time, Gen. Forey was forced to repulse a sortie made by the garrison, and, under his energetic command, the enemy were driven back into the place, with a loss of 1,000 killed and wounded.

The Russian account of this affair is very different. A telegraphic dispatch from St. Petersburg, dated November 12, states that Prince Menchikoff reports to the Emperor, under date the 6th November, from Sevastopol, that on the 5th the garrison made two sorties—one against the right flank, which was successful, and resulted in the capture of one of the enemy's batteries, the guns in which were spiked. There was great loss on both sides. The second sortie was also completely successful; the Russians having spiked fifteen guns. Immediately afterward a French infantry division pursuing the retiring Russians attempted to mount to the assault, but was thrown back with immense loss.

Another Railroad Accident.

A terrible collision occurred on the Harlem Railroad, at the corner of Fifty-eighth-st., early Wednesday morning, Nov. 22d, between a passenger train from White Plains and a freight train from New Haven, the former staving in the rear cars of the freight train, and breaking the legs or otherwise severely injuring about twenty passengers in the train from White Plains. Mr. Charles Stevens, of the Post-Office, who got into the train at Harlem, makes the following statement:—

At Harlem I got into the first passenger car, which was next to the engine, there being no baggage car attached to the train; I took the first seat in the car, and in doing so dispossessed a little boy from Morrisania, whom I took upon my knee. The morning was dark and foggy, day only just beginning to creep up, when I was startled by a sharp whistle from our locomotive; Mr. Cummings, the conductor, on hearing the signal, darted to the brakes and gave just three sharp turns when the two trains came in contact, and instantly the tender came flying through our car, and the next thing I knew I was in the center of the car, among a heap of men and boys, the seats and timbers, and a myriad fragments of the wreck flying in every direction around us. The little boy who sat upon my knee, and a man who sat beside me, both had their legs broken, but I escaped unhurt. I broke a hole through the window and leaped out. I found that our locomotive had run into the rear of the New Haven freight train, and crushed the front car all to pieces, and the rear cars were badly smashed. The people who were not injured, with the assistance of the residents in the vicinity, soon got all of the people out. Cummings, the conductor, and one of the best men on the road, had his legs badly broken; and a number of others were dangerously injured, their legs being broken, and suffering severe wounds and contusions from the flying splinters, and the violent concussion. I believe that, with two exceptions, the parties whose legs were broken were standing upon the platforms of the cars at the time of the smash-up.

Another Collision at Sea.

On Friday evening, Nov. 24th, near Boston, the steamship Canada came in collision with the steamer Ocean, bound from Boston to Hallowell, Me. The Ocean took fire from her stoves being capsized, and afterward one of her boilers exploded. Several lives were lost. The Captain of the Ocean has published an account of the collision, from which we take the following:—

Finding that the Canada was fast coming upon us, and must soon strike us, we hailed her as loud as possible, calling upon them to put their helm hard to port. The lights of the Canada were displayed, but on she came, and those of the crew and passengers who were aware of the perilous condition we were in, manifested the greatest consternation. The Canada seemed to stop a moment before the collision, or at any rate to lessen her speed. I was in the wheel-house with the pilots, and my mate was probably below, when the shock took place; it was indeed awful; the bows of the British steamer struck us just abaft the larboard wheel, cutting a fearful chasm in our side and admitting the water in torrents. I immediately ran below to ascertain the extent of the damage, and to my utter horror perceived that the steamer was sinking, and that she was on fire. I hurried upon deck to give the necessary directions, when the most appalling spectacle met my eyes. Men, women and children were running in all directions, shrieking for aid, and many threw themselves into the sea.

The flames had in a few moments made such a fearful headway, that there was no hope or possibility of checking their progress; and as every thing was dry and combustible, the fire spread with alarming rapidity all over the deck; The flames burning the rigging, interior of the boat, drapery, every thing in fine was a sheet of fire—all but a portion of the deck forward. I saw the perilous condition, and endeavored, to the extent of my ability, to restore and preserve order, and with reasonable success; I ordered the passengers all forward, as that was the only point of safety, and ordered the boats to be lowered instantly, with a view of saving the passengers and crew.

I endeavored to assist the women into the boats first, but in some cases the flames prevented for a few moments, but all who remained, not having leaped overboard, were taken off. I got the starboard life-boat down with great difficulty, but the wooden cover fell upon me, severely bruising my leg and side; I got as many people on board as I possibly could, but in doing so, it was with difficulty that I could keep the boat alongside, for some of those first in, being apprehensive that we were overcrowding it, attempted to shove off, but I retained my hold to the utmost of my strength, having my coat torn off in the attempt. Finally, when as many as could with safety go in the boat were on board, it left us. I jumped into another boat, and we exerted ourselves to the utmost in picking up the poor beings who were struggling in the water. We filled our boat, and put them safely on board a steamer, then returned and resumed our work of picking up others; this we continued till our boat had been filled three times.

All this time the other boats were as busy as our own in picking up persons from the water, and when we had filled our boat for the third time, there was not another human being to be seen; we believed that all had been thus rescued who had not been drowned in leaping overboard at first, and then got on board the Forest City. I believe that the three dead bodies taken up are all who have perished, but it is impossible at this time to say with any degree of certainty.

MORE ASTEROIDS.—A Boston paper says that a letter was recently received by the Director of the Observatory at Cambridge, from M. Leverrier, one of the distinguished *indicators* of the planet Neptune, that on the night of the 28th October two additional asteroids were discovered in Paris by MM. Goldschmidt and Chacornac, for which the names of Pomona and Polymnia have been proposed. These new asteroids are the 32d and 33d now known to exist between Mars and Jupiter, and as 29 of them have been discovered within the last ten years, the whole number of them is perhaps many times greater.

Mr. P. Maxwell, Bank Commissioner of Illinois, publishes a card, stating that every bank of that State under the general banking law, has deposited with the Auditor, in the hand of the Treasurer, good interest paying bonds of the several States, to the full amount of every dollar of its own bills; and all registered money is equally secured, one bank with another. Those that have closed their doors have in no way depreciated the security for their bills;—they are of their full value now—but cannot command specie until the Auditor disposes of their bonds or securities according to law, which is required to be done immediately, at which time due notice will be given and the bills redeemed in specie. No sacrifice should be made on Illinois bank bills whatsoever—not even suspended banks.

Mr. R. A. Witthaus, President of the German Emigrant Society, who has been indefatigable in procuring relief for the poor emigrants wrecked in the New Era on Deal Beach, N. J., acknowledges the receipt of $6,400 from various individuals. He says that, with this sum, 115 of the poor people were relieved with clothing and money to the amount of $40 each. There are still remaining some 25 other passengers, to whose relief the residue of the sum collected will be applied.

SUMMARY.

The Central Ohio railroad has been completed, and the event was duly celebrated at Cincinnati on the evening of Nov. 16th. The officers and delegation of the road, and delegations from Baltimore and Wheeling, were received in Cincinnati and escorted to the Burnet House, where a splendid supper was prepared for them. A large number of the citizens of the last named city were present. Numerous speeches were made, and every-thing passed it off to the satisfaction of all concerned. This road unites the cities of Baltimore and Cincinnati, bringing them within a few hours' distance of each other. It passes through Wheeling, Va., Zanesville and Columbus, Ohio.

A trial was recently held in Indiana, which involved important rights of colored persons. In the case of Obadiah Buckner vs. The Jeffersonville Railroad Company, Judge Bicknell, of the Clark County Circuit, decided that the by-law of said Company, requiring colored persons to produce evidence of their freedom before traveling on their road, is a reasonable one, and that the plaintiff, Buckner, should have complied with it—thus reversing the judgment of a Justice of the Peace, who awarded $20 damages to the plaintiff in consequence of the refusal of the Company to convey him on their cars.

A sad accident occurred on the line of the Flemington Railroad last week, by which several men were very seriously injured, one of whom has since died; and another, who was taken to the Philadelphia Hospital, had his leg so badly crushed that it was thought it would have to be amputated. They were engaged in building a bridge, when the wind blew some heavy timbers that had not been secured off the top of this high structure, and they fell with a tremendous force upon a number of the carpenters at work below.

The propeller Bucephalus, Captain Alexander, bound from Chicago to Buffalo, sunk in Saginaw Bay, during a heavy gale. She lost her rudder, became entirely unmanageable, was beat to pieces in the gale, swamped, and sunk. The crew took to the boats, and the larboard quarter-boat, containing eight men, immediately capsized, and all in it were drowned. The small life-boat, which contained the captain and six others, when near the shore, capsized in the surf, and two of the number were drowned.

J. G. Kohl, the celebrated traveler, has been for several weeks in this country, and proposes to make a thorough examination of all sections of the Union, of course with the design of writing a book. M. Kohl is a German, born in Dresden. He has traveled in all parts of Europe, presenting his observations from time to time, in volumes which have been unusually popular, running large editions through nearly all the continental languages.

We noticed the other day at Savery's dining-room, Beekman-st., N. Y., the half of a small cheese-pumpkin, which was entirely sound, but on cutting it open, the cavity was found to be full of sprouts and green leaves, from a dozen or more seeds which had vegetated. The sprouting of the seeds is quite a phenomenon, but it is a still greater one how the leaves obtained the green color without light, except what penetrated the sides of the pumpkin.

On Sunday evening last, (says the Cincinnati *Commercial* of Nov. 17th,) a colored woman, named Jane Moore, of this city, was called to her door, knocked down, placed in a carriage, and lodged in jail in Covington, on the pretense that she was a fugitive slave, owned in Maysville, Ky. The woman was taken by some of her friends before Mayor Foley, of Covington, and her freedom established.

A Cincinnati paper of Nov. 17th says:—One night last week, several men from Kentucky, guided and aided by an Ohioan, kidnapped a young negress near Georgetown, Ohio, and conveyed her to Maysville, where they kept her concealed for two days, when she made her escape, and gave information which led to the arrest of three brothers, named Henry, Lewis, and Allen Young, who were committed to jail to await trial.

From the Report of the Association for Bettering the Condition of the New York Poor, we learn that during the past year, the Association has brought many vagrant children into public and Sabbath-schools; it has relieved 5,977 families, and 26,896 persons, and made 28,142 visits. The increase of relief upon the previous year is 9 per cent.; the increase of receipts is $4,000.

An Indian Council is to be held at the North Fork of Canadian on the first Monday in December, on the invitation of the Cherokees. The Choctaws, Chickasaws, Creeks, and Seminoles, are expected to be present, and the object of the Convention is to protest against the bill introduced by Senator Johnson, at the last session of Congress, to create the Territories of Cha-lo-kee, Cha-ta, and Mus-co-gee.

A dispatch dated Utica, Saturday, Nov. 25, 1854, says: The Globe Mills Cotton Manufactory, of this City, was sold to-day at auction for $40,000, and was bought in by J. C. Bailey, Esq, formerly one of its directors. These mills were built five years ago at a cost of $100,000. We understand that a new company is to be formed, for the purpose of carrying them on.

Mr. DeCueto, the Spanish Minister, was seriously injured by the running away of a pair of spirited horses, at Washington, on Thursday last, Nov. 23. The injury is supposed to be an internal one in the head. On Friday, a considerable quantity of blood was taken from his head with leeches. He had previously bled considerably from the ears.

The *Oregonian* states that T. G. Robinson returned recently from a visit to the east fork of Lewis river. Mr. R. has brought with him some fine specimens of gold, which he obtained by pan-washing, only one day's ride, from Vancouver. Quite a number of miners are at work, many making from $2 to $3 per day.

A new invention, or rather application of a small padlock, with the owner's name engraved thereon, has been contrived, which can be affixed to an umbrella in such a way that it cannot be taken off, nor the umbrella opened.

We learn from Indiana, that the bank-note excitement is subsiding. The Auditor is canceling about $50,000 per day, giving State Bonds for them, and the aggregate circulation of the free banks is reduced below four millions.

A very important decision was made in the Superior Court, New York, last week, by Judge Hoffman, in the case of Ketchum, Rogers & Bement, vs. the Bank of Commerce. The Court decided, in effect, that the New Haven Railroad Co. are responsible for the stock over-issued by Schuyler; that the fraudulent stock was just as valuable as the genuine stock.

The Erie Railroad last week brought to this City ten thousand seven hundred and forty-three live hogs. These are butchered in this city, the hams cured for retail here, and the lard and portions of the fat meat are rendered, and heads, feet and ribs, back-bones and livers, are sold to eat fresh. Lean parts, including a good many of the shoulders, are cut into sausage meat.

The Cleveland *Leader* says that there is to be a grand Railroad Convention in that city on the 28th Nov. The four great Eastern Railroads will be represented, namely: The New York and Erie, the New York Central, the Pennsylvania Central, and the Baltimore and Ohio. The object of the meeting is to talk about increased tariffs and fewer dead-heads.

On Monday morning, Nov. 20th, the spacious structure on Broadway, near Bowling Green, New York, known as Judson's Hotel, was entirely destroyed by fire. The hotel was pretty well filled with guests and boarders, nearly all of whom lost thier baggage and other valuables. The total loss is estimated at about $80,000. As far as it is known, all the occupants escaped.

The City Inspector reports but 356 deaths in New York last week, the smallest number since March. Of these, 204 were under 10; 45 died from consumption, 2 of cholera, 29 of convulsions, 7 of bronchitis, 17 of inflammation of the lungs, 10 of diarrhea, 10 of dysentery, 8 of congestion of the brain, 14 of scarlet fever, 13 of marasmus, and 30 of dropsical complaints.

On Friday night, Nov. 18th, there men robbed the Windham Co. Bank, Ct., of $22,000, seven thousand in specie, and the balance in bills. The next night they were arrested just as they were going aboard the steamboat at Allyn's Point, and $20,000 of the money was recovered.

A riot occurred in Williamsburg on election day, which resulted in the death of two men. The case has been examined by the Coroner, three men indicted as principals in the murder, and more than twenty others as accessories.

The last mail from California brings intelligence that the Supreme Court of that State has decided that the Chinese fall under the meaning of a clause of the Constitution of California, which says that no black or mulatto persons shall be allowed to give evidence in favor of or against a white person.

One week later news from California, and over $1,500,000 in gold, was received in New York, by the steamer George Law, on the 24th inst. The news is of little interest.

New York Markets—November 27, 1854.

Ashes—Pearls 6 31 a 6 44; Pots 6 75 a 6 87.

Flour and Meal—Flour 8 37 a 8 75 for common to good State, 8 87 a 9 37 for Michigan, Indiana, and Ohio, 10 75 a 11 62 for extra Genesee. Rye Flour 6 75 a 7 50. Corn Meal 4 62 a 4 87. Buckwheat Flour 4 12 a 4 37.

Grain—Wheat is held so much above the views o shippers, that there are few transactions; a lot of white Michigan brought 2 31. Rye 1 35. Barley 1 32 a 1 40. Oats 52 a 59c. for State and Western. Corn 93 a 94c. for Western mixed.

Provisions—Pork 11 37 for prime, 12 50 for mess. Beef 5 50 a 7 00 for country prime, 8 00 a 10 50 for country mess. Dressed Hogs 6 a 6½c. Lard 9½ a 9¾c. for new Western. Butter 12 a 20c. for Ohio, 20 a 24c. for State. Cheese 10 a 11c.

Lumber—17 00 for Eastern Spruce and Pine.

LETTERS.

N V Hull, Rowse Babcock, S S Griswold, L Jones, C R Burdick, James Hubbard, A A Crandall, E C Hydorn, Varnum Hull, J L Spencer, S Cookman, David Coon, Wm G Quibell, L M Cottrell, D C Green, Wm F Randolph, L G Maxson, H P Green.

WILLIAM M. ROGERS, Treasurer.

Proclamation,

By Horatio Seymour, Governor of the State of New York.

An acknowledgement of our dependence upon God, and of our obligations to him, is at all times the duty of a Christian people. But when the Almighty has again crowned the year with his goodness, and we are enjoying the gathered fruits of his bounty, it is eminently fitting that we should offer the sacrifice of praise and thanksgiving.

I therefore appoint Thursday, the 30th day of November, for this appropriate service; and invite the citizens of the State to assemble on that day, in their respective places of worship, to present their acknowledgments to the Parent of the Universe for his multiplied mercies. And with our thanksgiving let us mingle prayers for a continuance of the numberless blessings we, as a people, enjoy, remembering that his wisdom alone can rightly direct, his power support, and his goodness give strength and security.

In witness whereof I have hereunto subscribed my name and affixed the privy seal of the State at [L. S.] the city of Albany, this tenth day of November, one thousand eight hundred and fifty four.

HORATIO SEYMOUR.

By the Governor: H. W. De Puy, Private Secretary.

MARRIED.

At Lost Creek, Va., Oct. 20th, by Eld. Sam'l Davis, Deacon WILLIAM KENEDAY to Miss BELINDY DAVIS, of Lost Creek.

In Greenmanville, Nov. 8th, by Eld. S. S. Griswold, WILLIAM A. CRUMB, of Groton, to MARY J. GARSIDE, of Stonington.

Nov. 16, by Eld. V. Hull, Mr. HORATIO W. MAXSON, of Dane Co., Wis., to Miss SARAH C. CARR, of Milton, Rock Co., Wis.

In this City, on Sunday evening, Nov. 19, by Rev. Mr. Hiscox, Mr. EDMUND STILLMAN to Miss ELIZA D. BURDICK, both of Westerly, R. I.

In Crossingville, Pa., Nov. 18th, by Eld. A. A. F. Randolph, Mr. T. BRANETT, of Alfred, N. Y., to Miss E. B. STELLE, daughter of Deacon Stelle, of the first-named place.

DIED.

In Fayette Co., Pa., September 22, 1854, MARIA E. DAVID, in the 45th year of her age, after suffering more than one year of scrofula. About a week before her death, she said she had given up all the things of this world, and that she had a strong hope that her soul would be received in heaven. Before she died, her friends thought she was gone, but she revived, and said that the Lord had received her soul, that she was willing to go, and felt no more pain. She has left an aged father, and a large circle of relatives, to lament her loss, which is, however, greatly relieved by a very satisfactory evidence that she sleeps in Jesus.

In Milton, Rock Co., Wis., September 24th, of inflammation of the bowels, CARRIE HELEN, only daughter of Orbenzer and Esther Allen, aged 2 months and 6 days.

Ere sin could blight or sorrow fade,
Death timely came, with friendly care,
The opening flower to heaven conveyed,
And bade it bloom forever there. A. E. A.

In Harmony, Rock Co., Wis., Oct. 28th, 1851, WILLET N. MAXSON, aged 44 years, 5 months, and 5 days. Bro. Maxson died in strong expectation of a blessed immortality beyond the grave, giving glory to God for the hope of the gospel.

V. H.

In Johnstown, Rock Co., Wis., Nov. 11, 1854, D. F. N. WILLIAMS, only son of Eveline and Hiram Williams, aged 11 months.

In New York, on Friday morning, Nov. 24th, LYDIA K., wife of Alanson Pratt, aged 27 years.

Quarterly Meeting.

THE next quarterly meeting of the Seventh-day Baptist Churches in Rhode Island and Connecticut will be held with the Church in Waterford, Ct., commencing on Sixth-day evening, Dec. 1st, 1854, at 6½ o'clock, and continuing through Sabbath day and Sunday. Opening discourse by Eld. O. M. Lewis.

P. L. BERRY, Committee.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had.

E. R. CLARKE, Sec. of Board.

Saddler and Harness-Maker Wanted.

THE subscriber wishes to employ a journeyman saddler and harness-maker; also, a boy desirous of learning the trade. Those who keep the Sabbath would be preferred.

P. L. BERRY,
New London, Ct.

23-3t

Mountain Glen Water Cure and Summer Retreat,

For the Reception of Patients and Boarders,

PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M., connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.

Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M.

JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.

Dunkirk Express at 7 A. M. for Dunkirk.

Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.

Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.

Way Passenger at 4 P. M. for Otisville and intermediate stations.

Night Express at 5 P. M. for Dunkirk and Buffalo.

Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7 00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.

9.00 A M—Mail Train. Through Way Train, 12 M.

4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.

For Peekskill at 3, 4 and 5.30 P M.

For Tarrytown at 1 and 8 P M.

The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.

Passengers taken at Chambers, Canal, Christopher, 14th and 31st-sts.

SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Miscellaneous.

How Statues are Made—The Greek Slave.

George H. Calvert, through the *Literary World,* gives the following interesting account of the process of manufacturing statues, in a notice of Powers' "Greek Slave:"—

The Greek Slave is the second ideal work of the American sculptor, Hiram Powers—the Eve being his first. The clay model was begun and finished in the summer and autumn of 1842. American sculptors having been hitherto obliged to work abroad, but few of our citizens have had opportunities of witnessing the labors of the studio; acceptable, therefore, will be some explanation of the several processes through which a work in sculpture must pass, ere the artist can present his conception smoothly embodied in marble. The visitors to the 'Slave' will thus be made acquainted with the bodily birth and growth of the wonderful creation that stands before them in dazzling beauty.

The conception being matured in the artist's mind, the first step in the process of giving form to it, is to erect, on a firm pedestal, a skeleton of iron, whose height, breadth, and limbs, are determined by the size and shape of the proposed statue. In this case it would be above five feet high, with branches, first at the shoulders, running down forward for the arms, then at the hips, to support the large mass of clay in the trunk, and thence divided in two for the legs. About this strong simple frame is now roughly built, with wet clay, the pre-determined image. Rapidly is this moulded into an approximation to the human form; and when the trunk, head, and limbs have been definitely shaped, then begins the close labor of the mind. The living models are summoned, and by their aid the surface is wrought to its last stage of finish. With these breathing figures before him, and through his precise knowledge of the form and expression of every part of the human body, obtained from the study of nature and his own deep artistic intuitions, the clay under his hand gradually grew into life, as it assumed the elastic, vital look, which no mere anatomical knowledge or craft can give, but which is imparted by the genial sympathy with nature's living forms in alliance with a warm sensibility to the beautiful, qualities which crown and render effectual the other less elevated endowments for art. Thus, by the most minute manual labor, directed by those high and refined mental gifts, the clay model of the 'Slave' was wrought out; and here the artist's work ended; the creation was complete. The processes whereby it was now to be transferred to marble, though of a delicate, difficult kind, and requiring labor and time, are purely mechanical, and are performed, under the artist's direction, by uninspired hands.

In order that the soft clay image be transformed into a harder substance without suffering the slightest change in its surface, a mould is applied to it, in the same way and with the same material as when a cast is taken of the living face or head, by means of semi-liquid plaster of Paris. The clay figure is entirely covered with this substance from one to two or more inches thick, provision being made for taking off the arms and for splitting the trunk after the plaster shall have hardened. The clay is then all taken out, the hollow mould is cleaned, and then refilled with semi-liquid plaster of Paris. When this, which now occupies entirely and minutely the place of the clay, has in its turn become hardened, the outside crust of plaster is broken from it, and then is laid bare an exact fac simile of the original clay figure in hard, smooth plaster of Paris, capable of bearing the usage of the studio, and of receiving the many marks that are to guide the marble-cutters, whose work now begins.

First comes the blocker-out, with his heavy mallet and coarse chisel, under whose rough blows the white block soon begins to grow into a rude likeness of humanity. Then a finer workman, who loosens more of the folds that overlay the beaming image that the artist is bent on disclosing from the centre of the marble. And, finally, the artist himself, or, as in this case, a refined-worker, schooled under the eye of Powers, gives the finishing touches, reproducing, with unsurpassed accuracy, in the transparent, pure marble, every swell and indentation, and minutest curve, all the countless delicacies of detail, the which, combined with and forming grand sweeping lines, characterize the original as moulded in clay by the hand of Powers.

Steam Farming.

If it is pleasant to see that this wonder-working power can bring landlords and mill-owners into social intercourse, honorable to both sides, it is not less remarkable, that it bids fair ere long to merge the two great classes in the one class of manufacturers. In one aspect it is exalting the present manufacturers to a level with the lords of the soil; in the other it is converting the landlords themselves into master manufacturers, and their farms into manufactories. The day after Mr. Salt's princely *fete,* Mr. Mechi was the invited guest of the Herts Agricultural Association. An earl, and a baron, and so forth, were assembled, in expectation of the speech of the day from a London tradesman; one who had made an irruption from the counter, (with wealth amassed there,) into the broad acres of the territorial aristocracy. Nor did the guest disappoint the nobility and squires who had invited him, and invited him evidently to stimulate their own tenants. He dealt out wholesome suggestions to landlords with large estates, complaining of want of capital to improve, honestly advising them to sell part of their land, and improve the rest with the money. He rebuked tenants, who, clinging to the old ways, grudged the landlord a fair interest for the money he had laid out; but the burden of his speech was steam.

The amount of steam power in any agricultural district he took as the test of its condition. People thought him crazy when he first put up a steam engine; but now, two makers in the village had more than they could do to supply the neighborhood fast enough. Lincolnshire and Norfolk farmers have, some of them, one, two, and even three engines on a farm! Herts had but made a beginning; he was sure they would soon get deeper into it. But the grand agricultural achievement of steam is yet to come. Its advent is nigh. Mr. Mechi is now building an engine at a cost of £200, which is to plough the land, and do almost everything besides. A Canadian engineer, neglected in his own province, is working at Tiptree, under Mr. Mechi's patronage. Soon the implement is to be ready which is to revolutionize British agriculture, to enable farmers to plough twelve inches deep, instead of five inches, and to benefit agriculture to the tune of ten millions of pounds per annum! What are all the Budgets of rival Chancellors of the Exchequer to this? His guests, the gentlemen of the top boots and gaiters at least, were withheld, either by utter blank astonishment, or by not having heard so much Latin, from exclaiming Credat Judaus Apella! However, the sober truth remains, that we have now farms in which steam does all the fixed machinery work—that such farms are increasing in number, and that machinery of every kind is so rapidly extending, that the farm is fast assimilating to the manufactory; and that the farmer and his laborers bid fair, in another generation, to equal in intelligence their brethren of the town. [English Paper.

Scene in the Life of a Slaver.

In looking over Brantz Mayer's work, entitled "Capt. Canot, or Twenty Years of an African Slaver," we find (says the *Watchman and Reflector,*) that the adventurous Italian sailed from Havana on his first voyage to the coast on the 2d of September, 1826. The schooner was commanded by a Minorean, and the crew was composed of twenty-one scamps—the refuse of the press-gang and jail-birds—Spaniards, Portuguese, Frenchmen, and mongrels. Of this motley crowd Canot was third officer. After various fortunes they reached the mouth of the Rio Ponga, and the captain and four of the crew went ashore for a pilot, but did not return. In the evening Canot learned that an attempt had been made to shoot the captain by those who accompanied him, and that a conspiracy had been formed among the crew to seize the schooner. Having ascertained that the armory had been forced, and several pistols and cutlasses abstracted, he took measures to counteract their plans. The following extract will show how he succeeded:

"Preparations had undoubtedly been made to assassinate us. As night drew on, my judgment, as well as *nervousness,* convinced me that the darkness would not pass without a murderous attempt. There was an unusual silence. On reaching port, there is commonly fun and merriment among crews; but the usual song and the invariable guitar were omitted from the evening's entertainment. I searched the deck carefully, yet but two mariners were found above the hatches, apparently asleep. Inasmuch as I was only a subordinate officer, I could not command, nor had I any confidence in the nerve or judgment of the chief-mate, if I trusted my information to him. Still I deemed it a duty to tell him the story, as well as my discovery about the missing arms. Accordingly, I called the first officer, boatswain and cook, as quietly as possible, into the cabin; leaving our English cabin-boy to watch in the companion-way. Here I imparted our danger, and asked their assistance *in striking the first blow.* My plan was to secure the crew and give them battle. The mate, as I expected, shrank like a girl, declining any step till the captain returned. The cook and boatswain, however, silently approved my movements; so that we counseled our cowardly comrade to remain below, while we assumed the responsibility and risk of the enterprise.

I may have been rather rash, but I resolved to begin the rescue by shooting down like a dog, and without a word, the notorious Cuban convict who had attempted the captain's life. This, I thought, would strike panic into the mutineers—and end the mutiny in the most bloodless way. Drawing a pair of large horse-pistols from beneath the captain's pillow, and examining the load, I ordered the cook and boatswain to follow me to the deck. But the craven officer would not quit his hold on my person. He besought me not to commit murder. He clung to me with the panting fear and grasp of a woman. He begged me, with every term of endearment, to desist; and, in the midst of the scuffle to shake him off, one of the pistols accidentally exploded. A moment after, my vigilant watch-boy screamed from the starboard a warning "look out," and, peering forward in the blinding darkness as I emerged from the lighted cabin, I beheld the stalwart form of the ringleader brandishing a cutlass within a stride of me. I aimed and fired. We both fell; the mutineer with two balls in his abdomen, and I from the recoil of an over-charged pistol.

My face was cut, and my eye injured by the concussion; but as neither combatant was deprived of consciousness, in a moment we were both on our feet. The Spanish felon, however, pressed his hand on his bowels, and rushed forward, exclaiming he was slain; but, in his descent to the forecastle he was stabbed in the shoulder with a bayonet by the boatswain, whose vigorous blow drove the weapon with such tremendous force that it could hardly be withdrawn from the scoundrel's carcass.

I said I was up in a minute, and, feeling my face with my hand, I perceived a quantity of blood on my cheek, around which I hastily tied a handkerchief below my eyes. I then rushed to the arm-chest. At that moment the crack of a pistol, and a sharp, boyish cry, told me that my pet was wounded beside me. I laid him behind the hatchway and returned to the charge. By this time I was blind with rage, and fought, it seems, like a *madman.* I confess that I have no personal recollection whatever of the following events, and only learned them from the subsequent report of the cook and boatswain.

I stood, they said, over the arm-chest like one spell-bound. My eyes were fixed on the forecastle; and as head after head loomed out of the darkness above the hatch, I discharged carbine after carbine at the mark. Everything that moved fell by my aim. As I fired the weapons, I flung them away to grasp fresh ones; and, when the battle was over, the cook aroused me from my mad stupor, still groping wildly for arms in the emptied chest.

As the smoke cleared off, the fore part of our schooner seemed utterly deserted; yet we found two men dead, one in mortal agony on the deck, while the ringleader and colleague were gasping in the forecastle. Six pistols had been fired against us from forward, but, strange to say, the only efficient ball was the one that struck my English boy's leg.

When I came to my senses, my first question was for the gallant boatswain, who, being unarmed on the forecastle when the unexpected discharge took place, and seeing no chance of escape from my murderous carbines, took refuge over the bows.

Our cabin-boy was soon quieted. The mutineers needed but little care for their helpless wounds, while the felon chief, like all such wretches, died in an agony of despicable fear, shrieking for pardon. My shriving of his sins was a speedy rite!

Such was my *first* night in Africa.

From the Scientific American.

The Magnet and Cold.

History informs us that many of the countries of Europe, which now possess very mild winters, at one time experienced severe cold during this season of the year. The Tiber at Rome was often frozen over, and snow at one time lay for forty days in that city. The Euxine Sea was frozen over every winter during the time of Ovid, and the rivers Rhine and Rhone used to be frozen so deep that the ice sustained loaded wagons. The waters of the Tiber, Rhine and Rhone, now flow freely every winter, ice is unknown at Rome, and the waves of the Euxine dash their wintry foam uncrystalized upon the rocks.

Some have ascribed these climate changes to agriculture—the cutting down of dense forests, the exposure of the upturned soil to the summer sun, and the draining of the great marshes. We do not believe that such great changes could have been produced in the climate of any country by agriculture, and we are certain that no such theory can account for the contrary change of climate—from warm to cold winters—which history tells us has taken place in other countries than those named. Greenland received its name from the emerald herbage which clothed its valleys and mountains; and its east coast, which is now inaccessible on account of the perpetual ice heaped upon its shores, was, in the eleventh century, the seat of flourishing Scandinavian colonies, all trace of which is now lost. Cold Labrador was named Vinland by the Northmen who visited it in the year 1000, and who were charmed with its then mild climate. The cause of these changes is an important inquiry.

A pamphlet by John Murray, civil engineer, has recently been published in London, in which he endeavors to account for these great changes of climate by the changeable position of the magnetic poles. The magnetic variation or declination of the needle is well known. At the present time it amounts in London to about twenty-three degrees west of north, while in 1659 the line of variation passed through England, and then moved gradually west until 1816. In that year a great removal of ice took place on the coast of Greenland; hence it is inferred that the cold meridian, which is now supposed to pass through Canada and Siberia, may at one time have passed through Italy; and that if the magnetic meridian returns, as it is now doing, to its old lines in Europe, Rome may once more see her Tiber frozen over, and the merry Rhinelander drive his team on the ice of the classic river.

Whether the changes of climate mentioned have been caused by the change of the magnetic meridian or not, we have too few facts before us, at present, to decide conclusively; but the idea, once spread abroad, will soon lead to such investigation as will no doubt remove every obscurity, and settle the question.

Armament of a Ship-of-War—The Montebello.

The journal *France Maritime,* has treated with much ability all the scientific as well as practical questions connected with the fitting of ships of war for sea, and furnished very instructive articles for those interested in ship building and naval warfare. Lately it gave a full account of the armament of the Montebello, a 120-gun ship, which we give in translation:—

"The armament of a man-of-war is one of the most difficult tasks. The naval officer has not only to plan how to store away in the most convenient manner the various objects of armament and the provisions, but he has also to distribute them in such a manner that their weight will correspond properly with the displacement of the water, without injury to the speed-management of the ship, and to provide for sufficient room to work the guns. To obtain these desirable results, many changes have been introduced in the arrangement of the Montebello. The iron ballast has been diminished, in order that the centre of gravity may not fall too low. The guns of the upper and quarter-decks are no longer fore and aft as formerly, whereby the bow and stern were overloaded. They are also removed from between the shrouds, where they could not be worked properly. The guns are placed now mid-ships. Before the year 1815, such ships had 132 guns; this number is now reduced to 120, and nevertheless the actual force of the ship is not diminished. The whole arrangement is better, gives more room for communicating with one part of the ship from another; the crew, consisting of 1089 men, are able to come on deck much easier when required for manœuvering and boarding. The hospital has been placed and arranged with philanthropic care; the sick have their own kitchen and dispensary near by. The stowage in the hold has been rendered more simple and regular by the introduction of sheet-iron chests, and by the adoption of chain cables instead of hempen ones. All the store-rooms are placed in the hold. The storage of such a quantity of divers articles in that narrow space called the general magazine, is truly a masterpiece of order and skill. The hold contains provisions for six months, with a reserve-supply for another six months; water for 135 days. Battle being the purpose of the armament of a man-of-war, all that belongs to it must be disposed in such a manner that no impediment and interruption will occur during the engagement. The passages between the powder-magazines must be so arranged that no interruption or disorder in the distribution of munitions to the different batteries can occur; neither must the removal of the wounded from the decks down the hold meet with any delay. The Montebello is 196 feet long, and but 50 feet beam. She carries 120 guns, of which 32 are of the calibre of thirty-six, 34 of twenty-four, 34 of eighteen, and 20 carronades of thirty-six. She can pour out at once 3300 lbs. of iron. The crew is composed of 1089 men. The supply of provisions for six months for the crew consists in: 158,122 pounds of biscuit; 61,060 pounds of flour; 49,484 pounds of salt meat; 61,120 pounds of dried vegetables, rice, cheese, etc.; 134,652 quarts of wine; 4390 of brandy; 67,722 pounds of coal; 140 cords of wood; and 367,000 quarts of water, at the rate of 25 quarts per day for each man; 9840 cannon-balls, and 160 packages of grape-shot of different calibre; 61,500 pounds of powder, etc. The whole contents of the Montebello amount to 2730 tons, and yet there is everywhere space, air, and light; 1089 men live, move, and manage 120 guns as easily as on the Champ de Mars. The surface of the sails offered to the wind is 5601 square yards.

The following dimensions and materials are employed in the construction of a three-decker: The length of the keel is 180 feet; the whole construction requires 113,000 cubic feet of wood, at 6 francs the foot. The width is about 52 feet, the depth 25. The three batteries are armed with guns of different calibre, as in the Montebello. The main-mast is 120 feet high, and measures 9 or 10 feet in circumference; it weighs 40,000 to 42,000 pounds. The main-top-mast that rises above the main-mast is 72 feet high, and, with the gallant-mast, the main-mast measures 250 feet. (The towers of Notre Dame are only 200 feet high.) The main-yard has 115 feet. The vessel must have a crew of 1000 to 1200 men, and may carry, beside, 500 or 600 soldiers.

The construction of such a ship requires 140,000 pounds of iron of all kinds; 56,000 pounds of copper in bars and nails; copper, for sheathing, 5000 pounds; whole amount of copper, 90,000 pounds; iron nails, 1000 pounds; rolled lead, 6500; tow, 49,000; pitch, 15,000; tar, 9000. The sails require 31,500 yards of canvas; the vessel having commonly two sets of sails, that amount is doubled. The great flag requires 270 yards of stuff; the ship requires 7000 tons of iron for ballast; and under sail and perfectly equipped, weighs over one thousand million pounds."

Lucky Forethought of a Boy.

We mentioned a few days since (says the Baltimore *American,*) the burning of the Tunnel Bridge, on the Baltimore and Susquehanna Railroad, about five miles south of York, and since learn that the conflagration came very near being followed by one of the most terrible disasters that has lately occurred in railroad travel. It is supposed that the bridge took fire from the freight train, which passed about 7 1-2 o'clock in the morning, and the structure was totally enveloped in flames before it was discovered by the residents in the vicinity. At about 9 o'clock the frame work of the bridge fell through, and among the spectators, some twenty in number, was a little boy about twelve years of age, named Eli Rheem, who, remembering that the express passenger train was then about due from York, started off at the top of his speed to endeavor to stop the train, which he knew must be close at hand. As soon as he reached the curve, about 200 yards from the bridge, he observed the train coming on at full speed, and fearing that he would be unable to stop them unless by the use of extraordinary means, the noble little fellow took his position on the track, and running toward the approaching train with his hands raised, caught the attention of the engineer, who immediately reversed his engine, and stopped within four hundred yards of impending destruction, the piers being some twenty feet from the rocky bed below, and the gap some sixty feet wide. Had the boy not placed himself on the track, he would doubtless have failed in his noble effort, as the engineers are so often cheated by mischievous boys on the route that they seldom pay any attention to them. Even when he stopped, he thought that he had been cheated by a youngster with more daring than his associates, and was surprised to see the little flaxen-headed fellow stand his ground, and endeavoring to recover his lost breath to answer his question as to the cause of his interruption. We learn that the passengers, when they ascertained the cause of the stoppage of the train, and viewed the precipice over which they were near being dashed, liberally rewarded the boy for his presence of mind and daring, and that the Board of Directors, at their meeting yesterday, appropriated $100 as an additional recompense. Eli Rheem, a boy but twelve years of age, was the only one of twenty persons present, most of them men, who had forethought sufficient for the occasion.

Hair and Feathers.

The business which is carried on in these familiar and seemingly insignificant substances, of which our beds and cushions are mostly made, is a great branch of trade. The *Journal of Commerce* says that the local trade of New York, in these two articles, is about $3,000,000. The firm which is most largely engaged in it consume annually $700,000 worth of hair and $1,000,000 worth of feathers. The feathers are purchased in the markets of Russia and South-America, and the hair, or at least a large portion of it, once floated gracefully to the breeze in the shape of the manes or tails of the wild horses of the South-American pampas. Immense numbers of these horses are killed annually for their hair, hides, and fat. The latter substance, upon its arrival in New York, is transmuted into soap, and is doubtless often admired for its aroma and variegated colors. The *Journal of Commerce* says the process of preparing the hair is as follows: From the bales it is thrown into a "picker," making 800 revolutions per minute. After being thoroughly picked, it is twisted into ropes by machinery. This is done for the purpose of making it curl. It is next put into vats and boiled, for the purpose of cleansing it, after which it is thoroughly dried in an oven. The ropes of hair are then picked to pieces, and the hair is ready for use.

Vegetable Mechanics.

There is a remarkable tree on the farm of the late Hon. Olney Ballou, of Cumberland, R. I., which is an emblem of himself in his struggles against the obstacles of life. An old elm standing near a mass of rocks died. A young elm then appeared in a fissure of this rock, casting down its slender roots, and in twenty or thirty years it has become a foot and a half in diameter. Its roots have penetrated into and under the rock, and have lifted and thrown off about seven tons of it, and have loosened and partly lifted ten tons more, which in a few years will be separated from the mass. The roots, to bear the immense pressure upon them, have become changed from the ordinary appearance, and have a tough casing which may be compared to the skin of an alligator. The provisions thus made by nature for the growth of the tree under such difficult circumstances, furnish a striking specimen of what might be called vegetable mechanics.

Protecting Clover Hay-stacks.—Josiah Lackey writes to the Iowa *Farmer,* that he has tried to preserve clover-hay from the effects of the weather in the following manner, and found that it answered as well as if the hay had been put in a barn. Clover-hay put up in ordinary mode, like Timothy, is apt to get musty and unpalatable, but put up in the mode recommended, it comes out good and sweet. He says: "When the stack, which is commenced the usual way, is raised to about one-half its destined height, the ends of long wheat or rye straw are placed just on the edge of the stack, so that when the next layer of hay is placed upon it, the principal length of the straw will droop over the sides of the stack. Following this plan until the stack is finished, a complete and impervious covering is furnished to the hay, that will keep it nearly as well as the best barn. I think that the long cane-grass that grows in the sloughs of this country will answer a much better purpose, the straw being longer, and will turn quite as well."

A Chapter on Marriage.

Marry not a man who thinks woman's only duty is to make his shirts and cook his dinners. Such a man would make his wife a slave.

Marry not a man who is too proud to acknowledge woman's equality, for that man is a tyrant, and would make a scold or a nobody of his wife.

Marry not a man who thinks himself one of the superiors of creation, for that man's brain lies too much in the back of his head.

Marry not a man who thinks it is a woman's privilege to learn of her husband at home, for that is not the man to teach you; your life would be one of hopeless ignorance.

Marry not a man who is fortune hunting; for the money once obtained, you would be a secondary consideration; taken because the money could not come without you.

Marry not a man who, in his intercourse with men, speaks sneeringly and vulgarly of women, for that man's love would be a kind to be despised and loathed by the virtuous.

Marry not a man who seeks for amusement where his sisters are excluded, for that man's associations are low, his ideas of purity limited, and himself not worthy the companionship of a high minded woman.

A New Art.—Mr. L. Whipple, of Boston, has just patented, in almost every civilized country, a method of printing on glass, which opens up a wide field for mechanical industry and ornamental taste, by re-producing rapidly and cheaply upon the surface of glass, vessels of any usual form, or even upon ordinary window glass, any device, motto, landscape or portrait, which may be desired. This method of engraving is purely mechanical, no acid or other corroding agent being employed except in the preparation of the patterns. The articles ornamented are exactly alike, the method being capable of transferring to glass fine prints, and even delicate shades, with a fidelity approaching closely to wood engraving. Ordinary glass goblets, whether cylindrical, conical, or hemispherical, are printed with equal facility, a goblet being complete in from three to ten minutes. Inequalities in the surface are no obstacle to perfect work. It is estimated that one girl will be able to attend to four machines, thus engraving from two to seven dozen per hour. The machine itself is the perfection of simplicity and durability.

A Wonderful Ship now Building.—A London (Eng.) letter-writer says:—A very interesting paper was read recently, by Mr. Scott Russell, on the science of ship-building. During the course of his lecture he referred to the vessel he is now building. He appears confident that when completed she will accomplish the voyage to Australia and back in 60 days. Her speed will be no less than 24 miles an hour, and if kept up, would enable emigrants to proceed from Galway to Halifax in 3 days. The ship will carry all her coals required for the voyage, and will have accommodations for 600 first class passengers and 1000 second class. The fares, if she had her complement on such a voyage as that to Australia, would amount to $600,000! Mr. Russell says that to obtain 24 miles an hour, 400 feet of length is required, but this vessel will be 675 feet in length. Some progress has been made in her building. She will be ready for sea in about 12 months from this time.

Vermont Farming.—Mr. B. G. Brigham, of the Vermont Legislature, and owner of an extensive farm at Fairfield, in that State, comprising 1300 cultivated acres, numbers in his farming stock, etc., two hundred and twenty cows, twenty horses, and five yoke of oxen, which consume about 200 tons of hay yearly. His annual products are stated to be 20,000 lbs. of pork, 500 bushels of wheat, from 400 to 500 bushels of corn, 1000 bushels oats, and from 1000 to 2000 bushels of potatoes. His churns are set in motion by two horse-powers, and the average yield of butter from the milk of each cow, is 150 pounds.

A glowing account of the rapid increase of population and improvements in Washington Territory, is given in the Olympia *Pioneer.* The editor states that two years ago the population was only one thousand, the number of mercantile establishments twelve, saw-mills three, and houses and shanties in Olympia twenty-six. Now there are in the city ninety well-constructed buildings, and in the territory fifty mercantile establishments, and thirty-three saw-mills, with a population of six thousand souls.

Mr. D. Bethune, of Canada, has patented a plan for the construction of ocean steamers, to enable them to outstrip American clippers in long voyages; and he is now in London superintending the building of vessels which are to attain a speed of twenty-one miles per hour. The steamers are to be of large size, with many conveniences, derived from American practices and improvements, and can be built in less than twelve months, at a saving of one half the present cost.

The life-boats belonging to the port of Liverpool, Eng., it was stated by Col. Chesney, at the recent meeting of the British Scientific Association, had been instrumental in saving 1329 lives, since 1840, and 312 vessels rescued, which would probably give an amount of 60,000 tons, and taken at £10 a ton, would show an amount of £600,000 property saved by that means.

There are said to be about 3000 negroes entitled to vote in New York City under the provision of the State Constitution, which requires a colored man to have been three years a citizen, and possessed of freehold estate of the value of $250 over and above all debts and incumbrances charged thereon, and upon which a tax shall have been paid.

Col. Benton is to lecture in Baltimore on the 12th of December, on the Pacific Railroad.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)
ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life,* or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.,* made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone.* The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order Chimes of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings,* comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N.Y.

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

NEVER could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

Vermillionville, La., April, 1853.

Mons. le Dr. J. C. Ayer:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurances of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

Dr. J. C. Ayer—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

Dr. J. C. Ayer:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.
J. B. Samson, Democrat, McConnellsburg, Pa.
J. Russ, Jr., Shelbyville News, Tenn.
Harvey, McKenney, & Co., State Gazette, Burlington, Iowa.
J. Knabb, & Co., Journal, Reading, Pa.
Raymond, Harper & Co., New York Times.
S Cobb, Christian Freeman, Boston.
Wm. B. Jacobs, Christian Chronicle, Philadelphia.
Hon. J. Wentworth, M. C., Democrat, Chicago, Ill.
Rev. E. G. Reese, Methodist Protestant, Baltimore
W. M. Wightman, Christian Advocate, Charleston, S. C.
J. M. Magennis, True Delta, New Orleans.
T. M. Donnell, Daily News, Savannah, Ga.
Geo. D. Prentiss, Louisville Journal, Ky.
Hon. Schuyler Colfax, M. C., South Bend Register, Indiana.
A. Commings, Christian Mirror, Portland, Me.
M. H. Bartlett & Co., Republican, Hartford, Conn.
Chaddick & Berry, Banner of Peace, Lebanon, Tenn.
Thompson & Co., United Empire and Patriot, Toronto, C. W.
Charles Cook, Democrat, Danville, Pa.
M. Hannum, Democrat, Allentown, Pa.
Sherman & Harron, State Gazette, Trenton, N. J.
Wright & Haven, Prairie Farmer, Chicago, Ill.

These gentlemen have not only certified to these statements in their papers, to the public, but have sent me their personal letters, to the effect that they have found my preparation an article of great public utility.

Space will not admit full testimonials here, but the agent below named will furnish my American Almanac, gratis, to all who ask for it, wherein are full particulars, and indisputable proof of these statements.

Prepared by J. C. AYER, Chemist, Lowell, Mass.

Sold at wholesale in New York by A. B. & D. Sands; retail by Rushton, Clark & Co., and by all Druggists, everywhere.

The Sabbath Recorder.

PUBLISHED WEEKLY
By the Seventh-day Baptist Publishing Society
AT
NO. 9 SPRUCE-STREET, NEW YORK.

Terms:

$2 00 per year, payable in advance. Subscriptions not paid till the close of the year, will be liable to an additional charge of 50 cents.

☞ Payments received will be acknowledged in the paper so as to indicate the times to which they reach.

☞ No paper discontinued until arrearages are paid except at the discretion of the publisher.

☞ Communications, orders and remittances should be directed, post-paid, to

Geo. B. Utter, No. 9 Spruce-st., New York.

Liabilities of those who take Periodicals.

The laws declare that any person to whom a Periodical is sent, is responsible for payment, if he receives the paper, or makes use of it, even if he has never subscribed for it, or has ordered it to be stopped. His duty in such a case is not to take the paper from the office or person with whom the paper is left, but to notify the Publisher that he does not wish for it.

If papers are sent to a post-office, store or tavern, or other place of deposit, and are not taken by the person to whom they are sent, the postmaster, store, or tavern-keeper, &c., is responsible for the payment until he returns the papers, or gives notice to the Publisher that they are lying dead in the office.

For the Sabbath Recorder.

SWEAR NOT.

In the *Sabbath Recorder* of Nov. 20, 1854, under the above head, I find three quoestions asked; and as I do not find an answer to them in either of the two succeeding numbers of the *Recorder*, I would offer the following.

Question first—Does Christianity forbid its disciples the taking of an oath before the civil magistrate?

Answer—I think not. The first account we have of an oath being taken, that I now recollect, is to be found in Gen. 12th chapter and 3d verse, when God made promise to Abraham to bless and multiply him. St. Paul, speaking of it in Heb. 6: 13, says, "Because he could swear by no greater, he swore by himself;" and in the 16th verse Paul says, "For men swear by the greater, and an oath for confirmation is to them an end of all strife." We find an oath made use of by Abraham; he sweareth his servant, concerning Isaac's wife, Gen. 24: 3. Again, in the case of Laban and Jacob, Gen. 31: 51, 52, 53. Laban said, as there was no man present, he would call God to witness; and Jacob swear by the fear of his father Isaac. Again, Jacob sweareth Joseph, Gen. 47: 31. It appears to me, from the reading of the Old Testament, than an oath to tell the truth as a witness, was in all respects justifiable; and also to make a solemn promise to perform that which was right, or not to do that which would be wrong. Thou shalt fear the Lord thy God, and serve him, and shalt swear by his name, Deut. 6: 13. And thou shalt swear, Jer. 4: 2. And swear by his name, Deut. 10: 20. In the 19th chapter of Deuteronomy, we find intimations of testifying before the Lord. Again, the Lord swore that Moses should not go over Jordan, Deut. 4: 21. I have sworn in my wrath, Heb. 4: 3. The Lord swear, Heb. 7: 21. Then shall an oath of the Lord be between them both, Ex. 27: 11. Now, if the Lord has set the example, to confirm statements and promises by an oath, and taught his chosen people to confirm by an oath what they should testify to as witnesses, in order to settle disputes between their brethren, and to bring to justice evil doers, and as I do not find in the New Testament, where reference is had to any of the above passages, that the practice is condemned, I must therefore conclude, that it is still right to take a judicial oath or affirmation before the civil magistrate. I think our Saviour, in Mat. 5: 34, had reference to different oaths than those administered to witnesses. I think he must have had reference to the taking of unlawful oaths, such as the Jews took to kill Paul, (Acts 23: 21,) and to common or profane swearing, using the name of the Supreme Being in an unlawful or irreverent manner; such as Peter used when he denied his Lord, and began to curse and to swear. The apostle James (5: 12,) speaks against swearing. I always supposed he had reference to profane swearing. It is the practice in these days for some that profess religion to use expressions that are not consistent with such profession; such as saying, By Jerusalem, By heavens, By all that is good and great, By St. Peter, By gol, By gracious; all of which is considered swearing by an oath in an unlawful manner; as also saying, darn, darnation, infernal, and the like, which is a very slight modification of profane cursing. And some persons, in offering a prayer, use most shocking language, making nearly a fifth part of such prayer to consist of calling over the different names of the Supreme Being. Such is very unlike the form of prayer given by our Saviour in Mat. 6: 9.

Question second—What is the difference between swearing and oath taking?

Answer—The word oath is of Saxon origin, (*ath*,) and is defined to be a solemn affirmation or declaration, with an appeal to God for the truth of what is affirmed. By our laws, no person is allowed to take such an oath, unless he believes in the existence of a Supreme Being, and in future rewards and punishments. Nor is any person allowed to take such oath, unless administered by a Judge or Clerk of some Court, Mayor, Recorder, Alderman, Coroner, County Clerk, Justice of the Peace, or other officer authorized to administer the same. Nor is such oath binding on any person unless administered by such officer. There are three forms of oath used in judicial proceedings. The first was probably taken from the case of Laban, above mentioned; and commences thus: The officer says to the witness, "You do swear in presence of Almighty God, that the evidence you shall give in this matter of difference between A. B. and C. D., shall be the truth, the whole truth, and nothing but the truth; thus you swear." The second form was probably taken from Rev. 10: 5, 6, and is like the above, except the beginning, which says, "You do swear by the ever-living God." These in our law are called oath taking. 3d. The difference between these and affirmation is nothing in substance, only in form. The form was made to accommodate the sect called Quakers, as they hold that the calling over the name of the Supreme Being, except in the offering of prayer, is a sin, (and I think they are not much mistaken.) The form is this: The officer says, "You do solemnly and sincerely promise and affirm, that the evidence you shall give in the matter of difference between A. B. and C. D., shall be the truth, the whole truth, and nothing but the truth; thus you affirm." The word affirm, is of Latin origin, (*affirmo*,) and is defined to be, to assert positively, to tell with confidence, to aver, to maintain as true. Now, all this differs as much from swearing, such as using the name of the Supreme Being with irreverence, calling on him to damn us, our fellows, or the things with which we are surrounded, called profane swearing, as light differs from darkness. The first is considered justifiable by the laws of man and the laws of his Maker; the last is condemned by both, and threatened with punishment, both here and hereafter.

I am so far from thinking that judicial oaths and affirmations are forbidden the Christian, that I am inclined to the opinion, that the real humble followers of Christ, who live in accordance with their professions, are the only fit subjects to take such oaths or affirmations; and that as many as do not live a life of charity, sobriety, morality, and common honesty, should be rejected. Our law admit all as witnesses who believe in a Supreme Being and rewards and punishments. This it does more of necessity than of choice; as it often has to make use of the vile as witnesses, to bring to justice those who are more or less vile. But after all, where a man is called up as a witness, and says he believes in a Supreme Being, &c., and yet we know him to be dishonest, to be a gambler, horse jockey, horse racer, a licentious character, uses profane language, gets so occasionally that the width of the road troubles him more than the length of it, or is otherwise unprincipled, what is his evidence worth? True, he says he believes there is one God, and that He will reward and punish. The devils also believe and tremble. Nor does a man's professing religion make his evidence any better, unless he believes in accordance therewith. The statements of those who turn State's evidence, to save their own necks from the gallows, and of those whose conduct contradicts what they profess to believe, are the most suspicious of all witnesses. We are commanded to be subject to the higher powers. Rom. 13: 1, 6. The powers that be require us to take judicial oaths, or affirmations. All public officers are required by the Constitution of the United States to take oaths; the necessity of the case calls for it. Our relations and business transactions with other nations, and one State with another, require it. Certificates under the oath of office, and with the great seal attached to them, are evidence to be read in foreign courts, among different nations. Without such oaths, all our business transactions, where proof is concerned, such as all matters of record, of the conveyance of real estate, of the decisions of courts, of the signing of treaties with other nations, &c., would be as idle tales. If it were not for oaths, perjured persons and other offenders could not be punished. As I understand it, all that an oath of affirmation amounts to in substance is this, as though the officer should say to the witness, "You are called on here as a witness; you believe there is a Supreme Being who will punish you if you do wrong; you believe he is everywhere present, beholding the evil and the good; now, in view of all this, you sincerely promise and say, in confidence, that what you shall here state as a witness between these parties, A. and B., shall be the truth, the whole truth, and nothing more; thus you promise." Although the law calls this oath taking, I ask, how can it hurt the Christian, or any body else, if they mean to tell the truth?

L. JONES.

LITTLE CHILDREN:

The Flowers and Poetry of Earth.

Poets have sung of flowers, lovely types of innocence and purity. Alike too have the grave and gay, young and old, evil and good, given the homage of admiring hearts to these frail children of nature, and turned from their silent teachings with purer hearts and holier aspirations. We, too, would ever chime in our praises with their delightful symphonies, with hearts alive to these inanimate expressions of heavenly wisdom and beauty. But it is not to nature's flowery meads and blooming vales that we would allure you on this bright anniversary morn. In the garden of innocence and sweet simplicity only bud and bloom flowers of unrivaled loveliness. Here only spring forth those plants whose germ never dies, although the chilling frosts of coldness and neglect may wither the tender bough, or the burning breath of passion crisp its twining tendrils, and shrivel its opening leaves, or even though its delicate petals be crushed beneath a wanton foot. Yes, little children, human flowers, budding all along the rough and thorny wayside of life, afford a theme worthy a nobler pen, one that should tenderly sweep the harp-strings of affection, and awaken there gentle and thrilling music.

Little children! What heart does not vibrate, even, with the melody of these sweet words! What bright visions of little sylph-like forms, dancing free as air with sporting zephyr, does even their mention picture in our minds! What an array of plump rosy cheeks, and laughing eyes, coyly peeping 'neath a sunny brow from out a cluster of unfettered curls; and round dimpling limbs, gracefully swaying with every changing emotion! No one dare deny they love these innocent little prattlers. Every one loves them. Old age grows young again in the sunshine of their fresh and buoyant spirits, and the careworn and clouded brow is wreathed with smiles of holy joy as *their* twining arms encircle the neck, and the fresh dewy lips of innocency press the furrowed cheek. The heart long dead to the appeals of tenderness and affection, and to the cry of those a depraved appetite has robbed of comfort and joy, is once more awakened to sensibility by the winning voice of childhood; and the rum-besotted brute is once more a man. The sin-polluted soul, almost callous to every good impression, unmoved by the most eloquent and thrilling appeals of truth, is melted by the soft pleadings of trusting innocency, and the angelic host swell loud their rejoicing, that another soul is born into the kingdom of heaven. What, too, has induced the God-defying infidel, who despised all counsel, and ridiculed the pure words of inspiration to abandon his false creed, and bow his stubborn frame for mercy, but the unfeigned, unsophisticated lips of devoted childhood? Truly, there is a witching sweetness in the silvery tones upspringing from the guiltless heart of a loving child, and in the earnest pleading eye, beaming from the frank unsullied countenance, that purifies and sets in motion the stagnant waters of affection in hearts firmly locked in their own sordidness, and long insensible to the gentle emotions of the soul. Thus ever do these immortal flowers breathe around us a fragrance that softens and revives our dry and withered hearts, and restores to us something of that native sweetness with which man was endowed when he first came from the hands of his Creator.

O, who can wontonly wound these tender buds of sensibility by rash unkindness, or wilfully shut out from their yearning spirits the sunshine of love? Who can seriously behold their animate leaves unfolding new beauties each day, ever looking upward with such confiding trust to the hand that waters and prunes them, and not fear lest their plastic spirits be marred by a wrong and unholy impress? Ah! what heart does not bleed to-day in glancing over this flowery field, to behold here a sensitive little plant drooping and withering under the burning breath of unjust and unmerited censure, its vivacity and sprightliness yielding to moodiness and sulky indifference—there a noble and thrifty genius, ever thirsting for the rain and dew of wisdom and truth, choked by weeds of worldliness, its beautiful soaring spirit poisoned with prejudice and dark suspicion, and almost everywhere the blight of sin so early despoiling this Eden of its loveliest charms—the purer, nobler part of their natures giving way to an overgrowth of selfish and unholy passions. Truly, it is a painful thought, that the noblest specimen of God's handiwork should be thus marred and remolded from its original image of divinity. In order to realize the great responsibility resting upon those to whom is entrusted the molding of such treasures, we have only to remember how susceptible are their tender minds to every impression, whether good or evil, and that their whole future character, and perchance their eternal destiny, may be sealed forever by a single thoughtless word or action.

Not only are these little spiritual blosoms unrivaled by the beauty and loveliness of nature's smiling children, ever teaching us lessons of goodness and purity, but there is poetry, too, in all their winning ways, far more enchanting and worthy our perusal than the most bewitching strains that ever waked the poet's lyre. The free airy motion of its active limbs—the dancing form—the butterfly gayety and bee-like industry—the merry tones bubbling wild from its gay and guileless spirit, speak volumes which can never be half realized in the flowing numbers of poesy. There's a world of poetry in the ever-varying expressions of the undisguised and artless countenance, which fascinates every heart with a sympathetic charm. Who, too, can silently and thoughtfully gaze in through that mystic window of the soul, so brilliantly illuminated with the glow of animation, and not read poetry in the sparkling intuition of new light, the melting tenderness of sympathy and affection, the flashing indignation of a roused and burning spirit?

Little children, in their purity and innocence, are the complete embodiment of all that is lovely and beautiful. They are a golden link between men and angels, and when surrounded by a group of such true and loving spirits, we breathe an atmosphere the nearest allied to heaven that can ever fan our sin-cursed earth.

Our Saviour loved little children, and took them in his arms and blessed them—and do you remember, that he said, Of such is the kingdom of heaven, and that except we be converted and become as little children, we can in no wise be participators of the bliss of that glorious world? How important, then, that we early seek to bathe our sin-polluted souls in that pure fountain, which only can wash away the crimson stains of guilt, and again restore to us the beauty of innocence, that when the Great Reaper shall stretch forth his sickle, we may be gathered among the flowers that shall forever sparkle in the diadem that crowns our Saviour's brow.

H. E. S.

THE BIBLE IN TURKEY.

The Hon. G. P. Marsh, late U. S. Minister at Constantinople, was one of the speakers at a recent meeting of the New York Bible Society. He said that the Mohammedans, Greeks, and Armenians of the Levant, offered a new and extensive field for the dissemination of the Scriptures. The difficulties that lie in the way of convincing the Mussulman of the value of the Bible, he thought, were rather fictitious than real. In the main, he receives the morality of the Bible—the essence of the Koran being but little different from that of the Pentateuch. In proof of this he read the call of the Moslem to prayer. He contended that their theology enjoined even greater reverence for the Divine Being, and His injunctions, than that of either the Jew or the Christian. In the moral influence of the Koran upon the Mussulman, the speaker gave it precedence over that exercised by the moral precepts of the Bible upon the Christian. In accepting the Bible, the Mussulman must renounce his spiritual and civil guide. Herein lies the difficulty of supplanting the Koran with the Bible; but he believed that the intelligent portion of Turkey were rapidly becoming convinced, that if they would exist as a nation, beside Christian nations, they must follow their example, at least civilly, if not spiritually. Good Turkish versions of the Bible are sold freely and unrestrictedly in the streets of Constantinople, and the demand for them is rapidly increasing. Speaking of the extent of country thrown open to the dissemination of the Bible, the speaker quoted the observation of a traveler, who had said that "with a knowledge of the Turkish language, he could travel without an interpreter from Stamboul to the Walls of China." The Ottoman Empire presents a population for the spread of the Bible, in the Turkish and Arabic languages, three times greater than the United States. He concluded by observing, that Constantinople offered the best facilities for the establishment of a central dépôt for the distribution of the Bible in Europe, inasmuch as, unlike neighboring cities, no ecclesiastical surveillance checks the spread of the gospel.

REV. MR. ROBERTS IN CHINA.

From the Christian Watchman and Reflector.

We have received from Rev. I. J. Roberts, of Shanghae, China, a lithographic communication of fourteen closely written pages, purporting to develop and advocate a "Grand Plan for Missionary Increase in China." This communication has been waded through with a view of sifting from it whatever real grains of interest it may yield the reader. Mr. Roberts, it may fitly be premised, went forth as a missionary of the Triennial Convention. Afterwards he came naturally under the patronage of the Southern Baptist Board, but from some cause became divorced from the same several years ago, since which time he has been "a minister at large," operating as has seemed meet in his own eyes. What, or how much, good he is accomplishing, we have never been able to find out. His case, we remember, was warmly espoused as against the Southern Board, by the late Rev. Dr. Waller, of the Western Recorder. It has been currently understood, that Mr. R. is prominent in giving aid to the revolution now progressing in China, having intimate relations to the leader of the new dynasty. This fact, as will be seen from what we give below, he boldly avows. Of the success, thus far, of the revolutionary movement, he says:

"Dear brethren of England, France, and Germany, having lately sent a communication on this subject to the United States, this is intended principally for you. I am persuaded that you do not—cannot feel uninterested respecting the great Chinese Revolutionary movement now in progress—*the wonder of the age!* Through faith Tae-ping Wang and his coadjutors are subduing the 'kingdom, have escaped the edge of the sword, out of weakness were made strong, waxed valiant in fight, and turned to flight the armies of the aliens.' Having risen from among the people, apparently at the call of Providence, or the God of Providence, they have acted with energy, and gained unexpected, unprecedented success. They have securely planted their standard in Nanking, the southern capital, have taken other large cities in the country, and are wielding a mighty power and influence all around."

He next proceeds to argue at considerable length the importance in his view of a "Committee of Coöperation," as he terms it, having its centre at Nanking—to be composed of different denominations and missionaries of the same. This, he insists, would have great advantages, from the common equality of all its members, and from its being in the midst of the field to be occupied. Mr. Roberts having earnestly appealed to Christian churches and associations to send forth to China missionaries—the expense of an outfit for each of whom, including his family, he estimates at a thousand dollars, the same sum besides being needed annually for five successive years—gives the following as

"*The Resources and Dependences of the Committee of Coöperation*: I acknowledge that the thousand dollars may not cover all the expenses of a mission family—teachers, books, writing, building, and other contingent expenses, as well as personal; but this amount being added to the common stock, we will trust the Lord for the balance. We will walk by faith, adding the labors of our pen and prayer, making our requests known. The Lord will hear us and supply us, for he knoweth that we have need of these things; and has said in his word, 'Trust in the Lord and do good; so shalt thou dwell in the land, and verily thou shalt be fed.' Ps. 37: 3. This promise I have been testing these many years, and I find it verily true—it may be depended on. But if some good brother, after reading this paper, should feel inclined to come on the plan recommended, only desires something a little more tangible to walk by than *faith*, to enable him to progress thitherward, let me say to such: 1. The thousand dollars proposed will pay your salary, the salary of your teacher, buy your text books with which you will study the language, and leave a little over, according to the present rates paid by the Baptist Boards of the United States. 2. The next consideration—whence will the funds come for house renting, house building, traveling, and other contigent expenses, as well as printing and other branches of the work? *Answer*—Others besides those directly pledged for the missionary's support, will see his reports, sympathize with our effort, and voluntarily send in their donations. This dependence has also been tested by the writer during the last two years, and found more reliable than could have been expected, without such test. Last year, 1853, about $800 were received from the United States, $400 from England, and $300 in China; and this year, without any dependence only upon God, through faith, the pen and prayer, the voluntary work of contributing to our needs, and our work too, I am happy to say, is going on with like promising prospects, as during last. Why, a large expensive institution at Bristol, England, requiring thousands annually, is supported in this way, and why should we fear when engaged in a much greater work? 3. Should the committee at Nanking be a little close run, the foreign merchants of China will help with pleasure. They do something in this line every year. This year, 1854, one has voluntarily presented the writer with $100, and another $200, as donations! The merchants in China are noted for their liberality! 4. The Chinese new converts will soon contribute their quota both of men and means. They are in the habit of contributing for religious purposes, and doubtless they will not do less so when their religion becomes true Christianity. In fact Tae-ping Wang has already contributed largely for the publication of religious tracts and the Scriptures. And subscriptions for religious purposes have been liberally filled by Chinese themselves, both at Hong Kong and in California. 5. The Bible and Tract Societies and other like institutions at home will have no more hesitancy in committing their appropriations to this committee, than they would to any Board of the denomination at home. For even now, before the committee is located, and while consisting of but one member, three large institutions, two in America and one in England, have committed a considerable amount of funds to his trust, to be used in this line; then how much more will this be the case when the committee shall consist of twenty members, and be in a flourishing condition at Nanking? They will be but too glad to be able to use the committee's agency for the distribution of their liberality.

"Now, my dear brethren, who wish to come to China, fear not, but trust in God, that he will through the promising sources above referred to, or some other means, supply your every want while faithfully engaged in His service. Nor is this a vain hope—it is anchored upon the firm foundation of God's unfailing promises; has been tested amid the storms of severest trial during the last several [illegible] ing dependence. I know we shall realize the assistance needed. Then come, come, nothing doubting!"

Further on Mr. Roberts makes the following avowal:—

"*Our Purpose*.—In all frankness we have nothing to conceal here; but openly declare our uncompromising purpose, if God will, to stir up the churches at home in the mission cause; and to spread the Gospel in China to the utmost. This the writer commenced according to his humble abilities in 1835, and now desires to see carried out to the fullest consummation. My hope, as a means for the accomplishment of this purpose, greatly depends, with the blessing of God, upon the *Gospel plan* above proposed. 2. It having pleased God, in the gracious dispensations of His providence, to make the writer teacher, or the religious instructor of Tae-ping-wang seven years ago, it is his purpose, the Lord permitting, to improve this vantage ground to the uttermost in carrying out the *Gospel plan* proposed. 3. Being a Baptist, and honestly believing that the Baptist doctrines and ordinances are most Scriptural, it is the writer's determination to throw what little influence he may have in China into this channel, and he invites coöperation on no other principles than those maintained by the general union of missionary Baptists in the United States, and such as fraternize with them in England, France, and Germany. The version of the Holy Scriptures into Chinese, by Rev. Josiah Goddard, is now used, and will continue to be used by the committee; at least until some other version is used by the Baptist denomination in China more generally!"

Of the end to be achieved, and the means to be employed for it, Mr. Roberts gives an intelligent and truthful view in the following:

"*The work to be done*.—The great work is preaching the Gospel to every creature, all over the nation, as far as in us is! But a little more in minutia. We wish to establish the committee well at Nanking, and preach the Gospel thoroughly there. That will be the heart of the nation, and we must keep the heart with all diligence, because thence, as from Jerusalem, we must send forth the issues of life. At least a dozen missionaries and men of our fraternity should be located there. Not only at Nanking must we preach, but to the cities around, and still more distant, until the whole nation be preached to. Many large cities, besides Nanking, are now ready for the commencement of this process. To speak in bounds, at least a hundred missionaries ought to join the committee before the close of two years more. I do think more, rather than less, will be required.

"*Teaching*.—Much must be done for China by teaching, at least, at the capital—Nanking. We must have a primary school, and that ought to be instituted immediately, as preparatory to a higher course of instruction in science. And we shall have great need of early attention to the establishment of a theological school, in which *Chinese converts* shall be instructed in a Scriptural preparation for the ministry of the word in truth and soberness. I feel the inadequacy of language to express the urgency of this necessity. If the nation is to be evangelized principally by natives—as *must* be the case—those must be taught and trained in the truth as it is in Jesus from his word, or they will of course preach error—whatever comes uppermost, with such a smattering of truth as they chance to catch up from the Scriptures, and Tae-ping-wang's books. Come, ye doctors of our church, help us to instruct them, and 'expound unto them the way of God more perfectly.' This is no ordinary work, but is worthy of the talents of (Doctors) Paul and Peter if they were here themselves."

We have thus placed before our readers the *gist* of Mr. Roberts' long communication. From this it appears that he has at heart a great purpose. How far he may be a providential instrument in aiding the changes that are now going on among three hundred millions of people, no one can undertake, at this stage of affairs, confidently to say. Though eccentric, and even erratic, he is evidently bold, energetic; and he appears, so far, an earnest advocate of Scriptural Christianity. We believe that in Kentucky, where best known in America, his piety has not been questioned, and that there he has strong friends and advocates. He has shown his inability to serve in connection with Boards, and if in another capacity he can only work effectively for Christ, thereat we shall rejoice.

BISHOP JEWEL.

Dr. John Jewel was eminent for piety, learning, and meekness of disposition; he was Bishop of Salisbury, and the patron of Richard Hooker, and died in 1571, at the age of 41.

We are informed by his biographer, that when he was urged not to exert himself too much by preaching on a certain occasion, as it was better that the people should want one sermon than be altogether deprived of such a preacher, the bishop replied, "It best becometh a bishop to die preaching," seriously thinking, perhaps, upon the comfortable assurance of his Master, "Happy art thou, my servant, if when I come I find thee doing." Wherefore, that he might not deceive the people's expectation, he ascended the pulpit; and, now nothing but spirit (his flesh being pined away and exhausted), read his text out of Galatians v. 25: "Walk in the Spirit," and with much pain made an end of his discourse. Presently after the conclusion he was forced to take his bed, and concluded that his dissolution was not far off.

The following Saturday, nature shrinking and failing, he called all his household about him, and after an exposition of the Lord's prayer, thus breathed forth his last address:

"I see that now I am to go the way of all flesh, and I feel the arrows of death already fastened in my body; wherefore I am desirous, in a few words, whilst yet my most merciful God vouchsafeth me the use of my tongue, to speak unto you all. It was my prayer always unto God, since I had my understanding, that I might honor his name with the sacrifice of my flesh, and confirm his truth with the oblation of this my body unto death, in the defense thereof; which seeing he hath not granted me in this, yet I somewhat rejoice and solace myself that it is worn away and exhausted in the labors of my calling. For, while I visit the people of God, God, my God, hath visited me. I beseech you all that are about me, and all others whom I have ever offended, to forgive me. And now that my hour is at hand, and all my moisture dried up, I most earnestly desire of you all this last duty of love, to pray for me, and help me with the ardency of your affection, when you perceive me, through the infirmity of my flesh, to languish and wax cold in my prayers. Hitherto I have taught you and many others; now the time is come wherein I may and desire to be taught and strengthened by every one of you."

Having thus spoken, with something more to the like purpose, with much pain and interruption, he desired them to sing the 71st Ps., which begins thus: "In thee, O Lord, I put my trust, let me never be confounded;" himself joining with them as well as his exhausted strength would permit. And when they recited these words, "Thou art my hope, O Lord, my trust even from my youth," he added, "Thou only wast my whole hope;" and as they went forward, saying, "Cast me not off in the time of age, forsake me not when my strength faileth me; yea, even to mine old age and grey head forsake me not, O God," he made this application to himself: "He is an old man, he is truly grey-headed, and his strength faileth him, who lieth on his death-bed." To which he added other short prayers, as if he were moved thereto by the power of God's Spirit, saying, "Lord, take from me my spirit; Lord, now let thy servant depart in peace, break off all delays, suffer thy servant to come unto thee, command him to be with thee; Lord, receive my spirit."

At this time, when one of those who stood by prayed with tears, that, if it might stand with God's pleasure, he would restore him to his former health, the pious Jewel, overhearing him, turned his eyes as if he were offended, and spoke to him those words of Ambrose, "'I have not lived so that I am ashamed to live longer, neither do I fear to die, because we have a merciful Lord.' A crown of righteousness is laid up for me. Christ is my righteousness. Father, let thy will be done; thy will, I say, and not my will, which is imperfect and depraved. Lord, confound me not. This is my to-day," (alluding probably to those words of Christ, "To-day shalt thou be with me in paradise;") "this day let me quickly come to thee, this day let me see the Lord Jesus."

After a few fervent inward prayers of devotion and sighs of longing desires, the soul returned to God that gave it. Such was the death of Bishop Jewel, a most worthy trumpet of Christ's glorious gospel.

"HARD TIMES."

What a mighty outcry is raised, because the supply of money is not so abundant as formerly! Merchants and manufacturers fail to redeem their paper, banks suspend payment, railroad companies and other corporations stop business; and the whole community is rendered gloomy in consequence. One would think, from the anxiety depicted on every countenance, that the God who rules the world was on the point of expiring, or at least, of ceasing to care for the interests of his creatures.

But we believe, that the occasional recurrence of what is called "hard times," is necessary to the moral well-being of community. Especially is it necessary for the welfare of God's elect. In prosperous times, the avenues to wealth are so many, and so widely open, that Christians are tempted to enter them. Consequently, they fall into "a snare, and into many foolish and hurtful lusts, which drown men in destruction and perdition." They would never retrace their steps, if disappointment did not compel them. They would go on, in forgetfulness of everything that concerns their soul's interests, till even the forms of religion were lost, and the Church of Jesus Christ had become a thing of the past. It is well, that the Providence of God does not suffer such a state of things to be of long continuance.

But "times are hard" in the religious world, and have been for ages. Shocking "failures" take place. Professors give their "promise" to render their lives a blessing to their fellow creatures; but their fellow creatures, after waiting for the fulfillment of the promise, find nothing but disappointment. Now and then, a miserable apostate openly announces that he has "suspended payment," and that the world has nothing more to expect from him. He shamelessly declares his intention to seek, henceforward, only his own pleasure. But the greater part are still abundant in "promises." Confessing that they have been slow to redeem their obligations to their fellow men, they hold forth the expectation, that the future will witness a change for the better. And thus the religious world goes on, year after year, increasing the number of "failures," in the shape of apostacies, backslidings, and general religious declension, selfishness, in the meantime, becoming so predominant a trait with professors, that they almost cease to regard themselves debtors to their fellow creatures. O, these are "hard times."

The worst feature is, that this state of things creates no particular sense of distress. When there is stringency in the money market, every body feels it, and deplores it. Not so here. Something of an outcry is made by the world, it is true, because Christians do not live up to their profession, but it is not generally felt that the world is really damaged by such failures. For the most part, there is no particular desire to have any better state of affairs.

Nor can we say, as of commercial stringency, that it is necessary for the general welfare. It seems to be altogether evil. Whom does it benefit? What graces can thrive in such a state? T. B. B.

"CENTRAL ASSOCIATION MATTERS."

To the Editors of the Sabbath Recorder:—

At a meeting of the Executive Board of the Central Association, held this day, I was directed to forward for publication in the *Recorder* a note expressive of their views and feelings in relation to the Council appointed to meet with the brethren in Jefferson County. The appropriate medium would have been the Corresponding Secretary; but he is absent; the Board therefore speak.

The Board do not claim to be exponents of the Association's views, but speak their own views of the Association's action and position. That action we deem clear and explicit, and we concur in the decision of the Secretary, that the action of the churches in Jefferson County has confirmed the appointment of the Council, and two churches at least have by vote assured us of their readiness to meet their share of responsibility. The difficulty to be settled we have not understood as "between churches," but as, in the language of the minutes of the Association, "among the brethren." Neither do we regard this Council as empowered with ecclesiastic dictation, but as an advisory "committee of reference and settlement," of fraternal mediation in a matter in which, to be sure, the churches in Jefferson County are interested, and in relation to which, as fellow members, we all suffer. We have the fullest confidence in the piety, wisdom, and sagacity of the Council, and trust they will go up to the work with faith in God and in their brethren, especially as the churches, in accepting the council, virtually promise to "coöperate with them in the settlement."

But much as we prize the ability of the Council, we regard them as secondary in importance to the day of fasting and prayer to be observed by the churches coeval with the opening of their labors there. Unhappily, the resolution is printed in the minutes as first drawn, and not as passed by the Association. It should read: "We recommend the churches of this Association to improve as a day of fasting and prayer, the day on which this council commences its labors, that the blessing of our Heavenly Father may attend their service, and guide to a happy issue." If this day is observed as it should be by all the churches, not only will the council and the brethren there feel that they are doing business in the presence of the Great God, but I trust there will be little else for them to do but to stand still and see the salvation of God. Other churches, too, while praying for the unity of the Spirit among the brethren in Jefferson County, may have their eyes so opened as to see their own need of a welding power, and so cast all into the furnace, that while the breath of Heaven is blowing upon them, they may be moulded anew, and thus, while the report of the council at our next anniversary gladdens Zion with the happy issue of their labors, a soul-felt response from all our borders will tell that the Lord has rewarded us double, who as prisoners of hope have turned to the strong hold.

But should these hopes be blasted, and no settlement be effected, the visit of the council will not be "love's labor lost," for their report will "divide the light from the darkness" and put an end to the contradictory reports that are now creeping through all our churches. The Association too will have learned their own duty from a reliable source. The minutes of the Association show the report of the committee adopted as follows:—

1. That the Association nominate the following council of reference and settlement, and entreat the brethren of Jefferson County to accept this council, and coöperate with them in the settlement of the difficulties referred to, viz: T. B. Brown, Geo. Greenman, T. E. Babcock, Joseph Potter (of R. I.,) Leman Andrus, J. M. Allen, David Dunn, J. T. Davis, and John Maxson (of DeRuyter.)

2. That this council meet with the brethren of Jefferson County on the first fourth-day of the week in January, 1855.

3. That the Association raise the sum of $150, by equalization, to defray the expenses of the council.

4. Should other interested persons be disposed to aid in defraying the expenses of the council, we recommend that their contributions be received and appropriated accordingly.

JAMES R. IRISH,
Chairman Ex. Board Central Ass.

DERUYTER, Nov. 28, 1854.

"CONFLICT OF AGES"—NO. 3.

From the extracts already given from this wonderful book, it will be seen, that Mr. Beecher endeavors to establish the following propositions:—

1. That the intuitive convictions of the human mind, as to right and wrong, are the voice of God himself in the soul; therefore, on such convictions all just views of God depend, while on them his universal government must ever rest.

2. That these intuitive convictions are universal, indwelling and inhering in every human being.

3. That it was not the intention of our Maker to supersede these convictions of the human mind, as a rule of moral conduct, by any law written on stone.

4. That honor, right, and justice, demand that probationers for eternal happiness or misery should enjoy the opportunity of a fair trial, before they are doomed to the endless retributions of the eternal state.

5. That a fair probation should afford as favorable a prospect of a happy as of an unhappy conclusion, involving no bias to sin, but on the contrary, a bias to holiness, or love to God and man.

Such are the conclusions to which Mr. Beecher thinks the intuitive convictions of mankind would arrive, and which are in fact the case. And I ask, who can dispute him? To deny them, would be to implicate the Author of man's existence; for every principle of justice and right implanted in the human soul, the testimony of universal consciousness, all go to maintain the affirmative of the above propositions. If, then, justice, honor, right, all affirm that the intuitive convictions of the human mind concerning right and wrong are the basis of God's universal government over intelligent beings; if justice, honor, right, all demand that every human being should enjoy a fair probation; if justice, honor, right, require that such a fair probation should include in every human mind a bias towards holiness, and exclude all bias towards sin; and then, farther, if we can have any confidence in God to believe that he will act towards his creature man upon those principles of justice, honor, and right, which he implanted in the soul, and which are his own voice there speaking; why, in the name of reason, justice, right—in the name of all that is true and good—in the name of all that is to be hoped for in heaven, or all that is to be feared in hell—what has caused the "conflict of ages," and why has man arrayed himself against the voice of his Maker, both within and without himself—why war against the universal consciousness of mankind, and every attribute of Jehovah? Why is it, when God declares his ways are equal, and when our inmost souls affirm the same, that men have been so audaciously presumptive as to ignore the fact, both in God and themselves? Let us therefore refresh our minds by a few extracts from the "Conflict:"

Calvin—"Infants bring their condemnation with them from their mother's womb, being liable to punishment not for the sin of another, but for their own. For although they have not as yet produced the fruits of their inquity, yet they have the seed enclosed in themselves; nay, their whole nature is, as it were, a seed of sin; therefore it cannot but be odious and abominable to God. Whence it follows, that it is properly considered sin before God, because there could be no liability to punishment without sin."

The French Confession—"We believe that this stain (original sin) is indeed sin, because that it maketh every man (*not so much as those little ones excepted, which as yet lie hid in their mother's womb*) deserving of eternal death before God. We also affirm that this stain, even after baptism, is in nature sin."

Church of England—"Original sin is the *fault and corruption of the nature* of every man that is naturally engendered of the offspring of Adam. In every person born into this world, it (original sin) deserveth God's wrath and damation."

Confession of Relgia.—Original sin is a corruption of the whole nature, and an hereditary evil, wherewith even the very infants in their mother's womb are polluted, and is so filthy and abominable in the sight of God, that *it alone* is sufficient to the condemnation of all mankind."

Augsburg Confession—"We mean by original sin, that *guilt* whereby all that come into the world are, through Adam's fall, subject to God's wrath and eternal death. Wherefore, those defects and this concupiscence, are things damnable, and of their own nature worthy of death."

Westminister Divines—"Every sin, both actual and original, brings guilt upon the sinner, whereby he is bound over to the wrath of God, and curse of the law, and so made subject to death, with all miseries, spiritual, temporal, and eternal."

Augustine taught that even "unconscious infants, who did not gain remission by baptism, were for it alone (original sin) consigned at least to the penalty of endless loss of heaven."

Stuart—"Adam's sin is imputed to his posterity *because it is their sin in reality*. I fully acknowledge, and humbly confess, on the testimony of my God, that I am guilty of Adam's sin. The scriptures hold it forth as ours *in as true a sense as it was Adam's*. If Adam's sin is not ours as truly as it were Adam's sin, could God impute it to us? Does God deal with men as sinners, while they are not truly such? Those who have endeavored to vindicate divine justice in accounting Adam's sin to be ours, and to reconcile the mind of man to that proceedure, have not only labored in vain, but actually injured the cause they meant to uphold."

In another place, Prof. Stuart says:—

"If our native propensities are themselves a sin, then the conclusion seems plain and inevitable, that God is the author of sin, not merely that he has made beings who can commit sin, but that he has made beings a part of whose very nature, as it came from his hand, is sin."

Confusion confounded! Jewels of consistency, where were ye when Andover's Professor framed his theology? "When Greek meets Greek, then comes the tug of war." But the end is not yet. S. S. GRISWOLD.

BIBLIOGRAPHICAL NOTICES.

1. *The Religious Denominations of the United States;* their History, Doctrines, Government, and Statistics. With a Preliminary Sketch of Judaism, Paganism, and Mohammedanism. By Joseph Belcher, D. D. 8vo. pp. 1024. Philadelphia, 1854, J. E. Potter.

There are but few books of more general interest than those which treat of our common destiny—the destiny of our immortal spirits, as displayed in our individual conscientiousness and depicted in our diversified church relationship—the principles of that profession, and the grounds for those different organizations; springing, as we all profess, from one common source, the Bible; which, while they ought to lead us, in the language of Bishop Watson, to "the great lesson which every sect, and every individual of every sect, ought to learn, from the history of the church, *moderation*," affords us, in a great measure, an explanation of the diversified opinions and distinctive phases exhibited by each denomination of Believers in Revelation, as seen from the position in which we behold the Truth—the various standing-points of the different church systems.

Perhaps the greatest service ever performed to the distracted, professing church, by any mere human, uninspired being, is the philosophical analysis of Neander, in his incomparable work, "*History of the Planting and Training of the Christian Church by the Apostles;*" wherein he satisfactorily reconciles the diversified teachings of some of the Apostles, and has given a consistent explanation of matters, apparently conflicting, and frequently denounced as discrepant, by developing the standing point from which it was natural for each mental organization to deduce such dissimilar phases of the same facts; and to some extent, the history of the different religious denominations may be highly useful, by enabling us to behold, what we, ourselves, really profess to believe, why we believe it, and how it is that others differ from us.

Without tracing the various efforts to elucidate this subject in separate works, in the different branches of the Christian family, or tracing the many attempts that have been made to concentrate and embody a succinct summary of those voluminous productions, and present an agreeable portraiture of the diversified countenances of the universal brotherhood of Zion, it must suffice to state, that one of the most successful efforts of this kind ever produced, in this or any other country, was accomplished by our excellent country woman, Hannah Adams, in her "*View of All Religions*"—truly a master production for the age and under the circumstances in which it was written, and has proved a mother of books; for every work of the kind, since that day, is greatly indebted to her for many a gem that adorns succeeding labors.

Some ten years since, I. D. Rupp, of Pennsylvania, originated a new and appropriate plan for a general work of this nature, namely, that of having a distinguished member of each denomination write the history of their respective churches, that each denomination might portray their own views, and in no manner be misrepresented. This was promptly responded to by able pens, and an important work was achieved. In a short time a second edition was called for, which being revised and considerably enlarged, proved its success, and established its merits on a permanent footing, as an authoritative book of reference. It is invaluable and indispensable to a well-selected library.

While that plan has its advantages, and they are many and great, yet it has its disadvantages, arising from the partiality of sects, and the overweening importance they, sometimes, attach to details, in which others have no interest. Under such circumstances, it is befitting, occasionally, for an impartial reviser to analyze and reproduce, out of the cumbrous materials which are thus accumulated in a multiplicity of similar works—"winnow the grain from the chaff," and reduce them to one systematic *expose*.

Mr. J. E. Potter, an enterprising Publisher of the city of Philadelphia, who is extensively engaged in a western agency trade, conceiving that the period had arrived for that purpose, secured an Editor and Author of much experience and peculiar qualifications, Joseph Belcher, D. D., to fill that important office. Dr. Belcher is not only known to the public as the Biographer of the distinguished William Carey, but as the judicious Editor of the works of Andrew Fuller and of Robert Hall; a gentleman peculiarly adapted to such an undertaking, which few other persons possess, from a long connection with some of the most respectable publishing houses of London.

With such qualifications, Dr. Belcher undertook the work before us, determined to get it up in as attractive style as practicable; and with the view to make readable matter which must, necessarily, be dry in detail, to persons who are not particularly interested in the views of each respective division of the Christian brotherhood, has interspersed the work with numerous anecdotes of the olden time and prominent individuals, together with many choice selections of choicest poetry; to which the Publisher has added many portraits of distinguished personages in the church, and engravings of numberless meeting-houses.

As a work designed to be carried by agents to the West and South-western settlements, it must prove an acceptable companion to the isolated families of those regions; bringing as it does to their doors, the history of their former church connection—to some, the lineaments of their former pastors, and the rich, piquant anecdote, which illustrates the altar and the hearthstone of by-past days.

2. *Pictorial View of All Nations*, comprising the Manners and Customs, Costumes, Remarkable Cities, Towns, Battle Grounds, Animals, Birds, and other objects of interest; with Nine Hundred Engravings. Quarto, 192. J. E. Potter, Philadelphia.

Simultaneously with the foregoing work, we have the present attractive volume, from the same press. It is entirely too late in the day, for the rapid advances of typography, to attempt any labored essay to exhibit the advantages of the illustrations of the graver in works of instruction. Indeed, from the specimen before us, that species of instruction and entertainment has made such rapid advances as to supersede, almost entirely, the text, for they are now left to speak for themselves.

Such is emphatically the character of the work before us—consisting of *nine hundred engravings*, appropriately arranged, on 192 pages of beautiful white thick quarto. Although designed for general circulation, *at all times*, yet there can be no more appropriate book for presentation to the younger population, at the approaching holidays, than this production. Children, generally, look for presents during the Christmas holidays, and much money, unquestionably, is foolishly expended in ephemeral books on such occasions. Children do not care for long details, but love to turn from one illustration to another in rapid succession. They can be gratified to their heart's content in the work before us, without taxing their parents or friends exorbitantly; and we commend it as just the work suited to that purpose—as affording an endless amusement at an exceedingly low price. The children of the land will bless Mr. Potter for this effort to entertain them.

W. M. F.

ASYLUM FOR INEBRIATES.

The Commissioners appointed by the Legislature of New York to collect funds for the establishment of an institution to be called "The United States Inebriate Asylum," have made a public statement of their plan, and called for subscriptions. The object of the institution is to provide an asylum for the poor and destitute inebriate, where his physical and moral condition will be alike the care of the physician and the philanthropist, and where his labor may be rendered productive, and of service to his family. With the Asylum there will be connected workshops, in which each patient, as soon as his condition will permit, will be employed—thus making the Asylum a self-supporting institution. The community will thus be relieved of the burden of maintaining inebriates in alms-houses and prisons, who will be separated from the society of those incarcerated for public crimes, and placed where their inebriety will be treated as a *disease*, and where no efforts will be wanting to produce in them a reformation, and where an income from their labor will be secured to their families, who otherwise would be left to penury and suffering. To carry out successfully the great aim of the institution, $50,000 must be raised—this being the amount of capital stock required by the charter. This amount (which can be increased when necessary) is divided into shares of $10 each.

DIED FOR THE WANT OF LIFE—Two Odd-Fellows' Lodges have recently died in DeRuyter, N. Y., for lack of vitality in the shape of opposition. It is believed their happy exit would have been much earlier but for the stimulus of rivalry between the lodges. "He that hath an ear to hear, let him hear."

VOX.

THE WAY SUNDAY IS KEPT IN NEW YORK.—The New York *Sun* of a recent date says:—

"We observe that one of our minor theatres, in Chatham street, is now kept open on Sabbath evening, for some kind of performances. The bills say 'Sacred concert of vocal and instrumental music.' The addition of the word 'sacred' to Sunday evening concerts at such a place, cannot deceive any body. Music is sacred only when it is employed in praise and fervent adoration of the Almighty. If the authorities of this city countenance or permit vocal and instrumental performances in our theatres on Sabbath evenings, under the delusive name of 'Sacred Concerts,' the next step will be the introduction of comedy and farce, under, perhaps, the title of 'Moral Dramas.'"

Referring to the foregoing, the Newark *Sentinel* says:—

"We take the liberty to go farther, and inquire, why object to the prosecution of their vocation by theatrical and musical people, and yet tolerate fruit selling in the streets, newspaper traffic by public outcry, the cigar trade in open shop on the Sabbath, not to mention liquor dealing, which all but the worst men reprobate, together with other abuses of the day? Are 'Sacred Concerts,' as they are termed, the worst profanations of Sunday that we witness?"

"THE THINGS THAT MAKE FOR PEACE."—A strong desire for peace is professed by S. S. Cutting, on the part of the American and Foreign Bible Society, and reciprocated by Wm. H. Wyckoff, on the part of the American Bible Union; but in their views of what is necessary to a consummation so devoutly to be wished, they seem to be as wide asunder as ever. What the former proposes is, that differences of opinion on the question of revision be mutually tolerated, and that the two Societies unite in fixing such limitations as will prevent a conflict of operations. The "side issue," as he calls it, of the removal of the Home Mission Board to the building in Nassau street, owned by the American and Foreign Bible Society, he would not have brought within the terms of pacification. The latter, on the contrary, perceives in the agitation of this removal project, the principal occasion of the revival of a controversy which was fast subsiding; and believes the occupancy by the Home Mission Board of an independent location, to be the first thing necessary to the restoration of harmony. The effect of the correspondence, thus far, seems to have been to embitter the strife, instead of allaying it; and the probability of a still further division of the denomination, by the organization of a new Home Mission Society, is in an equal degree increased. So says the Am. Baptist.

PERMANENT PASTORSHIPS.—Rev. Isaac Smith, of East Stoughton, Mass., is the oldest settled pastor of the Baptist denomination in New England, having occupied one post nearly twenty-five years. But he has just resigned, and is about removing to Foxborough. In noticing the fact, the *Christian Chronicle* says:—

Dr. Sharp was pastor of the Charles-street Church, Boston, more than forty years; Dr. H. G. Jones was pastor at Lower Merion Church nearly fifty years. We may hardly look for permanency like these cases again while the popular taste remains as it is. We need nothing in our churches so much as *permanency* in the pastoral office. Rev. D. D. Pratt has been pastor of the Baptist Church at Nashua, N. H., twenty-two years; Rev. Elijah Hutchinson, of the Baptist Church at Windsor, Vt., twenty years; Dr. C. A. Thomas, of the Baptist Church at Brandon, Vt., nineteen years; Rev. A. S. Train, of the First Baptist Church at Haverhill, Mass., eighteen years; Dr. Neal, of the First Baptist Church, Boston, seventeen years; and these are the oldest pastors in New England.

DESTITUTION IN OHIO.—The general agent for the American Tract Society for thirty counties in Northern Ohio, reports for the last year, that he and his associate laborers have visited 18,384 families; sold 18,274 volumes, distributed gratuitously 1,008,000 pages, valued at $672, and held 445 religious meetings. They report the destitution thus:—

1. No less than one thousand six hundred and forty families, about one-eleventh of the whole number visited, were found entirely destitute of all evangelical reading except the Bible.

2. Three hundred and eighty-nine families were found without either Bible or Testament.

3. About one-fourth of all the families visited were found habitually neglecting evangelical preaching.

THE LATE DR. WOODS.—It is stated in one of our exchanges, that the late Rev. Dr. Woods gave in his will six hundred dollars in sums of one hundred dollars to six benevolent societies; he also directed that there should be no inscription on the stone which may mark the place of his grave, except the following:

"Rev. Leonard Woods, D. D., born in Princeton, Mass., June 19, 1774; graduated at Harvard College, 1796; ordained as minister of the gospel at West Newbury, in 1798; inaugurated as Abbott Professor of Christian Theology in 1808; resigned his office in 1846; died ——, aged —."

☞ THANKSGIVING DAY was very generally observed in New York city by a cessation of business and by public religious services. According to a custom which has been in vogue for several years past, it was made a day of joy and feasting to the poor children connected with various public institutions in the city. At the Five Points Mission House of the Ladies, at Mr. Pease's House of Industry, at the Home of the Friendless, and among the children on Randall's Island, it was a welcome day. Many of the public houses, and numerous private families, sent in to these institutions a bountiful supply of substantials and luxuries, with which to regale their usually famished inmates. From notices which appear in the daily papers, we should think that Thanksgiving Day is rapidly coming to be in New York what it has long been in New England.

RELIGIOUS INTELLIGNCE.

The census in Scotland has lately been taken, from which it appears that in that country is the most thoroughly compact body of Presbyterianism in the world. The approximation to religious unanimity is greater in Scotland than in any other country. On the morning of the census Sunday, there were in all 943,951 persons at church. Of these 820,000 were Presbyterians, and 120,000 belonged to various other sects, amounting in all to about thirty.

A protracted meeting of twenty-two days was held in the Ebenezer Church, S. C., in August and September. Christians were refreshed, twenty-three new members were added to the church, several persons were yet serious inquirers. This is stated in the *Southern Presbyterian* to have been the fourth season of special religious interest in that congregation within three years, and that in this period "two hundred and eleven persons have been added on examination, including seventy-five servants."

In consequence of a paragraph in the letter of the Bishop of Victoria, inserted in the London *Record*, to the effect that he was not aware of a single clergyman or graduate having offered his services for the China Mission of the Church of England, two clergymen, one a graduate of Cambridge, the other of Dublin, are about to proceed to China immediately, in connection with the Church Missionary Society.

A great revival has taken place in the State University of Mississippi; which has resulted in the conversion of seventy of the students. Also in Greenboro, N. C., a letter dated the 10th inst. says that fifty conversions of young ladies have taken place in the Edgeworth Female Seminary. In Wellsburgh, St. Charles county, Mo., fifteen have been added to the church.

At the autumnal meeting of the English Congregational Union, the Rev. Dr. Legge, a prominent minister of that order, glorified his denomination after the following fashion: "I do thoroughly believe—and I flatter myself that you believe it too—that Europe is the heart and soul of the world; that England is the heart and soul of Europe; and that Congregational Dissenters are the life and soul of England!"

One of the Upper Canada Protestant Religious Societies is seeking for a charter of corporation with power to hold property for revenue purposes. This (says the *Witness*) we deeply regret, both because we think the principle wrong, and because the granting of one such charter by Parliament will paralyze all opposition to the granting of any number of the same kind to the church of Rome.

A correspondent of the *Puritan Recorder* says that on the 15th of October, a Congregational church was organized in Lawrence City, Kansas. The church was organized under a large tent, by the direction of Rev. Mr. Lum, of the Kansas City Mission. The society is to be known as "The Plymouth Church of Lawrence City."

There is said to be an interesting state of things in a Female Seminary in Culpepper Co, Va. Thirty of the pupils have been hopefully brought to a saving knowledge of the truth, and nearly all in attendance are specially interested. This is the result of no special effort, but is attributed to the impressions made in the Bible class taught in the school.

M. Jules Bornand, pastor of the French Protestant Church in New York, has issued proposals for a weekly religious newspaper, "*Fenille Religieuse des Etats Unis de l'Amerique du Nord*," of 16 pages, 8 vo, making a volume of 832 pages, at $2 a year. It is cordially recommended by Rev. Drs. Bond, Potts, Baird, Adams, Williams, and Tyng.

It is stated that a thousand Testaments were put in circulation at Ningpo in a single day at a literary examination in that city. There were not less than 6,000 or 8,000 literary men present from all parts of the country.

The Rev. H. R. Hitchcock and wife, Rev. Geo. Pierson and wife, and Rev. Wm. C. Baldwin and wife, sailed from Boston, Nov. 27th, in the ship Ocean Pearl, for Honolulu, to enter upon their missionary labors.

The Governor of Virginia, having doubts of his authority in matters of religion, abstains this year from appointing a day for religious Thanksgiving. He thinks the churches can establish a day for themselves, without the Government interfering with religion.

Edmund D. Ruffin, of Philadelphia, says the *Episcopal Recorder*, a graduate at the last commencement of the General Theological Seminary, has recently gone over to the church of Rome.

It is stated that Dr. Ives, late Bishop of the Protestant Episcopal church of North Carolina, has been appointed Professor in the Catholic College at Fordham, near New York.

The Bishop of London is said to be the owner of the Paddington estate, which is worth the enormous sum of a hundred thousand pounds sterling per year.

The Consistory of the Collegiate Churches of New York has given to the Theological Seminary, located at New Brunswick, the munificent donation of twenty-five thousand dollars.

The Directors of the Hawaiian Missionary Society are taking measures to send out six native missionaries and their wives to Micronesia.

Judge McLean, of the United States Court, recently stated, in giving his judgment in a maritime case, that "RUM has sunk more seamen than all the tempests that ever blew."

There are upwards of fifty converted Jews now exercising ministerial functions in the Church of England.

According to the synagogue rolls, there are more than 120,000 Jews in the United States.

ENCOURAGING.—Eld. Thomas E. Babcock sends us several subscribers for the *Recorder*, and adds: "These new subscribers, with their families, embraced the Sabbath a little more than a year ago. The Sabbath reform is steadily progressing. We occasionally see a cluster of its ripened fruits. There are a number of converts to the Lord's Sabbath in Brookfield, Tioga Co., Pa., six of whom have been recently added to the Church in Independence—four by immersion."

General Intelligence.

Meeting of Congress—President's Message.

The 33d Congress reassembled at Washington Dec. 4th for its second session, which will last till the 4th of March next. A quorum of both Houses being present, they soon organized, and sent word to the President that they were ready to receive any communication from him. The Message was immediately forthcoming. It is a long document—too long for us to give entire this week, without disarranging our usual order of publication, and omitting the news of the day already in type. We therefore defer it till next week; giving, meanwhile, from one of the daily papers, the following statement of its principal topics:—

Peaceable relations with all the world.

Adherence to our rights and to the Monroe doctrine.

No apprehension of a rapture, either with France, England or Spain; yet rigid adherence to every principle avowed in the previous message of Gen. Pierce, and in his inaugural.

Recommendations for increasing the Army and Navy.

Additional steamships and fortifications.

A revision of the tariff, if time should admit.

No ex parte legislation.

Recommendation of fire-proof buildings for State, Navy and War Departments.

Civilization and civil government for the Indians. Substitution of provisions and clothing for money.

Equalization of pensions. Prevention of frauds.

Recommendation to amend Cobb's Land Graduation bill.

An extension of the commission to settle private land claims in California.

A Boundary Commission to settle the limits of Washington Territory.

Settlement with the British Hudson's Bay and Puget Sound Companies.

Extension of the usefulness of the Patent Office.

Establishment of a Law Department of the Government, under the superintendence of the Attorney-General.

Regulation of fees of Marshals and Clerks of United States, District and Circuit Courts.

European News.

The steamer Africa, which sailed from Liverpool Nov. 18th, reached New York on the 29th.

There is nothing that deserves the name of later news from the seat of war. A pause seems to have ensued in the field-fighting before Sevastopol. Dispatches, both Russian and British, say "the seige progresses with regularity." Both parties are in want of reënforcements—the besiegers much more than the besieged. The Russians, however, begin to be short of ammunition. The rapid reduction, by battle and disease, of the allied force—now reduced to 50,000—had caused great alarm in England and France, and strenuous efforts were being made to send instant reënforcement.

At last accounts, the firing around Sevastopol was slack on both sides. Preparations were being made for the assault, and scaling ladders had been ordered up. Four Russian ships in the harbor had been sunk by the allies' fire. One of these ships was the "Twelve Apostles." Typhus has broken out in the city, from the number of unburied dead. Conflagrations are continually occurring from red hot shot. Water is exceedingly scarce. The Russians are preparing for street-to-street fighting. They are posting cannon to sweep the streets, and fortifying houses.

Winter was setting in severely, and the fleets had suffered some disasters by gales at sea.

An occurrence of the most horrible nature has taken place. The great Hospital, in Sevastopol, was set on fire by the shells of the allies, and was burned to the ground, with all its inmates—two thousand sick and wounded.

Sickness is on the increase in the allied camp. The cold is very severe at night. Severe weather had occurred at sea; a Turkish 80-gun ship and a frigate sunk in a gale.

Lieutenant-General Sir George Cathcart, Brigadier-General Strangeway, and Gen. Guldie, were killed in the action on the 5th. The attack on the 5th was made by 40,000 of the enemy. The redoubts were taken and retaken. The French lost 1,500 killed and wounded. The English had 2,000 killed and wounded. Russian loss is between 7,000 and 8,000.

The following letter, published in the *Constitutionnel*, will show one of the ways of carrying on the war around Sevastopol:—

"My Dear Father—I have been leading of late the life of a poacher. I am every day on the look-out for a Russian—being attached to a company of *francs tireurs*, or riflemen. Our duty is to fire at the Russian artillery men, and to protect our own, who have no reason to be dissatisfied with us as yet. I cannot say the same of the Russians, who appear to suffer greatly from our rifles. To give you an idea of our mode of acting, we set out at 2 in the morning, fully accoutred, with a supply of ammunition and biscuit. On our arrival in the trenches, we are provided with bags, a shovel, and a pickaxe. At a given signal we jump over the parapets with the agility of stags, and take refuge in some sheltered spot under the forts, where we dig a kind of rabbit hole to hide in. We place our bags as a protection on the side facing the enemy, and we then set to work. We remain in this sort of tomb the entire day; we leave it at dark, often exposed to a shower of grape-shot. You will naturally ask, dear father, what we have to do all that time. I can assure you that we have plenty to do. We load and fire, in rapid succession, and every shot tells on a Russian artillery man. The other day two officers were standing on a piece of timber placed on the top of a tower opposite my station for the purpose of having a view of our works. With two shots I brought down those gentlemen, and at the same moment the batteries let fly a discharge of balls, shells, and grape-shot, which fortunately passed over my head."

The Troy *Times* says that Mr. Zabad Mosher, of that city, has been made insane by Spiritualism. He has been sent to the Utica Asylum for the second time. Mr. M. was a respected and intelligent citizen, and his misfortune is deeply lamented.

California News.

One week later news from California was received in New York on the 2d inst., but it has no feature of special importance, except a general revival of trade.

A duel had been fought between Colonel Woodlief and Achilles Kewan, in which the former was killed. The Colonel made his will a few days before, leaving all he possessed to his widow. He is said to have been engaged in eight duels prior to this fatal one.

An execution of two criminals took place at Coloma, on the 3d ult., attended by additional horrors, from the circumstance of both knots slipping when the drop fell, requiring a readjustment of the ropes and the prolonged agony of the sufferers.

Financial "Deficiencies."

The past few weeks have developed in New York a very large number of what in financial circles are mildly called "deficiencies." The two cases following will illustrate the meaning of the term:—

At the meeting of the Directors of the National Bank of New York, on Friday, Nov. 24th, the President, Mr. Jas. Gallatin, in looking over the statement laid before the Board, noticed a sudden, and to all appearances unaccountable reduction in the item of outstanding circulation, since the previous discount day, of about $60,000. An examination of the accounts of the Paying Teller, Mr. Howland, led to the discovery that he had withdrawn from his cash $60,000 or $80,000 circulating notes, and the whole of the money, with the exception of a few thousand dollars represented by bills receivable which he had purchased, was found on his person, together with the bills. His plan it appears was to force the balance of his accounts by reporting these notes on hand, and the supposition is that his whole scheme of "deficiency" was to have been consummated the next day by the purchase of European funds, with which he was to clear for parts unknown.

The American Exchange Bank, on examination of the accounts of its first teller, Mr. Candee, find a deficiency of $138,500, arising from his having certified cheques for irresponsible parties. To protect the bank, he has placed in their hands bonds and mortgages to the amount of $161,977, which, with his sureties bond, $20,000, it is *hoped* will cover his *deficiencies*. Mr. Candee, it was stated, had been a large speculator in property in the village of Yonkers, on the North River, owning and occupying a costly establishment in the village. He had borne a fair character before this occurrence, and was supposed to have some money of his own, which averted suspicion. It appears, however, that a large fancy store in which he was engaged with his brother-in-law, in Broadway, has absorbed a considerable portion of his deficiencies. The wrong doing has been going on for some time, possibly a year or more.

A Strange Case.—On the evening of the 22d ult., an aged, and at that time unknown man, was knocked down and run over in Forty-second st., New York, by one of the Third-ave. cars, and died the same night at Bellevue Hospital. The day following an inquest was held upon the body, and no one appearing to recognize it, it was interred as that of an unknown man, in Potter's Field, at the expense of the City. On the 1st of December, it was discovered to be that of Mr. John L. Norton, a resident of Pearl-st., nearly 85 years of age, and worth about half a million of dollars. It appears that on the 22d ult., he left his residence, and not returning to it again, his relatives fearing, that he had been drowned, or had met with some accident, instituted a search for him, which proved unavailing until that day, when they called at the Coroner's office, and, upon looking over the book, discovered by the description of his dress and the articles found upon his person, that he had been buried as an "unknown man." Steps were immediately taken to disinter the body for the purpose of depositing it in a vault in Greenwood Cemetery. Mr. Brock Carrol, late a police officer in this City, and grandson to the deceased, has been willed the bulk of his property. Mr. C. was active at the time of the "Norwalk Railroad calamity," and saved the life of a Southern gentleman, who offered him, afterward, a present of $2,000, which Mr. C. declined accepting. The trunk containing the will and other documents belonging to the deceased, has been placed in charge of the Chief of Police for safe keeping, until it shall be decided to whom it legally belongs.

Hiring Slaves—Decision in Georgia.—In the State of Georgia, in 1850, Francis Lennard hired of Rebecca Boynton a negro slave for the term of one year, for the sum of $100, giving his note for the amount. The contract was made in January; on the 1st of May the negro died, and Lennard refused to pay the note on the ground that the services bargained for had not been rendered. The note was sued, and the case was carried from the Superior to the Supreme Court, where judgment was rendered against Lennard. The only question in the case, according to the Judge was, whether, when a negro is hired for a year, and dies within the time, the hirer should be allowed a credit upon his note, from the time of the negro's death, to the end of the year, for so much as the hire for that time would amount to. The Judge decides that the hirer is entitled to no credit upon his note, in the absence of a stipulation to that effect. The principle laid down is identical with that which requires the lessee of a tenement, in the absence of a special agreement to the contrary, to pay rent for the term for which it is leased, though it may burn down over his head as soon as the occupant takes possession of the premises.

The Russian Ports Blockaded.—Official information has been received at the Department of State, Washington, that the French and English Governments have determined, if the war with Russia shall continue, to close, by blockade, in the coming spring, and as early in that season as the ships to enforce it can reach their necessary anchorage; the several ports of Russia in the Baltic and White Seas; and that orders, which will be put in execution with the least possible delay, have been given to the French and English admirals commanding in the Black Sea to enforce the blockade of the mouths of the Danube, and of all the ports in the Black Sea and in the Sea of Azoff, remaining in the hands of Russia.

Broken Bank Bills.—The notes of the broken Banks are selling in Wall-st., at the annexed rates: Canal Bank, Cleveland, Ohio, 90 cents; City Bank of Columbus, Ohio, 90 cts.; Bank of Circleville, Ohio, 50 cts.; Merchants' Bank, Bridgeton, N. J., 60 cts.; Government Stock Bank at Ann Arbor, Michigan, 50 cts.; Bank of Washtenaw, Michigan, 25 cts.; Erie and Kalamazoo Railroad Bank, Michigan, 25 cts.; Farmers' and Mechanics' Bank of Kent County, Maryland, 40 cts.; Newport Safety Fund Bank, Kentucky, 20 cts.; Kentucky Trust Company, Kentucky, 30 cts.; Stark Bank, Vermont, 50 cts.; Cochituate Bank, Boston, Mass., 50 cts.; Knickerbocker Bank, New York City, 90 cts.; Lewis County Bank, Martinsburgh, N. Y., 25 cts.; Union Bank, Chicago, Illinois, 75 cts.; City Bank, Chicago, Illinois, 75 cts.; Merchants' and Mechanics' Bank, Chicago, Illinois, 75 cts.; Farmers' Bank, Chicago, Illinois, 75 cts.; Oshkosh City Bank, Wisconsin, 75 cts.; Ship Builders' Bank, Maine, 60 cts.

A Family of Congressmen.—The Boston Transcript of Nov. 27th, says: The Hon. C. C. Washburn, M. C. elect from Wisconsin, passed through this city on Saturday, on a visit to his relatives in Maine, intending to pass our New England festival in his native place. Mr. Washburn is the youngest of the three brothers elected as members of the House of Representatives in the next Congress. His oldest brother is the Hon. Israel Washburn, Jr., of the Fifth District of Maine. This gentleman is elected for his third term. The Hon. E. B. Washburn, of the First District in Illinois, is another brother, elected for his second term; and the younger brother is elected in Wisconsin for the first time. These gentlemen are of the old New England stock; they were born in Farmington, Maine, and have many relatives in various parts of Maine and in Boston. The eldest of the three is about 42 years of age. They are educated men, and all belong to the legal profession.

Throwing Vitriol.—Within a few months past, a large number of fine dresses have been destroyed in New York by vitriol thrown upon them as their wearers were walking the streets, or entering theaters. The perpetrator of these outrages has at last been secured, and turns out to be Theodore H. Gray, a master-printer, doing business at No. 67 Beekman-street. He had been the terror of ladies for some months, many of whom were in dread for their dresses and persons every time they passed through the streets, or left places of public amusement. Officer Reed most adroitly succeeded in capturing his prisoner, with the tin can which he employed for his nefarious purposes on his person. In his examination it came out that he is a member in good standing of the Allen-street Baptist Church, and the reason assigned by him for his outrages was "to deter ladies from going to the theaters." His friends impute his conduct to insanity; if this plea is to be sustained, we can only say he has exhibited much "method in his madness!"

The People's College.—A Circular of the People's College of the State of New York has been issued, which sets forth the objects of the institution as follows:—

1st. The objects of this institution are to impart such a thorough scientific and practical education, as will qualify its graduate for discharging the practical duties of life.

2d. To open the halls of science to all classes and conditions of society, by reducing the cost of tuition, board and clothing, and enabling the student to defray the greater portion of the expenses in labor.

3d. To qualify graduates for entering at once upon the business of their choice, by giving not only a theoretic, but a full, systematic, and practical course of instruction, illustrative of the principles and laws upon which their business is based, and should be conducted.

4th. To elevate labor, by requiring every student to work upon the farm, or in the shop, a certain portion of every working day, thus giving to each student the physical exercise necessary to secure health, while acquiring a scientific and practical education.

5th. To educate not only the young, but to afford adults also opportunities for pursuing any favorite branch of study, by establishing regular courses of lectures upon practical science.

SUMMARY.

In consequence of the numerous complaints made to the New York Post-Office, for the last few months, of non-receito of letters containing large amounts of money, an inquiry was set on foot, and after some investigation, it was found that these repeated robberies were effected during the distribution of the night mails from South and East. A plan was then adopted to secure the perpetrator, which resulted in the capture of James Fitzgibbons, night clerk and porter, who was observed to purloin two money packages from the counter. An eye was kept on him till he was about to leave in the morning, when he was followed and brought back to a private office and the packages found on his person. He was accordingly handed over to the United States Marshal.

There is no doubt that the propositions submitted to the people of Rhode Island, to abolish the registry tax, and to extend the time of registration, are rejected. The propositions to vest the pardoning power in the Governor, and to abolish the country session of the General Assembly, are adopted. The proposition to relieve the town clerks from the duty of transmitting lists of voters to the General Assembly, is so close that we must wait for the official returns.

On Monday night, Nov. 27th, a meeting was held in New York, at the Chinese Assembly Rooms, in behalf of Polish Nationality and Independence, commemorative of the Twenty-fourth Anniversary of Poland's last gallant insurrection. John P. Hale presided, and addresses in sympathy with Poland were made in the English, Polish, French, German, Italian, and Spanish languages.

It is said that Russian agents abound in London, part of whose duties it is carefully to examine all the public papers and immediately transmit every thing important to St. Petersburg. A telegraphic communication between London and St. Petersburg occupies eight hours. The contents of the morning papers are known by the Czar at three o'clock the same day.

An article in the *London Quarterly Review*, treating of the way London is fed, says that "if Norway, stretching from the Frozen Ocean down to the southern extremity of the North Sea, were to summon all its people to one vast conclave, they would number but little more than half the souls within the London bills or mortality; Switzerland, in her thousand valleys, could not muster such an army; and even busy Holland, within her mast-thronged harbors, humming cities, and populous plains, could barely overmatch the close-packed millions within sound of the great bell of St. Paul's.

An interesting case of excision of a portion of the lower jaw-bone was performed a few days since, by Dr. Fred. Geddings, before the students of the Medical College, Charlestown, Mass. The patient was a negro girl, about 14 years old. After dissecting the flap of the cheek, he divided the bone in two places, removing a section of about two inches in length. No chloroform was administered, yet the patient continued calm and quiet during the whole operation, which has ever been regarded one of the most painful in surgery. It lasted about five minutes.

Coroner Gamble the other day held an inquest at the house of Mr. John H. Bomstead, No. 88 Attorney-st., New York, upon the body of Francis Bomstead, a child 20 months old, who was killed by a fall. The mother testified that the child was sitting upon a chair by the table, with an apple in one hand and an orange in the other, when it turned and kissed her, and then the little sister, saying how he loved them and his father, when he fell out of his chair and broke his neck—death ensuing immediately afterward.

The town of Genesee, Allegany Co., N. Y., gave, probably, the strongest vote for freedom and temperance, at the late election, of any town in the State. One hundred and forty four votes in all were cast: of these Myron H. Clark, for Governor, received 136; Bradford R. Wood, for Lieutenant Governor, 134; Nathan V. Hull, Free Democratic candidate for Congress, 134; and Enos Baldwin, Free Democratic candidate for Justice of Sessions, 135.

A dispatch dated Portland, Friday, Dec. 1, 1854, says: As the train from Island Pond for Portland, on the Grand Trunk Railway, was nearing Thompson's Mills, in the town of Starks, this morning, the snow plow got off the track and stopped the train. At that moment the down freight train came along and ran into it, smashing the cars badly and injuring eight or ten persons severely. Two passenger cars took fire and were consumed.

A failure in the lumber-trade recently occurred at Quebec, with liabilities to the amount of $2,000,000—that of Mr. Wm. Price. Unlike most of the other lumber-merchants here, he used to get out his own lumber, for which purpose he kept going over thirty several establishments, one of which—that at Chicoutimi—loaded 29 vessels for Liverpool, with sawed lumber, last year. All these immense establishments are at a stand still. Other failures in the same business are anticipated.

There were 350 deaths in this City during the last week; 63 men, 77 women, 116 boys, and 94 girls. Of the total number, 46 died of consumption, 9 of bronchitis, 10 of congestion of the brain, 14 of diarrhea, 15 of dropsy in the head, 34 of fevers, 39 of inflammatory complaints, 27 of convulsions, 9 of croup, and 16 of marasmus. The nativity table gives 235 natives of the United States, 54 of Ireland, and 41 of Germany.

The Baltic brought no tidings of the three boats of the ill-fated Arctic, or of the passengers who were in them at the time of the disaster. Hopes were entertained that by this time some of the boats would have been fallen in with by European-bound vessels, but up to the sailing of the Baltic there had been no intelligence of them, and yet forty-eight days had elapsed from the date of the accident (Sept. 27) to the sailing of the Baltic from Liverpool.

A dispatch dated Boston, Wednesday, Nov. 29, 1854, says: In the United States Circuit Court to-day, Judge Sprague presiding, the Rev. Theodore Parker was arraigned on a charge of inciting to riot, and of aiding the attempt to rescue the fugitive slave, Anthony Burns, from the hands of the United States authorities. Mr. Parker waived the reading of the indictment against him, and gave bail in the sum of $1,500 to appear for trial at the March Term of the Court.

Lettings under the new law for the enlargement and completion of the New York canals, have now been made to the extent of more than one half the entire work. Thus far the work has been let at prices far below the estimates of the engineers. Jobs estimated, in the aggregate, at nearly six millions, have been taken at about four millions and a half—averaging about 21 per cent. less than the estimated cost.

Mr. Abel Ruggles, of Carmel, aged 84 years, one of the most worthy residents of that town, having largely enjoyed the confidence of the town in earlier life, left home in July last to visit a brother at Valatia, Columbia county, New York, a sister at Oregon City, in Illinois, and another sister at Racine, Wis., neither of whom he had seen for half a century.

Dr. Thomas Cottman, a native of the United States, now surgeon in the Russian army, and one of the Czar's privy counselors, is a native of Somerset Co., Maryland, and when an infant removed to Worcester County with his parents. He is a brother of S. B. Cottman, living at the old Cottman plantation, and has near relatives living in different parts of Maryland.

A girl by the name of Ellen White, took the small pox in Boston a short time ago, and before her convalescence was completed, started on board the cars for her home in Thetford, Vt. During her brief journey of a few hours she communicated the loathsome disease to some dozen people who were on board the train in which she traveled, several of whom have since died.

The closing of the New York Canals is officially announced to take place on the 5th of December. The season is described by the Rochester *Union* as having been a dull one for all connected with the navigation of the Canals.

Bank of England notes are now signed by machinery, by which a saving of £10,000 a year is effected. The machinery is of the most ingenious description, and is held for the exclusive use of that institution.

Gov. Reeder of Kansas has decided not to order an Election for a Territorial Legislature this season. His main public reasons are: 1. That no census has yet been taken of the inhabitants to serve as a basis of representation; 2. That there is no fit place for holding a Legislative Session. This decision has been taken in high dudgeon by the Missouri slaveholders, who had arranged to throw over voters enough into the Territory to elect a Legislature which would expressly legalize Slavery. They are very fiercely assailing Gov. R. as a land-speculator, monopolist, &c.

Judge Drummond, of the U. S. Circuit Court for Illinois, recently decided, in the case of Joseph C. Mitchell, free negro, vs. Charles H. Lamar, that a free negro was not a citizen of the United States, and therefore not entitled to maintain a suit before the U. S. Circuit Court. It is stated that Judge McLean coincided in the opinion of Judge Drummond.

A dispatch dated Albany, Tuesday, Nov. 28, 1854, says: Joshua Maine, Esq., the member elect to the Assembly from Jefferson County, had a narrow escape from drowning on Friday last, in consequence of a boat capsizing that he was in while crossing the Chaumont Bay. He and two others were in the water one hour and a half before they were rescued.

John Ross, an experienced apiarist of Warren, has a hive of bees from which he has taken, during the past year, two hundred and forty pounds of extra honey! The bees were fed upon a preparation made by himself, and by the use of which they do far better than when left to collect their own food.

The entire repeal of the Usury Laws in Great Britain, says the New York *Courier*, has been accomplished at the recent session of Parliament. If is now lawful in Great Britain to loan money at any rate of interest, and on any description of property, either real estate or otherwise.

The compensation paid to the New York Pilots employed in taking vessels out and into the harbor, is about $200,000 a year. The pilot laws and the harbor rules which from time to time have been amended, are said to operate with great advantage to the service and to the security of the shipping interests.

The receipts of the Boston and Albany railroad, for the ten months ending 31st Oct., exhibit a gain over the corresponding months of last year equal to $200,000; and it is anticipated that the business of the two following months will swell the receipts to $230,000 over those of last year.

Wm. R. Jackson, of Baltimore, has invented a plan for a cabin of a steamer or other sea-going vessel, which will float the passengers in case of accident. It is to be made so that it can be easily detached from the sinking vessel, by unkeying the iron stay-rods.

At the approaching session of the respective Legislatures there will be Senators of the United States to elect in Illinois, Iowa, Wisconsin, Arkansas, Missouri, Louisiana, North Carolina, Pennsylvania, New York, Maine, and California. New Hampshire will elect two in May next.

From a private letter received by the last mail from Dublin, we learn that the British Government are making preparations to ballot for soldiers in that city or throughout the provincial towns. The inhabitants of the city in consequence were thrown into a state of excitement and consternation.

The exportation of apples from Franklin Co., Mass., this year, is very great; there were, lately, at one time, 1100 barrels at the Greenfield station awaiting transportation by railroad—a fact illustrating the value of railroad communication and of fruit-growing to farmers.

The Hon. Alexis Ward, Member of Assembly elect from Orleans County, N. Y., died after a short illness at his residence in Hebron, Nov. 28th. Mr. Ward was a lawyer of some eminence, and had just been elected to the Assembly.

Coal has at length been discovered about two miles west of Bradford, Canada, and not far from the line of the railroad between Niagara and Detroit. The discovery was made in sinking a well. When down about sixteen feet a rich bed of coal was struck, which is pronounced to be of a very superior quality.

We have most gratifying intelligence from the Kane Expedition, though it seems almost too good to be true. It is a report, by way of Lake Superior, that the bodies of Sir John Franklin and his men have been found by Dr. Kane's party. They are completely frozen and are unmutilated.

The *Lake Superior Mining News* of the 27th ult. says: "We learn by private letters, that the bodies of Sir John Franklin and his men have been found by Dr. Kane's party, completely frozen, and in a perfect state of preservation."

The King of Prussia has given orders that no hindrances are to be thrown in the way of the Baptists, who are about to erect a chapel between Barmea and Elberfield; permission has also been granted the Baptists to erect a temple at Ihren.

The steamers Pacific and Grand Tower came in collision on the Mississippi River, near Memphis, and both sunk—proving a total loss. The passengers were all saved. The Pacific was bound down the river, and the Grand Tower up.

It is reported that Capt. Luce is about to embark in business on shore. Mr. Collins, it is said, declines reëmploying on his steamers any of the persons who were in service on board of the Arctic.

Magraw & Reeside, mail contractors between Independence and Salt Lake, have received intelligence of the loss of eleven mules. They were taken by the Pawnee Indians. Two drivers had been shot.

Four slaves, two of them belonging to Prof. Strange, one to Mr. Dey, and one to Mr. Herman, all of Norfolk, mysteriously disappeared on Saturday night last. They must have taken the "new tunnel" route.

A report has been laid before the New York Board of Aldermen in favor of leasing the lower end of the Park to the United States Government as a site for a Post-Office.

Statistics respecting the loss of life by shipwreck, now being compiled by Mr. Meriam, show that over 7,000 lives have been lost by this means during the last eighteen months.

MARRIED.

In Brooklyn, N. J., Nov. 22, by Rev. H. H. Baker, Mr. Simeon F. Randolph, of Plainfield, to Miss Frances Remer, of New Brunswick.

At High-st. Baptist Church, Providence, R. I., Nov. 26th, 1854, by Rev. George R. Dawson, Mr. John E. Crandall, of Phenix, to Miss Isabella C. Brooks, of Providence.

At Potter Hill, R. I., Nov. 30th, 1854, by Eld. C. M. Lewis, Mr. Charles A. Stillman, of Westerly, to Miss Eliza C. Stillman, of Hopkinton.

DIED.

In Adams, Jefferson Co., N. Y., Oct. 30th, 1854, Mrs. Eliza Ann Saunders, wife of Dea. Roswell Saunders, of consumption, in the 49th year of her age. Sister Saunders made a public profession of religion in 1850, when she united with the Seventh-day Baptist Church, of which she remained a member until her death. During her sickness, she enjoyed the comforting influences of the grace of God in a very unusual degree. A strong faith gave her the assurance of life beyond the grave, and the spiritual presence of her Saviour mitigated every pain. For the future she had no doubts—no fears—she lived in constant longing to depart and be with Jesus. As her end approached, she regarded the signs of her approaching dissolution with triumphant pleasure, and left the world in peace. J. S.

In Adams, Sept. 10th, 1854, Mrs. Charlotte Crosby, wife of Dea. Elisha Crosby, of the heart disease, in the 68th year of her age. J. S.

In Houston, Texas, Nov. 4, of yellow fever, Dorsey W. Vedder, son of Dr. Wm. Vedder, of DeRuyter, aged 22 years—a young man of much promise. J. R. I.

LETTERS.

Yearly Meeting.

THE next Yearly Meeting of the Seventh-day Baptist Churches in New Jersey will be held with the Church at Marlboro, N. J., commencing on Sixth-day before the fourth Sabbath in December, 1854.

W. C. WHITFORD, Secretary.

Western Association—Executive Board.

THE Executive Board of the Western Association will meet at Independence on the first Wednesday in January next. Persons having communications for said Board would do well to forward the same a short time previous to the meeting, as it frequently occurs that the reports are not received till after the meeting is had. E. R. CLARKE, Sec. of Board.

Mountain Glen Water Cure and Summer Retreat,
For the Reception of Patients and Boarders,
PLAINFIELD, N. J.

THE location of this establishment is peculiarly inviting, being on the mountain side, where fresh breezes always abound, and musquetoes never come. The buildings are nearly new; the water is soft and pure; the air is dry and healthful; and the scenery is romantic and beautiful. In every direction there are pleasant walks or drives. The celebrated Washington Rock is only two miles distant.

No pains will be spared to make the Glen a "home" to such as seek its quiet retreat for recreation or the restoration of health.

A. UTTER, M. D.,
Physician and Proprietor.

Central Railroad Company of New Jersey.

NEW YORK, SOMERVILLE, EASTON, &c. *Winter Arrangements*, commencing Nov. 20, 1854: Leave New York for Easton by steamers RED JACKET and WYOMING, from Pier No. 2 North River, at 8 A. M., 1 and 4 P. M, connecting at Elizabethtown with trains on the New Jersey Railroad, which leave New York from foot of Courtlandt-st. at 8 A. M., 12 M. and 4 P. M.

For Somerville (way) by New Jersey Railroad from foot of Courtlandt-st. only at 5 P. M.

Returning—leave Phillipsburg (opposite Easton) at 6.15 and 9.20 A. M. and 3 P. M.; Somerville (way train) at 6.35 A. M.

New York and Elizabethport.

Leave New York at 8 and 10.40 A. M., 1 and 4 P. M.
Leave Elizabethport at 8 and 9.45 A. M., 1.5 and 3.30 P. M.

JOHN O. STERNS, Superintendent.

New York and Erie Railroad.

ON and after Monday, Nov. 20, and until further further notice, Trains will leave the pier foot of Duane-st., New York, as follows:

Buffalo Express at 7 A. M. for Buffalo.
Dunkirk Express at 7 A. M. for Dunkirk.
Mail at 8½ A. M. for Dunkirk and Buffalo, and all intermediate stations.
Rockland Passenger at 2.30 P. M. (from foot of Chambers-st.) via Piermont, for Suffern and intermediate stations.
Way Passenger at 4 P. M. for Otisville and intermediate stations.
Night Express at 5 P. M. for Dunkirk and Buffalo.
Emigrant at 5 P. M. for Dunkirk and Buffalo and intermediate stations.

On Sundays only one express train, at 5 P. M.

These Express Trains connect at Buffalo and Dunkirk with the Lake Shore Railroad for Cleveland, Cincinnati, Toledo, Detroit, Chicago, &c.

D. C. McCALLUM, General Sup't.

Hudson River Railroad.

WINTER ARRANGEMENT.—On and after Monday, Nov. 20, 1854, the Passenger Trains will run daily (Sunday excepted) as follows: Leave New York from the station corner Chambers-st. and College Place, at

7.00 A M—Express Train for Albany and Troy, connecting with Northern and Western Trains.
9.00 A M—Mail Train. Through Way Train, 12 M.
4.45 P M—Express Train. Accommodation Train 6 P M.

For Poughkeepsie: Way Passenger Trains at 7.15 and 10.30 A M.
For Peekskill at 3, 4 and 5.30 P M.
For Tarrytown at 1 and 8 P M.
The Tarrytown, Peekskill and Poughkeepsie Trains stop at all the Way Stations.
Passengers taken at Chambers, Canal, Christopher, 14th and 31st-sts.
SUNDAY MAIL TRAIN at 9 A M, from Canal-st. for Albany, stopping at all Way Stations.

OLIVER H. LEE, Vice-President.

Miscellaneous.

Ladies' Health vs. Fashions.

A sensible lady correspondent of the *Home Journal* thus writes on this subject:—

"Would that the women of America would arouse to a consciousness of the responsibility resting upon THEM, and firmly discountenance any demand of fashion which can seriously affect their health! Of what consequence will it be, some twenty years hence, whether they now strictly conform to its every caprice or not? but if, by so doing, their health is injured, how fearfully will they then see the effects of their mad folly, not only in themselves, but, it may be, in their children also. 'In a world where we begin with mothers,' it is not asking too much that they should see that their own duty is accomplished.

"Look at the 'sterner sex,' who, though they vary their own dress as fashion dictates seem to have a more sensible leader to follow; for, in what particular can you find them sacrificing health to its demands? They may wear, 'continuations of the Vesuvius pattern,' coats long or short waisted, yet they are careful to dress so as to keep warm and dry.

"Look at their feet! You do not see one in a hundred venture forth, in damp, chilly weather, with a thin-soled cloth boot. No! they wear boots with thick soles and high heels; while, on the other hand, you will not see one woman in a thousand who, when the rain is not pouring, but when the pavement is only damp and cold, wears any thing thicker than a single-soled prunella gaiter! If you doubt my assertion, go look for yourself at the thousands who walk in our crowded cities. Now, I ask, why is it so? Why is there such a difference? Is it that women are inferior to men in the possession of good common sense; or is it that they dress in this absurd manner to please the eye of man? If so, he must bear some of the blame, if instead of boldly contemning their folly, he encourages them, by admiring the beauty of feet dressed in this manner. Let fair ladies dress as they please in their warm houses, or in warm, dry weather, but, for pity's sake, in cold winter weather, let them find something warmer than a boot which a strong healthy man would not consider sufficient protection for himself from the dews of summer.

"We are called 'the weaker sex;' but judging only by appearances, it is a sad misnomer; for what man ever thinks of going out in a cold autumn or winter's day, with but a thickness of embroidered lace or muslin over his chest, though underneath a warm out covering, which every time it is in any way displaced, lets the cold, keen air creep into the very seat of life? Not he! He has his warm coat buttoned up to his chin. He does not go out with flowing sleeves, with a fur cuff to keep part of the arm warm, leaving plenty of room for the cold air to penetrate around the upper and more susceptible part of the arm. No; his sleeves are thick, long and warm. And why is it that fashion cannot dictate as suitable a dress for ladies' wear in winter, as she does in summer, when she rarely errs. She might with as much propriety insist upon our wearing furs and velvet in midsummer, as on our wearing lace chemisettes, lace flowing sleeves, etc., as a promenade dress in winter."

A Ducal Palace in New York.

The magnificent structure now approaching completion, on the corner of Thirty-fourth-st. and Fifth-av., for Dr. S. P. Townsend, of sarsaparilla memory, excites almost as much of wonderment and curiosity as did ever its more pretending cotempory, the Crystal Palace. Though having a very imposing exterior of handsomely wrought brown stone, an observer would scarcely suspect it of surpassing in costly elegance any private mansion in the New World, and vieing with the most renowned mansions and halls of the Old. A brief description will convey some idea of this new claimant to the attention of wonder-seekers and letter-writers. The building is 90 by 56 feet, and occupies five lots of ground, in an elevated position, which cost $42,000. Its general appearance is of the rich, massive character common to many first-class houses, though internally the arrangements have the claim of originality. It has been remarked, however, by those who have visited the European Continent, that the house has some resemblance to the residence of the late Duke of Parma. Upon entering, the visitor finds himself at the threshhold of a grand hall, flanked on either side by tiers of galleries and columns, which extend upward to the roof, where they terminate under a gorgeous dome. The galleries, walls and columns are all decorated in the richest manner, with fresco-painting, gilding and elaborate moldings. The prevailing color employed in decorating the ceilings being blue, relieved with gold, these are presented most prominently to the eye, but the effect of the whole, when first beheld, is to bewilder with a sense of magnificence. The columns supporting the galleries through the several stories, are sixty in number, of the Corinthian style, which are sustained at the base, on the first story, by pilasters of scagliola. Passing to the rear, in one corner of the edifice is a grand spiral staircase, having a diameter of about twenty feet, and terminating in the highest story, beneath a rich dome. Niches at the side are to be filled with appropriate pieces of statuary, and decorations in plaster. Fresco, gold and carved wood, are introduced at the discretion of the artist. The cost of this stairway will not be far from $3,000. The chambers and other apartments above are all finished in the same superb style. The fresco-paintings upon the walls generally represent scenes in Italy, though there are many figures, scrolls, &c., purely fanciful; other portions, such as are designed for the picture-gallery and library, are classic; the bathing-rooms are furnished with nymphs and juvenile angels, &c. One of the "curiosities" is a chapel for religious worship, which occupies a portion of the third and fourth stories. The apartment is 33 by 16 1-2 feet, furnished in the Gothic style, and is to be provided with a superb altar-piece to represent the baptism of the Redeemer. The requisite amount of "dim, religious light," properly colored, enters through a single circular window of stained glass. There is also a gymnasium, with suitable apparatus for physical exercise, and a bowling saloon. The upper floors being too lofty to receive water from the public works, a tank is provided, into which water for the baths, &c., will be forced by a pump. The picture-gallery is 28 by 24 feet, and it is said that twenty pictures for it are in course of preparation in Italy, by the best living masters, at an average cost of $1,000 each. Some of the apartments are provided with very costly fire-places. We noticed one of beautiful Italian marble which cost $400. The entire cost of the building and ground is estimated at $200,000; the contract for stone is about $30,000; fresco-painting, $6,000; plastering, from $8,000 to $10,000, and the carpenters' contract is about $30,000. Such, in brief, is the last and the greatest of the great "up-town" houses. [Journal of Commerce.

A Hard Case.

At a meeting of the New York Prison Association, held a few evenings since, account was given of several convicts who, after leaving prison, had been taken in charge by the Association. One of these is described as follows:—

This man says he came to this country in June, 1852. He brought with him $1,100, the proceeds of a respectable business in Germany, that political troubles alone influenced him to leave. On his arrival here he succeeded in procuring a situation in a German Emigrant Office. He immediately sent for his three children, left behind. He had been engaged about four months in this office, when a person came in wishing small gold coin for five $20 gold pieces; he says he went to the drawer, as he was accustomed to do, and gave the required small moneys, which the man carefully counted and found correct. At a later hour of the day, some eight or nine hours subsequent, the same person returned, (under the influence of drink,) and represented that $45 of the coin had in the morning were spurious. A warrant was had, and this man was arrested and fully committed for trial, on a charge of grand larceny. The Police Officer who arrested him came into the Tombs to see him, and advised him to get bail. He said he could find him good bail, if he paid him for his trouble; he wanted $30, which this man gave him. The man giving bail he was to pay $10; that he paid. He was urged to secure without delay a good lawyer; his services were engaged for $25—to another he paid $10. He was bailed out at the end of four months. He was tried, and although he gave his counsel an additiona fee of $10, and $4 to an interpreter, yet he was found guilty. Judge Beebe sentenced him the shortest term prescribed by law. He now returns to this city, having lost everything he possessed. He had been informed that his three motherless children reached New York within a month after his conviction, but where to find them now he cannot tell. His means are exhausted, and he has been left destitute.

National Characteristics.

Some extracts from the "Unpublished Journals of Travel" of a very original thinker and shrewd observer are given in a recent number of an English magazine. Among them are the following, in reference to the characteristics of several nations:

"Once upon a time, I lost my way in New York. Asked Yankee: he immediately stopped, turned his back to me, put his hands into his pockets, and began to whistle. I was just going to ask some one else, when I heard him say, through his nose, that if I would follow him, he would show me the way. He did, too, though it took him some half a mile out of his road. Once upon a time, I lost my way in London. Asked Englishman: he stopped exactly the fifteenth part of a second, said, 'first turn to the left, second turn to the right, and there you are, sir!' Once upon a time, I lost my way in Paris. Asked Frenchman: he was very voluble and explained very politely. Once upon a time, I lost my way in the town of Augsburg. Asked a German: off went his hat, and off went his tongue, with a volubility of warmth and benevolence that was quite delightful and most confusing. But where is the difference between the Frenchman and the German? True, they are, at first sight, much alike; but, look closer, and you will see the motive is utterly different. In the German it is eagerness to please you. In the Frenchman it is a desire you should be pleased with him. It is as plain as if they said so, in so many words."

"The English woman is respectful and proud; the French woman is gay and agreeable; the Italian is ardent and passionate; the American woman is sincere and affectionate. With an English woman love is a principle; with a French woman it is a caprice; with an Italian it is passion; with an American it is sentiment. A man is married to an English lady; united to a French woman; cohabits with an Italian; and is wedded to an American. An English woman is anxious to secure a lord; a French woman a companion; an Italian a lover; an American a husband. The Englishman respects his lady; the Frenchman esteems his companion; the Italian adores his mistress; the American loves his wife. At night the Englishman returns to his house; the Frenchman to his establishment; the Italian to his retreat; the American to his home. When an Englishman is sick his lady visits him; when a Frenchman is sick his companion pities him; when an Italian is sick his mistress sighs over him; when an American is sick his wife nurses him. When an Englishman dies his lady is bereaved; when a Frenchman dies his companion grieves; when an Italian dies his mistress laments; when an American dies his wife mourns. An Englishwoman instructs her offspring; a French woman teaches her progeny; an Italian rears her young; an American educates her child."

Broadway.

Along the dusty pavement streams a busy host. The eye in vain attempts to fix upon the flitting faces. The passing glimpse and the sudden transition from a fair to a shriveled face, from a laughing to a frowning one, from heavy to pinched features, suggests the comical gutta-percha heads, which may be made to assume every imaginable expression in as many seconds, or torments one with the notion that he sees his own face distorted in a succession of convex mirrors. A pale being, with sunken cheeks, follows close behind a portly, round faced man, and a harrassed, miserly countenance, comes next; a broad, benevolent Quaker face, a long nose, a short one, goggle eyes, and eyes hidden under lowering brows, lips like Cupid's brow, and mouths of extraordinary dimensions, chase one another with dizzy rapidity. A hunch back and a giant walk in close contrast. A girl, fair as a Circassian, next a negress, black as night; a Canadian with his broad English face, and close fur wrappings, and beside him a Chinese in flowing robes; a fair woman, in trailing brocade, and a Bloomer, whose drapery scorns to touch the pavement; a dandy, on ghost-like stilts, his fists lost in roomy sleeves, and a beggar in rags, are all in a moment daguerreotyped for the memory. Then the eye falls upon a babe in a long embroidered cloak, with nurserymaid. At her side, a young urchin runs along with bare knees, while his head and face are lost in fur and feathers. Poor little victim of fashion!

Then comes a Fourierite or a hydropathist, with long uncut beard; then an Indian minus that hirsute ornament. A country belle gazes at the passing crowd, puzzled to know the fashions, and perhaps ignorantly selects her patterns from a richly dressed unfortunate. At the corner stands a group of bewildered Dutch emigrants, in wooden shoes and wide bordered caps, bonnetless, moneyless, and homeless. A sweet bride and her happy groom, a widow in weeds, hurry past. Then comes a pale student, and beside him a brainless millionaire, and a fair heiress, whose books and learning were left at boarding school. She spurns the shabby poet, or artist, and never dreams or cares to know that the eldernest of the mountain has been robbed for her delicate throat, that the deserts of Africa have contributed her plumes, that the jungles of Hindoostan or India have been rifled for her fan, that the bed of the ocean has been disturbed for her pearls, that the earth has been searched for her gold and her gems, or that the tears of an embroidery girl are interwoven in the exquisite tracery of her handkerchief, and that its finewrought work has left the toiler blind. She sees nothing from the windows of her castled pride but wealth and luxury and envious or adulatory glances. Thus they hurry on all day, side by side—the rich and the poor, the wise and the foolish, the miserable and the happy, the pure and the vile—scarcely thinking they shall all be swept away in half a century, and no more missed than the silent crowds who now people the cities of the dead. [Independent.

John Quincy Adams's Monument.

From the Quincy Patriot.

A monument has just been placed in the Unitarian Church, in this town, to the memory of John Quincy Adams, by his son, the Hon. C. F. Adams. It is composed of highly polished Italian marble, and in size and form very nearly resembles the one erected to the Ex-President John Adams, with the exception of the upper part, where the bust rests, which is inclosed on both sides by the upper members of the cornice, that sweeps upward in graceful lines toward it. The bust, which rests upon the top, was executed in Italy, by the great American sculptor, Hiram Powers, and is very perfect and life-like in its resemblance of the venerated statesman to whose memory it is erected. Immediately under the bust is a Latin sentence composed of two words, "*Alteri-Seculo,*" separated by an oak branch, with two leaves and an acorn. The following is the inscription:—

Alteri Secuto.

A. O.

Near this place reposes all that could die of JOHN QUINCY ADAMS, son of John and Abigail (Smith) Adams, sixth President of the United States. Born 11th July, 1767. Amidst the storms of civil commotion, he nursed the Vigor which nerves a Statesman and a Patriot, and the Faith which inspires a Christian. For more than half a century, whenever his country called for his labors, in either hemisphere or in any capacity, he never spared them in her cause. On the twenty-fourth of December, 1814, he signed the second Treaty with Great Britain, which restored Peace within her borders. On the twenty third of February, 1848, he closed sixteen years of eloquent defense of the Lessons of his Youth, by dying at his Post, in her great National Council. A Son, worthy of his Father; a Citizen, shedding glory on his Country; a Scholar, ambitious to advance Mankind—this Christian sought to walk humbly in the sight of his God.

Beside him lies his Partner for fifty years, LOUISA CATHERINE, daughter of Joshua and Catherine (Nuth) Johnson. Born, 12 February, 1775. Married, 26th July, 1797. Deceased 15 May, 1852. Aged 77. Living through many vicissitudes, and under high responsibilities as a Daughter, Wife, and Mother, she proved equal to all. Dying, she left her family and her sex the blessed remembrance of a "Woman that feareth the Lord." "Herein is that saying true, one soweth and another reapeth. I sent you to reap that whereon ye bestowed no labor. Other men labored, and ye are entered into their labors.'"

The Power of the Pence.

A True Story.

The Rev. J. B. Owen, M. A., of Bilston, in the course of a lecture delivered in the Liverpool Concert Hall, in connection with the Church of England Institution upon 'Popular Insurance,' related an anecdote strikingly illustrative of the power which lies in the hands of the working men to promote their own social comfort and independence if they would only exert it.

A Manchester calico-printer was on his wedding-day persuaded by his wife to allow her two half-pints of ale a day as her share. He rather winced under the bargain; for, though a drinker himself, he would have preferred a perfectly sober wife. They both worked hard, and he, poor man, was seldom out of the public-house as soon as the factory closed. The wife and husband saw little of each other except at breakfast, but, as she kept things tidy about her, and made her stinted and even selfish allowance for house-keeping meet the demands upon her, he never complained. She had her daily pint, and he perhaps had his two or three quarts; and neither interfered with the other, except when at odd times she succeeded, by dint of one little gentle artifice or another, to win him home an hour or two earlier at night, and now and then to spend an entire evening in his own house, but these were rare occasions. They had been married a year; and, on the morning of their wedding anniversary, the husband looked askance at her neat and comely person, with some shade of remorse as he observed—

"Mary, we'n had no holyday sin' we were wed; and, only that I haven't a penny i' th' world, we'd take a jaunt to th' village to see thee mother."

"Would'st like to go, John?" asked she softly, between a smile and a tear, to hear him speak so kindly as in old times. "If thee'd like to go, John, I'll stand treat."

"Thou stand treat!" said he, with half a sneer; "hast got a fortune, wench?"

"Nay" said she, "but I'n gotten the pint o' ale."

"Gotten what?"

"The pint o' ale!" was the reply.

John still did not understand her, till the faithful creature reached down a loose stocking from under a loose brick up the chimney, and counting out her daily pint of ale in the shape of three hundred and sixty-five three-pences (i. e., £4 11s. 3d.,) put it into his hand, exclaiming—

"Thee shall have the holiday, John."

John was ashamed, astonished, conscience-smitten, charmed. He wouldn't touch it.

"Hasn't thee had thy share? Then I'll ha' no more," said he.

They kept their wedding day with the old dame, and the wife's little capital was the nucleus of a series of investments that ultimately swelled into shop, factory, waaehouse, country-seat and carriage; and for aught Mr. Owen knew, John was mayor of his native borough at last.

The Washington Tower.

Mr. Latting, of the Observatory in the neighborhood of the New York Crystal Palace, has issued an elegant engraving of gigantic structure, which he proposes to erect, entirely of cast and wrought-iron, in some central location in this city. The form of this building, which is to be named in honor of the great father of our country, *The Washington Tower*, will be nearly circular, having a base of nearly 100 feet diameter, from which the building will gradually diminish in circumference till it reaches the height of 591 feet, at which point, on a surface of 8 feet diameter, a colossal bronze statue of Washington 23 feet in height will be placed. This will give a continuous rise from the ground base to the summit of the statue of 614 feet, or more than 100 feet above the highest artificial structure in the world.

This tower will comprise 33 stories, several of which will be devoted to the reception of statuary, bronzes, etc., and to an Indian gallery, we presume for the preservation and exhibition of every curiosity appertaining to the history, customs, etc., of the Aborigines of this country. A telegraphic system of communication from this Titanic structure, would, from its superior and commanding elevation, afford facilities to our merchants, shipowners, etc., of infinite value; and, in fact, if carried out as is proposed, would supersede the present marine telegraphic system now employed by this port.

Mr. Latting also proposes to place in the lantern, immediately beneath the statue, a light whose power and splendor should exceed that of every light now employed on our coast, and the uses of which for maritime and commercial purposes would be of the highest advantage to New York.

The entire cost of building is estimated at $1,000,000, which amount it is proposed to rasie by the sale of 100,000 Life Tickets at $10 each. [Independent.

Pedesterian Feat.

Hughes, who walked 80 consecutive hours upon a wager, at San Francisco, and was nearly killed by the feat, undertook on a bet of $3,000 to walk one hundred hours. Commencing on Wednesday, he kept on the move until Saturday night, when he began to show the effects of fatigue, and staggered a good deal, particularly at the turnings. He carried a stick in his hand, and a friend kept by his side continually, and tried to keep him in conversation. As the night advanced, Hughes became very drowsy; but by the application of stimulants and slight whipping, he was in motion until Sunday morning, when the crowd became so great as to affect him considerably by the vitiation of the air in the room where he walked. The time expired at 12 o'clock at night, but before that time, he presented a pitiable sight. His mind seemed to be completely gone, and he would occasionally speak to the crowd who were endeavoring to arouse him and keep him to his task by every possible means, and ask what they were doing there, and such other questions. So far was he gone, then, that some of them claimed that he had lost the bet. He still maintained his position on the plank, however, until twenty minutes to 11 o'clock, when his friends gave up the task of keeping him at his work as a hopeless one, and allowed him to come down. Though failing to accomplish all that he had undertaken, he nevertheless performed the unprecedented feat of walking, without cessation or rest, for the space of ninety-eight hours and forty minutes. [Rochester Dem.

AMERICAN LITERATURE.—In the catalogue just issued by the Messrs. Appleton, we find the numbers of their different works to be 8241; these are the labors of 4773 authors, of whom 1503 are American; of the 294 female writers, 146 are American. We gather from this catalogue the following interesting facts:—

"The largest book in the collection is entitled 'Boydell's Shakspeare,' 30 by 24; the smallest is Taylor's exceedingly quaint work, the 'Thumb Bible,' 2 by 2; the thickest book is 'Liddell and Scott's Lexicon,' pp. 1734; the thinnest is the 'Book of Flower Painting,' pp. 27; the most expensive work is 'Hoefnagl's Collection of Paintings,' price $1,000; the work comprising the largest number of volumes is 'Valpy's Delphin Classics,' 141 vols.; the most voluminous American author is 'Fenimore Cooper,' 33 vols.; the greatest collection of authors, in one set of books, is 'Chalmers' British Poets,' containing the works of 148 authors; the most profusely illustrated work, is the 'Illustrated London News,' containing over 12,000 spirited engravings; the longest continued work, is the 'Annual Register,' which has been published, without interruption, for the long period of 95 years."

A SAD FIX.—Horace Greeley recently delivered an address before the Franklin County Agricultural Society, and by request furnished the editor of the Chambersburg *Repository and Whig* with a manuscript copy for publication. Poor fellow! he soon found himself in a sad fix: he couldn't read it. He thus states his case:

We immediately went to work to decipher the ten pages before us, and with the aid of a magnifying glass, three dictionaries, several agricultural periodicals, a history of eminent agriculturists, a standard work on chemistry, another on hydraulics, a large street committee, several Know Nothings, and our compositor on unintelligible copy, we mastered the first three lines in the first half day. We were happy within the first hour to ascertain when we had the manuscript right side up, for it looks as much like writing one way as another. It is now in the hands of a competent committee to decide in what language it is written, and if it is ascertained that it is neither Hebrew nor Greek we must infer that it was intended for English, and shall proceed to decipher it.

EVADING THE MAINE LAW.—A novel mode of supplying the wants of those who thirst after fire-water, is now in successful operation in Hartford, Connecticut. A person (if a stranger) is conducted by one of the knowing ones into a building in a by-street, and after going up stairs and down stairs, through hall-ways and various winding ways, finally arrives in a room, on one side of which is a small round hole in the wall, in which is a small dumb waiter; over which is inscribed "the wheel of fortune." A person wishing to try his fortune writes upon a small card, and with a piece of money puts it in the dumb waiter; away goes the waiter, and shortly returns with a glass of Otard, punch, or anything you may have desired. Inquire who keeps this place, and the answer comes through the little hole in a hoarse voice, "A Know Nothing!"

VARIETY.

A case came up in a New York Court in reference to the rights of railway passengers. Two men got on board the cars at Sing Sing and took seats temporarily vacated by their occupants. Refusing to give them up, they were forcibly removed by the conductor and baggagemen. They prosecuted the Company for damages for this, but the Court decided them to be in the wrong, and brought in a verdict justifying the Railroad employees. This principle has been established in New England and also in Pennsylvania.

The New Englanders who have gone to Kansas are building up a city already called New Boston. It is known in that territory as "Yankee Town," is about fifteen miles from the mouth of Kansas river, and thirty-five miles from Fort Leavenworth. The Missourians are beginning to discover that they are not broken down paupers who are coming from Massachusetts, as the pioneer settlers of Kansas.

Hon. G. A. Simmons, upon being interrogated by a southern Senator with what he would do in case some southern gentleman should send him a challenge to fight a duel, made him the following quaint reply: "I would," said he, "sit down and write him thus:—'Dear sir, I received your challenge this moment. I am too great a coward to fight, and you must have *known* it, or else you would not have sent me that challenge.'"

Samuel Chapman, editor of the Savannah *Journal*, and one of the victims of the yellow fever in that city, a short time before his death, and while in good health, purchased a lot in the Laurel Grove Cemetery, to be appropriated especially as a burial place for printers. The purchase was hardly completed when he sickened and died, and his body became the first occupant of the lot.

Mount Hood, in Oregon, has now been ascertained, by an actual measurement, to be full eighteen thousand three hundred and sixty-one feet high. This is the highest peak on the American continent, and one of the highest in the world. From this peak, mountain tops five hundred miles distant are distinctly seen. The mountain is volcanic, smoke being seen to issue from the summit.

An application will be made to the next Legislature of New Jersey for a law incorporating a company to be called "The New Jersey Ocean Steam Navigation Company," with a capital of $500,000, with the privilege of increasing the same to $1,000,000, having for its object the transportation of passengers and merchandize to and from Camden and Philadelphia, and other points upon the Delaware River, to the City of New York.

The Buffalo *Republic* says that there were over 100 vessels aground on the St. Clair Flats, Detroit, on Thursday last, and that up to that time not a vessel passed Detroit from the upper lakes. Some of these vessels had been aground 17 days. It has been ascertained that there are one million of bushels of wheat on board the vessels aground.

In Paris, there are annually consumed 1,600,000 kid and lambskins, for fabrication into gloves; in Bruxelles, 800,000; in Grenoble, 800,000; in Annonay, 3,200,000—making a total, within four cities, of 6,400,000. To work this into gloves requires just double the number of eggs—12,800,000—at an annual expense of 630,000 francs.

Persons from Quebec report that there has been excellent sleighing in that vicinity since the first of the present month. At the latest dates there was every indication that the usual five months' sleighing would be enjoyed the present season by the residents of the lower part of Canada East.

"Ten Thousand a Year" is decidedly slow; it is starvation wages in comparison with some people's income, as William B. Astor's for instance, which is said to amount to twelve hundred thousand dollars per annum, or, deducting more than half for expenses, about ten thousand per week.

The Boston railroads, it is said, are about to introduce coke, from Cumberland coal, as fuel for their engines, in consequence of the high and increasing price of wood. Some of them are endeavoring to use anthracite, but the experiments made show that their engines have to be specially adapted to that kind of fuel.

We are not to suppose that the oak wants stability because its light and changeable leaves dance to the music of the breeze, nor to conclude that a man wants stability and strength of mind because he may exhibit an occasional playfulness and levity.

Gentility consists not in birth, wealth, manners or fashion, but in a high sense of honor, and a determination to do what is right, to the best of our ability, under all circumstances—that is, "to do justice, to love mercy, and walk humbly before God."

If you love others, they will love you. If you speak kindly to them, they will speak kindly. Love is repaid with love, and hatred with hatred. Would you hear a sweet and pleasant echo, speak sweetly and pleasantly yourself.

A man who ridicules his neighbor's foibles, and pronounces him to be deficient in intellect, without just cause, is very apt to possess more self-esteem than sound sense, and to be a slave to the worst of all vices—envy.

To Persons out of Employment.

BOOK AGENTS WANTED, to Sell Pictorial and Useful Works for the Year 1855.

WANTED, IN EVERY SECTION OF THE UNITED STATES, active and enterprising men, to engage in the sale of "Sears' Great Work on Russia," just published, and some of the best Books issued in the Country. To men of good address, possessing a small capital of from $25 to $100, such inducements will be offered as will enable them to make from $3 to $5 a day profit.

☞ The Books published by us are all useful in their character, extremely popular, and command large sales wherevea they are offered.

For further particulars, address, (postage paid,)

ROBERT SEARS, Publisher,
181 William-st., New York.

☞ *Send for One Copy.*—Just published, "*The Guide to Health and Long Life*, or What to Eat, Drink and Avoid," 125 pp., the best work on these subjects ever published. Sold at a price to suit every person. Single copies 37½ cts., or four for one dollar. ☞ Sent by mail, free of postage, to any part of the United States. Address as above.

Bells! Bells! Bells!

FOR *Churches, Academies, Factories, Steamboats, Plantations, etc.*, made, and a large assortment kept constantly on hand by the subscribers, at their old established and enlarged Foundry, which has been in operation for Thirty Years, and whose *patterns* and *process of manufacture* so perfected, that their Bells have a world-wide celebrity for *volume of sound* and *quality of tone*. The present Proprietors have recently succeeded in applying the process of loam moulding in Iron Cases to *Bell Casting*—which secures a perfect casting and even temper; and as an evidence of the unimpaired excellence of their Bells, they have just received—January, 1854—the FIRST PREMIUM *(a Silver Medal)* of the World's Fair in New York over all others, several from this country and Europe being in competition; and which is the 18th Medal, besides many Diplomas, that have been awarded them. They have patterns for, and keep on hand, Bells of a variety of tones of the same weight, and they also furnish to order CHIMES of any number of Bells, or key, and can refer to several of their make throughout the States and Canadas. Their *Hangings*, comprising many recent and valuable improvements, consist of Cast Iron Yoke, with moveable arms, and which may be turned upon the Bell; Spring acting upon the Clapper, prolonging the sound; Iron Frame, Tolling Hammer, Counterpoise, Stop, etc. For Steamboats, Steamships, etc., their improved Revolving Yoke, or Fancy Hangings in Brass or Bronze of any design furnished. We can supply whole sets, or parts, of our Improved Hangings, to re-hang Bells of other construction, upon proper specifications being given. Old Bells taken in exchange.

Surveyors' Instruments of all descriptions, made and kept on hand.

Being in immediate connection with the principal routes, in all directions, either Railroad, Canal or River, orders can be executed with dispatch, which, either personally or by communication, are respectfully solicited. A. MENEELY'S SONS, West Troy, N. Y

Ayer's Cherry Pectoral.

"*Wisdom shall bow down to it, and the great of the earth, shall kneel before it.*"

NEVER could this be said with more truth, than it now applies to this remedy for affections of the throat and lungs. The exalted in learning and power, acknowledge its supremacy, while both the little and the great can feel its benefits. The liberal-minded among those skilled to cure, are free to own its mastery over distempers which have baffled their art. Those of exalted stations are not ashamed to testify to its virtues, but deem it a duty and a pleasure to thus hold out the lamp of their experience to their suffering fellow men.

Witness the following translation:—

VERMILLIONVILLE, La, April, 1853.

Mons. le DR. J. C. AYER:—I have of late made frequent use of your Cherry Pectoral in my practice, and am happy to inform you that in no case yet has it failed me. I have made some signal cures of Laryngitis and Bronchitis with it, and have completely cured one case of Asthma, which had withstood every other medicine I could employ.

Accept, Sir, the assurences of my distinguished consideration. JULES CLAUD GOUGUET, M. D.,
Late Surgeon of the Royal Marine, France.

Extract from a letter of our Minister at the Court of the Sublime Porte.

Legation of the U. S. A., Constantinople, Turkey.

DR. J. C. AYER—Dear Sir: The Cherry Pectoral received from you for the Sultan has been delivered to his private secretary at the palace, and you will doubtless hear from it in due season. That you were so kind as to send me has been given to friends, who have in many cases, found it exceedingly useful.

Yours, respectfully, GEO. P. MARSH,
Minister Plenipotentiary of the U. S. A. to Turkey.

Curacoa, March 5, 1852.

DR. J. C. AYER:—I use your Cherry Pectoral, daily in my practice, and am satisfied it is a remedy which must meet in every country the highest approbation.

C. W. JACKHEER, M. D.
Resident Court Physician.

Among the eminent Editors, who testify to their personal experience and knowledge of the wonderful cures, and immense usefulness of the Cherry Pectoral in their sections, we may mention—

Boughton & Co., of the Federal Union, Milledgeville, Ga.
L. Patton, Christian Advocate, Knoxville, Tenn.
J. B. Dobson, American Presbyterian, Greenville, Tenn.

WHOLE NO. 547.

THE PRESIDENT'S MESSAGE.

Fellow Citizens of the Senate and the House of Representatives:

The past has been an eventful year, and will be hereafter referred to as a marked epoch in the history of the world. While we have been happily preserved from the calamities of war, our domestic prosperity has not been entirely uninterrupted. The crops, in portions of the country, have been nearly cut off. Disease has prevailed to a greater extent than usual, and the sacrifice of human life, through casualties by sea and land, is without parallel. But the pestilence has swept by, and restored salubrity invites the absent to their homes, and the return of business to its ordinary channels. If the earth has rewarded the labor of the husbandman less bountifully than in preceding seasons, it has left him with abundance for domestic wants, and a large surplus for exportation. In the present, therefore, as in the past, we find ample grounds for reverent thankfulness to the God of Grace and Providence, for his protecting care and merciful dealings with us as a people.

Although our attention has been arrested by painful interest in passing events, yet our country feels no more than the slight vibrations of the convulsions, which have shaken Europe. As individuals, we cannot repress sympathy with human suffering, nor regret for the causes which produce it. As a nation, we are reminded, that whatever interrupts the peace, or checks the prosperity, of any part of Christendom, tends, more or less, to involve our own. The condition of states is not unlike that of individuals. They are mutually dependent upon each other. Amicable relations between them, and reciprocal good will, are essential for the promotion of whatever is desirable in their moral, social, and political condition. Hence it has been my earnest endeavor to maintain peace and friendly intercourse with all nations.

The wise theory of this government, so early adopted and steadily pursued, of avoiding all entangling alliances, has hitherto exempted it from many complications, in which it would otherwise have become involved. Notwithstanding this our clearly defined and well-sustained course of action, and our geographical position so remote from Europe, increasing disposition has been manifested, by some of its governments, to supervise, and, in certain respects, to direct our foreign policy. In plans for adjusting the balance of power among themselves, they have assumed to take us into account, and would constrain us to conform our conduct to their views. One or another of the powers of Europe has, from time to time, undertaken to enforce arbitrary regulations, contrary in many respects to established principles of international law. That law, the United States have, in their foreign intercourse, uniformly respected and observed, and they cannot recognize any such interpolations therein, as the temporary interests of others may suggest. They do not admit, that the sovereigns of one continent, or of a particular community of states, can legislate for all others.

Leaving the trans-atlantic nations to adjust their political system, in the way they may think best for their common welfare, the independent powers of this continent may well assert the right to be exempt from all annoying interference on their part. Systematic abstinence from intimate political connexion with distant foreign nations, does not conflict with giving the widest range to our foreign commerce. This distinction, so clearly marked in history, seems to have been overlooked, or disregarded, by some leading foreign states. Our refusal to be brought within, and subjected to, their peculiar system, has, I fear, created a jealous distrust of our conduct, and induced, on their part, occasional acts of disturbing effect upon our foreign relations. Our present attitude and past course give assurances, which should not be questioned, that our purposes are not aggressive, nor threatening to the safety and welfare of other nations. Our military establishment, in time of peace, is adapted to maintain exterior defences, and to preserve order among the aboriginal tribes within the limits of the Union. Our naval force is intended only for the protection of our citizens abroad, and of our commerce, diffused, as it is, over all the seas of the globe. The government of the United States, being essentially pacific in policy, stands prepared to repel invasion by the voluntary service of a patriotic people, and provides no permanent means of foreign aggression. These considerations should allay all apprehension, that we are disposed to encroach on the rights, or endanger the security, of othe states.

Some European powers have regarded, with disquieting concern, the territorial expansion of the United States. This rapid growth has resulted from the legitimate exercise of sovereign rights, belonging alike to all nations, and by many liberally exercised. Under such circumstances, it could hardly have been expected that those among them, which have, within a comparatively recent period, subdued and absorbed ancient kingdoms, planted their standards on every continent, and now possess, or claim the control of, the islands of every ocean as their appropriate domain, would look with unfriendly sentiments upon the acquisitions of this country, in every instance honorably obtained, or would feel themselves justified in imputing our advancement to a spirit of aggression or to a passion for political predominance.

Our foreign commerce has reached a magnitude and extent nearly equal to that of the first maritime power of the earth, and exceeding that of any other. Over this great interest, in which not only our merchants, but all classes of citizens at least indirectly, are concerned, it is the duty of the executive and legislative branches of the government to exercise a careful supervision, and adopt proper measures for its protection. The policy which I have had in view, in regard to this interest, embraces its future, as well as its present security.

Long experience has shown that, in general, when the principal powers of Europe are engaged in war, the rights of neutral nations are endangered. This consideration led, in the progress of the war of our independence, to the formation of the celebrated confederacy of armed neutrality, a primary object of which was, to assert the doctrine, that free ships make free goods, except in the case of articles contraband of war: a doctrine which, from the very commencement of our national being, has been a cherished idea of the statesmen of this country. At one period or another, every maritime power has by some solemn treaty stipulation, recognized that principle; and it might have been hoped that it would come to be universally received and respected as a rule of international law. But the refusal of one power prevented this, and in the next great war which ensued, that of the French revolution, it failed to be respected among the belligerent States of Europe. Notwithstanding this, the principle is generally admitted to be a sound and salutary one; so much so, that at the commencement of the existing war in Europe, Great Britain and France announced their purpose to observe it for the present; not, however, as a recognized international right, but as a mere concession for the time being. The co-operation, however, of these two powerful maritime nations in the interest of neutral rights, appeared to me to afford an occasion, inviting and justifying, on the part of the United States, a renewed effort to make the doctrine in question a principle of international law, by means of special conventions between the several powers of Europe and America. Accordingly, a proposition, embracing not only the rule, that free ships make free goods, except contraband articles, but also the less contested one, that neutral property, other than contraband, though on board enemy's ships, shall be exempt from confiscation, has been submitted by this government to those of Europe and America.

Russia acted promptly in this matter, and a convention was concluded, between that country and the United States, providing for the observance of the principles announced, not only as between themselves, but also as between them and all other nations, which shall enter into like stipulations. None of the other powers have as yet taken final action on the subject. I am not aware, however, that any objection to the proposed stipulations has been made; but, on the contrary, they are acknowledged to be essential to the security of neutral commerce; and the only apparent obstacle to their general adoption is in the possibility, that it may be encumbered by inadmissable conditions.

The King of the Two Sicilies has expressed to our minister at Naples his readiness to concur in our proposition relative to neutral rights, and to enter into a convention on that subject.

The King of Prussia entirely approves of the project of a treaty to the same effect, submitted to him, but proposes an additional article providing for the renunciation of privateering. Such an article, for most obvious reasons, is much desired by nations having naval establishments, large in proportion to their foreign commerce. If it were adopted as an international rule, the commerce of a nation having comparatively a small naval force, would be very much at the mercy of its enemy, in case of war with a power of decided naval superiority. The bare statement of the condition in which the United States would be placed, after having surrendered the right to resort to privateers, in the event of war with a belligerent of naval supremacy, will show that this government could never listen to such a proposition. The navy of the first maritime power in Europe is at least ten times as large as that of the United States. The foreign commerce of the two countries is nearly equal, and about equally exposed to hostile depredations. In war between that power and the United States, without resort on our part to our mercantile marine, the means of our enemy to inflict injury upon our commerce would be tenfold greater than ours to retaliate. We could not extricate our country from this unequal condition, with such an enemy, unless we at once departed from our present peaceful policy, and became a great naval power. Nor would this country be better situated, in war, with one of the secondary naval powers. Though the naval disparity would be less, the greater extent, and more exposed condition of our widespread commerce, would give any of them a like advantage over us.

The proposition to enter engagements to forego resort to privateers, in case this country should be forced into war with a great naval power, is not entitled to more favorable consideration than would be a proposition, to agree not to accept the services of volunteers for operations on land. When the honor or the rights of our country require it to assume a hostile attitude, it confidently relies upon the patriotism of its citizens, not ordinarily devoted to the military profession, to augment the army and the navy, so as to make them fully adequate to the emergency which calls them into action. The proposal to surrender the right to employ privateers is professedly founded upon the principle, that private property of unoffending non-combatants, though enemies, should be exempt from the ravages of war; but the proposed surrender goes but little way in carrying out that principle, which equally requires that such private property should not be seized or molested by national ships of war. Should the leading powers of Europe concur in proposing, as a rule of international law, to exempt private property, upon the ocean, from seizure by public armed cruisers, as well as privateers, the United States will readily meet them on that broad ground.

Since the adjournment of Congress, the ratifications of the treaty between the United States and Great Britain, relative to coast fisheries, and to reciprocal trade with the British North American provinces, have been exchanged, and some of its anticipated advantages are already enjoyed by us, although its full execution was to abide certain acts of legislation not yet fully performed. So soon as it was ratified, Great Britain opened to our commerce the free navigation of the river St. Lawrence, and to our fishermen unmolested access to the shores and bays, from which they had been previously excluded, on the coasts of her North American provinces; in return for which, she asked for the introduction, free of duty, into the ports of the United States, of the fish caught on the same coast by British fishermen. This being the compensation, stipulated in the treaty, for privileges of the highest importance and value to the United States, which were thus voluntarily yielded before it became effective, the request seemed to me to be a reasonable one; but it could not be acceded to, from want of authority to suspend our laws imposing duties upon all foreign fish. In the meantime, the Treasury Department issued a regulation, for ascertaining the duties paid or secured by bonds on fish caught on the coasts of the British provinces, and brought to our markets by British subjects, after the fishing-grounds had been made fully accessible to the citizens of the United States. I recommend to your favorable consideration a proposition, which will be submitted to you, for authority to refund the duties and cancel the bonds thus received. The provinces of Canada and New Brunswick have also anticipated the full operation of the treaty, by legislative arrangements, respectively, to admit, free of duty, the products of the United States, mentioned in the free list of the treaty; and an arrangement, similar to that regarding British fish, has been made for duties now chargeable on the products of those provinces enumerated in the same free list, and introduced therefrom into the United States; a proposition for refunding which will, in my judgment, be in like manner entitled to your favorable consideration.

There is difference of opinion between the United States and Great Britain, as to the boundary line of the Territory of Washington adjoining the British possessions on the Pacific, which has already led to difficulties on the part of the citizens and local authorities of the two governments. I recommend that provision be made for a commission, to be joined by one on the part of her Britannic Majesty, for the purpose of running and establishing the line in controversy. Certain stipulations of the third and fourth article of the treaty concluded by the United States and Great Britain in 1846, regarding possessory rights of the Hudson's Bay Company, and property of the Puget's Sound Agricultural Company, have given rise to serious disputes, and it is important to all concerned, that summary means of settling them amicably should be devised. I have reason to believe, that an arrangement can be made on just terms, for the extinguishment of the rights in question, embracing, also, the right of the Hudson's Bay Company to the navigation of the river Columbia; and I therefore suggest to your consideration, the expediency of making a contingent appropriation for that purpose.

France was the early and efficient ally of the United States in their struggle for independence. From that time, to the present, with occasional slight interruptions, cordial relations of friendship have existed between the governments and people of the two countries. The kindly sentiments, cherished alike by both nations, have led to extensive social and commercial intercourse, which I trust, will not be interrupted or checked by any casual event of an apparently unsatisfactory character. The French consul at San Francisco was, not long since, brought into the United States District Court at that place, by compulsory process, as a witness in favor of another foreign consul, in violation, as the French government conceives, of his privileges under our consular convention with France. There being nothing in the transaction which could imply any disrespect to France or its consul, such explanation has been made, as I hope will be satisfactory. Subsequently, misunderstanding arose on the subject of the French government having, as it appeared, abruptly excluded the American minister to Spain from passing through France, on his way from London to Madrid. But that government has unequivocally disavowed any design to deny the right of transit to the minister of the United States; and, after explanations to this effect, he has resumed his journey, and actually returned through France to Spain. I herewith lay before Congress the correspondence on this subject between our envoy at Paris, and the minister of foreign relations of the French government.

The position of our affairs with Spain remains as at the close of your last session. Internal agitation, assuming very nearly the character of political revolution, has recently convulsed that country. The late ministers were violently expelled from power, and men, of very different views in relation to its internal affairs, have succeeded. Since this change, there has been no propitious opportunity to resume, and press on, negotiations for the adjustment of serious questions of difficulty between the Spanish government and the United States. There is reason to believe that our minister will find the present government more favorably inclined than the preceding to comply with our just demands, and to make suitable arrangements for restoring harmony, and preserving peace, between the two countries.

Negotiations are pending with Denmark to discontinue the practice of levying tolls on our vessels and their cargoes passing through the Sound. I do not doubt that we can claim exemption therefrom, as a matter of right. It is admitted on all hands, that this exaction is sanctioned, not by the general principles of the law of nations, but only by special conventions, which most of the commercial nations have entered into with Denmark. The fifth article of our treaty of 1826, with Denmark, provides, that there shall not be paid, on the vessels of the United States and their cargoes when passing through the Sound, higher duties than those of the most favored nations. This may be regarded as an implied agreement to submit to the tolls during the continuance of the treaty, and, consequently, may embarrass the assertion of our right to be released therefrom. There are also other provisions in the treaty which ought to be modified. It was to remain in force for ten years, and until one year after either party should give notice to the other of intention to terminate it. I deem it expedient that the contemplated notice should be given to the government of Denmark.

The naval expedition, despatched about two years since for the purpose of establishing relations with the empire of Japan, has been ably and skilfully conducted to a successful termination by the officer to whom it was entrusted. A treaty, opening certain of the ports of that populous country, has been negotiated; and in order to give full effect thereto, it only remains to exchange ratifications, and adopt requisite commercial regulations.

The treaty lately concluded between the United States and Mexico settled some of our most embarrassing difficulties with that country, but numerous claims upon it for wrongs and injuries to our citizens remained unadjusted, and many new cases have been recently added to the former list of grievances. Our legation has been earnest in its endeavors to obtain, from the Mexican government, a favorable consideration of these claims, but hitherto without success. This failure is, probably, in some measure, to be ascribed to the disturbed condition of that country. It has been my anxious desire to maintain friendly relations with the Mexican republic, and to cause its rights and territories to be respected, not only by our citizens, but by foreigners, who have resorted to the United States for the purpose of organizing hostile expeditions against some of the States of that Republic. The defenceless condition, in which its frontiers have been left, has stimulated lawless adventurers to embark in these enterprises, and greatly increased the difficulty of enforcing our obligations of neutrality. Regarding it as my solemn duty to fulfil, efficiently, these obligations, not only towards Mexico, but other foreign nations, I have exerted all the powers with which I am invested to defeat such criminal proceedings, and bring to punishment those who, by taking a part therein, violated our laws. The energy and activity of our civil and military authorities have frustrated the designs of those who meditated expeditions of this character, except in two instances. One of these, composed of foreigners, was at first countenanced and aided by the Mexican government itself, it having been deceived as to their real object. The other, small in number, eluded the vigilance of the magistrates at San Francisco, and succeeded in reaching the Mexican territories; but the effective measures taken by this government compelled the abandonment of the undertaking.

The commission to establish the new line between the United States and Mexico, according to the provisions of the treaty of the 30th of December last, has been organized, and the work is already commenced.

Our treaties with the Argentine Confederation, and with the Republics of Uruguay and Paraguay, secure to us the free navigation of the river La Plata and some of its large tributaries; but the same success has not attended our endeavors to open the Amazon. The reasons in favor of the free use of that river, I had occasion to present fully, in a former message; and, considering the cordial relations which have long existed between this government and Brazil, it may be expected that pending negotiations will, eventually, reach a favorable result.

Convenient means of transit, between the several parts of a country, are not only desirable for the objects of commercial and personal communication, but essential to its existence under one government. Separated as are the Atlantic and Pacific coasts of the United States by the whole breath of the continent, still the inhabitants of each are closely bound together by community of origin and institutions, and by strong attachment to the Union. Hence the constant and increasing intercourse, and vast interchange of commercial productions, between these remote divisions of the Republic. At the present time, the most practicable and only commodious routes for communication between them are by the way of the Isthmus of Central America. It is the duty of the government to secure these avenues against all danger of interruption.

In relation to Central America, perplexing questions existed between the United States and Great Britain at the time of the cession of California. These, as well as questions which subsequently arose concerning interoceanic communication across the Isthmus, were, as it was supposed, adjusted by the treaty of April 19, 1854: but, unfortunately, they have been re-opened by serious misunderstanding as to the import of some of its provisions, a re-adjustment of which is now under consideration. Our minister at London has made strenuous efforts to accomplish this desirable object, but has not yet found it possible to bring the negotiations to a termination.

As incidental to these questions, I deem it proper to notice an occurrence which happened in Central America, near the close of the last session of Congress. So soon as the necessity was perceived of establishing interoceanic communications across the Isthmus, a company was organized, under authority of the State of Nicaragua, but composed, for the most part, of citizens of the United States, for the purpose of opening such a transit way, by the river San Juan and Lake Nicaragua, which soon became an eligible and much used route in the transportation of our citizens and their property between the Atlantic and Pacific. Meanwhile, and in anticipation of the completion and importance of this transit way, a number of adventurers had taken possession of the old Spanish port at the mouth of the river San Juan, in open defiance of the State or States of Central America, which, upon their becoming independent, had rightfully succeeded to the local sovereignty and jurisdiction of Spain. These adventurers undertook to change the name of the place from San Juan del Norte to Greytown, and, though at first pretending to act as the subjects of the fictitious sovereign of the Mosquito Indians, they subsequently repudiated the control of any power whatever, assumed to adopt a distinct political organization, and declared themselves an independent sovereign state. If, at some time, a faint hope was entertained that they might become a stable and respectable community, that hope soon vanished. They proceeded to assert unfounded claims to civil jurisdiction over Punta Arenas, a position on the opposite side of the river San Juan, which was in possession, under a title wholly independent of them, of citizens of the United States, interested in the Nicaragua Transit Company, and which was indispensably necessary to the prosperous operation of that route across the Isthmus. The company resisted their groundless claims; whereupon they proceeded to destroy some of its buildings, and attempted violently to dispossess it.

At a later period they organized a strong force for the purpose of demolishing the establishment at Punta Arenas, but this mischievous design was defeated by the interposition of one of our ships of war, at that time in the harbor of San Juan. Subsequently to this, in May last, a body of men from Greytown crossed over to Punta Arenas, arrogating authority to arrest, on the charge of murder, a captain of one of the steamboats of the Transit Company. Being well aware that the claim to exercise jurisdiction there would be resisted then, as it had been on previous occasions, they went prepared to assert it by force of arms. Our minister to Central America happened to be present on that occasion. Believing that the captain of the steamboat was innocent, for he witnessed the transaction on which the charge was founded, and believing, also, that the intruding party, having no jurisdiction over the place where they proposed to make the arrest, would encounter desperate resistance if they persisted in their purpose, he interposed, effectually, to prevent violence and bloodshed. The American minister afterwards visited Greytown, and whilst he was there, a mob, including certain of the so called public functionaries of the place, surrounded the house in which he was, avowing that they had come to arrest him, by order of some person exercising the chief authority. While parleying with them he was wounded by a missile from the crowd. A boat, despatched from the American steamer "Northern Light" to release him from the perilous situation in which he was understood to be, was fired into by the town guard, and compelled to return. These incidents, together with the known character of the population of Greytown, and their excited state, induced just apprehension that the lives and property of our citizens at Punta Arenas would be in imminent danger after the departure of the steamer, with her passengers, for New York, unless a guard was left for their protection. For this purpose, and in order to ensure the safety of passengers and property passing over the route, a temporary force was organized, at considerable expense to the United States, for which provision was made at the last session of Congress.

This pretended community, a heterogeneous assemblage, gathered from various countries, and composed, for the most part, of blacks and persons of mixed blood, had previously given other indications of mischievous and dangerous propensities. Early in the same month, property was clandestinely abstracted from the depot of the Transit Company, and taken to Greytown. The plunderers obtained shelter there, and their pursuers were driven back by its people, who not only protected the wrongdoers and shared the plunder, but treated with rudeness and violence those who sought to recover their property.

Such, in substance, are the facts submitted to my consideration, and proved by trustworthy evidence. I could not doubt that the case demanded the interposition of this government. Justice required that reparation should be made for so many and such gross wrongs, and that a course of insolence and plunder, tending directly to the insecurity of the lives of numerous travelers, and of the rich treasure belonging to our citizens, passing over this transit way, should be peremptorily arrested. Whatever it might be in other respects, the community in question, in power to do mischief, was not despicable. It was well provided with ordnance, small arms, and ammunition, and might easily seize on the unarmed boats freighted with millions of property, which passed almost daily within its reach. It did not profess to belong to any regular government, and had, in fact, no recognized dependence on, or connection with, any one to which the United States or their injured citizens might apply for redress, or which could be held responsible, in any way, for the outrages committed. Not standing before the world in the attitude of an organized political society, being neither competent to exercise the rights nor to discharge the obligations of a government, it was, in fact, a marauding establishment, too dangerous to be disregarded, and too guilty to pass unpunished, and yet incapable of being treated in any other way than as a piratical resort of outlaws, or a camp of savages, depredating on emigrant trains or caravans and the frontier settlements of civilized states.

Seasonable notice was given to the people of Greytown that this government required them to repair the injuries they had done to our citizens, and to make suitable apology for the insult of our minister, and that a ship-of-war would be despatched thither to enforce compliance with these demands. But the notice passed unheeded. Thereupon, a commander of the navy, in charge of the sloop-of-war "Cyane," was ordered to repeat the demands, and to insist upon a compliance therewith. Finding that neither the populace, nor those assuming to have authority over them, manifested any disposition to make the required reparation, or even to offer excuse for their conduct, he warned them, by a public proclamation, that if they did not give satisfaction within a time specified, he would bombard the town. By this procedure he afforded them opportunity to provide for their personal safety. To those also who desired to avoid loss of property, in the punishment about to be inflicted on the offending town, he furnished the means of removing their effects, by the boats of his own ship, and of a steamer which he procured and tendered to them for that purpose. At length, perceiving no disposition on the part of the town to comply with his requisitions, he appealed to the commander of her Britanic Majesty's schooner "Bermuda," who was seen to have intercourse and apparently much influence with the leaders among them, to interpose, and persuade them to take some course calculated to save the necessity of resorting to the extreme measure indicated in his proclamation; but that officer, instead of acceding to the request, did nothing more than to protest against the contemplated bombardment. No steps of any sort were taken, by the people, to give the satisfaction required. No individuals, if any there were, who regarded themselves as not responsible for the misconduct of the community, adopted any means to separate themselves from the fate of the guilty. The several charges, on which the demands for redress were founded, had been publicly known to all for some time, and were again announced to them. They did not deny any of these charges; they offered no explanation, nothing in extenuation of their conduct, but contumaciously refused to hold any intercourse with the commander of the "Cyane." By their obstinate silence they seemed rather desirous to provoke chastisement than to escape it. There is ample reason to believe that this conduct of wanton defiance, on their part, is imputable chiefly to the delusive idea that the American government would be deterred from punishing them, through fear of displeasing a formidable foreign power, which, they presumed to think, looked with complacency upon their aggressive and insulting deportment towards the United States. The "Cyane" at length fired upon the town. Before much injury had been done, the fire was twice suspended, in order to afford opportunity for an arrangement; but this was declined. Most of the buildings of the place, of little value generally, were, in the sequel, destroyed; but, owing to the considerate precautions taken by our naval Commander, there was no destruction of life.

When the "Cyane" was ordered to Central America, it was confidently hoped and expected that no occasion would arise for "a resort to violence and destruction of property and loss of life." Instructions to that effect were given to her commander. And no extreme act would have been requisite had not the people themselves, by their extraordinary conduct in the affair, frustrated all the possible mild measures for obtaining satisfaction. A withdrawal from the place, the object of his visit entirely defeated, would, under the circumstances in which the commander of the Cyane found himself, have been absolute abandonment of all claims of our citizens for indemnification, and submissive acquiescence in national indignity. It would have encouraged in these lawless men a spirit of insolence and rapine most dangerous to the lives and property of our citizens at Puntas Arenas, and probably emboldened them to grasp at the treasures and valuable merchandise continually passing over the Nicaragua route. It certainly would have been most satisfactory to me if the objects of the Cyane's mission could have been consummated without any act of public force; but the arrogant contumacy of the offenders rendered it impossible to avoid the alternative, either to break up their establishment, or to leave them impressed with the idea that they might persevere with impunity in a career of insolence and plunder.

This transaction has peen the subject of complaint on the part of some foreign powers, and has been characterized with more of harshness than of justice. If comparisons were to be instituted, it would not be difficult to present repeated instances in the history of States, standing in the very front of modern civilization, where communities, far less offending and more defenceless than Greytown, have been chastised with much greater severity, and where not cities only have been laid in ruins, but human life has been recklessly sacrificed, and the blood of the innocent made profusely to mingle with that of the guilty.

Passing from foreign to domestic affairs, your attention is naturally directed to the financial condition of the country, always a subject of general interest. For complete and exact information regarding the finances, and the various branches of the public service connected therewith, I refer you to the report of the Secretary of the Treasury; from which it will appear, that the amount of revenue during the last fiscal year, from all sources, was seventy-three million five hundred and forty-nine thousand seven hundred and five dollars; and that the public expenditures for the same period, exclusive of payments on account of the public debt, amounted to fifty-one million eighteen thousand two hundred and forty-nine dollars. During the same period, the payments made in redemption of the public debt, including interest and premium, amounted to twenty-four million three hundred and thirty-six thousand three hundred and eighty dollars. To the sum total of the receipts of that year is to be added a balance remaining in the Treasury at the commencement thereof, amounting to twenty-one million nine hundred and forty-two thousand eight hundred and ninety-two dollars; and at the close of the same year, a corresponding balance amounting to twenty million one hundred and thirty-seven thousand nine hundred and sixty-seven dollars of receipts above expenditures, also remained in the Treasury. Although, in the opinion of the Secretary of the Treasury, the receipts of the current fiscal year are not likely to equal in amount those of the last, yet they will undoubtedly exceed the amount of expenditures by at least fifteen millions of dollars. I shall, therefore, continue to direct that the surplus revenue be applied, so far as it can be judiciously and economically done, to the reduction of the public debt, the amount of which, at the commencement of the last fiscal year, was sixty-seven million three hundred and forty thousand six hundred and twenty-eight dollars, of which there had been paid on the twenty-eighth day of November 1854, the sum of twenty-two million three hundred and sixty-five thousand one hundred and seventy-two dollars; leaving a balance of outstanding public debt of only forty-four million nine hundred and seventy-five thousand four hundred and fifty-six dollars, redeemable at different periods within fourteen years. There are also remnants of other government stocks, most of which are already due, and on which the interest has ceased, but which have not yet been presented for payment, amounting to two hundred and thirty-three thousand one hundred and seventy-nine dollars. This statement exhibits the fact, that the annual income of the government greatly exceeds the amount of its public debt, which latter remains unpaid only because the time of payment has not yet matured, and it cannot be discharged at once, except at the option of public creditors, who prefer to retain the securities of the United States; and the other fact, not less striking, that the annual revenue from all sources exceeds, by many millions of dollars, the amount needed for a prudent and economical administration of the Government.

The estimates presented to Congress from the different Executive Departments at the last session, amounted to thirty-eight million four hundred and six thousand five hundred and eighty-one dollars; and the appropriations made to the sum of fifty-eight million one hundred and sixteen thousand nine hundred and fifty-eight dollars. Of this excess of appropriations over estimates, however, more than twenty millions was applicable to extraordinary objects, having no reference to the usual annual expenditures. Among these objects, was embraced ten millions to meet the third article of the treaty between the United States and Mexico; so that, in fact, for objects of ordinary expenditure, the appropriations were limited to considerably less than forty millions of dollars. I therefore, renew my recommendation for a reduction of the duties on imports. The report of the Secretary of the Treasury presents a series of tables, showing the operation of the revenue system for several successive years, and as the general principle of reduction of duties with a view to revenue and not protection may now be regarded as the settled policy of the country, I trust that little difficulty will be encountered in settling the details of a measure to that effect.

In connexion with this subject, I recommend a change in the laws, which recent experience has shown to be essential to the protection of the government. There is no express provision of law, requiring the records and papers of a public character, of the several officers of the government, to be left in their offices for the use of their successors, nor any provision declaring it felony on their part to make false entries in the books, or return false accounts. In the absence of such express provision by law, the outgoing officers, in many instances, have claimed and exercised the right to take into their own possession, important books and papers, on the ground that these were their private property; and have placed them beyond the reach of the government. Conduct of this character, brought in several instances to the notice of the present Secretary of the Treasury, naturally awakened his suspicion, and resulted in the disclosure that at four ports, namely, Oswego, Toledo, Sandusky, and Milwaukie, the treasury had, by false entries, been defrauded, within the four years next preceding March, 1853, of the sum of one hundred and ninety-eight thousand dollars. The great difficulty with which the detection of these frauds has been attended, in consequence of the abstraction of books and papers by the retiring officers, and the facility with which similar frauds in the public service may be perpetrated, render the necessity of new legal enactments, in the respects above referred to, quite obvious. For other material modifications of the revenue laws which seem to me desirable, I refer you to the report of the Secretary of the Treasury. That report, and the tables which accompany it, furnish ample proofs of the solid foundation on which the financial security of the country rests, and of the salutary influence of the independent treasury system upon commerce and all monetary operations.

The experience of the last year furnishes additional reasons, I regret to say, of a painful character, for the recommendation heretofore made, to provide for increasing the military force employed in the territory inhabited by the Indians. The settlers on the frontier have suffered much from the incursions of predatory bands, and large parties of emigrants to our Pacific possessions have been massacred with impunity. The recurrence of such scenes can only be prevented by teaching these wild tribes the power of, and their responsibility to, the United States. From the garrisons of our frontier posts, it is only possible to detach troops in small bodies; and though these have on all occasions displayed a gallantry and a stern devotion to duty, which on a larger field would have commanded universal admiration, they have usually suffered severely in these conflicts with superior numbers, and have sometimes been entirely sacrificed. All the disposable force of the army is already employed on this service, and is known to be wholly inadequate to the protection which should be afforded. The public mind of the country has been recently shocked by savage atrocities committed upon defenceless emigrants and border settlements, and hardly less by the unnecessary destruction of valuable lives, where inadequate detachments of troops have undertaken to furnish the needed aid. Without increase of the military force, these scenes will be repeated, it is to be feared, on a larger scale, and with more disastrous consequences. Congress, I am sure, will perceive that the plainest duties and responsibilities of government are involved in this question, and I doubt not that prompt action may be confidently anticipated when delay must be attended by such fearful hazards.

The bill of the last session, providing for an increase of the pay of the rank and file of the army has had beneficial results, not only in facilitating enlistments, but in obvious improvement in the class of men who enter the service. I regret that corresponding consideration was not bestowed on the officers, who, in view of their character and services, and the expenses to which they are necessarily subject, receive at present what is, in my judgment, inadequate compensation.

The valuable services constantly rendered by the Army, and its inestimable importance, as the nucleus around which the volunteer forces of the nation can promptly gather in the hour of danger, sufficiently attest the wisdom of maintaining a military peace establishment; but the theory of our system and the wise practice under it, require that any proposed augmentation, in time of peace, be only commensurate with our extended limits and frontier relations. While scrupulously adhering to this principle, I find, in existing circumstance, a necessity for increase of our military force, and it is believed that four new regiments, two of infantry and two of mounted men, will be sufficient to meet the present exigency. If it were necessary carefully to weigh the cost in a case of such urgency, it would be shown that the additional expense would be comparatively light.

With the increase of the numerical force of the army should, I think, be combined certain measures of reform in its organic arrangement and administration. The present organization is the result of partial legislation often directed to special objects and interests; and the laws regulating rank and command, having been adopted many years ago from the British code, are not always applicable to our service. It is not surprising, therefore, that the system should be deficient in the symmetry and simplicity essential to the harmonious working of its several parts, and require a careful revision.

The present organization, by maintaining large staff corps or departments, separates many officers from that close connection with troops, and those active duties in the field, which are deemed requisite to qualify them for the varied responsibilities of high command. Were the duties of the army staff mainly discharged by officers detached from their regiments, it is believed that the special service would be equally well performed, and the discipline and instruction of the army be improved. While due regard to the security of the rights of officers, and to the nice sense of honor which should be cultivated among them, would seem to exact compliance with the established rule of promotion in ordinary cases, still it can hardly be doubted that the range of promotion by selection, which is now practically confined to the grade of general officers, might be somewhat extended with benefit to the public service. Observance of the rule of seniority sometimes leads, especially in time of peace, to the promotion of officers who, after meritorious and even distinguished service, may have been rendered by age or infirmity incapable of performing active duty, and whose advancement, therefore, would tend to impair the efficiency of the army. Suitable provision for this class of officers, by the creation of a retired list, would remedy the evil, without wounding the just pride of men who, by past services, have established a claim to high consideration. In again commending this measure to the favorable consideration of Congress, I would suggest that the power of placing officers on the retired list be limited to one year. The practical operation of the measure would thus be tested, and if, after the lapse of years, there should be occasion to renew the provision, it can be reproduced with any improvements which experience may indicate. The present organization of the artillery into regiments is liable to obvious objections. The service of artillery is that of batteries, and an organization of batteries into a corps of artillery would be more consistent with the nature of their duties. A large part of the troops now called artillery are, and have been, on duty as infantry; the distinction between the two arms being merely nominal. This nominal artillery in our service is entirely disproportionate to the whole force, and greater than the wants of the country demand. I therefore commend the discontinuance of a distinction, which has no foundation in either the arms used, or the character of the service expected to be performed.

In connection with the proposition for the increase of the army, I have presented these suggestions with regard to certain measures of reform, as the complement of a system, which would produce the happiest results from a given expenditure, and which I hope may attract the early attention, and be deemed worthy of the approval, of Congress.

The recommendation of the Secretary of the Navy, having reference to more ample provisions for the discipline and general improvement in the character of seamen, and for the re-organization and gradual increase of the navy, I deem eminently worthy of your favorable consideration. The principles which have controlled our policy in relation to the permanent military force, by sea and land, are sound, consistent with the theory of our system, and should by no means be disregarded. But limiting the force to the objects particularly set forth in the preceding part of this message, we should not overlook the present magnitude and prospective extension of our commercial marine, nor fail to give due weight to the fact, that besides the two thousand miles of Atlantic seaboard, we have now a Pacific coast, stretching from Mexico the British possessions in the north, teeming with wealth and enterprise, and demanding the constant presence of ships-of-war. The augmentation of the navy has not kept pace with the duties properly and profitably assigned to it in time of peace, and it is inadequate for the large field of its operations, not merely in the present but still more in the progressively increasing exigencies of the wealth and commerce of the United States. I cordially approve of the proposed apprentice system for our national vessels, recommended by the Secretary of the Navy.

The occurrence, during the last few months, of marine disasters of the most tragic nature, involving great loss of human life, has produced intense emotions of sympathy and sorrow throughout the country. It may well be doubted whether all these calamitous events are wholly attributable to the necessary and inevitable dangers of the sea. The merchants, mariners, and shipbuilders of the United States, are, it is true, unsurpassed in far-reaching enterprise, skill, intelligence and courage, by any others in the world. But, with the increasing amount of our commercial tonnage in the aggregate, and the larger size and improved equipment of the ships now constructed, a deficiency in the supply of reliable seamen begins to be very seriously felt. The inconvenience may, perhaps, be met, in part, by the regulation for the introduction, into our merchant ships of indented apprentices; which, while it would afford useful and eligible occupation to numerous young men, would have a tendency to raise the character of seamen as a class. And it is deserving of serious reflection, whether it may not be desirable to revise the existing laws for the maintenance of discipline at sea, upon which the security of life and property on the ocean to so great an extent depend. Although much attention has already been given by Congress to the proper construction and arrangement of steam vessels and all passenger ships, still it is believed that the achievements of science and mechanical skill in this direction have not been exhausted. No good reason exists for the marked distinction, which appears upon our statutes between the laws for protecting life and property at sea, and those for protecting them on land. In most of the States severe penalties are provided to punish conductors of trains, engineers, and others employed in the transportation of persons by railway, or by steamboats on rivers. Why should not the same principle be applied to acts of insubordination, cowardice, or other misconduct on the part of masters and mariners, producing injury or death to passengers on the high seas, beyond the jurisdiction of any of the States, and where such delinquencies can be reached only by the power of Congress? The whole subject is earnestly recommended to your consideration.

The report of the Postmaster General, to which you are referred for many interesting details in relation to this important and rapidly extending branch of the public service, shows that the expenditure of the year ending June 30, 1854, including one hundred and thirty-three thousand four hundred and eighty-three dollars of balance due to foreign offices, amounted to eight million seven hundred and ten thousand nine hundred and seven dollars. The gross receipts during the same period amounted to six million nine hundred and fifty-five thousand five hundred and eighty-six dollars; exhibiting an expenditure over income of one million seven hundred and fifty-five thousand three hundred and twenty-one dollars, and a diminution of deficiency, as compared with the last year, of three hundred and sixty-one thousand seven hundred and fifty-six dollars. The increase of the revenue of the department, for the year ending June 30, 1854, over the preceding year, was nine hundred and seventy thousand three hundred and ninety-nine dollars. No proportionate increase, however, can be anticipated for the current year, in consequence of the act of Congress of June 23, 1854, providing for increased compensation to all postmasters. From these statements it is apparent that the Post Office Department, instead of defraying its expenses, according to the design at the time of its creation, is now, and under existing laws must continue to be, to no small extent, a charge upon the general treasury. The cost of mail transportation, during the year ending June 30, 1854, exceeds the cost of the preceding year by four hundred and ninety-five thousand and seventy-four dollars. I again call your attention to the subject of mail transportation by ocean steamers, and commend the suggestions of the Postmaster General to your early attention.

During the last fiscal year eleven million seventy thousand nine hundred and thirty-five acres of the public lands have been surveyed, and eight million one hundred and ninety thousand and seventeen acres brought into market. The number of acres sold is seven million thirty-five thousand seven hundred and eighty-five, and the amount received therefor nine million two hundred and eighty-five thousand five hundred and thirty-three dollars. The aggregate amount of land sold, located under military scrip and land warrants, selected as swamp lands by States, and by locating under grants for roads, is upwards of twenty-three millions of acres. The increase of lands sold, over the previous year, is about six millions of acres; and the sales during the two first quarters of the current year present the extraordinary result of five and a half millions sold, exceeding by nearly four millions of acres the sales of the corresponding quarters of the last year, thus increasing to an extent unparallelled during any like period in our past history the amount of revenue provided from this source for the Federal Treasury.

The commendable policy of the government, in relation to setting apart public domain for those who have served their country in time of war, is illustrated by the fact, that since 1790 no less than thirty millions of acres have been applied to this object.

The suggestions, which I submitted in my annual message of last year, in reference to grants of land in aid of the construction of railways, were less full and explicit than the magnitude of the subject and subsequent developments would seem to render proper and desirable. Of the soundness of the principle then asserted with regard to the limitation of the power of Congress, I entertain no doubt; but in its application it is not enough that the value of lands in a particular locality may be enhanced; that, in fact, a larger amount of money may probably be received, in a given time, for alternate sections, than could have been realised for all sections, without the impulse and influence of proposed improvements. A prudent proprietor looks beyond limited sections of his domain, beyond present results, to the ultimate effect which a particular line of policy is likely to produce upon all his possessions and interests. The government, which is trustee, in this matter, for the people of the States, is bound to take the same wise and comprehensive view. Prior to and during the last session of Congress upwards of thirty millions of acres of land were withdrawn from public sale with a view to applications for grants of this character pending before Congress. A careful review of the whole subject led me to direct that all such orders be abrogated, and the lands retored to market; and instructions were immediately given to that effect. The applications at the last session contemplated the construction of more than five thousand miles of road, and grants to the amount of nearly twenty millions of acres of the public domain. Even admitting the right on the part of Congress to be unquestionable, is it quite clear that the proposed grants would be productive of good, and not evil? The different projects are confined, for the present, to eleven States of this Union, and one Territory. The reasons assigned for the grants, show that it is proposed to put the works speedily in process of construction. When we reflect, that since the commencement of the construction of railways in the United States, stimulated as they have been by the large dividends raised from the earlier works over the great thoroughfares, and between the most important points of commerce and population, encouraged by State legislation, and pressed forward, by the amazing energy of private enterprise, only seventeen thousand miles have been completed, in all the States in a quarter of a century;—when we see the crippled condition of many works commenced and prosecuted upon what are deemed to be sound principles and safe calculations;—when we contemplate the enormous absorption of capital withdrawn from the ordinary channels of business, the extravagant rates of interest at this moment paid to continue operations, the bankruptcies not merely in money, but in character, and the inevitable effect upon finances generally;—can it be doubted that the tendency is to run to excess in this matter? Is it wise to augment this excess by encouraging hopes of sudden wealth expected to flow from magnificent schemes dependent upon the action of Congress? Does the spirit, which has produced such results, need to be stimulated or checked? Is it not the better rule to leave all these works to private enterprise, regulated, and, when expedient, aided by the co-operation of States? If constructed by private capital, the stimulant and the check go together, and furnish a salutary restraint against speculative schemes and extravagance. But it is manifest that, with the most effective guards, there is danger of going too fast and too far.

We may well pause before a proposition contemplating a simultaneous movement for the construction of railroads, which, in extent, will equal, exclusive of the great Pacific road and all its branches, nearly one-third of the entire length of such works, now completed in the United States, and which cannot cost, with equipments less than one hundred and fifty millions of dollars. The dangers likely to result from combinations of interests of this character, can hardly be over estimated. But, independently of these considerations, where is the accurate knowledge, the comprehensive intelligence, which shall discriminate between the relative claims of these twenty-eight proposed roads, in eleven States and one Territory? Where will you begin, and where end? If to enable these companies to execute their proposed works, it is necessary that the aid of the general government be primarily given, the policy will present a problem so comprehensive in its bearings, and so important to our political and social well being, as to claim, in anticipation, the severest analysis. Entertaining these views, I recur with satisfaction to the experience and action of the last session of Congress, as furnishing assurance that the subject will not fail to elicit a careful re-examination and rigid scrutiny.

It was my intention to present, on this occasion, some suggestions regarding internal improvements by the general government, which want of time at the close of the last session prevented my submitting on the return to the House of Representatives, with objections, of the bill entitled, "an act making appropriations for the repair, preservation and completion of certain public works heretofore commenced under authority of law;" but the space in this communication already occupied with other matter of immediate public exigency constrains me to reserve that subject for a special message, which will be transmitted to the two Houses of Congress at an early day.

The judicial establishment of the United States requires modification, and certain reforms in the manner of conducting the legal business of the government are also much needed; but as I have addressed you upon both of these subjects at length before, I have only to call your attention to the suggestions then made.

My former recommendations, in relation to suitable provisions for various objects of deep interest to the inhabitants of the District of Columbia, are renewed. Many of these objects partake largely of a national character, and are important, independently of their relation to the prosperity of the only considerable organized community in the Union, entirely unrepresented in Congress.

I have thus presented suggestions on such subjects as appear to me to be of particular interest or importance, and therefore most worthy of consideration during the short remaining period allotted to the labors of the present Congress.

Our forefathers of the thirteen United Colonies, in acquiring their independence, and in founding this Republic of the United States of America, have devolved upon us, their descendants, the greatest and most noble trust ever committed to the hands of man, imposing upon all, and especially such as the public will may have invested, for the time being, with political functions, the most sacred obligations. We have to maintain inviolate the great doctrine of the inherent right of popular self-government; to reconcile the largest liberty of the individual citizen, with complete security of the public order; to render cheerful obedience to the laws of the land, to unite in enforcing their execution, and to frown indignantly on all combinations to resist them; to harmonize a sincere and ardent devotion to the institutions of religious faith with the most universal religious toleration; to preserve the rights of all by causing each to respect those of the other; to carry forward every social improvement to the uttermost limit of human perfectibility, by the free action of mind upon mind, not by the obtrusive intervention of misapplied force; to uphold the integrity and guard the limitations of our organic law; to preserve sacred from all touch of usurpation, as the very palladium of our political salvation, the reserved powers of the several States and of the people; to cherish, with loyal fealty and devoted affection, this Union, as the only sure foundation on which the hopes of civil liberty rest; to administer government with vigilant integrity and rigid economy; to cultivate peace and friendship with foreign nations, and to demand and exact equal justice from all, but to do wrong to none; to eschew intermeddling with the national policy and the domestic repose of other governments, and to repel it from our own; never to shrink from war when the rights and the honor of the country call us to arms, but to cultivate in preference the arts of peace, seek enlargement of the rights of neutrality, and elevate and liberalize the intercourse of nations; and by such just and honorable means, and such only, whilst exalting the condition of the Republic, to assure to it the legitimate influence and the benign authority of a great example amongst all the powers of Christendom.

Under the solemnity of these convictions, the blessing of Almighty God is earnestly invoked to attend upon your deliberations, and upon all the counsels and acts of the government, to the end that, with common zeal and common efforts, we may, in humble submission to the Divine will, co-operate for the promotion of the supreme good of these United States.

FRANKLIN PIERCE.

WASHINGTON, December 4, 1854.

THE CHRISTIAN'S WORK.—Dr. Cumming beautifully remarks:—"The builder builds for a century; we for eternity. The painter paints for a generation; we forever. The poet sings for an age; we forever. The statuary cuts out the marble that soon perishes; let us try to cut out the likeness of Christ, to endure for ever and ever. A hundred thousand men were employed in Egypt to construct a pyramidal tomb for a dead king; let us feel that we are engaged in a far nobler work in constructing temples for the living God. In my humble judgment, the poorest parish school in our land, with no other ornaments than the dew-drops of the morning to gild it, and the sunbeams to shine upon it, is a nobler spectacle than the loftiest European cathedral, with its spires glistening in the setting and rising suns of a thousand years."

PROGRESS IN GENERAL.

Education is the cultivation of all man's powers—physical, intellectual, moral. It develops the whole man. This development is ever to be guided by high and holy motives, religious motives. Viewed in this light, education is important, essential, the business, indeed, of life. In this broad sense, man must and will be educated in some way, either for good or evil. The right kind of education must enlighten the intellect, restrain the passions, give energy and decision to the will, prepare the young for varied, important, and responsible stations—not only this, but it will prepare him for spiritual pleasures, for enjoyment in the companionship of books, and the society of the learned, enabling them to pass their days with pleasure and profit, not only to themselves, but to others. That such an education is desirable to society, to nations, need not be argued. The recent progress of an education similar to this, though defective, as yet, in some particulars, doubtless, we have heretofore briefly sketched.

This awakening of mind by education has been followed by a corresponding development of science and art. Discoveries and inventions have crowded thick upon our astonished gaze. They are rapidly revealing and subduing new mysteries and powers of nature. Astronomy has revealed new and sublime wonders in the heavens. Chemistry has been interrogating nature respecting her mysteries, and she has been compelled to disclose many and important truths. Geology has made known strange and valuable facts concerning the formation, history, and resources of the earth. Botany has been diligently at work in the enchanting floral regions. Zoology has been earnestly exploring its way among all animals. Meteorology has, of late, directed weatherward its careful, observant eye, watching with intent interest each changing cloud, each variation of wind or temperature, each sign in the heavens. Phrenology, too, and mesmerism, have made something of a stir.

Invention has not been behind discovery. Some sixteen thousand patents have been issued from the national patent office within the present century. Invention is fast adapting to the wants of society the hitherto unapplied laws and powers of nature. Man, by this means, is fast gaining dominion over nature, bringing her to supply his wants and administer to his pleasure and progress.

Internal improvements have rapidly increased. Canals have been excavated, and are sending through the country their rich freightage. Railroads are weaving their networks all over the land, and shooting back and forth their long trains of human life. Steamboats and steamships—modern achievements—are now furrowing rivers, lakes, and oceans, binding together States and Nations in the strong bands of commerce. The great system of post-offices is scattering like leaves of autumn messages of love and light among the people. Then, there is the telegraph, at once the pride and index of the age, stretching its wire pens all over the country, annihilating time and space.

Benevolent enterprises of the day have kept pace with the other great enterprises. The present seems to be developing itself on many sides, in many ways. The great system of Sabbath-school instruction had just begun to dawn upon the world at the opening of the present century. Its teachers, its press, its colporteurs, are operating with their vast and varied forces upon the youthful mind of the world, for good. Institutions for the blind and for deaf mutes, lunatic asylums and idiotic asylums, have rapidly sprung up on every hand, all indicative of a far-reaching, comprehensive, and progressive Christian benevolence.

Then there has been springing up, during this same period, the various practical reforms of the day, urged forward by Christian sympathy and effort, and lighted and guided by Christian education. The great Temperance Reform has commenced its career, and advanced from one triumph to another, till it has given the assurance of ultimate success. Whole States are already its trophies. Anti-Slavery has sprung up, and is gradually extending its evergreen branches. The Peace Reform is extending the fraternal hand to the nations of the earth. Moral Reform, Prison Discipline, and kindred other benevolent operations, have given a new life, infused a new spirit, into the operations of Christian benevolence and activity. Then there are the Tract and the Bible Societies, and, above all, the great missionary operations, the crowning glory of the age.

These indicate an active and comprehensive benevolence and philanthropy, that doubtless has not been excelled since the days of the apostles, and is one of the loveliest and brightest features of the age. Men are beginning to learn, that giving money for the advancement of education and religion, for the spread of truth, justice and mercy, and the alleviation of the sorrows of humanity, is far nobler than to hoard it up or spend it in physical gratifications. It is only within the last thirty or forty years that the Christian has begun fully to taste the sweets of giving his money to systematic organizations for blessing the world, and to behold the effects of such gifts, flowing onward in perennial streams of good. Well may our hearts swell with love and gratitude, in view of these various signs of progress.

These great movements have not yet spent their force. Their career is not yet run. They are, doubtless, to continue their course with augmented velocity and power. Indeed, the great work of civilizing, Christianizing the world, has but just commenced. Education will have more efficient agents, more ample means for the diffusion of her blessings. She will have better common schools, with more ample funds for their support—better endowed academies, colleges, and professional schools, with more able instructors, and a far larger number of youth flocking to their portals for instruction. Science, and art, and invention, and discovery, are to march on with giant strides from conquest to conquest. Ignorance, and superstition, and prejudice, are yet ranging rampant over this fair earth. We have only just begun to subdue nature. Her treasures, her resources, and her powers, are yet but partially the servants and aids of man. Reform is but just beginning to battle the massive and adamantine forms of error, that stand thick round about on every side. Benevolence is but just beginning to thaw up the heart of humanity. Religion, too, is shooting out luxuriant branches over all the earth, whereon grow leaves that are for the healing of the nations.

These improvements, this progress, furnish many and great facilities for doing good, and weighty are the responsibilities imposed upon us by these facilities. It requires a different preparation, a more varied culture, for the activities of life, now, when a printing press will strike off as many words in a single hour as could have been given to the world with fifty years of writing before the invention of the art of printing. It requires different preparation now, to keep even-handed with the world, when periodical and other literature is being scattered round about like autumn leaves, than in the time of Franklin, when two or three small newspapers were thought to be all that the Colonies would have time or disposition to read. Previous to railroads, and steamboats, and telegraphs, and the broad net-work of common and higher schools, and foreign missions, and republics, the demands upon the young, preparing for usefulness and influence, were quite unlike those of the present.

*

COST OF NEWSPAPERS.

In several of our exchanges, articles have lately appeared, setting forth that "the present are hard times for newspapers." Within the past year there has been a large increase in the cost of office-room, paper, printers' wages—indeed, of almost every thing which goes to make up the expenses of a newspaper establishment. To meet this, a good many papers have raised their subscription price; others have reduced their dimensions; and others have given a larger space to advertisements. The New York *Baptist Register*, one of the oldest papers published in the State, says:—

"The cost of newspaper publishing has increased full twenty-five per cent., in less than two years. Unless by some method white paper is reduced in price, and that too soon, many of the journals now published must go down. It has long been true, that newspaper publishing was among the least remunerative of occupations, and the truth has of late obtained a startling significance. We must have a cheaper article of white paper, or newspapers will be reduced in number full one-half."

The New Orleans *Christian Advocate*, a Methodist paper, "after trying an experiment of two years," gives notice that it cannot be supported at $1,50 per annum, and that after the first of November the price will be "raised to $2 in advance, $2,50 in six months, and $3 at the end of the year."

The *Puritan Recorder* gives the following account of a recent discussion on the subject, in one of the Synods of Ohio:—

"At the late meeting of the Western Reserve Synod, an overture was made for the union of the Ohio Observer, published at Hudson, with the Central Herald, published at Cincinnati. The Synod answered, that it was very important that they should have a paper on their own field. They urged that arrangements should be made for the continuance of the Observer. But in case this could not be done, they consented that the paper should be transferred to the Herald, or to the New York Evangelist. The present are trying times for newspapers. To raise the price of a newspaper is no easy matter; and to sustain papers that did but barely live before, now that the expense of publishing has so increased, is still more difficult. All are looking for relief in the finding of some material from which paper can be manufactured at a cheaper rate. It is probable, however, that many papers will die before any relief comes from that quarter."

The publishers of the *Gospel Herald*, the Universalist paper printed at Indianapolis, Ind., have concluded to enlarge their journal, and to increase the price. In justification of this course, they offer the following suggestions:—

"The *Herald* is to be enlarged, and the price of a single subscription raised to two dollars. It is but justice to say, however, that the enlargement will not be in proportion to the increase in the price. This latter measure has been forced upon us by an invincible necessity. When two years ago the *Herald* was enlarged, and the price fixed at one dollar and fifty cents per annum, it was known to be at the *very lowest figure*, and yet it was believed that with prudence and economy in its management it might be afforded at that price. And so it could have been, had things remained as they were then. But prices have advanced, and labor, material, rent, fuel, meat and bread, are much higher than they were, and it is impossible to publish a paper without a very large increase of expenses, over what was then necessary. The consequence has been that most of the leading journals of the day have been compelled to cut down their dimensions or increase their price. Perhaps some good old brother, who is a farmer, will say, 'I do not like the idea of paying two dollars for a paper now for which I only paid one dollar and fifty cents two years ago.' Very likely, and our reply is, we do not much like the idea of paying you one dollar and twenty-five cents per bushel and twenty-five cents per pound, for the same sort of potatoes and butter that we could buy two years ago for fifty and ten cents. But we are compelled to do it nevertheless. Our good brother should remember, that while we cannot buy as much bread and meat with the price of a year's subscription, at the advanced rate, as we could with the price heretofore charged two years ago, he can pay for his paper with *less* of the produce of his farm *now* than he could *then*. We trust that all our subscribers will see the cogency of the reasons we have given for the proposed change; and that none will so far disregard the principles of justice and equity as to leave us on that account."

In common with our cotemporaries, we feel the effect of the general increase in the cost of whatever is necessary to the issuing of a newspaper. We do not propose, however, to increase our subscription price; we only ask that those to whom we send the paper pay promptly the present price. We are just entering on the last half of the current volume—a time when large payments have to be made, and large receipts may reasonably be expected. If three or four hundred of our subscribers who have not paid for the current volume, would forward their subscriptions at once, they would do a just thing, and greatly relieve the establishment.

THE OHIO ASSOCIATION.

The Ohio Association held its fourth annual session with the Church in Jackson, Shelby Co., Ohio, commencing on Fifth-day, Oct. 12, 1854, at 10 o'clock A. M. The introductory discourse was preached by Benjamin Clements, from Matt. 5: 14. After sermon, the Association was called to order by the Moderator of last year, and a Committee appointed to nominate officers for the ensuing year. Ministers and brethren of sister Associations were invited to participate in our deliberations. Adjourned to meet at 3 o'clock.

Assembled agreeable to adjournment. After prayer by Hiram W. Babcock, the Committee to nominate officers for the ensuing year presented their report, which was as follows—*Moderator*, Ezekiel P. Stout; *Secretaries*, Eli Forsythe and Joseph G. Maxson; *Treasurer*, Maxson Babcock.

The Letters from the Churches showed the following as the statistics:—

Stokes' Church—Simeon Babcock, pastor; Wm. Furrow, deacon; Job Kennedy, clerk. Added 8, rejected 2, total 32.

Jackson Church—Simeon Babcock, pastor; Maxson Babcock and Benjamin Clements, licentiates; John Forsythe and J. G. Babcock, deacons; J. G. Maxson, clerk. Dismissed 1, added 1, deceased 2, total 81.

Eld. H. W. Babcock was cordially received as a delegate from the Western Association. It was voted, that J. H. Babcock be a committee to audit the Treasurer's accounts; that H. W. Babcock and B. Clements be a committee on resolutions; that Joel Babcock and J. D. Maxson be a committee on preaching arrangements; that John Forsythe, Eli Forsythe, and Job Kennedy, be a committee on the state of religion; and that B. Clements write the Corresponding Letter.

The Corresponding Secretary of last year reported no correspondence. Voted, that Maxson Babcock be our Corresponding Secretary for the ensuing year.

Adjourned to 8 o'clock to-morrow morning.

Met agreeable to adjournment; prayer by Dea. Wm. Furrow.

Resolved, That Job Kennedy Samuel Lippincott, Eli Forsythe, John P. Forsythe, and Jacob H. Babcock, be the Executive Committee for the ensuing year.

The Treasurer's Report was received and referred to the Auditing Committee. The Report on the State of Religion was received. The Report of the Committee on Resolutions was received and made the special order of the afternoon session. The Report of the Auditing Committee was received. The Secretaries were instructed to revise the Minutes and forward a copy to the editor of the *Sabbath Recorder* for publication.

Resolved, That when we finally adjourn, it be to meet with the Jackson Church, on Fifth-day before the second Sabbath in October, 1855, and that Eld. Simeon Babcock preach the opening discourse, B. Clements alternate.

Adjourned to meet at two o'clock P. M.

Met agreeably to adjournment; prayer by E. Davis.

The following resolutions were discussed.

1st. *Resolved*, That we look with increased abhorrence upon the vile system of slavery, which robs God of his glory, man of his manhood, and our country of its reputation.

2d. *Resolved*, That in the passage of the Nebraska Bill we have renewed evidence of the aggressive spirit of slavery, and that all compromises of liberty with slavery, are to be deprecated.

3d. *Resolved*, That the stern rebuke the slave propagandists have received in the elections is an occasion of rejoicing and hope to all the friends of religion and humanity.

4th. *Resolved*, That War, with all its awful consequences, is anti-Christian and inhuman.

5th. *Resolved*, That the temperance cause has our deepest sympathy, and that our efforts in the grand enterprise shall never cease until the evil is entirely removed from our world.

6th. *Resolved*, That in the opinion of this Association, the Secret Societies of the present day are opposed to the spirit of the gospel, and consequently are unworthy of the confidence and support of Christian people.

7th. *Resolved*, That we deem it our duty to cherish a lively interest in the success of the missionary enterprize, both home and foreign, and that, we will give it our hearty co-operation and support.

8th. *Resolved*, That the safe arrival and continued health of our missionary brethren in Palestine, and the preservation of our missionary brethren amidst the war in China, are occasions of gratitude to God.

Business being unfinished, adjourned to meet First-day morning, at 8 o'clock.

Met First-day morning. After prayer by Eld. H. W. Babcock, the Executive Committee of last year reported as follows:—

Your Executive Committee of last year would respectfully report, that when we came into office we found Eld. Joshua Hill in the missionary field of the Association, under the supervision of our predecessors. The arrangements between Eld. Hill and the committee were found to be somewhat indefinite, there being a subscription taken up to sustain him in the field one year, or as long as he should be thought useful, and he claimed it to be at least one year or longer. The committee had no disposition to interfere with that arrangement, and accordingly Eld. Hill was kept in the field until the 1st of January last, when he refused to serve any longer in that capacity. Prior to that time the Committee appointed two of their number to correspond with Eld. T. E. Babcock on the subject of missionary labor, with the view of supplying the churches when the arrangements with Eld. Hill should cease, and such correspondence was performed, but without success; and we are now without a missionary, and have been since Eld. Hill refused to serve us any longer. The Committee would suggest, that in their opinion our people are fully able, and would show their willingness to support a missionary, could a suitable man be obtained. Eld. Hill refused to give his reasons for the course he pursued in leaving us without a missionary, notwithstanding he was inquired of on this particular, and the committee was left to opine as to the reasons, which they are constrained to conclude grew out of a jealousy on his part, because we had corresponded with another man on the subject of missionary labor. The committee agreed to let him have all that could be collected of the subscription taken up for the purpose of securing one year's services, for six and one half months labor.

Report on the State of Religion.

Brethren, while looking over our beloved Zion, we have to mourn that so much coldness and apathy of soul seem to prevail among us, and the world too has found too much room in our hearts. Although, since our last anniversary, several have been added to our numbers, we seem to have made small progress. Yet there are those among us who stand firmly to their posts, and labor ardently to be found serving Him whom their soul loveth. But in view of all the circumstances attending us, we feel that we ought to clothe ourselves in sackcloth, and cry to God to forgive our many sins, and give us wisdom to direct us in future to serve him in that way that we may best promote his cause and kingdom here in the world.

Corresponding Letter.

The Ohio Association of Seventh-day Baptist Churches to her sister Associations of like faith and order, and all who keep the commandments of God and the faith of Jesus Christ:

DEAR BRETHREN,—We have been permitted, through the providence and grace of our heavenly father, to meet again in an associated capacity, for which we desire to be thankful, and would desire to take courage and go forward in the great duties assigned us as a humble portion of the church militants on earth. We are not able to speak of any signal success within our bounds, but are glad to be able to report a good degree of union on the great subjects connected with the Redeemer's Kingdom, and we desire to rely upon the promise of Christ, that where two or three agree as touching the great interests of his Kingdom and human salvation, he will answer the request; and we hope for an exhibition of the power and goodness of God in the awakening and stirring up to duty of the children of God, and the bringing into the fold of Christ the lost sheep that have gone astray, with a mighty ingathering of precious souls to Christ, from the ranks of the enemy. Our means are limited, our influence is circumscribed, and our position isolated, being far removed from our sister churches of like faith, and we ask your Christian sympathy and prayers, and should any of our brethren in their travels in this world find it convenient to visit us, we will extend to them our warmest Christian friendship. Our prayer is, that the good work may prosper and Christ's Kingdom be set up on the earth.

MISSIONARY CIRCULAR.

The Circular sent out by the Committee of the Board, a few weeks since, asking aid to purchase land for an agricultural department of the Palestine Mission, has called up several questions, on which explanations are asked. These explanations we give publicly, for the information of all who may wish to know.

1st. All property purchased on any of our missionary stations, for the use or convenience of the missions and missionaries, belongs to the Society, and not to the missionaries, and is under the control of the Board. This includes real estate, farming implements, library, household furniture, and every description of articles that are not particularly designed for individual use.

2d. The proposed agricultural department of the Palestine Mission is to be under the sole control of Bro. Charles Saunders, and he is required by the Board to give a full report of all its expenses, and all its receipts from its products—what has been raised, and how it has been used. The products of this department belong to the Society, and not to the missionaries.

3d. The Board does not expect any purchases to be made until our missionaries have had full opportunity to select the most eligible location, and are agreed therein. It is important for them to have the money for making a purchase when they have made a proper selection.

4th. Measures have been taken to get the Society incorporated. The committee appointed for the purpose have obtained the necessary information, and are directed to proceed in the matter, till it is consummated. This will doubtless be done soon.

5th. The Board have made no appointment of missionaries for a limited time, but expect all that are under appointment to labor during life. If any have gone out with the intention of returning after "having made a pleasant tour of a few years," they have concealed it from the Board. Such a thought we cannot entertain. And the Board would not recall any of their missionaries, or consent to their return, without reasons that would be satisfactory to the Society.

6th. Articles of wearing apparel have been asked for by Bro. Jones, to be distributed to the needy. The Board will receive and forward all articles that may be furnished them by the benevolent in the denomination for this purpose. J. BAILEY, Cor. Secretary.

GERMAN EMIGRATION TO PALESTINE.

The official *Gazette* in Wurtemburg recently published some account of the plans now rife in that country for emigration to Palestine. A "Society for the bringing together of God's people in Jerusalem" has constituted itself, and among other proceedings prepared a petition to the Bund at Frankfort, the purport of which is as follows: That the Assembly of the German Confederation will be pleased, through the agency of the two great powers of Germany, to induce the Sultan to permit the "Society for the bringing together of God's people in Jerusalem" to found committees in the Holy Land, under the following conditions: 1. Self-government in all civil and religious matters, that they may be able to be arranged entirely according to God's word. 2. Security for person and property against the arbitraments of Turkish officials, and against uncontrolled and oppressive taxes. 3. Exemption from Turkish military service. 4. Guarrantee of the same rights to every one who shall subsequently become a member of this society, whether he may have previously been Christian, Jew, or Mahomedan, Turk or foreigner. 5. The assignment of the Holy Land to these communities, in order that they may settle there conformably to the object and purpose which they have stated above.

The paper from which we gather the foregoing facts suggests the possibility, that this whole movement may be a grand emigration swindle; but adds the following as indicative that some pious persons are connected with it:—

"During the sittings of the Evangelical Kirchentag, the seventh of which was held in Frankfort towards the close of September, a number of its members endeavored to procure the adoption of a motion, that Kirchentag should in its totality apply to the Bund to take steps to procure the Holy City of Jerusalem to be declared a free town, and under the protectorate of the Great Powers of Europe. Some of the leading members of the meeting, possessed of a little more worldly wisdom than these enthusiasts, advised them first to apply to the Sovereigns of Austria and Prussia, and endeavor to induce them to favor their views when engaged in settling the terms of a peace and in arranging the affairs of the East in general."

The Jewish Chronicle, referring to this extraordinary movement, says:—

"The origin of this idea of the great exodus is the peculiar view of the present social relations generally, and of religious life especially. Both are considered to have fallen into decay to that extent that it is the duty and requirement of every one, to whom the will of God and her own true salvation are yet dear, to disengage himself betimes from this degenerating position. This the masses can accomplish only by turning their back to the Babel, and gathering together in the Holy Land; there, unaffected by corrupt influences, to form a state in which the will of God, as the highest law, shall be recognized in its full power, and arrive at the desired consummation. As far as we can learn, the petition to be laid before the Diet has already received the signature of 300 families. This intelligence is the more remarkable, since the families thus resolved to leave their fatherland for Palestine are not of the Jewish but of the Christian faith."

WORK OF THE BIBLE.—Not far from Genoa the Cereghini families, including forty individuals, reside, all of whom make a profession of saving truth. It is remarkable that their conversion was owing, not to the preaching of the gospel, but to the reading of a Bible, which was purchased out of mere curiosity; the private reading of that volume was the instrument, in the hand of God, of opening their minds to the truth as it is in Jesus. Since they have made an open profession of their faith, they have suffered much persecution, but it appears, from a visit lately made to them by a Free Church minister, that they continue steadfast in the faith, and are forming the germ of a Christian Church at Favale. The Waldensian Table (Presbytery) is now erecting for them a house and school, where a teacher or evangelist may be permanently located. This interesting community stands much in need of the prayers and pecuniary aid of all who love the Bible.

THE NEW VICE-PRESIDENT.—The Albany *Evening Journal* thus announces the election of the Hon. Jesse D. Bright, Vice-President, *pro tem*:—

"The Hon. Mr. Bright, who has been chosen President of the Senate, and who is, by virtue of that office, acting Vice-President of the United States, is, we believe, a native of this State. David G. Bright, Esq., the Senator's father, was Collector of the Internal Revenue at Plattsburgh, Clinton County, during the War of 1812. Some years after that he removed to Norwich, Chenango County, and in 1819 was made Clerk of that County by the old Council of Appointment. The two sons, David and Michael, who have since become prominently and influentially identified with the political history of Indiana, then mere boys, gave promise of usefulness. The father, ever an ardent politician of the Democratic school, (though then a Clintonian Democrat,) made politics a part of the education of his sons. Mr. Bright moved to Indiana in 1821, where he lived to see his sons occupying high positions, and enjoying largely the respect and confidence of the people, and then numbering more than four score years, closed his patriarchal life. He was an honest, warm-hearted man."

FRUITS OF PUSEYISM.—The London correspondent of the Philadelphia *North American* alludes to a secession in the English Church in the following terms:—

"Some excitement has been occasioned by the secession of Archdeacon Wilberforce from the Church of England. He was the author of a work on the Eucharist, and for some of the doctrines there promulgated the archbishop of this diocese commenced proceedings against him, but these being abandoned, the archdeacon resigned his preferments and offices in the Church of England, and has since given his reasons, and in doing so declares himself a believer of Catholic doctrine, and, therefore, has become a member of that faith. He is the brother of the present bishop of Oxford, and has a brother who also gave up some rich church preferments to embrace the Catholic faith. As a symptom of the extent to which the tenets of Puseyism are obtaining in the church, the Rev. Dr. Walter, rector of St. Columbus, who has been picked out as the probable first bishop of the next See of Cornwall, actually refused to read the prayer of thanksgiving recently delivered in all the churches, on the ground that he denied the Queen's supremacy in ecclesiastical matters."

DR. ALBERT COHEN.—The Jewish *Chronicle* says that this worthy philanthropist, long celebrated for his services in Algiers, and who has recently visited Turkey, Egypt, and Palestine, with a view of ameliorating the condition of his Jewish brethren of those countries, recently arrived in London. As regards the Jews in Palestine, he had succeeded in bringing the efforts of Messrs. Rothschild of Paris, and his own plans, in harmony with those of Messrs. Rothschild of London, Sir Moses Montefiore, and Rev. Dr. Adler, the Chief Rabbi. These benevolent men now co-operate in regenerating the fallen position of the Jews in the Holy Land; whilst Dr. A. Cohen, of his own accord and at his own expense, has introduced the modern system of education among the Jews of Costantinople, Smyrna, Cairo, Alexandria, etc. Documents in connection with a visit to the Emperor of Austria, the Sultan, and with the charitable institutions he has founded in the Holy Land, such as hospitals, benevolent loan societies, workshops, etc., will be shortly laid before the public.

MINISTERIAL SUPPORT.—Dr. Lynd mentions a case, and asks with reference to it, a pertinent question: "A minister, recently deceased, was the instrument of receiving several thousands into churches where he labored. He has left his family in destitute circumstances; and who, of all the thousands he received, will support his family? One is almost tempted to ask the question, Did this minister obey the law which required him to provide for his own household? It is true, they were provided for while he lived, but does this fulfill the spirit of the requirement? If it does, then by what right does any Christian lay up provision for his family after his death? Why is not the whole of his surplus devoted to the cause of God? Why is he not bound to trust God's providence, as regards his wife and children, as much as the minister of the Gospel?"

THE BURNETT PREMIUM.—John Burnett, a merchant of Aberdeen, some 60 or 80 years ago left a portion of his estate, the proceeds of which were to be applied at the end of every forty years, to awarding the authors of the best two treatises or essays on the existence and character of God and his Providence, at the same time obviating difficulties regarding his wisdom and goodness. The premiums are to be awarded the present year to Prof. Powell, of Oxford, Henry Rogers, and Mr. Isaac Taylor, the well-known author; the first being £1,800, and the second £600. Two hundred and eight treatises have been given in. The adjudicators state that some of them are of a high order of mind, and furthermore that their award will shortly be made. The subject excites great interest in the literary-Christian circles of Scotland and England.

CHURCH-BUILDING AND PROGRESS.—One of our exchanges gives the following facts in the way of church-building, as evidences of the "energy and progress of our church:"—

"The Calvary Church in Philadelphia, the Union and First St. Louis, the First Church Buffalo, each cost $100,000; the Madison Square Church, the Fourth Avenue Church, New York City, each $80,000; *three* new churches in Newark, N. J., *three* in Cleveland, Ohio, *three* in Detroit, averaging from $40,000 to $50,000 each; one in Utica, one in Rome, one at Chicago, averaging $40,000; *three* new churches in Washington, D. C., from $15,000 to $20,000 each; churches in Baltimore, Norristown, Indianapolis, Circleville, Norwalk, &c., from $12,000 to $25,000!"

WHAT SHADOWS WE ARE!—A very few years since the Presidential mansion was occupied by a distinguished party, the centre of attraction, and the objects of many attentions—the veteran General Taylor, his wife, and his son-in-law, Colonel Bliss—now they all slumber in the tomb. At a still later period the successor of President Taylor, Mr. Fillmore, with his wife and estimable daughter, were the attractions in that mansion, and now the last two of these are no longer tenants of earth. Thus pale death "knocks at the palace as at the cottage gate."

FRUIT OF HARD TIMES.—The large benevolent societies and denominational institutions are feeling the effects of the present depression of business. The American Tract Society, it is stated, is doing only half work, employing its hands three days per week. The Methodist Book Concern, instead of stopping work whole days, has reduced the working time from ten to eight hours per day. In this way they hope to reduce their expenses and not overdo their business, and at the same time not add to the general distress by increasing the number of idlers.

☞ To our friends having occasion to seek hotel accommodations in New York, we cheerfully commend those of John S. Savery, No. 14 Beekman-st., whose house is conveniently located and well kept.

General Intelligence.

Proceedings in Congress.

Congress was in session only four days last week, having adjourned over from Fifth-day to Second-day. The following paragraphs notice the principal items of business.

In the **Senate**, a letter was read from Mr. Atchison, resigning the Presidency, and Gen. Cass was chosen Chairman pro tem, who was the next day superseded by the election of David G. Bright. Notice was given of a bill to amend the Bounty Land laws so as to give all soldiers 160 acres. A resolution was laid over to have the Committee on Commerce inquire into the expediency of better provision for the preservation of life at sea. Mr. Adams introduced a bill to establish uniform rates of naturalization, and repealing all existing laws therefor. The Japan correspondence was called for. Mr. Cass' bill to improve St. Clair Flatts and St. Mary's River, was referred. The Ocean Mail Steamer bill, unfinished last summer, was called, but postponed. The bill to give certain saline lands to Wisconsin, was adopted—the first bill passed this session. Mr. Badger gave notice of a bill to increase the pay of Members of Congress and of the Judges of the Supreme Court. The death of Presley Ewing (of the House) was communicated.

In the **House**, Mr. Dawson introduced a Homestead bill, as a substitute for that of last session. Mr. Walbridge proposed to admit coal duty free, which was laid over for discussion. Propositions were made to amend the Bounty Land laws. The River and Harbor bill of last session was taken up, but in consequence of the promise of the President to give his reasons for the veto at an early day, an effort was made to postpone it. The Western members resisted—they thought the bill was fully understood, and all were or should be prepared to vote upon it. Mr. Wentworth moved the previous question, and 95 voted in favor to 80 against the passage of the bill over the President's veto. As two-thirds of the members (137) were necessary to pass the bill, of course the vote went for nothing. Bills were introduced: for the annual Indian Appropriation; to pay Invalid Pensions; to improve Rapids in the Mississippi; to sell Reserve Lands in Florida; to make Columbus, Miss., a port of delivery; for the better security of lives on steam vessels—all of which were referred. The bill to remodel the Diplomatic System was sent to the Foreign Affairs Committee. The death of Presley Ewing, of Kentucky, was announced.

European News.

European dates to November 22d have been received.

By this arrival we have the particulars of a battle near Sevastopol on the 5th November. On the morning of that day the Russians, 35,000 strong, attacked the right of the English positions, toward Inkermann. The English batteries were taken and retaken several times. At noon the Russians made a sortie from Sebastopol against the French positions, but were repulsed. The Russians were also ultimately repulsed toward Inkermann, after a bloody battle which lasted eight hours. Their loss was 9,000 killed and wounded. The English loss was also great. Four Generals—Cathcart, Strangways, Goldie, and Torrens—were killed, and four wounded—Brown, Bentinck, Buller, and Adams. Thirty-eight English officers were killed, ninety-six wounded, and two were missing. 442 rank and file were killed, 1,760 wounded, and 156 missing. The French had one General killed, two wounded, fourteen officers killed, and twenty-one wounded. The English Guards lost twenty officers. The Russians fired on the wounded, as well as on the detachments who were sent out to bury the dead on the 7th. General Canrobert was wounded.

The bombardment of Sevastopol continues. Allied re-enforcements were arriving at the rate of one thousand per day. Large bodies of Russians were also said to be pouring in to help the besieged.

The alarm in England seems to be subsiding as to the position of the allied armies in the Crimea, which, with the re-enforcements arriving, were deemed sufficiently strong to carry out the object of the campaign successfully. A winter campaign in the Crimea will evidently take place, and wooden barracks for 20,000 men were being shipped by the British Government.
